For students admitted with a Master's degree the normal minimum requirement is 12 cr .hr at the 7000 level or higher plus a thesis. A maximum of 24 cr .hr. is allowed toward the Ph.D. program. Note: some departments may require more or less credit hours.

After initial registration, the student is expected to complete the program within 7 years.

A residency requirement, consisting of two academic terms at the University of Manitoba, is required as part of the requirements of a Ph.D. program. Please consult specific department/faculty requirements. The student shall be geographically available to visit the campus regularly during this residence period.

## Advance and Transfer Credit

- Students may apply for advance credit for up to half the number of credit hours in their approved programs. These courses will have been taken before the student is admitted into the Ph.D. program.
- Students may receive transfer credit by taking courses at another institution while studying at the University of Manitoba.
- In both of the above cases the student must follow the procedures and regulations as outlined in the current U of M Graduate Calendar.

## Financial Assistance

A fundraising effort is in place to ensure that all students may receive up to $\$ 20,000$ in financial assistance. Those who qualify may apply for regular Ph.D. assistance on a competitive basis (see the Faculty of Graduate Studies website for more information). Students are encouraged to explore other sources of funding.

If you wish to obtain funding, please provide a statement of needs with your application.

## Architecture Interdisciplinary -6000 Level

ARCG 6102 Topics in Environmental Processes Cr.Hrs. 3 A detailed study of some special topics in architecture, city planning, landscape architecture or interior design.

## Architecture Interdisciplinary - $\mathbf{7 0 0 0}$ Level

## ARCG 7100 Cr.Hrs. 3

This course is intended to promote critical thinking and provide opportunities to explore in detail key issues, ideas and theories about design and planning. Considerations may include: The relationship of design and planning theories to the evolution of design and planning practice; Ways in which design and planning theories have been understood to shape built form; Factors that have shaped design and planning theories, their commonalities and disjuncture; Theory discourse as a means of discovering design and planning meaning; The role of theory in practice, research and discovery; The relationship of design and planning theories to other discipline theories as a means of identifying commonalities of interest.

ARCG 7102 Studio Topics in Environmental

## Processes Cr.Hrs. 6

A detailed studio study of some special topics in architecture, city planning, landscape architecture or interior design.

ARCG 7120 ADV RES DES PLN Cr.Hrs. 3
This course is intended to explore research methods pertinent to the study of design and planning. The considerations to be examined may include: Potential research tools and techniques that are pertinent to the exploration of design and planning theory, practice and development; Exploration of emerging research processes and methodologies that inform minority and feminist discourse; Review of the evolution of design and planning methods; Analysis of the relationships between research methods in aligned disciplines as those research methods may inform design and planning understanding.

## Engineering Interdisciplinary Course Description

ENG 7010 The Engineering Design Process Cr.Hrs. 3 (Formerly 130.701) Consideration of the Engineering Design process and the logic upon which it is based. Explores both the history and possible future directions of the process from technical, social and environmental points of view.

## Medicine Interdisciplinary

IMED 7090 Cell Biology Cr.Hrs. 6
(Formerly 165.709) Comprehensive introduction to the structure and function of cells. Prerequisite: consent of instructor.

IMED 7100 Fundamentals of Neuroscience Cr.Hrs. 6 (Formerly 165.710 ) An interdepartmental multidisciplinary course providing a comprehensive overview of cellular, molecular, developmental and systems neuroscience, as well as the neurobiology of disease. Emphasis will be placed on the application of the fundamental principles of neuroscience to contemporary lab research. ANAT 7270 (or 080.727) (offered in alternate years) will provide instruction in neuroanatomy and structure-function in the nervous system. Prerequisite: Permission of instructor.

IMED 7101 Fundamentals of Neuroscience I Cr.Hrs. 3 This lecture-based course covers the fundamentals of cellular/molecular neurobiology and development/plasticity of the nervous system. It will be ofered on a two-year cycle. Students registering must seek the permission of the Course Director (not instructor).

IMED 7102 Fundamentals of Neuroscience II Cr.Hrs. 3 This lecture-based course covers the fundamentals of systems neuroscience and the neurobiology of disease. It will be offered on a two-year cycle. Students registering must seek permission of the Course Director (not instructor).

IMED 7180 Molecular Approaches in Medical
Research Cr.Hrs. 3
(Formerly 165.718) For students who wish to understand advances made in medicine/biology through molecular and developmental approaches. Topics for discussion will be selected from the recent literature in consultation with participating students. The course will consist of lectures and discussions as well as written and oral presentation of papers by the students. Prerequisite: consent of instructor. Offered 2000-2001 and alternate years.

IMED 7190 Medical Immunology Cr.Hrs. 3
(Formerly 165.719) This interdisciplinary courses deals with the molecular and cellular mechanisms underlying immunologically mediated human diseases. Prerequisites: IMMU 7070 (or 072.707) plus cognate courses in human biology or by consent of instructors.

IMED 7200 Cancer Biology Cr.Hrs. 3
(Formerly 165.720) One hour per week on the basic (cellular and molecular) and clinical (diagnostic and treatment) aspects of cancer. Students will give one seminar and submit an essay on an assigned topic. Prerequisite: consent of instructor.

IMED 7240 Nucleic Acids: Manipulation, Structure and Function Cr.Hrs. 3
(Formerly 165.724) DNA technology; nucleic acid metabolism, including DNA replication, DNA repair, transcription, and RNA processing; gene/chromosome structure and rearrangement; mutation detection; gene therapy; positional cloning.

IMED 7290 Developmental Biology Cr.Hrs. 3 (Formerly 165.729) Emphasizes current principles of organ
system development and its application to transgenic approaches to gene function in the context of a whole, developing organism. Prerequisites: IMED 7090 (or 165.709) or ZOOL 2150 (or 022.215) and/or ZOOL 3070 (or 022.307) or consent of instructor. Offered in January 2003 and in alternate years thereafter.

IMED 7300 Microscopy, Optics, Imaging and Analysis in Health Research Cr.Hrs. 3
Theory and practice of modern microscopy, optics, molecular imaging, and analyses used in health research. Participants will gain in depth knowledge through seminars by local and external experts in the field and by hands-on laboratory work in preparing samples for imaging and analyses. Images will be acquired using equipment at the Genomic Centre for Cancer Research and Diagnosis at the Manitoba Institute of Cell Biology. Students will also participate in interactive tutorials and journal club.

IMED 7302 Advanced Molecular Imaging Cr.Hrs. 3 Seminar course in which students will learn about innovative methods and advanced analyses of molecular imaging in biomedical research including 2-dimentional and 3dimensional fluorescent in situ hybridization, live-cell imaging, spectral imaging, and multi-colour imaging. Students will participate in hands-on laboratory exercises, interactive tutorials and journal club.

IMED 7304 Functional Genomics and Whole Genome Analyses Cr.Hrs. 3
Seminar course in which students will learn about functional genomics and approaches to whole genome analyses using array technologies. Course content will be delivered by local and external experts in the field. Students will participate in hands-on laboratory exercises with micro-array platforms and computer-based data analyses, interactive tutorials and journal club.

## Women's Studies Interdisciplinary <br> WOMN 7170 Directed Readings in Women's <br> Studies Cr.Hrs. 3

(Formerly 156.726) Advanced study of selected topics in Women's Studies from an interdisciplinary perspective. The content of the course may vary from year to year and will be arranged by the coordinator of the Women's and Gender Studies Program in consultation with the appropriate representatives of departments. Prerequisite: consent of the Women's and Gender Studies coordinator and the instructor. Students must complete a Reading Course Application Form available from the Women's and Gender Studies office. As the course content will vary from year to year, students may take this course more than once for credit.

## WOMN 7270 Advanced Topics in Women's

Studies Cr.Hrs. 3
(Formerly 156.727) Advanced study of selected topics in Women's Studies from an interdisciplinary perspective. The content of the course may vary from year to year and will be arranged by the coordinator of the Women's and Gender Studies Program in consultation with the appropriate representatives of departments. Interdisciplinary analysis of contemporary issues, debates and theories in Women's Studies. Topics will vary from year to year and may include, for example, gender theory, sexualities, or feminist pedagodgy. Prerequisite: consent of the Women's and

Gender Studies coordinator and course instructor. As the course content will vary from year to year, students may take this course more than once for credit.

## Interior Design

Head: Beecher, Mary Anne
Campus Address/General Office: 201 Russell Building
Telephone: (204) 4749458
Fax: (204) 4747532
Email Address: interiordesign@umanitoba.ca
Website: http://umanitoba.ca/interiordesign
Academic Staff: Please see the website for Faculty information:http://umanitoba.ca/interiordesign

The department of Interior Design at the University of Manitoba has a long-established reputation for excellence and leads Canada in the development of the first Master of Interior Design program.

The Department offers two streams within the Master of Interior Design:

- The first-professional program is directed towards those interested in pursuing a career in Interior Design practice. The program emphasizes the creation of human-centred and context-based design solutions that respond to the needs of contemporary life. The course of studies consists of the design studio and support courses that develop the methods, processes, technical and theoretical foundations of interior design. There are opportunities for international and crosscultural study through exchange programs and intersession studios. The program requires a minimum of two full years of study to complete.
- The post-professional program is directed to those who already hold a first-professional qualification in Interior Design. The program has a research orientation and is intended to further the knowledge base in specific areas of the discipline. The program requires a minimum of one and one half years of full-time study to complete. For additional information on delivery options and length of study requirements contact the department of Interior Design.

The first-professional program is accredited by the Council for Interior Design Accreditation. Graduates normally proceed to certification from the National Council of Interior Design Qualification (N.C.I.D.Q.) and membership in a professional interior design association. Master of Interior Design graduates are qualified to work nationally and internationally at the forefront of their profession, with a skillset that includes strategic thinking, entrepreneurship, a research orientation and an ethical and environmentally responsible frame of reference.

Research expertise and individual interests of the faculty include the following: workplace environments, universal design, lighting and colour, history and theory, design education and profession-based research.

## Facilities

The Faculty of Architecture is housed in two main buildings on the Fort Garry campus; John A. Russell Architecture Building (JAR) and the Architecture 2 Building. The Faculty of Architecture has one open area computer lab (CADlab) along with a new media research area. A fully staffed and equipped woodshop and assembly room is available for student and faculty use. The Product Catalogue Collection provides current product information on interior and architectural materials. The Architecture and Fine Arts Library serves both the Faculty of Architecture and the School of Art. The library contains an extensive collection of books, journals, periodicals, maps and plans and videos and images.

## Admission

Applicants must meet the entrance requirements of the Faculty of Graduate Studies as well as the Interior Design admissions requirements found on the Interior Design website.

## First-Professional Masters Program:

Applicants with an undergraduate degree in Interior Design or an undergraduate degree in Environmental Design (Interior Environment Option) from the Faculty of Architecture are eligible for direct admission. Applicants with degrees in other fields of study are assessed on a case-bycase basis and may be eligible for admission to a pre-master program of study. For additional information contact the department of Interior Design.

## Post-Professional Masters Program:

A first-professional degree in Interior Design is required for admission.

## Application Deadlines:

Applicants from outside Canada and the United States: December 1

Canadian citizens and American citizens: January 15

For further information contact the graduate student advisor, department of Interior Design.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section. Detailed requirements for Interior Design programs are found on the Interior Design website.

Post-Professional Stream-21 Credit Hours

Professional Stream - 48 Credit Hours

Second language reading requirement: none

Expected time to graduation in full-time study: PostProfessional Stream, 1.5 years; Professional Stream, 2 years.

## PhD Interior Design,

A Ph.D. in Design and Planning is offered.

## Interior Design

IDES 7000 Graduate Seminar in Interior Design Cr.Hrs. 3
A seminar course for students registered in thesis or practicum designed to assist in the determination of a relavent topic; formulation of a hypothesis, academic writing sources of information and the appropriate form and content of the thesis practicum.

IDES 7170 Design Research Methods Cr.Hrs. 3 (Formerly 051.717) Building on EVIE 3640 (or 079.364) Design Inquiry, this course addresses the role of quantitative and qualitative research methods in interior design. The subject will address the principles of quantitative and qualitative research methodologies; focusing on the relationship between research and interior design. Specifically identifying gaps in existing research; critical analysis and interpretation of existing research; representation of research intentions, methodologies, and results.

IDES 7180 Theory Seminar 1 - Contemporary Issues in Design Cr.Hrs. 3
(Formerly 051.718) A theoretical exploration of contemporary design issues as they apply to Interior Design, supporting the work of design studio. Historical precedent in relation to human activity, sensory stimulus, technological and social change, ecological awareness, and aesthetic judgment forms the context for discussion and debate. Prerequisite: EVIE 3650 and EVIE 3660 or equivalent.

IDES 7190 Theory Seminar 2 - Critical
Perspectives Cr.Hrs. 3
(Formerly 051.719) An examination of theoretical and philosophical approaches to design. Examines the practice of interior design through a variety of critical and historical perspectives. Different modes of thought and manners of questioning will be used to debate issues. Prerequisite: EDES 7180 (or 051.718).

IDES 7200 Masters Studio 1 - Strategic Issues Cr.Hrs. 6 (Formerly 051.720) Master Studio 1 focuses on developing strategic approaches to design, which address complex contextual issues and adaptive reuse of large-scale public space. Studio explorations responding to a range of complex contextual design issues. The studio focuses on methods of strategic analysis such as mapping and scenario planning to inform the configuration and resolution of new interior spatial
forms. Large scale public space and the changing nature of contemporary culture will form the basis for the design projects.

IDES 7210 Masters Studio 2 - Events and Making Cr.Hrs. 6 (Formerly 051.721) Master Studio 2 is focused on the Event: exploring the nature of temporary inhabitation through the creation of a unique place/installation as the site for cultural/community celebration. Design/build studio explorations focussed upon issues of temporality , technology, and design intention. Small-scale public places and cultural context will form the basis for design studio projects.

IDES 7220 Masters Studio 3 Cr.Hrs. 6
(Formerly 051.722) Focuses on the creation of specialized interior environments informed by traditional and emerging forms of research. Research into Practice: a researchfocused, problem based, studio bridging Studio 3 will examine specialized interior professional design issues and diverse research sources. Master projects in areas such as: work environments, healthcare, education or hospitality, through precedent and research. The studio may be run as a collaborative program and may be delivered as an International studio experience.

IDES 7230 Sensory Technology 4 Cr.Hrs. 3
(Formerly 051.723) Examination of the influences and effects of emerging communication systems and building technologies; building and furniture systems; in the context of human well being and environmental concerns. The study of the design consequences and environmental impact of interior services and systems; communication technologies; building regulations, codes and infrastructure; detailing and specification of projects drawn from design studio.

IDES 7240 Sensory Technology 5 Cr.Hrs. 3
(Formerly 051.724) A self-directed exploration of new and/or divergent technologies, with significance to the design of interior environments. Students will propose a self-directed design or research project, nominating a full time staff advisor; for the subject instructors' approval. The proposal will clearly establish learning objectives and outcomes, and assessment criteria.

IDES 7250 Professionalism and Practice Cr.Hrs. 3 (Formerly 051.725) Introduction to the profession and practice of Interior Design; types of practice; regulating bodies; education; career development; professional and social responsibilities; examination and critique of practice, projects and design issues.

IDES 7260 The Business of Interior Design Cr.Hrs. 3 (Formerly 051.726) Management principles, administration, communication strategies and practice structures in the design process; development of skills in communication and procedures. The interior design business environment; ethics, responsibilities; related industries; job search techniques.

IDES 7270 Travelling Concepts in Photography Cr.Hrs. 3 This course is a graduate level photography elective that combines the practice, theory and history of photography. The outcome is to stimulate the use of photography as a visionary and hands-on tool. The final outcome with be an exhibition of student work.

## ACADEMIC CALENDAR

## Kinesiology and Recreation Management

Dean: E. Jane Watkinson
Campus Address/General Office: 307 Max Bell Centre
Telephone: (204) 4747493
Fax: (204) 2614802
Email Address: kinrecgrad@umanitoba.ca

## Website:

http://umanitoba.ca/faculties/kinrec/grad programs
Academic Staff: Please see the website for Faculty
information:http://umanitoba.ca/faculties/kinrec/grad progra ms

## M.Sc. (Kinesiology and Recreation), Fields of Research

The Master of Science (Kinesiology and Recreation) or Master of Arts (Kinesiology and Recreation) provides advanced education and research training within subdisciplines including kinesiology, physical education, health, human performance, recreation, leisure, and tourism studies.

## Research Facilities

Resources and supports for M.Sc. related research are jointly provided by the Faculty of Kinesiology and Recreation Management and the Health, Leisure and Human Performance Research Institute.

## Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. In addition, students require:

The completion of a four-year Kinesiology (BKIN)/Physical Education (BPE) or Recreation Management and Community Development (BRMCD) degree, or equivalent,

## Or

Completion of a four-year undergraduate degree other than a BKIN/BPE or BRMCD, or equivalent, with a suitable academic background in the area of study,

## Or

Completion of a Pre-Masters program at the University of Manitoba, or equivalent.

## Application Deadlines

Students seeking fall (September) admission should submit their applications, with complete supporting documentation,
directly to the Faculty of Graduate Studies by February 1. Applications received after this deadline will be considered on a case-by-case basis. Applications from students interested in commencing their program in January or May will also be considered on a case-by-case basis. Please contact the FKRM Graduate Program Office for further information.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

Students must:

- Complete a minimum of 12 credit hours of course work approved by the faculty advisor. Of these 12 credit hours, a minimum of nine credit hours must be at or above the 7000 level; a minimum of six credit hours must be selected from the 7000 level course offerings in Kinesiology and Recreation Management with PERS 7000 Research in Kinesiology and Recreation Studies (3) being compulsory; and
- Enter the program with, or complete as part of the approved program of study, a minimum of six credit hours in research methods and/or statistics. The required course, PERS 7000 Research in Kinesiology and Recreation Studies, may be considered for credit towards this requirement.
- Within their program of study, students may complete a maximum of two PERS 7080 Directed Studies (different topics) for a total of six credit hours; however, only three credit hours will count towards the minimum 12 credit hour course work requirement

In addition to course work requirements, a student must engage in research and scholarship leading to the completion of a thesis, and attend a minimum of eight research seminars sponsored by the Health, Leisure and Human Performance Research Institute within the first two years of their program. NOTE: Seminar attendance is a supplementary regulation.

Second language reading requirement: None

Expected time to graduate: Two years
M.A. (Kinesiology and Recreation), Fields of Research

The Master of Arts (Kinesiology and Recreation) or Master of Science (Kinesiology and Recreation) provides advanced education and research training within sub-disciplines including kinesiology, physical education, health, human performance, recreation, leisure, and tourism studies.

Research Facilities

## 

## ACADEMIC CALENDAR 2012-2013 •

Second language reading requirement: None
Expected time to graduate: Two years

## Ph.D. in Applied Health Sciences,

The Faculty of Kinesiology and Recreation Management, along with the Faculty of Nursing, Faculty of Human Ecology, and School of Medical Rehabilitation, offers a multiunit Ph.D. in Applied Health Sciences. Information on this program may be found in another section of this calendar.

## Kinesiology and Recreation Management Phys Ed \& Rec Studies General <br> PERS 7000 Research in Kinesiology and Recreation

 Studies Cr.Hrs. 3Concepts and issues in designing, implementing, and disseminating research in areas broadly related to kinesiology and leisure. It is recommended that students complete this compulsory course within their first year of enrolment in the Master's program.

PERS 7002 Community Development: Qualitative Methods Cr.Hrs. 3
Students will be introduced to the traditions in the qualitiative field, explore the theoretical foundations that underpin qualitative inquiries, and develop their capacity to think critically about ethical issues involved in the research process (e.g. working with marginalized groups and conducting community-based research.

PERS 7004 Current Research in Physical Activity, Health and Leisure: Physical Aspects Cr.Hrs. 3 This course will include the presentation of research evidence-based current thought on physical activity, health and leisure. Pre-requisites: courses in anatomy, physiology/exercise physiology, and biomechanics, or permission of course coordinator.

PERS 7080 Directed Study in Kinesiology and Recreation Cr.Hrs. 3
Provides opportunities for in-depth individualized study within a specific area of interest. Can be completed twice (different topics) for a maximum of 6 credits. Only 3 credits may count toward the minimum requirement of 12 credits.

## ACADEMIC CALENDAR

## Physical Education

PHED 7060 Social and Psychological Components of Sports and Physical Education Cr.Hrs. 3
(Formerly 057.706) The socio-psychological components of movement and the role of physical activity in the sociopsychological development of children. Prerequisite: PHED 3460 or 057.346 plus consent of instructor.

PHED 7130 Anatomical Biomechanics Cr.Hrs. 3 (Formerly 057.713) A study of the biomechanical aspects of muscle and joint forces during human movements as they relate to the mechanics of athletic injuries and injury prevention. Prerequisite: PHED 3060 or 057.306 plus consent of instructor.

PHED 7140 Mechanisms of Athletic Injuries Cr. Hrs. 3 (Formerly 057.714) The study and analysis of the causes and mechanisms of injuries in sports and exercise situations, including methods of prevention and rehabilitation.
Prerequisite: PHED 7130 or 057.713.
PHED 7160 Special Topics Cr.Hrs. 3
(Formerly 057.716) The study of the contemporary research and theory in a selected area. Topics will vary, depending on faculty expertise and student need.

## Recreation Studies

REC 7010 Leisure and Recreation: Concepts and Theories Cr.Hrs. 3
(Formerly 123.701) Critical analysis of the dominant concepts, theories, and research associated with the development of basic and applied knowledge in recreation and leisure studies. Prerequisite: instructor's permission.

REC 7060 Issues in Tourism Cr.Hrs. 3
(Formerly 123.706) Contemporary issues and research related to travel behaviour and sustainable tourism. Prerequisite: instructor's permission.

REC 7090 Special Topics in Recreation and Leisure Studies Cr.Hrs. 3
(Formerly 123.709) Contemporary research and theory in selected areas of recreation and leisure studies, the topics addressed in this course will vary depending on faculty expertise and student need. Prerequisite: instructor's permission.

## Landscape Architecture

Head: (and Graduate Chair) A. Tate
Campus Address/General Office: 201 Russell Building
Telephone: (204) 4749458
Fax: (204) 4747532
Email Address: landscapearch@umanitoba.ca
Website: http://umanitoba.ca/landscapearchitecture
Academic Staff: Please refer to the website for Faculty information :http://umanitoba.ca/landscapearchitecture

The program leading to the Master of Landscape Architecture degree at the University of Manitoba was the first graduate program in Canada. Approximately 55-65 fulltime students are enrolled in the program, representing all regions of Canada and other countries of the world.

The MLA program is accredited by the Canadian Society of Landscape Architects (CSLA) which has reciprocal recognition from the Landscape Architecture Accreditation Board (LAAB) in the United States. Successful completion of a program accredited by the CSLA/LAAB qualifies graduates to sit the North America-wide Landscape Architecture Registration Exam (LARE), the North Americawide qualification for professional registration. In Manitoba, having an accredited degree plus two years in practice and passing Section A of the LARE is required for professional registration with the Manitoba Association of Landscape Architects (MALA).

Students admitted to the program must have one of three different types of degree with a minimum Grade Point Average (or equivalent) of 3.0 from a university recognized by the Faculty of Graduate Studies:

- a degree in Landscape Architecture from a university recognized by the Faculty of Graduate Studies or a degree in Environmental Design from the University of Manitoba;
- a degree in another design discipline from a university recognized by the Faculty of Graduate Studies;
- a degree in another discipline from a university recognized by the Faculty of Graduate Studies

Study is directed towards the analysis, planning and design of exterior spaces, both urban and rural. The program emphasizes the development and testing of physical forms intended to positively affect the quality of the designed environment; forms which are responsive to societal needs, while remaining expressive of the physiographic conditions associated with specific geographic locations.

The general objectives of the program are:

- the articulation of a theoretical basis for the design of the built environment
- the development of a practical design methodology
- the exploration of societal, technical and natural processes as form determinants
- regional resources analysis and activity allocation
- the investigation of issues associated with landscape architectural practice.

The department attempts to provide a sense of need and purpose for each student, through the investigation of contemporary urban and rural environmental problems from micro to regional scales.

Fields of Research

## ACADEMIC CALENDAR 2012-2013 •

Faculty in the Department have a variety of research interests including:

- urban design
- landscape aesthetics
- ecological design
- design philosophy
- cultural theory and design
- public urban space
- urban typology
- design education
- landscape memorials
- landscape urbanism
- regional planning and design
- landscape art
- community design
- prairie landscapes
- landscape perception

## Research Facilities

The Faculty of Architecture has an excellent library, a slide library, a products catalogue library, a workshop, and a comprehensive CADLAB. The Department uses the Star Lake Field Stations for field ecology work.

Master of Landscape Architecture (M.Land.Arch.), Admission

Candidates for a Master degree in Landscape Architecture must possess a degree from a recognized degree granting university.

See the department of Landscape Architecture website for additional application requirements.

## Application Deadlines

The application deadline for September start is December 1 for all International applicants and January 15 for all Canadian/US applicants.

Applications received after January 15 will be considered if places are still available, but early application is strongly recommended.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar.

Degree Requirements: 42-111 credit hours
Second language reading requirement: none

Expected time to graduation: 3 years full-time study.

## Landscape Architecture -6000 Level

LARC 6150 Landscape Architecture
Communication Cr.Hrs. 3
(Formerly 031.615) The objectives of this course are to promote an awareness of the diversity of graphic expression and to encourage experimentation. Students are given the opportunity to practice drawing and graphic communication skills and techniques through studio exercises.

## Landscape Architecture - 7000 Level

LARC 7002 Land Construction and Professional

## Practice Cr.Hrs. 3

Introduction, investigation and fundamental exercises in landscape design and construction documentation, and construction administration for landscape construction projects.

LARC 7020 Field Studies Cr.Hrs. 3
A one- or two-week field study block course at the start of winter term or duing mid-term break, co-requisite with winter term studios.

LARC 7040 Design Research Cr.Hrs. 3
The focus is on critical review of the literature, the formulation of research methods appropriate to securing, analyzing, and interpreting of research in Landscape Architecture, and the examination of approaches to design as a mode of enquiry and research.

LARC 7110 Landscape Architecture Studio 1 Cr.Hrs. 9 An introductory study of structure and order within nature and the built environment. Instruction in the principles of design, the basic elements of graphic and spatial composition, and the vocabulary and methods of approach to landscape architectural design within a variety of contexts.

LARC 7120 Special Topics in Landscape
Architecture Cr.Hrs. 3
(Formerly 031.712) An assignment and conference course.
A detailed study of some special topics in landscape architecture, including environmental sustainability, urban landscape technology, and housing form.

LARC 7160 Landscape Architectural Field Ecology Cr.Hrs. 3 (Formerly 031.716) Field study of plant taxonomy and ecology. Approximately two weeks duration immediately prior to the beginning of fall term. For Landscape Architecture students or with consent of department head.

LARC 7222 Landscape Architecture Studio 2 Cr.Hrs. 9 An exploration of analytical, conceptual, and developmental aspects of urban public places in an experimental studio setting. An emphasis is placed on design as mediation between competing demands. The studio incorporates the application of three-dimentional simulation technologies in design.

LARC 7250 Landscape Architecture Theory Cr.Hrs. 3 (Formerly 031.725) Investigation of the theoretical foundations of landscape architecture in order to understand the complex nature of its practice, to identify its disciplinary boundaries, understand its multidisciplinary nature and to

## 

ACADEMIC CALENDAR
investigate assumptions and myths that permeate its limited discourse.

LARC 7300 Landscape Topics Cr.Hrs. 3
A critical examination of an individual topical study of relevance to contemporary landscape architecture. This course will lead to the completion of a practicum or thesis proposal.

LARC 7310 Landscape Design Seminar 1 Cr.Hrs. 3 A cross-cultural overview of significant discourses with an emphasis on the influence of critical design inquiry upon specific landscape interventions.

LARC 7320 Landscape Design Seminar 2 Cr.Hrs. 3
An examination of the means by which ideas are expressed in and through design with a focus on modes of communication, representation and engagement.

LARC 7330 Landscape Architecture Studio 3 Cr.Hrs. 9 The study of design application of highly complex problem domains of the urban, suburban, townsite, or rural landscape.

LARC 7340 Landscape Architecture Studio 4 Cr.Hrs. 9 Comprehensive design studio involving transition between larger scale planning/design proposals for an urban/regional area and site design; includes principles of spatial modeling.

## Law

Dean: Turnbull, Lorna A. B.A., (Queen's), LL.B. (Ottawa), LL.M. and J.S.D. (Columbia).
Associate Dean(s): Associate Dean (LL.B. Program): Fainstein, Lisa, B.A., (Manitoba), LL.B. (Manitoba). Associate Dean (Research and Graduate Studies): Schulz, J.L., B.A. (Gold Medal) and LL.B. (Manitoba), M.Phil. (Cambridge), S.J.D. (Toronto).
Campus Address/General Office: Robson Hall
Telephone: (204) 4746130
Fax: (204) 4747580
Email Address: lawgrad@ms.umanitoba.ca
Website: http://law.robsonhall.ca/llm

The Faculty offers a structured and personal LL.M. experience designed for successful completion within one calendar year, beginning in September. In addition to course work, the student must complete a thesis of 90 to 120 pages. Each student is assigned a faculty advisor with expertise in the chosen area of study, who will direct thesis research and design and assist the student in course selection. Each student is also assigned an external reader who will review and evaluate the thesis. Early and regular contact with the advisor is advised.

In the first term, the student will complete a required seminar course entitled Graduate Legal Research and Theory. The seminar's focus on various theoretical approaches to legal scholarship and alternative approaches to legal study, legal research, and writing is designed to assist the student in approaching the thesis work, provide unity to the program, and facilitate the collegial exchange of ideas. In addition to
the graduate seminar course, the student will successfully complete a minimum of two courses, to be taken in either term, and selected with the approval of the advisor. One course may be taken in a faculty other than Law. The student will also take part in academic seminars and functions.

The Master of Laws degree enhances career prospects. This is evidenced by the fact that our international and Canadian graduates have secured positions in academia, international corporations, legal practice, and highly competitive doctoral programs.

## Fields of Research

The Faculty of Law has many research interests and strengths. In addition to basic areas of common law property, contract, tort, criminal, constitutional, evidence, administrative, tax, and family - faculty expertise includes Aboriginal law, ADR, administrative law, Charter, children and the law, corporate/commercial, legal history, human rights, intellectual property, international law, international trade, law and literature, law and film, money laundering, and prisoners' rights. The Faculty is home to the Asper Chair in International Business and Trade Law; the Marcel A. Desautels Centre for Private Enterprise and the Law; and the Centre for Human Rights Research.

## Research Facilities

The E.K. Williams Law Library offers full time support and facilities for research, including state-of-the-art computer access. Graduate students have their own dedicated graduate research room, with individual desks, storage, and a private lounge. (International students should bring with them country-specific materials including statutes, codes, judgments and reference books needed for their thesis research).

Winnipeg is home to archival collections of materials relevant to legal studies. Collections include the Provincial Archives of Manitoba and its Government Records Centre, the Manitoba Legal-Judicial Archives, and the Legislative Library. The Provincial Archives house the Hudson's Bay Company Archive, which contains millions of mainly pre1900 documents. This is a unique and important resource for law and society studies related to the fur trade, the Hudson's Bay Company, First Nations, Mètis and Inuit cultures, and Canadian and English legal history.

## Master of Laws (LL.M.) ,

 AdmissionIn addition to the requirements of the Faculty of Graduate Studies set out in the Graduate Studies Regulations Section of this Calendar, candidates must show that they are equipped intellectually to engage in advanced legal study and research. The Faculty of Law anticipates that the prospective LL.M. student will have earned the LL.B. or equivalent degree in law with a first or high upper second B+) standing. Applicants ordinarily hold a common law or Canadian civil law degree but applications from those whose

## 

ACADEMIC CALENDAR
legal education has been in another legal system will be given full consideration.

Please see our website: http://law.robsonhall.ca/llm or contact the Faculty of Law at: lawgrad@ms.umanitoba.ca for additional information and application procedures.

Applicants from non-English speaking countries must have an English language proficiency of 600-plus TOEFL score (paper based) and may be required by the Faculty of Law to demonstrate proficiency based on other tests accepted by the Faculty of Graduate Studies. Some international students have arrived six to twelve months in advance of applying for admission to the LL.M. program in order to enrol in English as a Second Language courses at the University of Manitoba.

The Faculty of Law offers the Dickson, Freedman, Kristjiansson, Sgayias, Asper, and Desautels Graduate Fellowships. In partnership with the Faculty of Graduate Studies, the Faculty of Law may make additional awards. Applicants may wish to research other educational funding opportunities including support from the legal profession and awards, scholarships, and bursaries available from or tenable at the University of Manitoba. Canadian embassies offer basic information services and should be contacted early. Similarly, visa applications should be made early. Criteria for admission, awards and fellowships are found on the Graduate Studies and Law web sites.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students must attend the university full-time for a minimum of one academic year (normally September to May). Students are expected to complete the LL.M. program in one calendar year (normally, September to August for October convocation), although two years is permitted. Students must complete a satisfactory thesis on a subject approved by the advisor, to be submitted not later than eight weeks before the anticipated date of graduation. The student must successfully complete two courses in addition to the graduate Legal Research and Theory course. Courses will be chosen in consultation with the advisor.

## Subjects of Graduate Study

A candidate's subject of study shall be approved by the Graduate Studies Committee of the Faculty of Law. Thesis design, refinement and research will be supervised by a member of the Law Faculty/the student's advisor.

Second language reading requirement: none
Expected time to graduate: one year, although two years is permitted.

Ph.D./S.J.D. in Law,
The Faculty of Law does not offer a Ph.D./S.J.D. Program.

## Law

LAW 7110 Graduate Legal Research and Theory Cr.Hrs. 2 (Formerly 045.711) Begins with visits to the Law Library and to the Provincial Archives of Manitoba, Government Records Centre, then epistemological problems are studied to define each student's research questions for the thesis; and thereafter weekly seminars explore doctrinal, interdisciplinary, comparative, and theoretical research perspectives (natural law to legal positivism, critical legal studies and post-modernism).

## Linguistics

Head: Terry Janzen
Campus Address/General Office: 534 Fletcher Argue Building
Telephone: (204) 4749596
Fax: (204) 4747671
Email Address: lingdpt@cc.umanitoba.ca
Website: http://umanitoba.ca/linguistics
Academic Staff: Please refer to our website for academic staff information:http://umanitoba.ca/linguistics

The Department of Linguistics offers individualized and flexible graduate programs leading to both the Master of Arts and the Doctor of Philosophy degrees. For students who want to pursue in-depth and especially field-based research on language, the University of Manitoba, which is situated in a linguistically diverse region, is an ideal location. The research programs of most past and current graduate students in the department involve original fieldwork, either with the local indigenous languages or in such places as China and the South Pacific.

## Fields of Research

The department has research strengths in both formal and functional/typological approaches to the core areas of linguistics (phonetics, phonology, morphology, and syntax), as well as historical linguistics, language planning and policy, text-based analysis and computational linguistics. The department's research draws on a wide range of languages, such as Hebrew, Persian, Tauya and American Sign Language, and the department is also a world centre for the study of the Algonquian family of languages. In addition to journal articles and monographs, department members produce reference grammars, dictionaries, and text collections for local languages.

## Research Facilities

In addition to professional audio recorders (analogue, DAT and solid-state) available for fieldwork, the department maintains the Experimental Linguistics Laboratory, which features an anechoic audio recording chamber, professional audio and video recording equipment, and workstations for editing and analysis of recorded data.
M.A. in Linguistics,

## 

ACADEMIC CALENDAR

## Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The M.A. program in linguistics is strongly research-oriented; admission decisions are, therefore, based only in part on the applicant's academic record; the department's resources and interests also play an important role. A four-year B.A. in linguistics is the normal preparation for the M.A. program. Students without such preparation may be required to complete the pre-Master's year first. The department has additional application procedures beyond those of the Faculty of Graduate Studies. Contact the Linguistics department for information.

## Application Deadlines

The M.A. program in linguistics starts September 1. Other start dates are possible only under exceptional circumstances. The deadline for applications to be received in the Faculty of Graduate Studies from International students is February 15. For Canadian/U.S. students, applications should be submitted to the Faculty of Graduate Studies by March 15th.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Master of Arts program in Linguistics requires 18 credit hours of coursework at the graduate level, including Field Methods (LING 7590), Phonology (LING 7550), and Syntax (LING 7630). The remaining courses ( 6 credit hours) may be taken in either linguistics or related disciplines, subject to approval by the department's graduate committee. In certain cases the graduate committee may require the student to take additional courses. Students are encouraged to complete their coursework by the end of the first year of the program. M.A. candidates must demonstrate proficiency in a second language. In addition to coursework and the language reading requirement, students must complete and successfully defend a thesis.

Second Language Reading Requirement: Yes

Expected time to Graduation: Two years

Ph.D. in Linguistics,
Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Ph.D. program in linguistics is strongly research-oriented; admission decisions are, therefore, based only in part on the applicant's academic record; the department's resources and interests also play an important role. Students with a Master's degree in linguistics from the University of Manitoba or with an equivalent degree from elsewhere may be admitted into the Ph.D. program. Students who have a Master's degree but lack the specific
course background for admission to the Ph.D. program may be admitted into the M.A. program. After completion of the M.A. course requirements with an average of B+ such students may apply to transfer directly to the Ph.D. program without completing the M.A. The department has additional application procedures beyond those of the Faculty of Graduate Studies. Contact the Linguistics department for further information.

## Application Deadlines

The Ph.D. program in linguistics starts September 1. Other start dates are possible only under exceptional circumstances. The deadline for applications to be received in the Faculty of Graduate Studies from International students is February 15. For Canadian/U.S. students, applications should be submitted to the Faculty of Graduate Studies by March 15th.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Ph.D. students will normally complete 18 credit hours coursework at the graduate level. Courses are to be chosen in consultation with the advisor and students are encouraged to complete them by the end of the first year of the program.

## Candidacy Exams

Candidacy Exams are normally written in the second year of the Program. These exams consist of two original research papers of publishable quality in distinct areas of linguistics. Students must pass an oral exam based on each of the two papers.

Ph.D. candidates must demonstrate proficiency in a second language. This will at the same time satisfy the language reading requirement of the Faculty of Graduate Studies. Students who have satisfied this requirement at the M.A. level will be deemed to have met this requirement at the Ph.D. level.

Students must complete and successfully defend a dissertation. In preparation for this step, a written dissertation proposal must be presented and defended orally, normally in the third year.

Second language requirement: yes

Expected time to graduation: four years

## Linguistics

LING 7500 Linguistic Variation and Change Cr.Hrs. 3 (Formerly 126.750) Focuses on sources, causes and patterns of linguistic change, spread of changes and the

## ACADEMIC CALENDAR

resulting relationships among languages.
LING 7510 Linguistic Typology Cr. Hrs. 3
(Formerly 126.751) Highlights universals and differences in phonological, morphological and/or syntactic structures drawn from data from a wide variety of languages.

LING 7550 Phonology Cr.Hrs. 3
(Formerly 126.755) Presents a theoretical approach to current issues in phonological analysis, building and testing hypotheses about phonological data.

LING 7570 Semantic Theory Cr.Hrs. 3
(Formerly 126.757) A theoretical approach to current issues in semantics focusing on formal and logical aspects of meaning.

LING 7580 Computational Linguistics Cr.Hrs. 3 (Formerly 126.758) Computational modelling of language and the use of computational tools in linguistic research.

LING 7590 Field Methods Cr. Hrs. 6
(Formerly 126.759) Provides practical experience in techniques for data collection, analysis and interpretation of original data, through guided work with a speaker of a language unfamiliar to students. As the course content will vary from year to year, students may take this course more than once for credit.

LING 7620 Seminar in North American Indian
Languages Cr.Hrs. 3
(Formerly 126.762) The linguistic structure of a North American language or group of languages. As the course content will vary from year to year, students may take this course more than once for credit.

LING 7630 Syntax Cr.Hrs. 3
(Formerly 126.763) Presents a theoretical approach to current issues in syntactic analysis, building and testing hypotheses about syntactic data.

LING 7920 Special Problems in Linguistic
Research Cr.Hrs. 3
(Formerly 126.792) Specialized topics in linguistics. As the course content will vary from year to year, students may take this course more than once for credit.

LING 7940 Graduate Reading and Research 1 Cr.Hrs. 3 (Formerly 126.794) Independent reading and/or research on a selected topic. As the course content will vary from year to year, students may take this course more than once for credit.

LING 7950 Graduate Reading and Research 2 Cr.Hrs. 3 (Formerly 126.795) Independent reading and/or research on a selected topic. As the course content will vary from year to year, students may take this course more than once for credit.

## Management/Business <br> Administration

I.H. Asper School of Business

Dean: Dr. M. Benarroch

Associate Dean(s): Dr. D. Stangeland Dr. N. Turner
Head: M. Elliott, MBA Program, and N. Turner, Graduate Chair
Campus Address/General Office: 324 Drake Centre
Telephone: (204) 4748448
Fax: (204) 4747544
Email Address: aspermba@umanitoba.ca or
asper Phd MSc@umanitoba.ca
Website: http://umanitoba.ca/asper
Academic Staff: Please refer to our website for academic staff information:http://umanitoba.ca/asper

The University of Manitoba's Asper School of Business offers three graduate degrees for those interested in furthering their business and management understandings and skills. The AACSB accredited programs are:

- Asper MBA;
- M.Sc. in Management; and
- Ph.D. in Management.

The Asper MBA is a tightly integrated 60 credit hour program, led by internationally-recognized academics and professionals, and conducted in an interactive and dynamic face-to-face learning environment. The core of the program provides a common business leadership and managerial base for all students. Beyond the core exists a host of management electives and concentrations for individuals to choose from. All core courses are required, unless exemption, advance standing, transfer or course substation is granted. The program can be taken either full- or parttime.

The M.Sc. Program in Management is designed to produce graduates who have an academically more in-depth, rigorous training in their chosen management field than is normally the case either for the B.Comm (Hons.) graduates or MBA graduates. In addition, the program seeks to develop strong research skills for the graduates in order to meet the needs of employers as well as to more effectively prepare Master's students for doctoral work within various areas of concentration in the departments of supply chain management, marketing, and business administration.

The Ph.D. Program in Management is designed to prepare individuals for teaching and research careers in universities, or for applied research positions in either the private or public sector. The program is based upon the premise that contemporary managerial problems are typically multifaceted and need to be examined from a perspective that is not restricted by the boundaries of any single discipline. The inter-disciplinary nature of the program extends beyond the Asper School of Business to related disciplines across the University of Manitoba. Areas of concentration include: finance, marketing, organizational behaviour, organizational theory, human resource management, strategy and entrepreneurship.

Fields of Research

## 

ACADEMIC CALENDAR
2012-2013 •

The Asper School of Business is one of the best equipped management schools in Canada for research in managerial issues of national and international interest.

Researchers in business administration are examining a wide range of issues including organizational change and conflict management, job stress, work role socialization, compensation structures, goal setting, employment equity and discrimination.

Researchers in marketing and entrepreneurship are studying issues of national loyalty in international air travel, the role of affect in consumer behaviour, the effect of body image portrayals on consumers, international marketing and country of origin issues, information processing and sales person behaviours, the nature of effective small firm niche strategies and a variety of social marketing issues, how the age of the consumer affects the impact of advertising, and the nature of effective small firm niche strategy.

In the accounting and finance area, research programs span issues in accounting standards, asset pricing, national, and international capital markets and international corporate finance.

In the supply chain management area, researchers are examining issues such as efficiency of transportation and logistics, production and operations.

## Research Facilities

The Asper School of Business occupies the Drake Centre for Management Studies. The centre houses case rooms, lecture theatres, computer laboratories, a graduate study area, and research space.

The Albert D. Cohen Management Library holds approximately 40,000 volumes and subscribes to some 3000 current online and print periodicals. It maintains an annual report collection, specialized trade directories, and financial investment services. The Library subscribes to the major online services including ProQuest, Business Source Premier, Canadian Business and Current Affairs Complete, JSTOR, Mergent, Emerald, the Economist Intelligence Unit, and FinancialPost.infomart.ca. In addition, as a unit of the University of Manitoba Libraries, management students have access to some 200 additional online database services.

Academic and applied research is conducted in the Transport Institute, the Stu Clark Centre for Entrepreneurship, and the Centre for Accounting Research and Education which subscribes to the following databases: S \& P Compustat, CRSP, TSX CMFRC, and NYSE TAQ.

## ASPER MBA,

The Asper MBA gives tomorrow's business leaders the skills and expertise they need to succeed in a competitive global market. Our accredited program challenges students to view business management from diverse perspectives and to become exceptional problem solvers, critical thinkers and decision-makers.

As part of your leadership development, you take courses in:

- Executive Leadership-9 credit hours exploring the challenges, responsibilities and realties of leading an enterprise.
- Business Management Essentials-39 credit hours of general management and business study in marketing, accounting, finance, human resources and supply chain management.
- Advanced Concentrations-12 credit hours of elective study in a selected concentration. Sharpen your expertise in finance, management, accounting, marketing, human resource management, supply chain management, business-government relations and health administration.

The Asper MBA is designed to fit your life. Complete the program in as little as one year or take up to six years to finish your studies part-time. We offer courses once or twice per year and schedule them to maximize convenience for you.

Program entry occurs twice annually, in mid-August and January (although an 11-month program completion is not normally possible with a January commencement). The academic year is composed of three terms: fall (AugustDecember), winter (January-March), and summer (AprilJuly).

If you recently completed university-level business or management courses in another 4-year university degree program, or have certain professional designations, you may qualify for up to 30 credit hours of exemptions, significantly reducing your program length and cost.

## Admission

To ensure we build the strongest community possible, we make our admission decisions carefully. Admission to our program is highly competitive; most applicants exceed the minimum requirements.

The Asper MBA admission criteria are:

- Previous Academic Achievement-a minimum of a baccalaureate degree or its equivalent from an accredited university, having attained in the most recent 60 credit hours of university-level work, a competitive grade point average (our average at admission is 3.4 on a 4.5 grading scale, or approximately equivalent to a " $\mathrm{B}+$ " or $75 \%$ ). That said, the program is annually permitted to admit a small number of highly experienced and gifted individuals who do not hold the required baccalaureate, but who have demonstrated both the potential for leadership and an ability to meet the academic demands of an MBA. Such individuals must have meaningful work experience, outstanding performance in an alternate program of study such as a professional designation or certificate program, and have a strong GMAT score;

## 

## ACADEMIC CALENDAR

- Professional \& Leadership Experience-a minimum of three years of work experience is preferred, preferably in a professional or managerial role;
- Graduate Study Readiness-a competitive score on the Graduate Management Admissions Test (our average is 580) or a GRE. For further GMAT details, please visit www.mba.com; and, for students whose first language is not English,
- English Language Proficiency-a minimum score of 80 (internet-based) or 550 (paper-based) on the TOEFL, or comparable CanTEST, AEPUCE, IELTS, MELAB results.

## Admission Deadline

## Program Requirements

One can apply at anytime through the year, and completed applications will be reviewed at a monthly admission meeting by the Asper MBA Admissions Committee. However, deadlines do exist for August and January program commencement purposes, and applications received after the deadline dates will be considered for the following entry gate:

- For August start—January 15th for International applicants and May 1st for North
American/Permanent Resident applicants; and
- For January start-June 15th for International applicants and October 1st for North American/Permanent Resident applicants.

The Asper MBA's 48 credit hours of mandatory courses are:

## Required Core Courses

Course Title Credit Hours
ACC 6050 Accounting 1* 3
ACC 6060 Accounting 2* 3

## NOTES:

* Eligible for exemption.
** GMGT 7010 Business Policy Seminar constitutes the comprehensive examination. The course must be completed at the
University of Manitoba normally in the final term (last 15 credit hours) of a student's program.
***GMGT 5010 is an auxiliary or additional course required for those who don't have the requisite level of mathematical background at program start. Please contact Asper MBA office for details.

## Elective Courses

In addition to the mandatory leadership and business courses, students are required to take 12 credit hours of graduate-level coursework from the I.H. Asper School of Business or, where approved, from other Faculties. Students will be able to choose a General Management option completion of any 12 hours of MBA program electives in different areas - or to undertake an Individual Interdisciplinary concentration consisting of graduate courses in another faculty (with a management focus). As well, students can choose to concentrate all 12 credit hours of electives in a focused area.

These concentrations are currently offered in:

Finance

Marketing

Human Resource Management and Organizational Behaviour

Supply Chain Management

ACADEMIC CALENDAR 2012-2013 •

University of Manitoba

Business Government Relations (with some courses from the MPA program)

Health Administration (through select courses at the Faculty of Medicine)

Management Accounting (partnership with CMA Manitoba)
Courses required for each area of concentration are listed below (please note that not all electives are available each year):

## Finance

Four courses from:
FIN $7070 \quad$ Theory of Financial Management 3
FIN $7080 \quad$ International Finance 3
FIN 7152 Investment Policy 3
FIN $7220 \quad$ Advanced Seminar in Finance 3

NOTES:

* Required for Health Administration concentration.
${ }^{* *}$ Can be used as a 3 credit hour elective course for field placements in health care organizations upon approval of the MBA Program Committee. Placements and supervision of the placements will be the responsibility of the Department of Community Health Sciences.

Health Administration courses are scheduled by the Department of Community Health Sciences and may not fit within the normal MBA elective schedule.

## Readings/Research Option

With the approval of the MBA Program Committee and the academic area involved, a student can choose to undertake an industry project or a readings course. The industry projects and readings courses count as three credit hours of elective coursework. A student is allowed up to two readings courses or one readings course and one industry project during the program. An industry or readings proposal must be submitted to a faculty supervisor and the MBA Program Committee for approval prior to registration for the course. Projects and reading courses can normally only be taken within the Asper School of Business, and normally cannot be counted towards a concentration.

No thesis option available

Second language reading requirement: none

Expected time to graduate: 1-6 years

The MBA program curriculum and concentrations are subject to change upon appropriate approval.

## Faculty Based M.Sc. in Management, Admission

Students admitted to the M.Sc. in Management degree program will pursue a research-focused degree in one of the departments of Marketing, Business Administration or Supply Chain Management. In addition to satisfying the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, applicants must possess at least a 4-year honours (or equivalent) degree from a recognized university in either a) management/business with a major in the same area or a similar area to be pursued in the M.Sc. or b) a degree from another Faculty with a closely related major. Applicants must provide the following prior to admission:

- A statement of goals and interests;
- An official transcript of academic record with a minimum grade point average of 3.0 on a 4.5 scale (approximately $70 \%$ or a "B") in the last 60 credit hours;
- A score on a graduate aptitude test, preferably the GMAT, with a minimum score of 550 (GRE will be accepted with a mean percentile score across the three areas similar to the current acceptable percentile level of the GMAT);

## 

ACADEMIC CALENDAR 2012-2013 >

- Three letters of recommendation two of which are from persons who know the candidate's academic ability.

## Admission Deadline

The deadline to apply is January 10 for International applicants and March 10 for North American/Permanent Resident applicants (for early consideration, all applicants are encouraged to apply by January 10). Applications received after the deadline date will be considered if space permits.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The basic program design assumes that students have completed an honours degree or its equivalent. Additional courses may be required subject to the discretion of the I.H. Asper School of Business Graduate Committee if it is deemed that the candidate's preparation is not sufficient in his/her area of specialization. The student's advisory committee will make recommendations regarding deficient background, and the final program will be approved by the Graduate Research Program Committee.

All students must complete the following course requirements:

A minimum of 18 credit hours plus a thesis/practicum. This minimum will include:
a) at least 6 credit hours of required graduate level courses in the student's area of specialization; b) up to 12 credit hours of optional courses (subject to the approval of the Graduate Committee); c) a thesis or a practicum.

Business Administration (Industrial Relations/Human Resource Management/Management of Organizations/Organizational Behaviour) Option

One of: GMGT 7440 Organizational Theory or GMGT 7410 Organizational Behaviour

One of: GMGT 7540 or GMGT 7080 Research Methods, or an equivalent graduate level course in quantitative methods from another Faculty*

Four additional optional courses but, among them, students are encouraged to take: 1) an additional research methods course (quantitative or qualitative) and either a statistics or econometrics course and 2 ) a philosophy of science course.*

## Master's thesis or research practicum

*Students are advised to check with the Graduate Program Office at the I.H. Asper School of Business for a list of suggested courses.

## Marketing Option

Any six credit hours from:

MKT 7100 Readings in Marketing

MKT 7110 Doctoral Seminar in Marketing

MKT 7120 Seminar in Buyer Behaviour or MKT 7230
Seminar in Consumer Behaviour

Six credit hours of approved research methods coursework at the graduate level.*

Additional six credit hours of approved coursework relevant to the chosen area of study.
*Students are advised to check with the Graduate Program Office at the I.H. Asper School of Business for a list of suggested courses.

## Supply Chain Management Option

Nine credit hours in:

SCM 7010 Advanced Supply Chain Management

GMGT 7080 Research Methods

OPM 6090 Production Management

Nine credit hours of additional courses relevant to the area of specialization.

Second language requirement: none

Expected time to graduate: 1-3 years

Faculty Based Ph.D. in Management, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, an earned Master's degree (MBA preferred), and in exceptional cases, a Bachelor's degree in a management or business discipline from a recognized institution, or a discipline sharing a common origin or a parallel discipline to the applicant's chosen area of concentration, is required.

Prior to admission, the candidate is to provide the following:

- A statement of goals and interests;
- An official transcript of academic record with a minimum grade point average of 3.0 on a 4.5

## 

ACADEMIC CALENDAR 2012-2013 •
scale ( 3.5 preferred), (approximately $70 \%$ or a "B") in the last 60 credit hours;

- A score on a graduate aptitude test, preferably the GMAT, with a minimum score of 600 (GRE will be accepted with a mean percentile score across the three areas similar to the current acceptable percentile level of the GMAT );
- Three letters of recommendation from persons who know the candidate's academic ability;
- Evidence of research and teaching ability.

## Admission Deadline

The deadline to apply is January 10 for all applicants.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The basic program design assumes that students have completed an MBA degree or its equivalent. The MBA degree constitutes the "core" of knowledge that is prerequisite to proceeding to Ph.D. study since it provides the breadth of knowledge necessary for Ph.D.'s in Management. Students who are deficient in this "core" may be required to take additional MBA-level courses. Decisions regarding deficient background will be made by the student's advisory committee, subject to the approval of the Graduate Research Program Committee.

All students must complete the following course requirements:

## Area of Specialization Required Coursework:

## Finance

FIN 7500 Financial Theory and Corporate Policy 3
FIN 7510 Finance 1: Capital Markets 3
FIN 7520 Finance 2: Corporate Finance 3
FIN 7530 Advanced Topics in Finance
Marketing
MKT 7100 Readings in Marketing -
MKT 7110 Doctoral Seminar in Marketing 3
Plus a minimum of 6 hours within the Marketing area
Organizational Behaviour or Organizational Theory/Strategy/ Human
Resource Management/ Entrepreneurship
GMGT 7410 Doctoral Seminar in Organizational Behaviour 3
GMGT 7440 Doctoral Seminar in Organizational Theory 3
Plus a minimum of 6 hours within Business Administration area of concentration.
Second language requirement: none

Expected time to graduate: 4-5 years

## Accounting and Finance -ACC 6000 Level

ACC 6050 Accounting 1 Cr.Hrs. 3
(Formerly 009.605) Principles and concepts of accounting underlying the measurement of business income and evaluation of performance.

ACC 6060 Accounting 2 Cr.Hrs. 3
(Formerly 009.606) The uses, limitation, and interpretation of

A minimum of 12 hours of study in the chosen area of specialization, as approved by the advisory committee. (See specific specialization requirements that follow).

## Faculty-Based Doctoral Courses

PHDM 7110 Doctoral Seminar in Management (3)

PHDM 7120 Management Research Project I (3)

PHDM 7130 Management Research Project II (3)

## Research Methods

A minimum of 6 hours of research methods courses, as approved by the advisory committee.

## Support Area

A minimum of 9 hours of study in a chosen support area, as approved by the advisory committee. A minimum of 3 of these hours must be taken outside the Asper School of Business.

Minimum total Credit Hours: 36

NOTE: The student's advisory committee may require additional coursework.

## ACADEMIC CALENDAR

problems, valuation, capital budgeting, risk/return relationships, the term structure of interest rates, market efficiency, long-term financing, capital structure, and the use of options and futures for risk management. Not to be held with either of the former 009.607 or FIN 6070. Prerequisite: ACC 6050 9or 009.605) or IDM 7720.

## Accounting and Finance -MIS 6000 Level

MIS 6150 Management of Information Systems and Technology Cr.Hrs. 3
(Formerly 009.615) This course covers the frameworks and concepts of managing information systems and knowledge management, decision support, electronic commerce, systems development, mangement information systems strategy and strategic information systems. Not to be held with 009.613 or 009.614

## Accounting and Finance -FIN 7000 Level

FIN 7070 Theory of Financial Management Cr. Hrs. 3 (Formerly 009.707) Study of selected topics in the various fields of financial management; emphasis on trends, current problems, and research in the fields. Prerequisite: FIN 6072 (or FIN 6070 or 009.607).

FIN 7080 International Finance Cr.Hrs. 3 (Formerly 009.708) The theory and practice of financial management in an international context. Includes foreign currency markets, exchange rates, measurement and management of foreign currency risk, international financing, and foreign direct investment. Prerequisite: FIN 6072 (or FIN 6070 or 009.607)

FIN 7150 Investment Policy Cr.Hrs. 3
(Formerly 009.715) Topics will include the structure of rates in the financial markets, the problem of investment timing and selection, and principles of financial analysis. Prerequisite: FIN 6072 (or FIN 6070 or 009.607).

FIN 7152 Investment Policy Cr.Hrs. 3
The theory and practice of investment management. Topics include: portfolio theory and management, market efficiency, options and futures. This course cannot be held with FIN 7150. Prerequisite: FIN 6072 (C+) [ or FIN 6070 (C+) or 009.607 (C+)].

FIN 7220 Advanced Seminar in Finance Cr.Hrs. 3 (Formerly 009.722) A case-oriented course that will require extensive preparation and presentation of selected cases in corporate financial management; emphasis on the application of theoretical models of finance to real problems. Prerequisite: FIN 6072 (or FIN 6070 or 009.607) or consent of instructor.

FIN 7230 Seminar in Financial Intermediaries and Capital Markets Cr.Hrs. 3
(Formerly 009.723) Topics will include the major participants in the capital markets and their functions; the demand and supply of money and the structure of interest rates; recent developments and international factors in the capital markets. Prerequisite: FIN 6072 (or FIN 6070 or 009.607).

FIN 7232 Financial Intermediaries and Capital Markets Cr.Hrs. 3

Topics include: the major participants in the capital markets and their functions, the demand and supply of money and the structure of interest rates, non money financial instruments, recent developments and international factors in the capital markets and capital market risk issues. This course cannot be held with FIN 7230. Prerequisite or concurrent requirement: FIN 6072 (C+) [or FIN 6070 (C+) or 009.607 (C+)].

FIN 7240 Readings in Accounting and Finance Cr.Hrs. 3 (Formerly 009.724) Supervised readings in one of the areas of accounting and finance.

FIN 7260 Selected Topics in Finance Cr.Hrs. 3
(Formerly 009.726) A study of selected topics in finance relating to advanced issues in theory or practice. Topics considered will depend on the interests and needs of the participants. Prerequisite: FIN 6072 (or FIN 6070 or 009.607) plus others if specified by the professor.

FIN 7500 Financial Theory and Corporate Policy Cr.Hrs. 3 (Formerly 009.750) Explores the conceptual and theoretical foundations of finance and their applications to corporate financial policy. Prerequisite: admission to the Ph.D. program in Management (Finance) or approval by instructor.

FIN 7510 Finance 1: Capital Markets (Ph.D) Cr.Hrs. 3 (Formerly 009.751) An understanding of the theory and empirical research in capital markets including theories and tests of financial asset valuation, portfolio analysis and market efficiency. Prerequisite: admission to the Ph.D. program in Management (Finance) or approval by instructor.

FIN 7520 Finance 2: Corporate Finance (Ph.D) Cr.Hrs. 3 (Formerly 009.752) Theoretical issues in corporation finance. Issues covered will include investment choice and shareholder unanimity, capital structure, dividend irrelevancy, corporate and personal taxes, bankruptcy costs, agency cost, asymmetric information and signalling models, theory of the firm, and corporate takeovers. Prerequisite: admission to the Ph.D. program in Management (Finance) or approval by instructor.

FIN 7530 Advanced Topics in Finance (Ph.D) Cr.Hrs. 3 (Formerly 009.753) Seminar emphasizing the mathematical tools necessary for financial decision making including an introduction to stochastic processes, stochastic dominance, and separation theorems. Applications in derivative markets, investment theory, and corporate finance. Prerequisite: admission to the Ph.D. program in Management (Finance) or approval by instructor.

## Accounting and Finance -IDM 7000 Level

IDM 7010 Industry Project Cr.Hrs. 3
(Formerly 098.701) Supervised study and research of a problem opportunity in business or management. Specific course requirements determined by the faculty member assigned to be the course coordinator. In addition, each project will be supervised by a faculty member expertin the area. Projects consist of written report(s) containing substantive, practical evidence and analytically structured comments, academic materials, and bibliographical references. Pass/Fail basis only. Prerequisite: completion of all 600-level MBA courses (or equivalent experience) and

## ACADEMIC CALENDAR

consent of MBA program director.
IDM 7020 Managing for Sustainable Development Cr.Hrs.1.5 (Formerly 098.702) Strategic issues related to the manager's role in sustainable development, including enterprises in the renewable and non-renewable resource sectors, life-cycle analysis, and full cost accounting. Emphasis is placed on environmental management control systems, environmental performance measurement, reporting, and the impact of environmental management on strategic management decisions.

IDM 7030 Social and Community Awareness Project Cr.Hrs. 0
(Formerly 098.703) An experiential project examining issues related to economically and/or socially disadvantaged individuals and groups with emphasis on corporate social responsibility. This course is graded pass/fail.

IDM 7040 Leadership and Personal Development Seminar Cr.Hrs. 0
(Formerly 098.704) Preparation in computer, technical, interpersonal, and team-building skills for MBA MANITOBA program. This course is graded pass/fail.

IDM 7050 International Study Trip Cr.Hrs. 3
(Formerly 098.705) A supervised international experience to examine the relationship between corporations, senior managers, and social institutions in selected countries. Examination of the interplay between culture, economic development, management systems and strategies in other countries. Emphasis upon establishment of business networks on an international basis.

IDM 7060 Professional Seminar Cr.Hrs. 6 (Formerly 098.706) A series of modules on executive leadership and professional management topics.

IDM 7070 Fundamental Professional \& Leadership Seminar Cr.Hrs.1.5
(Formerly 098.707) Series of seminars covering fundamental topics essential for modern management including business ethics and managing diversity.

IDM 7080 Professional and Leadership Seminar Cr.Hrs.1.5 (Formerly 098.708) Series of seminars covering fundamental topics essential for modern management including such topics as: aboriginal business, managerial law, situational leadership, creating shareholder value, developing a business plan, and career management.

IDM 7510 Strategic Leadership and Managing Change Cr.Hrs.1.5
(Formerly 027.751) An examination of the role of the manager as a change agent and processes associated with strategic vision and change. Analysis of factors affecting strategic decisions and how organizations adapt to their environment. Emphasis is upon the role of leaders: transformational leadership, charisma, organizational design and managing organizational culture change.

IDM 7720 Business Conditions Analysis Cr.Hrs.1.5 (Formerly 027.772) This course provides an awareness and understanding of key components of the economic and business environment. It explores critical forces that affect daily business decision-making including market supply and demand, the time value of money, and a firm's profitability
and valuation. As well, the course introduces the concept of financial reporting.

## Business Administration -GMGT $\mathbf{6 0 0 0}$ Level

GMGT 6030 Organization Theory and Behaviour Cr.Hrs. 3 (Formerly 027.603) An examination of current theories of structure and behaviour as they apply to organizations in the public and private sector. Emphasis upon research findings and their application in management situations.

## Business Adminstration -GMGT 7000 Level <br> GMGT 7010 Business Policy Seminar Cr.Hrs. 3

This course entails the study of general management. Students shall integrate the concepts from the various functional areas of the organization covered in the program with the different environments: social, political, economic and technological. Students will analyze general management problems, shall formulate policies, and display ability to implement policies. Must be taken in final term in the program.

GMGT 7060 Readings in Business Administration Cr.Hrs. 3 (Formerly 027.706) Supervised readings in one of the areas of business administration including human resource management, industrial relations, organizational behaviour, policy and environment.

## GMGT 7070 Administrative Studies Research

Project Cr.Hrs. 6
(Formerly 027.707) Research in any one of the areas of administrative studies.

GMGT 7080 Research Methods Cr.Hrs. 3
(Formerly 027.708) Principles of research design and data collection with examples drawn across the areas of marketing management, industrial relations, policy analysis, etc. Both cases and computer-based exercises are used. Prerequisite: MSCI 5010 (or 164.501 or 027.501).

GMGT 7090 Organizational Decision-Making Cr.Hrs. 3 (Formerly 027.709) A study of the goal-setting and decisionmaking processes in organizations and the implications for the growth and survival of such organizations.

GMGT 7100 Interpersonal Processes Cr.Hrs. 3 (Formerly 027.710) An examination of theories of interpersonal behaviour and processes as they apply to managerial situations. Emphasis upon individual behaviour and change, group dynamics, leadership behaviour, and communications.

GMGT 7110 Business and Its Environment Cr.Hrs. 3 (Formerly 027.711) Analysis of the environmental factors within which a business operates.

GMGT 7120 Organizational Power and Politics Cr.Hrs. 3 (Formerly 027.712) An examination of personal, interpersonal and organizational power in the context of organizational politics. Topics covered include rational versus political models of organizations, the accumulation and management of personal power, the politics of decisionmaking, the politics of managerial succession, the politics of budgets, authority, intergroup conflict, and bargaining and
negotiation processes.
GMGT 7350 Administration: Selected Topics Cr.Hrs. 3 (Formerly 027.735) Topics in one of the areas of business administration including human resource management, industrial relations, organizational theory and behaviour, and business policy and strategic management.

GMGT 7360 Organizational Behaviour and Self Development Cr.Hrs. 3
(Formerly 027.736) This course will operate in a seminar format with two goals. The first goal is to provide an environment in which the student can develop and manage to successful conclusion a project in which they have significant intrinsic interest. The second goal is to improve the student's understanding of the inner life of an organization by increasing his/her ability to discriminate between the organizational "ropes to skip and the ropes to know."

GMGT 7370 Managing Innovation Cr.Hrs. 3 (Formerly 027.737) An examination of organizational design characteristics in the context of a competitive international perspective. Emphasis is on organizational and technological innovation to facilitate the development of new products or processes or to implement change in existing products or processes. Topics covered include Canadian experience and policy, facilitators and inhibitors in the creative process, diffusion of innovations, and the aims of the patent process.

GMGT 7400 Readings in Organizational Behaviour (Ph.D.) Cr.Hrs. 3
(Formerly 027.740) An examination of theory and research from the social and administrative sciences that focuses on the interaction between organizations and their environments. The evaluation and synthesis of theoretical and empirical work in this area will be emphasized. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

GMGT 7410 Doctoral Seminar in Organizational Behaviour (Ph.D.) Cr.Hrs. 3
(Formerly 027.741) An examination of theory and research from the social and administrative sciences that is relevant to the behaviour of individuals and groups within organizations. Emphasis will be placed on evaluation and synthesis of theoretical and empirical work in this area. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

GMGT 7440 Doctoral Seminar in Organizational Theory (Ph.D.) Cr.Hrs. 3
(Formerly 027.744) The major goal of this course is to familiarize students with central schools of thought within organization theory. As with other theories in the social sciences, these schools of thought tend to be based on differing assumptions about the nature of theorganizational world, the operation of causality, epistemology, and the role of human actors. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

GMGT 7510 Strategic Leadership and Managing
Change Cr.Hrs.1.5
(Formerly 027.751) An examination of the role of the
manager as a change agent and processes associated with strategic vision and change. Analysis of factors affecting strategic decisions and how organizations adapt to their environment. Emphasis is upon the role of leaders: transformational leadership, charisma, organizational design and managing organizational culture change.

GMGT 7520 Issues in Managerial Communication Cr.Hrs. 3 (Formerly 027.752) An examination of strategies and development of skills for effective oral, written, non-verbal, interpersonal, group, cross-cultural, and ethical communication in management.

GMGT 7530 Selected Topics Cr.Hrs. 3
(Formerly 027.753) An examination of current issues in areas which could, for example, include: organizational behaviour, organizational theory, strategy, human resource management, and industrial relations. Prerequisite: consent of instructor.

GMGT 7540 Doctoral Seminar in Research Methods (Ph.D.) Cr.Hrs. 3
(Formerly 027.754) Principles of research design and data collection appropriate for the areas of marketing, management, industrial relations, policy analysis, finance, management science, etc. Research problems and issues will be discussed from a number of perspectives. Conceptual material, statistical analyses, theoretical material and the utilization of statistical application software are used as the bases for seminar discussion. Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

GMGT 7710 Managerial Communication Cr.Hrs.1.5 (Formerly 027.771) Focus is on the interpersonal, intergroup, and intraorganizational communication skills required for effective leadership, and the objectives are to assist the participants in the following: increasing the clarity, correctness, and effectiveness of written and oral communication; recognizing and analysing communication dynamics at work in personal, group, and organizational interactions; increasing combination flexibility and proficiency in times of corporate challenge, change, and crisis.

GMGT 7720 Business Conditions Analysis Cr.Hrs.1.5 (Formerly 027.772) To provide an awareness of key components of the economic/business environment. Identifies critical indicators that affect decision-making and suggests strategies for forecasting future conditions. Topics covered include critical demographic trends, the change technological frontier, international trade, finance, and investment trends, and trends in interest rates and exchange rates. A theoretical overview will precede the discussion of business conditions indicators.

GMGT 7740 Business/Government Relations Cr.Hrs.1.5 (Formerly 027.774) Focuses on the logic of political-economic-business relations. The point of view is that of the manager. Specific tools of analysis are discussed that assist managers in understanding and working with aspects of public policy which interface with their private sector decisions.

## Business Administration -INTB 7000 Level

INTB 7030 Comparative Management Cr.Hrs. 3
(Formerly 027.703) Comparative study and evaluation of

## ACADEMIC CALENDAR 2012-2013 .

management philosophy and practices in cross-cultural setting; the cultural, economic, and political environment which influence management decision-making. Not taught every year.

INTB 7040 International Organizational Behaviour Cr.Hrs. 3 The examination of dilemmas and opportunities that managers face when they work in a cross-cultural setting. The purpose of this course is to develop the necessary understandings and skills to effectively manage problems arising from the interaction of people from different cultures in work settings. Not to be held with INTB 7030 (or 027.703).

INTB 7730 International Business Cr.Hrs.1.5 (Formerly 027.773) Develop an appreciation of business decision-making in an international/global context. Learning activities are focused towards developing intellectual and interpersonal skills in order for managers to function more effectively in international markets.

## Business Administration -HRIR 7000 Level

HRIR 7140 Topics in Industrial Relations/Human Resource Management Cr.Hrs. 3
(Formerly 027.714) An in-depth analysis of various topics in industrial relations and human resource management. Prerequisite or corequisite: HRIR 7450 (or 027.745).

HRIR 7162 Staffing Cr.Hrs. 3
This advanced graduate seminar provides an understanding of the staffing function of Human Resources Management. The course focuses on how recruitment, selection, performance management, and retention management function within an organization to gain a competitive advantage through the management of work and people.

HRIR 7164 Training and Development Cr.Hrs. 3 This advanced graduate seminar provides an understanding of the training and development functions of Human Resources Management. The course focuses on how to design, implement, and evaluate a training program, and employee development and career management.

HRIR 7166 Compensation Cr.Hrs. 3
A review of the major concepts and design of compensation systems including: strategy, internal equity, external competitiveness, rewarding individual contributions, performance incentives, employee benefits, government regulations, union role in compensation, budgets and administration.

HRIR 7168 The Management of Labour and Employee Relations Cr.Hrs. 3
An examination of the systems of labour and employee relations in Canada as it coompares with the systems of other countries. Emphasis upon understanding and managing labour and employee relations in a changing economy. Not to be held with HRIR 7500 (or 027.750).

HRIR 7450 Industrial Relations/Human Resource Management Cr.Hrs. 3
(Formerly 027.745) The process of valuing, employing, developing, motivating and maintaining human resources in an industrial society. An introduction to the study of labour relations in the social technical systems of the Federal Government, the Provincial Government and profit and non-
profit organizations.
HRIR 7460 Collective Bargaining Cr.Hrs. 3
(Formerly 027.746) The labour management relations in the negotiation and administration of the collective agreement. The analysis of conflict and the application of bargaining theories. Pre- or corequisite: HRIR 7450 (or 027.745).

## Business Administration -ENTR $\mathbf{7 0 0 0}$ Level

ENTR 7240 Entrepreneurship and New Venture
Formation Cr.Hrs.1.5
(Formerly 118.724) Entrepreneurship and enterprising behaviour with an emphasis on the identification and evaluation of viable new venture concepts and their development into successful enterprises.

## Ph.D. Program -PHDM 7000 Level

PHDM 7110 Doctoral Seminar in Management (Ph.D.) Cr.Hrs. 3
(Formerly 119.711) Examination of the philosophy of science in management and overview of management research typologies, methods, and the role of research in the practice of management. Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

PHDM 7120 Management Research Project 1
(Ph.D.) Cr.Hrs. 3
(Formerly 119.712) Examination of research designs and preparation of theoretical paper in management.
Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

PHDM 7130 Management Research Project 2
(Ph.D.) Cr.Hrs. 3
(Formerly 119.713) Departments in the faculty offer two types of graduate programs, those leading to Master of Science and Doctor of Philosophy degrees and those leading to specialization and certification in a clinical discipline. Combinations of such programs can be arranged on an individual basis for students wishing both clinical and basic science research experience. Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

## Interdepartmental -IDM 7000 Level

IDM 7010 Industry Project Cr.Hrs. 3
(Formerly 098.701) Supervised study and research of a problem opportunity in business or management. Specific course requirements determined by the faculty member assigned to be the course coordinator. In addition, each project will be supervised by a faculty member expertin the area. Projects consist of written report(s) containing substantive, practical evidence and analytically structured comments, academic materials, and bibliographical references. Pass/Fail basis only. Prerequisite: completion of all 600-level MBA courses (or equivalent experience) and consent of MBA program director.

IDM $\mathbf{7 0 2 0}$ Managing for Sustainable
Development Cr.Hrs.1.5
(Formerly 098.702) Strategic issues related to the manager's
role in sustainable development, including enterprises in the renewable and non-renewable resource sectors, life-cycle analysis, and full cost accounting. Emphasis is placed on environmental management control systems, environmental performance measurement, reporting, and the impact of environmental management on strategic management decisions.

## IDM 7030 Social and Community Awareness

Project Cr.Hrs. 0
(Formerly 098.703) An experiential project examining issues related to economically and/or socially disadvantaged individuals and groups with emphasis on corporate social responsibility. This course is graded pass/fail.

IDM 7040 Leadership and Personal Development Seminar Cr.Hrs. 0
(Formerly 098.704) Preparation in computer, technical, interpersonal, and team-building skills for MBA MANITOBA program. This course is graded pass/fail.

IDM 7050 International Study Trip Cr.Hrs. 3 (Formerly 098.705) A supervised international experience to examine the relationship between corporations, senior managers, and social institutions in selected countries. Examination of the interplay between culture, economic development, management systems and strategies in other countries. Emphasis upon establishment of business networks on an international basis.

IDM 7060 Professional Seminar Cr.Hrs. 6 (Formerly 098.706) A series of modules on executive leadership and professional management topics.

IDM 7070 Fundamental Professional \& Leadership Seminar Cr.Hrs.1.5
(Formerly 098.707) Series of seminars covering fundamental topics essential for modern management including business ethics and managing diversity.

IDM $\mathbf{7 0 8 0}$ Professional and Leadership Seminar Cr.Hrs.1.5 (Formerly 098.708) Series of seminars covering fundamental topics essential for modern management including such topics as: aboriginal business, managerial law, situational leadership, creating shareholder value, developing a business plan, and career management.

IDM 7510 Strategic Leadership and Managing

## Change Cr.Hrs.1.5

(Formerly 027.751) An examination of the role of the manager as a change agent and processes associated with strategic vision and change. Analysis of factors affecting strategic decisions and how organizations adapt to their environment. Emphasis is upon the role of leaders: transformational leadership, charisma, organizational design and managing organizational culture change.

IDM 7720 Business Conditions Analysis Cr.Hrs.1.5 (Formerly 027.772) This course provides an awareness and understanding of key components of the economic and business environment. It explores critical forces that affect daily business decision-making including market supply and demand, the time value of money, and a firm's profitability and valuation. As well, the course introduces the concept of financial reporting.

## Marketing -MKT 6000 Level

MKT 6080 Marketing Cr.Hrs. 3
(Formerly 118.608) Analysis of the evolution and characteristics of marketing systems; the various types of consumers and their behaviour; marketing activities of the firm; legislation at all levels which affect marketing decisions.

## Marketing -MKT 7000 Level

MKT 7080 Selected Topics in Marketing Cr.Hrs. 3 (Formerly 118.708) A study of selected areas of recent development in the field of marketing. Topics may include the marketing of services, market research, business to business marketing, marketing channel systems, personal selling or sales management, and physical distribution. Prerequisite: MKT 6080 (or 118.608)

MKT 7100 Readings in Marketing (Ph.D.) Cr.Hrs. 3 (Formerly 118.710) A survey of current literature in the major areas of marketing and marketing research. Emphasis upon empirical developments as they affect the application of marketing concepts.

MKT 7110 Doctoral Seminar in Marketing (Ph.D.) Cr.Hrs. 3 (Formerly 118.711) Advanced study of marketing thought integrating the functional areas of marketing. Seminars on selected research topics and recent developments in the field.

MKT 7120 Ph.D. Seminar in Buyer Behavior (Ph.D.) Cr.Hrs. 3
(Formerly 118.712) Concepts and literature relating psychological and sociological perspectives to buyer behaviour in Marketing. Prerequisite: consent of instructor.

MKT 7200 Decisions and Concepts in Marketing Cr.Hrs. 3 (Formerly 118.720) Application of the principles of marketing from a managerial viewpoint; emphasis on marketing planning, strategy, and control; and appraisal of the effectiveness of marketing activities. Prerequisite: MKT 6080 (or 118.608).

MKT 7210 Marketing and Competitive Behaviour Cr.Hrs. 3 (Formerly 118.721) Designed to give the student a deeper understanding of the dynamics of marketing behaviour. Oriented towards theoretical conceptualizations of the problems and practices in marketing areas. Prerequisite: MKT 6080 (or 118.608).

MKT $\mathbf{7 2 2 0}$ Seminar in Marketing Cr.Hrs. 3
(Formerly 118.722) Study of selected topics in marketing with emphasis on recent theoretical developments and their application. Prerequisite: MKT 6080 (or 118.608).

MKT 7230 Seminar in Consumer Behaviour Cr.Hrs. 3 (Formerly 118.723) Intensive study of consumer behaviour as it relates to the marketing function. Prerequisite or concurrent requirement: MKT 6080 (or 118.608).

MKT 7300 International Marketing Cr.Hrs. 3
(Formerly 118.730) A study of problems and opportunities of marketing in foreign environments. It will focus on the cultural, economic and geographical problems encountered in managing the marketing function from a Canadian
manager's perspective. Prerequisite: MKT 6080 (or 118.608).

MKT 7500 Readings in Marketing Cr.Hrs. 3
(Formerly 118.750) Supervised readings in one of the areas of Marketing. Prerequisite: MKT 6080 (or 118.608) and at least one other graduate marketing course.

## Supply Chain MAnagement -MSCI 5000 Level

MSCI 5010 Mathematics for Management Cr.Hrs. 3 (Formerly 164.501) A remedial course in linear and matrix algebra and calculus; with applications to elementary management problems. Note: this course will not be included in the calculation of the Grade Point Average. Pass/Fail. Not to be held with 027.501.

## Supply Chain Management -MSCI 6000 Level

MSCI 6070 Quantitative Analysis for Management Cr.Hrs. 3 (Formerly 164.607) Introduction to the use of quantitative techniques, and computers to solve management problems. Mathematical optimization models, network analysis, and probability models. Prerequisite: MSCI 5010 (OR 164.501). Not to be held with 027.607 OR 164.607.

## Supply Chain Management -MSCI 7000 Level

MSCI 7550 Readings in Management Science (Ph.D.) Cr.Hrs. 3
(Formerly 027.755) A study of recent literature in the Management Sciences and their applications, with emphasis on new developments.

MSCI 7560 Doctoral Seminar in Management Science (Ph.D.) Cr.Hrs. 3
(Formerly 027.756) Seminars on the selected research topics of recent advances in the field of Management Science covering areas of current interests.

MSCI 7680 Mathematical Optimization Models Cr.Hrs. 3 (Formerly 164.768) A specialized course in mathematical optimization. Linear programing, integer programing, Fritz John and Kuhn-Tucker theorems, quadratic programing, nonlinear programing, duality, network analysis.
Prerequisite: OPM 6090 (or 164.609 or 027.609 ).

## Supply Chain Management -OPM 6000 Level

OPM 6090 Production Management Cr.Hrs. 3 (Formerly 164.609) Analysis of the basic concepts of production systems, and operation and control of such systems. Not to be held with 027.609.

Supply Chain Management -OPM 7000 Level<br>OPM 7300 Topics in Advanced Production and Operations Management Cr.Hrs. 3<br>(Formerly 164.730) A study of recent developments in production systems and management. Topics include systems design, plant location and layout, inventory systems planning and control. Prerequisite: OPM 6090 (or 164.609 or 027.609)

## Supply Chain Management -SCM 7000 Level

SCM 7010 Advanced Supply Chain Management Cr.Hrs. 3 (Formerly 164.701) Provides students at the graduate level with an in-depth examination of the major issues associated with the management of supply chains. The course content includes both managerial and technical matters, and addresses issues such as the importance of supply chain management in meeting global competition, internet and ebusiness application, supply chain integration and relatinoships, sharing risks and rewards, and the reduction of varienace in supply chain performance. Prerequisite: A degree in business or discipline related to supply chain management or approval by instructor.

## Health Administration

CHSC 7130 Methods in Health Services Research and Evaluation Cr.Hrs. 3
(Formerly 093.713) Examines the process of planning and conducting research and evalution to assess health services with an emphasis on the methods by which a question may be translated into a testable hypothesis, and the specification of a research plan that will produce results of maximum internal and external validity.

CHSC 7200 Health and Health Care in Developing
Countries Cr.Hrs. 3
(Formerly 093.720) The course will focus on the patterns of mortality and morbidity in developing countries and the organization of health care services. Social, cultural, and economic development will be related to health and health services.

CHSC 7210 Epidemiology of Women's Health Cr.Hrs. 3 (Formerly 093.721) This course will deal with problems and concerns particular to women's health. The topics will be approached from an epidemiological perspective but use will be made of materials from health economics, evaluation research, medical sociology and anthropology.

CHSC 7220 Health and Health Services of Native People Cr.Hrs. 3
(Formerly 093.722) This course provides a detailed review of the health status and the determinants of health of Canada's native people.

CHSC 7270 Epidemiology of Chronic (Non-Cancer)
Diseases Cr.Hrs. 3
(Formerly 093.727) The objective is to study the natural
history of chronic diseases including the distribution of

## ACADEMIC CALENDAR 2012-2013 •

diseases, risk and prognostic factors, rationale and strategies for prevention. The methodological issues concerning the investigation of severe disease are also discussed. Prerequisite: a minimum grade of " B " in CHSC 7520 (or 093.752).

CHSC 7290 Economic Evaluation of Health Care Cr.Hrs. 3 (Formerly 093.729) The objectives of this course are to enable students to understand economic evaluation methodologies (cost-effectiveness, cost-benefit, cost-utility analysis) as applied to health care and to familiarize them with the applied literature on economic evaluation of health care. Prerequisite: permission of instructor.

CHSC 7300 Health Policy and Planning Cr.Hrs. 3 (Formerly 093.730) This course defines health policy and describes the planning and decision-making process. Case studies will be used to illustrate and critique the substance, process and outcome of policy papers that address contemporary policy issues. Prerequisite: permission of instructor.

CHSC 7310 Epidemiology of Health Care Cr.Hrs. 3 (Formerly 093.731) This course will discuss the advantages and disadvantages of using large administrative data bases for research purposes. Substantive topics dealt with include: regional variations in provision and utilization of health care, short- and long-term outcomestudies, individual physician behaviour, and technology assessment. Policy implications are considered. Prerequisite: a minimum grade of " B " in CHSC 7520 (or 093.752) or equivalent and permission of instructor.

CHSC 7320 Organization and Financing of the Canadian Health Care System Cr.Hrs. 3
(Formerly 093.732) Students will study the historical development and current structure of the Canadian health care system and relate its development to changes in social and political factors. The course provides an economic perspective on current policy issues in the organization, financing, and delivery of health care in Canada.

CHSC 7330 Cultural Perspectives on Illness and Medical Practice Cr.Hrs. 3
(Formerly 093.733) The objective of this course is to make students aware of the ways in which disease, illness, and medical practice are socially and culturally mediated. The course will examine cultural influences on the experience and expression of illness and consider the medical practitioner's role in the development and provision of culturally responsive health care. Prerequisite: permission of instructor.

CHSC 7360 Clinical Trials Cr.Hrs. 3
(Formerly 093.736) The Randomized Clinical Trial is the only true experiment in clinical research. This course is intended to give students a detailed knowledge of the design and implementation of RCTs. Students will participate in a qualitative review of RCTs. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752), CHSC 7470 (or 093.747), CHSC 7480 (or 093.748) or equivalents.

CHSC 7380 Prevention and Health Cr.Hrs. 3 (Formerly 093.738) The course will cover frameworks used in -formulating preventive strategies. Topics will include risk factor assessment, screening, health education, legislation, litigation, lifestyle and prevention. Actual case studies will be
used. Prerequisite: CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753).

CHSC 7390 Health Promotion Cr.Hrs. 3
(Formerly 093.739) An examination of theories, principles, practices and settings for health promotion. Prerequisite: permission of instructor.

CHSC 7400 Directed Readings I: In Epidemiologic
Methods Cr.Hrs. 3
(Formerly 093.740) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisites: permission of instructor and Graduate Program Director.

CHSC 7410 Directed Readings: II - In
Epidemiology Cr.Hrs. 3
(Formerly 093.741) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisite: permission of instructor and Graduate Program Director.

CHSC 7430 Seminars on Advanced Topics: II - In Methods of Health Care Cr.Hrs. 3 (Formerly 093.743) Sem-inars dealing with current research issues, emerging methodologies and analytical techniques will be offered for advanced students. Prerequisite: permission of instructor.

## CHSC 7450 Epidemiology of Communicable

Diseases Cr.Hrs. 3
(Formerly 093.745) Overview of epidemiological principles in communicable disease investigation and prevention and specific issues in controls of certain specific communicable diseases of public health importance in Canada will be introduced. Prerequisite: permission of instructor. Prerequisite: a minimum grade of "B" om CHSC 7520 (or 093.752).

CHSC 7460 Environmental and Occupational

## Health Cr.Hrs. 3

(Formerly 093.746) The aim of the course is to acquaint the student with the role of the environment (general and specifically working) as the determinant of health. The content of the course will be presented in the form of lectures, seminars, and field visits. Prerequisite: permission of instructor.

CHSC 7490 Empirical Perspectives on Social Organization and Health Cr.Hrs. 3
(Formerly 093.749) This course will focus on a selected review of the epidemiological literature which has integrated social factors in the investigation of the distribution of health and illness in society. The course will review a selection of important empirical studiesinvestigating the roles played by social, psychological and economic status factors in determining health and illness. Emphasis will be placed on identifying the central theoretical and methodological approaches to defining and measuring socioeconomic status in this literature. Prerequisite: permission of instructor.

CHSC 7510 Current Topics in Community Health Cr.Hrs. 3 (Formerly 093.751) Focus on current issues and topics in community health, particularly as they relate to Manitoba and to Canada. Emphasis will be placed on current literature and ongoing research to examine emerging policies and programs within health care and social development.

## ACADEMIC CALENDAR

Prerequisite: basic courses in Epidemiology and Statistics. Prerequisites: a minimum grade of " B " in CHSC 7520 (or 093.752) and CHSC 7470 (or 093.747) and CHSC 7320 (or 093.732).

CHSC 7520 Principles of Epidemiology 1 Cr.Hrs. 3 (Formerly 093.752) This course will introduce the basic concepts and methods of epidemiology, including the definition and measurement of health status and health determinants in populations, assessing health risks and inferring causation, and issues in the design and analysis of population health studies.

CHSC 7530 Principles in Epidemiology II Cr.Hrs. 3 (Formerly 093.753) This course follows the Principles of Epidemiology I and discusses the applications of epidemiologic principles in public health practice, including the investigations of epidemics, disease surveillance, clinical applications, evaluation of health programs, and the planning of preventive programs. Students will also receive instruction in microcomputer applications and use of EPI-INFO software for data entry, analysis and presentation. Corequisite: CHSC 7480. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and in CHSC 7470 (or 093.747)..

CHSC 7540 Advanced Epidemiology Cr.Hrs. 3 (Formerly 093.754) Advanced epidemiologic research methods focusing on selected epidemiological issues (bias, confounding, matching, etc.). Discussion will be directed to both epidemiological and statistical considerations to find the optimal solution to a research problem. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752), CHSC 7530 (or 093.753), CHSC 7280 (or 093.728).

CHSC 7550 Observational Epidemiology Cr.Hrs. 3 (Formerly 093.755) Intermediate epidemiologic research methods focusing on case-control and cohort studies, with discussion on issues relating to planning and design, implementation, and data analysis. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753 ) and CHSC 7470 (or 093.747) and CHSC 7480 (or (093.748)..

CHSC 7560 Epidemiology of Cancer Cr.Hrs. 3 (Formerly 093.756) This course introduces the magnitudes, risk factors and prevention strategies of cancer. It focuses on current knowledge related to the etiology of cancer, medical interventions and potential for prevention. Prerequisite: a minimum grade of " B " in CHSC 7520 (or 093.752).

CHSC 7610 Advanced Topics in Community Health

## 1 Cr.Hrs. 1.5

Special advanced research topics in Community Health Sciences.

## CHSC 7620 Advanced Topics in Community Health

 2 Cr.Hrs.1.5Special advanced research topics in Community Health Sciences.

CHSC 7710 Social Aspects of Aging Cr.Hrs. 3
This course is an advanced seminar designed to examine current social issues in aging. The course is organized around selected topics related to aging. Where possible, the Canadian experience will be compared to international trends and diversity will be highlighted. The first section is a review of the field of gerontology, ageism, demographic
trends, theoretical perspectives and methods and the second section explores contemporary social issues. This course is a required course for the Graduate Specialization in Aging Certificate.

CHSC 7720 Health and Aging Cr.Hrs. 3
This course is an advanced seminar designed to examine health and health care issues in aging. Where possible, the Canadian (or Manitoban) experience will be highlighted. Key topics in the health domain will be covered, such as frailty, mental health, and dementia. The provision of care for older adults will also be covered, focusing on both the formal care system, as well as informal care providers. This course is a reuqirement for the Graduate Specialization in Aging.
CHSC 7730 Topics in Health Services Research Cr.Hrs. 3 This course will expose students to select health services research topics that are particularly relevant in Manitoba and Canada. Students are expected to actively engage in seminars led by health services researchers and decisionmakers, and also provide informative presentations in their own area of research. Students will also gain knowledge about various communication and knowledge translation strategies.

CHSC 7740 Advanced Qualitative Methods Cr.Hrs. 3
The purpose of this course is to provide students with fundamental aspects related to qualitative research methods and analysis. By the end of the course, students should have an understanding of the principles and practices involved in: the application of different social theories to qualitative methods; designing a qualitative research study; various ways of collecting qualitative data and analyzing written texts; ways of integrating qualitative methods in a mixed methods design; developing different products for knowledge exchange activities; and 'hands-on' experience in doing qualitative analysis using qualitative software.

## CHSC 7810 Biostatistics for the Health and Human Sciences

## 1 Cr.Hrs. 3

An introduction to statistical ideas and techniques for health sciences and human research. Describing data, patterns in data, the Normal distribution. Principles of estimation and principles of hypothesis testing. Principles and practice of the major statistical tests ( tests, analysis of variance, Chi squared tests, correlation and regression). Nonparametric statistical techniques. The use of statistical software to carry out statistical analyses. Analytic decision strategies.

## CHSC 7820 Biostatistics for Community Health Sciences

## 1 Cr.Hrs. 3

The course will cover techniques of research design and analysis for community health researchers. Topics include: principles of experimental design, study size determination, statistical software as an analytical tool, techniques for the analysis of continuous outcomes, analysis of variance for multi-way, factorial and split-unit experiments, and multiple regression and general linear models. Introduction to more advanced statistical methods including logistic regression and survival models. Prerequisite: Undergraduate course in statistics.

CHSC 7830 Biostatistics for Community Health Sciences 2 Cr.Hrs. 3
This course will cover techniques for the analysis of complex data sets involving continuous, categorical and time-related outcome variables. Principles of statistical modeling. The

## ACADEMIC CALENDAR

behaviour of non-continuous variables. Categorical outcome variables and logistic regression. Poisson outcome variables and Poisson regression. Time-dependent outcomes, survival analysis and proportional hazards regression. Prerequisite: CHSC 7820 with a grade of $\mathrm{B}+$ or better.

CHSC 7860 Methods and Concepts for Community Health Sciences Cr.Hrs. 3
This course is designed to provide both a practical and theoretical introduction to qualitative, quantitative, and multimethod approaches used in health research. The emphasis in the course will be on applied research, consistent with the characteristics of the Department of Community Health Sciences as a whole.

CHSC 7870 Health Survey Research Methods Cr.Hrs. 3 Students critically examine the use of health survey methodology within epidemiology. They also learn to apply survey methodology, as a means to gain a strong appreciation of the reflective, theoretical and analytical thinking required to successfully design and implement epidemiological health surveys. Prerequisites: CHSC 7820 and CHSC 7520.

## Business Government Relations

POLS 7280 Directed Readings in Politics Cr.Hrs. 3 (Formerly 019.728) An independent reading and/or research course on a selected topic in political studies, undertaken and arranged in consultation with the prospective instructor, upon the approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7290 Directed Readings in Politics 2 Cr.Hrs. 6 (Formerly 019.729) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7300 Directed Readings in Public
Administration Cr.Hrs. 3
(Formerly 019.730) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7330 State-Civil Society Relations Cr.Hrs. 3 An examination of how the state relates to civil society actors, notably the voluntary sector in Canada. Students will critically assess the role voluntary organizations play - and should play - in governing process.

POLS 7340 Canadian Government Cr.Hrs. 3 (Formerly 019.734) Examines the core institutions of Canadian Government and politics including parliamentary government, federalism, the Constitution and the Charter of Rights and Freedoms. Students may not hold credit for both POLS 7340 (or 019.734) and the former 019.776.

POLS 7350 Canadian Democracy Cr.Hrs. 3 (Formerly 019.735) Examines the core institutions and
processes of Canadian democracy including political parties, elections, voting, social movements, interest groups and public opinion. Students may not hold credit for both POLS 7350 (or 019.735) and the former 019.776.

POLS 7370 Seminar in the Theory and Practice of Public Administration Cr.Hrs. 6
(Formerly 019.737) The intent of this course is to provide insight into the exigencies of actual public administration. The course will be conducted on a topical basis within the framework of certain trends facing Canadian governments today. (The course will attempt to utilize, to the fullest extent possible, the particular expertise of students in the program, faculty members, and of both elected and appointed public officials.) Students may not hold credit for both POLS 7370 (or 019.737) and the former 019.731.

POLS 7410 Selected Topics in Political Behaviour 1 Cr.Hrs. 3
(Formerly 019.741) A systematic examination of empirical research in the area of political socialization and political culture. Students may not hold credit for both POLS 7410 (or 019.741 ) and the former 019.725.

POLS 7470 Strategic Human Resource Management in Government Cr.Hrs. 3
A study of the human resource management functions, including planning, staffing, training, performance management, compensation and labour relations, in ways that optimize organizational performance. This course will also address contemporary challenges including recruitment and retention, managing change, demographic shifts, and information technology.

POLS 7520 The Political Classics Cr.Hrs. 3 (Formerly 019.752) A thorough study of selected works with special attention to methodology, historical content, theoretical position and universal significance. Students may not hold credit for both POLS 7520 (or 019.752) and the former 019.771.

POLS 7530 International Political Economy Cr.Hrs. 3 (Formerly 019.753) An examination of the systematic study of international political economy. Particular attention is paid to the foreign economic policies of advanced industrialized states and the various issues surrounding the redistribution of wealth and influence in the contemporary international system.

## POLS 7550 Contemporary Issues in Canadian

Politics Cr.Hrs. 3
(Formerly 019.755) A seminar series examining a contemporary debate in Canadian politics and government. The specific topic will vary from year to year depending on faculty interest and specialization.

POLS 7610 Political Theory and Contemporary Issues Cr.Hrs. 3
(Formerly 019.761) An examination of recent theoretical perspectives on contemporary political institutions, problems and values. Students may not hold credit for both POLS 7610 (or 019.761) and the former 019.771.

POLS 7710 Liberalism and Its Critics Cr.Hrs. 3
An advanced study of liberalism and various theoretical challenges to its ethical and political claims.

## ACADEMIC CALENDAR

2012-2013 •

POLS 7720 Comparative Government Cr.Hrs. 6 (Formerly 019.772) Three hours a week, both terms. The primary focus of this course will be on the major Western "democracies" (e.g., United Kingdom, United States, and Western Europe). Phenomena to be examined include political participation and the problems of social change in industrial societies.

POLS 7790 International Relations Theory Cr.Hrs. 3 (Formerly 019.779) A critical assessment of basic theories and models used in International Relations, emphasizing theoretical approaches and research. Students may not hold credit for both POLS 7790 (or 019.779) and the former 019.773.

POLS 7850 Contemporary Strategic and Security
Studies Cr.Hrs. 6
(Formerly 019.785) An advanced course in strategic studies. The evolution of strategic thought in the modern period will be examined, and particular emphasis will be placed on the role of armed force in relation to the problem of international security. Students may not hold credit for both POLS 7850 (or 019.785) and the former 019.783. Normally students will be expected to have taken POLS 4730 (or 019.473) or its equivalent as prerequisite.

POLS 7910 Multivariate Research Methods Cr.Hrs. 3 (Formerly 019.791) Introduction to the theory and application of multivariate regression models in political analysis. Students may not hold credit for POLS 7910 (or 019.791) and either the former 019.732 or 019.788 .

## Mathematical, Computational and Statistical Sciences

Institute of Industrial Mathematical Sciences (IIMS)
Campus Address/General Office: 420 Machray Hall
Telephone: (204) 4746724
Fax: (204) 4747602
Email Address: iims@umanitoba.ca
Website: http://umanitoba.ca/institutes/iims

The Master of Mathematical, Computational and Statistical Sciences is a joint program of the Departments of Mathematics, Computer Science and Statistics. The program is interdisciplinary both in concept and structure, and furthers the mission of the University of Manitoba in its intent to enhance contacts and partnerships with outside organizations.

Students enrolled in the program are employees of industry, business or government. A major component of a student's program is a practicum, which is intended to make an important contribution to a project at the student's place of employment. While working on the practicum the student will be jointly supervised by an Industry Advisor (from the student's workplace) and an Academic Advisor (from the University).

All applied areas of mathematics, computer science and statistics are potential fields of research under this program.

## Research Facilities

The Institute of Industrial Mathematical Sciences is a research institute within the Faculty of Science. The IIMS has the mandate to conduct applied research in the mathematical, computational or statistical sciences -- either in collaboration with industry, or on problems motivated by industrial applications. The IIMS also facilitates collaboration between mathematical scientists and industrial partners, and among mathematical scientists in different disciplines. The director of the IIMS is the coordinator of the Master of Mathematical, Computational and Statistical Sciences program.

## Master of Mathematical, Computational and Statistical Sciences, <br> Admission

All applications will be reviewed on an individual basis, using the criteria for admission of the Faculty of Graduate Studies. Students are normally expected to have completed a fouryear Bachelor's degree in Engineering, Management, Science or other related areas for entrance. In exceptional cases, industrial experience together with appropriate university courses may be considered to be equivalent to the completion of a four-year degree.

## Application Deadlines

The following are the deadlines for submission of applications to the IIMS:

Start Date

| Regular | (September) <br> Winter |
| :--- | :--- |
| (January) |  |
| Spring | (May) |
| Summer | (July) |

Canadian/U.S. NonCanadian
March 1 July 1 November 1 January 1

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. A minimum of 18 credit hours of approved course work, and a practicum. The specific courses to be taken will depend upon the student's background and area of concentration. Normally, the courses to be taken will be selected from the three participating departments, although appropriate courses from the faculties of Engineering and Management may also be permitted. A required course of all students is a graduate level Industrial Modelling course. This course is currently under development, and will be team taught by members of the three departments.

Second language reading requirement: none

## Fields of Research

Expected time to graduate: 18 months

## 

ACADEMIC CALENDAR

Courses listed under the departments of Mathematics, Computer Science and Statistics are potential courses in this program.

## Mathematics

Head: G. R. Krause
Campus Address/General Office: 342 Machray Hall
Telephone: (204) 4748703
Fax: (204) 4747611
Email Address: mathematics dept@umanitoba.ca
Website: http://www.math.umanitoba.ca
Academic Staff: Please refer to our website for academic staff information:http://www.math.umanitoba.ca/

The department offers Master's and Ph.D. programs at the graduate level, which cover many areas of mathematics. Graduates find work in industry or in academia.

## Fields of Research

The department has people working in the areas of algebra, analysis, computational mechanics, computer graphics, differential equations, discrete mathematics, finite-element methods, foundations, geometry, matrix computations, numerical analysis and topology. More information about specific individuals and their current graduate students can be found on the department web pages.

The department operates several seminars in addition to graduate courses. Faculty, graduate students and visitors from all over the world participate in such research seminars. Regular seminars are held in discrete mathematics, functional analysis, rings and modules, mathematical biology, topology and universal algebra/lattice theory. There is also a weekly graduate student seminar in which graduate students give talks on topics of their choice.

## Research Facilities

The department provides each graduate student with an office (shared) and access to computers, laser printers, mail, photocopier, fax machine, mathematical journals, a reading room and a lounge.

The computer room has several Macintosh and Windows computers running the operating systems - Mac O/S, Windows. Software programs include Maple, Mathematica, MathCad, Matlab, Scientific Workplace, word processing/spreadsheet programs, web access and network access to UNIX servers.

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students should generally have a strong background in Mathematics with courses leading to an Honours or four-year Major in Mathematics in a B.Sc., B.A., or equivalent degree. The department's Graduate Studies Committee will evaluate the student's background. Admission to the program will be based on this evaluation. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Courses will be prescribed on an individual basis to help the student qualify for graduate work in Mathematics. Contact the department for information.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date.
International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The program consists of approved coursework and a thesis or practicum. Students are required to take 15 credit hours of coursework, of which at least 6 hours must be at the graduate level in Mathematics and at least 6 hours in an area of Mathematics clearly different from the area of specialization of the thesis or practicum. Particular programs of study within Mathematics may require courses outside the Department of Mathematics.

Second language reading requirement: none

Expected time to graduate: two years

## Ph.D. in Mathematics,

 AdmissionAdmission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students entering the Ph.D. program must have either an Honours degree or a M.Sc. degree in Mathematics.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

Program Requirements
M.Sc. in Mathematics, Admission

## ACADEMIC CALENDAR 2012-2013 •

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Particular programs of study within mathematics may require courses outside the Department of Mathematics. In addition to the course work, the student is required to take a candidacy examination, which will consist of three comprehensive exams from the following areas: Algebra, Analysis, Combinatorics, Differential Equations, Geometry, Computational Mathematics, Topology, at least one of which must be Algebra or Analysis. The candidate's supervisor must approve the choice of subjects. To proceed to a Ph.D. degree a student must have a grade of " A " on each of the three parts.

Second language requirement: yes
Expected time to graduation: 3-5 years

## Mathematics

MATH 8010 Advanced Matrix Computations Cr.Hrs. 3 (Formerly 136.801) Matrix computation, decomposition of matrices, iterative methods, sparse matrices, eigenvalue problems. Prerequisites: linear algebra, computing, numerical analysis, and consent of instructor.

MATH 8110 Applied Finite Element Analysis Cr.Hrs. 3 (Formerly 136.811) Theory and practice of the finite element method of the solution of partial differential equations and its application to engineering and scientific problems. It includes the $\mathrm{h}, \mathrm{p}$ and h -p versions, a priori and a posteriori error estimates, adaptability and the structure of finite element software. Prerequisite: numerical analysis and partial differential equations or consent of the instructor.

MATH 8150 Numerical Solution of Partial Differential Equations Cr.Hrs. 3
(Formerly 136.815) Finite-difference and finite-element methods for parabolic, elliptic and hyperbolic partial differential equations. Prerequisites: partial differential equations, numerical analysis, and consent of instructor.

MATH 8210 Topics in Combinatorics 1 Cr.Hrs. 3 (Formerly 136.821) Topics will be chosen from the areas of algebraic combinatorics, coding theory, design theory, enumerative combinatorics, graph theory, Prerequisite: approval of department.

MATH 8310 Partial Differential Equations of Applied Mathematics Cr.Hrs. 3
(Formerly 136.831) Complex-variable methods, perturbation methods, variational methods, discontinuities. Prerequisites: partial differential equations, complex variables, and consent of instructor.

MATH 8410 Seminar in Applied and Computational Mathematics 1 Cr.Hrs. 3
(Formerly 136.841) Designed to accommodate special topics in applied or computational areas of mathematics not included in other course offerings. Students are advised to consult the department as to availability.

MATH 8420 Seminar in Applied and Computational
Mathematics 2 Cr.Hrs. 6
(Formerly 136.842) Designed to accommodate special topics in applied or computational areas of mathematics not included in other course offerings. Students are advised to consult the department as to availability.

MATH 8430 Seminar in Mathematics 1 Cr.Hrs. 3 (Formerly 136.843) Designed to accommodate special topics not included in topics courses. Prerequisite: approval of department.

MATH 8440 Seminar in Mathematics 2 Cr.Hrs. 6 (Formerly 136.844) Designed to accommodate special topics not included in topics courses. Prerequisite: approval of department.

MATH 8510 Topics in Algebra 1 Cr.Hrs. 3
(Formerly 136.844) Designed to accommodate special topics not included in topics courses. Prerequisite: approval of department.

MATH 8520 Topics in Algebra 2 Cr.Hrs. 6
(Formerly 136.852) Topics will be chosen from the areas of associative and non-associative algebras, Boolean algebra and lattice theory, category theory, group theory, ring theory and universal algebra. Prerequisite: approval of department.

MATH 8610 Topics in Analysis 1 Cr.Hrs. 3
(Formerly 136.861) Topics will be chosen from the areas of asymptotics, functional analysis, operator theory, real and complex variables, summability theory, topological vector spaces. Prerequisite: approval of department.

MATH 8620 Topics in Analysis 2 Cr.Hrs. 6
(Formerly 136.862) Topics will be chosen from the areas of asymptotics, functional analysis, operator theory, real and complex variables, summability theory, topological vector spaces. Prerequisite: approval of department.

MATH 8710 Topics in Foundations 1 Cr.Hrs. 3 (Formerly 136.871) Topics will be chosen from the areas of logic, model theory, recursive functions, set theory.
Prerequisite: approval by department.
MATH 8720 Topics in Foundations 2 Cr.Hrs. 6 (Formerly 136.872) Topics will be chosen from the areas of logic, model theory, recursive functions, set theory. Prerequisite: approval by department

MATH 8810 Topics in Geometry 1 Cr.Hrs. 3
(Formerly 136.881) Topics will be chosen from the areas of algebraic curves, combinatorial geometry, Euclidean geometry, fractal geometry, groups and geometrics, projective geometry. Prerequisite: approval of department.

MATH 8910 Topics in Topology 1 Cr.Hrs. 3
(Formerly 136.891) Topics will be chosen from the areas of compactifications and related extensions, covering properties, rings of continuous functions, set-theoretic topology, topological groups, unformities and related structures. Prerequisite: approval of department.

## Mechanical and Manufacturing

## ACADEMIC CALENDAR

## Engineering

Head: D. Kuhn
Campus Address/General Office: E2-327 Engineering Bldg
Telephone: (204) 4746540
Fax: (204) 2757507
Email Address: mepgs@umanitoba.ca
Website: http://umanitoba.ca/engineering/mech and ind
Academic Staff: Please refer to our website for academic staff
information:http://umanitoba.ca/engineering/mech and ind

The graduate program in the Department of Mechanical and Manufacturing Engineering at the University of Manitoba is well-recognized amongst Mechanical Engineering Departments across and outside Canada. We are proud to deliver a world-class graduate experience leading to degrees in Doctor of Philosophy (Ph.D.), Master of Science (M.Sc.) and Master of Engineering (M.Eng.). All programs are led by well-established professors and adjunct professors engaged with local industry or hospitals with interlocking specializations and the professors are actively engaged in fundamental and cutting edge research in various fields. Our graduate students have access to state of-the-art research facilities and we value the importance of challenging and relevant course work, effective supervision and high quality meaningful research.

## Field of Research

Fluid Mechanics: Active research in this area is performed in turbulence, computational fluid dynamics, multiphase flow with droplets and engineering calculations of fluid flow. Droplets vaporization and burning, premixed and nonpremixed swirling and non swirling turbulent flames, liquidfuel -jet break-up and atomization, turbulent measurement and modelling, underwater kinetic turbines.

Thermal Sciences: Concerned with the application of heat and work to engineering problems. Active research is performed in two phase flow, pool boiling simulation, enhanced heat transfer, solid-liquid phase change, entropy analysis/optimization, combined heat transfer and heat transfer in porous media, acoustic wave propagation and supercritical flow stability, ocean hydrothermal energy and minerals research, super-critical properties of ocean hydrothermal fluids, runout table cooling in the steel processing industries.

Material Science and Engineering: Concerned with the behaviour of engineering materials. Active research is focused on deformation studies, joining of aerospace materials, acoustic emission, solidification and diffusion in microgravity, phase transformation in solids, wear and wear protection, processing of polymer composites, durability and interfaces in polymer composites.

Applied Mechanics and Design: Concerned with the analysis and conception of machine and structural components. Active research is performed in biomechanics,
solid mechanics, fracture mechanics, fatigue analysis, experimental and finite element analysis of stresses, stress analysis, vibrations and acoustics, kinematics and dynamics of linkage and mechanisms and computer aided design.

Manufacturing and Production: Concerned with analysis, design and operation of automated and feedback control systems. Active research is conducted in robotics, sensor technology, system integration, automatic controls, information systems, human-machine control systems, fluid power systems, teleoperation, virtual design and manufacturing, web-based manufacturing systems. Planning, design and operation of production using queuing theory, networks, scheduling, facilities planning and inventory planning models are also other areas of research.

## Research Facilities

Typical research facilities are: Fully equipped facility for turbulence measurements; apparatus to study porosity and multiphase flow in porous media; laser-induced fluorescence capabilities; Unix workstations and several high resolution graphics terminals; apparatus for measurement of pressure drop and heat transfer; two-phase flow regimes during condensation and many more; computer controlled x-ray diffratometer, TEM, SEMs, optical image analyzer, mechanical testing systems, constant stress creep machines, Hopkinson bar high-strain rate deformation systems; corrosion testing and research facilities; photo stress plus system facilities related to processing and manufacture of polymeric composites; laser optics laboratory comprising a vibration-free optical bench; a 10 ton high frequency resonant fatigue machine; analog-digital facilities for the analysis of acoustic and vibration signals; advanced manufacturing cells under full control of personal computers; a rapid prototyping system with a SLA3500
Stereolithography machine; a teleoperated hydraulic MK-II Unimate manipulator; a hydraulic test station for force/motion control studies; a measurement system for human dynamics including a Qualysis motion measurement system with 4CCD infra red cameras and 3 Kistler Force Plates, in-house designed and built bipedal walking robots and Electromyography (EMG) systems; high speed computer workstations for computational simulations, water and spray/wind tunnels with Particle Image Velocimetry and flow visualization, pulsed and continuous wave laser systems, high-pressure combustion test facility, subsonic wind-tunnel facility, 2D laser Doppler velocimetery (LDV) system, highspeed imaging system.

## Mechanical and Manufacturing Engineering Degrees, M.Eng.

The M.Eng. program mainly provides working engineers and internationally trained engineers an opportunity to continue their studies and specialize in an area of interest. Applicants must have a minimum of B.Sc. degree in Engineering. In exceptional cases, based on the candidate's professional experience, this requirement may be waived by the department.

The minimum requirement for the award of the M.Eng. degree is 30 credit hours of coursework with at least nine

## ACADEMIC CALENDAR

credit hours at the 700/7000 level. Of the 30 credit hours, six credit hours will be assigned to an approved project and report (069.705 M.Eng. Project and Report). The maximum time allowed for completion of the degree requirements is six years.

## M.Sc.

Applicants are normally required to hold a Bachelor's degree in Mechanical Engineering or related field from a recognized university. Applicants with other engineering degrees or with honours degrees in related areas may also be accepted at the discretion of the department. In certain cases (e.g., nonengineering graduates), acceptance may be subject to satisfying certain requirements. Contact the department for more information.

A minimum of 18 credit hours of coursework will be required with at least nine credit hours at the 700/7000 level as approved by the student's advisor. The minimum time is one calendar year of full-time study and research and must be spent on campus. The maximum time limit is five years. All candidates for the M.Sc. degree are required to register in MECG 7890, M.Sc. Graduate Research Seminar. The M.Sc. degree will not be awarded without a passing grade in MECG 7890.

## Ph.D.

Admission to the Ph.D. program is normally from the Master's degree level. Master's students making exceptional progress while enrolled in their program may be transferred to the Ph.D. program upon the consent of the department head based on recommendations from the student's advisor and an appointed selection committee who investigate the student's qualifications and suitability for Ph.D. study.

Minimum Program requirements set by the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of the Calendar. All candidates of the Ph.D. are required to register in MECG 7900, Ph.D. Graduate Research Seminar. The Ph.D. will not be awarded without a passing grade in MECG 7900. In addition, the department has supplementary regulations and students should consult with the department regarding Supplementary Regulations.

## Application Deadlines

The Department of Mechanical and Manufacturing Engineering allows graduate students to begin their program in January, May, July or September of each year. Canadian and US students should send their applications with supporting documentation directly to the Faculty of Graduate Studies no less than three (3) months before the intended start date. International students should send their applications no later than seven months (7) before the intended start date.

## Mechanical and Manufacturing Engineering

MECG 7150 Conduction Heat Transfer Cr.Hrs. 3
(Formerly 025.715) Steady and unsteady state heat transfer by conduction, single and multidimensional systems.
Conduction with moving boundaries and computer uses of finite difference techniques.

MECG 7160 Convective Heat Transfer Cr.Hrs. 3 (Formerly 025.716) Conservation principles and flux laws. Differential and integral equations of the boundary layer. Momentum and heat transfer for laminar and turbulent flow inside tubes and over external surfaces.

MECG 7170 Radiation Cr.Hrs. 3
(Formerly 025.717) Thermal radiation properties, blackbody radiation, heat exchange by radiation among surfaces in the presence or absence of participating media. Theory and measurement techniques, network methods, solar energy utilization.

MECG 7190 Classical Fluid Mechanics 1 Cr.Hrs. 3 (Formerly 025.719) Bernoulli's equation, equations of motion, two-dimensional motion, streaming motions, aerofoils, sources and sinks, moving cylinders, theorem of Schwartz and Christoffel, jets and currents.

MECG 7200 Classical Fluid Mechanics 2 Cr.Hrs. 3 (Formerly 025.720) Helmholtz motions, right linear vortices, waves. stokes stream function, spheres and ellipsoids, solid moving through a fluid, vortex motion, viscosity.

MECG 7220 Boundary Layer Theory Cr.Hrs. 3 (Formerly 025.722) Basic concepts of boundary layer and separation. Navier-Stokes equations, exact solutions. Momentum and energy equations, approximate solutions; boundary layer control, and thermal boundary layers.

MECG 7240 Turbomachinery Cr.Hrs. 3
(Formerly 025.724 ) Generalized flow relations in rotating machinery, velocity triangles, limitation on work done per stage and Mach number effects, vortex flow, flow in cascades, blade temperatures and stresses, performance of turbomachines.

MECG 7260 Theory of Vibrations Cr.Hrs. 3
(Formerly 025.726) The formulation of vibration problems using variational principles; matrix formulation of the free and forced vibrations of discrete and continuous systems; the effect of damping; approximate methods for solving the equations of motion; numerical techniques.

MECG 7290 Diffusion in Solids Cr.Hrs. 3
(Formerly 025.729) Diffusion equations, atomic theory of diffusion, diffusion in dilute alloys, diffusion in a concentration gradient, diffusion in non-metals, high diffusivity paths, thermal diffusion, and electrolysis in solids.

MECG 7330 Phase Transformation in Solids Cr.Hrs. 3 (Formerly 025.733) Advanced treatment of phase transformations in solids such as precipitation, eutectoid decomposition, and martensitic reactions.

## ACADEMIC CALENDAR

MECG 7340 Corrosion and Oxidation of Metallic
Materials Cr.Hrs. 3
(Formerly 025.734) Topics include the electromechanical basis of corrosion, corrosion prevention by inhibitors, alloying and heat treatment passivity, stress corrosion crackling and fatigue, crack initiation and propagation, solid state chemistry including ionic and electronic conduction, and oxidation of metals and alloys.

MECG 7350 Research Topics in Physical Metallurgy and Metal Physics Cr.Hrs. 3
(Formerly 025.735) Topics selected from recent researches in physical metallurgy and metal physics.

MECG 7370 Modern Research Techniques Cr.Hrs. 3
(Formerly 025.737) Laboratory course designed to introduce the research student to a wide variety of equipment and techniques useful in metallurgical research, discussion, and laboratory.

MECG 7380 Electron Microscopy of Materials Cr.Hrs. 3 (Formerly 025.738) Theory and practice of electron microscopy, with emphasis on the application of transmission technique to materials research.

MECG 7390 Dislocation Theory Cr.Hrs. 3 (Formerly 025.739) Description of a dislocation; the stress field around a dislocation; forces on a dislocation; dislocation reactions in crystals, dislocation multiplication, pole mechanisms, twinning, stacking fault tetrahedron. Peierls force and related topics; image forces, interactions with point defects and other topics.

MECG 7400 Solidification of Metals and Alloys Cr.Hrs. 3 (Formerly 025.740) The theory of solidification with respect to microstructure and solute distribution. Practical applications such as casting semiconductors and zone refining.

MECG 7410 Theory of Turbulence Cr.Hrs. 3
(Formerly 025.741) Development and application of statistical theories to isotropic, nonisotropic, and homogeneous turbulent fluid motion.

MECG 7420 Selected Topics in Turbulence Cr.Hrs. 3 (Formerly 025.742) An extension of MECG 7410 (or 025.741 ) to investigate the specialized problems of turbulence such as space-time correlation functions and spectral transfer in constrained and unconstrained fluid flows.

MECG 7450 Biomechanics Cr.Hrs. 3 (Formerly 025.745) Topics in kinematics related to normal gait and prosthetic devices; properties of materials used for prostheses; arterial, bone, and composite materials, including design and manufacturing methods. Prerequisite: the former courses 025.213 or ECE 2090 (or 024.209) or consent of instructor.

MECG 7460 Topics in Heat Transfer 1 Cr. Hrs. 3 (Formerly 025.746) Selected topics in heat transfer based on MECG 7150 (025.715), MECG 7160 (025.716), and MECH 7170 (025.717). Topics will be chosen from the following: conduction with and without internal heat generation, combined mode heat transfer problems, boiling and condensation heat transfer, heat exchanger design, propulsion systems heat transfer problems, special problems
in forced, free and mixed convection, and two-phase flow.
MECG 7470 Topics in Heat Transfer 2 Cr.Hrs. 3
(Formerly 025.747) A continuation of certain topics of MECG 7460 (025.746) to include the most recent advances in these areas.

MECG 7500 Topics in Aerodynamics Cr.Hrs. 3 (Formerly 025.750) Topics in Aerodynamics.

MECG 7510 Industrial Engineering Systems Cr.Hrs. 3 (Formerly 025.751) Production engineering, equipment procurement decisions, plant layout and materials handling, optimization methods, models and simulation, control of engineering operations, data processing. Prerequisites: MECG 7520 (or 025.752) or 013.361.

MECG 7600 Selected Topics in Engineering
Design Cr.Hrs. 3
(Formerly 025.760) Lectures and seminars on selected advanced topics in the field of mechanical engineering design.

MECG 7610 Engineering Properties of Polymers Cr.Hrs. 3 (Formerly 025.761) A survey of the physics of crystalline and amorphous polymers, including molecular weight distribution measurements, physics of rubber elasticity, theories of the glass transition, crystallinity measurements, crystallization kinetics, mechanical properties of crystalline and amorphous polymers.

MECG 7620 Fracture of Materials and Structures Cr.Hrs. 3 (Formerly 025.762) Griffith criterion for crack propagation, stress intensity factors, plasticity effects, experimental methods for evaluation of criteria, J-integral, crack opening displacement. Microscopic aspects, dislocations at the crack tip, cleavage fracture, nil ductility temperature. Fatigue, creep, stress corrosion cracking.

MECG 7680 Advanced Operations Research Cr.Hrs. 3 (Formerly 025.768) Formulations and algorithms for the following problems, set partitioning, set covering, clustering, location, layout, order picking, vehicle routing, vehicle scheduling. Applications of these problems to planning of manufacturing systems, scheduling of production, systems, materials handling systems and planning for warehouse and storage systems. Prerequisite: MECH 4760 (or 025.476) or consent of instructor.

MECG 7690 Computer Integrated Manufacturing Cr.Hrs. 3 (Formerly 025.769) Basic concepts of microcomputer hardware and software with special emphasis on different manufacturing applications. These include data acquisition and analysis, machine monitoring and diagnostics, process control, robotics, machine tool control, automatic testing and quality control.

MECG 7740 Selected Topics in Robot Technology Cr.Hrs. 3 (Formerly 025.774) The role of digital computers and digital interface equipment in the control and operation of robots. Fundamentals of robot kinematics and coordinate systems. Various robotic sensing systems such as vision, tactile, proximity, ultrasonic. The selection of topics may change from time to time depending on student interest and advances in the field of robotic technology. Prerequisite: MECH 4840 (or 025.484) or consent of instructor.

## ACADEMIC CALENDAR

MECG 7760 Advanced Solid Mechanics Cr.Hrs. 3
(Formerly 025.776) Selected advanced topics in solid mechanics; e.g., relationship between solid physics and solid mechanics, mechanical properties for static, low- and highcycle fatigue, failure theories and mechanisms, theory of shell structures, numerical methods, applications.

MECG 7770 Computer-Aided Engineering Cr.Hrs. 3 (Formerly 025.777) Principles and mathematical formulation of computer-aided design, manufacturing and database management systems; related topics pertinent to computer integrated design and manufacturing systems.

## MECG 7780 Selected Topics in Engineering

Mechanics Cr.Hrs. 3
(Formerly 025.778) Lectures and seminars on selected advanced topics in engineering mechanics such as space dynamics, orbital mechanics and kineto-elastodynamics, current problems, implications in current research.

## MECG 7790 Transport Phenomena in Porous

 Media Cr.Hrs. 3(Formerly 025.779) Single and multiphase flow in porous media. Porosity, permeability, capillary pressure, relative permeability, electrical properties.

MECG 7800 Topics in Porous Media Cr.Hrs. 3 (Formerly 025.780) An extension of MECG 7790 (or 025.779 ) to allow investigation of special topics; e.g., computational methods, experimental techniques, mixed transport phenomena (diffusion/dispersion, conductive/convective heat transfer), advanced concepts, etc.

MECG 7810 Computational Thermofluids Cr.Hrs. 3 (Formerly 025.781) An introduction to the solution of thermofluids problems. Computational techniques (finite difference, finite element, boundary element). Modelling of turbulent flow. Spectral methods.

MECG 7830 Computational Mechanics Cr.Hrs. 3 (Formerly 025.783) Continuum Mechanics, Hyperelasticity, Theory of Plasticity, Finite element modelling of nonlinear problems and time-dependent material representation. Prerequisites: consent of instructor.

MECG 7840 Systems Modelling and Simulation Cr.Hrs. 3 (Formerly 025.784) Topics may include: Models and Model Building. Mathematical Models: analytical solutions, numerical solutions, steady-state solutions. Modeling techniques: state models, linear graphs, bond graphs, transfer functions, large-scale models, linear vs nonlinear models. Simulation of Systems (discrete/continuous) on digital computers; numerical operations and algorithms. Simulation Languages (discrete/continuous) applied to analysis and design of dynamic and control systems, or, services and manufacturing systems. Prerequisite: consent of instructor.

MECG 7850 Applied Finite Element Method Cr.Hrs. 3 (Formerly 025.785) Weighted Residuals, Boundary versus Finite Element Method, Conventional and Special elements, Equality and Inequality Constraints, Error Estimates, Selfadaptive Techniques and Mixed Formulations. Prerequisites: CIVL 4240 (or 023.424) or instructor approval.

MECG 7890 M.Sc. Graduate Research Seminar Cr.Hrs. 1 (Formerly 025.789) Seminar presentation and discussion of current research topics in mechanical, industrial and materials engineering research.

MECG 7900 Ph.D. Graduate Research Seminar Cr.Hrs. 1 (Formerly 025.790) Seminar presentation and discussion of current research topics in mechanical, industrial and materials engineering research.

MECG 7910 System Design for Robots and
Teleoperators Cr.Hrs. 3
(Formerly 025.791) Definitions and classification. Kinematics: transformations, forward and inverse kinematic solution methods, differential kinematic equations, motion trajectories. Dynamics: energy method vs. Newton-Euler formulation. Actuators; electric, hydraulics and pneumatics. Control: requirement and methods for control of robots and teleoperators. Prerequisites: MECH 3430 (or 025.343), MECH 3480 (or 025.348) or equivalent.

MECG 7920 Engineering Mechanics of Composite Materials Cr.Hrs. 3
(Formerly 025.792) Brief overview of composites; constituents; properties; processing and application; micromechanics of reinforcement; elastic behaviour of unidirectional lamina; strength of unidirectional lamina; elastic behaviour of multi-directional laminates; stress and failure analysis of multidirectional laminates; hygrothermal effects and durability; introduction to textile composites.

## MECG 7930 Advanced Non-Linear Systems

Analysis Cr.Hrs. 3
(Formerly 025.793) Topics may include (i) Modelling of Constrained Dynamic Systems, including derivation of dynamic equations for constrained systems using Lagrangian equations and/or Newton-Euler equations; (ii) Advanced Stability Theories, including construction of Lyapunov functions and Lyapunov's stability control; and (iii) Introduction to Analysis of Non-smooth Systems, including Filippov's solution analysis and extended Lyapunov's stability theory to non-smooth systems. Applications to computer modelling of bipedal locomotion, analysis of robotic contact tasks and stability analysis of power systems will be addressed.

MECG 7940 Experimental Methods in Fluid
Mechanics Cr.Hrs. 3
(Formerly 025.794) Topics will be chosen from: Review of fluid mechanics, combustion and turbulence theory; role of experiments; conventional measurement methods for temperature, pressure and velocity; laser-based techniques for local and global velocity measurements (Laser Doppler Anemometry (LDA), Phase-Doppler Anemometry (PDA), Particle Image Velocimetry (PIV)); other laser-based techniques for imaging and concentration measurements in reacting and non-reacting single and two-phase flows.

MECG 7950 Selected Topics for Productivity Improvement in Manufacturing Cr.Hrs. 3
(Formerly 025.795) Will address techniques that can assist North American manufacturing and improve productivity in the global market place in the 21st century. Topics include: productivity techniques, quality, cost, manufacturing control and other pertinent issues.

information:http://www.umanitoba.ca/faculties/medicine/units /medical microbiology/

The Department of Medical Microbiology offers programs of studies leading to the MSc and PhD degrees with research and academic experience suitable for a career in Basic Microbiology or Infectious Diseases.
The department has nationally recognized strengths in several areas, particularly epidemiology. It also enjoys extensive collaborative projects with both the University of Kenya in Nairobi, Kenya, and with the new federal laboratories for disease research. The Nairobi project uses epidemiologic, biologic, and molecular biologic studies to better understand sexually-transmitted diseases in the African population. Similar studies are being instituted in India. Numerous opportunities for collaborative work with members of other departments as well as with various affiliated research organizations (including the Clinical Microbiology Laboratories of the Health Sciences Centre, the Infectious Diseases programs of the Health Sciences Centre, the Cadham Provincial Laboratory, the federal laboratories, and St. Boniface Hospital) exist.

Recent graduates of the program have been highly successful in academia, industrial, medical, and veterinary careers.

## Fields of Research

Scientific interests of the Department are broad and research projects range from the basic understanding of gene regulation and molecular basis of cellular functions to the development of vaccines and diagnostics for human health and veterinary diseases. The Department has active research programs in cell and molecular biology, immunology, virology, bacterial genetics, microbial pathogenicity, Chlamydial biology, and clinical microbiology. Many research projects are oriented to human diseases and many are carried out in collaboration with physicians who have access to patients.

## Research Facilities

Medical Microbiology occupies the 5th Floor of the Basic Medical Sciences Building on the Bannatyne Campus of the university and includes modern research laboratories. Teaching and research are also conducted within the Clinical Microbiology Laboratories of the Health Sciences Centre and within the infectious diseases programs of the Health Sciences Centre, National Research Council, Cadham Provincial Laboratory, St. Boniface Hospital, and the Canadian Science Centre for Human and Animal Health. The department's equipment, much of which is shared, supports research ranging from molecular biology to clinical microbiology. It includes ample biohazard containment facilities, controlled environment equipment, ultracentrifugation, spectrophotometric, chromatographic and electrophoretic equipment, a transmission electron microscope, fluorescent microscopes, liquid scintillation counters, personal computers and computer terminals for direct access to the main frame computer. A library and a number of other ancillary facilities are available.

## M.Sc. in Medical Microbiology,

## Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, graduates in Medicine, Dentistry, Veterinary Medicine, or general Science may apply for entry into this graduate program. The department requires that an incoming student have a minimum Grade Point Average of 3.0 , or its equivalent, in the two years immediately preceding first registration. Students with a three-year B.Sc. degree must normally enrol in a pre-Master's course arranged in consultation with the Graduate Studies Committee and the head of the department.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies as follows:

| Session | Start Date | Canadian/US | International |
| :--- | :--- | :--- | :--- |
| Regular | (September) | June 1 | March 1 |
| Winter | (January) | October 1 | July 1 |
| Spring | (May) | February 1 | November 1 |
| Summer | (July) | April 1 | January 1 |

Please note that the department is NOT responsible for finding supervisors for potential students. Applicants should visit the department web page for the list of faculty members and contact those with research areas of interest regarding availability of student positions.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language reading requirement: none

Expected time to graduate: $2-3$ years

Ph.D. in Medical Microbiology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

As listed above in Master's Program section.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language requirement: none

Expected time to graduation: 5 to 6 years

## Medical Microbiology -MMIC 6000 Level <br> MMIC 6010 Biological Safety Cr.Hrs. 3

(Formerly 097.601) Critical Analysis of biological safety in the research, diagnostic and hospital environment; assessment of the underlying causes of laboratory acquired infections and the administrative, engineering and personal protective control measures available; analysis of current and new bio-containment technologies, risk assessment tools, the need for scientific based decision making and the public perception versus real risk.

## Medical Microbiology -MMIC 7000 Level MMIC 7010 Virology Cr.Hrs. 6

(Formerly 097.701) Fundamental properties of viruses of bacteria, animals and plants. Prerequisite: permission of instructor.

MMIC $\mathbf{7 0 4 0}$ Clinical Bacteriology Cr.Hrs. 6 (Formerly 097.704) Scientific basis of routine laboratory methods used in the diagnosis of bacterial infection: specimen handling techniques; laboratory organization.

MMIC 7050 Microbial Pathogenicity Cr.Hrs. 6 (Formerly 097.705) Comparative structure of virulent and avirulent bacteria, biochemical basis of virulence; host defenses.

MMIC 7140 Clinical Parasitology Cr.Hrs. 3 (Formerly 097.714) The course will consist of a series of lectures on the epidemiology, molecular pathogenesis, clinical features, diagnosis (clinical and laboratory), treatment and prevention of human disease; each class is followed by a laboratory period in which the student obtains some practical experience.

MMIC 7160 The Molecular Basis of Antibiotic
Action Cr.Hrs. 3
(Formerly 097.716) Historical development, mechanism of action, principles of antimicrobial susceptibility testing and molecular and genetic basis for antibiotic resistance transfer. Prerequisite courses include Microbial Physiology or Biochemistry and at least an introductory course in Genetics and the consent of instructor.

MMIC $\mathbf{7 1 7 0}$ Molecular Biology of Animal Viruses Cr.Hrs. 3 (Formerly 097.717) Lecture and conference course. Recent advances in molecular aspects of virus structure, replication, genetics, and spectrum of virus-host cell interaction. Prerequisites: MMIC 7010 (or 097.701), or consent of instructor.

MMIC 7200 Host Defence Responses Cr.Hrs. 3 (Formerly 097.720) Aspects of the cellular responses during inflammation and infection. Topics will include inflammatory cell function, mechanisms of cell accumulation and activation, roles of cytokines in these processes. Selected examples will be discussed in detail. The course will involve some student presentations.

MMIC 7210 Clinical Virology Cr.Hrs. 3
(Formerly 097.721) Overview of the association between viruses and human diseases; biology of host and virus interaction and role of immune system to control infection; understanding the role of laboratory services and patient management; create appreciation for role of molecularbased diagnostic methods in the detection of new human pathogens. Lecture/laboratory components.

MMIC 7220 The Ecology of Infectious Diseases Cr.Hrs. 6 (Formerly 097.722) Explores the study of infectious diseases in a global context from the perspective of biomedical, clinical, heath systems/services and social, cultural and environmental determinants of health and disease. The course features didactic, self-directed reading and interactive small group sessions.

## Medical Rehabilitation

Head: Brian MacNeil

The School of Medical Rehabilitation currently offers an M.Sc. (Rehabilitation) degree program. The purpose of this program is to conduct and promote basic and clinical research in the prevention and rehabilitation fields. The research conducted at the School of Medical Rehabilitation can be framed within the International Classification of Function. This framework emphasizes the interactions between body structures and functions, the ability to perform various activities, and participation in society.

## 

ACADEMIC CALENDAR
2012-2013 •

The diverse research programs and facilities of the School offer opportunities for graduate education in the areas of neuroscience, cardiorespiratory function, exercise physiology, musculoskeletal function, and human occupation. Through proximity to a range of clinical settings and strong collaborative links the program offers particular opportunities to engage in clinically relevant research. Graduates of this program have gone on to advanced clinical practice and administrative positions within the health care system. In addition, graduates have also pursued research careers through various doctoral programs including the PhD in Applied Health Sciences program.

## Fields of Research

The School has several diverse but complimentary programs of research in the areas listed above which are directed to: assessing outcomes of therapeutic interventions by single centre clinical trials; furthering understanding of the physiological basis of current rehabilitation clinical practice; developing new strategies to restore function or to substitute for functional losses, as well as to improve mobility and enhance physical adaptation to functional losses; developing new strategies to manage functional impairment; developing rehabilitation-related interventions to minimize secondary impairments and promote life long health; developing innovative rehabilitation interventions, including novel physical therapies and rehabilitation engineering products; and understanding the mechanisms of workplace injury, developing strategies to prevent injury and decrease morbidity consequent to work-related injury developing interventions for primary prevention of disease related to physical inactivity.

## Research Facilities

The School of Medical Rehabilitation is located at the Bannatyne Campus in downtown Winnipeg. This campus is adjacent to the Health Sciences Centre, a major teaching hospital complex, with rehabilitation-related facilities for pediatric, adult and geriatric patients including physiotherapy, occupational therapy, rehabilitation engineering, prosthetics and orthotics. The school has a number of world-class research laboratories conveniently located in the Rehabilitation Hospital of the Health Sciences Centre and the Bannatyne Campus of the University of Manitoba.
M.Sc. (Rehabilitation), Admission

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, admission requirements include a baccalaureate degree in Physical Therapy, or Occupational Therapy, or Respiratory Therapy, or a baccalaureate degree in an area related to rehabilitation, and an academic record which meets the entrance requirements of the Faculty of Graduate Studies.

## Application Deadlines

The School of Medical Rehabilitation allows students to begin their program on either September 1 or January 1. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three (3) months before the intended start date. Non-Canadian students should send their applications with complete supporting documentation to the Faculty of Graduate Studies to arrive no later than six months (6) before the intended start date.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language reading requirement: None

Expected time to graduate: Two years

## Ph.D. (Applied Health Sciences),

The School of Medical Rehabilitation, along with the Faculty of Physical Education and Recreation Studies, Faculty of Human Ecology, and Faculty of Nursing, offers a multifaculty Ph.D. in Applied Health Sciences. Information on this program may be found in another section of this calendar.

## Medical Rehabilitation

## REHB 7010 Neurosciences Cr.Hrs. 3

(Formerly 068.701) To provide the student with a comprehensive understanding of the neurophysiological basis of motor behaviour including: motor control mechanisms, pathophysiological correlates, and clinical manifestations of central nervous system lesions involving motorcentres.

REHB 7050 Ergonomics Cr.Hrs. 3
(Formerly 068.705) This course shall examine the basic tenet of ergonomics, "the modification of the environment to meet the needs of the individual," and contrasted to "the adaptation of the individual to meet the constraints of the environment."

REHB $\mathbf{7 0 6 0}$ Gerontology Cr.Hrs. 3
(Formerly 068.706) Designed to increase knowledge and understanding of geriatric/gerontology research related to the biological, physical, psychological and sociological health and function of older adults in society. A particular focus will be on social cognition and the role of perceived control in the rehabilitation of older adults.

REHB 7070 Exercise Rehabilitation for Persons with Disabilities Cr.Hrs. 3
(Formerly 068.707) The student shall acquire a better understanding and increased knowledge of: the application of endurance exercise testing and training principles with disabled individuals; and the practical application of these skills.

REHB 7130 Advanced Ergonomics Cr.Hrs. 3
(Formerly 068.713) This course is designed to enhance the

## 

## ACADEMIC CALENDAR <br> 2012-2013 •

student's understanding and application of ergonomic principles in the clinical setting. The student will choose from a selected list of current ergonomic topics and will research this topic under the guidance of the supervisor. The research will be formally presented at the end of the course.

REHB 7160 Rehabilitation Research Techniques Cr.Hrs. 3 (Formerly 068.716) Introduction to techniques used in rehabilitation research including bioelectrical signal recording such as electro-myography, strength assessment using isovelocity dynamometry, acquisition, processing and storage of experimental data.

REHB 7170 Topics in Rehabilitation Cr.Hrs. 3 (Formerly 068.717) A readings, tutorial and practical course designed to enhance the student's knowledge of basic science and clinical investigations and to provide experience in the logical development of approach to a problem.

REHB 7180 Readings in Rehabilitation Cr.Hrs. 3 (Formerly 068.718) Readings course covering recent advances in an area of rehabilitation related to a student's field of research.

REHB 7190 Structure and Function of the Musculoskeletal System Cr.Hrs. 3
(Formerly 068.719) Tutorial and laboratory course providing in-depth study of the structure and function of a specific musculoskeletal region pertinent to rehabilitation. Synthesis of subject material in anatomy, physiology, biomechanics, pathology and rehabilitation. Prerequisites: REHB 1450 (or 068.145), REHB 1460 (or 068.146), REHB 1530 (or 068.153) or REHB 2890 (or 068.289), and REHB 3470 (or 068.347) or equivalent courses.

REHB 7200 Dynamometry Cr.Hrs. 3
(Formerly 068.720) A comprehensive study of dynamometry and the use of dynamometers for the assessment of strength, endurance and passive properties of soft tissues.

REHB 7210 Dynamics I Cr.Hrs. 3
(Formerly 068.721) To understand the relationship between neuro-physiological and biomechanical factors in the production of functional multi-segmented motion in clinical motor disorders encountered in medical rehabilitation.

REHB 7220 Dynamics II Cr.Hrs. 3
(Formerly 068.722) This course is designed to enhance the student's understanding and application of biomechanical principles to the clinical setting. The student will choose from a selected list of current kinesiological topics and will research this topic under the guidance of the supervisor. The research will be formally presented at the end of the course. Prerequisite: REHB 7210 (or 068.721).

REHB 7230 Independent Study Cr.Hrs. 6
(Formerly 068.723) Students complete an in-depth study of evidence for practice in an area of interest. Students will work with an assigned faculty advisor to define and evaluate a particular area of interest in rehabilitation practice, particularly in occupational or physical therapy.

REHB 7240 Theoretical Foundations of Occupational Therapy Cr.Hrs. 3
(Formerly 068.724) An in-depth study of the theory base in Occupational Therapy. The focus of the course is models of occupation and their impact on occupational therapy
practice. Prerequisite: Previous degree in Occupational Therapy.

REHB 7250 Facilitating Client-Centred Processes Cr.Hrs. 3 (Formerly 068.725) Theory and practical course designed to develop an advanced understanding of the principles of client-centered practice. The course will focus on the development of the requisite knowledge, skills and attitudes to evaluate and implement client-Ocentered approaches and facilitate environments conducive to client-centered practice. Prerequisite: Consent of instructor

REHB 7260 Assistive Technology Cr.Hrs. 3 (Formerly 068.726) A theory and practice course designed to develop an advanced understanding of the application of technology for individuals with disabilities as a means to occupation. Particular emphasis will be on evaluating the impact and understanding the theory guiding the use of assistive technology, and developing an understanding of the contexts in which assistive technologies are used.

REHB 7270 Pain and Rehabilitation Cr.Hrs. 3
(Formerly 068.727) Designed to enhance the student's knowledge of basic science and clinical investigations related to pain, as well as the clinical relevance of pain transmission and modulation in rehabilitation. The course is delivered in small group tutorial format to facilitate student interaction and exchange of information.

## Microbiology

Head: P.C. Loewen
Campus Address/General Office: 418 Buller Building
Telephone: (204) 4749372
Fax: (204) 4747603
Email Address: sberg@ms.umanitoba.ca

## Website:

http://umanitoba.ca/faculties/science/departments/microbiolo gy/
Academic Staff: Please refer to our website for academic staff
information:http://umanitoba.ca/faculties/science/department s/microbiology/

Microbiological research is one of the most dynamic areas of scientific endeavour. Concern over the impact of society's activities on the environment is increasing and there is a strong need for research in environmental microbiology. Biotechnology, molecular genetics, and biochemistry show tremendous promise in many areas of medicine, agriculture, industry and basic microbiological research. Technological advances are continually expanding in these areas of research. They all depend heavily on basic research and a supply of highly trained individuals. Graduates from the microbiology department take up positions in industry, universities, and the public sector. The demand for these graduates continues to be high.

Fields of Research

## 

ACADEMIC CALENDAR 2012-2013 •

The department offers M.Sc. and Ph.D. programs of study. The research interests of the faculty and students are concentrated in several main areas: microbial ecology and geochemistry; molecular biology/genetics; metabolism of autotrophic bacteria; microbial biotechnology and biochemistry; microbial pathogenicity.

## Research Facilities

Microbiology program faculty members are engaged in active research projects. The department has all the facilities needed to conduct research in areas of specialization and the inventory of modern equipment is one that would be expected in any active research unit. In addition, close ties with other departments allow for the use of their facilities.

## M.Sc. in Microbiology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

Application and supporting documentation are submitted to the Faculty of Graduate Studies. International students must submit this material at least 5 months before their intended starting date, i.e. April $1^{\text {st }}$ for September start, August 1 for January start; December 1 for May start and February 1 for July start. Canadian and U.S. students should submit two months in advance.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar and the departmental supplementary regulations.

Second language reading requirement: none

Expected time to graduate: 2-3 years

Ph.D. in Microbiology,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

Application and supporting documentation are submitted to the Faculty of Graduate Studies. International students must submit this material at least 5 months before their intended starting date, i.e. April ${ }^{\text {st }}$ for September start, August 1 for January start; December 1 for May start and February 1 for

July start. Canadian and U.S. students should submit two months in advance.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar and the departmental supplementary regulations.

Second language requirement: none
Expected time to graduation: 4-6 years

## Microbiology

MBIO 7010 Graduate Seminar in Microbiology 1 Cr. Hrs. 3 (Formerly 060.701) Seminars covering areas of interest to the faculty and students in the graduate Microbiology programme, and current developments in the broad field of microbiology (including microbial physiology, environmental microbiology, virology, pathogenicity, genetics, molecular biology, biochemistry, biotechnology, and cell culture). Open to all qualified students by permission of the Microbiology department head.

MBIO 7020 Graduate Seminar in Microbiology 2 Cr.Hrs. 3 (Formerly 060.702) Seminars covering areas of interest to the faculty and students in the graduate Microbiology program, and current developments in the broad field of microbiology (including microbial physiology, environmental microbiology, virology, pathogenicity, genetics, molecular biology, biochemistry, biotechnology, and cell culture). Open to all qualified students by permission of the Microbiology department head.

MBIO 7030 Graduate Seminar in Microbiology 3 Cr.Hrs. 3 (Formerly 060.703) Seminars covering areas of interest to the faculty and students in the graduate Microbiology programme, and current developments in the broad field of microbiology (including microbial physiology, environmental microbiology, virology, pathogenicity, genetics, molecular biology, biochemistry, biotechnology, and cell culture). Open to all qualified students by permission of the Microbiology department head.

MBIO 7040 Graduate Microbiology Cr.Hrs. 3
Topics and current developments in the field of microbiology will be covered. A combined discussion, seminar and written exam format may be used. Inquire at the department for availability.

MBIO 7050 Environmental Microbiology Cr.Hrs. 3 Topics and current developments in the field of environmental microbiology will be covered. A combined lecture, discussion, assignment and seminar format may be used. Inquire at the department for availability.

MBIO $\mathbf{7 0 6 0}$ Microbial Interactions Cr.Hrs. 3
Topics and current developments in the field of microbial interactions will be covered. A combined discussion, seminar

## 

ACADEMIC CALENDAR
and written exam format may be used. Inquire at the department for availability.

MBIO 7070 Bioprocessing Cr.Hrs. 3
This course allows students with a background in either biological sciences or engineering to gain an understanding of biochemical engineering processes used to enable important chemical conversions by biological systems. Topics include bioprocessing for production of biofuels, bioplastics, and biopharmaceuticals, upstream processing technologies, fermentation and bioreactor systems, and downstream processing for product recovery. These will be related to present or potential industrial applications. This course is also offered in the Department of Biosystems Engineering as BIOE 7180. MBIO 7070 cannot be held with BIOE 7180.

MBIO 7080 Biochemical Mechanisms Cr.Hrs. 3 (Formerly 060.708) A treatment of current concepts of biochemical mechanisms in selected areas of investigation, including multifunctional enzyme complexes and membraneassociated systems. Prerequisite: consent of instructor. Inquire at the department for availability.

MBIO 7090 Biological Oxidations and
Bioenergetics Cr.Hrs. 3
(Formerly 060.709) A treatment of current concepts of biological oxidations, and bioenergetics in microorganisms including autotrophic bacteria. Inquire at the department for availability.

MBIO 7100 Advanced Concepts in Molecular Biology Cr.Hrs. 3
(Formerly 060.710) Recent advances in the molecular basis and control of gene activity; information transfer and molecular evolution. Inquire at the department for availability

MBIO 7110 Advances in Microbial Genetics Cr.Hrs. 3 (Formerly 060.711) Developmental genetics; recombination; bacteriophages; fine structure analysis; biochemical genetics and specialized genetic systems. Inquire at the department for availability

MBIO 7130 Advanced Physiology of Bacteria Cr.Hrs. 3 (Formerly 060.713) An assignment and conference course. Selected topics covering recent advances in the energy relationships of bacteria and the growth and death of bacteria. Inquire at the department for availability.

MBIO 7160 Special Problems in Microbiology Cr.Hrs. 3 (Formerly 060.716) An assignment and conference course to be taken only through consultation with the head of the department. The topics will vary, depending upon student needs and interests, and will include specialized topics not available in regular course offerings.

## MBIO 7170 Current Topics in Mammalian Cell

## Culture Cr.Hrs. 3

(Formerly 060.717) A lecture and discussion course based on current research problems involving mammalian cells in culture. Prerequisite: consent of instructor. Inquire at the department for availability.

MBIO 7190 Microbial Ecology Cr.Hrs. 3
(Formerly 060.719) Topics and current developments in the field of microbial ecology will be covered with emphasis on aquatic ecosystems. A combined lecture, discussion, and
seminar format will be used. Inquire at the department for availability.

MBIO $\mathbf{7 2 0 0}$ Macromolecular Structure Analysis Cr.Hrs. 3
This course introduces the principles of X-ray chrystallography as applied to the study of protein and nucleic acid structure. Protein crystallization and practical aspects of X-ray diffraction, structure determination and analysis are covered. This course is suitable for students with a background in microbiology, biochemistry or chemistry. Inquire at the department for availability.

## Music

Marcel A. Desautels Faculty of Music
Dean: Edmund Dawe
Associate Dean(s): Joan E. Linklater
Campus Address/General Office: Room 206 Music Building
Telephone: (204) 474-9310
Fax: (204) 474-7546
Email Address: music@umanitoba.ca
Website: http://umanitoba.ca/music
Academic Staff: Please refer to our website for academic staff information:http://umanitoba.ca/music/staff/

The Marcel A. Desautels Faculty of Music offers a Master of Music (M.Mus.) in three major areas: performance, composition and conducting. The emphasis is upon full professional preparation in a strong academic context. Students in the string component of the program are eligible for adjunct training by a special agreement with the Winnipeg Symphony Orchestra. Students in the voice component are eligible to be considered for training and solo professional activities with Winnipeg operatic companies, choral organizations and chamber groups. Students in the collaborative piano component are eligible to be considered for training with Winnipeg operatic companies and choral organizations or with professional chamber ensembles.

## Fields of Creative Work and Research

The Faculty fosters an active, integrated performance environment which provides the broadest possible professional training. This is complemented by a program of research in musicology, ethnomusicology, jazz, music theory and related fields. Students with interests outside of the M.Mus. have the option of pursuing advanced studies in music via the Individual Interdisciplinary Program (IIP) of the Faculty of Graduate Studies.

## Research Facilities

Of particular interest to students in the M.Mus. (composition) is our Electroacoustic Music Studio. Our library resources support a wide variety of performance studies in various historical eras.

## 

## ACADEMIC CALENDAR

## Master of Music <br> Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Persons who have completed (1) a four-year undergraduate degree program in music with a minimum 3.0 GPA in the last two full years or (2) a conservatory diploma which is offered in residence, may apply for admission to the M.Mus. program.

## Application Deadlines

All applications should be sent to the Faculty of Graduate Studies on or before December 10th to begin study in September, or June 15th for a January start date.

Application procedures vary, according to the area of desired study: please see our website for detailed information

## http://umanitoba.ca/music under "Prospective Students".

- Performance applicants will perform an audition and will submit a curriculum vitae which includes details of performance experience and repertoire. Except in special circumstances, the audition will be in person, at the Marcel A. Desautels Faculty of Music. String players wishing to apply for the Winnipeg Symphony Orchestra partnership will be required to perform a separate audition according to the standard procedures of the W.S.O.
- Composition applicants will present a portfolio of works and will submit a curriculum vitae detailing experience in both the areas of composition and in the field, in general. Instrumental submissions should include both scores and recordings.
- Conducting applicants will present a current curriculum vitae, a preliminary DVD, a list of repertoire they have conducted and an analysis of a specified piece of music.

## Diagnostics

Students admitted to the Master of Music program at the University of Manitoba are expected to possess a certain breadth and depth of knowledge of music theory. To help ensure this, all incoming graduate students will be given diagnostic examinations to evaluate their knowledge of the theoretical aspects of tonal and post-tonal music. These diagnostic examinations will normally be given during the week preceding the first week of classes in the Fall. The material on these examinations will correspond to that studied in our undergraduate courses in music theory. Details of suitable review materials will be mailed to all incoming graduate students, and are also available on our website or by request from the music office.

Incoming graduate students who do not achieve satisfactory results on any portion of these tests may be required to do remedial work as a co-requisite or pre-requisite to their graduate program; such work, in the form of course or other requirements, will not count for credit toward the Master of

Music degree. Since remedial coursework may be specified as a pre-requisite to a required graduate course, incoming graduate students will not be permitted to register for courses in the Faculty of Music until these diagnostics exams have been taken.

## Program Requirements

The Faculty offers three program areas leading to the M.Mus. As part of each program, all M.Mus. students are required to take: MUSC 7000, MUSC 7050, MUSC 7110, MUSC 7180, MUSC 7400, MUSC 7410 and complete program requirements for areas of study, as follows:

## Second Language Reading Requirement:

Reading knowledge of one language other than English is required. The language required will normally be French, German or Italian. Other languages will be accepted if more appropriate to the student's program. The specific requirement will be determined in consultation with the student's committee. This requirement may be met through one of the following:

- Evidence of the completion of an undergraduate language course at the 1000 level or above in the five years preceding acceptance into the program.
- The translation, using a dictionary, of a passage in the major area of study.
- Completion of a course at the 0900 or higher level after registration in the Masters Degree program.
- Determination by the student's committee that the requirement has been met through previous education and/or experience.
M.Mus. in Performance,

Electives: 6 credit hours
(String students participating in the Winnipeg Symphony Orchestra will take one Topics in Music course (3CH) in Orchestral Performance.)

Total: 24 credit hours

The Performance thesis/practicum requires either: (a) one recital, normally consisting of solo repertoire, accompanied by a paper which provides historical or analytical program annotation; or (b) two recitals, one of which is solo repertoire and the other of which may include solo and ensemble repertoire. No paper is required under option (b).

A proposal for this project will be developed by the student in consultation with the Major Practical Study instructor and must be approved by the student's committee. The committee will consider the stylistic and technical appropriateness of the program in its adjudication.
M. Mus. in Conducting,

Electives: 6 credit hours

Total: 24 credit hours

The Conducting thesis/practicum requires a significant repertoire of performance which is chosen, rehearsed, scheduled and conducted by the student. The performance of this body of work will be accompanied by historical or analytical program annotation.

A proposal for this project will be developed by the student in consultation with the conducting instructor and must be approved by the student's committee. The committee will consider the stylistic and technical appropriateness of the repertoire in its adjudication.

Expected Time to Graduate: Two years.
M. Mus. in Composition,

Electives: 3 credit hours

Total: 24 credit hours

The Composition thesis/practicum requires the production of a substantial body of work accompanied by a significant analytical paper which explains the structure of the piece(s) and the compositional processes. Normally, a performance of the piece(s) is required.

A proposal for this project will be developed by the student in consultation with the composition instructor and must be approved by the student's committee. The committee will consider the extent of the performance forces, the proposed length and the technical requirements of the body of work in adjudicating appropriateness.

Ph.D. in Music,
The Faculty of Music does not offer a Ph.D. Program at this time.

## Music

MUSC 7000 Music History Seminar Cr.Hrs. 3 (Formerly 033.700) The study of the nature of past and current concepts and practices in the discipline of music history

MUSC 7050 Bibliography and Research Methods Cr.Hrs. 3 (Formerly 033.705) The techniques of bibliography and research methods in music are studied through research projects in selected areas relevant to each student's major field of study. Skill is developed in the use of primary and secondary sources, expository writing and documentation

MUSC 7060 Advanced Diction 1 Cr.Hrs. 1
(Formerly 033.706) Advanced training in rules of pronunciation, language use and translations skills in Italian and German. Lab Required.

MUSC 7070 Advanced Diction 2 Cr.Hrs. 1
(Formerly 033.707) Advanced training in rules of pronunciation, language use and translations skills in French and English. Lab Required.

MUSC 7110 Music Theory Seminar Cr.Hrs. 3
(Formerly 033.711) A comprehensive survey of 20th century analytical methodologies of tonal and post-tonal music.

MUSC 7180 Ensemble Cr.Hrs. 3
(Formerly 033.718) Studio instruction and monitored preprofessional training activities in chamber music leading to the presentation of ensemble performance.

MUSC 7380 Piano Repertoire Seminar Cr.Hrs. 2 (Formerly 033.738) Advanced study of the repertoire for solo piano up to the early 20th century.

## MUSC 7390 Piano Chamber Music Literature

Seminar Cr.Hrs. 2
(Formerly 033.739) Advanced survey of piano chamber music.

MUSC 7400 Major Practical Study 1 Cr.Hrs. 3 (Formerly 033.740) Private studio instruction and monitored pre-professional training activities in one of the following: composition, conducting, or any one of the standard instruments or voice.

MUSC 7410 Major Practical Study 2 Cr.Hrs. 3 (Formerly 033.741) A continuation of Major Practical Study 1.

MUSC 7490 Advanced Piano Pedagogy Cr.Hrs. 2
(Formerly 033.749) Consideration of advanced approaches to the teaching of styles and techniques through an examination of piano repertoire.

MUSC 7520 Coaching Skills Cr.Hrs. 2
(Formerly 033.752) Advanced training in philosophies and techniques of vocal coaching including both song and operatic repertoire.

MUSC 7530 Operatic Piano Cr.Hrs. 2
(Formerly 033.753) Development of skills required of an operatic pianist, including standard Arias, operatic scores, working with conductors and developing orchestral sound. May include participation in community opera events (by audition only).

MUSC 7600 Advanced Orchestration Cr.Hrs. 3 (Formerly 033.760) Advanced practical work in orchestration for various-sized large ensembles up to and including full orchestra. Detailed study of selected scores and work on individual orchestration projects.

MUSC 7630 20th to 21st Century Piano Repertoire Cr.Hrs. 2 (Formerly 033.763) Advanced study of piano repertoire since 1900.

MUSC 7810 Electroacoustic Music Cr.Hrs. 3
(Formerly 033.781) A study of the techniques of electroacoustic music.

MUSC 7860 Topics in Music Cr.Hrs. 3
(Formerly 033.786 ) Course orientation will vary according to the needs and interests of students. A specific topic will be
chosen for each offering of the course.

## Native Studies

Head: Renate Eigenbrod
Campus Address/General Office: 204 Isbister Bldg
Telephone: (204) 4749899
Fax: (204) 4747657
Email Address: native studies@umanitoba.ca
Website: http://umanitoba.ca/native studies
Academic Staff: Please refer to our website for academic staff information:http://umanitoba.ca/native studies

The graduate program in Native Studies offers students the opportunity to complete the advanced study (M.A.) of issues relating to Aboriginal peoples in a manner that reflects their commitment to the Aboriginal community and sensitivity to Aboriginal perspectives. The core nature of the Master's of Arts in the Native Studies program at the University of Manitoba is based on a notion of the inherent interdisciplinary nature of the field of Native Studies. This program is rooted in a unique position between Aboriginal and Western worldviews; it fosters a broad understanding of Aboriginal issues in the university community and beyond.
The graduate program in Native Studies is committed to the principles of academic excellence, inclusivity, creativity, and leadership in the field of Native Studies.

A high degree of interaction occurs between faculty members and graduate students because of the small size of the program. While in the program, graduate students have opportunities such as: presenting their research at conferences; publishing in refereed journals; celebrating Aboriginal scholarship; and competing for awards, bursaries, scholarships and fellowships. Graduates from this program work at a wide range of jobs in private industry, government agencies, Aboriginal organizations, education, health, environment, management, and other related fields.

## Fields of Research

Areas of expertise in Native Studies at the University of Manitoba which are readily available to graduate students include: Indigenous literatures, urban issues, women's issues, culture (history, material culture, contemporary issues), self-government and land claims, economic development (including sustainable formal and informal economies), the environment, Métis studies, Inuit studies, Aboriginal identity, resource management, wildlife management, political science, law, education, Aboriginal wisdom and Aboriginal ways of knowing, traditional ecological knowledge, critical theory, colonization, ethics, and other related fields.

## Research Facilities

Students access research facilities including: Churchill Northern Studies Centre, Hudson's Bay Company Archives, St. Boniface Métis Museum collection, Museum of Man and

Nature collection, and facilities in First Nations, Inuit, and Métis communities.

## Master's of Arts in Native Studies, Admission

For students to be admitted directly into the Master's program, they are required to have the equivalent of an advanced/honours degree with a major in Native studies. Students with majors in other fields may apply if they have 30 credit hours in courses relating to
Indigenous/Aboriginal/Native studies. Students who do not meet this equivalency will be required to take additional courses to meet the requirement for 30 credit hours of Native Studies courses.

## Application Deadlines

The department accepts applications for the Winter (January) and Regular (September) Terms only. The deadlines for submission of an application and supporting documentation to the Faculty of Graduate Studies are as follows:

Winter (January)
Regular (September)

## Program Requirements

The program requirements include twelve credit hours of required and six credit hours of additional course work at the 4000 level or above for a total of 18 credit hours. A thesis is also required. Students should consult the Supplementary Regulations, available through the Native Studies Graduate Office, for more details regarding requirements.

Twelve credit hours must include NATV 7230 Methodology and Research Issues in Native Studies; NATV 7240 Issues in Colonization; NATV 7250 Culture: Theory and Praxis; and NATV 7280 Native Studies Colloquia (3 terms). NATV 7220 Selected Topics in Native Studies may be taken more than once.

Second Language Reading Requirement: none
Expected Time to Graduate: two years

## Ph.D. in Native Studies,

Students in the field of Native Studies prepare individual interdisciplinary program proposals and may apply for admission into the Individual Interdisciplinary PhD programs. It is anticipated that the Native Studies Department will have received approval for its own Ph.D. program shortly.

Second Language Requiremant: 6 credit hours P/F in any Indeginous language

Expected Time to Graduate:

## Native Studies

NATV 7220 Selected Topics in Native Studies Cr.Hrs. 3 (Formerly 032.722) A critical examination of issues in selected areas of Native Studies designed to meet the special needs of graduate students interested in exploring interdisciplinary perspectives in Native Studies. Prerequisite: consent of instructor. As the course content will vary from year to year, students may take this course more than once for credit.

NATV 7230 Methodology and Research Issues in Native Studies Cr.Hrs. 3
(Formerly 032.723) A review of research methods, such as oral histories, and research issues, such as ethics and intellectual property rights, within the context of Native Studies. Prerequisite: consent of instructor.

NATV 7240 Issues in Colonization Cr.Hrs. 3 (Formerly 032.724) An examination of the factors influencing colonization, assimilation and indigenization. Explores the colonization and decolonization processes, theories of colonization and ways of promoting indigenization without assimilation.

NATV 7250 Culture: Theory and Praxis Cr.Hrs. 3 A study of selected material in Métis, Aboriginal, or Inuit studies, designed to meet the special needs of graduate students interested in exploring interdisciplinary perspectives in Native Studies. Prerequisite: consent of instructor.

NATV 7280 Native Studies Colloquia Cr.Hrs. 1 (Formerly 032.728) Theoretical, methodological, ethical and contextual issues in Native Studies are explored from the perspectives of formally and informally trained experts using a colloquia format. Students are required to attend regularly. This course is taken more than once to fulfil program requirements. Time slots to be determined the first week of September (Pass/Fail). As the course content will vary from year to year, students may take this course more than once for credit.

NATV 7290 Seminar in Aboriginal Economy Cr.Hrs. 3
This seminar deals with a variety of specific topics in Aboriginal Economy. As the course content will vary from year to year, students may take this course more than once for credit.

NATV 7310 Critical Theory and Native Studies Cr.Hrs. 3 This course will assess the relevance of the concepts produced by recent social theory to the situation of Aboriginal peoples and the contribution made by "fourth world" contexts to social theory. Marxism, feminism, poststructuralism, post-colonial theory, and cultural theory will be among the perspectives examined.

NATV 7320 Trauma Theory in Indigenous Writing in Canada and Australia Cr.Hrs. 3
This course will compare selected texts by Indigenous authors from Canada and Australia as trauma literature. The respective texts will be analyzed with the help of trauma theories as developed in relation to the Holocaust.
Prerequisite: written consent of instructor.

# Natural Resources Management 

Natural Resources Institute
Program Director: Dr. Michael Campbell
Campus Address/General Office: 303 Sinnott Building
Telephone: (204) 474-8373
Fax: (204) 261-0038
Email Address: nriinfo@umanitoba.ca
Website: http://umanitoba.ca/institutes/natural resources
Academic Staff: Please refer to our website for academic staff
information:http://umanitoba.ca/institutes/natural resources

The Natural Resources Institute (NRI) is one of the pioneering academic units in Canada active in natural resources and environmental management research and teaching. As such, it has contributed to the training of over 800 academics, professionals, administrators, and practitioners who are now active in the natural resources and environment fields in Manitoba and throughout the world, in both the public and private sectors.

The institute's academic activities are interdisciplinary and are focused upon local and global problem solving linked to the strength and expertise of faculty members and the interests of students. Full-time faculty work closely with an outstanding cadre of adjunct professors from other university disciplines, from the universities of Brandon and Winnipeg, from several government departments (such as the Canadian Department of Fisheries and Oceans and the Manitoba Department of Conservation), as well as from nongovernmental agencies and the private sector.

Natural resources and environmental policy and decisionmaking provide the context for most academic activities. NRI is noted for the identification of novel approaches to establish the necessary linkages between the environment, economy, and the social well being of people. Thus, the institute uses a three-dimensional approach to natural resources and environmental policy and decision-making as it continues to search for innovative solutions that will be good for the environment as well as for poverty alleviation.

This holistic interdisciplinary approach is pursued in teaching, research and outreach. The institute's strength and expertise cut across a number of resource fields; human dimensions of natural resources management; natural resources policy; institutions, decision-making processes; water resource management; environmental governance; environmental hazards and risk assessment; climate change impact and adaptation; community based resource management; traditional ecological knowledge; habitat, wildlife, and ecological management and multi-stakeholder processes/public involvement; and conservation of biodiversity.

Institute faculty and students continue to make contributions to resources management locally, nationally and internationally. Locally: City of Winnipeg waste management; province of Manitoba water strategic plan; province of

## 

ACADEMIC CALENDAR
2012-2013 •

Manitoba sustainable development (SD) initiatives; wildlife habitat with Ducks Unlimited and Delta Waterfowl. Nationally: First Canadian national hazards research assessment; coastal zone management work, monitoring of project impacts; review of Canadian Environmental Assessment Act (CEAA). International: impacts of urban development in high mountains in northern India; comanagement of resources in Costa Rica, Bangladesh, Turkey, Stewardship initiatives in the EU, in particular, in Germany;building environmental governance capacity in Bangladesh; international disaster prevention and mitigation; sustainable floodplain management in Bangladesh and Canada. The institute is the focal point at the University of Manitoba for interdisciplinary education, research, and outreach in resources and environmental issues. In the latter context the institute sees itself as having a major responsibility to the University of Manitoba, the City of Winnipeg and to the Province of Manitoba in the solution of problems involving natural resources and the environment. Institute staff takes their obligation to assist in the solution of global problems just as seriously.

The master's program in natural resources management combines a broad commitment to sustainability with development of well-focused, practical expertise in natural resources management. The program recognizes that pursuit of sustainability requires attention to ecological, economic, and social issues at all levels -from the local to the global. But it also expects that most gains are made through specific practical management application. Therefore, the program is designed around two main elements: an interdisciplinary examination of sustainability concerns and defined management project examinations undertaken in this broader context.

The doctoral program is aimed at developing independent researchers in the areas of natural resources and the environment. Students enter the program from a variety of academic backgrounds and disciplines.

## Fields of Research

NRI's graduate programs are interdisciplinary, responding to the need to educate professionals in integrative thinking and problem solving. The programs cut across conventional disciplinary lines to emphasize linkages between social and natural systems, environmental policy and decision-making. The research is focused on integrating the environment with the economy and the well being of people. Research areas include resource and environmental sustainability; environmental governance; environmental hazards and risk assessment; water resource management; climate change impact and adaptation; community-based resource management; wildlife habitat and landscape ecology; northern resources and development, ecosystem management, conservation of biodiversity, and multistakeholder planning and decision-making.

## Research Facilities

Facilities on site include a fully equipped computer laboratory with appropriate software. Many of the NRI's interdisciplinary research projects are carried out jointly with a variety of agencies in various locations. Recent projects
include those with Manitoba Conservation, Manitoba Hydro, Manitoba Model Forest, the City of Winnipeg, Fisheries and Oceans Canada-Central and Arctic Region, Parks Canada, Ducks Unlimited, and the International Institute for Sustainable Development. A significant number of NRI projects are carried out cooperatively with First Nations and many are completed overseas with a variety of international agencies. For those research projects requiring physical facilities, students and faculty have access to the Delta Marsh Field Station, the Fort Whyte Centre and the Experimental Lakes Area of Fisheries and Oceans Canada.

## Master of Natural Resources Management , Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

| Session | Start Date | Canadian/U.S. International |  |
| :--- | :--- | :--- | :--- |
| Regular | (September) | June 1 | February 1 |
| Winter | (January) | October 1 | July 1 |
| Summer | (May) | February 1 | November1 |
| Program Requirements |  |  |  |

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students in the Master's program follow an individual study plan that includes 12 credit-hours of required courses, a minimum of 15 credit-hours of elective courses and a Master's thesis.

The central academic agenda of the required set of courses includes: Assessment of the theoretical foundations and practical applications of progress toward sustainable management of natural resources; understanding of ecosystems as self-organizing and responding systems; examination of conventional and alternative social arrangements, including institutions and tools of governance, as a means of improving human well-being and environmental responsibility; and exposure to theories of resource and environmental management processes and tools.

Second language reading requirement: none

Expected time to graduate: two years

## Ph.D. in Natural Resources and Environmental

 Management,This program provides studies in the environment and natural resources through a holistic and interdisciplinary approach. Students' programs and research will prepare them to pursue independent research aimed at solving the complex issues facing the world environment learning about varied approaches and using a variety of tool and methods.

## ACADEMIC CALENDAR

A hallmark of the program is the collaboration with other University of Manitoba academic units and other Manitoba universities through an extensive cadre of adjunct professors and cross-appointments. This cadre is further strengthened by the appointment of adjunct professors from a variety of agencies external to the University of Manitoba, including the Freshwater Institute, the International Institute for Sustainable Development, Delta Waterfowl, and Ducks Unlimited, to name a few.

## Admission

Admission to the program is as in the Faculty of Graduate Studies Regulations Section of this Calendar. An applicant should have a high academic standing in previous university work, a Master's degree in a related discipline, as determined by the NRI Selection Committee, and an area of research interest that may be supported by an NRI faculty member. Students must be accepted by an advisor prior to submitting an application to enter the program. A 3.5 GPA (or equivalent) in their most recent 60 credit hours of course work and evidence of scholarly ability are required.

Application Deadlines:

| Session | Start Date | Canadian/U.S. | International |
| :--- | :--- | :--- | :--- |
| Regular | (September) | June 1 | February 1 |
| Winter | (January) | October 1 | July 1 |
| Summer | (May) | February 1 | November1 |
| Program Requirements |  |  |  |

All Ph.D. students will be required to complete a minimum of 12 and a maximum of 21 credit hours of course work at the 700/7000-level or above, beyond the Master's degree (or its equivalent). A minimum of 6 credit hours of courses must be completed within the Natural Resources Institute and must include NRI 7310 Ph.D. Thesis Research Seminar (3).

Individual programs of study will vary from student to student depending on each student's research interest and the recommendations of each student's advisor and Ph.D. advisory committee. Students will be encouraged to use the pool of Natural Resources Institute required and elective courses as well as appropriate graduate courses available outside of the Natural Resources Institute in order to select the best set of courses to complement their programs.

Student academic progress will be reported annually to the Faculty of Graduate Studies. A minimum Grade Point Average of 3.0 , with no grade below $\mathrm{C}_{+}$, must be maintained in order to continue in the program.

Second language reading requirement: required only in special circumstances determined at the time of admission.

Expected time to graduate: three years

## Natural Resources Management <br> NRI 7070 Readings in Natural Resources Management 1 Cr.Hrs. 3

Student planned research in an area of interest. Course
syllabus designed by student and approved by NRI faculty. Additional information on the program may be found on the NRI website:
www.umanitoba.ca/institutes/natural_resources/
NRI 7080 Readings in Natural Resources Management 2 Cr.Hrs. 3
Student planned research in an area of interest. Course syllabus designed by student and approved by NRI faculty. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7110 Field Seminar Cr.Hrs. 3
Exploration of selected issues in resource and environmental studies in field settings, arranged for groups of students. This course is subject to a field trip fee. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7120 Mineral Resources Management and Policy Cr.Hrs. 3
This course provides an interface between managers and mineral resources, focusing on a selection of practical topics related to minerals and mining. Role of mining activities in the development process; global, national, and provincial distribution of resources; policy issues relating to environmental, economic, and political consequences of non-renewable resource exploitation. Additional information on the program may be found on the NRI website: www.umanitoba.ca/institutes/natural_resources/

NRI 7130 Energy Resources Management and Policy Cr.Hrs. 3
This course covers global energy issues, objectives, strategies, and policies, and the environmental impacts of alternative energy sources; Canadian energy issues, objectives, strategies, and policies. The course stresses the need for a sound understanding of energy issues of fundamental importance, ability to assess alternatives, appreciation of policy strategies and instruments, and the ability to formulate an energy policy for a region. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

## NRI 7160 Projects in Natural Resources Management

 1 Cr.Hrs. 3Team research project in an area of interest. Application of problem-solving skills to current issues in natural resources management. Additional information on the program may be found on the NRI website:
www.umanitoba.ca/institutes/natural_resources/

## NRI 7170 Projects in Natural Resources Management

 2 Cr.Hrs. 3Team research project in an area of interest. Application of problem-solving skills to current issues in natural resources management. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

## NRI 7180 Sustainable Development and Natural

Resources Cr.Hrs. 3
An examination of the context, concepts, principles, and applications of sustainable development and natural
resources at the international, national, and regional levels. Sustainable development is considered from three perspectives - environment, economy, and peoples' wellbeing. Particular attention is focused upon the implications of sustainable development for natural resources and environmental management. Permission of the instructor required. Students are advised to consult with Institute faculty prior to admission. Additional information on the program may be found on the NRI website:
www.umanitoba.ca/institutes/natural_resources/
NRI 7182 Sustainability, Economics, and Natural Resources Cr.Hrs. 3
Economic aspects of sustainability are a critical component of sustainable development. The relationship between environment, economy, and the human dimensions of natural resources comprise the primary focus of the course. Specific topics include environmental/ecological economics, externalities, project assessment, benefit cost analysis, the economics of renewable and non-renewable resource management and economic aspects of globalization.

NRI 7190 Natural Resources Administration and Law Cr.Hrs. 3
The objective of this course is to explore the legal frameworks and processes in Canada related to natural resource management. After a general review of the Canadian legal system with a particular focus on administrative law, national and international regulatory frameworks related to the ownership and disposition of specific natural resources are explored. Through class discussion, case studies and presentation, the law governing the use and development of natural resources is examined and critiqued. This course is cross-listed with LAW 3980 "Natural Resources Law."

NRI 7200 The Role of Information Management in Sustainable Resource Use Cr.Hrs. 3 This course reviews some of the key concepts of spatial analysis including geographic information systems, remote sensing, image processing, and cartography. The second part of the course is based on the application of these concepts to a resource management issue using a case study approach. Students will gain familiarity with the following software: Idrisi for GIS; Adobe Photoshop for image processing; and Adobe Illustrator for cartography. Classes will have three components,
discussion/presentation; lecture; and lab. Additional information on the program may be found on the NRI website: www.umanitoba.ca/institutes/natural_resources/

NRI 7222 Human Dimensions of Natural Resources and Environmental Management Cr.Hrs. 3
The human dimensions of Natural Resources and
Environmental Management will be considered through the following thematic units: definitions, history, and paradigms of management; intersection of science with politics, actors, groups and participatory processes; Traditional Ecological Knowledge (TEK), communications and environmental perception; institutions, common theory and adaptive comanagement. Additional information on the program may be found on the NRI website:
www.umanitoba.ca/institutes/natural_resources/
NRI 7232 Ecological Dimensions of Resource and Environmental Management Cr.Hrs. 3 Current concepts and theories in landscape ecology, plant
and animal ecology, life-history strategies, food webs, and population and community ecology are discussed as they relate to management. Common themes throughout the course include the importance of scale, the influence of science on management, adaptive management, and critical thinking. Additional information on the program may be found on the NRI website:
www.umanitoba.ca/institutes/natural_resources/
NRI 7242 Resource and Environmental Management Policy Cr.Hrs. 3
The complexity of natural resources and environmental policy formulation, implementation, and analysis is the primary focus. Specific topics include: modern state, government and policy development processes; policy community and stakeholders, and role of pressure and interest groups; policy analysis, research and evaluation are examined from a variety of perspectives. Theory and practice are linked in addressing course objectives.

NRI 7252 Environmental Management Practice Cr.Hrs. 3 Environmental Management systems (e.g. 14001 and Natural step), best management practices and project management. Tools: Awareness (Environmental Policy, Environmental Impacts, Risk Assessment, Life Cycle Assessment), Action (Objectives, Targets, Risk Reduction, Indicators, Monitoring, Activities), Advance (Sustainability Report, Triple Bottom Line, Environmental Audit).

NRI 7262 Master's Thesis Research Seminar Cr.Hrs. 3 This course will provide a practical introduction to thesis research. The core objective is to assist students in designing their research, including such tasks as considering an appropriate research paradigm, establishing researchable problems, setting goals and objectives, choosing appropriate methods, analyzing data, preparing research proposals, project administration, among other topics. Special attention will be paid to conducting interdisciplinary research in the field of natural resources management. Additional information on the program may be found on the NRI website: www.umanitoba.ca/institutes/natural_resources/

## NRI 7280 Regional Development in Northern

## Manitoba Cr.Hrs. 3

A comprehensive examination of natural resources, socioeconomic conditions, and institutional structures forms the basis for an evaluation of long-term sustainability and developmental strategies for Manitoba's North. Permission of the instructor required. Students are advised to consult with Institute faculty prior to admission. Additional information on the program may be found on the NRI website:
www.umanitoba.ca/institutes/natural_resources/
NRI 7290 Environmental Impact Assessment Cr.Hrs. 3 Course is a fundamental tool of decision making regarding natural resources and the environment and will provide students with an understanding of how environmental assessment is designed, administered and operates in the field. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7302 Conservation Biology and Biodiversity Management Cr.Hrs. 3
The course explores management and conservation of biodiversity at the genetic, species, and ecosystem levels of biological organization, and from local to global scales.

## ACADEMIC CALENDAR

Emphasis is placed on understanding human impacts on biodiversity, critically evaluating the importance of biodiversity conservation, and political, economic, ecological, and philosophical implications and drivers of conservation.

NRI 7310 Ph.D. Thesis Research Seminar Cr.Hrs. 3 Designing research and methodology specific to a project; reviewing the philosophy of interdisciplinary approaches to Natural Resources and environmental management and trends in the field; analyzing appropriateness of a project with trends and directions in interdisciplinary research; conducting and administering research; communicating and disseminating results of research. Additional information on the program may be found on the NRI website:
www.umanitoba.ca/institutes/natural_resources/
NRI 7320 Environmental Risk and Hazards Cr.Hrs. 3 Environmental risk and hazards are viewed in terms of complex processes of natural systems and social formation. Analysis of processes and events is assisted by theoretical formulation, development of models and examination of siteor type-specific empirical cases. Additional information on the program may be found on the NRI website: www.umanitoba.ca/institutes/natural_resources/

NRI 7330 Water Resources: Analysis, Planning and Management Cr.Hrs. 3
Considering fresh water as a resource, this course initially examines theoretical models and management approaches and practices; water supply requirement, measurements, and management; demand management; and environmental sustainability. The second part encompasses selected aspects of watershed hydrology and management; water and ecosystem health; and river basin management strategies and policies. The final part evaluates institutional arrangements and jurisdictional responsibilities; transboundary issues, opportunities and implications

NRI 7340 Environmental Justice and Ecosystem Health Cr.Hrs. 3
Explores Ecosystem health and environmental justice issues to realize both the possibilities and barriers to sustainability. Risk, resource distribution and power/decision-making are analyzed across race, gender and class differences. Diverse views, theories and methods on community health consider well-being, quality of life, vulnerability and ecological integrity. Additional information on the program may be found on the NRI website:
www.umanitoba.ca/institutes/natural_resources/
NRI 7350 Study Design and Quantitative Methods for Resource and Environmental Management Cr.Hrs. 3 This course addresses the quantitative analysis of environmental and natural resources data, emphasizing strong study design to prevent analytical difficulties. Focus is on preparing graduate students in environmental and resources management for dealing with the typical characteristics of environmental data, and for analyses specific to resources data. Additional information on the program may be found on the NRI website: www.umanitoba.ca/institutes/natural_resources/

NRI 7360 Qualitative Field Methods for Community-based Resource and Environmental Management Cr.Hrs. 3 The purpose of this course is to provide students with the knowledge and skills necessary to undertake qualitative research relevant to CBRM. The course will be offered in a
studio format with an emphasis on student participation in a research team and the practical application of data collection procedures in field setting.

NRI 7370 Sustainable Livelihoods, Food Resources and Community Food Security Cr.Hrs. 3
About one third of a household's total environmental impact is related to food considering all the effects of livestock, agriculture and the food industry on water, soil and air, the overuse of fish resources, transport and packaging waste. This course analyzes sustainable livelihoods and food security/sovereignty in the food system (production, processing, marketing, etc.).

## Nursing

Head: (and Graduate Chair) Judith Scanlan
Campus Address/General Office: 280 Helen Glass Centre for Nursing
Telephone: (204) 4746216
Fax: (204) 4747682
Email Address: nursing grad@umanitoba.ca
Website: http://umanitoba.ca/nursing
Academic Staff: Please refer to our website for Academic staff information:http://umanitoba.ca/nursing

The Faculty of Nursing currently offers programs leading to the Master of Nursing (MN) degree and a Ph.D. in Cancer Control offered by the Faculty of Nursing and the Department of Community Health Sciences, Faculty of Medicine. The MN program streams are Education, Administration, Clinical, and Nurse Practitioner. The MN program provides students with expertise which enables them to respond in an ever-changing, dynamic, and fluid practice setting, as well as prepares students for possible doctoral study.

Graduates of the program over the past 10 years work in many areas: for example, middle and senior managers, clinical nurse specialists, nurse practitioners, government health policy bureaucrats, nursing educators, and directors of research in institutions. Over 20 percent of graduates pursued doctoral education following their master's program.

## Fields of Research

The Faculty of Nursing has areas of established research excellence and emerging research specialties. Nursing is an 'applied' profession and the nursing research conducted at the University of Manitoba emphasizes the development of nursing knowledge as a basis for evidence-based practice.

The research area of cancer care of individuals and families has gained international recognition with the establishment of the Research Chair in the 'Development of EvidenceBased Nursing Practice in Cancer Care, Palliative Care, and Cancer Prevention'. The awarding of this Research Chair to the Faculty of Nursing facilitated the creation of the joint Ph.D. in Cancer Control with the Faculty of Medicine and acted as the stimulus for the growth of research and scholarship by faculty members and students.

## 

## ACADEMIC CALENDAR <br> 2012-2013 •

The Canadian Institutes of Health Research (CIHR) Chair in Gender and Health is a program of research that is specifically aimed at examination of inequities and disparities in women's prenatal health; access to prenatal care, and quality of care; exploration of how these disparities intersect with other health determinants such as income, ethnicity, migration, and geography; and study of the association of disparities in women's prenatal health and inequities in access to prenatal care and quality of care with adverse pregnancy outcomes. This Chair award includes funding to support and train full-time graduate students. For further information:
http://umanitoba.ca/faculties/nursing/research/heaman chair html

The Manitoba Research Chair from the Manitoba Health Research Council (MHRC) was awarded from 07/2010 to 06/2015 for the program of research entitled, Advancing our Understanding of Children's and Youth's Health and IIIness Experiences. For further information:
http://umanitoba.ca/faculties/nursing/research/woodgate cha ir.html

The research foci represent the research programs nationally funded, as well as new and emerging research initiatives of faculty members. These foci occur within the context of population and public health to improve client care and health outcomes through knowledge translation.

- Interventions: includes innovations in the care of individuals and families with cancer, disabilities and acute and chronic illnesses; promotion of health with vulnerable populations in the community.
- Professional Foundations: includes theoretical and applied research on nursing and interprofessional education and practice.
- Health Services/Policy: includes research on the delivery, effectiveness, and safety of health services at the individual, community, and population levels; health policy; health administration; and organizational health behaviour.

The Faculty of Nursing has formal linkages with the University of Manchester. Collaborate research is conducted with the Mayo Clinic in Rochester, Minnesota. In addition, other consultation and research occurs at many health facilities in the province. These relationships provide graduate students with many possibilities and opportunities to pursue their areas of interest and expand their understanding of health and health care.

## Research Facilities

The Manitoba Centre for Nursing and Health Research (MCNHR) is located within the Faculty of Nursing. The MCNHR supports and advances the research and scholarly activities of its members who include faculty and affiliated nursing and health researchers within the community. Available supports to graduate students include methodological and statistical consultation, qualitative and quantitative data analysis programs, and information on research grant initiatives. Opportunities are available for
graduate students to work with MCNHR members as research assistants.

## Master of Nursing ,

 AdmissionIn addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, applicants must possess:

A baccalaureate degree in nursing, mental health nursing or psychiatric nursing or its equivalent from an approved or accredited university. In exceptional circumstances, applicants with a degree in another discipline may be considered on a case by case basis. RPN applicants are not eligible for the Nurse Practitioner stream;

Completion of a Research Methods course and an Introductory Statistics course with a minimum grade of C+ in each course. The content of specific courses may be reviewed to determine whether these criteria are met; and

Proof of active practicing nurse registration in Canada. Applicants from other countries may apply provided they have active practicing nurse status in their home country. After admission, the following is required:

- Canadian Students - Students must maintain Active Practicing Status with the College of Registered Nurses of Manitoba while enrolled in the MN Program.
- Foreign Students - Students in the Graduate Program from outside Canada must provide proof of active practicing nurse status in their home country. Students who do not interact with clients/patients in their clinical practice (i.e., administration and education foci) will not be required to obtain registration in Manitoba. Students who interact with clients/patients (clinical practice and nurse practitioner) will be required to obtain active practicing membership with the College of Registered Nurses of Manitoba (approved by the Graduate Studies Committee, November 20, 2008).

The Faculty of Nursing has additional application requirements and procedures. Check the Faculty of Nursing website for details and the link to the application form on the Faculty of Graduate Studies website:
http://umanitoba.ca/faculties/nursing/programs/graduate/adm ission.html. Completed applications must be received in the Faculty of Graduate Studies by April $1^{\text {st }}$ for the year in which admission is sought.

Students admitted to the Master of Nursing program must be fully immunized as prescribed by the Faculty of Nursing Immunization Policy and submit a completed Immunization Record.

Application Deadlines

## ACADEMIC CALENDAR

Students in the Faculty of Nursing normally begin their program on September $1^{\text {st }}$. For admission for this start date, Canadian and International students must submit their applications with complete supporting documentation to the Faculty of Graduate Studies by April $1^{\text {st }}$.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Master's Program in Nursing includes 21 credit hours for students completing a thesis, and 27 credit hours for students completing comprehensive exams. The Nurse Practitioner stream consists of 36 credit hours plus the Clinical Consolidation course.

Second language reading requirement: none

Maximum time to graduate: six years

## Ph.D. in Cancer Control,

The Faculty of Nursing offers a Ph.D. in Cancer Control. Information on this program may be found in another section of this calendar.

## Ph.D. in Applied Health Sciences,

The Faculty of Nursing, in collaboration with the Faculty of Physical Education and Recreation Studies, Faculty of Human Ecology, and School of Medical Rehabilitation, now offers a multi-faculty Ph.D. in Applied Health Sciences. Information on this program may be found in another section of this calendar.

## Nursing

NURS 7030 Foundations, Issues and Trends in
Nursing Cr.Hrs. 3
(Formerly 049.703) Explores how social forces have influenced the evolution of nursing, its place in society, and the health care system today. Examines issues and trends affecting present and future development of nursing.

NURS 7040 Curriculum Development in Nursing Cr.Hrs. 3 (Formerly 049.704) The course is designed to explore the developmental phases of curriculum design in a variety of educational settings and types of programs. Students will have the opportunity to engage in the planning and the structuring of educational programs. Course in abeyance.

NURS 7050 Restorative Nursing Cr.Hrs. 6
(Formerly 049.705) Advanced study of the scientific foundations of human functioning as it applies to individuals and families in the context of altered health status. Nursing theories and therapeutic interventions will be applied to the restoration of the health status ofindividuals and families. Practice is an integral part of the course. Offered on a rotating basis.

NURS 7080 Special Topics in Nursing Research II Cr.Hrs. 3 (Formerly 049.708) Seminar discussion of topics related to current issues and problems in the development, implementation, and evaluation of knowledge utilization programs in nursing practice. Required of all practicum students. Offered when student demand warrants andon a rotating basis.

NURS 7082 Evidence Informed Practice Cr.Hrs. 3
This course will provide a foundation for students to evaluate the theory of evidence informed practice and its relationship to health care delivery. Students will be exposed to the principles of evidenced informed practice, basic epidemiological statistics, systematic reviews, critical appraisal techniques, application of implementation science, and health care intervention evaluation in order to acquire the analytical and questioning kills necessary to review their own work and other literature relevant to health care practices. Asking the right clinical question, searching the literature, critically appraising primary studies, making recommendations(s) for changing clinical practice, and evaluation the effects of a practice innovation or newly developed program are essential components of evidenced informed practice.

NURS 7084 Role development in Advanced Nursing

## Practice Cr.Hrs. 3

The purpose of this course is to understand the role of advanced nursing practice. The context, complexity, and scope of the roles within professional nursing practice will be explored. Particular emphasis will be placed on the knowledge base and skill set required to be an effective leader in a variety of advanced practice nursing roles. In this course, nursing graduate students for all streams will come together to discuss and debate issues related to advanced nursing practice on a local, regional, national and international level.

NURS 7086 Integrative Focus Cr.Hrs. 3
The purpose of this course is to allow the student to focus indepth in a substantive area of nursing practice: clinical practice, education or administration. Students will engage in practice in the area of focus, and be guided by the faculty adviser with respect to the goals and direction of the practicum and associated readings. Students will participate in seminars facilitate by the faculty at designated times throughout the practicum.

NURS 7090 Science and Theory in Nursing Cr.Hrs. 3 The course includes an exploration of nursing's theoretical evolution. Issues related to the development and application of theory in a practice discipline will be discussed with a focus on the role of research. Particular emphasis will be placed upon analysis and evaluation of nursing's conceptual and theoretical systems.

NURS 7100 Administration in Nursing Cr.Hrs. 6 (Formerly 049.710) Exploration and analysis of the roles and responsibilities of the nursing administrator in today's health care system. Examination of the organizational structure and culture of nursing services in relation to conflict resolution, interdisciplinary relationships and union negotiation. Includes preceptorship experience. Offered on a rotating basis and currently under review.

NURS 7110 Readings in Selected Topics Cr.Hrs. 3 (Formerly 049.711) An intensive readings course for
graduate students in nursing. Topics may be selected within the general field of nursing to suit the special needs and research interests of students, for example, transcultural nursing, women's health, or palliative care. Students must have a faculty member agree to advise them before registering.

NURS 7140 The Older Adult: Advanced Nursing Assessment Cr.Hrs. 3
(Formerly 049.714) Advanced study and practice integrating theory, concepts, research and skills related to nursing assessment of the strengths and vulnerabilities of older adults and their families. Emphasis is on health promotion for the elderly. Clinical practice in thecommunity and/or the institution is a component of the course. Offered on a rotating basis.

NURS 7160 Cancer Nursing Research Cr.Hrs. 3 (Formerly 049.716) Focuses on recent advances in cancer nursing research with an emphasis on research methodologies, ethical concerns, and design issues pertinent to research with cancer populations. Approaches to utilization of research findings in clinical practice will be addressed. Offered on a rotating basis.

NURS 7170 Community Health Nursing: Assessment of Aggregate Needs Cr.Hrs. 3
(Formerly 049.717) Furthers theoretical and practical knowledge of key components of community health nursing within the primary health care model. Focus is on community health nursing systems and their relationship to the total health care system. Factors influencing past, current, and future community health nursing practice are examined. Emphasis is on assessing aggregate needs and developing advanced skills in working with a target group in the community. Practice in the community is an integral part of the course. Offered on a rotating basis.

NURS 7180 Community Health Nursing: Community Level Interventions Cr.Hrs. 3
(Formerly 049.718) Furthers theoretical and practical knowledge in community wide interventions that promote health. Focus is on the community health nurse's role in program development and evaluation for targeted groups in the community, and the role of influencing health policy through lobby efforts. Practice in the community is an integral part of the course. Prerequisite: NURS 7170 (or 049.717) or permission of instructor. Offered on a rotating basis.

NURS $\mathbf{7 2 0 0}$ Human Responses to Illness Cr.Hrs. 6 (Formerly 049.720) Consists of a series of seminars, case studies and clinical practica on human responses common to ill individuals across the lifespan. The emphasis of the course is on synthesis and application of relevant principles of the Human Response to Illness Model, on the development of proficiency in advanced assessment and decision-making, and on initiating, planning and evaluation of nursing interventions. Clinical practice is a course component. Offered on a rotating basis.

NURS 7210 Qualitative Research Methods in Nursing Cr.Hrs. 3
The purpose of this course is to advance knowledge of qualitative methodology and understanding of the ways in which qualitative methodology can be used to understand phenomena of interest in nursing and health care. This
course is designed to provide opportunities for developing specific qualitative research skills, while gaining familiarity with theories, issues, and challenges in qualitative research. Students are exposed to the philosophical assumptions of the qualitative paradigm, ethical issues specific to qualitative research, qualitative sampling strategies, qualitative data collection techniques, and processes associated with the analysis, interpretation, and knowledge translation and utilization of qualitative data.

NURS 7220 Quantitative Research Methods in
Nursing Cr.Hrs. 3
The purpose of this course is to advance understanding of the ways in which quantitative approaches can be applied to solve nursing problems. The quantitative research process will be described including literature review, conceptual frameworks in nursing sampling, data collection strategies, analysis of research data, and communication of results. Included are exploration of the status and development on nursing knowledge through quantitative research methods.

## NURS 7250 Foundations of Advanced Practice

Nursing Cr.Hrs. 3
(Formerly 049.725) A study of the theoretical underpinnings surrounding the development of a variety of advanced practice nursing roles. The focus will be on the issues shaping role development in Manitoba and Canada including economic, political and sociologic factors determining health care policy and delivery will be examined.

## NURS 7260 Health Care in Advanced Practice Nursing

 1 Cr.Hrs. 6An examination of the assessment and intervention strategies for individuals from birth to adolescence, including sexuality and reproductive health. Designed to provide the necessary knowledge and experience to assist individuals and their families with the most common health problems. Concepts of health promotion and health maintenance are integrated throughout the course. Integrated clinical practicum (12 hrs/week). Prerequisites: NURS 7250 (or 049.725), NURS 7370, NURS 7380 and NURS 7390.

## NURS 7270 Health Care in Advanced Practice Nursing

 2 Cr.Hrs. 6(Formerly 049.727) A study of assessment and intervention strategies for individuals from young adult through older adult. The course is designed to provide the necessary knowledge and experience to assist individuals and their families with the most common health problems. Concepts of health promotion and health maintenance are integrated throughout the course. Integrated clinical practicum (12 hrs/week). Prerequisites: PHAC 2100 (or 089.210), PHGY 7240 (or 090.724), 036.725, NURS 7230 (or 049.723), NURS 7250 (or 049.725).

NURS 7280 Applied Physiology and Pathophysiology for Nurses Cr.Hrs. 6
(Formerly 049.728) This is a clinically-applicable systems approach to normal and altered physiological regulation, and is of specific application to advanced nursing practice. Lectures in physiology and pathophysiology as well as student-led case studies will be used to provide synthesis and application of concepts to common health care problems seen in clinical practice.

NURS 7290 Woman, Child and Family Health: Nursing Perspectives Cr.Hrs. 6

## ACADEMIC CALENDAR

(Formerly 049.729) Detailed study of the theory, concepts, current research and nursing care related to the health needs of women, children and their families. Students will focus their theoretical learning and clinical practice within selected areas of woman, child or family health. Clinical management of selected clients is an integral part of the course. Offered in 2003 and alternate years thereafter.

NURS 7300 Advanced Health Assessment and Diagnostic Reasoning Cr.Hrs. 6
Designed to develop health assessment and critical thinking skills appropriate for clinical practice at an advanced level.
The collection and in-depth analysis of subjective and objective health information and the use of diagnostic reasoning are emphasized. All students engage in practice with fellow students, clinical teaching associates and consenting patients. Required for students in the APN major.

NURS 7310 Health Care Policy: Implications for Nursing Practice Cr.Hrs. 3
(Formerly 049.731) Examines the inter-relationships of knowledge development, research utilization, policy formation, health services decision-making, and nursing systems. The selected topics are based on current nursing practice issues in community and institutional settings and their impact in individuals, families and aggregates. A major focus is the analysis of the process of knowledge development and application to health care and nursing systems. Not to be held with the former 049.719 and or NURS 7240 (or 049.724).

NURS 7320 Philosophy of Nursing Science Cr.Hrs. 3 (Formerly 049.732) Advanced seminar to explore philosophies of science which have influenced the development of nursing knowledge. Nursing epistemological traditions are analysed and criticized as they relate to nursing theory development and research. The relationship between nursing science and practice is emphasized.

NURS 7330 Clinical Consolidation Cr.Hrs. 0
Provides an opportunity to consolidate clinical skills, apply theoretical knowledge and research, and synthesize theory and practice in the final year of the Nurse Practitioner stream (10 weeks of 400 clinical hours). Preparation of a final paper that illustrates scholarly endeavour suitable for publication is required.

NURS 7340 Evidence Informed Practice Cr.Hrs. 3 (Formerly NURS 7080) This course will provide a foundation for students to evaluate the theory of evidence informed practice and its relationship to health care delivery. Students will be exposed to the principles of evidenced informed practice, basic epidemiological statistics, systematic reviews; critical appraisal techniques, application of implementation science, and health care intervention evaluation in order to acquire the analytical and questioning skills necessary to review their own work and other literature relevant to health care practices.

NURS 7350 Role Development in Advanced Nursing Practice Cr.Hrs. 3
The purpose of this course is to understand the role of advanced nursing practice. The context, complexity, and scope of the roles within professional nursing practice will be explored. Particular emphasis will be placed on the knowledge base and skill set required to be an effective leader in a variety of advanced practice nursing roles. In this
course, nursing graduate students from all streams will come together to discuss and debate issues related to advanced nursing practice on a local, regional, national, and international level.

NURS 7360 Integrative Focus Cr.Hrs. 6
The purpose of this course is to allow the student to focus indepth in a substantive area of nursing practice: clinical practice, education or administration. Students will engage in practice in the area of focus, and be guided by the faculty adviser with respect to the goals and direction of the practicum and associated readings. Students will participate in seminars facilitated by the faculty at designated times throughout the practicum. Prerequisite: NURS 7090, NURS 7210, NURS 7220, and NURS 7340.

## NURS 7370 Pathophysiologic Concepts \& Therapeutics

 I Cr.Hrs. 3Introducing principles of cell signaling, physiological feedback systems, adaptive and non-adaptive cellular responses, receptor-ligand interactions, drug kinetics, dynamics and therapeutics. Pathophysiology and treatment of disorders of immunity and inflammation, including hypersensitivity reactions, will also be covered in this course.

NURS 7380 Pathophysiologic Concepts \& Therapeutics II Cr.Hrs. 3
This course entails a systems-based analysis of disease states commonly seen in primary care, including cardiovascular, hematological, respiratory, neurologic and renal disorders and their treatment. Problem- and casebased scenarios will be used to encourage critical thinking and integration of pathophysiologic and management principles.

NURS 7390 Pathophysiologic Concepts \& Therapeutics III Cr.Hrs. 3
This covers pathophysiology and management of disorders of the musculoskeletal, gastrointestinal, dermatologic, reproductive and urogenital systems. One module will focus on disorders of the head, eyes, ears, nose and throat. A case study approach to instruction will be used almost exclusively in this course, which culminates in a mock 'grand rounds' presentation.

## Occupational Therapy

Head: Donna Collins
Campus Address/General Office: R106-771 McDermot Avenue, Bannatyne Campus
Telephone: (204) 789-3897
Fax: (204) 789-3927
Email Address: SMR Information@umanitoba.ca
Website: http://umanitoba.ca/medrehab/ot
Academic Staff: Please refer to our website for Academic staff information:http://umanitoba.ca/medrehab/ot staff.html

The Master of Occupational Therapy (M.O.T.) is a professional practice degree that can be obtained through participation in either a Regular program or an Accelerated program option. The Regular program is for individuals who do not have a previous degree in occupational therapy. The

## 

ACADEMIC CALENDAR
2012-2013 •

Accelerated program is for occupational therapists who have a B.M.R.(O.T.) degree or equivalent.

The Occupational Therapy program maintains accreditation through the Canadian Association of Occupational Therapists and a 7-year accreditation was received in 2012.

## Admission

The following is a summary of the admission requirements. Equivalent academic courses completed at the University of Manitoba or recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in applicant information packages that are available from the School of Medical Rehabilitation website:
http://umanitoba.ca/medrehab/ot

## Regular Program

Completion of a previous undergraduate degree, minimum $B$ average in last 60 credit hours of study, completion of all program prerequisite courses or approved alternates with no grade in prerequisites below a B. Prerequisite courses include all of the courses listed below or equivalents* approved by the M.O.T. Admissions Committee:

Basic Statistical Analysis
Anatomy of the Human Body

Physiology of the Human Body
Minimum 3 credit hours in Psychology

Minimum 3 credit hours in Social Sciences

* A list of prerequisite courses and equivalents is available at www.umanitoba.ca/medrehab/ot/ot prerequisite.html

## Accelerated Program

Completion of a B.M.R.(O.T.) degree or equivalent, minimum $B$ average in the last 60 credit hours of the degree, completion of an additional 42 credit hours of non-O.T. degree credits, and evidence of having passed the Canadian Association of Occupational Therapists (CAOT) certification examination and/or eligibility for registration in Manitoba by the College of Occupational Therapists of Manitoba (COTM).

## Application Deadlines

Regular Program: The final date for receipt of applications for admission is February 1 for Canadian applicants; January 15 for non-Canadian applicants.

Accelerated Program: Students may begin their program on either September 1 or January 1. For admission for each of
these start dates, Canadian students should send their applications with complete supporting documentation to arrive no less than three (3) months before the intended start date. Non-Canadian students should send their applications with complete supporting documentation to arrive no less than seven (7) months before the intended start date.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies, found in the Graduate Studies Regulations section of this Calendar. M.O.T. program Supplemental Regulations are available on the School of Medical Rehabilitation website:
www.umanitoba.ca/medrehab/media/supplementary regulati ons.pdf

Second language reading requirement: None

Expected time to graduate: Regular program - 2 years; Accelerated program-1 year.

Students in the M.O.T. Regular program must complete 107 credit hours of course work. All academic and fieldwork courses and a professional portfolio must be successfully completed in order to graduate.

Students in the M.O.T. Accelerated program will be required to take 12 credit hours of academic course work from the M.O.T. program or equivalent. Six of these credit hours are to be OT 7750 Independent Study or equivalent. A professional portfolio must also be successfully completed.

Fieldwork education is an integral part of the M.O.T. Regular program. Field placement experiences are integrated throughout the program and include 1 four-week, 2 eightweek and 1 six-week experience. Field placements normally occur in Manitoba and Saskatchewan. All students should be prepared to travel out of Winnipeg for a minimum of one placement during the course of the program.

Occupational Therapy students are required to provide a health history and immunization record. A student will not be permitted to attend fieldwork placements until all health, immunization, CPR, mask fit and records check requirements are met.

Health Requirements: Standard Health Record Form Packages are sent to new occupational therapy students upon acceptance into the program. New students in Occupational Therapy are required to return forms to their department by dates published yearly in the Health Record Form Packages. Second year students are required annually to review and update immunizations as necessary.

Cardiopulmonary Resuscitation Certification: All students of the Department of Occupational Therapy are required to obtain certification in cardiopulmonary resuscitation. Certification must be at the Basic Rescuer Level. New students in the program must provide proof of certification within the first 2 weeks of classes of the academic year in which they commence classes. This certification must have
an issue date on or after July 1 of the year the student commences classes in the program. Second year students must provide proof of re-certification by October 1 of their second year in the program. This certification must have an issue date during or after the last week of August of the current year. Certification must remain current for all fieldwork experiences.

Mask Fit Certification: Clinical/fieldwork education sites require students to maintain mask fit certification. Information on acquiring this certification is provided to new students with the Health Record Form Packages. All students are required to maintain mask fit certification throughout the program.

## Criminal Record Check and Child Abuse Registry

Check: Students are advised that clinical/fieldwork education sites require that students complete a Criminal Record Check (including a vulnerable sector screen) and a Child Abuse Registry Check. New students in the Master of Occupational Therapy program must provide results of a Child Abuse Registry Check and a Criminal Record Check within the first 2 weeks of classes of the academic year in which they commence classes. Both checks must have an issue date after July 1 of the year the student commences classes in the program. Second year students must provide updated results by October 1 of their second year in the program. Both checks must have an issue date during or after the last week of August of the current year.

## Occupational Therapy - $\mathbf{6 0 0 0}$ Level

OT 6100 Human Determinants of Occupational

## Performance Cr.Hrs. 6

(Formerly 168.610) Students study the anatomical, physiological, biomechanical, and psychosocial factors that underlie the physical, cognitive and affective componenets of human capacities. Content is presented in the context of understanding the relationship between human capacities and occupational performance, the ability to carry out activities and tasks of self-care, productivity and leisure throughout the lifespan.

OT 6110 Theoretical and Philosophical Foundations of Occupational Therapy Cr.Hrs. 3
(Formerly 168.611) Students study the theoretical and philosophical foundations of occupational therapy and the relationship between occupation and health and well-being. A case based introduction to the processes and approaches that guide practice with clients of various ages and in a variety of practice settings.

OT 6120 Health and Disability Cr.Hrs. 3 (Formerly 168.612) Students study definitions of health, factors influencing health, and systems that relate to health in populations. Students are also introduced to classification of diseases and disorders and impairments and the disablement process.

OT 6130 Occupational Therapy Practice Skills 1 Cr.Hrs. 3 (Formerly 168.613) Through instruction, case illustration and practice laboratory sessions students are introduced to practice skills related to the occupational therapy process.

Occupational therapy skills and approaches used to identify occupational performance issues are introduced and practiced. Basic assessment of physical, cognitive, and affective performance components are taught. Students participate in problem solving and basic interventions around issues of occupational performance.

## OT 6140 Enabling and Professional Development

Skills Cr.Hrs. 7
(Formerly 168.614) An introduction to the development of personal knowledge, skills and attitudes related to enabling occupation in clients, and to promoting professional behaviours for safe, reliable and ethical practice. Emphasis will be placed on the development of a variety of verbal and written communications skills, and clinical/professional reasoning.

OT 6190 Fieldwork Preparation Cr.Hrs. 1
This course provides foundational knowledge and skills required to participate effectively in the fieldwork component of the Occupational Therapy Program. Course evaluated on a pass/fail basis.

OT 6200 Basic Fieldwork Cr.Hrs. 4
(Formerly 168.620) Students are placed in practice settings for four weeks of field experience under the supervision of a registered Occupational Therapist. Experiences are offered in a wide variety of Field sites in Manitoba, Saskatchewan and northwestern Ontario. Evaluated at an introductory level. Course evaluated on a pass/fail basis. Prerequisite: OT 6190.

OT 6300 Occupational Analysis and Adaptation Cr.Hrs. 4 (Formerly 168.630) An in-depth examination of the relationship between components of human performance and engagement in occupations throughout the lifespan. Students analyze self-care, productivity and leisure occupations to identify physical, cognitive and affective components required for function. Principles and methods of adaptation and grading of occupation, task, activity, equipment and environment will be introduced.

OT 6310 The Environment and Occupational

## Performance Cr.Hrs. 4

(Formerly 168.631) An examination of physical, social, cultural and institutional aspects of the environment and their relationship to occupational performance throughout the life span. Students will begin to identify the environment in terms of enablers and obstacles to function for individuals with variable capacities.

OT 6320 Health Conditions and Occupational Performance Cr.Hrs. 4
(Formerly 168.632) An introduction to diseases, disorders and impairments as barriers to human occupational performance including an introduction to occupational therapy management approaches to enabling function.

OT 6330 Occupational Therapy Practice Skills 2 Cr.Hrs. 4 (Formerly 168.633) This course builds on OT Practice Skills 1. With a focus on practice skills related to the occupational therapy process, students gain further practice in assessment of occupational performance issues and physical, cognitive, and affective performance components. Students are introduced to assessment of environmental factors that influence occupational performance and participate in problem solving and interventions around
occupational performance issues.
OT 6350 Research Methods for Evidence-Based Practice Cr.Hrs. 4
(Formerly 168.635) This course is a theory and practical course designed to provide a basic understanding of research principles and methods, evidence-based practice, outcome measures, program evaluation and their applications in occupational therapy.

OT 6400 Intermediate Fieldwork 1 Cr.Hrs. 8 Students are placed in practice settings for eight weeks of field experience under the supervision of a registered occupational therapist. Experiences are offered in a wide variety of field sites in Manitoba, Saskatchewan and northwestern Ontario. Evaluated at an intermediate 1 level (pass/fail grade).

## Occupational Therapy - $\mathbf{7 0 0 0}$ Level

OT 7540 Advanced Enabling and Professional Development Skills 1 Cr.Hrs. 4
(Formerly 168.754) Builds on Enabling and Professional Development 1\&2. Emphasis is placed on the integration and consolidation of professional practice knowledge, skills and attitudes.

OT 7560 Occupational Therapy Process Across the Lifespan 1 Cr.Hrs. 6
(Formerly 168.756) Using problem-based learning methods, students study and apply the occupational therapy process as it relates to selected learning scenarios involving children, adolescents, adults and older adults. Students work in small group tutorials exploring and discussing a variety of issues frequently faced by individuals who may benefit from occupational therapy services.

OT 7570 Advanced Practice in OT 1 Cr.Hrs. 6 (Formerly 168.757) Building on knowledge and skills learning in Practice Skills 1 and 2, students are introduced to advanced concepts, theories and models that guide clientcentered occupational therapy evaluation and intervention. Students learn to apply theory to practice and continue developing required skills for the evaluation and intervention of occupational performance issues across the lifespan.

OT 7600 Intermediate Fieldwork 2 Cr.Hrs. 8
(Formerly 168.760) Students are placed in practice settings for eight weeks of field experience under the supervision of a registered occupational therapist. Experiences are offered in a wide variety of field sites. Evaluated at an intermediate 2 level (pass/fail grade).

OT 7740 Advanced Enabling and Professional Development Skills 2 Cr.Hrs. 4
(Formerly 168.774) Builds on previous Enabling and
Professional Development courses. Emphasis is placed on leadership skills and preparation for entry into the professional community.

OT 7750 Independent Study Cr.Hrs. 6
(Formerly 168.775) Students complete an in-depth study of evidence for practice in an area of interest. Students will work with an assigned faculty advisor or clinical research consultant to define and evaluate a particular area of interest
in occupational therapy practice.
OT 7760 Occupational Therapy Process Across the Lifespan 2 Cr.Hrs. 6
(Formerly 168.776) Using problem-based learning methods and self-directed learning, students study and apply the occupational therapy process as it relates to selected learning scenarios involving children, adolescents, adults and older adults. Students work in small group tutorials exploring and discussing a variety of issues frequently faced by individuals, groups and communities who may benefit from occupational therapy services.

OT 7770 Advanced Practice in OT 2 Cr.Hrs. 6
Building on knowledge, skills and attitudes learned in Advanced Practice in OT 1, students employ and evaluate concepts, theories and models of client-centred occupational therapy. Students develop skills that enable them to select, justify, and interpret appropriate evaluation methods and interventions to address occupational performance issues across the lifespan.

OT 7800 Advanced Fieldwork Cr.Hrs. 6 (Formerly 168.780) Students are placed in practice settings for a six week period which can occur in a flexible time frame (i.e. students may initiate this placement at different points in time from July 1 to mid August depending upon availability of placements. Students may participate in part-time experiences over a longer period or other types of flexible arrangements as may arise and are determined to be appropriate learning experiences to meet educational standards). Experiences are offered in a wide variety of field sites. Evaluated at an advanced level (pass/fail grade).

## Oral Biology

Head: R. Bhullar
Campus Address/General Office: 780 Bannatyne Avenue Telephone: (204) 7893705
Fax: (204) 7893913
Email Address: oral biology@umanitoba.ca
Website: http://umanitoba.ca/dentistry/oral biology
Academic Staff: Please refer to our website for Academic staff information:http://umanitoba.ca/dentistry/oral biology

The Department of Oral Biology was the first of its kind in North America and reflects the longstanding philosophy that dental education should include a strong science base provided by academic staff with major commitments to undergraduate dentistry and basic dental/medical research. This approach fosters not only the teaching of material relevant to dentistry, but serves to integrate the sciences into the various clinical programs. Associated with this philosophy is the concept that such committed faculty would also foster Faculty research supporting a graduate program in Oral Biology, as well as providing research and teaching expertise for the clinical graduate and postgraduate programs. Today, Oral Biology at Manitoba is recognised nationally and internationally as an outstanding basic science research department.

## ACADEMIC CALENDAR

The Department of Oral Biology offers graduate instruction and research leading to MSc and PhD degrees in a unique environment. Because of the size of the department, individual instruction and direction in research is a cornerstone of the graduate experience. The graduate programme is designed to accommodate students seeking career opportunities in oral biology or in related basic dental and medical science disciplines. At the heart of the Oral Biology program is the requirement in both degrees for the completion of a substantial and original research project in the laboratory of a faculty member. In most cases, the research undertaken will fall within the area of expertise of the faculty member and will employ the most up-to-date techniques available in the field. In addition students are required to complete a number of formally instructed courses in oral biology and/or related disciplines. The diversity of scientific areas within the Department of Oral Biology allows students to be accepted with either an appropriate professional degree or a B.Sc. (Hons.) with satisfactory background in the biological sciences. In addition, the Department of Oral Biology offers a Pre-Master's Program for selected students with general undergraduate degrees.

The Department of Oral Biology, as a leader in oral biology research, has established connections with numerous researchers and institutes all over the world. Ongoing research collaborations include those with universities in the United States, Sweden, and the United Kingdom. The Faculty of Dentistry consistently ranks among the top three dental faculties in Canada for basic science research. Basic science and clinical/basic science research has received high levels of funding from the Medical Research Council of Canada for more than 30 years.

Recipients of higher degrees from the Department of Oral Biology have been extremely successful following graduation. Recent graduates have either secured positions, or are completing further training, at the universities of Toronto, Dalhousie, British Columbia, Florida, Harvard, Laval and with the federal government.

## Fields of Research

Cell biologists are studying the molecular/genetic mechanisms involved in the development and function of orofacial tissues in the healthy and disease states. Studies are also proceeding on the effects of tobacco smoke components on the structure and function of fetal lung cells and lung surfactant. Researchers in the department are investigating interactions in the brain that regulate neurotransmitter molecules in the progression of such disorders as depression and schitzophrenia. Others, with an interest in natural medicine, are examining the effects of plant extracts in countering ear infections and hearing loss. Cell signaling/regulation studies continue on a number of fronts, including the role of the calcium-activated protease, calpain, in cell proliferation; the generation and action of membrane phospholipid-associated second messengers in exocrine secretion; and the central role/mechanisms of GTPbinding regulatory proteins and protein kinases in platelet function. The use of nanobiotechnology in diagnosis and therapy is also being explored. A study on gene expression in enamel formation in normal and abnormal teeth is being carried out.

## Research Facilities

The faculty has modern laboratories with state-of-the-art equipment for research in microbiology, physiology, biochemistry and molecular biology. Excellent tissue and cell culturing facilities are present as is unique equipment for such specialities as atomic absorption spectroscopy, chemostat bacterial culture and Fourier transform infrared spectroscopy through collaborations with NRC. Excellent clinical facilities also provide opportunities for graduate students to carry out orthodontic and periodontal work. These facilities, when combined with basic science and biomaterials laboratories, allow for the effective integration of research and clinical practice.

## M.Sc. in Oral Biology,

 AdmissionAdmission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students should possess an appropriate professional degree or B.Sc. (Hons.) degree with a satisfactory background in biological sciences or satisfactory completion of a pre-master's program in the Department of Oral Biology. The qualifications of all students applying for admission to the M.Sc. programs in Oral Biology will be assessed by the Department of Oral Biology Committee on Graduate Studies and Research and a recommendation made to the head of the department. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact the department for information.

## Application Deadlines

Applications should be received in the Faculty of Graduate Studies by the dates indicated below:

| Start Date | Canadian/U.S. | Non-Canadian |  |
| :--- | :--- | :--- | :--- |
| Regular | (September) | June 1 | March 1 |
| Winter | (January) | October 1 | July 1 |
| Spring | (May) | February 1 | November 1 |
| Summer | (July) | April 1 | January 1 |

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The M.Sc. program requires satisfactory completion of course requirements as specified by each student's supervisory committee and a thesis based on original research. Minimum course requirements are 12 credit hours which must include course ORLB 7190 Communication Skills in Dental Research (unless students have previous credit for this or an equivalent course).
Courses taken during the pre-Master's program cannot be transferred as credits towards the Master's program. M.Sc. students are expected to attend all departmental seminars. Students shall present one seminar on their research to the department each year, updating it each year. In addition, students must pass an oral examination on the

## ACADEMIC CALENDAR

subject of the thesis and matters relating thereto. The examination shall be open to all members of the university community who wish to attend. The form of the oral examination shall be the same as that for the Ph.D. thesis oral examination described in the Faculty of Graduate Studies Regulations governing the Ph.D. program.

Second Language Reading Requirement: none

Expected Time to Graduate: dependent on progress

## Ph.D. in Oral Biology,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. A M.Sc. degree is required, although students of exceptional or proven ability holding an appropriate professional degree or a B.Sc. (Hons.) degree may be admitted. The qualification of all students applying for admission to the Ph.D. program will be assessed by the Department of Oral Biology Committee on Graduate Studies and Research and a recommendation made to the head of the department.

A student whose knowledge of the field of Oral Biology is in doubt, after first registration for the degree, may be required to take a qualifying examination within the first 12 months of study at the discretion of the advisory committee. It is the responsibility of the committee to organize this examination.

The qualifying examination, which will consist of a written and an oral component, will be administered as in the candidacy examination. The result will be indicated as "pass" or "fail." A student who fails will be required to withdraw.

## Application Deadlines

Applications should be received in the Faculty of Graduate Studies by the dates indicated below:

| Start Date | Canadian/U.S. | Non-Canadian <br> Regular | (September) <br> June 1 |
| :--- | :--- | :--- | :--- |
| Winter | (January) | October 1 | Jarch 1 |
| Suly 1 |  |  |  |
| Spring | (May) | February 1 | November 1 |
| Summer | (July) | April 1 | January 1 |

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Ph.D. program requires satisfactory completion of course requirements as determined by each student's advisory committee and a thesis based on original research. Minimum course requirements shall be 12 credit hours at the 7000 level beyond the Master's degree, and must include course ORLB 7190 Communication Skills in Dental Research (unless students have previous credit for this or an
equivalent course). Courses taken during the pre-
Master's and Master's programs cannot be transferred as credits towards the Ph.D. program. Ph.D. students are expected to attend all departmental seminars. Students shall present at least one seminar on their own research to the department each year.

Second language requirement: none

Expected time to graduation: dependent on progress

## Oral Biology -7000 level

ORLB 7090 Pharmacology and Therapeutics Cr.Hrs. 3 (Formerly 100.709) A combined lecture and seminar course on the pharmacological basis of therapeutics. Special attention will be paid to drugs used commonly in the practice of dentistry, their side effects and their interaction.

ORLB 7100 Oral Microbial Ecology Cr.Hrs. 3 (Formerly 100.710) Study of principles of ecology in relation to the various ecosystems in the oral cavity. In depth examination of the taxonomic relationships of oral bacterial species. Emphasis will be placed on the growth and metabolic activities of oral bacteria which lead to successful colonization of the mouth.

ORLB 7110 Infectious Diseases and the Oral
Cavity Cr.Hrs. 3
(Formerly 100.711) The description of the aetiology of microbial infections in the mouth and infections elsewhere in the body which involve oral bacteria. The control of such infections by vaccines, antibiotics and antimicrobial drugs. Treatment of infections in the immuno-suppressed, post operative infections and nosocomial infections. The relationships of host immune system to the oral flora.

ORLB 7120 Special Problems in Oral Biology Cr.Hrs. 3 (Formerly 100.712) Each student will be required to carry out a minor research project in an area of oral biology other than that of their thesis work. The results of this project will be presented in a seminar and submitted as a written report.

ORLB 7130 Macromolecular Interactions of Connective Tissue in Health and Disease Cr.Hrs. 6 (Formerly 100.713) A comprehensive study of the macromolecular constituents of connective tissue, of their synthesis, metabolism, macromolecular interaction in health and disease, and of their regulatory mechanisms.

ORLB 7140 Cell Membrane and Cell Signaling Cr.Hrs. 3 This course will cover the structure and function of cell membrane receptors. The mechanisms and regulation of membrane coupled signal transduction pathways including those stimulated by oral tastants and drugs will also be covered.

ORLB 7150 MECH ORAL \& MAX DIS Cr.Hrs. 3 This course deals with the molecular pathology of the oral cavity and maxilofacial complex.

ORLB 7162 Neurophysiology of Pain Cr.Hrs. 3
This course examines the peripheral and central

## 

ACADEMIC CALENDAR 2012-2013 •
mechanisms associated with pain. Endogenous pain control systems and the pharmacological teatment of pain will also be covered.

ORLB 7180 Recent Advances in Oral Biology Cr.Hrs. 6 (Formerly 100.718) This course is given by staff in the form of lectures and tutorials. Additional lectures may be given by visiting scientists. Students are expected to familiarize themselves with the relevant literature and are examined for an in-depth appreciation of the topics covered.

ORLB 7190 Communication Skills in Dental
Research Cr.Hrs. 3
(Formerly 100.719) A course to develop written, visual and oral communication skills in scientific and clinical disciplines related to dentistry.

## Pathology

Head: Dr. John G. Gartner
Campus Address/General Office: 401 Brodie Centre, 727
McDermot Avenue
Telephone: (204) 7893538
Fax: (204) 7893931
Email Address: patholog@ms.umanitoba.ca
Website:
http://umanitoba.ca/faculties/medicine/units/pathology/pathol ogygraduate.html
Academic Staff: Please refer to our website for Academic staff
information:http://umanitoba.ca/medicine/pathology/faculty.ht $\underline{\mathrm{ml}}$

The Department of Pathology offers two programs leading to a M.Sc. degree. Honours Science graduates with a strong background in biology can carry out course work plus either a) a research based program and thesis, or b) a practicum leading to a paramedical qualification as a Pathologist's assistant.

## Fields of Research

Primary research interests of the faculty include developmental neuropathology, the immunobiology of graft versus host disease, breast cancer, renal transplantation, and cutaneous autoimmunity.

## Research Facilities

Research laboratories of pathology faculty members are found in multiple locations. The core laboratories of the department are situated in the Brodie Centre, John Buhler Research Centre and the Rehab Medical Building at the Bannatyne Campus, University of Manitoba.

## M.Sc. in Pathology,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Department deadlines for Regular Session (September Start Date) are June 15 (May 15 for international students) to the practicum program and June 15 for the research based program.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies as found in the Graduate Studies Regulations Section of this Calendar. Second language reading requirement: none

## Ph.D. in Pathology,

The Department of Pathology does not offer a Ph.D. Program. Students interested in further research may continue in the same laboratory but register in the Ph.D. program of another department, or in the interdisciplinary Ph.D. program.

## Pathology

PATH 7010 Investigative Pathology Cr.Hrs. 6 (Formerly 088.701) The student will complete a supervised project in the field of anatomic and/or clinical pathology, the results to be submitted in an acceptable report. The student will be examined on his/her knowledge in the field relating to his project. Prerequisite: PATH 7020 (or 088.702) or departmental consent.

PATH 7020 Introduction to Pathology Cr.Hrs. 6 (Formerly 088.702) The course introduces the student to the basic principles of disease processes, using case models to illustrate mechanisms. Assigned reading or seminar presentation will form part of the course.

PATH 7030 Pathologist Assistant Field Practicum Cr.Hrs. 20 The Field Practicum is extensive hands-on training in Anatomic Pathology as it relates to the methods and theory of Surgical and Autopsy Pathology. Emphasis is on examination, specimen preparation, dissection techniques and tissue selection as it relates to accurate diagnosis, prognosis, and patient management. The Field Practicum extends over three terms in Year 1 and two terms in Year 2 with an equivalent of 4 credit hours per term.

## Peace and Conflict Studies

Head: Sean Byrne
Campus Address/General Office: 252 St. Paul's College
Telephone: (204) 474-7979
Fax: (204) 474-8828
Email Address: Sean Byrne@umanitoba.ca
Website: http://umanitoba.ca/mauro centre
Academic Staff: Please refer to our website for Academic staff information:http://umanitoba.ca/mauro centre

## 

ACADEMIC CALENDAR

## Peace and Conflict Studies Joint M.A. Program,

The Joint M.A. Program in Peace and Conflict Studies (JMPPACS) encompasses the analysis and resolution of social conflicts; peace research that examines the structural roots of social conflicts, divisions, and social inequalities; and strategies for building community and promoting social justice. The Program is intended to be rigorous as the significance of research and intervention for conflict resolution, peace-building, and creating a culture of human rights demands a high standard of commitment, scholarship, and professionalism.

The Joint M.A. Program is supervised by the Joint Discipline Committee (JDC) consisting of members of the faculty of the University of Manitoba and the University of Winnipeg. The program is governed by the general procedures and regulations devised by the two universities for Joint Master's Programs.

Courses and thesis direction are offered at both institutions, and students completing the program may elect to receive their degress from both of the participating universities. Students may choose between a course/practicum option and a thesis option.

## Chair | The University of Manitoba

Chair, Joint Discipline Committee (until Jun/30/2012)
Sean Byrne, Professor of Peace and Conflict Studies
Chair | The University of Winnipeg
Associate Chair, Joint Discipline Committee (until Jun/30/2012)
Dean Peachey, Global College
For More Information on our M.A. program please visit: Joint M.A Program in Peace and Conflict Studies

## Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Master's Regulations section of this calendar. Graduates of a fouryear honors or four-year baccalaureate degree, either: (a) earned in peace and conflict studies, or conflict analysis and resolution; or (b) earned in another related disipline, such as education, law, social work, native studies, political studies, human ecology, human rights, women's studies, and sociology, among others. A high academic standing in previous university work with a minimum Grade Point Average (GPA) of 3.0 in the last 60 credit hours are eligible for admission to a course of study leading to the Master's degree. Approriate research capability, typicall demonstrated by authorship of a major research paper, for example, a senior undergraduate term paper, or thesis, or an article in a refereed publication. Applicants will also have a proficiency in the English language at levels required by the Faculty of Graduate Studies.

International students, please refer to the International Equivalency Criteria.

For more information on admission requirements please visit: Joint M.A Program Admission Requirements.

## Admission Deadline

The deadline for receipt of the Joint M.A. program application form and supporting documents for a September admission is January 15 for all students. Students who wish to apply for a University of Manitoba Graduate Fellowship (UMGF) need to have their applications in before January 15 (for a September admission).

## Program Requirements

Minimum requirements of the Faculty of Graduate Studies are found in the Graduate Studies Master's Regulations section of this calendar. The Joint M.A. Program in Peace and Conflict Studies has the following requirements:

Thesis Option: requirements are twelve credit hours of core courses*; three credit hours in research methods; three credit hours in an elective of practicum; a thesis proposal and defence, and a thesis examination. The research methods and electives can be taken from a list of approved courses at the 500 or 700 level.

Comprehensive Exam Option: requirements are twelve credit hours of core courses*; three credit hours in research methods; three credit hours in practicum; twelve credit hours of PACS electives; and a comprehensive examination. The research methods, and PACS electives can be taken from a list of approved courses at the 500 or 700 level.

After the completion of 9 credit hours of coursework within the Program, the student should work with their Advisor and the Department Head to determine their intention to pursue either (a) the comprehensive exam option, or (b) the thesis option.
*Core courses are:
PEAC 7010 Interpersonal Communication, Problem-Solving and Trust-Building
PEAC 7020 Theories of Conflict and Conflict Resolution PEAC 7110 International Human Rights and Human Security PEAC 7120 Peace-building and Social Justice

The Peace and Conflict Studies Joint M.A. Program Committee must approve all academic programs. This is normally done on the recommendation of the student's Advisor and/or Advisory Committee following consultation with the student.

For more information on the Joint M.A. program requirements please visit: Joint M.A. Program Requirements.

Peace and Conflict Studies Ph.D. Program,
The Ph.D. Program in Peace and Conflict Studies provides an interdisciplinary approach to analyze and resolve social conflicts through innovative peace research that examines the structural roots of social conflicts, divisions, and inequalities, and strategies for building community and promoting social justice. The focus of the program allows students to examine theory building, skills, and techniques of nonviolent practice and conflict resolution.

The objective of the Ph.D. program is to prepare educators, researchers, professionals, and public intellectuals to face some of the most challenging problems and tasks of our time by analyzing and resolving the complex issues facing the global milieu of peace and conflict using a variety of tools, processes, and methods common to conflict analysis and resolution, social justice and peace studies. World societies are increasingly aware that they must work together to face shared problems relating to, for example, economic development, environmental issues, health issues, and catastrophes such as famine. Graduates will have demonstrated the ability to analyze conflict, work collaboratively to resolve conflicts, and forge pathways to peace. These analytic and practical skills are important in numerous professional contexts and are increasingly in demand as international governmental and nongovernmental organizations play an increasing role in world affairs.

For More information on our Ph.D. program please visit our website: PhD Program in Peace and Conflict Studies

## Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations section of this calendar. Graduates of master's degree in Peace and Conflict Studies (or equivalent from other recognized universities) with a minimum Grade Point Average (GPA) of 3.0 in the last 60 credit hours are eligible for direct admission to a course of study leading to the doctoral degree. Graduates of master's degree in diverse disciplines at the University of Manitoba (or equivalent from other recognized universities) are also eligible for direct admission to the program pending successful completion of prerequisite courses to ground them in the field. Applicants will have a thesis-based master's degree, either earned in peace and conflict studies or a related discipline such as social work, education, or sociology, among others. In the event a master's degree is not thesis-based, research capability may be demonstrated by a major research paper from a recognized institution, or an independently completed research article published in a refereed journal. Applicants will also have a proficiency in the English language at levels required by the Faculty of Graduate Studies.

International students, please refer to the International Equivalency Criteria.

For more information on Ph.D. admission requirements please visit: PhD Program Admission Requirements.

## Admission Deadline

The deadline for receipt of the PhD Program application form and supporting documents for a September admission is December 15 for all students. Students who wish to apply for University of Manitoba Graduate Fellowships (UMGF) need to have their applications in before December 15 (for a September admission).

## Program Requirements

Minimum requirements of the Faculty of Graduate Studies are found in the Graduate Studies Ph.D. Regulations section of this calendar. The Ph.D. Degree in Peace and Conflict Studies requirements are 24 credit hours; twelve credits of required course work at the 700 level; six credit hours in a cognate area and 6 credits in research methodology, plus a candidacy examination, a thesis proposal, and a thesis. The six credit hours of cognate and methodology courses can be taken from a list of approved courses at the 500 or 700 level.

Students whose master's degree is not in Peace and Conflict Studies will normally be required to take some prerequisite courses in the field as occasional students in order to be admitted to the Program.

The Peace and Conflict Studies Graduate Program Committee must approve all academic programs. This is normally done on the recommendation of the student's Advisor and/or Advisory Committee following consultation with the student.

For more information on Ph.D. program requirements please visit: PhD Program Requirements.

## Peace and Conflict Studies

PEAC 7010 Interpersonal Communication, Problem-Solving, and Trust-building Cr.Hrs. 3
Examines the role of language and communication in conflict and conflict resolution. These theoretical and practice perspectives are fundamental to the field of conflict analysis and resolution/peace studies. The role of power, gender, and culture in communication and conflict are reviewed. Theories and practical skills for successful communication, collaborative problem-solving, and trust-building are explored. This class is relevant for addressing conflicts within diverse settings.

PEAC 7020 Theories of Conflict and Conflict Resolution Cr.Hrs. 3
Provides an overview of the theoretical foundations of the interdisciplinary field of conflict analysis and resolution, examining macro and micro theories regarding the causes of conflicts and approaches to their resolution. Conflicts are complex and take shape on multiple, interlocking planes.

The course focuses on theory and the implications of these theories for practice.

PEAC 7030 International Conflict Resolution and Peacebuilding Cr.Hrs. 3
Examines international conflict resolution and post-accord peace-building. Theories regarding the causes of international conflict are reviewed. Approaches for just and enduring resolution to international conflicts, building peace, and the promotion of a global civil society are explored.

PEAC 7040 Violence Intervention and Prevention Cr.Hrs. 3 Examines different definitions and types of violence from the interpersonal to the global levels (e.g., family violence, youth and gang violence, violence in the workplace, hate crimes, and war). Theories of human aggression and causes of violence, as well as approaches for violence intervention and prevention are reviewed. Theories of nonviolence are explored.

PEAC 7050 Intercultural Conflict Resolution and PeaceBuilding Cr.Hrs. 3
Examines the role of socially constructed identities and meaning in intergroup conflicts in a variety of contexts. Culture is broadly conceived to encompass a variety of identities, including differences along racial, ethnic, religious, gender, and class lines. Various models for resolution are reviewed. The nature of and ethics of intervention in cultures other than one's own are explored.

PEAC 7060 Special Topics in Peace and Conflict Studies 1 Cr.Hrs. 3
The topics addressed in this course will vary depending on faculty expertise and student need. Topics could include but will not be restricted to: "Gender and Conflict;" "Storytelling: Identity, Power and Transformation;" "Ethnic Conflict Analysis and Resolution;" "Children and War;" "Peace Education;" "Transformational Conflict Resolution;" "Role of Religion in Conflict and Peace."
PEAC 7070 Special Topics in Peace and Conflict Studies 2 Cr.Hrs. 3
The topics addressed in this course will vary depending on faculty expertise and student need. Topics could inlcude but will not be restricted to: "Gender and Conflict;" "Storytelling: Identity, Power and Transformation;" "Ethnic Conflict Analysis and Resolution;" "Children and War;" "Peace Education;" "Transformational Conflict Resolution;" "Role of Religion in Conflict and Peach."

PEAC 7110 International Human Rights and Human Security Cr.Hrs. 3
This course examines the shift in focus from state security to people. Human security is a bridge between the inter-related fields of development, human rights and conflict resolution. The course explores how these efforts at exploring the human condition can best be understood and applied.

PEAC 7120 Peacebuilding and Social Justice Cr.Hrs. 3 This course examines the role of peacebuilding in short term crisis intervention and longer term conflict transformation processes. Social justice is addressed at the systems level as it impacts the achievement of sustainable reconciliation. Crisis management in conflict settings, the root causes of conflict and its prevention are explored.

PEAC 7122 Dispute Systems Design Cr.Hrs. 3
Examines the role of conflict resolution within organizations and diverse settings (workplace, schools, communities, multiparty conflicts, international conflicts). The course focuses on analyzing how conflict is built into organizational structures and systems, and redesigning the system to produce effective human centres relations.

PEAC 7124 Gender, Conflict and Peacemaking Cr.Hrs. 3 Examines the role of gender in conflict and peacemaking in areas of armed conflict. Women tend to be impacted and respond to conflict in ways different from men. The course explores the theoretical and practical contributions of women activists, peace researchers and educators have made toward understanding the role of gender

PEAC 7126 Ethnic Conflict Analysis and
Resolution Cr.Hrs. 3
Examines theories of ethnic conflict and the intervention methods used by states, international organizations and conflict resolution and peach practitioners to analyze, manage and resolve ethnic conflicts. Case studies are used to explain conflict analysis and resolution and peacebuilding.

PEAC 7128 Storytelling: Identity, Power and
Transformation Cr.Hrs. 3
Examines the role of narrative and storytelling in conflict resolution, theory, research and practice. The relationship between language and power and destructive or constructive relationships is explored. The use of storytelling-based projects as a means of peacebuilding and community building are explored.

PEAC 7230 Gender, Conflict and Peacemaking Cr.Hrs. 3 Examines the role of gender in conflict and peacemaking in areas of armed conflict. Women tend to be impacted and respond to conflict in ways different from men. The course explores the theoretical and practical contributions women activists, peace researchers and educators have made toward understanding the role of gender.

PEAC 7240 Indigenous World Views and Approaches to Peacebuilding Cr.Hrs. 3
Examines indigenous models of peacebuilding from community level to national level. Emphasis is placed on restorative processes fundamental to cohesive relationships with others. The is achieved through ceremony, empathy, compassion, conflict resolution and restoration part of the peacebuilding models of indigenous peoples.

PEAC 7250 Restorative and Social Justice Cr.Hrs. 3 Examines the principles of restorative justice, the theoretical foundations of the restorative justice movement, and the development of new restorative justice programs. Restorative justice healing, re-integration and reconciliation are explored in a variety of contexts, including colonized and postcolonial indigenous communities.

PEAC 7260 Peace Education Cr.Hrs. 3
Examines the role of peace education as students seek to make sense of complicated and perilouis events in their society. The course provides students with a background in the area of social justice, peace studies and conflict resolution.

PEAC 7280 Children and War Cr.Hrs. 3
Examines the impact of international war, civil war, and

## ACADEMIC CALENDAR

University of Manitoba
genocide on young people. The role of gender, class, and culture are explored; as well as the role of peacemakers, governments, and communities for addressing these issues. The implications for both the political socialization of children as well as how young people may be actors in political solutions will be explored.

PEAC 7300 Special Topics 1: Children and War Cr.Hrs. 3 Examines the impact of international war, civil war and genocide on children. Today's children are tomorrow's world citizens, and their events will shape the future in unforeseeable ways. Young people are socio-economic and political agents, expressive through violence, peace work and other creative forms.

PEAC 7400 Special Topics 2: Directed Readings in Peace and Conflict Studies Cr.Hrs. 3
This course is designed for MA students in Peace and Conflidt Studies. Course requirements including readings and assignments will be selected and developed by the Professor in conjunction with the students' interests.

## Pharmacology and Therapeutics

Head: Fiona Parkinson
Campus Address/General Office: A203 Chown Building, 753 McDermot Avenue, Winnipeg, MB, R3E 0T6
Telephone: (204) 7893553
Fax: (204) 7893932
Email Address: pharmacology@umanitoba.ca
Website: http://umanitoba.ca/medicine/units/pharmacology
Academic Staff: Please refer to our website for Academic staff
information:http://www.umanitoba.ca/faculties/medicine/units /pharmacology/faculty members/index.html

Pharmacology is a key medical discipline dealing with the mode of action of therapeutic and recreational drugs and how the body metabolizes these drugs. The department offers both M.Sc. and Ph.D. degrees. A joint M.D.-Ph.D. program is available to students in Medicine.

## Fields of Research

Research and facilities are provided in several overlapping areas in which the department specializes. Current research interests include cardiovascular pharmacology, clinical pharmacology, hepatic pharmacology, neuropharmacology and renal pharmacology. The department is among very few pharmacology departments in North America that provide expertise and training in whole animal pharmacology.

## Research Facilities

The main research laboratories are located at two sites: the Bannatyne Campus ( $2^{\text {nd }}, 3^{\text {rd }}$ and $4^{\text {th }}$ floors of the Chown Building) and the St. Boniface Research Centre (4 $4^{\text {th }}$ floor). These locations are modern, well equipped facilities with equipment for experimentation in areas ranging from whole animal to molecular biology.
M.Sc. in Pharmacology and Therapeutics, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Qualified students holding B.Sc., M.Sc., B.Pharm., D.V.M. or M.D. degrees may apply for entry into Graduate Programs. Ancillary work in Pharmacology may be arranged for students pursuing their major studies in related departments.

## Application Deadlines

The Department of Pharmacology and Therapeutics allows students to begin their program on either 1 September or 1 January. For consideration of admission for each of these start dates, Canadian students should send in their applications with complete supporting documentation to the Faculty of Graduate Studies no later than four (4) months before the intended start date. Non-Canadian students should send in their applications with complete supporting documentation to the Faculty of Graduate Studies to arrive no later than seven (7) months before the intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Normally, a student will have a prospective advisor identified as a requirement for admission. Unique to our department, some students may enter into the research rotation program of the department in which the student spends two terms of three months in separate laboratories in order to gain experience in multiple techniques/areas. An advisor would be identified following these rotations. Course requirements will depend on prior degree held and research experience. Year 1 courses may include Drugs and human disease (PHAC 4030/4040 (6 credit hours), Cell Biology IMED 7090 ( 6 credit hours), Physiology PHGY 7240 ( 6 credit hours) and Fundamentals of Neuroscience IMED 7100 ( 6 credit hours). Year 2 courses include Pharmacology PHAC 7130 ( 6 credit hours).
Normally, one Statistics Course (3 credit hours) and at least one Seminar Course 1 (3 credit hours) are required. These may be taken at anytime in the program. In each year of the program students are expected to attend weekly seminars and present an oral research presentation on their work. At the end of each year, for the first two years, students take an oral exam which encompasses the year's course activities. Seminar courses include Cardiovascular Regulation and Drug Action PHAC 7040, Drug Distribution, Metabolism and Excretion PHAC 7060, Neuropharmacology PHAC 7160, Recent Advances in Pharmacology PHAC 7180,
Pharmacokinetics of Drug Disposition PHAC 7190, Liver Pharmacology PHAC 7200, Clinical Trial Design PHAC 7210 and Molecular Pharmacology PHAC 7220.

Second language reading requirement: none

Expected time to graduate: $2-3$ years

Ph.D. in Pharmacology and Therapeutics, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. A joint M.D.-Ph.D. program is available for students enrolled in Medicine.

## Application Deadlines

The Department of Pharmacology and Therapeutics allows students to begin their program on either 1 September or 1 January. For admission for each of these start dates, Canadian students should send in their applications with complete supporting documentation to the Department of Pharmacology and Therapeutics no later than four (4) months before the intended start date. Non-Canadian students should send in their applications with complete supporting documentation to the Department of Pharmacology and Therapeutics to arrive no later than seven (7) months before the intended start date.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Course requirements will depend on prior degree held and research experience. Entry with a B.Sc. (Hon) degree (or 4 year equivalent) may require a course schedule similar to that described for the M.Sc. degree above. Normally at least 3 seminar courses are required. Students entering with a graduate degree (M.Sc.) will have a course schedule which is dependent on previous course work.

Second language requirement: none

Expected time to graduation: $3-5$ years

## Pharmacology and Therapeutics -PHAC 7000 Level

PHAC 7040 Cardiovascular Regulation and Drug Action Cr.Hrs. 3
(Formerly 089.704) The normal homeostatic regulation of the cardiovascular system, its modification by drugs, and the sites and characteristics of drug actions affecting the cardiovascular system.

PHAC 7060 Drug, Distribution, Metabolism, and Excretion Cr.Hrs. 3
(Formerly 089.706) The mechanisms by which the body handles foreign chemicals and their effects on the characteristics of drug action.

PHAC 7110 Topics in Pharmacology Cr.Hrs. 6 (Formerly 089.711) Short research projects on various properties and effects of newer drugs. Presentation of oral and written reports by graduate students on research conducted. Open only to graduate students in Pharmacology.

PHAC 7130 Pharmacology Cr.Hrs. 6
(Formerly 089.713) Three hours a week both terms. Pharmacodynamics of the more important groups of drugs, the factors which control and modify their effects, and the basis for rational selection and administration of drugs in the treatment of disease. Prerequisite: permission of the department.

PHAC 7160 Neuropharmacology Cr.Hrs. 3
(Formerly 089.716) Seminars, tutorials and selected readings on topics concerning the mechanisms whereby drugs alter central and peripheral nervous activity. These will include drug modification of cellular excitability, neurotransmission and brain function.

PHAC 7180 Recent Advances in Pharmacology Cr.Hrs. 3 (Formerly 089.718) Lectures given by staff, followed by group discussions on current research, new developments in drugs and re-evaluation of currently employed drugs, their mechanism of action, etc. Three hours per week both terms. Open only to graduate students in Pharmacology.

PHAC 7190 Pharmacokinetics of Drug Disposition Cr.Hrs. 3 (Formerly 089.719) Lectures and problem-solving sessions directed at appropriate modelling of the disposition of drugs in the body.

PHAC 7200 Pharmacology of the Liver Cr.Hrs. 3 (Formerly 089.720) Seminars, tutorials and selected readings on topcs related to hepatic functions emphasizing the integrative role of the liver in homeostasis including vascular, autonomic and metabolic functions, toxicology and therapeutic aspects.

PHAC 7210 Clinical Trial Design Cr.Hrs. 3 (Formerly 089.721) Course designed to evaluate the essential elements of clinical trials as the basis for determining the potential value of interventions advocated for the treatment of diseases in humans. The format will include assigned readings, lectures, discussion andassignment preparation. Prerequisite: Undergraduate degree in the health sciences - previous related experience or relevant course credits will be considered as surrogate qualification to an undergraduate health sciences degree.

PHAC 7220 Molecular Pharmacology Cr.Hrs. 3 (Formerly 089.722) Lectures, seminars and selected readings on the mechanism of action of therapeutic and recreational drugs. Topics will include several categories of drug receptors and associated signal transducers in the context of drug action.

PHAC 7230 Fundamental in Pharmacology for Health Care

## I Cr.Hrs. 3

This course will build on foundational knowledge of human physiology and examine basic pharmacokinetic (drug metabolism) and pharmacodynamic (drug action) principles of specifi drug classes related to the autonomic nervous system, cardiovascular system (edema, hypertension, arrhythmia, angina, blood clotting, heart failure, hyperlipidemia), diabetes, thyroid, inflammation and pain. Remaining major drug classes will be covered in PHAC 7240. Students may take one or both courses. taking both coursesmust be done in the same academic year (Sept to April) or with permission from the Department Head. Course delivery will involve lectures followed by clinical case-based
tutorials.
PHAC 7240 Fundamentals in Pharmacology for Health Care II Cr.Hrs. 3
This course will build on foundational knowledge of human physiology and examine basic pharmacokinetic (drug metabolism) and pharmacodynamic (drug action) principles of specific drug classes related to the central nervous system (depression, psychosis, anxiety, epilepsy, movement disorders (e.g. Parkinson's)), infection (bacterial, viral,fungal), cancer, asthma, allergy, osteoporosis, gastrointestinal system, reproduction and special topics (pregnancy, geriatrics, drugs of abuse). Remaining major drug classes will be covered in PHAC 7230. Students may take one or both courses. Taking both courses must be done in the same academic year (Sept to April) or with permission from the Department Head. Course delivery will involve lectures followed by clinical case-based tutorials.

## Pharmacy

Dean: Neal M. Davies
Associate Dean(s): (Research): Yuewen Gong
Program Director: Hope Anderson
Campus Address/General Office: Apotex Centre, 750 Mc
Dermot Avenue, Winnipeg, MB
Telephone: (204) 474-9306
Fax: (204) 474-7617
Email Address: pharmacy@umanitoba.ca
Website: http://umanitoba.ca/pharmacy/programs
Academic Staff: Please see our website for Academic staff information:http://umanitoba.ca/faculties/pharmacy/staff/acad emic staff.html

Programs are offered leading to the degrees of Master of Science and Doctor of Philosophy. Thesis based research projects may be undertaken in the following fields of pharmaceutical sciences: pharmaceutics, biopharmaceutics, pharmacokinetics, pharmaceutical and medicinal chemistry, pharmaceutical microbiology, toxicology, pharmacognosy and in the clinically related areas of pharmacoeconomics, pharmacoepidemology, and pharmaceutical policy.

## Fields of Research

There are three established research groups: drug discovery and development, drug policy, and antibiotic resistance. Expertise in these areas include dosage form development, geriatrics, medicinal chemistry, natural health products, toxicology, photochemistry, pharmacokinetics and pharmacodynamics, antibiotics, nephrology, pharmacoeconomics, epidemology, health policy, and clinical pharmacy practice. Two teaching hospitals, the Health Sciences Centre and St. Boniface General Hospital, are involved with pharmacy research in the faculty.

Collaborative research programs are conducted among other university departments including Anatomy, Community Health Sciences, Pharmacology, Physiology, Medical

Microbiology, Pediatrics and Child Health, Internal Medicine, Cell Biology, and Canadian Centre for Agri-Food Research in Health and Medicine (CCARM). Funding sources include the Canadian Institute of Health Research, health related research grants, and pharmaceutical industry.

## Research Facilities

State-of-the-art equipment is available, including a wide range of biological, biochemical, chemical and microbiological instrumentation and computerization. Relevant pharmaceutical, chemical and medical publications are available in The Neal John Maclean Health Sciences and the Sciences and Technology Libraries; online search facilities are available through the University e-Library system.

## M.Sc. in Pharmacy,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students who do not possess the requirements for entry directly into the graduate program must take a pre Master's program of courses which will be individually prescribed. Please contact the Faculty for further information.

To enter the Master's program directly a student must have a B.Sc. degree in Pharmacy from the University of Manitoba or equivalent. Students from another faculty with a degree in a subject relevant to their research area will also be considered for graduate research.

## Admission to the M.Sc program depends upon the

 availability and willingness of a Faculty of Pharmacy faculty member to supervise the student, and resources to support the student's research. Thus, applicants should negotiate a tentative position with a Faculty of Pharmacy professor/researcher, prior to submitting a formal application to the Faculty of Graduate Studies.
## Application Deadlines

| Start Date | Canadian/U.S. | International |
| :--- | :--- | :--- |
| Regular (September) | June 1 | March 1 |
| Winter (January) | October 1 | July 1 |
| Spring (May) | February 1 | November 1 |
| Summer (July) | April 1 | January 1 |

mimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. All programs are established on an individual basis; the following general principles apply:

- Course work and original thesis are required.
- All students are required to complete the Pharmacy Seminar 1 and 2 courses (PHRM 7160 is a prerequisite for PHRM 7170).

## ACADEMIC CALENDAR

- Seminar presentations by graduate students, postdoctoral fellows, research associates, staff or invited lecturers are considered part of the program and must be attended by all graduate students.
- Students are expected to enroll on a 12-month basis and conduct research during the summer months.
- The minimum period of time necessary for the completion of the program is two years.

Second language reading requirement: none

Expected time to graduate: 2-3 years

## Ph.D. in Pharmacy,

 AdmissionAdmission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The normal procedure for a candidate is to complete a M.Sc. degree first. However, after one year of study towards the M.Sc. degree, if excellent performance is evident, a student may request a transfer to the doctoral program.

Admission to the Ph.D. program depends upon the availability and willingness of a Faculty of Pharmacy faculty member to supervise the student, and resources to support the student's research. Thus, applicants should negotiate a tentative position with a Faculty of Pharmacy professor/researcher, prior to submitting a formal application to the Faculty of Graduate Studies.

Application Deadlines - as per the M.Sc. program in Pharmacy.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of three years is required for the Ph.D. degree. The minimum number of courses required for the Ph.D. is 24 credit hours (18 at the $700 / 7000$ level) beyond the B.Sc. (Hons.) or 12 credit hours at the 700/7000 level beyond the M.Sc. All Ph.D. students are required to present a research seminar annually.

Second language requirement: none

Expected time to graduation: 3-5 years

## Pharmacy

PHRM 7080 Biopharmaceutics and Relevant
Pharmacokinetics Cr.Hrs. 3
(Formerly 046.708) Lecture course on biopharmaceutics with particular emphasis on the application of pharmacokinetic
principles in the design of conventional and sustainedrelease drug dosage forms, assessment of drug bioavailability, and selection of dosage regimens.

PHRM 7120 Medical and Scientific Writing Cr.Hrs. 3 (Formerly 046.712) Lectures and exercises on the preparation of medical and scientific manuscripts, including papers for publication or oral presentation, progress reports, reviews, short papers, grant applications and similar projects.

PHRM 7130 Novel Drug Delivery Systems Cr.Hrs. 3 (Formerly 046.713) Advanced course dealing with the role of drugs and drug products in the treatment of disease with emphasis on pharmaceutics and physical pharmacy. Current and future status of drug delivery systems, their design and evaluation will also be examined.

PHRM 7160 Pharmacy Seminar 1 Cr.Hrs. 3 (Formerly 046.716) Seminars and lectures on selected topics in pharmacy. Students are required to present both oral and written reports on research topics.

PHRM 7170 Pharmacy Seminar 2 Cr.Hrs. 3 (Formerly 046.717) Lectures and group discussions on recent developments in pharmaceutical fields. Students are required to give an oral presentation. (Prerequisite: PHRM 7160)

PHRM 7180 Pharmaceutical Implications of
Biotechnology Cr.Hrs. 3
(Formerly 046.718) Introduction to biotechnology in pharmaceutical sciences and pharmacy. Students will be introduced to concepts from molecular biology, immunology, biotechnology and pharmacogenomics. Implications of biotechnology in pharmaceutical biopharmaceutical research.

## Philosophy

Head: Carl Matheson
Campus Address/General Office: 453 University College
Telephone: (204)474 6878
Fax: (204)474 7586
Email Address: philgrad@cc.umanitoba.ca
Website: http://umanitoba.ca/arts/departments/philosophy
Academic Staff: Please see our website for Academic staff information:http://umanitoba.ca/arts/departments/philosophy

At the present time, the University of Manitoba offers only the M.A. degree in philosophy. Graduates of this program have been successful in gaining entry to some of the leading doctoral programs in philosophy in Canada, the USA and other continents. Approximately 40 Manitoba graduates are now in tenure-track faculty positions in philosophy in universities across North America. Other graduates have pursued careers in law, management and other fields.

## Fields of Research

The Department of Philosophy offers courses in all the major areas of philosophy: the history of philosophy (including

## 

## ACADEMIC CALENDAR 2012-2013 •

twentieth-century European philosophy), logic, epistemology, metaphysics, ethics, philosophy of religion, philosophy of law, philosophy of science, philosophy of language, social philosophy, political philosophy, aesthetics, and the philosophy of mind. The dominant orientation of the Department is analytic. Areas of greatest strength are: metaphysics, history and philosophy of science, history of philosophy, ethics, epistemology, social and political philosophy.

## M.A. in Philosophy, <br> Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Contact the Department of Philosophy for further information.

## Application Deadlines

The Department of Philosophy allows students entering the M.A. program to commence their studies on either 1 September or 1 January. Students entering the Pre-Master's program will usually find it necessary to commence their studies on 1 September. Canadian/U.S. students should send applications for admission, with complete supporting documentation, to the Faculty of Graduate Studies, not later than four (4) months prior to the intended start date of their program of study. International students should send applications, with complete supporting documentation, to the Faculty of Graduate Studies, not later than nine (9) months prior to their intended start date.

Those applying for major financial awards offered to entering students should apply directly to the Department of Philosophy, using the application form for the University of Manitoba Graduate Fellowship and including a sample of their recent philosophical writing, not later than January 15 for programs of study commencing in September.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students have three options available to them:

- 15 credit hours in Philosophy, and a major thesis; or
- 18 credit hours in Philosophy, and two research papers; or
- 24 credit hours in Philosophy.

Second Language Reading Requirement: A reading knowledge of one foreign language will be required if the thesis topic requires it.

Expected Time to Graduate: Students with undergraduate concentration in Philosophy equivalent to approximately nine full courses ( 54 credit hours) can complete the M.A. degree in one year. Students with a lesser degree of undergraduate
concentration will need more than one year to complete the degree.

## Ph.D. in Philosophy,

The Department of Philosophy does not currently offer a Ph.D. Program.

## Philisophy

PHIL 7110 Graduate Seminar Cr.Hrs. 6 (Formerly 015.711) Not currently offered.

PHIL 7120 Graduate Reading 1 Cr.Hrs. 3
(Formerly 015.712) A reading course for graduate students in philosophy. Subject matter may be arranged to suit the special needs and interests of students; the course might, for example, be devoted to modal logic, or the free will problem, the ontological argument, phenomenology, the philosophy of W.V. Quine, etc. As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7130 Graduate Reading 2 Cr.Hrs. 3
(Formerly 015.713 ) A reading course for graduate students in philosophy, similar to PHIL 7120 (or 015.712). As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7140 Epistemology 1 Cr.Hrs. 3
(Formerly 015.714) A study of selected topics in epistemology.

PHIL 7150 Epistemology 2 Cr.Hrs. 3
(Formerly 015.715) A study of selected problems in epistemology.

PHIL 7160 Metaphysics 1 Cr.Hrs. 3 (Formerly 015.716) A study of selected topics in metaphysics.

PHIL 7170 Metaphysics 2 Cr.Hrs. 3
(Formerly 015.717) A study of selected problems in metaphysics.

PHIL 7180 Graduate Reading 3 Cr.Hrs. 3
(Formerly 015.718 ) A reading course for graduate students in philosophy, similar to PHIL 7120 (or 015.712). As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7190 Graduate Reading 4 Cr.Hrs. 3
(Formerly 015.719) A reading course for graduate students in philosophy, similar to PHIL 7120 (or 015.712). As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7200 Topics in Ethics 1 Cr.Hrs. 3
(Formerly 015.720) Basic topics in moral theory. Readings will include contemporary articles and books. As the course content will vary from year to year, students may take this course more than once for credit.

## 

ACADEMIC CALENDAR

PHIL 7210 Topics in Ethics 2 Cr.Hrs. 3
(Formerly 015.721) Basic topics in moral theory. Readings will include contemporary articles and books. As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7230 Topics in Logic and the Philosophy of Logic 2 Cr.Hrs. 3
(Formerly 015.723) Selected topics in mathematical logic, inductive logic, the philosophy of logic, and the methodology of the natural and formal sciences. Students may not hold credit for both PHIL 7230 (or 015.723) and the former 015.705. As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7400 Independent Research Paper 1 Cr.Hrs. 0 This course is for students taking Option B in the M.A. program in Philosophy. The student will supply a paper with original research under the guidance of the research paper advisor. Course graded Pass/Fail.

PHIL 7410 Independent Research Paper 2 Cr.Hrs. 0 This course is for students taking Option B in the M.A. program in Philosophy. The student will supply a paper with original research under the guidance of the research paper advisor. Course graded Pass/Fail.

## Physical Therapy

Head: Jenneth Swinamer
Campus Address/General Office: R106-771 McDermot Avenue, Bannatyne Campus
Telephone: (204) 789-3897
Fax: (204) 789-3927
Email Address: SMR Information@umanitoba.ca
Website: http://umanitoba.ca/medrehab/pt
Academic Staff: Please refer to our website for Academic staff information: http://umanitoba.ca/medrehab/pt staff.html

The Master of Physical Therapy (M.P.T.) is an entry-topractice education credential that is for individuals who do not have a previous degree in physical therapy and/or for those individuals who are not eligible to practice in Canada with their current academic preparation.

The Department of Physical Therapy, University of Manitoba is seeking accreditation by Physiotherapy Education Accreditation Canada (PEAC) for the Master of Physical Therapy program. The Department has submitted a letter of intent to participate in the pre-accreditation process. The pre-accreditation process denotes an affiliation with PEAC and indicates that the education program is considering accreditation standards in its planning stages. Submission of the letter of intent and participation in the pre-accreditation process does not assure that the program will be granted accreditation status when the final program is implemented.

## Admission

The following is a summary of the admission requirements. Equivalent academic courses completed at the University of Manitoba or recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in the applicant information available from the School of Medical Rehabilitation website: http://umanitoba.ca/medrehab/pt

Completion of a previous undergraduate degree, in any area of study, minimum grade point average of 3.25 in the last 60 credit hours of study; successful completion of at least 24 credit hours in one regular fall/winter session (from September to April); equivalent IB and/or AP courses will be accepted in lieu of prerequisite courses; successful completion of the Multiple Mini-Interview; a minimum grade of a 3.0 or a " $B$ " in the following prerequisite courses:*

Human Anatomy (3 credit hours)

Human Physiology (3 credit hours)
Introductory Biology with genetics content (3 credit hours)

Introductory Psychology (6 credit hours)
Childhood Psychology (3 credit hours)

Developmental Psychology Adolescence to Old Age (3 credit hours)

Introductory Statistics (3 credit hours)

English Literature (6 credit hours)
*All prerequisite courses need to be completed by the fall term in the year prior to entry.

## Application Deadline

The final date for receipt of applications for admission is November 15.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies, found in the Graduate Studies Regulations section of this Calendar. M.P.T. program Supplemental Regulations are available on the Physical Therapy, School of Medical Rehabilitation website:
http://umanitoba.ca/faculties/graduate studies/media/Physic al Therapy 2011 01.pdf

English Language Proficiency: For those not educated in English, the Department of Physical Therapy complies with the English language requirements of Canadian Alliance of Physiotherapy Regulators (http://www.alliancept.org/). These minimum scores are required to be considered eligible to sit the national Physiotherapy Competency Examination upon graduation, in order to practice safely in Canada. Details are

## ACADEMIC CALENDAR

available on the Physical Therapy, School of Medical Rehabilitation website:
http://umanitoba.ca/faculties/medicine/units/medrehab/pt/pt english.html

Expected time to graduate: 2 years

Students in the M.P.T. program must complete 102 credit hours of course work. All academic and clinical placement courses and a professional portfolio must be successfully completed in order to graduate.

Clinical placements are an integral part of the M.P.T. program and typically follow major academic components to consolidate knowledge and skills learned in class.

Student physical therapists are required to provide a health history and immunization record. A student will not be permitted to attend clinical placements until all health, immunization, CPR, mask fit and records check requirements are met.

Health Requirements: Standard Health Record Form Packages are sent to new Physical Therapy students upon acceptance into the program. New students in Physical Therapy are required to return forms to their department by dates published yearly in the Health Record Form Packages. Second year students are required annually to review and update immunizations as necessary.

Cardiopulmonary Resuscitation Certification: All students of the Department of Physical Therapy are required to obtain certification in cardiopulmonary resuscitation. Certification must be at the Basic Rescuer Level. New students in the program must provide proof of certification within the first 2 weeks of classes of the academic year in which they commence classes. This certification must have an issue date on or after July 1 of the year the student commences classes in the program. Second year students must provide proof of re-certification by October 1 of their second year in the program. This certification must have an issue date during or after the last week of August of the current year. Certification must remain current for all fieldwork experiences.

Mask Fit Certification: Clinical education sites require students to maintain mask fit certification. Information on acquiring this certification is provided to new students with the Health Record Form Packages. All students are required to maintain mask fit certification throughout the program.

Criminal Record Check and Child Abuse Registry
Check: Students are advised that clinical education sites require that students complete a Criminal Record Check and a Child Abuse Registry Check. New students in the Master of Physical Therapy program must provide results of a Child Abuse Registry Check and a Criminal Record Check within the first 2 weeks of classes of the academic year in which they commence classes. Both checks must have an issue date after August 1 of the year the student commences classes in the program. Second year students must provide updated results by October 1 of their second year in the
program. Both checks must have an issue date during or after the last week of August of the current year.

## Physical Therapy

PT 6100 Theorectical Basis of Physical Therapy Practice Cr.Hrs. 5
Through lecture and seminars, students are introduced to the theory of physical therapy knowledge, skills, attitudes and behaviours. Course content will include conceptual frameworks, principles surrounding safe and ethical professional conduct in the current health care environment.

## PT 6110 Foundations to Evidenced-Based Practice 1

 Cr.Hrs. 1Students will learn to critically evaluate the evidence for physical therapy practice and rehabilitation and will be challenged to become involved in contributing to the evidence for their future practice.

PT 6120 Clinical Skills for Physical Therapy Assessment Cr. Hrs. 4
Through lecture, tutorial and laboratory sessions, students are introduced to physical therapy assessment skills across the lifespan. Basic assessment of physical, psychosocial and cognitive abilities which impact on activity and participation at the individual and community level will be covered.

PT 6130 Applied Sciences for Physical Therapy 1 Cr. Hrs. 4
Through lecture, tutorial and laboratory sessions, students will learn the application of exercise and pain physiology to body structure and function and how it relates to activity and participation.

PT 6140 Anatomy Cr.Hrs. 3
Through lecture and laboratory sessions, students learn detailed musculoskeletal anatomy of the upper and lower limbs, head, neck and trunk. Joints, ligaments, muscles, nerves and vessels are included, and integration of structure and function is emphasized. Students also review the gross anatomy of the cardiorespiratory system and the abdominopelvic viscera, and are introduced to the anatomy of the spinal cord and peripheral nerves relevant to reflex activity.

PT 6190 Clinical Education Cr.Hrs. 1
One week introductory experiential learning period in the clinical community with 3-4 hours of preparatory sessions prior to the week, and 3-4 hours of follow up including reflective journal. Course evaluated on pass/fail.

PT 6221 Clinical Skills for Physical Therapy in Neuromusculoskeletal Conditions 1 Cr.Hrs. 6
Through lecture, tutorial and laboratory sessions, students apply physical therapy assessment, diagnostic and treatment skills for upper quadrant neuromusculoskeletal conditions across the lifespan.

PT 6222 Clinical Skills for Physical Therapy in

## ACADEMIC CALENDAR

Neuromusculoskeletal Conditions 2 Cr.Hrs. 4
Through lecture, tutorial and laboratory sessions, students apply physical therapy assessment, diagnostic and treatment skills for lower quadrant
neuromusculoskeletal conditions across the lifespan.
PT 6230 Applied Sciences for Physical Therapy 2 Cr.
Hrs. 6
Through lecture, tutorial and laboratory sessions, students will learn the application of anatomy, biomechanics, physiology, pathology and exercise to the neuromusculoskeletal system. Scientific and medical theoretical basis for physical therapy intervention will be covered.

PT 6250 Integrated Practice for Neuromusculoskeletal Conditions Cr.Hrs. 3
Students integrate relevant information for physical therapy management of neuromusculoskeletal conditions through small group work. Case studies may include but are not limited to: rheumatoid conditions, osteoporosis, thermal injuries, amputations, pregnancy, chronic pain syndrome, fibromyalgia syndrome and hemophilia.

PT 6260 Physiotherapy Practice and Professional Issues 1 Cr. Hrs. 3
Through lecture and tutorial sessions, students evaluate their clinical learning record and provide reflection on their recent clinical placement, and address various professional topics to build on their knowledge and application of business, ethical and legal principles for physiotherapy practice.

PT 6291 Neuromusculoskeletal Clinical Education 1 Cr.Hrs. 6
First of two six-week experiental learning periods in the clinical community, providing opportunity for students to assess and treat clients with musculoskeletal disorders under supervision. Includes 3-4 hours of preparatory sessions prior to the placements, and 3-4 hours of follow up including debriefing group discussion and presentation of reflective journals.

PT 6292 Neuromusculoskeletal Clinical Education 2 Cr.Hrs. 6
Second of two six-week experiential learning periods in the clinical community, providing opportunity for students to assess and treat clients with neuromusculoskeletal disorders under supervision. Pre-requisite PT 6291.

PT 6310 Foundations to Evidenced-Based Practice 2 Cr. Hrs. 2
Students will learn to identify appropriate research and /or evaluation questions and appropriate methodologies for the rehabilitation context and the general process of conducting a research/evaluation study to facilitate future participation in research.

PT 7121 Clinical Skills for Physical Therapy Neurological Conditions Cr. Hrs. 5
Through lecture, tutorial and laboratory sessions, students apply physical therapy assessment, diagnostic and treatment skills for neurological conditions across the
lifespan.
PT 7122 Clinical Skills for Physical Therapy Cardiorespiratory Conditions Cr. Hrs. 4
Through lecture, tutorial and laboratory sessions, students apply physical therapy assessment, diagnostic and treatment skills for cardiorespiratory conditions across the lifespan.

PT 7130 Applied Sciences for Physical Therapy 3 Cr. Hrs. 6
Through lecture,tutorial and laboratory sessions, students will learn the application of anatomy, physiology and pathology to the neurological and cardiorespiratory systems. Scientific and medical theorectical basis for physical therapy intervention will be covered.

PT 7150 Integrated Practice for Cardiorespiratory and Neurological Conditions Cr. Hrs. 3
Students integrate relevant information for physical therapy management of complex cardiorespiratory and neurological conditions through lectures, labs and small group work with a focus on interprofessional collaborative practice. Case studies may include but are not limited to: geriatrics, developmental disorders, spinal cord injuries, ARDS, critical care, etc.

PT 7160 Physiotherapy Practice and Professional Issues 2 Cr. Hrs 3
Through lecture and tutorial sessions, students evaluate their clinical learning record and provide reflection on their recent clinical placement, and address various professional topics to build on their knowledge and application of business, ethical and legal principles for physiotherapy practice.

PT 7291 Cardiorespiratory and Neurosciences Clinical Education 1 Cr. Hrs. 6
First of two six-week experiential learning periods in the clinical community, providing opportunity for students to assess and treat clients with cardiorespiratory disorders and neurological disorders under supervision. Includes 34 hours of preparatory sessions prior to the placements, and $3-4$ hours of follow up including debriefing group discussion and presentation of reflective journals.

PT 7292 Cardiorespiratory and Neurosciences Clinical Education 2 Cr. Hrs. 6
Second of two six-week experiential learning periods in the clinical community, providing opportunity for students to assess and treat clients with cardiorespiratory disorders and neurological disorders under supervision. Pre-requisite PT 7291.

PT 7390 Elective Clinical Education Cr.Hrs. 6 One six-week experiential learning period in the clinical community to complement previous clinical placements, address gaps in previous clinical placements and /or to explore emerging practice roles in physiotherapy.

PT 7400 Selectives in Advanced Physiotherapy Practice Cr. Hrs 3
Of the three (3) topics in which advanced physiotherapy

## ACADEMIC CALENDAR

theory and/or skills are explored with clinical applications, two topics are required: advanced manual therapy and advanced exercise assessment and prescription. Students are to select one additional topic which may include but is not limited to: acupuncture, community health, healthy aging, healthy child, non-clinical physical therapy roles, and sports injury management.

PT 7500 Physical Therapy Evaluation/Research Project Cr. Hrs. 6
Under the supervision of a faculty advisor the student will develop and complete a physical therapy or rehabilitation focused research or evaluation project including a formal presentation of the project.

## Physician Assistant Program

Program Director: Ian Jones
Campus Address/General Office: P121-770 Bannatyne Avenue
Telephone: (204) 272.3094
Fax: (204) 272.3068
Email Address: paep@cc.umanitoba.ca

## Website:

http://umanitoba.ca/faculties/medicine/education/paep/index. html
Academic Staff: Please see our website for Academic staff information:http://umanitoba.ca/faculties/medicine/education/ paep/index.html

## Physician Assistant Education Program

The PAEP offers coursework leading to the Master of Physician Assistant Studies (MPAS) degree. The Program currently accepts 12 students per year. Graduates are eligible for registration with the College of Physicians and Surgeons of Manitoba as physician assistants. Graduates are also eligible to sit for the Physician Assistant Certification Council of Canada national certification exam. Physician assistants currently work in the province of Manitoba in a variety of medical and surgical specialties. Physician assistants are also employed in the provinces of Ontario, Alberta, New Brunswick, as well as in the Canadian Forces.

Housed within the Faculties of Medicine and Graduate Studies the PAEP incorporates the concepts of student centred learning, adult learning principles, and professional education with the clinical competencies necessary for effective physician assistant practice.

## Fields of Research

The Program faculty's research focus lies in the area of physician assistant education and PA-related health policy. Students in the PAEP are required to complete a research project and are encouraged to cultivate research interests in a range of clinical and quality improvement areas.

## Research Facilities

The PAEP is housed at the Bannatyne Health Sciences campus. Students have access to the resources of the Neil John MacLean Health Sciences Library.

## Master of Physician Assistant Studies, Admission

The PAEP admission requirements are those outlined as the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar.

This Program is open to graduates of a four year Bachelor's degree, preferably in a health sciences field, from a college or university recognized by the University of Manitoba, with a minimum GPA of 3.0 in the last two full years ( 60 credit hours) of study. Undergraduate courses in Human Anatomy, Physiology and Biochemistry are required if they were not taken in the Bachelor's degree. Microbiology and Psychology are asset courses.

## Technical Standards Requirement

(Essential Skills and Abilities for Admission, Promotion and Graduation)

Please be advised that the Faculty of Medicine has adopted a Technical Standards Policy Document that describes the requisite skills and abilities that must be met in order to participate in the PAEP. The policy may be obtained from the PAEP office.

All applicants are required to submit 3 Application Forms: Faculty of Graduate Studies Application, PAEP Supplementary Application and Adult Criminal Records and Child Abuse Registry Self Declaration Form. All applicants must be eligible for registration with the College of Physicians and Surgeons of Manitoba on the PA Education register.

## Admission Deadlines

There is only one intake per year, at the beginning of September. Application deadline is the last working day in November each year, for admission the following September. Please visit the PAEP website for exact dates each year at
http://umanitoba.ca/faculties/medicine/education/paep/pros students/index.html.

## Program Requirements

The PAEP is a two year program. The first year consists of 56 credit hours of coursework, delivered in 3 semesters from September - July as a combination of lecture, clinical skills training, and seminars. The second year includes 34.5 credit hours ( 48 weeks) of core clinical rotations. All courses in the PAEP are required major courses, and students must maintain full-time registration throughout the Program.

Second language requirement: none

Expected time to graduation: 26 months

## Physician Assistant Education Program

PAEP 7000 Physiology and Pathophysiology for Physician Assistants Cr.Hrs. 3
This brief introduction is designed to impart an understanding of normal physiological functioning of the human body. This basic science course builds upon the entry knowledge of the Physician Assistant student, by presenting the pathophysiology of disease by organ systems. The emphasis is on the homeostatic mechanisms for all the major organ systems. Evaluation will be by successful completion of exercises, class participation and written examination, demonstrating to faculty proficiency in course principles.

PAEP 7002 Physiology and Pathophysiology for Physician Assstants II Cr.Hrs. 3
A continuation of the material presented in Physiology and Pathophysiology for Physician Assistants. A basic science course which builds upon the entry knowledge of the PAEP learner by presenting normal physiology and the pathophysiology for disease by organ systems. Prerequisite: Admission to PAEP Year 1

PAEP 7010 Human Anatomy for Physician
Assistants Cr.Hrs. 3
This brief comprehensive introduction is designed to impart an understanding of gross functional anatomy of the human body. This basic science course builds upon the entry knowledge of the student by presenting clinical human anatomy, correlated to clinical applications, assessment and pathology of disease. Evaluation will be by successful completion of exercises, class participation and written examination, demonstrating to faculty proficiency in course principles.

PAEP 7030 Professional Studies of Physician Assistants Cr.Hrs. 3
This course is designed to provide the student with an understanding of the role the Physician Assistant plays within the structure of the Canadian Health Care System. This introduction is designed to impart an understanding of the interaction between the various stakeholders. Ethical considerations in health care and the legal aspects of the PA role in Canada will be addressed. Evaluation will be by successful completion of a presentation (evaluated by classmates), participation in ethical problem solving exercises and written examination, demonstrating to faculty proficiency in course principles. Students are expected to submit a research paper on an ethics topic of choice and write a short-answer examination at the end of the course.

PAEP 7042 Biochemistry for Physician Assistants Cr.Hrs. 1 A brief introduction to medical biochemistry.

PAEP 7044 Statistics for Physician Assistants Cr.Hrs. 1 A brief introduction to biostatistics, epidemiology, and public health.

PAEP 7046 Genetics for Physician Assistants Cr.Hrs. 1 A brief introduction to medical genetics.

PAEP 7048 Pediatrics for Physician Assistants Cr.Hrs. 3 A brief, comprehensive didactic introduction to the field of obstetrics and gynecology designed to prepare the physician assistant to diagnose and treat, within his or her scope of practice, common obstetrics and gynecology conditions as would be encountered in a primary care setting. Prerequisite: Successful completion of MPAS year 1.

## PAEP 7050 Obstetrics and Gynecology for Physician

 Assistants Cr.Hrs. 3A brief, comprehensive didactic introduction to the field of obstetrics and gynecology designed to prepare the physician assistant to diagnose and treat, within his or her scope of practice, common obstetrics and gynecology conditions as would be encountered in a primary care setting. Prerequisite: Successful completion of MPAS year 1.

PAEP 7052 Patient Assessment for Physician Assistants I Cr.Hrs. 2
A comprehensive introduction to the clinical assessment of a patient, delivered as a group of three courses. Part I introduces basic history-taking and physical exam skills. Patient Assessment II and Patient Assessment III extend these skills to other clinical settings.

PAEP 7054 Patient Assessment for Physician Assistants

## II Cr.Hrs. 2

Continues developing the skills in history taking and physical examination introduced in patient Assessment for Pas I. Learners are introduced to the Standardized Patient Program. Prerequisite: Admissions to PAEP Year 1.

PAEP 7056 Patient Assessment for Physician Assistants III Cr.Hrs. 2
A brief, comprehensive introduction to diagnostic imaging techniques and interpretation of diagnostic images designed to enable Physician Assistants, within their scope of practice, to diagnose and treat medical, surgical, and infectious disease. Prerequisite: Admission to PAEP Year 1.

PAEP 7068 Adult Medicine for Physican Assistants

## 1 Cr.Hrs. 6

A comprehensive, system-based introduction to the clinical disciplines of medicine. Adult Medicine I is the first part of a two-course sequence; content areas include
endocrinological, gastrointestinal and neurological, medicine, ophthalmology, and hematology/oncology.

PAEP 7072 Maternal and Child Health for Physician Assistants I Cr.Hrs. 2
A brief, comprehensive introduction to obstetrics and pediatrics designed to impart an understanding of normal pregnancy and development and to allow the Physician Assistant, within his or her scope of practice, to diagnose and treat medical, surgical, infectious and developmental conditions within the fields of obstetrics and pediatrics. Prerequisite: Admissions to PAEP Year 1

PAEP 7074 Maternal and Child Health for Physician Assistants II Cr.Hrs. 2
A brief, comprehensive introduction to obstetrics and pediatrics designed to impart an understanding of normal pregnancy and development and to allow the Physician Assistant, within his or her scope of practice, to diagnose

## ACADEMIC CALENDAR

and treat medical, surgical, infectious, and development conditions within the fields of obstetrics and pediatrics. Prerequisite: Admission to PAEP Yeah 1

PAEP 7076 Maternal and Child Health for Physician Assistants III Cr.Hrs. 2
A brief, comprehensive introduction to obstetrics and paediatrics designed to impart an understanding of normal pregnancy and development and to allow the Physician Assistant, within his or her scope of practice, to diagnose and treat medical, surgical, infectious, and developmental conditions within the fields of obstetrics and paediatrics. Prerequisite: Admission to PAEP Year 1

## PAEP 7078 Adult Medicine for Physician Assistants

## II Cr.Hrs. 6

A comprehensive, system-based introduction to the clinical disciplines of medicine. Adult Medicine II is the second part of a two-course sequence; content areas include cardiovascular, musculoskeletal, renal, dermatologic and respiratory medicine, and otolaryngology.

PAEP 7082 Diagnostic Imaging for Physician
Assistants Cr.Hrs. 1
A brief, comprehensive introduction to diagnostic imaging techniques and interpretation of diagnostic images designed to enable Physician Assistants, within their scope of practice, to diagnose and treat medical, surgical and infectious disease. Prerequisite: Admissions to PAEP Year 1

PAEP 7084 Microbiology for Physician Assistants Cr.Hrs. 1 A brief introduction to Medical Microbiology. Prerequisite: Admissions to PAEP Year 1.

PAEP 7090 Principles of Psychiatry for Physician Assistants Cr.Hrs. 3
A brief, comprehensive introduction designed to impart an understanding of mental and behavioral health. Based on the special needs of a patient populations, the patient's presentation and unique contributing factors, the PA will be able to evaluate and analyze the patient's needs, providing the required specialty assessment for the psychiatric patient. Evaluation will be by successful completion of a practical and written evaluation, demonstrating the faculty proficiency in the course material.

PAEP 7100 Principles of Surgery for Physican Assistants Cr.Hrs. 3
A brief, comprehensive introduction designed to impart an understanding of surgical diseases. Upon completion, the Physical Assistant student, with their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious diseases from a surgical perspective. Evaluation will be by successful completion of a practical and written evaluation, demonstrating to faculty proficiency in the principals of surgery and application of surgical skills.

PAEP 7110 Emergency and Critical Care for Physician Assistants Cr.Hrs. 3
A brief, systems-based comprehensive introduction designed to impart an understanding of emergency and intensive care medicine. This course will equip the Physician Assistant student with the skills necessary to diagnose, refer and treat medical, surgical and infectious disease emergencies and life threatening conditions. The Advanced Cardiac Life Support (ACLS) course is a mandatory component of the Emergency and Critical Care course. It is
organized by the Department of Emergency Medicine and is designed to provide the student with advanced knowledge and experience on how to handle a cardiac arrest. Most Physician Assistant students find the course invaluable regardless of what specialty they enter. Evaluation is based on successful completion of a practical evaluation, problem solving exercises, displaying proficiency in clinical skills and a written examination, demonstrating to faculty proficiency in course principles.

PAEP 7150 Year 1 Comprehensive Examination Cr.Hrs. 0 A pass/fail, multiple choice examination designed to assess students' knowledge of clinically relevant Year 1 material prior to entry into the clinical year.

## PAEP 7200 Family Medicine for Physician

Assistants Cr.Hrs. 6
A brief, clinical rotation designed to impart a practical understanding of family medicine. Upon completion the Physician Assistant student will, within their scope of practice, be able to diagnose, refer and treat the medical, surgical and infectious disease conditions related to the field of family medicine.

PAEP 7202 Family Medicine for Physician
Assistants Cr.Hrs. 6
A clinical rotation designed to impart a practical understanding of Family Medicine, to prepare the physician assistant, within his or her scope of practice, to diagnose and manage conditions and issues related to primary care medicine and general practice.

PAEP 7204 Clinical Elective for Physician Assistants I Cr.Hrs.1.5
This course consists of two weeks of clinical time, offering an introduction to the clinical discipline of the Physician Assistant learner's choice. Course objectives will be developed by the learner in collaboration with PAEP faculty members.

PAEP 7206 Clinical Elective for Physician Assistants II Cr.Hrs.1.5
This course consists of two weeks of clinical time, offering an introduction to the clinical discipline of the Physician Assistant learner's choice. Course objectives will be developed by the learner in collaboration with PAEP faculty members.

PAEP 7210 Clinical Internal Medicine for Physician Assistants Cr.Hrs. 3
A brief, clinical rotation designed to impart a practical understanding in the area of internal medicine. There will be an internal medicine speciality focus in this rotation versus the general exposure seen in Family Medicine. Upon completion, the Physician Assistant student will, within their scope of practice, be able to diagnose, refer and treat the medical, surgical and infectious conditions related to the field of internal medicine.

PAEP 7212 External Electives for Physician Assistant Students Cr.Hrs. 0
A clinical rotation of varying length designed to provide a physician assistant student not from the University of Manitoba with clinical education and training in a medical discipline of the student's choice at a University of Manitoba clinical teaching unit. Course credit is assigned by the
student's home institution.
PAEP 7220 Clinical Surgery for Physician Assistants Cr.Hrs. 3
A brief, clinical rotation designed to impart a practical understanding of surgical diseases and surgical procedures. Upon completion, the Physician Assistant student will, within their scope of practice, be able to diagnose, refer and treat the medical, surgical and infectious conditions related to the field of clinical surgery.

PAEP 7230 Clinical Orthopedics and Sports Medicine for Physician Assistants Cr.Hrs. 3
A brief, clinical rotation designed to impart a practical understanding of orthopedics and sports medicine practiced within this specialty. Upon completion, the Physician Assistant student will, within their scope of practice, be able to diagnose, refer and treat the medical, surgical and infectious conditions related to this field. The Physician Assistant student will become familiar with and perform commonly practiced procedures such as casting and splinting extremities, closed reduction, cast removal, joint injection, joint aspiration and surgical assisting.

PAEP 7240 Clinical Pediatrics for Physician Assistants Cr.Hrs. 3
A brief, clinical rotation designed to impart a practical understanding of health and diseases in the field of pediatrics. Upon completion, the Physician Assistant student, within their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious conditions related to the field of pediatric medicine.

PAEP 7250 Clinical Psychiatry for Physician
Assistants Cr.Hrs. 3
A brief, clinical rotation designed to impart a practical understanding of mental health and psychiatric disease to the Physician Assistant. Upon completion, the Physician Assistant student, within their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious conditions related to psychiatric medicine.

PAEP 7270 Clinical Emergency Medicine for Physician Assistants Cr.Hrs. 3
A brief, clinical rotation designed to impart a practical understanding of emergency medicine and intensive care. Upon completion, the Physician Assistant student, within their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious conditions related to emergency medicine and critical intensive care medicine. Students with extensive emergency medical service backgrounds will be allowed to focus on a critical care rotation.

PAEP 7280 Clinical Obstetrics and Gynecology for Physician Assistants Cr.Hrs. 3
A brief, clinical rotation in obstetrics and gynecology designed to impart a practical understanding of reproductive health. Upon completion, the Physician Assistant student, within their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious conditions related to the field of reproductive, obstetrical and gynecologic health.

PAEP 7290 Clinical Anesthesia for Physician

## Assistants Cr.Hrs.1.5

A brief, clinical rotation designed to impart a practical
understanding of anesthesia. Upon completion, the Physician Assistant student, within their scope of practice, will be able to undertake airway management, ventilation and understand the principles of regional and general anesthesia. Students with extensive respiratory backgrounds are required to complete this rotation and display understanding and application of the Physician Assistant role in anesthesia.

PAEP 7300 Comprehensive Assessment of Clinical SKills Cr.Hrs. 0
The Comprehensive Assessment of Clinical Skills is a comprehensive summary of clinical performance using informatin from PA-ITRES, mini-CEX evaluations, and observed histories/physical exams. This assessment will be graded on a pass/fail basis.

PAEP 7350 PAEP Final Project Cr. Hrs. 0
A capstone project that may take a variety of formats as dictated by Program faculty. Students will, insultation with a faculty mentor, develop and research a topic for presentation to faculty and peers.

## Physics and Astronomy

Head: K.S. Sharma
Campus Address/General Office: 301 Allen Building
Telephone: 4749817
Fax: 4747622
Email Address: physics@physics.umanitoba.ca
Website: http://www.physics.umanitoba.ca/
Academic Staff: Please see our website for Academic staff information:http://www.physics.umanitoba.ca/

The department offers opportunities for graduate study in several experimental and theoretical fields of contemporary interest, leading to the Master of Science and Doctor of Philosophy degrees.

## Fields of Research

Astronomy and Astrophysics: The Formation, Evolution, and Structure of Galaxies; The Late Stages of Stellar Evolution (Neutron Stars, Magnetars, Black Holes); Supernova Remnants and our Milky Way Galaxy; Advanced genetic algorithms for astrophysical data modeling (magnetic fields in molecular clouds; HI galaxy disks; gravitational lens systems).

Atomic, Molecular and Optical Physics: Study of atomic and molecular interactions in dense fluids by laser light scattering and far infrared absorption; atomic collision dynamics studied using electron energy-loss spectroscopy, laser excitation techniques and time-correlated particle detection.

Condensed Matter Physics: Magnetic properties of materials, including their dependence on crystal structure and morphology; surface magnetism of fine particles or thin films; crystalline transformations of amorphous magnetic materials; phase transitions and critical phenomena in ferromagnetics, spin-glasses and site-disordered systems;
high Tc superconductors; mesoscopic wave physics of complex materials, including ultrasonic wave transport in strongly scattering media, Anderson localization of ultrasound, phononic crystals, field fluctuation spectroscopy, dynamic imaging in complex media, and ultrasonic characterization of soft food biomaterials; nanomagnetism, biological applications of magnetic nanoparticles, nanoparticle magnetism, magnetism in thin film systems, neutron scattering; theoretical studies of inhomogeneous soft matter; the structure and phase behaviour of block copolymers and polymer brushes; structure, phase behaviour, and order-disorder transitions in lipid bilayers and lipid mixtures.

Mass Spectrometry: Precise atomic mass determinations of stable and unstable nuclides; time-of-flight mass spectrometry of large molecules (particularly biomolecules) and molecular clusters.

Physics of Nanoscale Systems: Electronic and Optical Properties of Low-dimensional Electron Systems and Nanostructures, such as systems exhibiting quantum hall effects, quantum dots and quantum rings; physics of grapheme nanostructures and related carbon systems,, electronic and magnetic properties of DNA, DNA mispaires, spin dynamics and Rashba effects in quantum dots.

Subatomic Physics: Properties of nuclei far from stability (decay energies, atomic masses, nuclear structure); nucleon-nucleon systems (spin observables, particle production); tests of symmetry principles (charge symmetry, parity); strange quark structure of the proton; Laser and Ion Trapping; measurements of parity-violation in electron scattering and extraction of the weak mixing angle and fundamental physics with cold and ultracold neutrons.

Theoretical Physics: Low temperature excitations in ordered crystalline magnets; investigations of reduced dimensionality on the magnetic and electronic properties of solids; the effects of disorder on the physical properties of solids as studied using renormalization group methods, fractal geometry and random matrix theory; phase transitions and critical phenomena; theory and computer simulation of defect processes in crystalline materials; relativistic dynamics of composite system; Kaluza-Klein theory and string dynamics; evolution problems in quantum, classical and semi-classical mechanics using the rigorous methods of mathematical physics; few-body scattering theory; electromagnetic interactions in both few-body systems and complex nuclei; relativistic approaches to the nuclear manybody problem; Non-Archimedean Analysis (study of field extensions of the real numbers that also contain infinitely small and infinitely large numbers) and applications in physics; black holes and quantum gravity, quantum computation, information theory and non-linear dynamics.

Medical Physics: Research is also carried out at CancerCare Manitoba, the Health Sciences Centre and at the National Research Council Institute for Biodiagnostics. Functional imaging and the development of advanced imaging modalities and reconstruction algorithms, in-vivo portal dosimetry of radiation therapy; the development of low dose breast imaging systems; image guide adaptive radiotherapy and multi-objective optimization techniques; quality control
for diagnostic imaging and radiation therapy; high speed dose and image reconstruction and simulation; biomedical Magnetic Resonance Imaging and instrumentation; development of new technologies and methods for positron emission tomography (PET) imaging.

Biophysics: Biophysical and bioengineering approaches for studying immune cell trafficking; development of microfluidic devices for biological and medical applications; the facilities we have include cell culture, imaging, microfabrication for soft - lithography.

## Research Facilities

As an integral part of the research programs outlined above, a variety of major research facilities exist within the Department of Physics and Astronomy. These include an HP RX5670 ITANIUM2 quad CPU computer server with 96 Gb RAM, HP Smart Array 5304 controller, 28x146 Gb U320 disk subsystem, Group members access the server through a high speed, switched network, we also have a HP ZX200 ITANIUM2 development server with a 9Gb RAM, and several PCs for code development and testing. As well, the department has several ultrasonic spectrometers, including a TEMPO laser ultrasound interferometer, a high resolution mass spectrometer, four time-of-flight mass spectrometers for large ions and biomolecules with masses up to approximately $10,000 \mathrm{u}$, a S.H.E. dilution refrigerator for the production of millikelvin temperatures, a Philips X-ray diffraction, a Quantum Design PPMS 6000 magnetometer/susceptometer and a custom-designed SQUID-based magnetometer, and a local network of computers connected to the university's central computer facilities. A good machine shop and electronics shop are located in the Physics Department. Both liquid nitrogen and helium are available locally for low temperature research.

Research facilities at various national and international laboratories, including Argonne National Laboratory (Chicago), TRIUMF (Vancouver, we are now a full member of the TRIUMF consortium), Los Alamos National Laboratory (Los Alamos, N.M.), the Thomas Jefferson National Accelerator Laboratory (Newport News, VA), and the Max Planck Institute for Nuclear Physics (Heidelberg, Germany) are extensively used by members of the subatomic physics research group.

Research in Astronomy and Astrophysics makes use of data obtained with various telescopes including NASA's Chandra X-ray Observatory and the Hubble Space Telescope, and with the International Galactic Plane Survey.

Students also have access to various pieces of clinical and research related equipment at CancerCare Manitoba, the Health Sciences Centre and at the National Research Council of Canada Institute for Biodiagnostics. These include clinical linear accelerators, CT, MRI, Ultrasound, PET, and other imaging systems as well as various sources of radiation and dosimetry equipment. High performance GPU based computer and software for the simulation of radiation transport are also available.

## 

ACADEMIC CALENDAR

Research in Condensed Matter Physics is undertaken at the nuclear reactors NRU (Chalk River), OPAL (Sydney) and ILL (Grenoble).

The University of Manitoba is a major institution in the Western Canada Research Computing Grid (WestGrid) and is the location of a large high performance computing cluster accessible to all researchers across Canada through Compute/Calcul Canada.

## M.Sc. in Physics,

 AdmissionAdmission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. To enter the Master's program directly, a student must have an Honours B.Sc. degree in Physics and Astronomy, Mathematics and Physics, or Engineering Physics from the University of Manitoba or the equivalent. Students without the degree entrance requirements will have their undergraduate program evaluated and may be required to complete a pre-Master's program of selected University of Manitoba undergraduate courses.

## Application Deadlines

The Department of Physics and Astronomy allows students to begin their program on 1 September, 1 January, 1 May, or 1 July. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three and a half (3.5) months before the intended start date. Non-Canadian students should send their applications with complete supporting documentation to the Faculty of Graduate Studies to arrive no later than six and a half (6.5) months before the intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Department of Physics and Astronomy has certain supplementary regulations. Information about these regulations as well as a description of research programs in Physics is available at: physics.umanitoba.ca

A Master's degree in physics normally consists of both coursework and a thesis. For students in the Comprehensive Medical Physics M.Sc. program, the course load is increased and the thesis requirement is replaced by research project.

The Master's program with thesis consists of two or three courses from the 700/7000 series offered by the department or from another department offering courses suitable for the candidate's program. In special cases, courses may be drawn from the 400 series as listed. The program of study extends through a minimum period of twelve months.

Frequently two summers of research work plus one winter of research and coursework are required to complete the program. In addition to coursework, these students must submit a thesis and defend it orally.

The Comprehensive M.Sc. program in medical physics is a two-year (18-month, course work, 6 -month research project) program which requires 36 credits. A clinical research project in an approved laboratory and the submission of a research report is also required. On completion of the coursework and research project, the student will be required to pass a comprehensive oral examination.

Second language reading requirement: none

Expected time to graduate: 2 years

Ph.D. in Physics,

## Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, the normal procedure to be a candidate for a Ph.D. degree is to complete an M.Sc. degree first. However, students with an honours degree from the University of Manitoba or equivalent may be accepted directly into the PhD program.

## Application Deadlines

The Department of Physics and Astronomy allows students to begin their program on either 1 September, 1 January, 1 May, or 1 July. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three and a half (3.5) months before the intended start date. Non-Canadian students should send their applications with complete supporting documentation to the Faculty of Graduate Studies to arrive no later than six and a half (6.5) months before the intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Department of Physics and Astronomy has certain supplementary regulations. Information about these regulations as well as a description of Research Programs in Physics is available on the web: www.physics.umanitoba.ca

International students entering the Ph.D. program are strongly encouraged to write and obtain minimum grade of 650 on the GRE physics subject examination prior to applying for the Ph.D. program.

The main program of studies is selected from one of the major fields of research listed above in Section 2.2, and is
supplemented by an ancillary program which takes into account the student's interests and breadth of experience.

Ancillary subjects must be chosen from a field of physics distinct from the major area of study or from other departments (e.g., Mathematics) offering suitable courses. In consultation with the student, a program of study is decided by a committee with the student's advisor as chair.

Students must pass a candidacy exam and submit a thesis which describes their research work and which will be examined according to the general regulations.

Second language requirement: none
Expected time to graduation: 4 years

## Physics and Astronomy

PHYS 7250 Seminar course in Advanced Physics Cr.Hrs. 6 (Formerly 016.725) Selected topics in advanced physics may be offered from time to time by the faculty or visiting lecturers. Credit for this course will be determined by the head of the department of Physics. Prerequisite: consent of instructor.

PHYS 7260 Mass Spectroscopy Cr.Hrs. 3
(Formerly 016.726) Two lectures per week for one term. The course covers the techniques and applications of mass spectroscopy. Special emphasis is given to the general principles of ion optics for use in the design of modern instruments.

PHYS 7360 Medical Radiation Physics Cr.Hrs. 3 (Formerly 016.736) The relevant physics of the production and interaction of radiation beams used in both diagnostic and therapeutic medicine will be covered. Such beams included X - and g-rays, particle beams, visible and I.R. radiation, microwaves, and ultrasound. Prerequisite: PHYS 4560 (or 016.456) or consent of instructor.

PHYS 7370 Radiotherapy Physics Cr.Hrs. 3 (Formerly 016.737) The calculations and measurements necessary to determine the radiation dose distribution in patients receiving radiotherapy will be presented. Newer treatment modalities, e.g., pion therapy and hyperthermia will be discussed. Prerequisites: PHYS 4510 (or 016.451), PHYS 4560 (or 016.456), or consent of instructor.

PHYS 7380 Radiation Biology Cr.Hrs. 3
(Formerly 016.738) The interaction of ionizing and nonionizing radiations with living systems. The relevance to Radiotherapy. Nuclear medicine and diagnostic radiology. Prerequisite: PHYS 1020 (or 016.102)/016.103 (or 016.121) or consent of instructor.

PHYS 7390 Radiation Protection Cr.Hrs. 3 (Formerly 016.739) lonizing radiation including X-ray, g-ray, neutrons, alpha-, beta-, and heavy ion-particle sources, bioeffects, and protection principles are covered. Nonionizing radiation, including laser light, radio- frequency waves, ultraviolet and infrared light, and ultrasound, sources,
bioeffects, and exposure protection guidelines are studied. Prerequisites: PHYS 7360 (or 016.736 ) and PHYS 7380 (or 016.738 ) or consent of instructor.

PHYS 7400 Medical Imaging Cr.Hrs. 3
(Formerly 016.740) Fundamental principles of image formation, analysis of the characteristics of medical images, parametric description of image quality; application to transmission radiography. Prerequisite: consent of instructor.

PHYS 7410 Diagnostic Methods Cr.Hrs. 3
(Formerly 016.741) Medical imaging in terms of signal acquisition, data processing, image reconstruction, special techniques; applications in fluoroscopy, computed tomography, radionuclide imaging, ultrasound, nuclear magnetic resonance imaging. Prerequisite: PHYS 7400 (or 016.740).

PHYS 7440 Advanced Topics in Physics Cr.Hrs. 3 (Formerly 016.744) Selected topics in advanced physics. This course may be offered from time to time by the faculty or visiting lecturers. Prerequisites: consent of instructor.

PHYS 7460 Methods in Medical and Health Physics 1 (Medical Imaging and Radiation Protection) Cr.Hrs. 3 (Formerly 016.746 ) This practical course is designed to give students hands-on experience with equipment, clinical techniques and methods of analysis in medical imaging and health physics. Topics such as: dosimetry of unsealed sources, radiation shileding design and surveys, meter calibration, decontamination and plume dispersal, CT, Ultrasound, X-ray and Nuclear Medicine imaging techniques, mammography and quality assurance in medical and health physics will be covered. Students are required to take both PHYS 7460 (or 016.746 ) and PHYS 7470 (or 016.747) which will be offered in consecutive years. Note: only students accepted to the Medical Physics Program will be allowed to register for this course

PHYS 7470 Methods in Medical and Health Physics 2 (Radiotherapy and Radiation Biology) Cr.Hrs. 3 (Formerly 016.747) This practical course is designed to give students hands-on experience with equipment, clinical techniques and methods of analysis in radiotherapy and radiation biology. Topics such as: error analysis and data reduction, dosimetry of ionizing radiation, radiotherapy treatment planning, calibration, HDR brachytherapy, microdosimetry and quality assurance in medical physics, will be covered. Students are required to take both PHYS 7460 (or 016.746 ) and PHYS 7470 (or 016.747) which will be offered in consecutive years. Note: only students accepted to the Medical Physics Program will be allowed to register for this course.

PHYS 7500 Condensed Matter Physics 1 Cr.Hrs. 3 (Formerly 016.750) The principles of electrical and vibrational properties of primarily crystalline structures. Topics include free electron theory, electron-electron interactions, screening, phonons, electron-phonon coupling and transport properties. Not to be held with the former 016.712.

PHYS 7510 Condensed Matter Physics 2 Cr.Hrs. 3 (Formerly 016.751) A comprehensive survey of advanced topics in condensed matter physics. The topics may change from year to year but include collective excitations, defects, localized states, superconductivity, Josephson effect,

## 

## ACADEMIC CALENDAR

superfluids, quantum Hall effect. Not to be held with the former 016.712. Prerequisite: PHYS 7500 (or 016.750) or consent of instructor.

PHYS 7530 Physics of Magnetism Cr.Hrs. 3 (Formerly 016.753) A comprehensive survey of magnetism and magnetic materials. Topics include the origins of magnetic interactions, types of magnetic order, domain structures, magnetization processes, dynamics, thin films, applications. Not to be held with the former 016.721. Prerequisite: PHYS 7500 (or 016.750) or consent of instructor.

PHYS 7540 Statistical Mechanics Cr.Hrs. 3
(Formerly 016.754) The principles of statistical mechanics. Topics include statistical ensembles, entropy, Fermi gas, Bose-Einstein condensation, superfluidity, phase transitions and equilibria, fluctuations, Fluctuation-Dissipation and Wiener-Khintchin theorems, liquids and dense gases. Not to be held with the former 016.719. Prerequisite: PHYS 4370 (or 016.437) or consent of instructor.

PHYS 7550 Advanced Statistical Mechanics Cr.Hrs. 3 (Formerly 016.755) An advanced treatment of phase transitions and critical phenomena in a variety of systems. Topics include solvable models, mean field theory, Landau theory, scaling laws, series methods, renormalization group methods, linear response theory, generalized rigidity. Not to be held with the former 016.719. Prerequisite: PHYS 7540 (or 016.754) or consent of instructor.

PHYS 7560 Relativistic Quantum Mechanics Cr.Hrs. 3 (Formerly 016.756) Relativistic single particle equations for bosons and fermions, quantization of fields, interacting fields, elementary quantum electrodynamics, covariant perturbation theory and Feyman diagrams. Not to be held with the former 016.743. Prerequisite: PHYS 7420 (or 016.742) or consent of instructor.

PHYS 7570 Nuclear Physics Cr.Hrs. 3
(Formerly 016.757) Hadron and lepton scattering, the nucleon-nucleon interaction, nuclear structure, nuclear shell model, nuclear excitations and decay, hadronic interactions and decays, the quark model. Not to be held with the former 016.705 . Prerequisite: PHYS 4510 (or 016.451 ) or consent of instructor.

PHYS 7580 Advanced Topics in Nuclear Physics Cr.Hrs. 3 (Formerly 016.758) A selection of advanced topics in nuclear and intermediate energy physics. Not to be held with the former 016.706. Prerequisite: PHYS 7570 (or 016.757) or consent of instructor.

PHYS 7590 Electromagnetic Theory Cr.Hrs. 3 (Formerly 016.759) Maxwell's equations, electromagnetic potentials, gauge conditions, conservation laws, Green function methods, diffraction theory, simple radiating systems, Lagrangian derivation of Maxwell's equations and the covariant structure of electromagnetism. Not to be held with the former 016.715.

PHYS 7600 Applied Electromagnetism Cr.Hrs. 3 (Formerly 016.760) Wave guides and resonant cavities, charged particles collision theory, Bremsstrahlung, radiation of moving charged particles, multipole radiation. Not to be held with the former 016.715. Prerequisite: PHYS 7590 (or
016.759 ) or consent of instructor.

PHYS 7630 Particle Physics Cr.Hrs. 3
(Formerly 016.763) Basic particles and interactions, symmetries and conservation laws, the quark model, deep inelastic scattering, electroweak theory, introduction to QCD. Not to be held with the former 016.730. Prerequisite: PHYS 7420 (or 016.742 ) or consent of instructor.

PHYS 7660 Astronomy 1: The Phenomenology of Galaxies Cr.Hrs. 3
(Formerly 016.766) Describes astronomical standards such as intensity magnitudes, colour and metalicity; the properties of stars and the interstellar medium; galactic structure, kinematics, and the evolution of galactic components.

PHYS 7670 Astronomy 2: Galactic Dynamics Cr.Hrs. 3 (Formerly 016.767) A continuation of PHYS 7660, this course provides mathematical descriptions of potential theory, disk dynamics and spiral structure, collisions between galaxies, and dark matter. Additional topics are galaxy evolution, large-scale structure of the universe and cosmology. Prerequisite: PHYS 7660 (or 016.766)

PHYS 7680 Astrophysics 1: Stars Cr.Hrs. 3
(Formerly 016.768) Covers the basic physical concepts required to extract qualitative estimates of astrophysical parameters, describes several aspects of observational astronomy, and it emphasizes in a more mathematical way the astrophysics of stellar structure and evolution.

PHYS 7690 Astrophysics 2: Interstellar Matter and Galaxies Cr.Hrs. 3
(Formerly 016.769) Emphasizes the physics of interstellar matter and dust grains, gaseous nebulae, basic
hydrodynamics, shock waves, and supernova remnants.
Prerequisite: PHYS 7680 (or 016.768)
PHYS 7700 Research Project in Medical Health Physics Cr.Hrs. 0
(Formerly 016.770 ) Students undertake a relevant research project in an approved laboratory. At least six months of fulltime research is expected. The research project report shall be submitted in a style and length as specified by the department. A comprehensive oral examination will follow the submission of the project report.

PHYS 7710 Quantum Optics Cr.Hrs. 6
(Formerly 016.771) Matter-radiation interaction, spectral line broadening, quantization of the radiation field, degree of coherence of light; number, coherent, chaotic and squeezed states of light, quantum theory of detection, laser theory, resonance fluorescence, light scattering, non-linear quantum optics. Not to be held with the former 016.708 Prerequisite: permission of instructor

PHYS 7720 QUANT MECH 1 Cr.Hrs. 3
Topics include the concepts and foundations of quantum mechanics, continuous and discrete symmetries, time dependent perturbation theory including interaction with electromagnetic fields and scattering theory. Prerequisite: PHYS 4380 (C+). Not to be held with the former PHYS 7420 or 016.772.

## Physiology

## M.Sc. in Physiology,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## For sessions beginning:

September
January
May
July

## International

February 1
August 1
December 1
February 1

## Program Requirements

A minimum of fifteen (15) credit hours in 700/7000 level courses in Physiology. In most cases, students will be required to complete PHGY 7240 Medical Physiology (6 cr. Hrs.)

Second language reading requirement: none

Expected time to graduate: 2-5 years

## Ph.D. in Physiology,

## Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

## Program Requirements

Nine (9) credit hours beyond the requirements for the M.Sc. degree. Additional courses as deemed appropriate by the

Student's Advisory Committee, with the approval of the Physiology Graduate program Committee. Advanced Topics in Physiology (PHGY 7180) (3) is a required course for Ph.D. students.

Second language requirement: none

Expected time to graduation: 3-7 years

Page URL,
http://crscalprod1.cc.umanitoba.ca/Physiology.catx

## Physiology

PHGY 7010 Readings in Physiology Cr.Hrs. 6
(Formerly 090.701) Tutorial course covering recent contributions in an area of physiology related to a student's Canadian
July 1
Noverfgy 7030 Special Physiology Cr.Hrs. 6
Marchormerly 090.703) Seminar and reading course on
Marchyssiology of particular systems.
May 1
PHGY 7150 Cardiac Physiology Cr.Hrs. 3
(Formerly 090.715) Tutorial and reading course on cardiac physiology; emphasis on the energetics of cardiac contraction and its relationship to ultrastructural and biochemical properties of the heart.

PHGY 7160 Vascular Physiology Cr.Hrs. 3
(Formerly 090.716) Lectures and seminars on physiology of blood vessels including hemodynamics, rheology of blood, and the function and structure of smooth muscle.

PHGY 7170 Endocrine and Metabolic Physiology Cr.Hrs. 3 (Formerly 090.717) Special topics in endocrine and metabolic physiology emphasizing current concepts.

PHGY 7180 Advanced Topics in Physiology Cr.Hrs. 3 (Formerly 090.718) Advances in selected areas of physiology, research proposals related to the students's area of interest, procedures for grant writing and refereeing grant proposals, evaluation of citations and impact factors.

PHGY 7190 Research Topics in Physiology Cr.Hrs. 3 (Formerly 090.719) Seminars on research presentations by staff and senior students in physiology.

PHGY 7230 Molecular and Cellular Aspects of Organ Physiology Cr.Hrs. 3
(Formerly 090.723) Tutorial course: Function of various organs in the light of current concepts regarding structure and function at the molecular and cellular level.

PHGY 7240 Medical Physiology Cr.Hrs. 6 (Formerly 090.724) Lecture, seminar, tutorial, and demonstration course dealing with fundamental biophysical processes, function of major organ systems, and physiological control mechanisms. Pathophysiological functions and their relation to disease will be discussed where appropriate.

## ACADEMIC CALENDAR

PHGY 7260 Advanced Neurological Sciences Cr.Hrs. 3 (Formerly 090.726) Seminar, readings and lecture course covering original research papers leading to the most significant advances in the neurological sciences. Emphasis is placed on student comprehension of major research directions in the broad field of neurological sciences. Prerequisite: PHGY 7240 (or 090.724) or equivalent and consent of instructor.

PHGY 7270 Physiology of Striated Muscle Cr.Hrs. 3 (Formerly 090.727) A lecture and seminar course dealing with the physiology and biophysics of skeletal and cardiac muscle.

PHGY 7290 Physiology of the Airways Cr.Hrs. 3 (Formerly 090.729) A lecture and seminar course dealing with the physiology of the airways in the intact animal and with the role of smooth muscle in controlling airway function. The fundamental properties of airway smooth muscle in controlling airway function will be emphasized. Prerequisite: PHGY 7240 (or 090.724) or equivalent and consent of instructor.

PHGY 7300 Molecular Endocrinology Cr.Hrs. 3 (Formerly 090.730) A lecture and seminar course on advances in molecular and cellular aspects of endocrinology and other systems. The course is taught by members of the Gene Technology Group and topics will reflect current research interests. These include the roles of hormones/growth factors in cancer, growth and development, and reproduction, and the regulation of hormone gene families. This course is designed for individuals with knowledge in the areas of molecular and/or cell biology. Prerequisite: consent of instructor.

PHGY 7310 Principles of Electronics for Life
Sciences Cr.Hrs. 3
(Formerly 090.731) Lectures on basic principles of electricity and electronics of particular application to electrophysiology.

PHGY 7320 Instrumentation for Electrophysiology Cr.Hrs. 3 (Formerly 090.732) Lectures on the application of principles of electricity and electronics to electrophysiology.
Prerequisite: PHGY 7310 (or 090.731).
PHGY 7330 Physiology of Smooth Muscle Cr.Hrs. 3 (Formerly 090.733) A lecture and seminar course dealing with the biophysics, electrophysiology, pharmacology and biochemistry of the smooth muscle in the major organ systems.

PHGY 7340 Cardiovascular Electrophysiology Cr.Hrs. 3 (Formerly 090.734) A comprehensive lecture and seminar course on the electrical activity of the cardiovascular system. The fundamental electrical properties of cardiac and vascular muscle cell membranes, currents and channels as studied by intracellular microelectrodes, voltage clamp and patch clamp techniques will be stressed.

PHGY 7350 Cardiovascular Pathophysiology Cr.Hrs. 3 (Formerly 090.735) A comprehensive lecture course on disease in the cardiovascular system. Topics to be covered include methods of analysis of cardiac viability, heart failure, arrhythmias, heart diseases (congenital, valvular, pericardial, cardiomyopathy), hypertension, stroke, atherosclerosis and myocardial infarction. Prerequisite: PHGY 7240 (or 090.724).

PHGY 7360 Trends in Cardiovascular Sciences Cr.Hrs. 3 (Formerly 090.736) A comprehensive seminar-based course dealing with recent advances in cardiovascular research given by local fellows and prominent scientists. Students will be expected to participate in the series and present their own research data seminar. Prerequisite: PHGY 7240 (or 090.724).

PHGY 7370 Cardiovascular Molecular Biology Cr.Hrs. 3 (Formerly 090.737) A lecture course dealing with the structure and regulation of genes responsible for normal cardiac muscle and vascular system fluctuations as well as a survey of the genetic contribution to cardio-vascular disease (atherosclerosis, hypertension, heart failure). Prerequisite: PHGY 7240 (or 090.724).

PHGY 7380 Cardiovascular Cell Biology Cr.Hrs. 3
(Formerly 090.738) A comprehensive lecture course on morphology, biochemical composition and function of the cardiac and smooth muscle cell, with particular emphasis on developmental and injury-related issues. Topics include the description of various cardiac cells and their immediate extracellular environment, intercellular communication, cardiac development, control of cell cycle, hyperplasia and hypertrophy, cardiac growth factors, mechanism of injury and cell death, regeneration, heat shock proteins and cardioprotection.

PHGY 7390 Gene Therapy Cr.Hrs. 3
(Formerly 090.739) Advanced course detailing new frontiers in the application of gene therapy and technological protocols currently utilized in treating cardiovascular diseases such as cardiomyopathy, hypertension, congenital birth defects and restenosis. Prerequisites: PHGY 7370 (or 090.737), PHGY 7380 (or 090.738) or 082.724 or permission of the course coordinator.

PHGY 7400 Cellular and Molecular Biology of the Vascular System Cr.Hrs. 3
(Formerly 090.740) This course provides current concepts in vascular biology at the molecular level as well as the pathogenesis and treatment of vascular diseases for the purpose of graduate studies. Students may also learn up-todate techniques in research of vascular cell biology and the diagnosis of vascular diseases through laboratory demonstrations.

## Plant Science

Head: Peter B.E. McVetty
Campus Address/General Office: 222 Agriculture Building
Telephone: (204) 4748221
Fax: (204) 4747528
Email Address: plantscience gradstudies@umanitoba.ca
Website: http://umanitoba.ca/afs/plant science
Academic Staff: Please see our website for Academic staff information:http://umanitoba.ca/afs/plant science

The Department of Plant Science is one of seven departments in the Faculty of Agricultural and Food Sciences and draws together expertise in both the applied and basic sciences. Since its origin in 1937, the Department has maintained a leading role in agricultural research in

## 

## ACADEMIC CALENDAR

2012-2013 •

Canada. Its achievements in rapeseed and canola breeding and in cereal breeding and cytogenetics are known worldwide. Faculty members have major research programs in agronomy and plant protection, plant breeding and genetics, and plant physiology-biochemistry (elaborated below). The Department of Plant Science maintains an active research program directed at developing superior cultivars and new production systems suited to the changing needs of Manitoba farmers and the agri-food industry.

There is a wide range of employment opportunities for M.Sc. and Ph.D. graduates from the Department of Plant Science, including research and teaching positions at universities throughout the world, research and extension positions with the federal and provincial governments and positions in private industry.

## Fields of Research

Programs of study and research are offered in the following areas, leading to the M.Sc. and Ph.D. degrees.

Agronomy and Plant Protection: Organic cropping systems; Long term organic vs conventional crop production systems; Farmer participatory organic crop breeding; Croplivestock integration; Tropical agriculture. Agronomy and cropping systems research; Cover crops; Plant and soil interactions; Plant and soil management to address agricultural and environmental challenges. Weed biology, ecology and eco-physiology; Integrated weed management; Impact of management techniques on weed community assembly; Crop/weed competition; Extracellular DNA in the environment. Canola and wheat pathology; Breeding for disease resistance; Applied and molecular approaches to understanding the epidemiology of plant pathogens; Biological control and mode of action by antagonists on plant pathogens; Isolation, identification and characterization of microbial genes involved in pest control; SSH techniques in host-pathogen resistance; IPM sustainable agricultural systems. Molecular mechanisms of plant-microbe interactions, with emphasis on plant defenses and pathogen counterdefenses; Mechanisms of biological control of plant diseases; Role of secondary metabolites in plant defense and defense signalling; Role of inducers and suppressors in induced disease resistance and susceptibility.

Plant Breeding and Genetics: Wheat breeding and genetics; Modelling crop development and yield; Genetics of resistance to leaf spotting diseases; Development and evaluation of breeding methodologies; Genetics of herbicide resistance; Development of Fusarium Head Blight resistant germplasm; Development of wheat for fuel and feed. Perennial grain breeding including grains and oilseeds; Companion crop development; Plant growth and development and its utilization for selection in perennial crop breeding programs; Polyculture development. Hybrid rapeseed/canola cultivar development; Conventional and herbicide tolerant rapeseed/canola breeding; Development of end-use quality; Breeding and genetics of disease resistance; Brassica agronomic research. Plant genomics and molecular biology; Genetic mapping, gene cloning, gene functional analysis and molecular marker development; Gene manipulation in glucosinolates, fatty acids and seed coat colour; Resistance gene identification for blackleg,
sclerotinia and clubroot in Brassica crops. Gene expression in plants during resistant or susceptible interactions with fungal or bacterial pathogens; Genetic engineering of disease resistance; Bioinformatics.

Plant Physiology-Biochemistry: Physiology and molecular biology of embryogenesis; Role of hemoglobin during embryo development; Identification of candidate genes required for proper embryo formation. Physiology; Functional genomics and biotechnology of cereal crops; Plant hormone metabolism (emphasis on gibberellin); Abiotic stress tolerance; Feedstock development for bioproducts.

## Research Facilities

The Department of Plant Science has excellent research facilities including well-equipped laboratories, ample greenhouse space and controlled-environment chambers, and a horticultural-research storage building. A 60 hectare field research station is situated on campus within walking distance of the Plant Science Building. As well the Department has a 165 hectare field-research station located at Carman, Manitoba on prime agricultural soil.
M.Sc. in Plant Science, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

Research and thesis

A minimum of 15 credit hours of coursework (including PLNT 7250 Plant Science Seminar) of which at least 6 credit hours will be courses at the 700/7000 level. The 6 credit hours at the 700/7000 level cannot include PLNT 7250 Plant Science Seminar or ANSC 7500 Methodology in Agricultural and Food Sciences.

Second language reading requirement: none

Expected time to graduation: two years

Ph.D. in Plant Science, Admission

## ACADEMIC CALENDAR

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. In addition, students must take PLNT 7420 Advanced Plant Science Seminar for which they must register each year of their Ph.D. program. The 12 credit hours at the 700/7000 level cannot include ANSC 7500 Methodology in Agricultural and Food Sciences.

Second language reading requirement: none

Expected time to graduation: three years

## Plant Science

PLNT 7120 Special Problems in Plant Science Cr.Hrs. 3 Reading or assignment or research on specific aspects of crop development, crop production, weed science, plant pathology, plant biochemistry or plant physiology.
Prerequisite: written consent of department head.
PLNT 7130 Topics in Plant Breeding and Genetics Cr.Hrs. 3 An in-depth study of selected topics of current interest in the fields of plant breeding and genetics. Prerequisite: written consent of department head.

PLNT 7160 Advanced Genetics Cr.Hrs. 3
Procedures and designs in genetic experimentation, the fundamentals of gene action, mutation and mutagens, linkage and recombination, extranuclear inheritance. Prerequisite: PLNT 4330 or consent of instructor.

PLNT 7162 Plant Genomics Cr.Hrs. 3
Detailed analysis of advanced genomic techniques, experimental approaches, and progress in current plant genomic projects.

PLNT 7170 Advanced Plant Breeding Cr.Hrs. 3 Advanced training in modern methods of plant breeding. Prerequisite: PLNT 3520 or consent of instructor.

PLNT 7250 Plant Science Seminar Cr.Hrs. 3 Principles of oral and poster presentations, visual aid design and organization are discussed and then applied by students in presentations of their current research, and agricultural issues. Course evaluated on a pass/fail basis.

PLNT 7340 Advanced Weed Science Cr.Hrs. 3 Weed biology and ecology in the context of weed management, covering theory, current information, investigative approaches and experimental techniques. Topics explored include: weed population biology, modelling, weed community ecology, herbicide efficacy and herbicide resistant weeds. Prerequisite: PLNT 3540 or equivalent or consent of instructor.

PLNT 7420 Advanced Plant Science Seminar Cr.Hrs. 3 The development of a research proposal, instruction and practice in scientific writing and presentation of a seminar. For Ph.D. students only. Course evaluated on a pass/fail basis.

PLNT 7480 Epidemiology of Plant Disease Cr.Hrs. 3 Lectures, seminars and discussions relating epidemiological principles to plant disease development and control. The course examines in-depth the interrelationships of host, pathogen and environment. Measurement of epidemiological parameters is stressed in relation to disease assessment, disease forecasting and disease management.

PLNT 7490 Storage of Horticultural Crops Cr.Hrs. 3 Types of storage available for fruits, vegetables and ornamentals will be discussed in relation to their effects on post-harvest physiology and stored crop quality.

PLNT 7610 Topics in Crop Physiology Cr.Hrs. 3
An in-depth study of selected topics of current interest in the field of Crop Physiology. Prerequisite: written consent of department head.

PLNT 7612 Advanced Plant Physiology Cr.Hrs. 3 Examination of current concepts of regulation and limitations of photosynthesis, nitrogen metabolism, and assimilate partitioning in field and horticultural crops. Content will include the mode of action of plant growth regulators and herbicides in these processes. Not to be held with the former 039.764. Prerequisites: PLNT 3500 , PLNT 4590 or the former 039.452 or consent of instructor.

PLNT 7620 Topics in Agronomy Cr.Hrs. 3
An in-depth study of selected topics of current interest in the field of Agronomy. Prerequisite: written consent of department head.

PLNT 7630 Topics in Plant Pathology Cr.Hrs. 3
An in-depth study of selected topics of current interest in the field of Plant Pathology. Prerequisite: written consent of department head.

PLNT 7650 Specialized Plant Pathology Cr.Hrs. 3
A laboratory course permitting the student to work directly under one of the plant pathology specialists of the Agriculture and Agri-Food Canada Research Centre. It includes the study of assigned literature and preparation of seminars in specialized fields. Prerequisite: written consent of department head.

PLNT 7660 Advanced Crop Production Cr.Hrs. 3 A lecture-seminar course to investigate environmental, crop management and genetic limitations to growth, yield formation, yield, water use efficiency and quality of field, forage and horticultural crops. Interactions will be stressed and emphasis will be placed on sustainable crop production systems. Simple and complex relationships will be

## 

ACADEMIC CALENDAR
demonstrated using models. Prerequisite: consent of instructor.

PLNT 7670 Quantitative Genetics and Plant

## Breeding Cr.Hrs. 3

The theoretical basis of quantitative genetic variation. The genetic structure of plant breeding populations. Estimation, interpretation and use of genetic parameters in crosspollinated and self-pollinated plant species. Variance components, genotype x environment interaction, inbreeding, heterosis, selection, heritability and combining ability. Prerequisites: PLNT 3520 and PLNT 4330 or consent of instructor.

PLNT 7680 Plant Molecular Genetics Cr.Hrs. 3 (Formerly 039.768) A synthesis of the knowledge gained from the application of molecular and classical genetics to the study of plant biology, and its impact on biotechnology. Areas of emphasis include development and physiology, and molecular plant pathology. Prerequisite: PLNT 2530 or the former 039.450 or PLNT 3140 or PLNT 4330 or equivalent or consent of instructor.

PLNT 7690 Bioinformatics Cr.Hrs. 3
An introduction to the theory, strategies, and practice of data management, analysis and utilization in molecular biology. Topics include DNA and protein sequence analysis, biological databases, genomic mapping and analysis of gene expression data. This course will include problem-solving exercises using Unix server-based software. Not to be held with PLNT 4610 (or the former 039.769). Prerequisite: PLNT 2530 (or 039.253 ) or the former 039.450 or PLNT 3140 (or 039.314) or PLNT 4310 or the former PLNT 4540 (or 039.454 ) or MBIO 3410 (or 060.341 ) or consent of instructor.

## Political Studies

Head: A/Head Steven Lecce
Campus Address/General Office: 532 Fletcher Argue
Telephone: (204) 4749733
Fax: (204) 4747585
Email Address: Political Studies@umanitoba.ca

## Website:

http://umanitoba.ca/faculties/arts/departments/political studi es/index.html

The Department of Political Studies offers students a PreMaster's year, a Master of Arts degree program, as well as a Masters in Public Administration program jointly offered with the University of Winnipeg. The program provides a solid basis for those wishing to go to doctoral studies, or for those interested in careers in law, government, the private and voluntary sectors and international organizations.

With twelve full-time faculty members and approximately thirty graduate students per year, the low student to faculty ratio provides an excellent opportunity for students to work closely with faculty in the department and for flexibility in the design of programs of study. A further attraction lies in the department's links with the Centre for

Defence and Security Studies, a research institute focused on the area of security, strategic and defence studies. Since 1985, graduate students in the department have organized the annual Political Studies Students' Conference in association with the Centre for Defence and Security Studies with invited speakers including distinguished academics and specialists from across Canada and from abroad. The Duff Roblin Professor of Government and the Duff Roblin Political Studies Fellowship (established in 1998) advance the study of Canadian politics within the department and amongst its students.

## Fields of Research

The department offers courses at the pre-Master's and Master's levels in five areas of concentration: Canadian politics, international relations, public administration, political theory and comparative politics.

- Canadian Politics, including government institutions, public policy, the Charter of Rights and Freedoms and anti-discrimination legislation, indigenous politics \& governance; and political parties;
- International Relations including defence and security studies, foreign and defence policy; international political economy; globalization and international organizations and policy, and colonization and decolonization;
- Comparative Politics including parties and politics, political economy, women in politics, middle east politics, politics in India, politics in Britain and politics of development, indigenous politics \& indigenist theory;
- Public Administration including comparative public administration, human resources development, provincial and local administration, government reform, accountability, and performance measurement;
- Political Theory including contemporary and early modern political thought, feminist political thought, autobiography and the political philosophy of Jean-Jacques Rousseau and Simone de Beauvoir.

## Research Facilities

As a provincial capital, Winnipeg offers important advantages for undertaking research in politics. Key research libraries are housed at the University of Manitoba and the Manitoba Legislative Library, both official repositories for Canadian publications. The University of Manitoba Archives and Special Collections, and Provincial Archives provide a wealth of material on Manitoba, Prairie and Canadian politics. Additionally, the university's data library and the Inter-University Consortium for Political and Social Research provide access to electronic data sources, including Statistics Canada and census data, as well as public opinion and election surveys. The University of Manitoba is also a member of the Shastri Indo-Canadian Institute whiich enhances the Library collection on India and supports graduate research. Finally, the Centre for Defence and Security Studies supports an extensive library of

## 

ACADEMIC CALENDAR
2012-2013 •
journals, periodicals, and texts in the fields of international relations, security studies, and foreign policy.

## Manitoba Institute for Policy Research (MIPR):

The MIPR was established in 2010, and is supported by the Province of Manitoba and the University of Manitoba. The MIPR was created to pursue collaborative and interdisciplinary research in the areas of public policy, administration, and governance and to engage academics, govnerment, the private and non-profit sectors, and citizens of Manitoba on a wide variety of policy issues concerning Manitoba, Western Canada, and Canada in general. Part of its mandate is to develop education programs, advisory committees, seminars, conferences, and workshops, and will work towards a new post-vaccalaureate professional development certificate in public service.

## M.A. in Political Studies, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, admission to the Master's program in Political Studies is through successful completion of the pre-M.A. year, as outlined below, or by completion of a B.A.(Honours) program in Political Studies. Applicants possessing a B.A.(Honours) are expected to have maintained a grade point average of $3.5\left(\mathrm{~B}_{+}\right)$in their last 36 credit hours in Political Studies courses, to have completed a course in Political Theory, and to have maintained a cumulative grade point average of 3.0 (B). Students who have a B.A.(Adv.) with a course selection pattern and performance comparable in quality to that of a B.A.(Hons.) student will also be considered. Applicants possessing a B.A. (Honours) in another discipline with a cumulative grade point average of $3.5(\mathrm{~B}+)$ will be considered for direct entry into the program, primarily on the basis of their completion of Political Studies or directly related courses.

The pre-Master's year is designed for students who do not meet the requirements for admission to the Master's program. To be eligible for pre-Master's study, applicants will normally possess a general Bachelor's degree with a major in Political Studies ( 30 credit hours including one course in Political Theory), with a minimum cumulative grade point average of 3.0 (B). Applicants possessing a general B.A. in another discipline with a cumulative grade point average of $3.5(\mathrm{~B}+$ ) will also be considered for direct entry into the preMaster's program, primarily on the basis of their completion of Political Studies or directly related courses.

Admission to the pre-Master's year does not guarantee future admission to a MA program in Political Studies; students in the pre-Master's program are required to follow the normal application procedures for entry into the Master's program.

## Application Deadline

Department deadline for applications for Regular Session (September) for International students is January 15 and for Canadian/U.S. students June 1.

## Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students in the Master's program must complete either: 12 credit hours of 7000 -level courses in Political Studies and a thesis requiring some original research in primary sources; or 24 credit hours of 7000 -level courses, a research paper demonstrating familiarity with secondary sources, two written comprehensive exams, and an oral examination. All students must maintain an overall average of " $\mathrm{B}+$ " with no grade below a " B " in their coursework to remain in the program.

A student in the pre-Master's year will normally be required to successfully complete 24 credit hours at the 4000 level in Political Studies. Under special circumstances, the substitution of 6 credit hours at the 4000 level in an ancillary subject or at the 3000 level in Political Studies may be allowed. Decisions regarding the substitution of courses for the fulfilment of the program requirements rest with the Department's Graduate Committee and must be obtained in writing.

Students in the pre-Master's year must achieve a cumulative grade point average of $3.5(\mathrm{~B}+)$ with no grade lower than a B ( 3.0 grade points) in course work to be eligible for admission into the Master's program.

More information may be found in the Supplementary Regulations pertaining to the Master of Arts and preMaster's Programs in Political Studies.

Second Language Reading Requirement: No

Expected Time to Graduate: Two years

## Ph.D. in Political Studies,

The Department of Political Studies does not offer a Ph.D. Program.

## Political Studies -6000 Level

POLS 6010 The Manitoba Legislative Internship Seminar Cr.Hrs. 6
(Formerly 019.601) This credit is granted to six individuals who annually complete the assignment as Legislative Interns within the Manitoba Legislative Assembly.

POLS 6500 Co-operative Education Work 1 Cr.Hrs. 3 (Formerly 019.650) This credit is granted to full time registered students in the Master of Public Administration who have registered in the co-op option of the program. Eligible candidates must have attended two mandatory workshops and completed a minimum 24 credit hours of

## ACADEMIC CALENDAR

course work prior to the first work term placement. Work terms are paid positions by employers primarily in the public sector. Work terms are a minimum of 13 weeks.

POLS 6510 Co-operative Education Work 2 Cr.Hrs. 3 (Formerly 019.651) This credit is granted to full time registered students in the Master of Public Administration who have registered in the co-op option of the program. Eligible candidates must maintain full time status and have attended two mandatory workshops, completed a minimum 24 to a maximum of 48 credit hours of course work, and successfully completed a first work term prior to the second work term placement. Work terms are paid positions by employers primarily in the public sector. Work terms are a minimum of 13 weeks.

## Political Studies -7000 Level

POLS 7280 Directed Readings in Politics Cr.Hrs. 3 (Formerly 019.728) An independent reading and/or research course on a selected topic in political studies, undertaken and arranged in consultation with the prospective instructor, upon the approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7290 Directed Readings in Politics 2 Cr.Hrs. 6 (Formerly 019.729) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7300 Directed Readings in Public
Administration Cr.Hrs. 3
(Formerly 019.730) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7330 State-Civil Society Relations Cr.Hrs. 3 An examination of how the state relates to civil society actors, notably the voluntary sector in Canada. Students will critically assess the role voluntary organizations play - and should play - in governing process.

POLS 7340 Canadian Government Cr.Hrs. 3 (Formerly 019.734) Examines the core institutions of Canadian Government and politics including parliamentary government, federalism, the Constitution and the Charter of Rights and Freedoms. Students may not hold credit for both POLS 7340 (or 019.734) and the former 019.776.

POLS 7350 Canadian Democracy Cr.Hrs. 3 (Formerly 019.735) Examines the core institutions and processes of Canadian democracy including political parties, elections, voting, social movements, interest groups and public opinion. Students may not hold credit for both POLS 7350 (or 019.735) and the former 019.776.

POLS 7370 Seminar in the Theory and Practice of Public Administration Cr.Hrs. 6
(Formerly 019.737) The intent of this course is to provide
insight into the exigencies of actual public administration. The course will be conducted on a topical basis within the framework of certain trends facing Canadian governments today. (The course will attempt to utilize, to the fullest extent possible, the particular expertise of students in the program, faculty members, and of both elected and appointed public officials.) Students may not hold credit for both POLS 7370 (or 019.737) and the former 019.731.

## POLS 7410 Selected Topics in Political Behaviour

 1 Cr.Hrs. 3(Formerly 019.741) A systematic examination of empirical research in the area of political socialization and political culture. Students may not hold credit for both POLS 7410 (or 019.741) and the former 019.725.

POLS 7470 Strategic Human Resource Management in Government Cr.Hrs. 3
A study of the human resource management functions, including planning, staffing, training, performance management, compensation and labour relations, in ways that optimize organizational performance. This course will also address contemporary challenges including recruitment and retention, managing change, demographic shifts, and information technology.
POLS 7520 The Political Classics Cr.Hrs. 3 (Formerly 019.752) A thorough study of selected works with special attention to methodology, historical content, theoretical position and universal significance. Students may not hold credit for both POLS 7520 (or 019.752) and the former 019.771.

POLS 7530 International Political Economy Cr.Hrs. 3 (Formerly 019.753) An examination of the systematic study of international political economy. Particular attention is paid to the foreign economic policies of advanced industrialized states and the various issues surrounding the redistribution of wealth and influence in the contemporary international system.

## POLS 7550 Contemporary Issues in Canadian

Politics Cr.Hrs. 3
(Formerly 019.755) A seminar series examining a contemporary debate in Canadian politics and government. The specific topic will vary from year to year depending on faculty interest and specialization.

POLS 7610 Political Theory and Contemporary Issues Cr.Hrs. 3
(Formerly 019.761) An examination of recent theoretical perspectives on contemporary political institutions, problems and values. Students may not hold credit for both POLS 7610 (or 019.761) and the former 019.771.

POLS 7710 Liberalism and Its Critics Cr.Hrs. 3
An advanced study of liberalism and various theoretical challenges to its ethical and political claims.

POLS 7720 Comparative Government Cr.Hrs. 6 (Formerly 019.772) Three hours a week, both terms. The primary focus of this course will be on the major Western "democracies" (e.g., United Kingdom, United States, and Western Europe). Phenomena to be examined include political participation and the problems of social change in industrial societies.

## ACADEMIC CALENDAR <br> 2012-2013 •

## University of Manitoba

POLS 7790 International Relations Theory Cr.Hrs. 3 (Formerly 019.779) A critical assessment of basic theories and models used in International Relations, emphasizing theoretical approaches and research. Students may not hold credit for both POLS 7790 (or 019.779) and the former 019.773.

POLS 7850 Contemporary Strategic and Security
Studies Cr.Hrs. 6
(Formerly 019.785) An advanced course in strategic studies.
The evolution of strategic thought in the modern period will be examined, and particular emphasis will be placed on the role of armed force in relation to the problem of international security. Students may not hold credit for both POLS 7850 (or 019.785) and the former 019.783. Normally students will be expected to have taken POLS 4730 (or 019.473) or its equivalent as prerequisite.

POLS 7910 Multivariate Research Methods Cr.Hrs. 3 (Formerly 019.791) Introduction to the theory and application of multivariate regression models in political analysis. Students may not hold credit for POLS 7910 (or 019.791) and either the former 019.732 or 019.788 .

## Political Studies -9000 Level

POLS 9010 UW POL 4301 Administrative Theory Cr.Hrs. 6 Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9020 UW POL 4400 Seminar in Canadian Politics Cr.Hrs. 6
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9030 UW POL 4415 State and Economy Cr.Hrs. 6 Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9090 UW POL 7331 Directed Readings in Public Administration Cr.Hrs. 6
Course may be taken as part of a Master of Public
Administration program offered jointly with the University of Winnipeg.

POLS 9120 UW POL 4220 Liberty and Community in Modern Canadian Political Thought Cr.Hrs. 6
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9230 UW POL 4410 Seminar in Women in Politics Cr.Hrs. 3
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9240 UW 4505 Politics of Urban Planning Cr.Hrs. 6 Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9340 UW POL 7300 Seminar in Theory and Practice of Public Administration I Cr.Hrs. 3
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9350 UW POL 7305 Seminar in Theory and Practice of Public Administration II Cr.Hrs. 3
Course may be taken as part of a Master of Public
Administration program offered jointly with the University of

## Preventive Dental Science

Orthodontics
Head: (and Graduate Chair) W.A. Wiltshire
Campus Address/General Office: D341-780 Bannatyne Avenue
Telephone: (204) 7893628
Fax: (204) 977-5699
Email Address: grad orthodontic@umanitoba.ca
Website: http://umanitoba.ca/dentistry
Academic Staff: Please refer to our website for Academic staff information:http://umanitoba.ca/dentistry

The department offers a 3-year (minimum 36 months) Master's program in orthodontics, fully accredited by the Commission on Dental Accreditation of Canada. This program provides eligibility to sit the examination of the Royal College of Dentists of Canada (RCDC) and the American Board Exams in Orthodontics (ABO). The program is intended to provide a background in the basic sciences underlying orthodontic treatment and develop a critical, independent, problem-solving approach toward clinical practice.

Graduate orthodontic students have the opportunity to treat approximately 65 new patient starts and a similar number of transfer and retention patients using a wide variety of orthodontic techniques. The strength of the clinical program is a wide range of diversity in instructor philosophies of treatment and the opportunity to learn several techniques
such as full fixed modified edgewise type mechanics, sectional arch mechanics, early treatment philosophies and functional orthopaedics. In addition, a variety of surgical and cleft palate combination orthodontic surgical cases.

Graduate students also are expected to do some limited teaching in the undergraduate orthodontic clinic, present their research at an international congress, submit an article for peer-reviewed publication based on their research and orally defend their research project.

Graduates of the program over the past years have gone on to establish successful practices world-wide in such countries as Canada, U.S.A., Australia, Ireland, Columbia, Taiwan, Finland and the United Arab Emirates, amongst others.

## Fields of Research

The current foci of research are in orthodontic biomaterials, adhesivity, anticariogenicity, allergenicity, fluoride release, epidemiology of malocclusion, public health orthodontics, preventive and interceptive orthodontics, clinical research in temporomandibular joint dysfunction, and the biology of tooth movement.

## Research Facilities

The graduate orthodontic program offers a state-of-the-art 14 chair clinic with modern computerized diagnostic equipment and an on-site dedicated orthodontic technician. The latest addition to the research facilities is a state-of-theart Zwick materials testing machine, in addition to the general research laboratories of the Faculty of Dentistry.

## M.Sc. in Orthodontics Speciality, Admission

Admission requirements are those of the Faculty of
Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application deadline

All application materials should be submitted to the Faculty of Graduate Studies by September 1.

## Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Students must successfully complete all courses offered by the department as well as ANAT 7060, CHSC 7470, RSTD 7150, DDSS 7230. A thesis based on original research and acceptable to the Faculty of Graduate Studies and successful oral defence is also required, as well as submission of a peer-reviewed paper suitable for publication to the satisfaction of the program director.

## ACADEMIC CALENDAR

## Clinical Requirements

Students are required to treat approximately 65 new cases, a number of active transfer cases, plus approximately 80 retention cases including cleft palate and combined orthodontic-surgical patients to the satisfaction of the clinical faculty and an external examiner. The minimum full-time requirement to complete the total program is 35 months.

Second Language Reading Requirement: None

Expected Time to Graduate: minimum 36 months

Ph.D. in Preventive Dentistry,
There is no Ph.D. Program offered in the Department of Preventive Dentistry.

## Preventive Dental Science -PDSD 7000 Level

PDSD 7000 Neural Basis of Oropharyngeal
Function Cr.Hrs. 3
(Formerly 101.700) A program of problem-oriented seminars on the sensory and reflex mechanisms affecting the respiratory and alimentary functions of the mouth and pharynx, mandibular posture and movement and respective application to oropharyngeal dysfunction and orthodontic therapy. One seminar per week for one term.

## PDSD 7020 The Mechanics of Orthodontic

Therapy Cr.Hrs. 6
(Formerly 101.702) The mathematics of three dimensional space, force and moment systems are given as the basis for considering the mechanics of orthodontic treatment. The mechanical properties of some orthodontic materials are studied as a background for appliance design. The quantitative aspects of tooth movement are discussed in terms of patient treatment planning. Seminar and laboratory sessions.

PDSD 7030 Biological Basis of Craniofacial Growth and Development Cr.Hrs. 3
(Formerly 101.703) A program of student-based seminars on the biophysical, biochemical and histological basis of growth and development of craniofacial structures.

PDSD 7040 Clinical Craniofacial Growth and
Development Cr.Hrs. 3
(Formerly 101.704) A program of student-based seminars on the morphogenesis of craniofacial structures and their significance to clinical problems.

PDSD 7060 Cephalometric Analysis Cr.Hrs. 3 (Formerly 101.706) A seminar program on the application of cephalometric radiography to craniofacial morphological research, orthodontic diagnosis and case analysis.

PDSD 7070 Biology of Orthodontics and Facial
Orthopedics Cr.Hrs. 3
(Formerly 101.707) A program of student-based seminars and lectures on the biological basis of orthodontic and facial
orthopedic diagnosis and therapeutic technique.

## PDSD 7101 Preventive Programs in Pediatric

Dentistry Cr.Hrs. 3
This course will be offered during the second year (term III). The prerequisite for this course will be the completion of the required courses in the first year of the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pediatric Patients II. Course is evaluated on a pass/fail basis.

PDSD 7102 Hospital Pediatric Dentistry I Cr.Hrs. 6 This course will be offered during the first year (term I and II). The prerequisite for this course will be the dental degree obtained prior to applying to the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pedicatric Patients I and Special Needs and Emergency care in Pediatric Patients. Course is evaluated on a pass/fail basis.

PDSD 7103 Hospital Pediatric Dentistry II Cr.Hrs. 6 This course will be offered during the first year (term III and IV). The prerequisite for this course will be completion of the required courses in the first year of the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pedicatric Patients II and Preventive Programs in Pediatric Dentistry. Course is evaluated on a pass/fail basis.

PDSD 7104 Management and Restorative Treatment of Pediatric Patients I Cr.Hrs. 6
This course will be offered during the first year (term I and II). The prerequisite for this course will be the dental degree obtained prior to applying to the program. In clinical terms this course will be taught with the following courses: Hospital Pediatric Dentistry I and Preventive and Community Pediatric Dentistry. Course is evaluated on a pass/fail basis.

PDSD 7105 Management and Restorative Treatment of Pediatric Patients II Cr.Hrs. 6
This course will be offered during the second year (term III and IV). The prerequisite for this course will be the completion of the required courses in the first year of the program. In clinical terms this course will be taught with the following courses: Hospital Pediatric Dentistry II and Preventive Programs in Pediatric Dentistry. Course is evaluated on a pass/fail basis.

PDSD 7106 Preventive and Community Pediatric Dentistry Cr.Hrs. 3
This course will be offered during the first year (term I). The prerequisite for this course will be the dental degree obtained prior to applying to the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pedicatric Patients I. Course is evaluated on a pass/fail basis.

PDSD 7107 Special Needs and Emergency Care in Pediatric Patients Cr.Hrs. 3
This course will be offered during the first year (term I). The prerequisite for this course will be the dental degree obtained prior to applying to the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pedicatric Patients I and Hospital Pediatric Dentistry I. Course is evaluated on a pass/fail basis.

## ACADEMIC CALENDAR

## Preventive Dental Science -RSTD 7000 <br> Level <br> RSTD 7100 Dental Materials Cr.Hrs. 6

(Formerly 102.710) This course consists of lecture, seminar and laboratory periods. The student will examine the current literature relevant to the program and will gain experience in the testing procedures used to evaluate dental materials. A project involving the evaluation of a dental material will be required of each student.

RSTD 7150 Orthodontic Materials Cr.Hrs. 3 (Formerly 102.715) Students will examine in depth through lectures, seminars and research of the current literature, those materials used by orthodontists in their clinical practice. The relationship between materials properties and clinical performance will be emphasized.

## Psychology

Head: T. A. Mondor
Campus Address/General Office: P514 Duff Roblin
Telephone: (204) 4746377
Fax: (204) 4747917
Email Address: psych grad office@umanitoba.ca
Website: http://umanitoba.ca/psychology
Academic Staff: Please refer to our website for Academic staff information:http://umanitoba.ca/psychology

Graduate study in the Department of Psychology is offered at both the M.A. and the Ph.D. levels. The primary purpose of the program is to provide training in several specialized areas of psychology for individuals desiring to advance their level of knowledge, their research skills, and their applied capabilities. The M.A. program is designed to provide a broad foundation in the scientific approach to psychology, as well as specialized skills. The Ph.D. program provides a higher degree of specialization coupled with more intensive training in research and application. With their advanced training graduates make careers in a variety of work settings such as self-employment, universities and colleges, government, private for-profit companies, schools, and private not-for-profit-organizations.

An on-line brochure entitled Graduate Study in Psychology, which details staff interests, the areas in which students may study, and the offerings and requirements in each area, is available at: http://umanitoba.ca/psychology

## Fields of Research

Research areas include: Applied Behaviour Analysis, Brain and Cognitive Sciences, Clinical, Developmental, Methodology, School, Social and Personality.

## Research Facilities

The department has a variety of research facilities in virtually all areas of psychology. These facilities are housed in over

100 different research rooms that include: A microcomputer laboratory and local area network; a biofeedback laboratory; operating and histological rooms and equipment; animal laboratories for research with ducks, rats, pigeons, fish, rabbits, mice, and parakeets; one way vision rooms for small group research; closed circuit television systems; a laboratory for studying college teaching; vision laboratories; the Avian Behaviour Laboratory, a field station/laboratory complex to study the behaviour of mallard ducks and Canada geese; the Psychological Services Centre, a training clinic for clinical psychology graduate students, social work students, and psychiatric residents; specialized electronics shop.

## M.A. in Psychology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology, which is available on-line at
http://umanitoba.ca/psychology

## Application Deadline

All applicants should send their applications with complete supporting documentation to the Faculty of Graduate Studies, no later than December 15.

The normal requirement for admission is an Honours B.A. or B.Sc. in Psychology or its equivalent. Students seeking admission with other degrees will usually be required to complete a pre-Master's year to the satisfaction of the department.

## Program Requirements

The basic requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology, which is available on-line at http://umanitoba.ca/psychology

Second Language Reading Requirement: Not required

Expected Time to Graduate: Two years

## Ph.D. in Psychology,

## Admission

Students may be admitted to the doctoral program if they have the equivalent of an M.A. degree in Psychology from the University of Manitoba. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology, which is available on-line at http://umanitoba.ca/arts/psychology

Application Deadline

## ACADEMIC CALENDAR

All applicants should send their application with complete supporting documentation to the Faculty of Graduate Studies no later than December 15.

## Program Requirements

The basic requirements are those of the Faculty of Graduate Studies. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology. Students in the clinical training program have a more extensive program of study, including clinical practice at the Psychological Service Centre, and must complete an internship year at an accredited training site. A formal candidacy exam is set by the advisory committee. Following successful completion of the candidacy examinations, the student completes a Ph.D. thesis.

Second language requirement: Not required

Expected time to graduation: Non-Clinical Programs, three years; Clinical Program, four years.

## M.A. in School Psychology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology, which is available on-line at
http://umanitoba.ca/psychology

## Application Deadline

All applicants should send their applications with complete supporting documentation to the Faculty of Graduate Studies no later than December 15.

The normal requirement for admission is an Honours B.A. or B. Sc. in Psychology or its equivalent. Students seeking admission with other degrees will usually be required to complete a pre-Master's year to the satisfaction of the department.

## Program Requirements

The basic requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology, which is available on-line at http://umanitoba.ca/psychology

Second Language Reading Requirement: Not required

Expected Time to Graduate: Two years or Three years (Thesis stream)

## Psychology -7000 Level

PSYC 7012 Ethics, History and Profession of School Psychology 1 Cr.Hrs. 3
An overview of the fundamental concepts and issues of professional School Psychology. Ethical, professional, regulatory and legal issues pertaining to the practice of school psychology are examined. Also examined are the history of school psychology and the organization of educational systems. Students may not hold credit for both PSYC 7012 and the former PSYC 7010 (017.701).
Prerequisite: permission of instructor.
PSYC 7014 Ethics, History and Profession of School Psychology 2 Cr.Hrs. 3
A continuation of the examination of fundamental concepts and issues of professional School Psychology. Ethical, professional, regulatory and legal issues pertaining to the practice of school psychology are examined. Also examined are the history of school psychology and the organization of educational systems. Students may not hold credit for both PSYC 7014 and the former PSYC 7010 (017.701).
Prerequisite: permission of instructor.
PSYC 7022 Psycho-educational Assessment and Measurement 1 Cr.Hrs. 3
Designed to provide students with training in the basic principles of psychological assessment and related measurement concepts, highlighting the process of databased decision making. Emphasis will be placed on how information from a variety of psycho-educational sources is used to identify profiles for planning intervention programs. Students may not hold credit for both PSYC 7022 and the former PSYC 7020 (017.702). Prerequisite: permission of instructor.

PSYC 7024 Psycho-educational Assessment and Measurement 2 Cr.Hrs. 3
A continuation of training in the basic principles of psychological assessment and related measurement concepts, highlighting the process of data-based decision making. Emphasis will be placed on how information from a variety of psycho-educational sources is used to identify profiles for planning intervention programs. Students may not hold credit for both PSYC 7024 and the former PSYC 7020 (017.702). Prerequisite: permission of instructor.

PSYC 7030 Learning and Cognitive Impairment Cr.Hrs. 3 (Formerly 017.703) An examination of cognitive and medical disorders that have a direct impact on learning, including disabilities, reading failure, mental retardation, Attention Deficit Hyperactivity Disorder, pervasive development disorders (e.g. autism), fetal alcohol syndrome, and cooccurring conditions. Effective compensatory interventions and social, behavioural and affective consequences will be emphasized.

PSYC 7040 Teaching Strategies, Learning Styles, and Academic Remediation Cr.Hrs. 3
(Formerly 017.704) Provides an overview of basic theories of learning as applied to effective classroom instruction. Knowledge of individual differences in learning and principles of best practices in classroom instruction will be applied to the development of effective and curriculum adaptations for students with specific academic problems.

PSYC 7050 Junior Practicum in School
Psychology Cr.Hrs. 3
(Formerly 017.705) Supervised practice with school children in a field setting. Emphasis on development of skills in assessing intelligence, academic skills and social-emotional difficulties, and on communication of findings to parents, teachers, and school administrators through written and verbal reports. Pass/Fail course. Prerequisite: permission of instructor.

PSYC 7060 Senior Practicum in School Psychology Cr.Hrs. 6 (Formerly 017.706) Supervised practice in a school setting. The focus is on development of skills relevant to case conceptualization, intervention, and supervision of junior practicum students. Pass/Fail course. Prerequisites: PSYC 7050 (or 017.705), permission of instructor.

PSYC 7070 Social, Emotional, and Personality Assessment of Children/Youth Cr.Hrs. 3
(Formerly 017.707) An overview of theory, research, and the educational implications of social, emotional, and personality assessment of children and adolescents. A variety of methods are examined with an emphasis on empiricallysupported practices in the assessment of psychopathology and socio-emotional functions. Prerequisite: permission of instructor.

PSYC 7080 Child/Youth Psychopathology Cr.Hrs. 3 (Formerly 017.708) Examines mental health conditions, covering a range of internalizing and externalizing disorders in children and youth. Biopsychosocial and ecological models, risk and resiliency, and developmental and cultural issues are examined. Structured and semi-structured diagnostic interviews are reviewed.

PSYC 7090 Behavioural Assessment and Intervention in School Settings Cr.Hrs. 3
(Formerly 017.709) Behavioural management strategies and techniques for children and adolescents who present with serious disruptive and/or emotional and behavioural disorders in schools. A wide range of techniques and strategies are considered. Prerequisite: permission of instructor.

PSYC 7120 Consultation and Supervision Cr.Hrs. 3 (Formerly 017.712) An examination of theories and models of school-based consultation and collaboration. Practice with techniques and procedures associated with effective consultation with teachers, school administrators, and parents. Prerequisite: permission of instructor.

PSYC 7130 School Psychology Research Design and Program Evaluation Cr.Hrs. 3
(Formerly 017.713) Provides students with knowledge and skills needed to understand, design, and conduct evaluations of intervention programs for individuals experiencing academic or behaviour difficulties in school. Addresses the aims, theories and methods of program evaluation, including relevant research design and statistical methods. Prerequisite: permission of instructor.

PSYC 7140 Clinical Research Design Cr.Hrs. 3
This course addresses issues of research design relevant to clinical research. Topics include reliability and validity of measurement, correlational, quasi-experimental, and experimental designs, clinical significance, and power analysis. Students complete a research proposal relevant to
their thesis interests.

## PSYC 7150 Readings in Autism Spectrum

Disorders Cr.Hrs. 3
Students will read recent research in Autism Spectrum Disorders, acquire skills to critically evaluate empirical evidence, and examine implications for practice. Among the topics covered will be assessment, diagnosis, epidemiology, and applied behaviour analysis early intervention.
Prerequisite: permission of instructor.
PSYC 7160 Cross-Cultural Social Psychology Cr.Hrs. 3 Cross-cultural psychology is the critical and comparative study of the linkages between cultural norms and thoughts, feeling and behaviour. This course focuses on Cross-cultural Social Psychology. Therefore, the assigned readings deal with topics that Social Psychology in general examines.

PSYC 7170 Theories of Close Relationships Cr.Hrs. 3 Students will be exposed to the theories that apply to the initiation, development, maintenance, and dissolution of relationships. The primary focus will be on evolutionary theory, attachment styles, communal and exchange relationships, equity theory, interdependence theory and the investment model, attributional theories, and theories of love.

PSYC 7180 Self-Regulation and Health Cr.Hrs. 3
This course examines how self-regulatory processes such as goal-setting and self-awareness can affect behaviours that promote or undermine human health. A wide range of health-related behaviours is considered such as smoking, exercise, safe-sex practices, and eating.

PSYC 7190 Social Psychology and Health Cr.Hrs. 3 This course considers health from a social psychological perspective. Weekly readings and discussion will focus on social cognitive processes and social influence processes that may mediate between stress and illness or may direct people's judgments of their health and choices of healthrelated behaviours.

PSYC 7192 Psychology of Health and Aging Cr.Hrs. 3 This course considers how adults adapt to the challenges of aging and the accompanying health problems. Seminar discussions will focus on selected psychological theories and related empirical literature regarding belief systems that operate in the face of health- and age-related challenges. Students may not hold credit for both PSYC 7192 and PSYC 7310 (017.731) with the topic "Health and Aging."

PSYC 7200 Quantitative Methods in Psychology 1 Cr.Hrs. 3 An introduction to descriptive and inferential statistics as it relates to the analysis of psychological data. Topics such as shapes of distributions, measures of central tendency and variability, hypothesis testing, and interval estimation, single and multifactor analyses, classical and robust methods of analysis will be discussed.

PSYC 7210 Quantitative Methods in Psychology 2 Cr.Hrs. 3 Applied statistics for psychologists, with a focus on regression analysis, linear models, and generalized linear models. Emphasis will be placed on the application of statistical methods and computer software in psychological research. Not to be held with the former PSYC 8420 (017.842). Prerequisite: PSYC 7200 or permission of instructor.

## ACADEMIC CALENDAR

PSYC 7220 Autism Practicum 1 Cr.Hrs. 3
Graduate students will be taught to provide applied behavior analysis training for children with autism. Students will be taught many of the skills expected of tutors and senior tutors in the St. Amant Applied Behavior Analysis Program for Children with Autism. Prerequisite: permission of instructor.

PSYC 7230 Autism Practicum 2 Cr.Hrs. 3
Graduate students will learn to supervise tutors and parents providing applied behavior analysis training for children with autism. Students will be taught many of the skills expected of a clinical consultant in the St. Amant Applied Behavior Analysis Program for Children with Autism. Prerequisite: PSYC 7220 and permission of instructor.

PSYC 7240 Developmental Disabilities Practicum 1 Cr.Hrs. 3
Students will work closely with behavior analysts in the Psychology Department at St. Amant to assess problems, design and execute appropriate interventions, and conduct follow-ups for persons with developmental disabilities. Prerequisite: permission of instructor.

PSYC 7250 Developmental Disabilities Practicum 2 Cr.Hrs. 3
Graduate students will work closely with behavior analysts in the Psychology Department at St. Amant in the provision of applied behavior analysis consultation services for front line staff caring for persons with developmental disabilities. Prerequisite: PSYC 7240 and permission of instructor.

## PSYC 7260 Case Conceptualization and Communication

## 1 Cr.Hrs. 0

In this course students will be exposed to the theory and practice of case conceptualization and communication. Students are required to be present for presentations of clinical cases and participate in discussions of them. Grading is Pass/Fail. Prerequisite: permission of instructor.

PSYC 7270 Case Conceptualization and Communication 2 Cr.Hrs. 0
In this course students will be exposed to the theory and practice of case conceptualization and communication. Students are required to be present for presentations of clinical cases and participate in discussions of them. Grading is Pass/Fail. Prerequisite: permission of instructor.

PSYC 7280 History and Systems of Psychology Cr.Hrs. 3 A survey of the major contemporary systems of psychology and their history.

PSYC 7290 Psychopathology and Diagnosis Cr.Hrs. 3 Advanced study of abnormal behaviour, diagnostic approaches, and related research. Not to be held with the former PSYC 7870 (017.787). Prerequisite: permission of instructor.

PSYC 7300 Applied Behavior Analysis in Developmental Disabilities Cr.Hrs. 3
Students will read recent applied behavior analytic research in behavioral assessments and interventions for people with developmental disabilities, acquire skills to critically evaluate empirical evidence, and examine implications for practice. Students may not hold credit for both PSYC 7300 and PSYC 7310 (017.731) with the topic "Research in Developmental Disabilities." Prerequisite: permission of instructor.

PSYC 7310 Current Topics 1 Cr.Hrs. 3
(Formerly 017.731) An intensive study of the contemporary research and theory in a selected field of psychology. As the course content will vary from year to year, students may take this course more than once for credit.

## PSYC 7320 Foundations of Evidence-Based

## Treatment Cr.Hrs. 3

This course is designed to provide students with both a knowledge/evidence base for the foundations of psychotherapy and practical skills that will prepare them for more advanced learning via supervised work with clients.
Not to be held with the former PSYC 8410 (017.841).
Prerequisite: permission of instructor.
PSYC 7330 Cognitive Development Cr.Hrs. 3
You will gain an advanced understanding of core theories and fundamental issues in cognitive development research. You will also gain an in-depth understanding of a particular cognitive developmental research issue of your choice. Prerequisite: consent of instructor.

PSYC 7340 Sensory Processes 1 Cr.Hrs. 3
(Formerly 017.734) An intensive review of current research and theories in visual processes. Both behavioural and physiological aspects of vision will be considered.

PSYC 7350 Sensory Processes 2 Cr.Hrs. 3
(Formerly 017.735) An intensive review of current theories and research in audition, smell, taste, and the cutaneous senses.

PSYC 7360 Perception Cr.Hrs. 3
(Formerly 017.736) A survey of theories of perception.
PSYC 7370 Cognitive Processes Cr.Hrs. 3
(Formerly 017.737) A study of thinking and related areas.

PSYC 7380 Advanced Research Design Cr.Hrs. 3 (Formerly 017.738) The use of randomized subjects, block, factorial, latin square, and repeated measures designs in psychological research is discussed. Ancillary topics considered are unbalanced designs, multiple linear regression, magnitude estimation and simultaneous inference. Students will also use statistical packages to analyze data from psychological experiments. Prerequisite: PSYC 8420 (or 017.842) or permission of instructor.

PSYC 7390 Scaling Cr.Hrs. 3
(Formerly 017.739) Methods and theory of scaling. Scaling models and issues in current psychophysical research. Prerequisite: PSYC 8420 (or 017.842) or permission of instructor.

PSYC 7400 Measurement and Scaling Theory Cr.Hrs. 3 (Formerly 017.740) Discussion of measurement theory, data theory, and scaling models. Prerequisite: PSYC 7390 (017.739) or permission of instructor.

PSYC 7410 Advanced Psychometric Theory Cr.Hrs. 3 (Formerly 017.741) Current theory and research in psychometrics. Prerequisite: PSYC 7400 (017.740) or permission of instructor.

PSYC 7420 Multivariate Methods in Psychology Cr.Hrs. 3 (Formerly 017.742) Designing and analyzing behavioural

## ACADEMIC CALENDAR

science experiments containing multiple dependent (criterion) and independent (predictor) variables is discussed. The use of statistical packages is illustrated. Prerequisite: PSYC 8420 (or 017.842) or permission of instructor.

PSYC 7430 Advanced Physiological Psychology Cr.Hrs. 3 (Formerly 017.743) The physiological correlates of sensation, perception, learning, motivation, and complex behaviour.

PSYC 7450 Psychology of Group Behaviour Cr.Hrs. 3 (Formerly 017.745) An examination of the methodology, results, and interpretations of studies of the structural properties of groups, group formation, leadership, communication, problem-solving, and other group processes.

PSYC 7460 Attitude Development and Change Cr.Hrs. 3 (Formerly 017.746) A critical review of research involving attitude measurement, with emphasis on the experimental analysis of variables influencing the formation and modification of attitudes.

PSYC 7470 Advanced Developmental Psychology Cr.Hrs. 3 (Formerly 017.747) Theory and research in contemporary developmental psychology.

PSYC 7492 Psychology of Addiction Cr.Hrs. 3
This course allows for advanced study in an integrative psychology of addictive disorders. Topics will include the history, epidemiology, psychopharmacology, and biological and psychosocial etiologies of addictive behaviours. Evidence-based treatments will also be covered.

PSYC 7520 Ethics and Professional Issues in Clinical Psychology Cr.Hrs. 3
Study of professional issues in clinical psychology. Historical development and present status of clinical psychology; what defines a profession; ethics codes, standards of practice, and legal requirements; training, internships, and accreditation; professional organizations, registration, and advocacy; employment in public and private sectors. Grading is Pass/Fail. Not to be held with the former PSYC 8070 (017.807). Prerequisite: permission of instructor.

PSYC 7530 Research in Psychopathology Cr.Hrs. 3 (Formerly 017.753) A survey of the literature and a critical examination of methodological problems arising from studies of psychiatric milieu, psychotherapy, and the epidemiology of mental illness.

PSYC 7540 Theories in Psychotherapy Cr.Hrs. 3 (Formerly 017.754) An introduction to current approaches to psychotherapy and their underlying theories.

PSYC 7550 Intellectual and Cognitive Assessment Cr.Hrs. 3 This course will provide clinical students with a thorough overview of key issues and clinical knowledge related to intellectual and cognitive assessment of children and adults. Learning will take place through a combination of lectures, course readings, discussion, group exercises, student presentations, and hands-on practical experience with cognitive tests. Not to be held with the former PSYC 8150 (017.815). This course is normally restricted to students in the clinical psychology program although non-clinical
students may enroll with permission of the instructor.

## PSYC 7560 Personality and Psychological

Assessment Cr.Hrs. 3
This course will provide clinical students with a thorough overview of key issues and clinical knowledge related to personality and psychological assessment of youth and adults. Learning will take place through a combination of lectures, course readings, discussions, group exercises, student presentations, and hands-on practical experience with personality and psychological tests. Not to be held with the former PSYC 8160 (017.816). This course is normally restricted to students in the clinical psychology program although non-clinical students may enroll with permission of the instructor.

PSYC 7580 Advanced Motivation Cr.Hrs. 3
(Formerly 017.758) Theory and methodology in contemporary studies of motivation.

PSYC 7620 Person X Situation Interactionism Cr.Hrs. 3 We will first explore research demonstrating the impact of personality and situations, separately, on behavior. We will then examine the debate that arose about whether understanding the person or the situation would have the most scientific merit. We spend the remainder (and majority) of the course discussing the theories and research that arose from that debate. The majority of this research has an interactionist perspective, taking both the person and his/her situation into account. Students may not hold credit for both PSYC 7620 and PSYC 7310 (017.731) with the topic "Person X Situation Interactionism."

PSYC 7630 Seminar in Social Psychology Cr.Hrs. 3 (Formerly 017.763) An examination of current methods, research, and theory in selected topics in the area of experimental social psychology.

PSYC 7640 Seminar in Social Psychology Cr.Hrs. 3 (Formerly 017.764) An examination of current methods, research, and theory in selected topics in the area of experimental social psychology.

PSYC 7650 Theory and Research in Personality Cr.Hrs. 3 (Formerly 017.765) A lecture and reading course designed to familiarize the student with the concepts and operations associated with various approaches to the study of individual differences and patterns of difference in behaviour; emphasis is placed on research and that function of theory which generates research.

PSYC 7670 Seminar in Personality 1 Cr.Hrs. 3 (Formerly 017.767) An intensive examination of the current methods and research arising from the classical theories of personality.

PSYC 7680 Seminar in Personality 2 Cr.Hrs. 3 (Formerly 017.768) An examination of individual difference variables suggested by the various personality theories. Particular emphasis will be given to current research and theory.

PSYC 7700 Problems in Psychological Research Cr.Hrs. 3 (Formerly 017.770) No desciption available for this course.

## ACADEMIC CALENDAR <br> 2012-2013 •

PSYC 7710 Problems in Psychological Research Cr.Hrs. 3 (Formerly 017.771) No desciption available for this course.

PSYC 7720 Problems in Psychological Research Cr.Hrs. 3 (Formerly 017.772) No desciption available for this course.

PSYC 7730 Problems in Psychological Research Cr.Hrs. 3 (Formerly 017.773) No desciption available for this course.

PSYC 7740 Problems in Psychological Research Cr.Hrs. 3 (Formerly 017.774) No desciption available for this course.

PSYC 7750 Problems in Psychological Research Cr.Hrs. 3 (Formerly 017.775) No desciption available for this course.

PSYC 7760 Problems in Psychological Research Cr.Hrs. 3 (Formerly 017.776) No desciption available for this course.

PSYC 7770 Problems in Psychological Research Cr.Hrs. 3 (Formerly 017.777) No desciption available for this course.

PSYC 7780 M.A. Thesis Proposal Development Cr.Hrs. 0 Students registering for this course will work under the supervision of their advisor to prepare a complete draft of the M.A. Thesis Research Proposal. Students enrolled in a thesis-based M.A. program in Psychology must register for this course in one of their first four (4) terms of full-time study. The course must culminate in submission of a complete draft of the M.A. Thesis Research Proposal to all members of the thesis advisory committee. This course will be graded on a pass/fail basis as determined by majority opinion of the thesis advisory committee.

## PSYC 7790 Ph.D. Dissertation Proposal

Development Cr.Hrs. 0
Students registering for this course will work under the supervision of their advisor to prepare a complete draft of the Ph.D. Dissertation Research Proposal. Ph.D. students must register for this course in one of their first eight (8) terms of full-time study. The course must culminate in submission of a complete draft of the Ph.D. Dissertation Research Proposal to all members of the thesis advisory committee. This course will be graded on a pass/fail basis as determined by majority opinion of the thesis advisory committee.

PSYC 7800 Seminar in Quantitative Methods in Psychology 1 Cr.Hrs. 3
(Formerly 017.780) Special topics and recent advances in the design and analysis of behavioural science data will be discussed. Prerequisite: PSYC 7760 (or 017.776) or permission of instructor.

PSYC 7810 Seminar in Quantitative Methods in Psychology 2 Cr.Hrs. 3
(Formerly 017.781) An extension of the material covered in PSYC 7800 (or 017.780) with particular emphasis on quantitative techniques typically employed in such areas as discrimination learning, personality, etc. Prerequisite: PSYC 7760 (or 017.776) or permission of instructor.

PSYC 7820 Interventions I Cr.Hrs. 3
This course examines empirically-supported interventions ranging from primary through tertiary prevention/intervention efforts directed at individuals, groups, and families, as well as classroom- and school-based intervention and prevention programs to promote a range of adaptive outcomes and
intervene in a range of maladaptive pathways.
PSYC 7830 Interventions II Cr.Hrs. 3
This course examines empirically-supported interventions ranging from primary through tertiary prevention/intervention efforts directed at individuals, groups, and families, as well as classroom- and school-based intervention and prevention programs to promote a range of adaptive outcomes (e.g., social competence, positive peer relations) and intervene in a range of maladaptive pathways (e.g., development of internalizing and externalizing problems and disorders). The course briefly introduces some specific programs available to assist in intervention design; however, the focus is on broad theoretical principles and aspects of evidence-based perspectives. Opportunities to integrate assessment and intervention will be presented throughout the course.

PSYC 7880 Seminar in Clinical Problems Cr. Hrs. 3 (Formerly 017.788) Discussion and consideration of current problems associated with clinical service, teaching, research, and administration. Prerequisite: PSYC 7540 (or 017.754).

PSYC 7890 Seminar in Clinical Problems Cr. Hrs. 3 (Formerly 017.789) Discussion and consideration of current problems associated with clinical service, teaching, research, and administration. Prerequisite: PSYC 7540 (or 017.754).

PSYC 7900 Foundations of Health Psychology Cr.Hrs. 3 For advanced students in psychology seeking specialized expertise in health, this course will review major topics such as the human body, the mind/brain connection, research methods, psychology and health care, terminal illness, pain and chronic disease, stress/coping, and health-related behaviours.

PSYC 7910 Clerkship-Practicum in Clinical
Psychology Cr.Hrs. 0
(Formerly 017.791) Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7920 Clerkship-Practicum in Clinical
Psychology Cr.Hrs. 0
(Formerly 017.792) Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7930 Clerkship-Practicum in Clinical Psychology Cr.Hrs. 0
(Formerly 017.793) Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical

Psychology. Pass/Fail course. Prerequisite: consent of instructor.

## PSYC 7940 Clerkship-Practicum in Clinical

## Psychology Cr.Hrs. 0

(Formerly 017.794) Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

## PSYC 7950 Clerkship-Practicum in Clinical

## Psychology Cr.Hrs. 0

(Formerly 017.795) Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

## PSYC 7952 Clerkship-Practicum in Clinical

## Psychology Cr.Hrs. 0

Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course.
Prerequisite: consent of instructor.
PSYC 7954 Clerkship-Practicum in Clinical
Psychology Cr.Hrs. 0
Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7956 Clerkship-Practicum in Clinical Psychology Cr.Hrs. 0 Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7970 Internship in Clinical Psychology Cr.Hrs. 0 (Formerly 017.797) Supervised practice in a clinical setting outside the university involving more responsible, more autonomous, and more professional work than is present in either clerkship or practicum. Prerequisite: four terms of PSYC 7910 (or 017.791) - PSYC 7950 (or 017.795).

PSYC 7980 Internship in Clinical Psychology Cr.Hrs. 0 (Formerly 017.798) Supervised practice in a clinical setting outside the university involving more responsible, more autonomous, and more professional work than is present in either clerkship or practicum. Prerequisite: four terms of

PSYC 7910 (or 017.791) - PSYC 7950 (or 017.795).
PSYC 7990 The Psychology of Language Cr.Hrs. 3
(Formerly 017.799) Examination of recent advances in the study of human language use. Topics such as memory for meaning, language development and language comprehension will emphasize the interactions between modern cognitive psychology and linguistics.

## Psychology -8000 Level

PSYC 8010 Intergroup Behaviour Cr.Hrs. 3
(Formerly 017.801) An investigation of intergroup processes, with particular emphasis on intergroup conflicts and the role of leadership in affecting these processes. Large social movements will receive particular attention.

PSYC 8020 Theory and Methods in Social
Psychology Cr.Hrs. 3
(Formerly 017.802) The presentation of a number of broad theoretical overviews in social psychology and an introduction on the graduate level to the particular methodological problems encountered in social psychological research.

PSYC 8030 Organizational Psychology Cr.Hrs. 3 (Formerly 017.803) Group and individual factors as related to understanding complex organizations.

PSYC 8040 Psychology of Aging Cr.Hrs. 3
(Formerly 017.804) An intensive review of current research and theory. Biological, psychological, and social aspects of aging are related to each other.

PSYC $\mathbf{8 0 5 0}$ Human Brain Functions Cr.Hrs. 3 (Formerly 017.805) The physiological basis of human cognitive processes is discussed from various perspectives. Different theories and different research strategies are discussed critically.

PSYC 8080 Case Conceptualization and Communication 3 Cr.Hrs. 3
In this course students will learn the theory and practice of case conceptualization and communication. Students will prepare and present clinical cases using well-defined models of treatment and case formulation strategies. Prerequisite: permission of instructor.

PSYC 8090 Clinical Supervision in Psychology Cr.Hrs. 3 This course will review the major models, ethical issues, and recommended strategies and practices of clinical supervision. Learning modalities will include discussion of readings, role-playing, and supervised supervision of student clinicians. Pass/Fail course. Prerequisite: permission of instructor.

PSYC 8100 Social and Community Intervention Cr.Hrs. 3 A general introduction to community psychology and community mental health. Historical, conceptual, and philosophical underpinnings of community psychology and community mental health; community assessment and intervention; alternative approaches to contemporary social problems; understanding social policy and the role of the public sector; community research methods. Not to be held with the former PSYC 8170 (017.817). Prerequisite:

## ACADEMIC CALENDAR

permission of instructor.
PSYC 8110 Program Evaluation and Consultation Cr.Hrs. 3 An overview of program evaluation and consultation as major areas of applied psychological practice; analysis of contemporary social and health problems; development, implementation, and evaluation of human service programs; understanding human service organizations; the role of consultant and common types of consultation; ethical issues in program evaluation and consultation. Not to be held with the former PSYC 8180 (017.818). Prerequisite: permission of instructor.

PSYC 8120 Current Topics 2 Cr.Hrs. 3
(Formerly 017.812) An intensive survey of the contemporary research and theory in a selected field of psychology. As the course content will vary from year to year, students may take this course more than once for credit.

PSYC 8200 Development and Its Deviations 1 Cr.Hrs. 3 (Formerly 017.820) Developmental deviations will be related to such factors as genetic influences, physiological development, early experiences, language, intellectual and mental abilities, social and ethnic influences, parent-child interactions, and peer group interactions. Methods of special treatment will be considered.

PSYC 8210 Development and Its Deviations 2 Cr.Hrs. 3 (Formerly 017.821) A continuation of PSYC 8200 (or 017.820). It will focus on developmental processes during later childhood and adolescence emphasizing concurrently the range and significance of deviations from normal behaviour and conditions contributing to these problems. Methods of special treatment will also be considered. Prerequisite: PSYC 8200 (or 017.820).

PSYC 8220 Topics in Abnormal Psychology Cr.Hrs. 3 (Formerly 017.822) An in-depth study of various areas in the field of psychopathology.

PSYC 8230 Clinical Neuropsychology Cr.Hrs. 3 (Formerly 017.823) The understanding and evaluation of cognitive, sensory, and motor functions as they relate to cerebral dysfunction.

PSYC 8240 Seminar in Behaviour Modification Cr.Hrs. 3 (Formerly 017.824) This seminar deals with a variety of specific topics in behaviour modification.

PSYC 8250 Practical Applications of Behaviour Modification Cr.Hrs. 3
(Formerly 017.825) This course deals with the design, implementation, and evaluation of program packages, based on behaviour modification, to different population and problem areas.

PSYC 8260 Individual Organism Research Methodology Cr.Hrs. 3
(Formerly 017.826) An extensive coverage of the methods by which behaviour can be studied in individual organisms, including the rationale for the use of such methods as opposed to methods involving the averaging of group data.

PSYC 8270 Seminar in Basic Operant Research Cr.Hrs. 3 (Formerly 017.827) This seminar deals with selected topics in basic operant research.

PSYC 8280 Supervised Field Study in Behaviour Modification 1 Cr.Hrs. 3
(Formerly 017.828) Supervised training will take place in a service facility typically located off the University campus. Students will work closely with a supervisor in assessing a problem, designing and executing an intervention program and conducting a followup. Prerequisite: permission of the instructor.

PSYC 8282 Supervised Field Study in Behaviour Modification 1 Cr.Hrs. 3
Supervised training will occur in a setting typically located off campus. Students will work closely with a supervisor in assessing a problem, designing and executing an intervention program and conducting a follow-up with clients without developmental disabilities or autism. Prerequisite: written consent of instructor.

PSYC 8290 Supervised Field Study in Behaviour
Modification 2 Cr.Hrs. 3
(Formerly 017.829) Supervised training will take place in a service facility typically located off the University campus. Students will work closely with a supervisor in assessing a problem, designing and executing an appropriate intervention program and conducting a follow up. Prerequisite: permission of the instructor.

PSYC 8292 Field Study in Behaviour Modification 2 Cr.Hrs. 3
Supervised training will occur in a setting typically located off campus. Students will work closely with a supervisor in assessing a problem, designing and executing an intervention program and conducting a follow-up with clients without developmental disabilities or autism. Prerequisite: written consent of instructor.

PSYC 8300 Behavioural Assessment Cr.Hrs. 3 (Formerly 017.830) This course teaches students how to conduct behavioural assessment as a necessary feature of the three interrelated processes of problem identification, program design and outcome evaluation in the application of behaviour modification techniques. Prerequisite: permission of the instructor.

PSYC 8330 Family Therapy Seminar Cr.Hrs. 3 (Formerly 017.833) This course deals with both family theory and practice by reviewing the current literature on family systems and providing case discussions, peer supervision and small group simulated tasks. Corequisite: current enrollment in PSYC 7910 (or 017.791) - PSYC 7950 (or 017.795) or GRAD 7030 (or 069.703) or permission of the instructor.

## PSYC 8360 Research Methods in Developmental

Psychology Cr.Hrs. 3
(Formerly 017.836) A survey of concepts, strategies, and methods in the study of behavioural development, with emphasis on the problems encountered in the measurement of age-related change in humans.

PSYC 8370 Logic of Research Design Cr.Hrs. 3
(Formerly 017.837) A survey of nonstatistical issues in research design, focusing on precise formulation of research questions and implication for research design. Design problems from various psychological areas are solved by students in the laboratory the purpose being to strengthen critical ability and to identify commonalities across areas in

## ACADEMIC CALENDAR 2012-2013 •

methodological approach. Broader philosophical issues relevant to research design, such as the meaning of causality, are also addressed. Prerequisite: PSYC 8420 (or 017.842 ) or permission of instructor.

PSYC 8380 History and Theory in Developmental Psychology Cr.Hrs. 3
(Formerly 017.838) A history of fundamental concepts in developmental psychology with consideration of important philosophical, theoretical, and empirical influences on the contemporary field.

PSYC 8430 Cognitive Behaviour Therapy Cr.Hrs. 3 Students learn the theory and practice of empirically supported therapies that emphasize cognitive and behavioural methods. Opportunities for CBT skill development, which can be applied to a wide range of psychological problems, are provided. Students may not hold credit for PSYC 8430 and any of: the former PSYC 8340 (017.834) or the former PSYC 8400 (017.840). Prerequisite: written consent of instructor.

## Public Administration

Head: A/Head Steven Lecce
Campus Address/General Office: 532 Fletcher Argue
Telephone: (204) 4749733
Fax: (204) 4747585
Email Address: political studies@umanitoba.ca

## Website:

http://umanitoba.ca/faculties/arts/departments/political studi es/index.html

This master's program is offered jointly by the Department of Political Studies of the University of Manitoba and the Department of Politics at the University of Winnipeg. Unless otherwise specified by particular agreements attached to its own creation, it is governed by the general procedures and regulations devised by the two universities for joint master's programs.

The objective of the program is to provide students, both full and part-time, with a sound knowledge of public administration. The approach is interdisciplinary; although courses in Politics/Political Studies are emphasized. The core exposes all students to a common set of courses designed to encourage both innovative and integrative perspectives. The public administration emphasis allows those interested students to obtain knowledge of both the theory and the practice of government organizations, including knowledge of the political, economic, social and other contexts in which they operate.

## MPA-MBA stream

Jointly offered by the Department of Political Studies and the Asper School of Business, this MPA-MBA 12 credit-hour specialization in Business-Government Relations provides participating MPA and MBA students reciprocal opportunities to understand each others management environments, and to develop joint understandings such as how to maximize
business-government cooperation and synergies. In addition to their own program requirements, students enrolled in the stream take 9 c.h. of courses in the other discipline as well as a capstone 3 c.h. course in Business-Government Relations. (limited space)

## MPA Defence Administration stream:

A specialized stream offered to MPA students who are members of the Canadian Forces who are enrolled in, or who have completed, the Aerospace Systems Course (ASC) through the Canadian Forces School of Aerospace Studies (CFSAS) at 17 Wing Winnipeg. Successful completion of the ASC program reduces the MPA degree requirement to 24 c.h. In addition to the core requirements of the MPA degree, Defence Administration stream students take 6 c.h. of specially designed courses in the field of defence administration.

## Master of Public Administration, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, applicants for admission to the program must be one of the following:

Persons holding a recognized three-or four-year General or Advanced Bachelors degree (B.A., B.Sc., B.E.S., etc.)
or

Persons holding a recognized four-year honours Bachelor's degree (or equivalent)
or

Persons who do not hold an undergraduate degree, but have attained positions of marked responsibility in either public or private sector management, and who have a demonstrated record of outstanding performance in their career. Admissions in this category will normally be restricted to one or two students per academic year.

It is preferred, but not required, that applicants have some formal course background in public administration, political science or economics. Students from other disciplines are also encouraged to apply.

## Application Deadline

Department deadline for applications for Regular Session is January 15

Contact the department for additional application procedures.

Program Requirements

## Two-Year MPA Program

Students who are admitted as graduates of a general bachelor's degree program or who are admitted as exceptional candidates not holding an undergraduate degree are required to satisfactorily complete an academic program consisting of a minimum of 48 credit hours. Within the 48 credit hours, 27 hours of credit must be taken from among the Core Courses and a further 21 hours of credit from among the approved options. All students must complete up to 18 hours of credit at the 700/7000 level, including the 700/7000 level core courses. A student may elect, with permission, to write a Master's thesis in lieu of 12 credit hours of 700/7000 level option coursework.

## One-Year MPA Program

Students who are admitted as graduates of an Honours bachelor's degree (or equivalent) are required to satisfactorily complete an academic program consisting of a minimum of 24 credit hours. Students who, prior to admission, have not completed 24 credit hours in courses equivalent to those designated as 4000 level Core Courses, or have not completed appropriate option course equivalents, will normally be required to complete the appropriate course(s) in addition to the 24 credit hour program minimum. All students must complete up to 18 hours of credit at the 7000 level, including the 7000 level core courses. A student may elect, with permission, to write a Master's thesis in lieu of 12 credit hours of 7000 level option course work.

## Co-op Education Option in Public Administration

The Co-operative Education Option in the Master of Public Administration program combines full-time academic study with the benefits of practical work experience, largely in the public sector. A full-time student who has completed one academic year in good academic standing will be eligible to engage in full-time employment. The program requires the successful completion of two work-terms of 13 weeks each. The work terms provide students with practical experience, enriched knowledge in an area of policy specialization, industry-standard remuneration, and guidance in career choices.

Students engaged in full-time study in the M.P.A. program are eligible to apply for the full-time co-operative education option on satisfactory completion of their first year of full-time M.P.A. studies ( 24 credit hours). The co-op option consists of two 13-week work terms which can be taken consecutively or separately. Each work term carries three hours of course credit and each must be satisfactorily completed as part of the co-op option. Co-op credits do not replace academic credits, thus students in the two-year M.P.A. program with a co-op option must therefore complete a minimum of 54 credit hours as part of their degree requirements. Students in the one-year M.P.A. program with a co-op option must complete a minimum of 30 credit hours as part of their degree requirements. Students intending to apply for the M.P.A. co-op option should read the detailed option description below.

## Application and Eligibility

Application for the Co-operative Education Option in the Master of Public Administration (M.P.A.) program is part of the normal application process for the M.P.A. program as a whole. The Co-operative Education Option is restricted to those who apply for full-time study in the M.P.A. Students who are accepted into the M.P.A. with a co-operative option must, in their first academic year, successfully complete required non-credit courses in addition to their full-time academic course load.

## Work Terms and Continuance

On entry to the M.P.A. program, applicants accepted for the co-op option must arrange their program with the director of co-operative education in the MPA program and take part in a competitive job-matching process conducted in an Employers' Forum. Students who are eligible for co-op, but who are not matched with a co-op work term, will be able to continue in the regular M.P.A. program. Co-op students who have successfully completed one full academic year of coursework, and the required non-credit courses, and who have satisfied the M.P.A. requirements for continuation in the program, will be eligible to engage in their first work term placement. They must also complete relevant workshops, etc. to maintain co-op eligibility.

Each work term is 13 weeks duration and each work term carries three hours of course credit for which registration is required. Co-op students are considered to have full-time student status while engaged in a work term placement. Coop students must successfully complete two work terms in addition to their academic program. Work terms are evaluated in terms for job performance and assigned written work (project or practicum). The final grade for each work term will employ the GPA scale which is used by the M.P.A. program. The course and grade requirements ( B average overall and no course less than $\mathrm{C}+$ ) for the co-operative education option are those which govern the M.P.A. program as a whole. If a co-op student fails to maintain these requirements, s/he will be permitted one make-up work term attempt. If a student fails to meet the requirements on the make-up attempt, s/he will be required to withdraw from the M.P.A. program.

Ph.D. in Public Admin,
Public Administration does not offer a Ph.D. Program.

## Public Administration - ECON 3000 Level <br> ECON 3170 Introduction to Quantitative Methods in Economics Cr.Hrs 3

(Formerly 018.317) Quantification of economic models; organization and presentation of economic data; probability; statistical estimation and testing of hypotheses with economic applications; simple regression. Prerequisite: [a grade of "C" or better in six credit hours of 1000 level Economics] or written consent of instructor.

## ACADEMICCALENDAR

ECON 3180 Introduction to Econometrics Cr.Hrs. 3 (Formerly 018.318) The application of statistical tools, especially regression analysis for estimating economic relationship and testing economic hypotheses. Also offered as ABIZ 3080 by Agricultural Economics. May not be held with ABIZ 3080 (061.308). Prerequisite: [a grade of "C" or better in ECON 3170 (018.317)] or [a grade of "C" or better in each of STAT 2000 (005.200) and six credit hours of 1000 level economics].

ECON 3300 Canadian Economic History Cr.Hrs. 6 (Formerly 018.330) A study of Canada's economic growth with emphasis on the influence of Europe and the United States. Students may not hold credit for both ECON 3300 (018.330) and ECON 3301 (018.330). Prerequisite: none.

ECON 3362 Labour Economics 1 Cr.Hrs. 3
An introduction to labour economics, including labour supply, labour demand and the determination of wages and employment. Students may not hold credit for both ECON 3362 and the former ECON 3360 (018.336). Prerequisite: a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270).

ECON 3364 Labour Economics 2 Cr.Hrs. 3 Analysis of topics in labour economics such as unemployment, immigration, gender discrimination and the impact of unions. Students may not hold credit for both ECON 3364 and the former ECON 3360 (018.366).
Prerequisite: a grade of "C" or better in ECON 3362.
ECON 3374 Public Expenditure Analysis and Policy Evaluation Cr.Hrs. 3
The study of the role of government in the economy, government budget and expenditure evaluation issues, benefit-cost analysis, as well as government intervention regulation, public pricing, and ownership issues. Students may not hold credit for both ECON 3374 and the former ECON 3370 (018.337). Prerequisite: a grade of " C " of better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270).

ECON 3376 Taxation, Tax Policy and Inter-government Public Finance Issues Cr.Hrs. 3
A study of the principles of taxation, tax policy in Canada and elsewhere, government deficit and debt issues and fiscal federalism with emphasis on inter-governmental finance issues. Students may not hold credit for both ECON 3376 and the former ECON 3370 (018.337). Prerequisite: a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270).

## ECON 3392 An Introduction to Development

Economics Cr.Hrs. 3
The definition and major challenges of development and an introduction to theories of growth and development. Students may not hold credit for both ECON 3392 and the former ECON 3390 (018.339). Prerequisite: [a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270)] and [a grade of "C" or better in ECON 2470 or ECON 2471 (018.247) or ECON 2800 (018.280)] or written consent of instructor.

ECON 3394 Development Economics: Problems and Policies Cr.Hrs. 3
Processes and problems of development policies to accelerate change. Economic relations between developed
and developing regions. Students may not hold credit for both ECON 3394 and the former ECON 3390 (018.339). Prerequisite: [a grade of "C" or better in ECON 2450
(018.245) or ECON 2451 (018.245) or ECON 2700
(018.270)] and [a grade of "C" or better in ECON 2470 (018.247) or ECON 2471 (018.247) or ECON 2800 (018.280)] and [a grade of "C" or better in ECON 3392 or ECON 2630 (018.263)] or written consent of instructor.

ECON 3510 Industrial Relations Cr.Hrs. 6
(Formerly 018.351) A study of comparative employeremployee relationships in Canada and other selected countries as affected by market forces, social traditions, and government action. Students may not hold credit for both ECON 3510 (018.351) and LABR 3510 (153.351). Prerequisite: [a grade of "C" or better in six credit hours of 1000 level Economics] or [a grade of "C" or better in both LABR 1260 (the former LABR 1270 or 153.127) and LABR 1290 (153.129)].

ECON 3610 Special Studies Cr.Hrs. 3
(Formerly 018.361) This reading course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: written consent of instructor. As the course content will vary from year to year, students may take this course more than once for credit.

ECON 3620 Special Studies Cr.Hrs. 6
(Formerly 018.362 ) This reading course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: written consent of instructor. As the course content will vary from year to year, students may take this course more than once for credit.

ECON 3640 Economics of the Financial System Cr.Hrs. 3 (Formerly 018.364) Flows of funds through the financial system; savings and investment and asset choices of households and firms; intermediation by financial institutions; arbitrage between and within countries, government financial policy, with special reference to Canada. Students may not hold credit for ECON 3640 (018.364) and any of: ECON 3641 (018.364) or FIN 3460 (009.346). Prerequisite: a grade of " C " or better in one of: ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2460 (018.246) or ECON 2461 (018.246) or ECON 2700 (018.270) or ECON 3700 (018.370).

ECON 3650 Monetary Macroeconomics and Policy Cr.Hrs. 3 (Formerly 018.365) Demand for and supply of money; term structure of interest rates; tools of central banking; design and conduct of monetary policy. Students may not hold credit for both ECON 3650 ( 018.365 ) and ECON 3651 (018.365). Prerequisite: a grade of " C " or better in one of: ECON 2470 (018.247) or ECON 2471 (018.247) or ECON 2480 (018.248) or ECON 2481 (018.248) or ECON 2800 (018.280) or ECON 3800 (018.380).

ECON 3660 Economic Ideas and Social
Institutions Cr.Hrs. 3
(Formerly 018.366) A study of the nature and development of economic ideas: how they influence and are influenced by changing material and intellectual conditions and how they interact with evolving institutions in society. Students may not hold credit for both ECON 3660 (018.366) and ECON 3661 (018.366). Prerequisite: [a grade of "C" or better in six credit hours of 1000 level Economics] or written consent of
instructor.
ECON 3670 International Trade Cr.Hrs. 3 (Formerly 018.367) A study of the theory of international trade and modern trade issues including the effect of economic integration on growth, distribution, national policy and the environment. Prerequisite: a grade of " C " or better in one of: ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270). ECON 2460 (018.246) or ECON 2461 (018.246) is recommended.

ECON 3680 International Finance Cr.Hrs. 3
(Formerly 018.368) A study of the theory of international financial markets and issues in open economy macroeconomics focusing on the balance of payments, exchange rates and the effects of international financial integration on national economies. Prerequisite: a grade of "C" or better in one of: ECON 2470 (018.247) or ECON 2471 (018.247) or ECON 2800 (018.280). ECON 2480 (018.248) or ECON 2481 (018.248) is recommended.

ECON 3690 Economic Issues of Health Policy Cr.Hrs. 3 (Formerly 018.369) The structure, functioning and financing of the Canadian health care delivery system and the demand for health care in Canada. Prerequisite: a grade of " C " or better in six credit hours of 1000 level Economics.

ECON 3700 Microeconomic Analysis 2 Cr.Hrs. 3 (Formerly 018.370) An intensive study of the principles and techniques of microeconomic analysis including consumer theory, theory of the firm, market structures, factor markets and externalities. Students may not hold credit for ECON 3700 (018.370) and any of: ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2460 (018.246) or ECON 2461 (018.246). Prerequisite: written consent of department head.

ECON 3710 Sustainable Development: Issues and Policy Cr.Hrs. 3
(Formerly 018.371) An examination of the theory and practice of economic sustainability, ecological sustainability, and social sustainability, with emphasis on analysing current issues and designing policies to achieve sustainable development. Prerequisite: a grade of " C " or better in six credit hours of 1000 level Economics.

ECON 3720 Urban and Regional Economics and Policies Cr.Hrs. 3
(Formerly 018.372) An introduction to the study of the determinants of the spatial distribution of economic activity among urban centres and regions. Particular attention will be paid to such contemporary Canadian problems as regional disparities, urban and environmental decay, and urban renewal, and the policy issues involved in dealing with these problems. Prerequisite: a grade of " C " or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270).

ECON 3730 Topics in Mathematical Economics Cr.Hrs. 3 (Formerly 018.373) Mathematical methods used in economic analysis. Topics will vary from year to year depending on the interests of instructors and students. Prerequisite: [a grade of "C" or better in ECON 2530 (018.253)] or written consent of instructor.

ECON 3742 Industrial Organization and Firm
Strategy Cr.Hrs. 3
Market structure and firms' strategic decisions will be
analyzed. Topics may cover monopoly pricing strategies such as price discrimination; non-pricing strategies such as advertising, quality decisions and differentiated products; dynamic oligopoly models; mergers; anti-competitive behaviour; and auctions. This course assumes students have a sound background in economic theory, as well as single-variable calculus and basic statistics. Students may not hold credit for both ECON 3742 and the former ECON 3740 (018.374). Prerequisite: [a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270)] or consent of the instructor.

ECON 3800 Macroeconomic Analysis 2 Cr. Hrs. 3 (Formerly 018.380) An intensive study of the mainstream approaches to explaining output and inflation, including their mathematical structure and empirical implications. Students may not hold credit for ECON 3800 (018.380) and any of: ECON 2470 (018.247) or ECON 2471 (018.247) or ECON 2480 (018.248) or ECON 2481 (018.248). Prerequisite: written consent of department head.

ECON 3810 Alternative Approaches to Macroeconomic Analysis Cr.Hrs. 3
(Formerly 018.381) A survey of Post-Keynesian, Cambridge, Marxian, and institutionalist approaches to macroeconomic fluctuations, contrasting their theoretical and policy frameworks with those of mainstream macroeconomics. Prerequisite: written consent of department head.

## Public Administration -POLS $\mathbf{3 0 0 0}$ Level

POLS 3100 Gender and Politics in Canada Cr.Hrs. 3 (Formerly 019.310) This course introduces the principal themes in the study of gender and politics in Canada. Topics may include women's political organizing and activism, representation in political institutions, the gendered division of labour in the private and public spheres, gender and public policy, and the gendered nature of political behaviour. Prerequisite: [a grade of "C" or better in POLS 2070 (019.207) or POLS 2071 (019.207)] or written consent of instructor or department head.

POLS 3140 Selected Topics in Politics 1 Cr.Hrs. 3 (Formerly 019.314) The content of this course will vary. Contact the department for a course description. Prerequisite: written consent of instructor or department head. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 3150 Selected Topics in Politics 2 Cr.Hrs. 3 (Formerly 019.315) The content of this course will vary. Contact department for a course description. Prerequisite: written consent of instructor or department head. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 3160 Human Rights and Civil Liberties Cr.Hrs. 3 (Formerly 019.316) An examination of the foundations of modern human rights systems in liberal democracies. Topics addressed include the main philosophical arguments on human rights, dominant legal theories of rights, and international conventions and systems of human rights protection. Prerequisite: [a grade of "C" or better in in one of: POLS 2510 (019.251) or POLS 2511 (019.251)] or written consent of instructor or department head.

## ACADEMICCALENDAR <br> 2012-2013 •

## University of Manitoba

POLS 3170 The Canadian Charter of Rights and Freedoms Cr.Hrs. 3
(Formerly 019.317) A systematic examination of the rights and freedoms contained in the Charter through Supreme Court decisions. Additional topics addressed include the historical, political and intellectual sources of rights protection in Canada and a review of Canadian human rights legislation. Prerequisite: [a grade of "C" or better in one of: POLS 2070 (019.207) or POLS 2071 (019.207)] or written consent of instructor or department head.

POLS 3200 International Security and Conflict Management Cr.Hrs. 6
(Formerly 019.320) A study of contemporaty world conflict, conflict management, and issues of global security.
Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3220 Globalization and the World Economy Cr.Hrs. 3 (Formerly 019.322) An exploration of issues relating to globalization, including regionalism, economic structures and regimes, multinational corporations, global debt, problems in the developing world, and the future for leadership in the international system. Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3240 Feminist Political Theory Cr.Hrs. 3
(Formerly 019.324) An examination of feminist approaches to the status and participation of women in political life. The course also includes feminist discourse on ethical issues and state policy.

POLS 3250 International Political Economy Cr.Hrs. 3 (Formerly 019.325) A survey of the relationship between political authority and the production and distribution of global wealth. Emphasis is placed on the historical development of international political economy, its fundamentals, as well as major theoretical perspectives. Students may not hold credit for both POLS 3250 (019.325) and POLS 3251 (019.325). Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3330 Politics of the European Union Cr.Hrs. 3 A study of the creation and evolution of the "European movement" which began after World War II as well as the various stages of European integration to the present day. Topics include institutional development; economic, monetary, and political union; and the global relations of the modern EU. Students may not hold credit for both POLS 3330 and the former POLS 2430 (019.243). Prerequisite: [a grade of "C" or better in one of: POLS 2000 (019.200) or POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3340 Middle East Politics Cr.Hrs. 3
An examination of the Middle East as a region of global strategic significance, with an emphasis on the major issues related to war and peace in selected Middle Eastern conflicts. Students may not hold credit for both POLS 3340 and POLS 3140 (019.314) when offered with the topic "Arab Israeli Conflict."

POLS 3470 Canadian Public Management Cr.Hrs. 3 An introduction to the internal and external factors affecting
contemporary public sector management in Canada. The course will examine the primary values, policies, processes, and structures within the civil service. Prerequisite: [a grade of "C" or better in one of: POLS 2070 (019.207) or POLS 2071 (019.207) or POLS 2571 (019.257) or the former POLS 2570 (019.257)] or written consent of instructor or department head.

## POLS 3510 Political Doctrines of the Twentieth

Century Cr.Hrs. 6
(Formerly 019.351) A survey of major contemporary systems of ideas which seek to explain or justify political behaviour.

POLS 3520 Canadian Foreign and Defence Policy Cr.Hrs. 6 (Formerly 019.352) An examination of Canadian foreign and defence policy, with attention to contemporary events and issues. The course is designed to examine both foreign and defence policies as interdependent issues for Canadian interests. The course will assess the evolution and changing priorities of Canadian foreign and defence issues, with particular attention to Canada's relations with the United States, Europe, Asia and the Third World. Students may not hold credit for both POLS 3520 (019.352) and POLS 3561 (019.356). Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

## POLS 3570 Administrative Theory in the Public

Sector Cr.Hrs. 3
A study of the fundamental principles with which to understand human behaviour inside public organizations. The course addresses a diverse but comprehensive set of historical and current theories, concepts and approaches in the field of public administration. Prerequisite: [a grade of "C" or better in one of: POLS 2000 (019.200) or POLS 2070 (019.207) or POLS 2571 (019.257) or POLS 3470 or the former POLS 2570 (019.257)] or written consent of instructor or department head.

## POLS 3600 Political Concepts Cr.Hrs. 3

(Formerly 019.360) An exposition and analysis of the role and meaning of terms central to political discourse. Among concepts to be studied are power, community, justice, freedom, equality and obligation. Prerequisite: [a grade of "C" or better in POLS 2510 (019.251) or POLS 2511 (019.251)] or written consent of instructor or department head.

POLS 3640 Comparative Defence Policy Cr.Hrs. 3 (Formerly 019.364) The examination within a comparative framework of the factors determining the making and implementation of the defence policies of a number of representative and significant countries. Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3670 Canadian Political Parties Cr.Hrs. 3 (Formerly 019.367) This course provides students with an understanding of the origins, evolution, operation and programmes of Canadian political parties. Topics addressed include party types, party systems, party organization and financing, electoral activities and party leadership. Prerequisite: [a grade of "C" or better in one of: POLS 2070 (019.207) or POLS 2071 (019.207)] or written consent of instructor or department head.

POLS 3710 Distributive Justice Cr.Hrs. 3
A study of the question of whether, and to what extent, inequalities of various kinds are compatible with the demands of both justice and community. This course examines contending answers to the question by investigating classical and/or contemporary theories of distributive justice. Prerequisite: a grade of " C " or better in POLS 2510 (019.251) or POLS 2511 (019.251).

POLS 3720 Politics, Government and Society in Ukraine Cr.Hrs. 3
An analysis of political transition and development in Ukraine. Ukraine's international relations will also be examined. Students may not hold credit for both POLS 3720 and POLS 3140 (019.314) when offered with the topic "Government Politics in Ukraine" or the former POLS 2920 (019.292). Prerequisite: [a grade of "C" or better in one of: POLS 2000 (019.200) or POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3810 Introduction to Marxism Cr.Hrs. 3
An overview of the thought of Karl Marx and Fredrick Engels, focusing on its philosophical origins, key concepts and ideas of their historical materialism, critique of political economy, political theory and philosophy. The development of Marxism after Marx and Engels, particularly in the tradition of Western Marxism, will be traced in the case of each concept and idea. Students may not hold credit for both POLS 3810 and the former POLS 4810 (019.481).

POLS 3840 Approaches to the Study of International

## Relations Cr.Hrs. 3

(Formerly 019.384) An overview of the various competing theoretical approaches used in the analysis of international relations, as well as the methodologies used by international politics analysts. Students may not hold credit for both POLS 3840 (019.384) and POLS 3841. Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3860 Canadian Federalism Cr.Hrs. 3
(Formerly 019.386) An examination of Canadian federal structures and processes with emphasis on constitutional influences, the evolution of jurisdictions, province-building and contemporary federal issues.

POLS 3880 Comparative Foreign Policy Cr.Hrs. 3 (Formerly 019.388) A comparative study of the factors affecting foreign policy in selected countries including, but not limited to, Canada, the United States, Russia, China, Japan, Great Britain, France, and Germany. The course also includes an examination of international, regional, and domestic factors affecting the creation of foreign policy by states. Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3920 American Politics Cr.Hrs. 6 (Formerly 019.392) An examination of institutions, processes, public policies, and current public affairs in the United States. Prerequisite: [a grade of "C" or better in POLS 2000 (019.200)] or written consent of instructor or department head.

POLS 3930 Foreign Policy Decision-Making Cr.Hrs. 6 (Formerly 019.393) The analysis and construction of selected theoretical models of the foreign policy decisionmaking process. The case studies examined will refer primarily, but not exclusively, to U.S. foreign policy decisionmaking. Students may not hold credit for both POLS 3930 (019.393) and POLS 3931 (019.393).

## POLS 3950 Research Methods in the Study of

Politics Cr.Hrs. 3
(Formerly 019.395) An introduction to the major quantitative and qualitative research strategies employed in the study of politics. The topics addressed include interviewing, content analysis, comparative studies, survey design, sampling, research ethics and basic statistical analysis. Prerequisite: [a grade of " C " or better in six credit hours of Political Studies at the 2000 level] or written consent of instructor or department head.

POLS 3960 Canadian Politics Cr.Hrs. 6
(Formerly 019.396) An examination of recurrent issues and problems in the Canadian political culture including the evolution of parties and ideologies, and issues such as regionalism, dualism, continentalism, civil liberties and the interventionist state. Prerequisite: [a grade of " C " or better in POLS 2070 (019.207) or POLS 2071 (019.207)] or written consent of instructor or department head.

## Public Administration -POLS 4000 Level

POLS 4140 Canadian Political Ideas Cr.Hrs. 3
An examination of the ideas that underlie Canadian politics. What are the values at the centre of political movements in Canada and where do they come from? How have these values changed over time and why? We will attempt to answer these questions by exploring the development of Canadian political ideas as well as our current ideological context in Canada. Effort will be made to reflect on ideological debate on contemporary issues of the day. Prerequisite: written consent of instructor or department head.

POLS 4150 Indigenous Governance Cr.Hrs. 3
An examination of Indigenous governance before and since the 'European invasion' which introduces key themes, debates and controversies pertaining to Indigenous governance and its study. Students may not hold credit for both POLS 4150 and POLS 4160 (019.416) when offered with the topic "Indigenous Governance." Prerequisite: written consent of instructor or department head.

POLS 4160 Selected Topics in Politics 3 Cr.Hrs. 3 (Formerly 019.416) The content of this course will vary. Contact department for a course description. Prerequisite: written consent of instructor or department head. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 4170 Selected Topics in Politics 4 Cr.Hrs. 3 (Formerly 019.417) The content of this course will vary. Contact department for a course description. Prerequisite: written consent of instructor or department head. As the course content will vary from year to year, students may take this course more than once for credit.

## ACADEMIC CALENDAR

POLS 4180 Provincial Politics in Canada Cr.Hrs. 3 (Formerly 019.418) The course focuses on politics at the provincial level in Canada and on the politics of the regions: Atlantic, Quebec, Ontario, the West and BC. Emphasis is on a comparison of political cultures, governments, budgets, parties, elections, and political change across the regions. Prerequisite: written consent of instructor or department head.

POLS 4190 Manitoba Politics and Government Cr.Hrs. 3 (Formerly 019.419) An examination of politics and government in modern Manitoba. Topics addressed include federal-provincial relations, parties and elections, political culture, the legislative process and public policy. Prerequisite: written consent of instructor or department head.

POLS 4370 Comparative Public Administration Cr.Hrs. 3 A study of the systems, processes, and values of public administration in an international comparative context. Topics include public sector organization and reform, international standards of policy and practice, and the role of international institutions in promoting public sector modernization. The course covers countries from several geographic zones and places domestic issues in the larger, global political economy. Prerequisite: written consent of instructor or department head.

POLS 4470 Managing Modern Government Cr.Hrs. 3 A study of the skills required to effectively manage in the public sector. Topics covered include: managerial effectiveness, written and interpersonal communication, gaining power and influence, working with political staff and politicians, conflict management, risk management, performance management, creating and working through teams, decision-making, motivation, and empowerment. Students may not hold credit for both POLS 4470 and the former POLS 4570 (019.457). Prerequisite: written consent of instructor or department head.

POLS 4510 Advanced History of Political Ideas Cr.Hrs. 3 (Formerly 019.451) An in-depth analysis of selected texts in the history of political theory with a focus on ideas and concerns relevant to contemporary political life. Prerequisite: written consent of instructor or department head.

POLS 4530 Regionalism in International Relations Cr.Hrs. 3 (Formerly 019.453) This course examines the nature and substance of political relations among states in the international system to institutionalize relations for economic, political, or security reasons. Emphasis is given to post-1945 and contemporary regional relationships. Regional arrangements studied in the course include, but are not necessarily limited to, North America, Europe, the AsiaPacific rim, the Middle East, Latin America, and Africa. Students may not hold credit for both POLS 4530 (019.453) and POLS 4830 (019.483). Prerequisite: written consent of instructor or department head.

POLS 4610 Contemporary Political Theory Cr.Hrs. 3 (Formerly 019.461) An examination of recent developments in the analysis of political ideas, institutions, and behaviour. Prerequisite: written consent of instructor or department head.

POLS 4660 The State in the Economy Cr.Hrs. 6 (Formerly 019.466) Drawing from literature in Canadian
political economy, this course will examine historical and contemporary patterns and forms of Canadian state involvement in the economy. Both federal and provincial contexts will be studied and selected areas of current interest, such as the role of crown corporations and industrial policy, will be emphasized. Prerequisite: written consent of instructor or department head.

POLS 4710 Political Theory and the Family Cr.Hrs. 3
An examination of the normative aspects of the relations between children, families and the state. Prerequisite: written consent of instructor or department head.

POLS 4730 Strategic Studies Cr.Hrs. 6
(Formerly 019.473) An examination of the role, management, and politics of organized force in the international system. Prerequisite: written consent of instructor or department head.

POLS 4860 The Canadian Policy Process Cr.Hrs. 6 (Formerly 019.486) This course will examine a number of conceptual frameworks for the analysis of the policy process, will analyze the role of different institutions and actors in the policy process, and will appraise current government responses to problems within Canadian society.
Prerequisite: written consent of instructor or department head.

POLS 4940 American Foreign Policy Cr.Hrs. 6 (Formerly 019.494) An analysis of the foreign policy of the United States from 1945 to the present, focusing on the explanation of the foreign policy decisions taken and the policy-making process giving rise to them. Prerequisite: written consent of instructor or department head.

## Public Administration -POLS 6000 Level POLS 6010 The Manitoba Legislative Internship

 Seminar Cr.Hrs. 6(Formerly 019.601) This credit is granted to six individuals who annually complete the assignment as Legislative Interns within the Manitoba Legislative Assembly.

POLS 6500 Co-operative Education Work 1 Cr.Hrs. 3 (Formerly 019.650) This credit is granted to full time registered students in the Master of Public Administration who have registered in the co-op option of the program. Eligible candidates must have attended two mandatory workshops and completed a minimum 24 credit hours of course work prior to the first work term placement. Work terms are paid positions by employers primarily in the public sector. Work terms are a minimum of 13 weeks.

POLS 6510 Co-operative Education Work 2 Cr.Hrs. 3 (Formerly 019.651) This credit is granted to full time registered students in the Master of Public Administration who have registered in the co-op option of the program. Eligible candidates must maintain full time status and have attended two mandatory workshops, completed a minimum 24 to a maximum of 48 credit hours of course work, and successfully completed a first work term prior to the second work term placement. Work terms are paid positions by employers primarily in the public sector. Work terms are a minimum of 13 weeks.

## ACADEMIC CALENDAR

## Public Administration -POLS 7000 <br> Level

POLS 7280 Directed Readings in Politics Cr.Hrs. 3 (Formerly 019.728) An independent reading and/or research course on a selected topic in political studies, undertaken and arranged in consultation with the prospective instructor, upon the approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7290 Directed Readings in Politics 2 Cr.Hrs. 6 (Formerly 019.729) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7300 Directed Readings in Public
Administration Cr.Hrs 3
(Formerly 019.730) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7330 State-Civil Society Relations Cr.Hrs. 3 An examination of how the state relates to civil society actors, notably the voluntary sector in Canada. Students will critically assess the role voluntary organizations play - and should play - in governing process.

POLS 7340 Canadian Government Cr.Hrs. 3
(Formerly 019.734) Examines the core institutions of Canadian Government and politics including parliamentary government, federalism, the Constitution and the Charter of Rights and Freedoms. Students may not hold credit for both POLS 7340 (or 019.734) and the former 019.776.

POLS 7350 Canadian Democracy Cr.Hrs. 3
(Formerly 019.735) Examines the core institutions and processes of Canadian democracy including political parties, elections, voting, social movements, interest groups and public opinion. Students may not hold credit for both POLS 7350 (or 019.735) and the former 019.776.

POLS 7370 Seminar in the Theory and Practice of Public Administration Cr.Hrs. 6
(Formerly 019.737) The intent of this course is to provide insight into the exigencies of actual public administration. The course will be conducted on a topical basis within the framework of certain trends facing Canadian governments today. (The course will attempt to utilize, to the fullest extent possible, the particular expertise of students in the program, faculty members, and of both elected and appointed public officials.) Students may not hold credit for both POLS 7370 (or 019.737) and the former 019.731.

POLS 7410 Selected Topics in Political Behaviour

## 1 Cr.Hrs. 3

(Formerly 019.741) A systematic examination of empirical research in the area of political socialization and political culture. Students may not hold credit for both POLS 7410 (or
019.741) and the former 019.725.

POLS 7470 Strategic Human Resource Management in Government Cr.Hrs. 3
A study of the human resource management functions, including planning, staffing, training, performance management, compensation and labour relations, in ways that optimize organizational performance. This course will also address contemporary challenges including recruitment and retention, managing change, demographic shifts, and information technology.

POLS 7520 The Political Classics Cr.Hrs. 3 (Formerly 019.752) A thorough study of selected works with special attention to methodology, historical content, theoretical position and universal significance. Students may not hold credit for both POLS 7520 (or 019.752) and the former 019.771.

POLS 7530 International Political Economy Cr.Hrs. 3 (Formerly 019.753) An examination of the systematic study of international political economy. Particular attention is paid to the foreign economic policies of advanced industrialized states and the various issues surrounding the redistribution of wealth and influence in the contemporary international system.

## POLS 7550 Contemporary Issues in Canadian

Politics Cr.Hrs. 3
(Formerly 019.755) A seminar series examining a contemporary debate in Canadian politics and government. The specific topic will vary from year to year depending on faculty interest and specialization.

## POLS 7610 Political Theory and Contemporary

 Issues Cr.Hrs. 3(Formerly 019.761) An examination of recent theoretical perspectives on contemporary political institutions, problems and values. Students may not hold credit for both POLS 7610 (or 019.761) and the former 019.771.

POLS 7710 Liberalism and Its Critics Cr.Hrs. 3
An advanced study of liberalism and various theoretical challenges to its ethical and political claims.

POLS 7720 Comparative Government Cr.Hrs. 6 (Formerly 019.772) Three hours a week, both terms. The primary focus of this course will be on the major Western "democracies" (e.g., United Kingdom, United States, and Western Europe). Phenomena to be examined include political participation and the problems of social change in industrial societies.

POLS 7790 International Relations Theory Cr.Hrs. 3 (Formerly 019.779) A critical assessment of basic theories and models used in International Relations, emphasizing theoretical approaches and research. Students may not hold credit for both POLS 7790 (or 019.779) and the former 019.773.

POLS 7850 Contemporary Strategic and Security
Studies Cr.Hrs. 6
(Formerly 019.785) An advanced course in strategic studies. The evolution of strategic thought in the modern period will be examined, and particular emphasis will be placed on the role of armed force in relation to the problem of international security. Students may not hold credit for both POLS 7850

## ACADEMIC CALENDAR 2012-2013 •

(or 019.785) and the former 019.783. Normally students will be expected to have taken POLS 4730 (or 019.473) or its equivalent as prerequisite.

POLS 7910 Multivariate Research Methods Cr.Hrs. 3 (Formerly 019.791) Introduction to the theory and application of multivariate regression models in political analysis. Students may not hold credit for POLS 7910 (or 019.791) and either the former 019.732 or 019.788 .

## Religion

Head: (Acting) Ian Whicher
Campus Address/General Office: 328 Fletcher Argue
Telephone: (204) 4749516
Fax: (204) 4747601
Email Address: religion@umanitoba.ca

Website:
http://www.umanitoba.ca/faculties/arts/departments/religion/

The Department of Religion began offering M.A. courses in 1976, and was authorized in 1992 to offer a Ph.D. Program. The M.A. is offered as a Joint Program in co-operation with the Department of Religion and Culture (formerly Religious Studies) at the University of Winnipeg. The Ph.D. in Religion is offered solely at the University of Manitoba.

These highly successful programs have graduated students in Biblical studies, history of Christianity, world religions, Asian religions, Islam, women and religion, hermeneutics, critical theory and other religion and culture fields.

## Fields of Research

Research specialization in the department include world religions, studies in Hebrew and New Testament Scriptures,

Christianity, Judaism; Islam, Buddhism, Hinduism, religion and cultures of western antiquity, ethics, methodology, body history, hermeneutics, critical theory and gender and sexuality.

## Research Facilities

Department programs are supported by substantial library holdings. Required research languages are offered either through the department or through affiliated units. Students have access to the computer lab that also serves as a meeting and study space.

## M.A. in Religion,

## Admission

The Department of Religion at the University of Manitoba and the Department of Religion and Culture (formerly Religious Studies) at the University of Winnipeg offer a joint Master of Arts program. Eligible for admission are graduates of the University of Manitoba holding a B. A. (Honours) degree in Religion; graduates of the University of Winnipeg holding a B.A. (four-year) in Religion and Culture; students who hold degrees equivalent to the B.A. (Honours) in Religion from other recognized universities or colleges; students who have completed a recognized pre-Master's program in Religion. Students who have courses with equivalent content or cognate courses in recognized departments or faculties other than Religion or Religious Studies may be given credit for up to 12 credit hours towards admission. To be eligible for admission, applicants must have achieved a cumulative grade point average of at least 3.0 (on a 4.0 point scale) in their last 60 credit hours of study and they must have completed a total of 60 credit hours in Religion. Breadth in preparation is expected as indicated by the description of the B.A. (Honours) in Religion in the University of Manitoba Undergraduate Calendar, or the fouryear B.A. in Religious Studies in the University of Winnipeg Calendar. Applications will be considered from B.A. (Honours) graduates in other disciplines with a strong background in Religion. Such students may be admitted at the pre-Master's level and required to complete a program of study as specified by the department. Applicants are also to submit a representative sample of written academic work, and two letters of references. Contact the Department of Religion for further information.

## Application Deadlines

The Department of Religion accepts applications for September admission. (January admission will be considered only in exceptional circumstances.) Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date. NOTE: Applicants who wish to be considered for funding are to submit their application for admission to the Faculty of Graduate Studies by January 15 for admission to the JMP for the following September.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. All JMP students must have obtained 6 credit hours in Methodology ( 3 credit hours in methodology for the study of Eastern Religions and 3 credit hours in methodology for the study of Western Religions) from a recognized university or college. Students entering the program who do not have 6 credit hours in methodology must satisfy this requirement in addition to the required credit hours of coursework needed for completion of MA program. Two types of program are available:

Thesis Option: minimum of 12 credit hours of coursework including:
a) Major courses: a minimum of six credit hours at the 7000 level;
b) Ancillary courses: a minimum of six credit hours at the 7000, 4000(UM)/5000(UW), or in special cases, at the 3000(UM)/ 3000(UW) level;
c) Demonstrated competence in a research language relevant to their area of study (typically satisfied by successfully completing language translation examinations);
d) Oral defense of thesis.

## Course and Comprehensive Option:

Students who choose this route must complete a minimum of 24 credit hours of graduate courses from one or both of the two departments involved in the JMP in Religion, with at least 18 credit hours to be taken at the 7000 (UM) / 7000 (UW) level, and at least 18 credit hours to be in Religion. Students may take 6 credit hours at the 4000 (UM) / 5000 (UW) level, and this is usually chosen from an extradepartmental field or ancillary. Students can, however, elect to take all 24 credit hours from within the two departments of the JMP in Religion.

Second Language Reading Requirement: Yes
Expected Time to Graduate: two years

## Ph.D. in Religion,

## Admission

Applications for admission to the Ph.D. program in Religion are accepted based on the availability of faculty and research resources. Students applying to the PhD program must have maintained at least a 3.5 average in their work at the MA level.

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Normally a thesis based M.A. in Religion (with
a minimum cumulative GPA of 3.5 ) or its equivalent will be required for entry into the Ph.D. program. Applicants must have previously obtained at least 6 credit hours of training in methodology ( 3 credit hours in methodology for the study of Eastern Religions and 3 credit hours in methodology for the study of Western Religions). Applications should include a research proposal (typical length is $8-10$ pages including bibliography), a representative sample of written academic work, and two letters of references. Contact the Department of Religion for further information.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the department at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the department at least 7 months prior to their intended start date. NOTE: The Department of Religion accepts applications for admission to the Ph.D. program for September entry only.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students accepted into the program are required to complete a minimum of 18 credit hours of coursework at the 7000 level. In addition, students must have at least 6 credit hours of current training in methodology ( 3 credit hours in methodology for the study of Eastern Religions and 3 credit hours in methodology for the study of Western Religions). Students must maintain a minimum grade point average (GPA) of 3.0 with no grade below $\mathrm{C}+$ for continuance in the program.

Students in the Ph. D. program must demonstrate competence in two research languages relevant to the proposed doctoral thesis. The research languages are determined on an individual basis by the student's advisory committee. Language requirements are normally satisfied by students successfully completing language translation examinations.

Second language requirement: yes

Expected time to graduation: approximately 4 years

## Religion - 7000 Level

RLGN 7020 Special Topics 1 Cr.Hrs. 3
(Formerly 020.702) Description not available for this course. As the course content will vary from year to year, students may take this course more than once for credit.

## Master of Social Work, Program Information

The Faculty has operated since 1943 and there are two different concentrations available through which students may receive M.S.W. degrees. They are addressed to the differing interests that are common within advanced social work practice and are identified in this curriculum as Social Services Administration and Social Clinical. The M.S.W. degree is fully accredited and recognized internationally as both a professional and academic qualification.

## Social Services Administration Stream

The stream's aim is to educate progressive social work managers, program evaluators, and policy analysts within the public, voluntary, and private sectors. A critical approach is used for examination of power, oppression, and resistance. Organizational theories, strategies, analyses of social service administration practice are examined.

## 

## ACADEMIC CALENDAR

Students acquire strong analytical and practice skills in policy analysis and social service administration. Through critical review of theories, techniques, and case study applications, students learn to develop and apply different models of social service administration, planning, implementation, and the evaluation of social policies and programs.

## Social Clinical Stream

This stream is based on an eco-systemic perspective, while also incorporating anti-oppressive and anti-colonial perspectives. This view provides a broad context for social work practice by emphasizing the interrelatedness of individuals, families, groups, and communities and their relationships with social institutions and cultural forces. The family unit, broadly defined, is given particular focus.

Social Work Program Description,
Graduates of this program currently occupy a wide range of positions within the human services in Canada and throughout the world. While the majority of graduates work within the social service sector others have become active as politicians, scholars, senior civil servants, private consultants and are also active in a wide range of fields such as international development work and the creation of information systems.

While the program covers the core material which is essential to social work practice there has been particular attention given to issues relevant to women and the Aboriginal communities. Many graduates are Aboriginal persons and are actively involved in the creation and operation of the Aboriginal human services organizations.

Considerable attention is given to issues of educational equity. In addition to treating these matters as course content, every effort is made to ensure that people from disadvantaged groups have access to the M.S.W. program. The purpose of this initiative is to achieve equality in professional education so that no person shall be denied educational opportunities or benefits for reasons unrelated to ability. In the fulfillment of this goal the aim is to correct the conditions of disadvantage in professional education experienced by Aboriginal peoples, persons with disabilities, immigrants and refugees to Canada, Gender and Sexual Minorities' group members and persons who are members of a visible minority in Canada. Educational equity means more than treating persons in the same way, it also requires special measures and the accommodation of difference.

## Fields of Research

The faculty are involved with research in virtually all areas of the human services covering clinical, administrative and planning issues. A partial list of current research includes questions regarding gender, international social development, ethnicity, the justice system, services for Aboriginal people, rural and northern development, family violence, day care, issues concerning disabled persons, the immigrant experience, the development of clinical services,
the political economy of the welfare state, the nature and treatment of pain, and services in child welfare.

## Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, the deadline for submission of applications to the program is January 15th for Canadian citizens and permanent residents and December 1st for International applicants.

## M.S.W. Admissions Criteria

- Possession of a B.S.W. degree (by June $30^{\text {th }}$ of the application year) from an accredited university which is recognized by the University of Manitoba.
- A Minimum Grade Point average of $3.0(\mathrm{~B})$ is required in the last 60 credit hours of university study.
- If courses have been taken subsequent to the degree as a Special Student and/or Occasional Student and/or in a subsequent degree or a PreMaster program, they will be calculated into the Grade Point Average as part of the last 60 credit hours.
- Applicants who self-identify as members of one or more of the Educational Equity priority groups and who possess a Grade Point Average between 2.5 and 2.99 will be reviewed for special consideration. Applicants with Adjusted Grade Point Averages below 2.5 will not be considered.

## Pre-M.S.W. Admissions Criteria

- Possession of, or eligible for the granting of, a degree other than Social Work at point of application from an accredited university which is recognized by the University of Manitoba. Persons who plan to graduate in May of the year of application are not eligible for admission.
- One year (1680 hours) of relevant social work experience, paid or volunteer (see application package for details).
- A minimum Grade Point Average of $3.0(\mathrm{~B})$ is required in the last 60 credit hours of the university study.
- If courses have been taken subsequent to the degree as a Special Student and/or Occasional Student and/or in a subsequent degree or a PreMaster program, they will be calculated into the Grade Point Average as part of the last 60 credit hours.
- Applicants who self-identify as members of one or more of the Educational Equity priority groups and who possess a Grade Point Average between 2.5 and 2.99 will be reviewed for special consideration. Applicants with adjusted grade point averages below 2.5 will not be considered.

Occasional Students

## 

## ACADEMIC CALENDAR 2012-2013 •

## University of Manitoba

An Occasional Student in Social Work is one who wishes to take graduate courses with no intention of proceeding to the Pre-M.S.W. program or the Master degree in social work at the present time. Pre-M.S.W. program courses available to Occasional Students holding a previous 4 year degree in a discipline other than social work (e.g., B.A., B.Ed.):

SWRK $3100 \quad$ Systematic Inquiry in Social Work 3 SWRK $6030 \quad$ Canadian Social Welfare Policy 6
SWRK 6040 Anti-Oppressive Social Work 3 Practice
SWRK $6060 \quad$ Social Work and Aboriginal People 3 The maximum number of credit hours permitted is six credit hours, plus SWRK 3100 (3 credit hours).
M.S.W. program courses available to Occasional Students holding a previous degree in social work and non-social work students currently registered in another graduate program:

SWRK Data Analysis for Social Work Research
6010
SWRK
6070
SWRK
7290
SWRK Clinical Evaluation of Social Work
7300 Interventions
SWRK Social Service Administration Practice
7310
SWRK Theoretical Foundations of Social Service
7400 Administration
SWRK Theoretical Foundations of Social Policy
7420 Analysis, Planning and Evaluation
SWRK Problem Seminar (Several topics are offered
7230 each year.

Consult timetable for current titles being offered)

Social Work Practice Seminar
7390
SWRK Evaluation Research in Social Work Practice
7430*
SWRK Policy Analysis in Social Work Practice
7440
The maximum number of credit hours permitted is 6 credit hours plus SWRK 6010 (3 credit hours) or SWRK 6070 (3 credit hours).

All Occasional and non-social work students are required to abide by the same pre/co-requisite policy that applies to Social Work students.
*Pre/co-requisite SWRK 6010 or SWRK 6070

## Educational Equity Initiative

For the purpose of identification the definitions for the Educational Equity priority groups are:

Aboriginal Peoples: All indigenous peoples of Canada including: First Nations, Metis, Denè and Inuit.

Visible Minorities: Persons other than Aboriginal peoples who, because of their colour, are a visible minority in Canada.

Immigrants: Immigrants are those who do not record Canadian citizenship by birth, and whose native tongue is NOT English.

Refugees: A Refugee is an individual who has left his/her country of residence because of persecution for belonging to a particular social, cultural, religious and/or national group, and/or for holding political beliefs and has been accepted for residence in Canada.

Persons with Disabilities: Persons with disabilities are those who would consider themselves disadvantaged by reason of any physical, intellectual, mental, sensory or learning impairment.

Gender and Sexual Minorities' group members: Persons who identify as Gay, Lesbian, Bi-Sexual, Trans-Gendered, Two-Spirited, Queer, Questioning, and /or Intersex.

These definitions are subject to change.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

Students may take the Pre-M.S.W. program on a part-time basis and the M.S.W. program on a full-time or part-time basis. There is a three year time limit to complete the PreM.S.W. program and a six year time limit to complete the M.S.W. program. There is no second language requirement.

## The Pre-M.S.W. Program

The Pre-M.S.W. program is designed to prepare students who do not have a B.S.W. degree from an accredited university, or its equivalent, for entry to the M.S.W. program. It is intended to build on the existing background and experience of students by providing them with an opportunity for focused study on Canadian social welfare policy, generalist social work practice, the philosophy and values of the profession of social work, including content on diversity and anti-oppression, and supervised practice in the field of social work.

## Program Requirements

SWRK 3100 Systematic Inquiry in Social Work 3
SWRK 4200 Field/Focus 6
SWRK 6020 Social Work Practice Seminar 6

SWRK 6040 Anti-Oppressive Social Work Practice 3
SWRK 6050 Field Practice
SWRK 6060 Social Work and Aboriginal People
Maximum credit hours load
Program Requirements

## ACADEMIC CALENDAR

## The M.S.W. Program

## The Social-Clinical Intervention Stream

Students must complete 24 or 27 credit hours of seminar and tutorial work (Students opting for the "Course-Based Specialization Option" must complete 27 credit hours during their M.S.W. Program. All other students require 24 credit hours). The program requires at least 12-18 months of fulltime study. Students may elect to take the program on a part-time basis.

The program includes 15 credit hours of core material (which must be completed within 24 months from date of admission) and 9 credit hours of electives. In addition to the course work, students are required to complete a thesis, practicum or the course-based specialization option. Students admitted prior to 2004 may complete Option 1 (thesis); Option 2 (practicum) or Option 3 (course-based specialization). Those students admitted in 2004 or later may complete Option 1 (thesis) or Option 3 (course-based specialization).

In addition to the one Advanced Social Work Practice Seminar required, students take nine hours of electives (up to six hours may be taken outside of the Social Work faculty).

Course SWRK 7290 is pre- or co-requisite to final approval of the proposal of the thesis, practicum or specialization course-based option.

## Social-Clinical Intervention Stream

## Core Courses and Electives

SWRK 6010 Data Analysis for Social Work Research 3

SWRK 6070 Qualitative Research in Social Work
SWRK 7290 Family-Focused Social Work Practice 6
SWRK 7300 Clinical Evaluation
SWRK 7390 Advanced Social Work Practice Seminar (Required elective-choose one from three offered) Electives* AND
Option 1
GRAD 7000 Thesis 0
Option 2
GRAD 7030 Practicum** 0
Option 3
Course-Based Specialization Option
SWRK 7180 Advanced Field Practice
SWRK 7190 Integrating Theory and Research in
Advanced Field Practice
NOTE:

* Electives may be chosen from SWRK 7390 Advanced Social Work Practice Seminars, and/or SWRK 7230 Problem Seminars (which include a number of seminars on different areas of clinical practice), and/or SWRK 7220 Selected Topics in Social Work, and/ or SWRK 7280 Readings in Social Work and Social Welfare Research.
**Available only to students admitted prior to 2004.

## The Social Services Administration Stream

Students must complete 24 or 27 credit hours of seminar and tutorial work (Students opting for the "Course-Based Specialization Option" must complete 27 credit hours during their M.S.W. Program. All other students require 24 credit hours). The program requires at least 12-18 months of fulltime study. Students may elect to take the program on a part-time basis.

The program includes 21 credit hours of required courses which much be completed within 24 months from date of admission. Students electing to study full-time may complete all 24 credit hours in one academic year. An addition to the course work, students are required to complete a thesis, practicum or the course-based specialization option. Students admitted prior to 2004 may complete Option 1 (thesis), Option 2 (practicum), or Option 3 (course-based specialization). Those students admitted in 2004 or later may complete Option 1 (thesis) or Option 3 (course-based specialization).

NOTE:

* Students should take their elective course in Social Work or another department. Part-time students should take SWRK 7310 and SWRK 7400 together and SWRK 7420/ SWRK 7430/ SWRK 7440 in the same academic year.
** Available only to students admitted prior to 2004.

## 

ACADEMIC CALENDAR
2012-2013 >

## Ph.D. in Social Work

The PhD program is an advanced degree, focusing on developing skills for research and teaching. All students must master advanced skills in both quantitative and qualitative research methods. A full range of opportunities for study is available, and we particularly encourage research concerning Aboriginal people and women.

## Admission

In addition to the admission requirements of the Faculty of Graduate Studies, admission requirements to the doctoral program in Social Work include:

Master of Social Work degree, or equivalent, from an accredited degree-granting university, with a minimum 3.0 grade point average (as defined by the University of Manitoba). Equivalency to a M.S.W. degree from the University of Manitoba is defined as: possession of a M.S.W. degree from an accredited program at another accredited university OR possession of a Master's level degree other than a M.S.W. delivered by an academic unit with the mandate of preparing social workers for professional practice, accredited by the relevant social work education authority, and which would render its holders eligible for registration with the Manitoba Institute of Registered Social Workers.

Applicants who possess a B.S.W. degree and a non-social work Master's degree may be admitted to a qualifying year during which the student may be required to complete all or selected core courses of the M.S.W. stream consistent with the applicant's Ph.D. focus of study. Equivalency standing of prior courses will be assessed by a committee that includes representatives from the Ph.D. Admissions Committee and the M.S.W. stream consistent with the applicant's Ph.D. focus of study. Applicants holding a B.S.W. degree and a non-social work Master's degree are encouraged to apply at least one year prior to when they intend to enter the Ph.D. program.

Minimum research competency in qualitative or quantitative methods equivalent to the level required for the Master of Social Work degree from the University of Manitoba, with a minimum grade of $3.0(B)$. Although the minimum requirement is for one course, applicants will be expected to have basic competency in both qualitative and quantitative methods.

Evidence of scholarly ability, through publications in refereed journals, other scholarly work of equivalent standard, or courses taught in accredited university programs must be provided.

A minimum of two years of professional practice experience in social work.

Admission is subject to the availability of an advisor with demonstrated scholarship in the applicant's proposed area of research.

## Advising

Each student is assigned an advisor on admission. An advisory committee that includes the advisor, one additional member from Social Work and one from another faculty will be appointed to assist the student in developing a study plan and to supervise the student's research. All members of the advisory committee must be members of the Faculty of Graduate Studies.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of TWO YEARS of study (the fall and winter terms of the first and second year following admission) is required.

The program consists of: (a) 27 credit hours of coursework, (b) a candidacy examination, and (c) a Ph.D. thesis.

## Course Requirements

Students must complete 27 credit hours of approved course work beyond the M.S.W. degree and will include:

Social Work core courses ( 6 credit hours): • SWRK 8010 Perspectives on Knowledge for Social Work (3 credit hours) - SWRK 8020 - Development of the Social Work Profession (3 credit hours)

Research Courses (12 credit hours): •SWRK 8030Advanced Qualitative Research in Social Work (6 credit hours) • SWRK 8040 - Advanced Quantitative Research in Social Work ( 6 credit hours)

Teaching Requirement ( 3 credit hours): • Seminar in PostSecondary Instruction (EDUB 7416) (3 credit hours) OR • an alternative requirement that addresses teaching (3 credit hours)

Electives ( 6 credit hours): $\bullet$ One elective in the student's area of specialization ( 3 credit hours) • One additional elective (3 credit hours)

## Candidacy

A candidacy examination committee will also be appointed when the student begins to prepare for the candidacy examination. This three-person committee, which includes the advisor, is responsible for administering the candidacy examination. The candidacy examination will normally be taken after completing all course work but in no case later than one year prior to expected graduation. The candidacy examination consists of a major paper on a topic within the student's general area of study and an oral examination of the topic covered in the paper.

Dissertation Research

## ACADEMIC CALENDAR

The student's Ph.D. advisory committee, chaired by a thesis advisor, provides advice and guidance in the development of the proposal for the dissertation, and during the ongoing research phase. Normally, advisory committee members become members of the examining committee for the dissertation during the final examination for the Ph.D. degree.

Second language requirement: none

Maximum time to graduation: seven years

## Social Work -6000 Level

SWRK 6010 Data Analysis for Social Work
Research Cr.Hrs. 3
(Formerly 047.601) An intermediate course in the analysis of social work data. Course will emphasize application and interpretation of analytical techniques useful in the practice of social work. A course in elementary statistics such as STAT 2200 (or 005.220) is strongly recommended prior to taking this course. Prerequisite: SWRK 3100 (or 047.310) or equivalent. May not hold with SWRK 4110 (or 047.411).

SWRK 6020 Social Work Practice Seminar Cr. Hrs. 6 (Formerly 047.602) Introduces students to ecological and other generalist practice models in the provision of social services. Attention is given to key contextual aspects of social work practice such as gender, poverty, and culture in the study of professional roles and ethics. Intervention modalities considered range from direct practice with individuals to strategies of community change.

SWRK 6030 Canadian Social Welfare Policy Cr.Hrs. 6 (Formerly 047.603) An examination of the elements of ideology, and the application of competing ideological systems in the study of social welfare policy. This course also examines the history of Canadian social welfare from European contact to contemporary developments.

SWRK 6040 Anti-Oppressive Social Work Practice Cr.Hrs. 3 (Formerly 047.604) An Overview of Anti-Oppressive social work practice. Focuses on application of this approach to a wide variety of service participants and the connections between policy and practice. Implications for the profession are explored.

SWRK 6050 Field Practice Cr.Hrs. 6
(Formerly 047.605) An educationally focused practice experience where the student carries a sustained professional role as a beginning practitioner. Requires 450 hours of time including an orienation program, engagement in practicum activities under supervision, educational contact time with the field instructor and evaluation of performance. For Pre-MSW students only. Subject to satisfactory completion and reports, students will be graded on a pass/fail basis. Pre / Co requisite 47.602 Co-requisite 47.420

SWRK 6060 Social Work and Aboriginal People Cr.Hrs. 3 (Formerly 047.606) Focuses on the analysis of social welfare policy and social work practice from an Aboriginal perspective. The influence of colonization as an attribute of oppression is examined along with an exploration of
developments oriented to the goal of decolonization and empowerment.

SWRK 6070 Qualitative Research in Social Work Cr.Hrs. 3 An intermediate course in qualitative approaches for research on social work practice and social welfare issues. It will include some of the main approaches to the design and analysis of qualitative social work research.

## Social Work -7000 Level

SWRK 7180 Advanced Field Practice Cr.Hrs. 0
(Formerly 047.718) A student directed specialized practice experience where the focus is on the integration of theory, research and practice. Requires 450 hours of supervised, advanced practice following approval of a proposal developed by the student. Students will be graded on a pass/fail basis. Pre/Co Requisite SWRK 7190 (or 047.719)

SWRK 7190 Integrating Theory and Research in Advanced Field Practice Cr.Hrs. 3
(Formerly 047.719) Requires application of theory and research to analysis of selected activities undertaken in Advanced Field Practice (47.718) Pre/Co requisite SWRK 7180 (or 047.718)

SWRK 7220 Selected Topics in Social Work Cr.Hrs. 3 (Formerly 047.722) A tutorial approach which permits the graduate student to develop an area of concentration independently but with assistance and mutual work with a faculty member. Prerequisite: written permission of instructor.

SWRK 7230 Problem Seminar Cr.Hrs. 3
(Formerly 047.723) Students focus on the theory, social policy and social work practice implications of a given social problem area.

## SWRK 7280 Readings in Social Work and Social Welfare

 Research Cr.Hrs. 3A tutorial in specialized research methodology to be offered only to students who have highly specialized research interests which are not commonly offered in other courses. Prerequisite: an introductory research course and consent of the instructor.

SWRK 7290 Change and Stability: Implications for Direct Intervention Cr.Hrs. 6
(Formerly 047.729) Theories of human behaviour are considered from an ecological perspective as they relate to family focused social work practice. Intervention methods are studied with special attention given to developmental issues and social contextual factors in the assessment and treatment of distressed human systems.

SWRK 7300 Clinical Evaluation of Social Work Interventions Cr.Hrs. 3
(Formerly 047.730) Methods of evaluating clinical social work intervention with individuals, couples, families, and other small groups. Prerequisite: SWRK 3100 (or 047.310) or SWRK 4110 (or 047.411) or their equivalents.

SWRK 7310 Social Service Administration Practice Cr.Hrs. 6 (Formerly 047.731) This course will focus on the development of skills in the analysis and implementation of organizational models for social service delivery, and

## ACADEMIC CALENDAR

administration methods for the effective delivery of social services. Students may not hold credit for SWRK 7310 (or 047.731 ) and the former 047.735 or SWRK 7360 (or 047.736).

## SWRK 7390 Advanced Social Work Practice

Seminars Cr.Hrs. 3
(Formerly 047.739) Study of social work practice organized by size of client system. Students must select one seminar from several which are offered. Remaining seminars may fulfill elective requirements. For clinical students only Precorequisite: SWRK 7290 (or 047.729).

SWRK 7400 Theoretical Foundations of Social Service Administration Cr.Hrs. 3
(Formerly 047.740) An examination of organizational theories and strategies and evaluation of their relevance for the administration of social services agencies.

SWRK 7420 Theoretical Foundations of Social Policy Analysis, Planning and Evaluation Cr.Hrs. 3 (Formerly 047.742) An advanced course in the welfare state in Canada - the relationship between ideology, economics and the existing structure of the welfare state in Canada, with a focus on the attempts to roll it back and the consequent tasks of social work in the preservation and advancement of social security. Students may not hold credit for 047.737 and SWRK 7420 (or 047.742).

## SWRK 7430 Evaluation Research in Social Work

 Practice Cr.Hrs. 3(Formerly 047.743) Presentation of the knowledge and skills necessary in the application of models and methods of planning and evaluating social policy and social programs. Analytical and practice skills are developed through a critical review of a variety of theories and techniques and case study applications. Pre-corequisite: SWRK 6010 (or 047.601). Applicable to students admitted subsequent to 1997-1998. May not hold with the former 047.741.

SWRK 7440 Policy Analysis in Social Work

## Practice Cr.Hrs. 3

(Formerly 047.744) Presentation of the knowledge and skills necessary in the application of models and methods of planning social policy and social programs. Analytical and practice skills are developed through a critical review of a variety of theories and techniques and case study applications. Applicable to students admitted subsequent to 1997-1998. May not hold with SWRK 7410 (or 047.741).

SWRK 7450 Advanced Research Methods 1 Cr.Hrs. 3 (Formerly 047.745) An overview of design and methodology options in quantitative and qualitative social work research, with special emphasis on practice in community settings.

SWRK 7460 Advanced Research Methods 2 Cr.Hrs. 3 (Formerly 047.746) Advanced quantitative analysis of social work policy and practice, with emphasis on multivariate analysis techniques.

SWRK 7470 Advanced Research Methods 3 Cr.Hrs. 3 (Formerly 047.747) Advanced qualitative analysis of social work policy and practice, with emphasis on analyzing appropriate case studies, and interview and documentary information.

SWRK 7480 Advanced Family-Focused Practice Cr.Hrs. 3 (Formerly 047.748) Study of the family as a client system, using theoretical approaches within an ecological paradigm.

SWRK 7490 Advanced Family-Focused Practice with Special Populations Cr.Hrs. 3
(Formerly 047.749) Special issues in family-focused practice, including supervision of practice.

SWRK 7520 Dissertation Seminar Cr.Hrs. 0
(Formerly 047.752) A required non-credit course on special issues to support students in preparing their formal dissertation proposals. Topics include scholarly findings, research methodology, and data analysis. Graded as P/F.

SWRK 7530 Critical Issues in Social Work Cr.Hrs. 3 (Formerly 047.753) An opportunity for students to engage in the study of a specific field or topic in social work. Taken as a course, tutorial or offered as a special Ph.D. seminar when numbers permit.

## Social Work -8000 Level

SWRK 8010 Perspectives on Knowledge for Social Work Cr.Hrs. 3
A seminar focusing on the definition, development, legitimization, and transmission of knowledge for social work practice. A range of approaches will be discussed including scientific approaches (logical positivism), post-modern approaches, indigenous and culturally based approaches, and critical approaches.

SWRK 8020 Development of the Social Work
Profession Cr.Hrs. 3
A seminar focusing on the development of social work from mainstream and marginalized people's perspectives (including Aboriginal people and women), and its relationship; to current professional issues. Histories, ideological, economic, theoretical, and political factors will be considered in examining selected fields of practice.

SWRK 8030 Advanced Qualitative Research in Social Work Cr.Hrs. 6
A seminar and laboratory course in the understanding and use of a wide range of epistemological and methodological approaches to research related to social work. This will include a focus on the views and practices of Aboriginal peoples, women, and other marginalized persons. Prerequisite: A grade of "B" or better in a Master's level qualitative research course taken within five years or instructor approval.

SWRK 8040 Advanced Quantitative Research in Social Work Cr.Hrs. 6
A seminar and laboratory course in the use of multivariate statistics in analyzing experimental, quasi-experimental, survey and administrative data related to social policy, social services, and social work practice. Pre-requisite: A grade of "B" or better in a Master's level quantitative research course taken within five years or instructor approval.

## Sociology

Head: Elizabeth Comack

## ACADEMIC CALENDAR

Campus Address/General Office: 320 Isbister Building
Telephone: (204) 4749260
Fax: (204) 2611216
Email Address: sociology@umanitoba.ca
Website:
http://umanitoba.ca/faculties/arts/departments/sociology/inde x.html

Academic Staff: Please refer to our website for Academic staff
information:http://umanitoba.ca/faculties/arts/departments/so ciology/facstaff/3017.html

The Department of Sociology offers programs at the Master and Ph.D. levels. Both programs provide training in the core areas of the discipline (theory and research methods) as well as in the department's major areas of specialization: crime, law, and social justice; culture and social relations; population health and wellness; power, privilege, and resistance; social development and social inequality; social policy and practice. The relatively low graduate student/faculty ratio creates an informal learning environment in which students receive considerable individual attention. Faculty members are actively involved in research, including some projects that readily lend themselves to the production of student theses/dissertations. Many students who have completed their Sociology degrees at the University of Manitoba have gone on to successful careers in the academic community, in the private sector, and in government service.

## Fields of Research

The major areas of research of the Sociology faculty include criminology and criminal justice, health care, gender studies, inter-group (race/ethnic) relations, power and inequality, social change and development, and social psychology. Several department members have affiliations with research centres and institutes at the University of Manitoba, including the Centre on Aging, and RESOLVE (a centre for research and education for solutions to violence and abuse.

## M.A. in Sociology,

Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students who have completed a University of Manitoba Honours B.A. (or equivalent) in Sociology may enter directly into the Master of Arts program. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact the Sociology Department for further information.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and
supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Master of Arts program in Sociology requires 18 credit hours of course-work (7000 level) beyond the pre-Master's requirements. (Please see the "Graduate Study in Sociology" manual for more details on course requirements at
http://umanitoba.ca/faculties/arts/departments/sociology/med
ia/Sociology Graduate Manual-Nov-2011 revised.pdf) Students must also complete and successfully defend a thesis.

Second Language Reading Requirement: None

Expected Time to Graduate: Two years

## Ph.D. in Sociology,

Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students who wish to enter the Doctor of Philosophy program must have completed the equivalent of a University of Manitoba Master of Arts in Sociology.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students must complete:

- A minimum of 18 credit hours of coursework (including 3 credit hours in Theory and 6 credit hours in Research Methods);
- A passing grade in two comprehensive examinations in two different subject areas, chosen from the following: Classical Theory; Criminology; Gender, Sexuality and Family/Intimate Relations; Inequality and Social Transition; Research Methods; Social Psychology; Health.
- Successful defense of a dissertation proposal; and
- Successful defense of the completed dissertation.

Second language requirement: no

Expected time to graduate: four years

## Sociology

SOC 7110 Seminar in Sociology of Religion Cr.Hrs. 3 (Formerly 077.711) A comparative and analytical study of religion with particular reference to such areas as integration, change, ideology, value orientation, normative structures, social class, intergroup relations, personality systems.

SOC 7120 Seminar in Sociology of Education Cr.Hrs. 3 (Formerly 077.712) An analytical treatment of the influence of education, as a basic social institution, on society its functions in socialization, change, control, social mobility, social progress, etc. and the influence of society on the organization, content, and goals of education.

SOC 7160 Selected Topics Cr.Hrs. 3
(Formerly 077.716) An intensive study of the contemporary research and theory in a selected field of sociology. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7190 Seminar in Selected Topics in Sociological Theory Cr.Hrs. 3
(Formerly 077.719) The content of this course may vary from year to year, depending on interest and need. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7240 Seminar in Selected Topics in Research and Methods Cr.Hrs. 3
(Formerly 077.724) The content of this course may vary from year to year, depending on interest and need. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7280 Seminar in Theories of Criminal

## Behaviour Cr.Hrs. 3

(Formerly 077.728) An advanced course dealing with theory and research in the field of criminology with emphasis placed on an evaluation of existing theories of crime and criminal behaviour.

SOC 7300 Seminar in the Sociology of Law and Social Control Cr.Hrs. 3
(Formerly 077.730) A critical examination of classical and contemporary sociological theories of law and social control and their import for understanding substantive issues relating to the law-society relationship.

SOC 7310 Seminar in Intergroup Relations Cr.Hrs. 3 (Formerly 077.731) This seminar will provide an opportunity for detailed study of intergroup (religious, racial, and ethnic) relations in contemporary Canadian society. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7320 Seminar in Political Sociology Cr.Hrs. 3 (Formerly 077.732) A critical examination of classical and contemporary sociological theories and current empirical research concerned with the relationship between politics and society. Particular emphasis is placed upon the origin,
development, nature and future of the welfare state from a comparative perspective.

SOC 7340 Seminar in the Sociology of the Family Cr.Hrs. 3 (Formerly 077.734) This seminar investigates various conceptual frameworks which are developing in the study of the family today, including research problems and procedures unique to such study. Various approaches will be examined.

SOC 7350 Advanced Reading and Research 1 Cr.Hrs. 3 (Formerly 077.735) Directed study of a selected area within the general field of sociology.

SOC 7360 Advanced Reading and Research 2 Cr.Hrs. 3 (Formerly 077.736) Directed study of a selected area within the general field of sociology.

SOC 7370 Issues in Health Care Seminar Cr.Hrs. 3 (Formerly 077.737) An advanced seminar designed to examine current issues in health care. The content of this course may vary from year to year depending on interest and need. Prerequisite: a grade of "C+" or better in SOC 4540 (or 077.454) or written consent of the department head.

SOC 7390 Survey Research Methods Cr.Hrs. 3 (Formerly 077.739) Through the use of secondary electronic data sources, students learn all aspects of survey research. Topics covered include: sampling, question and questionnaire construction, index construction and scaling methods, techniques of establishing validity and reliability, order effects, conducting interviews, coding, data analysis, and budgeting. Previous experience with multivariate data analysis at the undergraduate level is strongly encouraged.

SOC 7400 Advanced Quantitative Research
Methods Cr.Hrs. 3
(Formerly 077.740) This course emphasizes the understanding and application of advanced quantitative data analysis techniques to sociological research problems. Issues in regression decomposition, path analysis, log-linear analysis, discriminant function analysis, principal components and factor analysis, as well as non-parametric statistical tests are covered as they relate to sociological research concerns. Statistical packages are used to illustrate sociological examples. Prerequisite: SOC 4480 (or 077.448) or written consent of the department head.

## SOC 7410 Selected Topics in Quantitative Research

## Methods Cr.Hrs. 3

(Formerly 077.741) This course emphasizes the understanding and application of selected quantitative data analysis procedures as they apply to sociological research concerns. Statistical packages are used to illustrate sociological applications. Topics covered will vary but may include logistic regression, multiple classification analysis, multivariate analysis of variance and covariance, canonical correlation, recursive and nonrecursive models, and LISREL The course emphasizes issues related to the sociological use of these techniques. Prerequisite: SOC 4480 (or 077.448 ) or written consent of the department head. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7420 Qualitative Research Methods Cr.Hrs. 3 (Formerly 077.742) This course provides an overview of the
methods of qualitative research. Discussion focuses on the philosophical foundations of qualitative methods, the variety of techniques available within interpretive and conflict paradigms, issues of sampling, analysis, validity, and report writing.

## SOC 7430 Seminar in Classical Sociological

Theory Cr.Hrs. 3
(Formerly 077.743) A critical examination of certain central aspects of the sociological tradition. The content of this course may vary from year to year depending on interest and need.

## SOC 7440 Seminar in Contemporary Sociological

 Theory Cr.Hrs. 3(Formerly 077.744) An examination of current trends in sociological theory. The content of this course may vary from year to year depending on interest and need.

SOC 7450 Selected Topics in Criminology Cr.Hrs. 3 (Formerly 077.745) An advanced seminar in a selected area of criminology. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7470 Evaluating Social Programs Cr.Hrs. 3
(Formerly 077.747) Designed as a course in applied sociology, students will review the models and methodologies used for evaluating social programs. The course will introduce the necessary conceptual and analytic tools to design and carry out program evaluations. Students may not hold credit for both SOC 7470 (or 077.747) and the former 077.733.

SOC 7480 Social Inequality Cr.Hrs. 3 (Formerly 077.748) A critical examination of classical and contemporary theories and current empirical research concerned with various dimensions of social inequality (such as class, gender and race) and social stratification from a comparative perspective.

SOC 7490 Globalization Cr.Hrs. 3
(Formerly 077.749) A sociological examination of the globalization of trade, production and finance, including the creation of multilateral trading blocs (e.g., APEC, EU, NAFTA) and international organizations (e.g., WTO, IMF, the World Bank) and their impact upon social inequality, the welfare state and the environment in developed and developing nations.

## Soil Science

Head: Brian Amiro
Campus Address/General Office: 362 Ellis Building
Telephone: (204) 4748153
Fax: (204) 4747642
Email Address: soilscience@umanitoba.ca
Website: http://umanitoba.ca/afs/soil science
Academic Staff: Please refer to our website for Academic staff information:http://umanitoba.ca/afs/soil science

The Department of Soil Science offers graduate instruction leading to M.Sc. and Ph.D. degrees. Students will select one of the following four programs:

- Environmental Science
- Fundamental Soil Science
- Agricultural Science
- Agrometeorology

Studies related to these four programs include fundamental and applied studies on the management of soil resources for crop and animal production, soil fertility and nutrient management, pest control management, chemical use in agriculture and food quality, effects of weather and climate on agricultural production, soil erosion, tillage practices, precision agriculture, pesticide fate in the environment, environmental monitoring, manure and waste management, remediation of contaminated or degraded soils, land use suitability assessment, soil genesis and classification, soil mineralogy, soil microbiology and biochemistry, soil and pesticide chemistry, soil physics and agrometeorology.

Graduate students are required to obtain a comprehensive knowledge of soil science, but the department permits considerable variation in the selection of courses depending on the background of the student and the particular area of specialization. Graduates with knowledge or a major in soil science have had excellent career opportunities with agribusiness, environmental land use agencies or firms, and regulatory agencies. M.Sc. and Ph.D. graduates are employed in land inventory activities, research in the various areas of fundamental and applied soil science, environmental consulting and extension.

## Fields of Research

Research interests of academic staff in the Department of Soil Science includes transport and transformation of organic and inorganic chemicals in soil, agrometeorological modelling of crop and agricultural processes, impacts of climate change, soil ecology and biochemistry, agricultural pesticides and sustainable agriculture, soil fertility, soil chemistry and mineralogy, landscape ecology and land resource management, land remediation, manure management, greenhouse gas dynamics, forest fires, nutrient dynamics and chemistry of soil fertility.

## Research Facilities

The Department of Soil Science and its research facilities are located in the Ellis Building. Facilities within the department include excellent instrumentation to measure soil physical, chemical and biological characteristics, and to quantify soil nutrient and pesticide residue levels in soil extracts and water samples. The department conducts fieldbased research at a number of locations, both in the province and beyond, in collaboration with scientists from other universities and federal and provincial organizations. Within the department, full-time technicians add quality assurance and quality control to the research programs, and provide a positive effect on the training of students. In addition, the department has the opportunity to share

## 

ACADEMIC CALENDAR 2012-2013 >

## UNIVERSITY of Manitoba

research facilities with other departments within the university and at several locations throughout the province.

## M.Sc. in Soil Science <br> Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

| Start Date | Canadian/U.S. | Non-Canadian/U.S. |
| :--- | :--- | :--- |
| September | June 1 | March 1 |
| January | October 1 | July 1 |
| May | February 1 | November 1 |
| July | April 1 | January 1 |

## Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, a " B " is the minimum passing grade in the major subject area.

Second language reading requirement: none
Expected time to graduation: two years

## Ph.D. in Soil Science

## Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

| Start Date | Canadian/U.S. | Non-Canadian/U.S. |
| :--- | :--- | :--- |

In addition to the minimum course requirements of the
Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, a " B " is the minimum passing grade in the major subject area.

Second language reading requirement: none

Expected time to graduation: three years

## Soil Science

SOIL 7100 Soil Physical Chemistry Cr.Hrs. 3
(Formerly 040.710) Topics of discussion: ionic equilibria, ion exchange and ionic transport including soil-plant relationships. Offered in 2005-2006 and alternate years.

SOIL 7110 Soil Physics I - General Cr.Hrs. 3
(Formerly 040.711) First and second laws of thermodynamics, Darcy's law, saturated and unsaturated flow, simulation modeling of moisture movement, soil aeration, water availability to seeds, strength properties of unsaturated soils. Offered in 2006-2007 and alternate years.

SOIL 7120 Soil Physics II Special Problems Cr.Hrs. 3 (Formerly 040.712) Each student will be required to prepare a comprehensive review of literature on an assigned topic and present a seminar. In addition, each student will conduct a minor research project and submit a written report on the project. Currently not offered.

SOIL 7130 Soil Chemistry Cr.Hrs. 3
(Formerly 040.713) Chemical equilibria and soil solution chemistry; surface chemistry and solid-solution reactions; mineral structure, colloid chemistry and analytical techniques; fate of nutrients and pollutants; reactions of fertilizers. Offered in 2005-2006 and alternate years.

SOIL 7140 Soil Nitrogen Cr.Hrs. 3
(Formerly 040.714) Discussion of organic and inorganic nitrogen in soils, nitrogen fixation, mineralization, nitrification, denitrification, and plant availability of soil nitrogen. Students will be required to review literature on assigned topics. Offered in 2005-2006 and alternate years.

SOIL 7170 Agricultural Micrometeorology Cr.Hrs. 3 (Formerly 040.717) Discussion of mass and energy transport in the boundary layer, evaporation and transpiration of water, light absorption and transmission of carbon dioxide in plant canopies and climate change impacts on micrometeorological processes. Prerequisite: SOIL 3060 (or 040.306) and/or consent of instructor. Offered in 2006-2007 and alternate years.

SOIL 7180 Environmental Chemistry of Pesticides and Related Compounds Cr.Hrs. 3
(Formerly 040.718) Pesticide chemodynamics, biological and non-biological transformations of pesticides in water, soil and biota, bioaccumulation and food chain distribution of pesticides and related xenobiotics and environmental fate models will be discussed. Prerequisite: SOIL 7150 (or 040.715) or consent of instructor. Not offered in 2005-2006.

SOIL 7200 Advanced Soil Microbiology Cr.Hrs. 3 (Formerly 040.720) Examines the role of the microbial community in decomposition, nutrient cycling, and pathogen/pest suppression. Methods of studying biochemical activity and microbial composition of soil are discussed. The soil environment and agricultural management are considered and to their role in regulating the composition and activity of microbial communities. Prerequisite: SOIL 4120 (or 040.412) or consent of instructor. Offered in 2005-2006 and alternate years.

SOIL 7202 Advanced Soil Ecology Cr.Hrs. 3
Examine the role of soil organisms and their communities in decomposition, elemental cycling, and pathogen/pest suppression in managed andnatural soil systems. Understand methods of studying biochemical activity and communities in soil. Take a specific research topic of choice and develop an understanding of the organisms and communities, environmental controls of key biological processes involved and apply your knowledge to resolving a specific research issue.

SOIL 7210 Topics in Soil Fertility Cr.Hrs. 3 (Formerly 040.721) Advanced study of behaviour and crop requirements for selected nutrients (except for nitrogen, as covered in SOIL 7140 (or 040.714)). Students will be required to review literature and prepare seminars on assigned topics. Prerequisites: SOIL 4520 (or 040.452) or consent of instructor. Offered in 2006-2007 and alternate years.

SOIL 7220 Principles of Scientific Research and Communication Cr.Hrs. 3 (Formerly 040.722 ) Principles of scientific research; management skills; writing skills; oral and poster presentation; preparation of research proposal and thesis (pass/fail). These topics will focus on aspects of soil science and will give students experience in writing and presenting scientific material to increase their professionalism as soil scientists. Prerequisite: Consent of instructor.

SOIL 7230 Topics in Landscape and Processes I Cr.Hrs. 3 (Formerly 040.723) An examination of methods of landscape characterization and of landscape processes, their impacts, interactions and modelling. Prerequisite: Consent of instructor. Not offered in 2005-2006.

SOIL 7240 Topics in Landscape Processes II Cr. Hrs. 3 (Formerly 040.724) A continuation of SOIL 7230 (or 040.723). Prerequisite: Consent of instructor. Not offered in 2005-2006.

SOIL 7250 Topics in Soil Science Cr.Hrs. 3 (Formerly 040.725) Several courses in soil science are sectioned into modules. Modules of one credit hour on special topics are also available. Students may select three modules from the various courses or from special topics for SOIL 7250.

SOIL 7260 Pesticide Residues in Food, Water and Soil Cr.Hrs. 3
(Formerly 040.726) Discussion and application of research protocols for examining pesticide fate in the environment and for quantifying pesticide residues in food, water and soil. Prerequisite: consent of instructor. Currently not offered.

SOIL 7270 Advanced Soil Ecology Cr.Hrs. 3 Examine the role of soil organisms and their communities in decomposition, elemental cycling, and pathogen/pest suppression in managed and natural soil systems. Understand methods of studying biochemical activity and communities in soil. Take a specific research topic of choice and develop an understanding of the organisms and communities, environmental controls of key biological processes involved and apply your knowledge to resolving a specific research issue.

## Statistics

Head: Dr. Xikui Wang
Campus Address/General Office: 338 Machray Hall
Telephone: (204) 4749826
Fax: (204) 4747621
Email Address: grad-program@stats.umanitoba.ca
Website: http://umanitoba.ca/statistics
Academic Staff: Please refer to our website for Academic staff information:http://umanitoba.ca/statistics

The University of Manitoba offers graduate programs in statistics leading to the M.Sc. and Ph.D. degrees as well as a B.Sc. in Statistics degree. Applications are encouraged from students with strong interest in statistics, mathematics or related fields.

## Fields of Research

Areas of research interest in the department include: Bayesian statistics; biostatistics; clinical trials; computational statistics; decision theory; distribution theory of runs and patterns; econometrics; environmental statistics; errors-invariables models; experimental design; image processing; nonparametric statistics; order statistics; probability; quality control; reliability theory; statistical inference; stochastic processes; survival analysis; and time series.

## Research Facilities

In addition to the vast network of computing facilities maintained by Computer Services at the University of Manitoba, the Department of Statistics maintains two smaller networks for use by their students. The graduate computing laboratory consists of iMac computers which are capable of running both OS X and Windows, and one IMB Intellistation running Ubuntu Linux. All of the computers in both the undergraduate and graduate labs are also available as a clustered computing resource with an aggregate 180 GHz processing speed and over 150 Gb of RAM.

## M.Sc. in Statistics

 AdmissionFor September admission, the Department of Statistics begins the application review process in early February. To be considered in the initial review process, all application materials, including letters of reference and transcripts, should be received before February 1st. Applications received after this date will still be considered for admission depending on the number of spaces available for the Fall term. While applications after February 1st will still be considered for admission, they may not be considered for funding.

Students should also be aware of deadlines imposed by the Faculty of Graduate Studies. The Faculty of Graduate Studies requires that Canadian/U.S. submit their application
and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

The Master's degree may be earned in one of three ways:

- Submission of a thesis; at least nine credit hours of approved work at the 7000 level in statistics, which must include STAT 7080, STAT 7140 and the zero credit hour STAT 7310; and six credit hours of approved coursework at the 4000 or 7000 level in Statistics.
- Submission of a practicum; at least nine credit hours of coursework at the 7000 level, which must include STAT 7080, STAT 7140, STAT 7290 and the zero credit hour STAT 7310; and six credit hours of approved work at the 4000 or 7000 level in Statistics.
- Eighteen credit hours of course work at the 7000 level, which must include STAT 7080, STAT 7140, the zero credit hour STAT 7310 and the research project course STAT 7320; and six credit hours of approved coursework at the 4000 or 7000 level in Statistics.

Students are also expected to take part in laboratory instruction.

Second language reading requirement: none
Expected time to graduate: one to two years depending on the option selected

## Ph.D. in Statistics <br> Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Completion of a Master's degree in Statistics is usually required for admission to the Ph.D. program.

## Application Deadlines

For September admission, the Department of Statistics begins the application review process in early February. To
be considered in the initial review process, all application materials, including letters of reference and transcripts, should be received before February 1st. Applications received after this date will still be considered for admission depending on the number of spaces available for the Fall term. While applications after February 1st will still be considered for admission, they may not be considered for funding.

Students should also be aware of deadlines imposed by the Faculty of Graduate Studies. The Faculty of Graduate Studies requires that Canadian/U.S. submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students are required to satisfy the following requirements:

- Candidates are required to attempt and successfully complete at least twelve credit hours at the 7000 level. These courses will normally be taken from the Department of Statistics. Courses will normally be recommended by the candidate's supervisor.
- Candidates are required to pass the Ph.D. qualifying examination within eighteen months of first registration.
- Candidates are required to pass a candidacy examination, which will normally be administered twelve months prior to the completion of all degree requirements. The candidacy examination will be set and administered by the candidate's Ph.D. advisory committee. The format may vary.

Second language requirement: none

Thesis: required

Expected time to graduation: five years

## Statistics

STAT 7060 Advanced Theory of Probability Cr.Hrs. 3 (Formerly 005.706) Probability as measure, convolutions, limit laws, conditional probability and expectation, law of large numbers and other selected topics. Prerequisite: consent of instructor.

## STAT 7070 STOCHASTIC PROC Cr.Hrs. 3

S
STAT 7080 Advanced Statistical Inference Cr.Hrs. 3 (Formerly 005.708) Selected topics from recent developments in parametric and/or non-parametric statistical

## ACADEMIC CALENDAR 2012-2013 •

## University of Manitoba

inference. Prerequisite: consent of instructor
STAT 7090 Advanced Statistical Analysis Cr.Hrs. 3 (Formerly 005.709) Construction of regression models, response surfaces, nonlinear model ANOVA as regression model, variance components, and selected topics. Prerequisite: consent of instructor.

STAT 7100 Analysis of Discrete Data Cr.Hrs. 3 (Formerly 005.710) Inference concerning discrete distributions, analysis of categorical data, and other selected topics. Prerequisite: consent of instructor.

STAT 7120 Nonparametric Inference Cr.Hrs. 3 (Formerly 005.712) Order statistics, Kolmogorov-Smirnov tests, Wilcoxin-Mann-Whitney tests, and other selected topics. Prerequisite: consent of instructor.

STAT 7140 Linear Models Cr.Hrs. 3
(Formerly 005.714) Theory of linear models, regression analysis, and analysis of variance. Prerequisite: consent of instructor.

STAT 7200 Multivariate Analysis 1 Cr.Hrs. 3 (Formerly 005.720) Multivariate normal distribution, Hotelling's T2, Classification methods, principal components and canonical correlations. Prerequisite: consent of instructor.

STAT 7210 Multivariate Analysis 2 Cr.Hrs. 3
(Formerly 005.721) Advanced topics in multivariate analysis. Prerequisite: STAT 7200 (or 005.720) or consent of instructor.

STAT 7220 Seminar in Statistics 1 Cr.Hrs. 3 (Formerly 005.722) A seminar course on new development in statistics.

STAT 7240 Advanced Topics in Statistics 1 Cr.Hrs. 3 (Formerly 005.724) Special advanced research topics in statistics.

STAT 7250 Advanced Topics in Statistics 2 Cr.Hrs. 3 (Formerly 005.725) Special advanced research topics in statistics.

STAT 7260 Time Series Cr.Hrs. 3
(Formerly 005.726) The auto-correlation function and spectrum, various processes, model identification, estimation and forecasting. Prerequisite: consent of instructor.

STAT 7270 Bayesian Inference Cr.Hrs. 3 (Formerly 005.727) Bayesian decision problems, priors, Jeffrey's Rule, robustness of posteriors, Bayesian justification of ANOVA. Prerequisite: consent of instructor.

STAT 7290 Statistical Consulting Cr.Hrs. 3
(Formerly 005.729) The role of a statistics consultant. Practical consulting experience. Prerequisite: consent of department.

STAT 7310 Research Tools for Statistics Cr.Hrs. 0 This course provides instruction in the use of a number of tools required for graduate level research in statistics. Topics include instruction in various software, such as LaTex, R, SAS, etc. as well as Library usage, presentation and
communication skills.
STAT 7320 Research Project in Statistics Cr.Hrs. 3
This course will provide the student with practical experience in doing research in the statistical sciences. Students will be matched with a faculty advisor and carry out a research project. Deliverables include a final research report and a presentation to the department.

STAT 7350 Advanced Topics in Statistics 3 Cr.Hrs.1.5 Special advanced research topics in statistics.

STAT 7360 Advanced Topics in Statistics 4 Cr.Hrs.1.5 Special advanced research topics in statistics.

## Surgery

Head: Richard Nason
Campus Address/General Office: GH604,Health Sciences Centre, 820 Sherbrook Street
Telephone: 2047877277
Fax: 2047874837
Email Address: mbrychka@hsc.mb.ca
Website: umanitoba.ca/faculties/medicine/units/surgery/
Academic Staff: Please refer to our website for Academic staff
information:umanitoba.ca/faculties/medicine/units/surgery/

Through the Thesis Stream, the program is designed to grant surgical residents a year free of clinical duties to work on a research project of their own design or undertake the investigative role in a laboratory setting under the advisement of a senior investigator / thesis advisor.

The purpose of the program is to encourage the development of surgical clinician scientists, who will become the academic leaders of Surgery in the future. Many recent MSc recipients have gone on to careers in academic surgery or are still undertaking fellowship training with plans to assume an academic career in Surgery.

## Fields of Research

The research interests of the Department reflect the diversity of the clinical specialties contained therein. These specialties comprise of: Cardiac Surgery, General Surgery,
Neurosurgery, Orthopedic Surgery, Plastic Surgery, Thoracic Surgery, Urology and Vascular Surgery.

## Research Facilities

Research occurs within facilities provided by the advisor. Such individuals are University of Manitoba faculty and generally have research facilities located at the Health Sciences Centre, University of Manitoba - Bannatyne Campus or the St. Boniface General Hospital Research Centre.

## 

ACADEMIC CALENDAR

## M.Sc. in Surgery, <br> Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, this program is only open to holders of an M.D. degree who are currently enrolled in a postgraduate residency program in the Faculty of Medicine at the University of Manitoba or holders of a D.M.D degree who are currently enrolled in the Faculty of Dentistry at the University of Manitoba. Applicants must include a copy of their current CV; research project proposal and a letter from their Thesis Advisor. An appointment with the Department of Surgery Research Chair to review the application and required documentation must be made prior to approval to proceed with an admissions application to the Faculty of Graduate Studies.

Candidates incorporate this program as part of their residency training, qualifying for both.

## Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students must complete:

Twelve months' work of research, under the supervision of the senior investigator or thesis advisor and the Research Chair for the Department of Surgery;

Submission of a major thesis on the research project;

Demonstration to an examining committee of satisfactory theses and an adequate knowledge of the subject involved.

Two fields of study must be chosen for the M.Sc. degree: one as a major and the other as an ancillary study. Major studies must be taken in any surgical problem, while the ancillary study should be selected from some related field (e.g., pathology, physiology, biochemistry).

Second language reading requirement: none

Expected time to graduate: one year

Ph.D. in Surgery,
Surgery does not offer a Ph.D. program.

## Surgery

SURG 7010 Surgery: Major course in Surgical
Problems Cr.Hrs. 6
(Formerly 094.701) Desciption not available for this course.

SURG 7020 Surgery Cr.Hrs. 6
(Formerly 094.702) Description not available for this course.
SURG 7030 Advanced Surgery Cr.Hrs. 3
(Formerly 094.703) Description not available for this course.

## SURG 7040 Surgical Epidemiology and

Biostatistics Cr.Hrs. 3
(Formerly 094.704) Prepare students to design studies suitable for a wide variety of research questions including diagnostic, etiologic and prognostic, and treatment outcomes, with focus on surgical issues. It should also provide the students with the essential biostatistical and epidemiologic tools to critique medical literature. The evaluation will be based on submission of a complete proposal to answer a research question of each student's choice.

## Textile Sciences

Head: (Acting) Tammi S. Feltham
Campus Address/General Office: 205 Human Ecology Building
Telephone: (204) 4748137
Fax: (204) 4747592
Email Address: textile sciences@umanitoba.ca
Website:
http://umanitoba.ca/faculties/human ecology/departments/ts/ index.html
Academic Staff: Please refer to our website for Academic staff
information:http://umanitoba.ca/faculties/human ecology/dep artments/ts/index.html

The Textile Sciences graduate program offers opportunities for in-depth study and technical and social dimensions of textile product development. The technical dimension includes research in the physical and chemical properties of textiles, and polymer science. The social dimension includes research in consumer behaviour toward textiles or textile products and marketing of textiles or textile products. The program comprises course work and a thesis.

Graduates from the program have found challenging careers in diverse fields. These include: technical product developer for medical/healthcare, industrial, and exercise and sports end uses, textile testing in industry or government research laboratories, post-secondary education, quality assurance, or a stepping stone to a Ph.D. degree.

## Fields of Research

Faculty members are currently involved in research projects in many areas of the field. Research interests of faculty include: attitudes, values and interests of selected groups toward clothing, organizational and consumer decisionmaking for textile products, application of theories in consumer behaviour, marketing and economics to clothingrelated phenomena, clothing for older adults, communication of apparel information to older consumers, textile product

## 

ACADEMIC CALENDAR 2012-2013 •
development, bio-protective textiles, sensory, physical, and chemical attributes related to the selection and performance of textile products, and skin/fabric interactions and their impact on clothing comfort and skin lesions.

## Research Facilities

The department has well equipped laboratories for the study of textiles and textile products. Space and equipment are available for chemical, physical, microscopic and sensory investigations of textiles, for polymer synthesis and textile surface modification, for textile product development research, and for the study of consumer behaviour toward textile products. Special equipment includes an Instron tensile tester, an Atlas Fade-Ometer, a Nicolet iS10 FTIR spectroscopy, a Hunterlab colorimeter, a KES-SE Frictional Analyzer, a Porosimeter, a Tensiometer, a Electrospinner and a range of flammability, thermal comfort testers. A computer-aided design laboratory houses computers equipped with an industry-standard software system for textile product development. Campus facilities contribute to a quality environment for research. Students in the department have access to the special facilities and equipment of both the Departments of Family Social Sciences and Human Nutritional Sciences. The University of Manitoba libraries system holds major volumes of English-language periodicals in textile sciences and ancillary areas. Internet access is available throughout the Human Ecology Building. The University has numerous research institutes of potential relevance to the textile sciences graduate students. The Department of Textile Sciences maintains close relationships with the textile and related industries in Manitoba. Faculty are members of national or international organizations such as the Institute of Textile Science, the American Association of Textile Chemists and Colorists, the American Society for Testing and Materials, the American Chemical Society, the Administrative Sciences Association of Canada, The Academy of Marketing Science and The Association for Consumer Research.

Ph.D. in Textile Sciences,
The Department of Textile Sciences does not offer a Ph.D. program.

## Textile Sciences

TXSC 7042 Preparations for Research in Textile

## Sciences Cr.Hrs. 6

The course helps students develop the essential skill set to complete an academic research proposal. By integrating literature review and research methods, students will know how to seek, retrieve, critically assess and use information to develop a research topic, to formulate questions, and to make defensible methodological and data analysis decisions.

TXSC 7120 Topics in Textile and Apparel Marketing Cr.Hrs. 3
(Formerly 064.712) A critical examination of practices in the production, distribution, and consumption of textiles and apparel.

TXSC 7162 Topics in Textile Sciences - Physical

## Properties Cr.Hrs. 3

An in-depth study of the properties of fibers, yarns, fabrics, finishes and fabric assemblies using quantitative physical and sensory laboratory techniques.

TXSC 7164 Topics in Textile Sciences - Chemical Properties Cr.Hrs. 3
An in-depth study of the properties of textiles of modern and historic origin using qualitative and quantitative chemical and microscopic laboratory techniques.

TXSC 7166 Seminar in Textile Sciences Cr.Hrs. 3 Critical study of development in selective areas of textiles and/or clothing with emphasis on recent research findings.

TXSC 7168 Problems in Textile Sciences Cr.Hrs. 3 this course covers advanced problems in one or more of the following areas: chemical, physical, or biological proerties and/or structure of textile materials; physiological aspects of textiles; consumer behaviour or marketing.

## Awards Information

The following awards are offered through the Faculty of Graduate Studies, which lists the value and deadline to submit applications. A complete listing of awards is on the web: http://umanitoba.ca/graduate studies/awards

Please note that awards information is subject to changes. The most up to date information can be found on our website.
(CIHR) Canadian Institutes of Health Research (www.cihr.ca)

## \$ 17,500 CGS Master’s

Consult department/unit for their deadline in November
(NSERC) Natural Sciences and Engineering Research Council (www.nserc.ca)

## Doctoral Prize

\$10,000 plus a framed citation and a silver medal
Consult department for departmental deadline in September

Postgraduate Scholarship (PGS)
$\$ 17,300$ Master's (PGS M)
\$21,000 Ph.D. (PGS D)
Canada Graduate Scholarship (CGS)
\$17,500 Masters (CGSM)

## \$35,000 Doctoral (CGSD)

Consult department for departmental deadline in September Industrial Postgraduate Scholarship

No Deadline to apply.
(SSHRC) Social Sciences and Humanities Research Council (www.sshrc.ca)
\$17,500 Master's
\$20,000 Ph.D.
\$35,000 CGS Doctoral

Consult department/unit for their specific deadline in October

## Vanier Canada Graduate Scholarships

http://www.vanier.gc.ca/hp-pa-eng.shtml
\$50,000 Ph.D.

Deadline to be determined. Please check with Awards Office for details.

## Trudeau Scholars Programme

(www.trudeaufoundation.ca)
\$35,000 Ph.D. Mid November

Manitoba Graduate Scholarship
\$15,000 for Master's
\$7,500 for PhD (Top up to UMGF)

Students must apply for the UMGF to be considered for the Manitoba Graduate Scholarship

University of Manitoba Graduate Fellowship
$\$ 12,000$ for Master's
$\$ 16,000$ for Ph.D.

Consult department/unit for their specific deadline in December

## Registration Information

## SECTION 1: Information for All Graduate

## Students

Important Notice Regarding Graduate Fees, Registration is not complete until fee payment or fee payment arrangements are made with the Financial Services Office in writing. Do not wait for a fee statement to be mailed to you. Students are urged to check the section: "Fees, Payments and Refunds" found in this Guide and/or the graduate fee information which can be accessed at the following website: http://umanitoba.ca/student/records/fees

## Registration Reminders

Have you:

- Submitted your Progress Report form?
- Met with your advisor or department for program approvals?
- Accessed Aurora Student to check for any timetable updates?
- Accessed Aurora Student to register for your courses?
- Accessed Aurora Student for a fee assessment?
- Paid your fees?

Welcome to the Faculty of Graduate Studies, Whether you are a new or returning graduate student, we hope you will familiarize yourself, not only with the information contained in this publication. Remember you are registering in a professional program leading to or supporting your career choice. Registering for courses that meet your department or your advisor's approval is your responsibility. However, your department office will be able to help you if you encounter difficulties in selecting or registering for courses.

## Re-Registration Deadline

- All returning graduate students who intend to continue in their programs must re-register and pay fees before September 8.
- Any student whose program of study extends over more than one year must re-register for September and January of each succeeding year of their program until a degree is obtained.

Students who do not re-register in time will be subject to being "Discontinued" from their graduate programs. Students who have registered but have not paid in time will be subject to late fee payment or cancellation and discontinuation after this date.

## Returning Students Progress Report

The Progress Report for graduate students in thesis/practicum project programs must be submitted to the Faculty of Graduate Studies at least prior to registration. Failure to submit this report will result in registration access being denied.

## Initial Access Times

Access to registration times can be found in your Aurora Student account. Simply log in to Aurora Student, select Enrolment \& Academic Records, select Registration, and then Registration Time and Status in order to view your access times for a given term.

### 1.1 Admission and Registration,

Admission and registration in the Faculty of Graduate Studies is by recommendation from a unit/department offering graduate programs. Students are admitted and register in the following categories: Occasional, preMaster's, Diploma, Master's or Ph.D. and normally may commence study in September, January or Summer Session.

Students are responsible for meeting the requirements of the program and ensuring they have the prerequisites for the individual courses for which they register. Reference should be made to the current Graduate Calendar for detailed regulations and procedures of the Faculty.

Students whose program of study extends over more than one year must re-register each year until the degree is awarded. Students who fail to re-register do not retain the status of graduate student and must apply for readmission. See above for re-registration deadline.

Undergraduate students are not allowed to register in graduate courses; that is, admission to the Faculty of Graduate Studies is a condition for registration in courses at the 6000 level and above.

Students wishing to register for courses that are offered by a department/unit outside their major department/unit must get the approval of the offering department.

### 1.2 Student Status,

A student is considered to be full-time if the student is planning to carry the normal academic load of the department during the registration period. Graduate students who do not meet the criteria specified for full-time students should complete the form "Request for Part Time Status."

This form must be approved by the department head and advisor and submitted to the Faculty of Graduate Studies prior to registration.

### 1.3 Course Numbers for Graduate Studies,

 Registration for Thesis/Practicum or Comprehensive Examinations:Students who intend to graduate in the coming year (February, May or October) must register for their thesis, practicum or comprehensive examination requirement. Therefore, you may need to register for one of the following:

## GRAD 6000 Summer Research

Only for those students commencing their programs in May or July when courses may not be available.

## GRAD 6100 Visiting Canadian Student Research Course

To formalize the status of visiting Canadian Graduate Student Researchers. Students must meet the terms of the Canadian Graduate Student Research Mobility Agreement (CGSRMA), and submit the Visiting Graduate Student Research Authorization form to be eligible to register.

## GRAD 7000 Master's Thesis

- fall term
(graduation in February or working on thesis during fall term only)
- fall \& winter terms
(graduation in May or working on thesis during fall \& winter terms)
- winter term
(graduation in May or working on of thesis during winter term only)

## GRAD 7010 Master's Comprehensive Examination

- fall term (graduation in February or preparing for comprehensive exam during fall term only)
- fall \& winter terms (graduation in May or preparing for comprehensive exam during fall \& winter terms)
- winter term (graduation in May or preparing for comprehensive exam in winter term only)

## GRAD 7020 Master's Re-registration**

GRAD 7022 Master's Re-registration

MBA and MPA students who are not registering for any courses in Fall and/or Winter terms must register in this course to retain status.

GRAD 7030 Master's Practicum

## -fall term

(graduation in February or working on practicum during fall term only)
-fall \& winter terms
(graduation in May or working on practicum during fall \&

### 1.4 Course Classifications,

Students are responsible for determining the correct course classifications, sections and slots in consultation with their Department. Courses with the $\mathrm{X}, \mathrm{A}$, or O status must be added to a student's registration by the department, i.e., this cannot be achieved through Aurora Student.

O OccasionalCourse is not part of the program and not included in the GPA (Additional fees will be assessed)
$X$ Auxiliary Course is not major requirement of the program but specified as necessary and required by the student's ad visor or advisory committee and not included in the GPA.
A Audit Course is not part of program, credit is not granted and grade will not be assigned. (Additional fees will be assessed)

### 1.5 Voluntary Withdrawal Dates,

Graduate Students are not allowed to withdraw from courses without permission from their department head on recommendation from their advisor/advisory committee giving approval to the program change.

For further information, contact your home Department or the Faculty of Graduate Studies
(204) 474 9377, 500 University Centre.

Website: http://umanitoba.ca/graduate studies
E-Mail: graduate studies@umanitoba.ca

## ACADEMIC CALENDAR

## SECTION 2: Departmental Information for Aurora Student

For general information on Aurora Student, refer to the Registration Information section of this Guide. Graduate Students in the following programs/units must contact their respective units to register: Law, I.A. Asper School of Business, Individual Interdisciplinary Programs, St. Boniface College (Education and Canadian Studies), Ph.D. in Foods \& Nutritional Sciences. (Note: registration forms will not be mailed to students. The form can be accessed at the following Graduate Studies website: http://umanitoba.ca/graduate studies/forms/

### 2.1 Faculty of Agricultural and Food Sciences Agribusiness and Agricultural Economics

New and returning students must meet with their program advisor to determine courses prior to registration. Courses must be listed on the departmental approval form available from the Graduate Studies Assistant, 352 Agriculture, and written approval granted from both the advisor and the department head or designate. Students may only register for courses listed and approved at that time. Any course revisions (additions and/or withdrawals) must be approved in the same manner. The signed form must be submitted to Judy Powell, who will then complete the registration process.

Not all courses are offered each year.

## Registration and program enquiries:

Judy Powell, 352 Agriculture Building; Phone (204) 4749259;
E-mail: judy powell@umanitoba.ca

## Animal Science

All students in the graduate program must meet with their advisor/advisory committee to determine courses. Courses must be listed on the departmental approval form (available from the Animal Science General Office) and written approval granted from both the advisor and the department head or designate. Registration revisions are to be dealt with and approved in a like manner.

Not all courses are offered each year.

## Registration and program enquiries:

Cathy Plouffe, 201 Animal Science Building; phone: (204)
474-6028;
Fax: (204) 474-7628
E-mail: animal science@umanitoba.ca

## Entomology

Prior to registration, students must consult with their advisor and then present a completed registration approval form to the department head. Any changes after the initial registration must also be approved by both advisor and department head.

Registration approvals contact N.J. Holliday, phone (204) 474-6020,
email: Neil Holliday@UManitoba.CA

Registration assistance contact K. Graham, phone (204) 474-8077,
email: grahamk@Ms.UManitoba.CA

## Food Science

Prior to registration, students must consult with their advisor and then present a completed registration approval form to the department head. Any changes after the initial registration must also be approved by both advisor and department head.

Courses are subject to cancellation if there is insufficient enrolment. Courses with insufficient enrolment will be cancelled the first week of classes.

Registration enquiries: Allison Cranmer, 250 Ellis Building; phone (204) 474-9621

Registration approvals: Dr. Gary Fulcher, phone (204) 4749065; gary fulcher@umanitoba.ca

## Plant Science

All students in the graduate program must meet with their advisor/advisory committee to determine courses. Courses must be listed on the departmental approval form (available from the Plant Science General Office) and written approval granted from both the advisor and the department head or designate. Registration revisions are to be dealt with and approved in like manner. Not all courses are offered each year.

## Registration and program enquiries:

Martha Blouw, 226 Agriculture Building; phone: (204) 4748223;
Fax: (204) 474-7528
E-mail: plantscience gradstudies@umanitoba.ca

## Soil Science

Registration inquiries: Lynda Closson
(Lynda Closson@.umanitoba.ca), phone: (204) 474-8153.

Program information: Dr. David Lobb
(lobbda@ms.umanitoba.ca), Chair, Graduate Studies Committee.

### 2.2 Faculty of Architecture

Continuing Courses (CO'S): Students who are unable to complete a course may receive a mark classification of CO until such time as a final grade can be established. The deadline for completion is normally not later than oneyear from the end of the term in which the course was originally registered.

If the course is not completed by the next September and the students intend completing the course(s), they must reregister for the course(s).

If you have any questions regarding registration that are NOT answered in
the Registration Guide, please contact one of the Graduate Student Advisors as noted below.

Architecture

Please refer to the information communicated to you on course selection and requirements.
http://umanitoba.ca/faculties/architecture/programs/113.htm

Graduate Student Advisor: Gloria Baudry (204) 474-9286; fax (204) 474-7532;
baudrygj@cc.umanitoba.ca; 201 Russell Building.

Graduate Student Advisor: Jodena Baertsoen (204) 4748763; fax (204) 474-7532;
baertsoe@cc.umanitoba.ca; 201 Russell Building.

## City Planning

Please refer to the information communicated to you on course selection and requirements. All new students must meet with their faculty advisor within the first month of classes. Students with registration issues should meet with City Planning Graduate Student advisor during the last two weeks in August or first week in September.
http://umanitoba.ca/cityplanning

Graduate Student Advisor: Yvonne Halden (204) 474-8769; fax (204) 474-7532
haldenyl@cc.umanitoba.ca; 201 Russell Building.

## Interior Design

Prior to registration, all new students must contact the Graduate Student Advisor, between mid-August and commencement of classes, who will determine whether a
meeting with the Department Head is required. Timetable changes may occur throughout the summer. Department course list offerings and elective offerings are posted on the architecture website at http://umanitoba.ca/interiordesign

Graduate Student Advisor: Yvonne Halden (204) 474-8769; fax (204) 474-7532
haldenyl@cc.umanitoba.ca; 201 Russell Building.

## Landscape Architecture

All new students should meet with the Department Head and must meet with the Graduate Student Advisor before registering. Returning students with registration issues should make an appointment with the Graduate Student Advisor prior to the first week in September. Courses may be cancelled if there is insufficient enrolment. Department course offerings and elective offerings will be mailed out and are also posted on the department website:
http://umanitoba.ca/landscapearchitecture

Graduate Student Advisor: Yvonne Halden (204) 474-8769; fax (204) 474-7532
haldenyl@cc.umanitoba.ca; 201 Russell Building

## Design and Planning

Graduate Student Advisor: Yvonne Halden (204) 474-8769; fax (204) 474-7532
haldenyl@cc.umanitoba.ca; 201 Russell Building

### 2.3 Faculty of Arts <br> Anthropology

All students in the graduate program must meet with their advisor to determine their course load. Courses must be listed on the departmental approval form (available from the Anthropology general office) and written approval granted from both the Advisor and the department head or designate. Registration revisions are to be dealt with and approved in like manner.

Registration and program enquiries:

General Office, 435 Fletcher Argue Building; phone: (204) 474 9361;
Fax: (204) 4747600
Email: um-anthro@cc.umanitoba.ca

## Economics

## 

ACADEMIC CALENDAR 2012-2013 >

Prior to registering, all students must meet with a member of the Economics Department Graduate Studies Committee to determine their course load. The course load resulting from this meeting must be listed on the Departmental Course Approval Form (available from, 504 Fletcher Argue), and the form must be signed by a Graduate Studies committee member. The signed form must be submitted to Betty McGregor, 504 Fletcher Argue, who will then complete the registration process.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Registration and program enquiries:

Betty McGregor, 504 Fletcher Argue Building; Phone (204) 4746240

E-Mail: Betty McGregor@umanitoba.ca

## English

All students (new and returning) must have their courses approved by the graduate chair prior to registering. Any courses added/dropped/changed must be at all times approved by the graduate chair. Only those courses that have been approved will be credited to your program. Courses are subject to cancellation if there is insufficient enrolment.

Students are reminded that they must satisfy the language requirement prior to scheduling their thesis defence.

Registration Enquiries: English Graduate Program Assistant;

623 Fletcher Argue Building; phone (204) 474-7365, 8:30 a.m. to 4:30 p.m.

## French, Spanish and Italian

All returning and newly admitted students must consult with the graduate chair or the department head prior to registration. Students must fill out a pre-registration form which must be signed by the graduate chair or department head and submitted to Vonne Bannavong, 430 Fletcher Argue, who will then complete the registration process.

Registration enquiries: Vonne Bannavong, 430 Fletcher Argue;
phone: (204) 474 9313; E-mail:
Vonne Bannavong@umanitoba.ca

## German and Slavic Studies

Prior to registration in German or Slavic Studies, students must consult with the graduate chair or the department head. Departmental office: 328 Fletcher Argue; phone: (204) 4749370; fax: (204) 474-7601.

## History

All new and returning students are required to see the chair or department head prior to attempting to register.

Students may only register for courses listed and approved on the Departmental Graduate Student Registration Form, available at the time of your meeting with the graduate chair. Any course registration revisions (addition and/or withdrawals) must be approved in the same manner. Your program, including the registration of the right courses, is your responsibility.

Students are reminded that they must satisfy the language requirement prior to graduation (French for Canadian History students).

Pre-Master's, Joint Master's and Ph.D. students may take 4000- and 7000- level courses offered by the Department of History at the University of Winnipeg. Consult the History Department, University of Manitoba for information on course offerings and registration.

Registration Inquires: Carol Adam, 403 Fletcher Argue
Building;
Phone: (204) 4748401
E-mail: carol adam@umanitoba.ca

## Icelandic Studies

Prior to registration for graduate courses in Icelandic, students must consult with the department head: Dr. Birna Bjarnad-ttir, 372 University College;
Phone: (204) 4749551

## Linguistics

Students must meet with their program advisor/thesis supervisor to determine course load. These courses must be approved by the department's Graduate Committee. All course additions and withdrawals (registration revisions) must be approved in the same manner.

For registration and program enquiries:
Debbie Spindler, 534 Fletcher Argue Building; Phone: (204) 4749596.

E-mail: spindlr@cc.umanitoba.ca

## Native Studies

All students must meet with the Graduate Program Chair to determine their course load. Prior to registering, students must have written approval from the Graduate Program Chair to take selected courses. All course additions and withdrawals (registration revisions) must be approved in the same manner.

## 

## ACADEMIC CALENDAR

2012-2013 •

## University of Manitoba

For registration and program enquiries: Shirley McFaren, Graduate Program Assistant, 204E Isbister Building, phone (204) 4749899.

E-mail: mcfaren@cc.umanitoba.ca

Further assistance is available from: Dr. Renate Eigenbrod, Graduate Program Chair, 204D Isbister Building, phone (204) 4747026

E-mail: eigenbro@ms.umanitoba.ca

## Philosophy

All students (new and returning) in the Master's and preMaster's programs of the Department of Philosophy must have their courses approved by the graduate chair prior to registering. Students may only register for, and will only receive credit for, those courses approved by the graduate chair.

Graduate Chair: Rhonda Martens, 456 University College;
phone: (204) 474 9104; fax: (204) 4747586.
Email: martensr@cc.umanitoba.ca

Registration Enquiries: Sandi Mazur, 453 University College; phone (204) 4746878.

## Political Studies/Public Administration (MPA)

All new and returning students are required to have their registration pre-approved by the Chair or designate prior to attempting to register (appointments must be held prior to July 1).

Students may only register for courses listed and approved on the Departmental Graduate Student Registration Form, available at the time of your meeting with the graduate chair. Registration revisions (addition and/or deletion) must be approved in the same manner.

Students may need to register for POLS 6010 Manitoba Legislative Internship.

Registration Inquiries: Erika Ing, 532 Fletcher Argue Building; phone (204) 474 9733; Email:
inge@cc.umanitoba.ca

## POLS 6010 Manitoba Legislative Internship

Registration Inquiries: Erika Ing, 532 Fletcher Argue
Building; phone (204) 474 9733; Email:
inge@cc.umanitoba.ca

## Psychology

Prior to registration, all students (new and returning) must meet with their advisor to determine their program of study. Courses must be listed on a Departmental Program Registration Form (available on the web at
http://umanitoba.ca/arts/psychology/graduate/forms.html. The form must be signed by the advisor and the graduate programs coordinator). Clinical Program students must obtain the director of clinical training's signature prior to that of the graduate programs coordinator. Only those courses that have been approved by the graduate office will be credited to a student's program. See the Registration Information section of this Guide for registration procedures.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Contact registration and program enquiries: e-mail: psych grad office@umanitoba.ca

## Religion

To obtain written approval for courses before registration, all students in the Religion Joint Master's Program must meet either the chair of the Joint Discipline Committee, Religion, or with the department head or designate. All Ph.D. students must meet first with the head, Department of Religion. Course additions and withdrawals must be approved in the same way.

## Sociology

All new and returning Pre-Masters, M.A., and Ph.D. students must meet with the Chair of Graduate Studies in Sociology to discuss their program of study (usually in late August). The Graduate Program Assistant will then register the student. All course additions and withdrawals must be arranged in a similar fashion.

For registration and program inquiries: Margaret Currie, Sociology Graduate Program Assistant, 320B Isbister Building, phone: (204) 474-9260. Email:
Margaret Currie@umanitoba.ca

### 2.4 Clayton H. Riddell Faculty of Environment, Earth, and Resources <br> Environment, Earth, and Resources and Geography

All students must meet with their program advisor/thesis supervisor to determine their course selections. Courses must be listed on the Departmental Registration Approval Form (available from the departmental office) and written approval from the advisor and department head or designate must be obtained. Students are also responsible for obtaining any instructor or special permission which may be required for certain courses.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Registration and program enquiries: Pat Gutoski 210 Isbister Building; phone (204) 4747065. E-mail: gutoski@cc.umanitoba.ca

## Geological Sciences

All students must consult with their advisor prior to registration and present a completed Program Form to the administrative assistant. The selection of courses and changes in a student's program must be approved by their advisor in the case of Masters students or their advisory committee in the case of doctoral students.

Students should consult the administrative assistant regarding the schedule of graduate course offerings in the department. Please note that some courses require a field component to be run before lectures begin in the fall. Courses with insufficient enrolment may be cancelled well in advance of the first week of lectures.

Registration inquiries: Brenda Miller
phone (204) 474-677; E-mail: brenda miller@Umanitoba.ca

## Natural Resources Institute

All returning and newly admitted students to the Natural Resources Institute are required to see their faculty advisor to complete their Degree Requirement Form prior to attempting to register. Appointments can be made by calling (204) 4748373 . Only courses that have been approved by the faculty advisor will be credited to a student's program.

Registration Inquiries: Dalia Naguib, 303 Sinnott Building; phone (204) 4748373.

### 2.5 Faculty of Dentistry Oral Biology

All new or returning graduate students must have identified a faculty member willing to act as thesis supervisor. This must be done through personal interviews prior to registration. All programs of study must be approved by the department head or chair of the Graduate Studies and Research Committee.

Not all departmental graduate level courses are offered each year. Consult with appropriate faculty members.

Consult the department office for a list of courses offered.

Enquiries may be made: Chair, Graduate Studies and Research Committee; phone (204) 7893705.

## Oral and Maxillofacial Surgery

Graduate students in Oral and Maxillofacial Surgery will be registered by the office assistant in Dental Diagnostic and Surgical Sciences. Prior to registration, a personal interview will be held with the head of the program to approve all programs of study.

Consult the department office for a list of courses offered.

Enquiries: phone: (204) 7893633 or e-mail:
Oral Surgery@umanitoba.ca

## Periodontics

Graduate students in Periodontics will be registered by the office assistant in Dental Diagnostic and Surgical Sciences. Prior to registration, a personal interview will be held with the head of the program to approve all programs of study.

Consult the department office for a list of courses offered.

Enquiries: Periodontics, phone: (204) 7893633 or
e-mail: Periodontics@umanitoba.ca

## Preventive Dental Sciences (Orthodontics)

All new and returning students are required to have their registration processed by the Program Assistant.

Registration and program enquiries: Cathy Watt, Program Assistant, Orthodontics at (204) 789-3628 or e-mail: Cathy Watt@umanitoba.ca

### 2.6 Disability Studies

Students must meet with their program advisor to select and receive approval for courses to be taken, prior to registration. Any course revisions (additions and/or withdrawals) must be approved in the same manner.

## Continuing Courses (CO's)

Students who are unable to complete a 7000 level course may receive a mark classification of CO until such time as a final grade can be established. The deadline for completion is normally not later than one year from the end of the term in which the course was originally registered. If the course is not completed by August 31, students must re-register for the course for the next academic session in order to receive a grade.

Enquiries: Disability Studies Office (Room 128 Education Building)
phone (204) 4747017.

### 2.7 Faculty of Education

It is recommended that students read the registration information relevant to graduate students before attempting to register.

### 2.7.1 Registration Times and Status

## 

ACADEMIC CALENDAR 2012-2013 •

## University of Manitoba

Students are able to view their registration times on Aurora Student "http://aurora.umanitoba.ca," select Enrolment \& Academic Records, select Registration, and then
Registration Times and Status to view registration dates and times for a given term.

Students must ensure that courses to be taken have been approved and entered on their program approval form. If not approved, students should meet with their program advisor to select and approve the courses to be taken.

### 2.7.2 Registration Assistance

Office of Graduate \& Professional Programs, and Research

## 227 Education Building

Office Hours: 8:30 a.m. to 4:30 p.m. Monday to Friday
Telephone: (204) 4747886 or Toll Free in Manitoba 1800 4321960

Fax: (204) 4747550
E-mail: edgradpr@ms.umanitoba.ca

Website: http://umanitoba.ca/education

### 2.7.3 Continuing Courses (CO'S)

Students who are unable to complete a 7000 level course within the term, with the approval of the instructor, may receive a mark classification of CO until such time as a final grade can be established. The deadline for completion is normally not later than one year from the end of the term in which the course was originally registered. If the course is not completed by August 31, students must re-register for the course(s) for the next term in order to finish the course and to receive a grade.

### 2.7.4 Occasional Students

Prior to registration, students must obtain written permission from the department head for 7000 level Education courses. This permission must be submitted to the Office of Graduate \& Professional Programs, and Research prior to attempting to register.

### 2.7.4 Registration for student initiated courses

Prior to registration for student initiated courses, students must have the Student Initiated Form approved by their instructor and the department head and submitted to the Office of Graduate \& Professional Programs, and Research. Upon receipt of the form, a Faculty of Education staff will schedule the course and contact the student with further instructions.

### 2.7.5 Registering for courses offered in other faculties

Education graduate students wanting to register for graduate courses outside the Faculty of Education are encouraged to contact the department concerned for registration procedures. In some cases, written approval may be required from the instructor and department head of the course requested. The written approval must be presented to the Office of Graduate \& Professional Programs, and Research prior to attempting to register.

### 2.7.6 Students Registered in Other Faculties or Schools

Students registered in other faculties or schools wishing to register for an Education course may do so after a certain date. For details, see Class Schedule at
"http://aurora.umanitoba.ca" for a given term and given course.

### 2.7.7 Visiting Students

Students who are working on a graduate program at another institution and wish to register for a graduate course at the University of Manitoba with the express purpose of having credit transferred to their home university must apply for admission to the Faculty of Graduate Studies by the published application deadline dates. Also, a letter of permission from their home university must be submitted to the Office of Graduate \& Professional Programs, and Research, Faculty of Education prior to registration.

### 2.8 Faculty of Engineering

Courses are subject to cancellation if there is insufficient enrolment. Courses with insufficient enrolment may be cancelled the first week of classes. Not all courses will be offered each year - contact the department for courses that will not be offered. All returning and newly admitted students must see an academic advisor or the department head prior to attempting to register.

## Biosystems Engineering

Registration inquiries: Debby Watson, E2-376 EITC; phone (204) 474 6033; email: debby watson@umanitoba.ca

## Civil Engineering

Registration Inquiries: Connie Wenzoski, E3-386 EITC; phone (204) 474 8596; email: wenzoski@ms.umanitoba.ca

## Electrical and Computer Engineering

Registration Enquiries: Karin Kroeker; Room E2-390 EITC phone (204) 474 9603; email: karin kroeker@.umanitoba.ca

## Mechanical and Manufacturing Engineering

Registration inquiries: Kusum Vyas, E2-327 EITC;
phone (204) 474 6540; email: vyas@cc.umanitoba.ca

### 2.9 Faculty of Human Ecology Textile Sciences

All returning, newly admitted and occasional students must have their course selections and withdrawals approved by their advisor prior to registration.

Registration Inquiries: please see your advisor.

Application Inquiries: Dr. Wen Zhong, H517 Duff Roblin Bldg., phone: (204) 474-9913

Email: zhong@cc.umanitoba.ca

## Family Social Science

Prior to registration students must get approval for courses from their advisor.

Readings course: Prior to registering for a Readings course, students must arrange for a faculty member to direct in the course and get approval from the Family Social Sciences department head.

Registration inquiries:
Secretary, Family Social Sciences Department;
phone (204) 474 9225; email:
family social sciences@umanitoba.ca

## Human Nutritional Sciences

All returning or newly admitted graduate and occasional students must see a faculty advisor or the department head, and submit their course plan, prior to registering.

Registration enquiries: Pat Parish, Office Assistant; phone (204) 4749901.

For program information contact Dr. Rotimi Aluko, Chair, Graduate Studies Committee; phone (204) 474-9555
2.10 Faculty of Kinesiology and Recreation Management Program Approval Form

All new students must complete a Graduate Program Approval Form, in consultation with their advisor, and submitted to the Graduate Program Chair, prior to registering for courses. Only courses that are included on the Program Approval Form will be credited to the student's program of study. The Advisor and Graduate Program Chair must approve any changes made to the Program of Study.

## Directed Study

Students may complete a maximum of two directed study courses (different topics) for a total of six credit hours; however, only one directed study (three credits) will count towards the minimum 12 credit hour course degree requirements. Students, in conjunction with the advisor for the course, must complete a Directed/Individual Study form. This form must include a description of the course work to be completed and an outline of how the final grade will be determined. This form must be approved by the Graduate Program Chair and filed with the Graduate Program Assistant who will register the student for the course.

## Registration and Program Assistance

Graduate Program Assistant, HLHP Research Institute General Office; phone 474 7493; fax: 261 4802;
e-mail: kinrecgrad@umanitoba.ca

### 2.11 Faculty of Management <br> For information regarding the Asper MBA program, contact the Asper Graduate Program Office at:

Phone: (204) 474-8448
Email: aspermba@umanitoba.ca

For information regarding the Asper Ph.D. and M.Sc. programs, contact the Asper Graduate Program Office at:

Phone: (204) 474-8448

Email: asper phd msc@umanitoba.ca

### 2.12 Faculty of Medicine Biochemistry and Medical Genetics

All new and returning graduate students in the department of Biochemistry and Medical Genetics are required to complete a Course Approval Form available on the website:
http://umanitoba.ca/faculties/medicine/units/biochem/student 2784.htm
http://umanitoba.ca/faculties/medicine/biochem/programs/re gistration steps.html
or in the general office, in consultation with their supervisor prior to registering for courses and making program changes. The Course Approval Form must be signed by the student, supervisor, graduate chair or the department head and submitted to the graduate program coordinator. Only courses that are included on the Course Approval Form will be credited to the student's program. All course additions and withdrawals (registration revision) must be approved in the same manner by completing or filling out the Registration Revision Form available on the website:

ACADEMIC CALENDAR
http://umanitoba.ca/faculties/graduate studies/media/registr ation revision.pdf

Consult the department office or browse the web for a list of course offerings.
http://umanitoba.ca/faculties/medicine/units/biochem/student /graduate.html
http://umanitoba.ca/faculties/medicine/units/biochem/progra ms/graduate

It should be noted that not all courses are offered every year and some courses will be held only with a minimum enrolment. Please check the Aurora catalog to find out when a course is offered
(https://aurora.umanitoba.ca/banprod/bwckctlg.p disp dyn ctlg)

Registration enquiries: Mrs. Tuntun Sarkar

Email: sarkar@cc.umanitoba.ca
Phone: (204) 789-3399

## Community Health Sciences

Prior to registration, all students must have obtained permission from the relevant course instructor and both their academic/thesis advisor and the graduate director (or designate). The program approval form is available from the Graduate Program office and on our website. Only courses that are listed on the Program Approval Form may be credited towards the student's program of study. All course additions and withdrawals are to be handled in like manner.

Not all courses are offered each year. Contact the Graduate office for a list of current course offerings.

Registration enquiries: Theresa Kennedy, S111, Medical Services Building, Phone: (204) 789-3655

## Human Anatomy and Cell Science

Prior to registration, all new and returning students must meet with their advisor or the Chair, Graduate Studies Committee in the Department to determine their program of study. All course additions and withdrawals (registration revisions) must be approved in the same manner. The Program Approval Form must also be signed by the Chair, Graduate Studies Committee or Department Head.

Consult the department office for a list of courses offered.
Registration and program enquiries: phone (204) 7893411 ; (204) 7893652 or email: anatomycellsci@umanitoba.ca

## Immunology

All new and returning students must meet with their advisor to determine their program of study prior to registration. Once the student has met with their advisor and subsequently receives approval from the Department Head, they must contact the Administrative Assistant, who will register the student in their courses.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Consult the department office for a list of courses offered in 2006-07.

## Registration and program enquiries:

Karen Morrow, Administrative Assistant phone (204) 789 3509;
email: kmorrow@cc.umanitoba.ca

## Medical Microbiology

Prior to registration, all new and returning students must meet with their advisor to determine their program of study. Students should register themselves by signing up for the Aurora Student service on the University of Manitoba website. If difficulties are incurred students may contact the Graduate Studies Committee Office Assistant as per the information below.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Not all courses are offered each year. Contact the department for a list of course offerings.

Registration and program enquiries, phone (204) 789 3444; email: nelsonak@ms.umanitoba.ca

## Medical Rehabilitation

Prior to registration, all new and returning students must meet with their advisor to determine their program of study.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Not all courses will be offered each year. Please check the Aurora catalog to find out when a course is offered
(https://aurora.umanitoba.ca/banprod/bwckctlg.p disp dyn ctlg).

Registration and program enquiries, phone (204) 272 3159; email: msc med rehab@umanitoba.ca

## Occupational Therapy

Course registration information for the incoming first year students will be forwarded to them by the Department/Program Assistant. Returning students will

## 

ACADEMIC CALENDAR 2012-2013 >

## University of Manitoba

have course registration information e-mailed to their umanitoba e-mail address by Doris Weigel.

Master of Occupational Therapy (M.O.T.) students are required to register themselves through Aurora Student. Aurora Student is available 7 days per week, 24 hours per day (subject to minor scheduled and unscheduled outages in off-peak hours), thus providing students with greater access/flexibility regarding the registration process.

## Registration Exceptions

Students who have a failing grade(s) registered against them and/or have other outstanding academic matters (i.e. deferred or supplemental examinations, modified program, etc.) in regards to the previous academic session will not be allowed to register using Aurora Student until instructed to do so. Students falling into this category should initially contact Donna Collins at (204) 789-3422 or dcollin@cc.umanitoba.ca for further information.

## Registration Assistance

When registering for courses, if problems are encountered that you cannot resolve on your own, contact Doris Weigel at (204) 789-3248 or dweigel@cc.umanitoba.ca. When Doris is on holidays (only), please contact Julia Blonski at 977-5638 or blonski@cc.umanitoba.ca for assistance. Your queries will be addressed as soon as possible.

## Students on HOLD

If your records are on "HOLD", you are prevented from any registration transaction until you have cleared this status.

## Pathology

All programs of study must be approved by the Chair of Graduate Studies or by the Department Head.

Not all courses are offered each year. Please consult with the department office or appropriate faculty members.

Enquiries: Dr. Y. Myal, Chair, Graduate Studies, phone (204) 7893538.

## Pharmacology

Prior to registration, all new and returning students must meet with their advisor and Pharmacology Director of Graduate Studies to determine their program of study.

All course additions and withdrawals (registration revisions) must be approved in the same manner. Consult the department office for a list of courses offered.

Registration and program enquiries, phone (204) 789 3553; email: pharmacology@umanitoba.ca

## Physical Therapy

Course registration information for the incoming first year students will be forwarded to them by
the Department/Program Assistant. Returning students will have course registration information e-mailed to their umanitoba e-mail address by Doris Weigel.

Master of Physical Therapy (M.P.T.) students are required to register themselves through Aurora Student. Aurora Student is available 7 days per week, 24 hours per day (subject to minor scheduled and unscheduled outages in off-peak hours), thus providing students with greater access/flexibility regarding the registration process.

## Registration Exceptions

Students who have a failing grade(s) registered against them and/or have other outstanding academic matters (i.e. deferred or supplemental examinations, modified program, etc.) in regards to the previous academic session will not be allowed to register using Aurora Student until instructed to do so. Students falling into this category should initially contact Jenneth Swinamer at (204) 977-5636 or swinamer@cc.umanitoba.ca for further information.

## Registration Assistance

When registering for courses, if problems are encountered that you cannot resolve on your own, contact Doris Weigel at (204) 789-3248 or dweigel@cc.umanitoba.ca. When Doris is on holidays (only), please contact Julia Blonski at 977-5638 or blonski@cc.umanitoba.ca for assistance. Your queries will be addressed as soon as possible.

## Students on HOLD

If your records are on "HOLD", you are prevented from any registration transaction until you have cleared this status.

## Physiology

Prior to registration, all new and returning students must meet with their advisor to determine their program of study.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Not all courses are offered every year and some courses will be held only with a minimum enrolment. Consult the department office for a list of courses offered.

Registration and program enquiries, phone (204) 789 3764; email: mcindle@ms.umanitoba.ca

## Surgery

##

## UNIVERSITY of Manitoba

All new or returning graduate students must contact the Department: phone (204) 787 7277; email:
mbrychka@hsc.mb.ca.

### 2.13 Marcel A. Desautels Faculty of Music

All graduate students must meet with the Faculty's Registrar to obtain and complete a course approval form: this form will list the student's proposed course schedule. Students must receive written approval from both their advisor and the Chair of the Grad Studies program before registering. Registration revisions are to be approved in a like manner.

Not all courses are offered each year: please check with the Faculty's Registrar for current and upcoming offerings.

Registration and program enquiries: Registrar, 206 Music Building; phone: (204) 474-9133; Fax: (204) 474-7546; email: sleeson@cc.umanitoba.ca

New Supplemental Regulations governing the Marcel A. Desautels Faculty of Music graduate programs came into effect July 2008. Supplemental Regulations may be found on the Faculty of Graduate Studies website or at http://umanitoba.ca/music, Future Music Students, Graduate Studies.

### 2.14 Peace and Conflict Studies

Prior to registering, all students (new and returning) must meet with their program advisor to select and receive approval for courses to be taken. Any course revisions (additions and/or withdrawals) must be approved in the same manner.

## Registration and program enquiries:

Mauro Centre, 252 St. Paul's College
Phone: (204) 4746052
Fax: (204) 4748828
Email: mauro centre@umanitoba.ca

### 2.15 Faculty of Pharmacy

All students in the graduate program must meet with their advisor/advisory committee to determine courses. Courses must be listed on the Faculty Approval Form (available from the Pharmacy General Office) and written approval granted from both the advisor and the graduate chair. Any registration revisions (withdrawals or additions) are to be dealt with and approved in a like manner. Graduate students who register in any course that is not approved by the advisor will be withdrawn from the course.

Not all courses are offered each year. Registration inquiries: Phone (204)474-6008.

### 2.16 Faculty of Science

## Chemistry

All returning and new graduate students in the Department of Chemistry must complete a Graduate Program Approval form and consult with the Academic Programs Administrator. The selection of courses and changes in a student's program must be initiated by their graduate advisor in the case of Masters students or their advisory committee in the case of doctoral students. Students should consult the Academic Programs Administrator.

Registration assistance: Heather Paterson; phone 474 6243; e-mail heather paterson@umanitoba.ca

General inquiries should be directed to the general office, 360 Parker;
phone 474 9321, e-mail chemistry dept@umanitoba.ca

## Computer Science

All students must consult with their advisor prior to registration and hand in a completed registration form for approval to E2-445 EITC. Any changes, after the initial registration, must also be approved by the advisor.

See the sections, Registering for Thesis and Practicum, and Graduate Studies Course Numbers.

A listing of available courses can be picked up at the departmental general office, E2-445 EITC. Courses are subject to cancellation if there is insufficient enrolment.

Registration Enquiries: Lynne Romuld; phone (204) 474
8669 or romuld@cs.umanitoba.ca.

## Mathematics

All new and returning students are required to consult with a department advisor (mathematics dept@Umanitoba.ca) prior to registration. Contact H.D. Aldwyn (mathematics dept@Umanitoba.ca) at (204) 4748703.

## Mathematical, Statistical and Computational Sciences

All new and returning students in the Master of Mathematical, Statistical and Computational Sciences must consult with the Director prior to registration.

Registration inquiries: iims@umanitoba.ca Phone: (204) 474-6724

## Microbiology

All new and returning graduate students in the Department of Microbiology must have their programs approved by their advisor and the department head prior to registration.

University
of Manitoba

For registration inquiries: Sharon Berg; phone (204) 474
9372;
e-mail sberg@ms.umanitoba.ca

## Physics and Astronomy

All students must consult with their advisor prior to registration.

Registration Inquiries: Susan Beshta; phone (204) 4749817.

## Statistics

All new and returning graduate students in the Department of Statistics must consult with the grad chair and the administrative assistant prior to attempting to register.

All students must consult with their advisor prior to registration and present a completed registration form to 338 Machray Hall. Any changes, after the initial registration, must also be approved by the advisor.

A listing of available courses can be picked up at the departmental general office, 338 Machray Hall.

Registration inquiries: Liqun Wang; phone 474 6270;
e-mail liqun wang@Umanitoba.ca.
or the administrative assistant, Margaret Smith, 338 Machray Hall;
phone 474 9801; e-mail Margaret Smith@Umanitoba.ca

### 2.17 Faculty of Social Work

Students must meet with their faculty advisor to select and approve the courses before registering.

## Université de Saint -Boniface Profile and Programs Offered

Profil de l'université
L'Université de Saint-Boniface (l'Université), fondée en 1818, est située dans le quartier francophone au cœur même de la ville de Winnipeg. Ce quartier est situé sur les rives des rivières Rouge et Seine, dans l'est de Winnipeg.

L'Université de Saint-Boniface est le plus ancien établissement postsecondaire de l'Ouest canadien et est l'université de langue française au Manitoba. Elle est située à deux pas du centre-ville de Winnipeg, carrefour de nombreuses activités culturelles et sportives. L'Université est accessible à toute personne apte à poursuivre des études postsecondaires en français. Avec une vingtaine de programmes et 1200 étudiants et étudiantes provenant de 25 pays, l'Université offre une éducation universitaire générale et spécialisée ainsi qu'une formation technique et professionnelle (École technique et professionnelle). A l'Université, nous avons l'intime conviction que l'apprentissage doit se poursuivre toute la vie! Notre Division de l'éducation permanente offre une formation continue (langues, développement professionnel, développement personnel, etc.) de qualité exceptionnelle ainsi que des programmes uniques destinés aux enfants d'âge scolaire (pour de plus amples renseignements, veuillez consulter la rubrique - Écoles de langues - Formation continue sur notre site web - www.cusb.ca).

Bien ancrée dans son milieu, l'Université contribue pleinement à la vitalité et à l'épanouissement de la francophonie manitobaine, canadienne et internationale. Grâce à son enseignement de qualité et à sa recherche dynamique, elle rayonne largement au-delà de ses frontières. Établissement à dimension humaine, l'Université se définit comme un milieu interculturel inclusif qui contribue au développement global de la personne.

## Atouts de l'établissement

L'Université offre toute une gamme de programmes de premier cycle. Les étudiants obtiendront un diplôme supérieur tout en développant une variété de compétences hautement recherchées sur le marché du travail, notamment celle du bilinguisme. La Faculté des arts offre un baccalauréat général, un baccalauréat ès arts avec spécialisation (français) et une maîtrise ès arts (études canadiennes). La Faculté des sciences offre un baccalauréat ès sciences (majeure conjointe - microbiologie/biochimie) et un baccalauréat ès sciences (général). La Faculté d'éducation offre, après un premier baccalauréat, un baccalauréat en éducation, niveaux élémentaire et intermédiaire, un baccalauréat en éducation, niveau secondaire, un diplôme post baccalauréat en éducation et une maîtrise en éducation. L'École de traduction offre un baccalauréat ès arts avec spécialisation (traduction) et un certificat en traduction. L'École d'administration des affaires offre un baccalauréat en administration des affaires, tandis que l'École de service social offre un baccalauréat en service social.

Dans le secteur parascolaire, l'Université offre un programme comprenant de nombreuses activités dans les domaines artistique, sportif et social. Celles-ci apportent une dimension fort enviable à la vie étudiante.

En somme, l'Université est en mesure d'offrir une éducation de qualité supérieure, celle qui ouvrira les portes d'une future carrière tout en permettant une croissance sur le plan personnel.

L'Université embauche 110 professeurs équivalent plein temps. Le rapport étudiants/professeur est bas et les classes sont petites. La clientèle étudiante bénéficie de l'expertise d'un corps professoral qui s'illustre grâce à ses réalisations et son engagement envers l'établissement.

## Formation universitaire

L'Université de Saint-Boniface offre toute une gamme de programmes universitaires de premier cycle en arts, en service social, en traduction, en sciences, en éducation, en administration des affaires et en sciences infirmières, ainsi que des programmes d'études supérieures en éducation et en études canadiennes.

Dès septembre 2012, les étudiants et les étudiantes peuvent être admis directement en arts, en sciences ou en administration des affaires selon les critères d'admission spécifiques. Les étudiants et les étudiantes qui ne rencontrent pas les critères d'admission directe doivent compléter une première année universitaire (U1) avant de s'inscrire au programme de baccalauréat de leur choix.

## Admission

Vous voulez poursuivre vos études à l'Université de SaintBoniface? La première étape est de déposer votre candidature à un des programmes de votre choix. Après avoir reçu l'admission officielle, vous pourrez passer à l'inscription aux cours.

Cette section contient les renseignements nécessaires pour faire votre demande d'admission pour les programmes de I'Université de Saint-Boniface.

Si vous n'avez jamais étudié dans cet établissement, veuillez lire attentivement les renseignements ci-dessous.

Si vous n'avez pas encore obtenu votre relevé de notes finales de $12^{\mathrm{e}}$ année, vous pouvez quand même présenter une demande d'admission. Aussitôt les résultats reçus, il faudra les faire parvenir au Registrariat.

Si vous êtes en provenance d'une autre université ou d'un autre établissement d'enseignement postsecondaire, vous devez soumettre un relevé de notes officiel au moment de la demande d'admission ou dès que vos notes finales seront disponibles.

## Étapes d'admission

1. La préparation

- Choisissez un
programme dans lequel vous désirez étudier.

Assurez-vous de répondre aux
conditions générales d'admission et aux exigences particulières du programme choisi.

Déterminez votre
statut étudiant.

## Remplir le formulaire

- Remplissez votre
formulaire de demande d'admission.

Faites parvenir votre formulaire d'admission, les documents requis ainsi que les
frais d'admission au Registrariat, et ce, avant la date limite d'admission.

## Suivi de la demande

- Il faut prévoir un délai de deux à trois semaines pour le traitement de votre demande. Haut du formulaire

## Inscription

Dès que vous recevrez une confirmation écrite de votre admission à un programme particulier, vous pourrez vous inscrire en remplissant un formulaire d'inscription disponible au Registrariat.

- Si vous aviez été admis, mais n'avez pas suivi de cours depuis cinq ans, vous devrez obtenir l'autorisation de la faculté avant de vous réinscrire pour vous assurer que les cours déjà suivis satisfont aux exigences du programme actuel. Vous devrez ainsi remplir un formulaire de demande de réadmission disponible au Registrariat.
- $\quad$ Si vous désirez changer de faculté, vous devez remplir un formulaire de demande de transfert de faculté disponible au Registrariat.
- Si vous choisissez d'étudier à l'Université de Saint-Boniface, vous devez vous inscrire à cet établissement, même si vous comptez suivre un ou plusieurs cours à l'Université du Manitoba. Vous devrez toutefois payer vos frais de cours auprès de l'Université du Manitoba.
- Si vous voulez vous inscrire à un ou à plusieurs cours à l'USB, mais que votre établissement d'appartenance est l'Université du Manitoba ou tout autre collège affilié à l'Université du Manitoba, vous devez vous inscrire auprès de votre établissement d'appartenance.
- L'USB vous fera parvenir par courriel une facture pour vos frais de cours. Veuillez consulter
l'avis aux étudiants concernant l'envoi des factures pour l'année académique.

Chaque faculté, école et programme peut avoir des règlements académiques précis. Il vous revient de prendre connaissance des règlements qui vous concernent et de les respecter. Pour connaitre ces renseignements, veuillez
consulter l'Annuaire, sous la rubrique Règlements académiques de votre faculté ou école. Consultez également la section réservée à votre programme, qui pourrait contenir ses propres exigences.

## Exigences linguistiques

En général, les exigences linguistiques minimales pour tous les programmes d'études universitaires et collégiaux exigent l'inscription à un plein cours ou à deux demi-cours de français. La réussite de ce ou ces cours est une condition d'obtention du diplôme. Veuillez noter que ces exigences constituent un minimum seulement.

Les profils linguistiques servent à vous diriger vers les cours de langue appropriés et à proposer les mesures d'enrichissement qui permettront de combler les lacunes, le cas échéant.

Toute personne qui s'inscrit une première fois à l'USB fait dresser son profil linguistique en français par le Service de perfectionnement linguistique (SPL) avant de s'inscrire.

Puisque certains programmes exigent aussi des connaissances de la langue anglaise, les personnes admises à ces programmes et qui connaissent peu l'anglais doivent également faire dresser leur profil linguistique en anglais avant de s'inscrire.

Certains programmes exigent des attestations de mérite et d'excellence en français qui sont évaluées par le Test de maîtrise du français écrit et décernées par l'entremise du SPL.

Si vous êtes étudiante ou étudiant international et que votre langue première ou dominante est le français, consultez le document Exigences linguistiques imposées aux étudiantes et aux étudiants internationaux.

## Registrariat

Le Registrariat est le point d'entrée pour étudier à l'Université de Saint-Boniface. En plus de fournir de l'information sur l'admission à un programme, l'inscription aux cours, l'aide financière disponible et l'horaire des cours, le Registrariat est responsable des éléments suivants :

- attestations d'études;
relevés de notes;
procédure d'appel de note;
participation à la collation des grades;
changements d'adresse;
changements de nom
Le Registrariat est ouvert du lundi au vendredi de 8 h 30 à 16 h 30.

## Maîtrise en Études canadiennes-Université de Saint-Boniface

The Maîtrise ès Arts, études canadiennes is offered by the Université de Saint-Boniface, an affiliated college of the University of Manitoba, in French only, and only via the Internet. There are currently 5 students enrolled in the program. Several have recently completed their MA in études canadiennes, while a few have withdrawn from the program. Students are generally mid-career and are enrolled in the programme on a part-time basis, out of personal interest or for career enhancement. Graduates can pursue careers in the federal or provincial public service, in journalism, in the Foreign Service, or in the private sector; in addition, graduates of the programme may be admitted to doctoral programs, subject to program requirements.

Graduates of this program will receive a Maîtrise ès Arts en études canadiennes

## Admission

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must have taken four (4) years of studies at the university level. A preM.A. program is not available at this time.

## Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 6 months prior to their intended start date.
International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

## Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students must complete a minimum number of 18 credit hours of graduate coursework. In addition, students must submit an acceptable thesis and pass a thesis oral examination.

Language requirement: Reading and comprehension skills in both French and English; course work and the thesis may be written in either French or English, subject to availability of a bilingual instructor.

Expected time to graduate: 2-3 Years

## Education-Université de Saint-Boniface

The Department offers the following specializations: Inclusive Special Education; Educational Administration; Guidance and Counselling; Language, Literacy and Curriculum. Some courses are the French equivalent of the courses offered at the Faculty of Education, University of Manitoba. Many courses are specific to French education in the Province of Manitoba.

Contact the department for information on this program of study.

## Courses taught at Université de Saint-Boniface

## Faculté des arts-Anthropology

ANTH 1211 L'origine et l'antiquité de l'humanité (A) Cr.Hrs. 3 (L'ancien 076.121) Une introduction à l'anthropologie physique et à l'archéologie. (L'ancien 144.497) Initiation aux rapports que l'on peut établir entre la langue et la société, aux domaines d'étude et aux méthodes de la sociolinguistique. Préalable: une note
minimale de C dans le FRAN 2931 (144.293). Donné au l'Université de Saint-Boniface.

FRAN 4991 Création littéraire: Poésie Cr.Hrs. 3 (L'ancien 144.499) Mise en pratique de techniques de création poétique (étude des rythmes, des images, des sonorités, etc.) pour la réalisation d'oeuvres poétiques originales. Préalables: une note minimale de C dans le FRAN 2911 (144.291) et un cours (3 crédits) de poésie de niveau 2000 ou 3000. Donné au l'Université de SaintBoniface.

## Faculté des arts-Géographie

GEOG 1201 Introduction à la géographie Cr.Hrs. 6 (L'ancien 053.120) Étude des aspects physique et humain du globe et de leur interdépendance. L'étudiant ne peut se faire créditer avec GEOG 1200(053.120), ou GEOG 1290ou GEOG 1291(053.129), ou GEOG 1280ou GEOG 1281(053.128). Donné au I' Université de Saint-Boniface.

GEOG 1281 Introduction à la géographie humaine Cr.Hrs. 3 (L'ancien 053.128) Étude des divers aspects du milieu humain: la population, l'habitat et les ressources naturelles. L'étudiant ne peut se faire créditer avec le GEOG 1280, ou GEOG 1200ou GEOG 1201(053.120). Donné au l'Université de Saint-Boniface.

GEOG 1291 Introduction à la géographie physique Cr.Hrs. 3 (L'ancien 053.129) Étude des divers aspects de l'environnement physique: le climat, le relief, les sols et la végétation. L'étudiant ne peut se faire créditer avec GEOG 1290(053.129), ou GEOG 1200ou GEOG 1201(053.120). Donné au l'Université de Saint-Boniface.

GEOG 2211 Géographie économique (HS) Cr.Hrs. 6 (L'ancien 053.221) Introduction à l'expression spatiale des activités économiques. Le cours traite du concept de ressource, de la localisation et de l'utilisation des ressources naturelles, des théories sur les facteurs de localisation des activités industrielles, de l'agriculture et des fondements du développement régional. Donné au l'Université de SaintBoniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000 ou l'autorisation écrite du professeur.

GEOG 2221 Introduction à la cartographie et analyse de la carte numérique (TS) Cr.Hrs. 6
Deux heures de laboratoire par semaine. Une étude de la production et de l'analyse de cartes, en tenant compte de la cartographie assistée par ordinateur.Ce cours est une introduction aux techniques de l'expression cartographique et à l'utilisation des données de la télédétection il porte une attention spéciale à la représentation précise des statistiques.

GEOG 2481 Géographie de la population (HS) Cr.Hrs. 6 (L'ancien 053.248) Une étude des facteurs exerçant un contrôle sur l'ampleur et la répartition des populations humaines; l'analyse des variations de fécondité, de mortalité et de mobilité ainsi que leurs causes et conséquences. Donné au l'Université de Saint-Boniface. Préalable: une note minimale de $C$ dans un minimum de 3 heures-crédits de géographie de niveau 1000 ou l'autorisation écrite du
professeur.
GEOG 2541 Météorologie et climatologie (PS) Cr.Hrs. 3 (L'ancien 053.254) Étude de la nature, des contrôles et des observations du temps et des variations spatio-temporelles du climat. Donné au l'Université de Saint-Boniface. Préalable: une note minimale de $C$ dans un minimum de 3 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 2551 Géomorphologie (PS) Cr.Hrs. 3
(L'ancien 053.255) Vue d'ensemble des reliefs variés de la surface du globe et des processus géomorphologiques responsables de leur formation. (Laboratoire hebdomadaire). Donné au l'Université de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 2651 Géographie politique I Cr.Hrs. 3
(L'ancien 053.265) Étude des relations qui existent entre l'Etat et son territoire: sa localisation, ses frontières et ses disparités régionales. L'étudiant ne peut se faire créditer avec le GEOG 2430 (053.243). Donné au l'Université de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 2661 Géographie politique II Cr.Hrs. 3
(L'ancien 053.266) Étude des rapports de force entre les États et leurs relations à l'espace, aux ressources, à la population et aux groupes ethniques. L'étudiant ne peut se faire créditer avec le GEOG 2430 (053.243). Donné au l'Université de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 2651 (053.265), ou l'autorisation écrite du professeur.

GEOG 3411 Géographie de l'eau Cr. Hrs. 3 (L'ancien 053.341) L'eau, élément essentiel de la géographie physique: bilan d'eau, cycle hydrologique, infiltration, percolation et écoulement, eaux souterraines, hydrologie fluviale et marine: course d'eau, lacs et océans, environnement. Donné au l'Université de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 1290 ou GEOG 1291 (053.129), ou l'autorisation écrite du professeur.

GEOG 3421 L'eau, enjeu géostratégique Cr.Hrs. 3 (L'ancien 053.342) L'eau, un enjeu stratégique d'importance: un survol historique des enjeux liés à l'eau et les enjeux actuels, la répartition inégale de la ressource .eau. et son partage équitable, les solutions techniques, économiques, institutionnelles et juridiques envisagées et le droit international. Donné au l'Université de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 1280 ou GEOG 1281 (053.128), et les deux GEOG 2651 (053.265) et GEOG 2661 (053.266) (ou le GEOG 2430 (053.243)), ou l'autorisation écrite du professeur

GEOG 3431 Géographie de Canada (A) Cr.Hrs. 3 Étude du Canada par régions. L'étudiant ne peut se faire créditer à la fois le GEOG 2560 ( 053.256 ) ou le GEOG 2570 (053.257) et le GEOG 3700 (053.370). Donné au l'Université de Saint-Boniface. Préalable: une note minimale de $C$ dans un minimum de 6 heures-crédits de géographie de niveau 1000 ou l'autorisation écrite du professeur.

GEOG 3481 Particularités de la géographie du Canada (A) Cr. Hrs. 3
(L'ancien 053.348) Ce cours aborde des problèmes spécifiques la géographie canadienne: régions, urbanisme, milieu rural, ressources, utilisation du sol. Donné au l'Université de Saint-Boniface. Préalable: une note minimale de C dans un des cours suivants: GEOG 2560 ou (053.256), GEOG 2570 (053.257) ou GEOG 3431 (053.343), ou l'autorisation écrite du professeur.

GEOG 3501 Géographie de l'Europe (A) Cr.Hrs. 6 (L'ancien 053.350) Vue générale sur la géographie du continent européen et plus spécifiquement sur l'Union européenne. L'accent sera placé sur quelques pays. Donné au l'Université de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 6 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur

GEOG 3591 Géographie des pays en voie de développement (A) Cr.Hrs. 6
(L'ancien 053.359) Le thème principal sera la modernisation des pays en voie de développement: exemples de l'Asie méridionale et de l'Afrique noire. Seront étudiés les aspects suivants: le développement historique, les problèmes démographiques et sociaux, l'utilisation du sol et la conservation des ressources, l'urbanisation et l'industrialisation. L' étudiant ne peut se faire créditer à la fois le GEOG 3590 (053.359). Donné au l'Université de SaintBoniface. Préalable: une note minimale de $C$ dans un minimum de 6 heures-crédits de géographie niveau 1000, ou l'autorisation écrite du professeur.

GEOG 3701 Canada : Évolution de l'écoumène (A) Cr.Hrs. 6 Étude de l'impact qu'a eu l'arrivée des Européens, au début du XVIIe siècle, sur les différents aspects de l'environnement canadien; évolution de la nature de l'utilisation de l'espace canadien. L'étudiant ne peut se faire créditer à la fois GEOG 3701 et GEOG 3700.Préalable : une note minimale de C dans 6 heures-crédits de géographie de niveau 1000 ou l'autorisation du professeur.

GEOG 3761 Sujets particuliers en géographie Cr.Hrs. 6 (L'ancien 053.376) Le contenu de ce cours variera d'année en année selon les besoins des étudiants et la spécialité du professeur. Donné au l'Université de Saint-Boniface. Préalable: l'autorisation écrite du professeur.

GEOG 3771 Sujets particuliers en géographie Cr.Hrs. 3 Le contenu de ce cours variera d'année en année selon les besoins des étudiants et la spécialité du professeur. Préalable: l'autorisation écrite du professeur.

GEOG 3821 Les territoires de la francophonie mondiale (A, HS) Cr.Hrs 3
(L'ancien 053.382) La mise en place des espaces francophones à travers le monde: le développement et l'éclatement des empires français et belge. La territorialité et l'identité au sein de la francophonie internationale. Répartition géographique et développement institutionnel. Ententes politiques et aspirations territoriales. Donné au l'Université de Saint-Boniface. Préalable: Un note minimale de $C$ dans un minimum de 6 heures-crédits dans un cours de géographie de niveau 1000.

GEOG 3831 L'espace francophone panaméricain (A, HS) Cr.Hrs. 3
(L'ancien 053.383) L'étude des communautés francophones des Amériques dans le temps et dans l'espace. La mise en place de la francophonie panaméricaine et les circonstances de son éclatement. Ses enjeux économiques, sociaux, politiques et culturels. Les infrastructures, les institutions et les réseaux francophones. Donné au l'Université de SaintBoniface. Préalable: une note minimale de C dans le GEOG 3821 (053.382).

GEOG 3841 Les espaces francophones de l'Afrique, de l'Asie et de l'Océanie (A, HS) Cr.Hrs. 3
(L'ancien 053.384) L'étude des communautés francophones africaines, asiatiques et océaniennes. Les étapes de la colonisation et de la décolonisation, l'évolution vers l'indépendance et l'accession au statut d'État souverain. La mise en place des infrastructures, des institutions et des réseaux francophones. Donné au l'Université de SaintBoniface. Préalable: une note minimale de C dans GEOG 3821 (053.382).

## Faculté des arts-German

GRMN 1121 Introduction à l'Allemand Cr.Hrs. 6
(L'ancien 008.112) Trois heures de cours plus une heure de travaux dirigés et une heure de conversation par semaine. Destiné à ceux qui n'ont aucune connaissance de l'allemand ou qui n'en ont qu'une connaissance minime. Initiation à la grammaire fondamentale avec l'accent sur le développement d'aptitudes à la lecture et à la conversation. La réussite à ce cours permet de s'inscrire aux GRMN 2100 (008.210) ou GRMN 2101 (008.210). On ne peut se faire créditer les GRMN 1121 (008.112) et GRMN 1120 (008.112). Si I'on a déjà obtenu crédit pour le cours d'allemand de secondaire 4 ou l'équivalent ou pour le GRMN 2100 (008.210) ou GRMN 2101 (008.210), on ne peut s'inscrire à ce cours. Donné au l'Université de Saint-Boniface.

GRMN 2101 Allemand intermédiaire Cr.Hrs. 6 (L'ancien 008.210) Trois heures de cours et une heure de conversation par semaine. Révision de la grammaire, exercices, développement de l'expression orale et conversation. Introduction à la poésie et à la prose allemandes. On ne peut se faire créditer le GRMN 2101 (008.210) et le GRMN 2100 (008.210). PSYC 1221 Introduction à la psychologie II Cr.Hrs. 3 (L'ancien 017.122) Ce cours traite des connaissances utilisées par les psychologues pour aider l'être humain dans sa compréhension personnelle et ses interactions sociales. On y parle de motivations, d'intelligence, de personnalité et de psychopathologie. On décrit également les outils et les méthodes de travail propres à la psychologie appliquée. L'étudiant(e) qui détient les crédits du PSYC 1221 (017.122) ne peut se faire créditer aucun des cours PSYC 1200 (017.120) ou PSYC 1201 (017.120). Donné au l'Université de Saint-Boniface.

PSYC 2251 Introduction à la recherche en
psychologie Cr.Hrs. 3
(L'ancien 017.225) Une étude de la psychologie comme discipline scientifique et la description des méthodes de collecte et d'interprétation des données en psychologie. Ce cours est obligatoire pour la majeure et devrait être suivi en deuxième année. L'étudiant(e) ne peut se faire créditer à la fois le PSYC 2251 (017.225) et le PSYC 2250 (017.225). Préalable: [une note minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur.

Donné au l'Université de Saint-Boniface.
PSYC 2261 Introduction aux méthodes de recherche en psychologie Cr.Hrs. 3
(L'ancien 017.226) Etude des concepts inductifs d'inférence et d'explication. Ce cours mettra l'accent sur les schèmes de recherche en psychologie. Ce cours est obligatoire pour la majeure, et devrait être suivi en deuxième année.
L'étudiant(e) ne peut se faire créditer à la fois le PSYC 2261 (017.226) et le PSYC 2260 (017.226). Préalable: une note minimale de C dans le PSYC 2250 (017.225) ou le PSYC 2251 (017.225). Donné au l'Université de Saint-Boniface.

PSYC 2291 Le développement de l'enfant Cr.Hrs. 3 (L'ancien 017.229) Étude du développement psychologique normal de la période prénatale à la puberté. Les méthodes de recherche utilisées dans l'étude de l'enfant sont présentées. L'étudiant(e) ne peut se faire créditer à la fois le PSYC 2291 (017.229) et le PSYC 2290 (017.229). Préalable: [une note minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur. Donné au l'Université de Saint-Boniface.

PSYC 2311 Le développement de l'adolescent Cr.Hrs. 3 (L'ancien 017.231) Étude du développement psychologique normal de la puberté au stade adulte, à l'aide des résultats de recherches scientifiques. L'étudiant(e) ne peut se faire créditer à la fois le PSYC 2311 (017.231) et le PSYC 2310 (017.231). Préalable: [une note minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur. Donné au l'Université de Saint-Boniface.

PSYC 2411 Psychologie sociale 1 Cr.Hrs. 3 (L'ancien 017.241) Ce cours présente une introduction de base aux façons par lesquelles nous affectons et sommes affectés par les comportements des autres. Les thèmes abordés incluent: les méthodes utilisées par les psychologues sociaux, les attitudes et le changement d'attitude, les croyances sociales et le jugement, la conformité et la persuasion. L'étudiant(e) ne peut se faire créditer à la fois le PSYC 2411 (017.241) et le PSYC 2410 (017.241). Préalable: [une note minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur. Donné au l'Université de Saint-Boniface.

PSYC 2441 Principes de modification du
comportement Cr.Hrs. 3
(L'ancien 017.244) On discutera les hypothèses fondamentales, les principles et les méthodes de modification du comportement à partir d'exemples tirés du comportement humain, normal et anormal. Les étudiants pourraient effectuer des projets de recherche supervisés dans des secteurs d'application spécifique ou de la recherche fondamentale sur le comportement. L'étudiant(e) ne peut se faire créditer à la fois le PSYC 2441 (017.244) et le PSYC 2440 (017.244). Préalable: [une note minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur. Donné au l'Université de

Saint-Boniface.
PSYC 2451 Domaines d'application de la modification du comportement Cr.Hrs. 3
(L'ancien 017.245) L'étude d'un certain nombre de domaine d'application de la modification du comportement basée sur les principes et les procédés décrits dans le cours PSYC 2440 (017.244) ou PSYC 2441 (017.244). Les étudiants pourraient effectuer des projets de recherche supervisés dans des secteurs d'application spécifique; ou de la recherche fondamentale sur le comportement. L'étudiant(e) ne peut se faire créditer à la fois le PSYC 2451 (017.245) et le PSYC 2450 (017.245). Préalable: une note minimale de C dans le PSYC 2440 (017.244) ou PSYC 2441 (017.244). Donné au l'Université de Saint-Boniface.

PSYC 2481 Processus cognitifs Cr.Hrs. 3
(L'ancien 017.248) Une introduction aux processus langage, supérieurs dans une perspective de traitement de l'information. Les sujets abordés incluent l'attention, le développement cognitif, l'imagerie, le language, la mémoire et la résolution de problèmes. Le cours sera basé sur de nombreuses références aux résultats expérimentaux récents. L'étudiant(e) ne peut se faire créditer à la fois le PSYC 2481 (017.248) et le PSYC 2480 (017.248). Préalable: [une note minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur. Donné au l'Université de Saint-Boniface.

PSYC 3131 Psychologie de la santè Cr.Hrs. 3 Introduction au domaine de la psychologie de la santé. On y ètudie comment les interactions complexes entre des facteurs environementaux, psychologiques, neurologiques et immunitaires contribuent au maintien de la santé et, par consequent, au développement des maladies. Préalables: une note minimale de C dans le PSYC 1200 (ancient 017.120) ou une note minimale de C dans tous les deux PSYC 1211 (ancient 017.121) et PSYC 1221 (ancient 017.122). L'etudiant(e) ne peut se faire crediter à la fois le PSYC 3131 et le PSYC 3130

PSYC 3351 Neurosciences du comportement Cr.Hrs. 3 Ce cours présente les fondements de la neurobiologie du comportement. Une importance particulière est placée dans les propriétés du traitement de l'information du système nerveux de façon à offrir un cadre de référence à la compréhension de thèmes tels la perception, l'attention, le sommeil et la vigilance, la motivation et l'apprentissage. L'étudiant(e) qui détient les crédits du PSYC 3351 ne peut se faire créditer aucun des cours PSYC 3350 ou l'ancien PSYC 3331 (017.333) ou l'ancien PSYC 3330 (017.333). Préalable: [une note minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur. Donné au l'Université de Saint-Boniface.

PSYC 3441 Perception Cr.Hrs. 3
(L'ancien 017.344) Un survol des methods et des techniques qui traitent de l'interaction entre les informations sensorielles et les informations existantes au sein de l'organisme. Les sujets traits incluent las psychophysique, les constances perceptives, l'apprentissage perceptual, l'adaptation et les disorsions. L'étudiant ne peut pas se faire créditer à la fois le PSYC 3441 (017.344) et le PSYC 3160. Préalable: [une note
minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur. Donné au l'Université de Saint-Boniface.

PSYC 3451 Psychologie de la personnalité Cr.Hrs. 3 (L'ancien 017.345) Étude de la théorie et de la recherche dans les principes qui gouvernent le développement de la personnalité. L'étudiant(e) ne peut se faire créditer à la fois le PSYC 3451 (017.345) et le PSYC 3450 (017.345). Préalable: [une note minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur. Donné au l'Université de Saint-Boniface.

PSYC 3461 Psychologie de l'anormal Cr.Hrs. 3
(L'ancien 017.346) Étude de la théorie et de la recherche dans le domaine du comportement anormal de l'homme. On discute les formes principales des troubles psychologiques, leur prévention et leur traitement. L'étudiant(e) ne peut se faire créditer à la fois le PSYC 3461 (017.346) et le PSYC 3460 (017.346). Préalable: [une note minimale de C dans le PSYC 1200 (017.120) ou le PSYC 1201 (017.120)] ou [une note minimale de C dans tous les deux PSYC 1211 (017.121) et PSYC 1221 (017.122)] ou l'autorisation écrite du professeur. Donné au l'Université de Saint-Boniface.

PSYC 3511 Psychologie industrielle et
organisationnelle Cr.Hrs. 3
Examen des modèles théoriques contemporains et de la recherche portant sur les aspects psychologiques impliqués dans le comportement en milieu de travail. Les thèmes abordés inclus la sélection du personnel, les processus de groupes, la satisfaction, la productivité et la culture organisationnelle. Préalable: SPAN 1171 ou l'autorisation écrite de la professeure ou du professeur.

SPAN 1261 Espagnol intermédiaire Cr.Hrs. 3 (Laboratoire requis) Révision intensive de la grammaire et du vocabulaire étudiés dans SPAN 1171, SPAN 1180 (044.118), l'ancien SPAN 1181 (ancien TRAD 1181, ancien 122.118), SPAN 1190, SPAN 1191, ou en Espagnol 40S. Pratique et perfectionnement des connaissances en classe et au laboratoire. On ne peut se faire créditer SPAN 1261 et aucun des cours suivants : SPAN 1260 (044.126), SPAN 1262, SPAN 1280, SPAN 1290. Préalable : une note minimale de C dans SPAN 1171 et SPAN 1191 ou l'ancien SPAN 1181 (TRAD 1181 ou 122.118) ou SPAN 1180 ( 044.118) ou SPAN 1190 ou l'équivalent en Espagnol 40S, ou l'autorisation écrite de la professeure ou du professeur.

SPAN 1271 Espagnol oral I Cr.Hrs. 3
(Anciens 122.217 et TRAD 1271) Pour étudiantes et étudiants de niveau intermédiaire qui ne parlent pas couramment l'espagnol et qui souhaitent perfectionner leurs compétences orales (compréhension, correction grammaticale). Pratique intensive de la langue parlée en classe et au laboratoire de langue à partir de thèmes de discussion contemporains et de sujets d'actualité, de politique et de culture, en rapport avec le monde hispanique. On ne peut se faire créditer SPAN 1271 (TRAD 1271 ou 122.217 ) et SPAN 1270 (44.127), SPAN 1280, ou SPAN 1290. Préalable : une note minimale de C dans SPAN 1261
(TRAD 1261 ou 122.216) ou SPAN 1260 (044.126) ou l'autorisation écrite du professeur.

SPAN 2361 Espagnol commercial Cr.Hrs. 3
(Anciens 122.236 et TRAD 2361) Initiation au vocabulaire commercial et au techniques d'écriture dans le domaine des affaires. Accent mis sur la composition appliquée au domaine commercial : rédaction de lettres, compte rendus d'activités ou de réunion, etc. Préalable : une note minimale de C dans SPAN 1261 (TRAD 1261 ou 122.126), SPAN 1260 (044.126) ou SPAN 1290 ou l'autorisation écrite de la professeure ou du professeur.

SPAN 2571 El espanol a través del cine hispanoamericano Cr.Hrs. 3
(Anciens 122.257 et TRAD 2571) Les cultures espagnole et latino-américaine à parir d'oeuvres cinématographiques issues de ces cultures. Accent sur la discussion et l'expression orale. Préalable : une note minimale de C dans SPAN 1271 (TRAD 1271 ou 122.127), SPAN 1270 (044.127) ou SPAN 1290 ou l'autorisation écrite de la professeure ou du professeur.

SPAN 2573 Espagnol sujet spécial I Cr.Hrs. 3 Le contenu de ce cours varie en fonction des besioins et des intérêts des étudiants et des professeurs. La formule du tutorat peut être utilisée. Le contenu du cours varie d'année en nnée. Puisque les contenus varient d'année en année et que le cours se crée selon les besoins des étidiantes et des étudiants, les étudiantes et les étudiants pourraient suivre ce cours plus d'une fois. Préalable: Note minimale de "C" ou plus au cours d'espagnol TRAD 1261 ou le consentement écrit du professeur.

SPAN 2591 Femmes et culture en Espagne et en Amèrique latine Cr.Hrs. 3
Panorama de la culture latino-américaine abordée à partir de la production féminine. Étude des oeuvres des femmes, de leurs conditions de production dans une perspective féministe et dans le cadre théorique des études culturelles. Panorama incluant divers pays et diverses époques, ainsi que différents types de production (littérature, cinéma, peinture et sculpture). Préalable: une note minimale de C dans SPAN 1262 (SPAN 1261, TRAD 1261 ou 122,126), I'ancien SPAN 1260 (044,126), SPAN 1280 ou SPAN 1290 ou l'autorisation écrite de la professeure ou du professeur.

SPAN 2671 Espagnol sujet spécial I Cr.Hrs. 3
Cours à contenu variant en fonction des besoins et des intérêts des personnes qui le suivent et de celles qui l'enseignent. La formule de tutorat peut être utilisée. Cours dont le contenu varie d'année en année et pouvant être donc suivi plus d'une fois. Préalable: une note minimale de C dans SPAN 1262 (SPAN 1261, TRAD 1261 ou 122,126), I'ancien SPAN 1260 (044,126), SPAN 1280 ou SPAN 1290 ou l'autorisation écrite de la professeure ou du professeur.

SPAN 3271 Espagnol sujet spécial II Cr.Hrs. 3 Le contenu de ce cours en fonction des besoins et des intérêts des étudiants et des professeurs. La formule du tutorat peut être utilisée. Le contenu des cours varie d'année en année. Puisque les contenus varient d'année en année et que le cours se crée selon les besoins des étudiants et des étudiants, eux ou elles pourraient suivre ce cours plus d'une fois. Préalable: Note minimale de "C" à un cours d'espagnol de niveau 2000 ou le consentement écrit du professeur.

SPAN 3341 Grammaire et syntaxe de l'espagnol Cr.Hrs. 3 Ce cours comprend une étude approfondie et détaillée de la grammaire et de la syntaxe de l'espagnol. On ne peut se faire créditer à la fois le SPAN 3341 et aucun des cours SPAN 3340, I'ancien SPAN 3280 (044.328). Préalable: Une note de > ou plus dans n'importe quel d'espagnol de niveau 2000 ou le consentement par écrit du professeur.

SPAN 3461 Littérature et civilisation d'Amérique latine Cr.Hrs. 3
(Anciens 122.316 et TRAD 3461) Initiation aux grands auteurs d'Amérique latine, ainsi qu'aux caractères spécifiques des sociétés latino-américaines: valeurs, pratiques culturelles, mais aussi politiques, commerciales et professionnelles. Préalable : une note minimale de C dans SPAN 1261 (TRAD 1261 ou 122.126) ou SPAN 1260 (044.126).

SPAN 3561 Cours avancé d'espagnol professionnel Cr.Hrs. 3
(Anciens 122.356 et TRAD 3561) Pratique de la traduction de l'espagnol vers le français vers l'espagnol à partir de textes pragmatiques à caractère professionnel. Préalable : une note minimale de C dans SPAN 2361 (122.236 ou TRAD 2361).

SPAN 3881 Violence, révolutions et dictatures dans la culture hispanophone Cr.Hrs. 3
Panorama de la culture latino-américaine suivant l'histoire de la violence. On étudiera les manifestations culturelles reliées aux événements qui ont marquê l'histoire de l'Amérique latine: révolutions, guérillas, dictatures. Le contenu du cours se centre sur les manifestations des artistes et d'autres producteurs culturels vis-à-vis de la violence ( apologistes ou pacifistes?). Préalable: Avoir obtenu > ou plus dans au moins un cours d'espagnol de niveau 2000 ou le consentement écrit du professeur.

## Faculté des arts-Theatre

THTR 1001 Initiation à l'improvisation théâtrale Cr.Hrs. 3 Ce cours vise à initier les étudiants aux aspects fondamentaux de l'improvisation théâtrale. À ce Ititre, il aborde différents aspects de l'improvisation comme l'expression des sentiments et du corps, la mise en scène, le jeu à partir d'un motif, la créativité, l'écoute du public, la capacité d'attention, l'initiative, la réceptivité, la spontanéité sur scène et l'utilisation des accessoires.

THTR 1021 Introduction à l'analyse du texte théâtral Cr .Hrs. 3
S'il est indéniable que texte de théâtre a beaucoup progesssé depuis une trentaine d'années, en revanche la pratique du théâtre demeure encore souvent marquée par la difficulté de saisir le texte comme tel, comme s'il fallait toujours s'en remettre à la représentation pour que le texte théâtral soit considéré comme un véritable objet d'études. Ce cours permettra à l'étudiant-e de combler cette lacune tout en l'initiant aux aspects les plus saillants du texte théâtral. On pourra ainsi se demander s'il existe une spécificité du texte de théâtre, si l'étude du théâtre peut se passer de la représentation ou du texte théâtral. Cette investigation permettra d'aborder des questions qui touchent aussi bien à l'organisation et à la structuration du texte théâtral, qu'à la fiction, l'espace, le temps, l'énoncé,
l'énonciation, le personnage et l'action.
THTR 2521 Art théâtral et techniques de scène Cr.Hrs. 3 Ce cours vise à initier les étudiants aux équipements spécialisés de la scène. Il y sera question d'éclairage (théorie de la lumière et de la couleur, fonctionnement des projecteurs,maîtrise de la console d'éclairage, création d'un ensemble scénique homogène) et des principes de la sonorité (fonctionnement des divers appareils: lecteurs, microphones, amplificateurs, réverbérateurs, etc.). Ce cours abordera aussi la sonorité: théorie du son, éventail de bruitages, utilisation d'effets sonores et de musique dans un spectacle, enregistrement. Enfin, ce cours se penchera sur la question de la régie: direction technique et direction de production théâtrale.

THTR 2531 Le jeu corporel Cr.Hrs. 3
Ce cours vise à initier les étudiants aux diverses approches du corps comme langage scénique: les rapports entrent le langage et le geste, les fonctions de la gestuelle dans un jeu équilibré. Il sera aussi question des rapports entre le corps et l'espace, le corps et les rythmes. Il s'agira enfin de mettre l'accent sur les grandes tendances qui se dégagent des probleématiques actuelles sur les rapports entre le corps et le jeu.

THTR 2541 L'expression orale au théâtre Cr.Hrs. 3 Étude de l'expression orale et de la communication sous leurs différents aspects. Étude des règles de la prononciation, de l'élocution et de la prosodie de français contemporian. Étude des diverses techniques de l'élocution théàtrale comme moyen de communication et comme moyen de l'art dramatique (registres tragique, dramatique et comique). Analyse des facteurs et des fonctions du langage et de la communication. Initiation aux techniques de lecture à première vue et aux textes à mémoriser. Initiation aux diverses techniques respiratoires et vocales.

THTR 2551 Improvisation théâtrale Cr.Hrs. 3
Ce cours reprend les grands principes de l'improvisation théàtrale proposés dans le THTR 1000 (Initiation à l'improvisation théàtrale), mais il les applique cette fois à nombre de thématiques, de situations et d'aspects différents du jeu improvisé. À ce titre, ce cours aborde et explore d'autres dimensions de l'improvisation théàtrale, tout en se fondant sur les acquis du cours l'improvisation de première année.

THTR 3521 Interprétation, voix et expression orale Cr.Hrs. 3 Étude de la voix sur le plan interprétatif et expressif. Les divers rapports entre la voix, l'expressivité individuelle, collective et le spectacle. Les rythmes de la voix (modulations, hésitations, accélérations...). Les rapports entre la voix, le corps et l'espace. Les principes de l'improvisation vocale et du jeu choral.

THTR 3531 Jeu et caméra Cr.Hrs. 3
Ce cours vise à initier les étudiants au rôle créateur de la caméra. À ce titre, les rapports entre le jeu de l'acteur et les différents types de cadrages relatifs au septième art seront abordés. En outre, il y sera question de compréhension et d'interprétation de scripts, ainsi que de nombreux aspects relatifs au jeu de l'acteur sur un plateau de tournage: scènes de combat, essayage de costumes, apprentissage d'accents étrangers, maniement d'armes, principes de jeu avec des animaux ou des doublures. Du reste, ce cours accordera
une attention particulière à la question des auditions.
THTR 3541 Le jeu réaliste Cr.Hrs. 3
Connaissance théorique et pratique des techniques de jeu réaliste selon la méthode de Stanislavski et de IActors' Studio. Le rôle et les fonctions du corps, les techniques de l'identification et de l'incarnation; le rôle des émotions, l'écoute des partenaires de jeu, l'observation, la construction globale du personnage. Techniques et esthétiques du jeu réaliste.

THTR 3551 Clown et masques Cr.Hrs. 3
Ce cours vise à initier les étudiants aux aspects fondamentaux de l'art du clown et du rôle des masques dans l'engagement physique au théàtre. Aussi aborde-t-il les différents aspects du jeu du clown et de la pratique de jeu masqué (théàtre antique, Commedia dell'arte), comme la gestuelle, le langage, le mouvement, I'espace, I'utilisation des accessoires et limportance de l'intégration du clown à la formation de l'acteur.

THTR 3561 Scénographie Cr.Hrs. 3 Introduction à la scénographie du point de vue historique et évolutif (du théàtre de l'Antiquité grecque au théàtre de la dérision). Introduction au travail d'agencement des moyens techniques et artistiques de la scénographique, en tenant compte des rapports entre le texte théàtral et l'espace de la scène. Mise en relief des différentes étapes de la conception scénographique (décors, costumes, jeu de lumières, effets scéniques, etc.). Réflexion sur le travail de scénographes réputés comme Walter Gropius, Yannis Kokkos et Wieland Wagner.

THTR 3571 Atelier de théâtre Cr.Hrs. 3
Cours d'initiation à la pratique théátrale dans son ensemble: jeu, scénographie, mise en scène. Ce cours constitue une synthèse de tous les aspects de l'art dramatique en prévision de scènes devant la salle de classe et/ ou pour des invitées à la fin du trimestre. Des aspects incontournables de l'art dramatique figureront au programme de ce cours: la concentration, l'écoute personnelle et collective, le monologue intérieur, la mémoire sensorielle et affective, l'analyse approfondie de scènes, la construction de personnages, le travail à l'extérieur des répétitions ainsi que le comportement lors de répétitions. Préalables: Avoir réussi I'un des deux cours consacrés à l'improvisation (THTR 1001, THTR 2551), 4 cours de $2 e$ année et 2 cours de $3 e$ année.

THTR 4521 Mise en scène Cr.Hrs. 3
Ce cours vise à initier les étudiants aux principes relatifs à la mise scène. Les rapports entrent l'art de la mise en scè et certaines théories esthétiques seront abordées. également de mettre l'accent sur les grandes tendances qui se dégagent des problématiques actuelles de la mise en scène. Ce cours propose aussi une réflexion critique sur la mise en scène comme forme d'interpétation qui mène à la création théàtrale.

THTR 4531 Mise en scène II Cr.Hrs. 3
Ce cours reprend les principes de Mise en scène 1 et les applique à la dramaturgie, à la scénographie, à différentes esthétiques historiques et au jeu de l'acteur. À ce titre, ce cours permet à l'étudiant de mieux connaître les ressources artistiques et pratiques à la disposition du metteur en scène. À travers une sé de travaux pratiques et de projets, l'étudiant pourra parachever ses connaissances de la mise en scène. Tout en insistant sur les divers aspects de la mise en scène,
ce cours accordera aussi une importance particulière à direction des acteurs.

THTR 4541 Jouer les genres théâtraux: comédie, tragédie et drame Cr.Hrs. 3
Cours de synthèse dans lequel les étudiants aborderont les techniques de jeu liées aux genres théàtraux: la comédie, la tragédie et le drame. À ce titre, une attention particulière sera apportée à l'action comique, tragique et dramatique sous le rapport des conflits et des renversements de situation, des rythmes vocaux (répliques, interaction entre comédiens), des didascalies, du contexte culturel des oeuvres dramaturgiques et du contexte théàtral en général. Ce cours permettra aussi d'aborder la question de la composition et de l'interprétation d'un personnage, en fonction de la compréhension du texte et des techniques de jeu.

THTR 4551 Atelier de théâtre et production Cr.Hrs. 3 L'objectif de ce cours consiste à produire une pièce de théàtre, soit une création collective, soit une oeuvre de répertoire. La contribution et l'implication des étudiant-e-s seront essentielles car ils devront prendre en charge, sous la supervision du professeur, les divers aspects d'une production théàtrale: publicité, décors, costumes, éclairages, bruitages jeu et, dans une moindre mesure, mise en scène. À ce titre, ce cours donne l'occasion aux étudiant-e-s de mettre en pratique ce qu'ils auront appris dans d'autres cours de la Spécialisation en études théàtrales; ce qui leur permettra d'acquérir à la fois une plus grande autonomie et une expérience indispensable dans le domaine des arts de la scéne.

## École de traduction: Traduction-2000 Level <br> TRAD 2071 Grammaire normative Cr.Hrs. 6

(L'ancien 122.207) Dans le cadre d'une révision approfondie de la grammaire, l'étudiant apprendra à maîtriser les particularités orthographiques du français. On étudiera les formes et les fonctions des parties du discours en insistant sur le verbe et ses conjugaisons ainsi que sur les règles d'accord et de concordance à l'intérieur de la phrase simple et de la phrase complexe. Préalable: [avoir réussil l'examen d'admission aux programmes de traduction] ou [avoir obtenu la note B à l'issue des cours FRAN 1091 (144.109) et FRAN 1111 (144.111)]. Donné au l'Université de Saint-Boniface.

TRAD 2101 Analyse et résumé de textes 1 Cr.Hrs. 3 (L'ancien 122.210) Apprentissage des techniques d'analyse et de résumé de textes pragmatiques français de façon à développer l'aptitude interprétative (extraction du sens) et les capacités expressives (reformulation) chez l'étudiant(e). Les textes, écrits ou audiovisuels, touchent à l'actualité et aux divers domaines avec lesquels le traducteur sera appelé à se familiariser. Préalable: [avoir réussi l'examen d'admission] ou [obtenu B+ au FRAN 1111 (144.111)] ou bien avoir reçu l'autorisâtion écrite du professeur ou de la professeure. Donné au l'Université de Saint-Boniface.

TRAD 2111 Informatique et traduction Cr.Hrs. 3
(L'ancien 122.211) Introduction à l'usage des ordinateurs en traduction: banques de données terminologiques, dictionnaires électroniques, traduction assistée par ordinateur. Introduction à la traduction automatique. Préalable: avoir réussi l'examen d'admission ou obtenu l'autorisation écrite du professeur ou de la professeure.

Donné au l'Université de Saint-Boniface.
TRAD 2151 Introduction à la traduction Cr.Hrs. 3 (L'ancien 122.215) Introduction à l'histoire de la traduction et au rôle que celle-ci a joué aux diverses époques. Réflexion sur la responsabilité du traducteur vis-à-vis de ceux qu'il traduit (auteurs, représentants politiques, etc.) et de ses lecteurs. Méthodes et théories en traduction. Initiation à la traductologie. Préalable: avoir réussi l'examen d'admission ou obtenu l'autorisation écrite du professeur ou de la professeure. Donné au l'Université de Saint-Boniface.

TRAD 2301 Culture générale $1 \mathrm{Cr} . \mathrm{Hrs} .3$ (L'ancien 122.230) Cours autodidactique pluridisciplinaire. L'étudiant(e) établit son corpus à partir d'une liste de lecture et en accord avec le(la) responsable de son programme d'étude. Donné au l'Université de Saint-Boniface.

## École de traduction: Traduction-3000 Level TRAD 3011 Lexicologie comparée Cr.Hrs. 3

 (L'ancien 122.301) Étude des domaines abordés par la lexicologie et comparaison des structures lexicosémantiques de l'anglais et du français dans l'optique de la traduction. Ce cours abordera entre autres des notions telles que la contextualisation; la cooccurrence; les interférences linguistiques (anglicismes, gallicismes, faux amis); et la modulation lexicale en traduction. Préalable: avoir réussi l'examen d'admission ou obtenu l'autorisation du professeur ou de la professeure. Donné au l'Université de SaintBoniface.TRAD 3051 Syntaxe comparée Cr.Hrs. 3 (L'ancien 122.305) Étude contrastive des structures syntaxiques de l'anglais et du français dans l'optique de la traduction. Apprentissage des techniques de transfert et particulièrement de la transposition syntaxique à l'aide de nombreux exercices pratiques. Correction des problèmes des syntaxe provenent d'interfèrences linguistiques; calques, mauvais emplois des prèpositions, des temps, etc. L'étudiant ou l'étudiante ne peut se faire créditer le TRAD 3051 (122.305) et l'ancien 044.363. Préalable: avoir réussi l'examen d'admission ou obtenu l'autorisation du professeur ou de la professeure. Donné au l'Université de SaintBoniface.

TRAD 3101 Analyse et résumé de textes 2 Cr.Hrs. 3 (L'ancien 122.310) Pratique des techniques d'analyse et de résumé à partir de textes français ou anglais. La reformulation en français sera l'occasion d'un exercice intellectuel proche de la traduction. Les recherches documentaires viseront non seulement à l'amélioration des connaissances générales mais aussi à l'établissement de glossaires. Préalable: une note minimale de C dans le TRAD 2101 (122.210). Donné au l'Université de Saint-Boniface.

TRAD 3111 Laboratoire 1 Cr.Hrs. 3
(L'ancien 122.311) Ce cours a pour but de donner la possibilité aux étudiants de pratiquer leur futur métier dans des conditions semblables à ce qu'elles seront dans un bureau de traduction (qualité du produit fini, présentation, échéances, etc.) tout en étant guidés par leur professeur qui jouera ici le rôle de réviseur. Les textes pourront être des articles susceptibles d'être utiles aux professeurs de diverses matières au CUSB. Le laboratoire s'étendra sur toute l'année, à raison de 3 heures par semaine. Préalables:
une note minimale de C dans les TRAD 2101 (122.210) et TRAD 3101 (122.310). Donné au l'Université de SaintBoniface.

TRAD 3121 Lexicographie comparée Cr.Hrs. 3 (L'ancien 122.312) Étude contrastive de dictionnaires unilingues et bilingues anglais/français. Lecture de manuels de lexicographie et comparaison de divers dictionnaires unilingues et bilingues. Préalable: avoir réussi l'examen d'admission ou obtenu l'autorisation écrite du professeur ou de la professeure. Donné au l'Université de Saint-Boniface.

TRAD 3131 Terminologie bilingue et documentation Cr.Hrs. 3
(L'ancien 122.313) Initiation aux diverses méthodes d'acquisition de la documentation permettant une application à la traduction: utilisation des encyclopédies, des ouvrages et des revues spécialisées à des fins terminologiques.
Apprentissage de l'utilisation des banques de données et établissement de fiches terminologiques. Préalables: [une note minimale de C dans TRAD 2101 (122.210) et TRAD 3101 (122.310)] ou une note minimale de C dans TRAD 2151 ou l'autorisation écrite du professeur ou de la professeure. Donné au l'Université de Saint-Boniface.

TRAD 3141 Rédaction professionnelle comparée I Cr.Hrs. 3 (L'ancien 122.314) Étude comparative de documents professionnels anglais et français afin de mettre en lumière les différences qui peuvent exister dans les méthodes de présentation ou d'expression en anglais et en français. L'étudiant(e) devra ensuite produire des textes professionnels variés (lettres, procès-verbaux, curriculum vitae, etc.). Préalables: [une note minimale de C dans les TRAD 3101(122.310) ou dans TRAD 2151, ou l'autorisation écrite du professeur ou de la professeure. Donné au l'Université de Saint-Boniface.

TRAD 3261 Traduction générale (anglais-français) Cr.Hrs. 3 (L'ancien 122.326) Mise en pratique des principes de traduction introduits dans le cours TRAD 2151 (122.215) (Introduction à la traduction) auquel il fait suite. Les textes à traduire seront de nature générale et porteront sur divers domaines de l'actualité et de la vie professionnelle. Préalable: une note minimale de C dans le TRAD 2151 (122.215). Donné au l'Université de Saint-Boniface.

TRAD 3271 General Translation (French-English) Cr.Hrs. 3 (L'ancien 122.327) Apprendre et appliquer les règles de base de la traduction vers l'anglais de textes français d'intérêt général. Par une approche analytique du sens, découvrir les principaux aspects du maniement du langage pour pouvoir saisir les idées d'un message et leur articulation, et les reformuler en exploitant les ressources de l'anglais. Préalable: une note minimale de C dans au moins un des cours suivants: le ENGL 2000 (004.200) ou le ENGL 2001 (004.200) ou le TRAD 2101 (122.210) ou le TRAD 2151 (122.215). Donné au l'Université de Saint-Boniface.

TRAD 3281 Sujets particuliers Cr.Hrs. 3
(L'ancien 122.328) Le contenu de ce cours peut changer en fonction des besoins et des intérêts des étudiants et des professeurs. Préalable: [un cours (3 crédits) avec une note minimale de C de niveau 2000] ou l'autorisation du professeur. Donné au l'Université de Saint-Boniface.

TRAD 3301 Culture générale II Cr.Hrs. 3 (L'ancien 122.330) Cours autodidactique pluridisciplinaire.

L'étudiant(e) établit son corpus à partir d'une liste de lecture et en accord avec le(la) responsable de son programme d'étude. Préalable: une note minimale de $C$ dans le TRAD 2301 (122.230). Donné au l'Université de Saint-Boniface.

## École de traduction: Traduction-4000 Level <br> TRAD 4011 Atelier de traduction professionnelle Cr.Hrs. 3

 (L'ancien 122.401) Travaux pratiques de traduction en atelier où la simulation des conditions réelles de travail devra permettre à l'étudiant(e) d'améliorer sa productivité sous le rapport du temps et de la qualité. Préalable: [une note minimale de C dans le TRAD 3261 (122.326) ou TRAD 3271 (122.327) et une note minimale de C dans TRAD 3131 ou l'autorisation écrite du professeur ou de la professeure. Donné au l'Université de Saint-Boniface.TRAD 4031 Analyse du discours I Cr.Hrs. 3 Le discours comme réseau de relation, fait de langage et fait social. Son inscription dans le schéma de la communication. Initiation á la théorie de communication. La notion de littérarité selon plusieurs modèles théoriques, notamment la théorie de réception et le modèle marxiste. Application á l'analyse de textes littéraires et pragmatiques. Un étudiant ou une étudiante ne peut se fair créditer le TRAD 4031 et I'ancien TRAD 4021 (122.402). Préalable: I'autorisation écrite du professeur oui du chef de départment de français ou de traduction.

TRAD 4033 Analyse du discours II Cr.Hrs. 3 Le discours comme réseau de relation, fait de langage et fait social. Son inscription dans le schéma de la communication. Initiation á la théorie de communication. La notion de littérarité selon plusieurs modèles théoriques, notamment la sémiotique et les perspectives psychanalytiques. Application á l'analyse de textes littéraires et pragmatiques. Un étudiant ou une étudiante ne peut se fair créditer le TRAD 4031 et l'ancien TRAD 4021 (122.402). Préalable: I'autorisation écrite du professeur oui du chef de départment de français ou de traduction.

TRAD 4051 Révision Cr.Hrs. 3
(L'ancien 122.405) Principes de la révision. Vérification et d'amélioration de textes traduits. Exercices comparatifs et raisonnés, il apprendra pour développer les facultés analytiques, le sens critique et l'habileté à manier la langue d'arrivée. Préalable: une note minimale de C dans le TRAD 3261 (122.326)] ou l'autorisation écrite du professeur ou de la professeure.

TRAD 4061 Terminologie appliquée Cr.Hrs. 3 (L'ancien 122.406) Travaux pratiques destinés à renforcer l'efficacité et la qualité des recherches documentaires et terminologiques exigées de l'étudiant(e) par la traduction de textes spécialisés. Préalable: une note minimale de C dans le TRAD 3131 (122.313). Donné au l'Université de SaintBoniface.

TRAD 4071 Mémoire de traduction Cr.Hrs. 3
(L'ancien 122.407) Travail indépendant, s'étendant sur deux semestres ou plus, sous la direction d'un professeur. L'étudiant ou l'étudiante devra démontrer qu'il est capable de mener une recherche documentaire et terminologique à des fins traductionnelles. Pour ce faire, il ou elle réalisera une traduction commentée d'un texte d'au moins 3000 mots répondant aux exigences de la profession. La traduction
sera nécessairement accompangée d'une analyse textuelle et d'un lexique élaboré à partir du texte à traduire. Préalables: [une note minimale de C dans le TRAD 3261 (122.326) ou le TRAD 3271 (122.327)] et [une note minimale de C dans le TRAD 3131 (122.313)]. Donné au l'Université de Saint-Boniface.

TRAD 4081 Sous-titrage Cr.Hrs. 3
(L'ancien 122.408) Le cours présente un survol des processus traductologiques et techniques du sous-titrage. Il comprend également un volet pratique sur la traduction cinématographique en utilisant des sous-titres. Préalable: une note minimale de $C$ dans un des cours suivants: le TRAD 4251 (122.425) ou le TRAD 4091 (122.409) ou le TRAD 4281 (122.428). Donné au l'Université de SaintBoniface.

TRAD 4091 Gestion d'un service de traduction Cr.Hrs. 3
(L'ancien 122.409) Principes de base de la gestion appliquée à un service de traduction. Gestion et la coordination des équipes en réseau Internet, tant sur le plan national qu'international. Préalable: une note minimale de C dans le TRAD 2151 (122.215) et TRAD 3261 (122.326) ou TRAD 3271 (122.327).

TRAD 4101 Mémoire de terminologie Cr.Hrs. 3
(L'ancien 122.410) Travail de recherche supervisé en terminologie de l'Ecole de traduction. Recherche thématique sur un sujet et élaboration de fiches terminologiques.

MKT 3291 Publicité Cr.Hrs. 3
Analyse du rôle et de la gestion de la publicité dans le cadre du plan marketing. Théorie de la communication et la formulation de messages publicitaires, établissement du budget, la sélection des médias et l'analyse de l'efficacité de la publicité. Donné au l'Université de St. Boniface. Préalable: 18.221 (D).

MKT 3301 Marketing international Cr.Hrs. 3
(Ancien 118.330) Analyse comparée des structures, des fonctions et des processus de marketing dans des environnement sociaux, culturels et économiques variés. Diagnostic de l'environnement externe et élaboration des stratégies de marketing mix international. Préalable : MKT 2211(ancien 118.221).

MKT 4211 Gestion du marketing Cr.Hrs. 3
(Ancien 118.421) Examen des stratégies et des tactiques marketing que les managers utilisent pour leurs produits et services à différents niveaux du cycle de vie du produit. Utilisation des analyses qualitatives et quantitatives pour développer la pensée critique essentielle à la prise de décision en marketing. Ne peut être pris qu'en dernière année du programme. Préalables:[(MKT 3221 ou MKT 3220 (118.332) ou (MKT 3230 (118.323)] et un cours additionnel de marketing niveau 3000 ou 4000: et [ACC 1111 ou ACC

1110 (ancien 009.111).]
MKT 4271 Administration des ventes Cr.Hrs. 3 (L'ancien 118.427) Analyse de l'administration de la vente personnelle, y compris l'analyse la fonction-vente, la supervision de la force de vente et la gestion des ventes. Donné au l'Université de St. Boniface. Préalable: MKT 2210 (ou 118.221) (D).

## École d'administration des affaires-Supply Chain Mangement(MSCI)

MSCI 2151 Introduction aux sciences de la gestion Cr.Hrs. 3 (Ancien 164.215) Introduction aux techniques et modèles des sciences de la gestion. Les sujets traités incluent la programmation linéaire, les problèmes d'affectation et de transport, la théorie de la décision et les files d'attente. On ne peut se faire créditer le MSCI 2151, le MSCI 2150, 164.215, 021.215 ou le ABIZ 2520. Préalables: [MATH 1520 (ou 136.152) (C) ou MATH 1501 (C) ou MATH 1500 (ou 136.150) (C) ou l'équivalent et STAT 1001 (C) ou STAT 1000 (ou 005.1100 ) (C) ou l'équivalent.

MSCI 3401 Sciences de la gestion 2 Cr.Hrs. 3 (L'ancien 164.340) Modèles de la recherche opérationnelle utilisés dans l.analyse de problèmes de gestion. Les sujet traités incluent les réseaux, les problèmes d.inventaire du point de vue déterministe, la programmation dynamique, la théorie des jeux. On ne pourra se faire créditerce cours avec I'ancien 027.340. Préalables: MSCI 2150 (ou 164.215) (D) ou le consentement du professeur.

## École d'administration des affaires-Supply Chain Mangement Operations(OPM)

OPM 2601 Principes de gestion des opérations et de la production Cr.Hrs. 3
(L'ancien 164.260) Étude des notions de base en gestion des opérations et de la production, systèmes de production, conception de système, analyse et contrôle. Donné au Université de Saint-Boniface. On ne pourra se faire créditerce cours avec l'ancien 027.260. Préalable ou corequis: STAT 1000 (ou 005.100) (D) ou l'équivalent.

OPM 4611 Gestion de projets Cr.Hrs. 3
Étude de la gestion de projets. Définition et contexte d'application de la gestion de projets. Techniques, approaches et outils de gestion d'un projet en fonction de la structure organisationnelle de l'entreprise et des contraintes de temps, coût et qualité. Préalable:GMGT 2081 Introduction au management et à la théorie de l'organisation et OPM 2601 Principes de la gestion des opérations et de la production.

## École d'administration des affaires-Supply Chain Management (SCM)

SCM 2161 Gestion de la chaîne logistique et des opérations Cr.Hrs. 3
Etude de la gestion de la chaîne logistique (GCL) et des opérations. Positionne la gestion des opérations comme un
domaine d'étude fondamental à l'intérieur de la GCL. Se focalise sur l'approche processus et la conception de système. L'étudiant (e) qui détient les crédits du SCM 2161 ne peut se faire créditer aucun des cours OPM 2601 (ancien 027.260) ou OPM 2600 (ancien 164.260) ou SCM 2160.

## Faculté des sciences-Biology

BIOL 1001 Biologie : Les fondements de la vie Cr.Hrs. 3 (Ancien 071.100) Étude de certains principes unificateurs de la vie. Attention particulière à la biologie cellulaire, à la bioénergétique, à la division cellulaire, à la génétique et à l'évolution. Ne peut être utilisé dans un programme de majeure ou de spécialisation. On ne peut se faire créditer BIOL 1001 et BIOL 1000 ( 071.100 ) et BIOL 1020 ou BIOL 1021 (071.125, 071.201). Préalable : Mathématiques 40 S ou le cours Mathematic Skills ( $50 \%$ ) enseigné par la Division de l'éducation permanente. Donné seulement au l'Université de Saint-Boniface.

BIOL 1011 Biologie : La diversité biologique et ses interactions Cr.Hrs. 3
(Ancien 071.101) Introduction à la diversité (les procaryotes, les protistes, les champignons, les plantes et les animaux), à la forme et à la fonction des plantes et des animaux ainsi qu'aux principaux concepts de l'écologie. Ne peut être utilisé dans un programme de majeure ou de spécialisation. On ne peut se faire créditer BIOL 1011 et BIOL 1010 (071.101) et BIOL 1030 ou BIOL 1031 (071.125, 071.201). Préalable : Mathématiques 40S ou le cours Mathematic Skills (50\%) enseigné par la Division de l'éducation permanente. Donné seulement au l'Université de Saint-Boniface.

BIOL 1021 Biologie I: Thèmes et Principes Cr.Hrs. 3 (Labo requis) (Ancien 071.102) Les principes unificateurs à la base de la biologie dont la biologie cellulaire, la bioénergétique, la division cellulaire, la génétique et l'évolution. Pour ceux et celles qui veulent suivre un programme de sciences biologiques avec majeure ou spécialisation. On ne peut se faire créditer BIOL 1021 et BIOL 1020, BIOL 1001, BIOL 1000 (071.100) ou BIOE 2590 (034.259) ou les anciens 071.125, 071.123, 071.201. Préalables: Biologie 40S (ou l'équivalent), un cours de Mathématique 40S (ou l'équivalent) et un des deux cours suivants : Chimie 40S ou Physique 40S (ou l'équivalent); ou BIOL 1001 ou BIOL 1000 avec une note minimale de C). Si BIOL 1001 (BIOL 1000) sert de préalable à BIOL 1021 (BIOL 1020), on ne peut se faire créditer BIOL 1001 et BIOL 1021 dans le cadre d'un programme. Donné l'Université de Saint-Boniface.

BIOL 1031 Biologie II: Diversité Biologique, Fonction et Interaction Cr.Hrs. 3
(Labo requis) Introduction à la biodiversité dont les eucaryotes, les protistes, les champignons, les plantes et les animaux, la forme et la fonction des plantes et des animaux et les principes de base de l'écologie. Pour ceux et celles qui veulent suivre un programme de sciences biologiques avec majeure ou spécialisation. On ne peut se faire créditer BIOL 1031 et BIOL 1030 et BIOL 1011, BIOL 1000 (071.101) ou BIOE 2590 (034.259) ou 071.125, 071.123, 071.201. Préalable : une note minimale de C dans BIOL 1021 ou BIOL 1020. NOTE : BIOL 1031 est préalable au cours de biochimie (CHEM 2361) et aux cours plus avancés de microbiologie, et à la plupart des cours de sciences biologiques. Il prépare aussi aux études en agriculture, en
sciences alimentaires, en dentisterie, en écologie humaine, en médecine, en optométrie, en pharmacie, en sciences vétérinaires, en éducation physique et en sciences. Donné seulement au l'Université de Saint-Boniface.

BIOL 1411 Anatomie du corps humain Cr.Hrs. 3 Discussions sur la micro-anatomie et la macro-anatomie incluant les changements qui se produisent de la conception à la vieillesse. Bien que ce cours fasse partie des cours au choix dans un programme en arts ou en sciences, il ne peut rencontrer les exigences de la spécialisation ni du programme de majeure en sciences biologiques. Aucun préalable n'est requis pour ce cours mais le cours de biologie du niveau secondaire est vivement recommandé. On ne peut se faire créditer BIOL 1411 et BIOL 1410. Donné seulement à l'Université de Saint-Boniface.

BIOL 1413 Physiologie de corps humain Cr.Hrs. 3 (ancien ZOOL $1331,002.133$ ) L'étude des fonctions de tous les systèmes ainsi que les mécanismes de normalisation homéostatique feront partis des thèmes de base étudiés. Bien que ce cours fasse partie des cours au choix dans un programme en arts ou en sciences, il ne peut rencontrer les exigences de la spécialisation ni du programme de majeure en sciences biologiques. On ne peut se faire créditer BIOL 1413 et BIOL 1412, BIOL 2411 (ou équivalent-ZOOL 2530, BIOL 2410, ZOOL 2531,002.254) Préalable: Une note minimale de C dans BIOL 1410 ou 1411 (ZOOL 1320, 002.132)(C); ou une note minimale de C dans BIOL 1030 ou BIOL 1031 ou l'ancien 071.125 (C). Ce préalable ne concerne pas les étudiantes et étudiants dans le programme de Baccalauréat pour les infirmières enregistrées et infirmiers enregistrés.

BIOL 2201 Les invertébrés Cr.Hrs. 3
(Labo requis) (Anciens ZOOL 2601 et 022.260) Étude phylogénétique et biologique des invertébrés insistant sur les taxa et les groupes qui ont une importance phylogénétique particulière. On ne peut se faire créditer BIOL 2201 et BIOL 2200 (ZOOL 2601, ZOOL 2600, 022.260). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Donné seulement au I'Université de Saint-Boniface.

BIOL 2231 L'évolution et la structure morphologique des chordés Cr.Hrs. 6
(Labo requis) (Anciens ZOOL 2501 et 022.250) Étude de l'histoire évolutive de la structure et des adaptations des chordés basée sur les animaux fossilisés et sur les animaux vivants. Etablissement des bases pour l'étude des groupes majeurs de chordés. On ne peut se faire créditer BIOL 2231 et BIOL 2210 et ZOOL 2501 (022.250) ou ZOOL 2320 (022.232). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Donné seulement au l'Université de Saint-Boniface.

BIOL 2261 Les champignons et les lichens Cr.Hrs. 3 (Labo requis) Une introduction aux champignons et aux lichens. L'accent est mis sur les groupes taxinomiques majeurs, leur organisation et leurs structures, leurs cycles de vie, leur identification et leur importance écologique générale. On ne peut se faire créditer BIOL 2261 et BIOL 2260 et BOTN 2210 ou 001.321. Préalables : BIOL 1011 ou BIOL 1010 ( 071.101) ou 71.123 avec une note minimale de B; ou BIOL 1031 ou BIOL 1030 (071.125) avec une note minimale de C. Donné seulement au l'Université de Saint-

Boniface.
BIOL 2301 Principes D'écologie Cr.Hrs. 3 (Labo requis) (Anciens BOTN 2371, ZOOL 2371, 001.237 et 022.237) Principes d'écologie au niveau de l'individu, de la population, de la communauté et de l'écosystème. Également offert à la Faculté de sciences de l'agriculture et de nutrition de l'Université du Manitoba sous la cote AGEC 2370. On ne peut se faire créditer BIOL 2301 et BIOL 2300 (ZOOL 2371, ZOOL 2370, 022.237, BOTN 2371, BOTN 2370, 001.237) et AGEC 2370 (065.237) ou BIOL 2390 (ZOOL 2290, 022.229, BOTN 2280, 001.228). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Préalable ou concomitant : une note minimale de D dans STAT 1001 ou STAT 1000 (005.100). Donné seulement au l'Université de Saint-Boniface.

BIOL 2381 Introduction à la Toxicologie Cr.Hrs. 3 Un survol des principes généraux à la base des effets des substances toxiques sur les systèmes biologiques, tout en prenant en considération l'histoire, l'étendue et les applications de la toxicologie, les mécanismes d'action des toxines et certains types majeurs de toxines. On ne peut se faire créditer le BIOL 2381 et BIOL 2380 et BIOL 2382 (BOTN 2190, ZOOL 2190, 001.219, 022.219), ENVR 2190 (128.219) ou AGRI 2190 ( 065.219 ). Préalables: une note minimale de C dans BIOL 1031 ou BIOL 1030 ( 071.125 ) et un de CHEM 1311 ou CHEM 1310 (002.131) ou CHEM 1320 (002.132) avec une note minimale de C. Donné seulement au l'Université de Saint-Boniface.

BIOL 2411 Physiologie du corps humain 1 Cr . Hrs 3 (Ancien ZOOL 2531 ou 022.253) Etude des principaux mécanismes de contrôle du corps (systèmes nerveux et endocrinien) ainsi que des systèmes musculaire et reproducteur. On ne peut se faire créditer le BIOL 2411 et le BIOL 2410 ou l'ancien ZOOL 2531 ou ZOOL 2530 (ou 022.253), ou le ZOOL 3530 (ou 022.353). Préalable : une note minimale de C dans le BIOL 1031 ou BIOL 1030 (ou 071.125) ou une note minimale de C+ dans BIOL 1001 ou BIOL 1000 (ou 071.100 ) et BIOL 1011 ou BIOL 1010 (ou 071.101) ou une note minimale de C dans le BIOL 1412 ou l'ancien ZOOL 1330 (ou 022.133). Donné seulement à l'Université de Saint-Boniface.

BIOL 2421 Physiologie du corps humain II Cr.Hrs. 3 (Anciens ZOOL 2541 et 022.254 ) Étude de la régulation homéostatique par les systèmes effecteurs du corps (cardiovasculaire, respiratoire, digestif, rénal et immunitaire). On ne peut se faire créditer BIOL 2421 et BIOL 2420 (ZOOL 2541, 022.254). Préalable : une note minimale de D dans BIOL 2411 ou BIOL 2410 (ZOOL 2531, ZOOL 2530, 022.253) ou un D dans BIOL 3460 (ZOOL 3530, 022.353) ou l'autorisation écrite de la professeure ou du professeur. Donné seulement au l'Université de Saint-Boniface.

BIOL 2501 Génétique I Cr.Hrs. 3
(Labo requis) (Anciens BOTN 2461 et 001.246) Principes de l'hérédité, de la gamétogénèse et des fondements cytologiques de la transmission héréditaire chez les plantes et les animaux. Concepts de dominance et d'interaction génétique, de détermination du sexe, de la transmission des caractères liés au sexe et des gènes liés, variations chromosomiques, génétique des populations et code génétique. On ne peut se faire créditer BIOL 2501 et BIOL 2500 (BOTN 2461, BOTN 2460, 001.246) ou PLNT 2520
(039.252). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). NOTE : Ce cours ne peut pas être reconnu en microbiologie (MBIO). Donné seulement au l'Université de Saint-Boniface.

BIOL 2521 Biologie cellulaire Cr.Hrs. 3
(Anciens ZOOL 2281 et 022.228) Étude de la fonction des organites cellulaires conjointement avec leur structure microscopique ou leur ultrastructure, en insistant sur l'ensemble de la vie cellulaire en tant que système dynamique. On ne peut se faire créditer BIOL 2521 et BIOL 2520 (ZOOL 2281, ZOOL 2280, 022.228). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Donné seulement au l'Université de SaintBoniface.

BIOL 3291 Plantes médicinales et hallucinogénes Cr.Hrs. 3 Un survol botanique et historique des plantes médicinales, hallucinogènes et toxiques utilisées dans diverses cultures. On ne peut se faire créditer BIOL 3291 et BIOL 3290. Préalables: Minimum de 30 heures crédits universitaires ou le consentement du Département. Donné seulement à l'Université de Saint-Boniface.

BIOL 3301 Biologie évolutive Cr.Hrs. 3
(Labo requis) (Ancien BOTN 3001 ou ZOOL 3001)
Introduction aux sujets principaux et aux méthodes de recherche en biologie évolutive. Les sujets incluent : génétique évolutive, adaptation, spéciation et reconstruction de l'histoire de l'évolution. On ne peut se faire créditer BIOL 3301 et BIOL 3300 (ZOOL 3001, ZOOL 3000, BOTN 3001, BOTN 3000, 022.400). Préalables: une note minimale de C dans BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460, 001.246 ) ou PLNT 2520 (039.252) et un cours parmi les suivants (avec une note minimale de C) : BIOL 2240 (BOTN 2110, 001.211), BIOL 2261 ou BIOL 2260 (BOTN 2210, 001.221), BIOL 3260 (BOTN 2290, 001.229), BIOL 2210 (ZOOL 2320, 022.232), BIOL 2231 (ZOOL 2501, 022.250), BIOL 2201 ou BIOL 2200 (ZOOL 2601, ZOOL 2600, 022.260), ou l'autorisation du professeur ou de la professeure. Donné seulement au l'Université de SaintBoniface.

BIOL 3501 Génétique 2 Cr.Hrs. 3
(Labo requis) Ce cours est le complément du cours d'introduction à la génétique BIOL 2501 (ou BOTN 2461, BOTN 2460, 001.246) et présente les divers aspects de la liaison génique et la recombinaison génique, la fonction des gènes, l'allélisme, les mutations et la réparation, l'utilisation des bactéries et des virus comme outils génétique, les bases de la génétique du développement et l'hérédité extranucléaire. On ne peut se faire créditer le BIOL 3501 et BIOL 3500. Préalable : une note minimale de C dans un de BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460, 001.246) ou PLNT 2520 (039.252, 039.209). Préalable ou concomitant : un de CHEM 2371 ou CHEM 2370 (002.237), MBIO 2371 ou MBIO 2370 (060.237), CHEM 2780 (002.278) ou MBIO 2780 ( 060.278 ) ou le consentement du département. Donné seulement à l'Université de SaintBoniface.

BIOL 3561 Histologie Animale Comparée Cr.Hrs. 3 (Labo requis) (Anciens ZOOL 3061 et 022.306) Étude de l'organisation cellulaire et tissulaire des animaux, de la morphologie cellulaire, de la spécialisation, des types de tissus et de l'organisation cellulaire et tissulaire de tous les systèmes. Accent mis sur les mammifères, mais des études
comparatives avec d'autres groupes animaux seront aussi incluses. On ne peut se faire créditer BIOL 3561 et BIOL 3560 (ZOOL 3061, ZOOL 3060, 022.306, 022.347). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Préalable conseillé : un de BIOL 2210 (ZOOL 2320, 022.232), BIOL 2231 (ZOOL 2501, 022.250), BIOL 2521 ou BIOL 2520 (ZOOL 2281, ZOOL 2280, 022.228). Donné seulement au l'Université de SaintBoniface.

## Faculté des sciences-Chemistry

CHEM 1301 Université I Chimie : La structure et la modélisation chimique Cr.Hrs. 3
(Labo requis) (Ancien 002.130) Structure et modèles atomiques et leurs applications à la chimie, y inclus une étude des états solide, liquide et gazeux des substances chimiques et des mélanges. On ne peut se faire créditer CHEM 1301 et CHEM 1300 (002.130). Préalables : Mathématiques 40S (Mathématiques appliquées ou Précalcul), et Chimie 40S (ou son équivalent), ou CHEM 0900 (002.090)(P) ou CHEM 1000 (002.100) avec une note minimale de B. NOTE : Ceux et celles qui s'inscrivent à CHEM 1301 et qui n'ont pas réussi CHEM 0900 doivent subir un test diagnostique durant la première semaine de cours. On conseille fortement à ceux et celles qui obtiennent moins de $60 \%$ dans ce test de suivre CHEM 0900 avant CHEM 1301. CHEM 0900 est un cours de rattrapage en chimie offert occasionnellement à l'Université du Manitoba. Donné seulement au l'Université de Saint-Boniface.

CHEM 1311 Université I Chimie : Une introduction à la chimie physique Cr.Hrs. 3
(Labo requis) (Ancien 002.131) La thermochimie, la thermodynamique chimique, la cinétique chimique. On ne peut se faire créditer CHEM 1311 et CHEM 1310 (002.131). Préalable : une note minimale de C dans CHEM 1301 ou CHEM 1300 (002.130). Donné seulement au l'Université de Saint-Boniface.

CHEM 2211 Introduction à la chimie organique I : Structure et fonction Cr. Hrs. 3
(Labo requis) (Ancien 002.221) Introduction aux concepts de réactivité organique et de liaison chez les molécules organiques. Préparation et propriétés de molécules organiques renfermant un groupe fonctionnel. On ne peut se faire créditer CHEM 2211 et CHEM 2210 (002.221) et CHEM 1320 (002.132). Préalable : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131). Donné seulement au l'Université de Saint-Boniface.

CHEM 2221 Introduction à la chimie organique II : Réactivité et synthèse Cr.Hrs. 3
(Labo requis) (Ancien 002.222) Introduction à la réactivité des composés organiques et à la spectroscopie organique. L'application de l'interchangeabilité des groupes fonctionnels dans les synthèses de composés. On ne peut se faire créditer CHEM 2221 et CHEM 2220. Préalable : une note minimale de C dans CHEM 2211 ou CHEM 2210 (002.221). Donné seulement au l'Université de Saint-Boniface.

CHEM 2281 Chimie physique : Étude microscopique de la matière Cr.Hrs. 3
(Labo requis) (Ancien 002.228) Approche basée sur le plan moléculaire pour comprendre les propriétés physiques de la matière. Introduction aux principes de la mécanique
quantique, de la structure électronique et de la liaison, de la spectroscopie moléculaire. On ne peut se faire créditer CHEM 2281 et CHEM 2280. Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131); et une note minimale de C dans un de PHYS 1031, PHYS 1030 (016.103), PHYS 1071 ou PHYS 1070 (016.107), et 6 crédits de niveau 1000 en mathématiques (de préférence Calcul), à l'exception de 136.100, MATH 1010 (136.101), MATH 1190, MATH 1191 (136.119), MATH 1020 (136.102), et FA 1020 (054.102). Donné seulement au l'Université de SaintBoniface.

CHEM 2291 L'énergétique et la dynamique chimique : Description macroscopique Cr.Hrs. 3 (Labo requis) (Ancien 002.229) L'énergétique chimique, l'entropie et la deuxième loi de la thermodynamique, la dynamique chimique. On ne peut se faire créditer CHEM 2291 et CHEM 2290 . Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131) et une note minimale de C dans un de PHYS 1031, PHYS 1030 (016.103), PHYS 1071 ou PHYS 1070 (016.107), et 6 crédits de niveau 1000 en mathématiques (de préférence Calcul ) à l'exception de 136.100, MATH 1010 (136.101), MATH 1191, MATH 1190 (136.119), MATH 1020 (136.102) et FA 1020 (054.102). Donné seulement au l'Université de SaintBoniface.

CHEM 2361 Biochimie I : Les molécules biochimiques et une introduction à l'énergie métabolique Cr. Hrs. 3 (Labo requis) (Ancien 002.236) Introduction aux différents types moléculaires rencontrés en biochimie ainsi qu'au concept d'énergie métabolique comme produit du catabolisme nécessaire à la biosynthèse. Aussi offert par le Département de microbiologie sous la cote MBIO 2361. On ne peut se faire créditer CHEM 2361 et CHEM 2360 (002.236) et CHEM 2770 (002.277), MBIO 2361, MBIO 2360 (060.236) ou MBIO 2770 (060.277). Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131) et une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). NOTE : CHEM 2361 ne peut être reconnu aux fins des 12 crédits requis par le département de chimie pour les étudiantes et les étudiants inscrits à Université 1 avant 2007-2008. Pour les personnes qui suivent les nouveaux règlements du baccalauréat général (2008-2009), CHEM 2361 peut faire partie des 18 crédits de chimie ou de microbiologie de niveau avancé. Donné seulement au l'Université de Saint-Boniface.

CHEM 2371 Biochimie II : Catabolisme, synthèse et les voies d'information Cr.Hrs. 3
(Labo requis) (Ancien 002.237) Introduction aux processus métaboliques cellulaires de base incluant la production et l'utilisation de l'énergie métabolique, la dégradation et la synthèse des molécules biochimiques, la synthèse de l'ADN, de l'ARN et des protéines et la régulation de ces processus. Aussi offert par le Déparᄀtement de microbiologie sous la cote MBIO 2371. On ne peut se faire créditer CHEM 2371 et CHEM 2370 (002.237) et CHEM 2780 (002.278), MBIO 2371, MBIO 2370 (060.237) ou MBIO 2780 (060.278). Préalables : une note minimale de C dans un de CHEM 2361, CHEM 2360 (002.236), MBIO 2361 ou MBIO 2360 (060.236) et dans CHEM 2211 ou CHEM 2210 (002.221). NOTE : CHEM 2371 ne peut être reconnu aux fins des 12 crédits requis par le département de chimie pour les étudiantes et les étudiants inscrits à Université 1 avant 20072008. Pour les personnes qui suivent les nouveaux règlements du baccalauréat général (2008-2009), CHEM

2371 peut faire partie des 18 crédits de chimie ou de microbiologie de niveau avancé. Donné seulement au l'Université de Saint-Boniface.

CHEM 2381 Chimie des éléments représentatifs Cr.Hrs. 3 (Labo requis) (L'ancien 002.238) Chimie descriptive des éléments représentatifs et interprétation de leurs propriétés physiques et chimiques d'après les théories habituelles de structure et de liaison. On ne peut se faire créditer à la fois le CHEM 2380 (002.238). Préalable: CHEM 1310 ou CHEM 1311 (ou 002.131) (C). Donné seulement au l'Université de Saint-Boniface.

CHEM 2401 Chimie inorganique: structure et applications Cr.Hrs. 3
Revue de la liaison chimique, de la structure et de la réactivité à travers le tableau périodique des éléments. La revue sera illustrée par des exemples liant la chimie inorganique à la science des matériaux et à la biochimie. Pour le laboratoire, des composés inorganiques simples seront préparés et analysés. On ne peut se faire créditer CHEM 2401 et CHEM 2400 et CHEM 2381 ou 2380. Préalable: une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131)

CHEM 2471 Introduction à la chimie analytique Cr.Hrs. 3 (Labo requis) (Ancien 002.247) Un cours de chimie analytique quantitative fournit une formation utile à presque tous les scientifiques. Ce cours outille les étudiants et étudiantes avec les principes théoriques à la base des méthodes analytiques, avec l'habileté de planifier et d'exécuter des expériences, et ensuite d'interpréter les résultats. On ne peut se faire créditer CHEM 2471 et CHEM 2470. Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131) et un cours de 3 crédits de Mathématiques à l'exception de l'ancien 136.100, MATH 1010, MATH 1190, MATH 1191, MATH 1020 ou FA 1020. Donné à l'Université de Saint-Boniface.

CHEM 3571 Chimie biophysique Cr.Hrs. 3 L'application de la chimie physique aux problèmes biologiques avec l'emphase sur l'interprétation quantitative. Les sujets comprennent la cinétique enzymatique, la bioénergétique, les processus de transport ainsi que la spectroscopie. Préalables: CHEM 2361 ou CHEM 2360, MBIO 2361 ou MBIO 2360 (060.237) et MATH 1501 ou MATH 1500 (ou l'équivalent). CHEM 2281 ou CHEM 2280 est recommandé.

CHEM 4361 Signalisation et régulation de l'expression génétique Cr.Hrs. 3
(Ancien 002.436) Biochimie de la réponse cellulaire aux stimuli externes, en mettant l'accent sur les animaux. Les récepteurs à la surface des cellules, les ligands, la signalisation au noyau, la phosphorylation, la protéolyse, la transcription et les gradients dans le typage cellulaire. On ne peut se faire créditer CHEM 4361 et CHEM 4360. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370 (002.237), MBIO 2371 ou MBIO 2370 (060.237) (ou 002.235, 060.235). Donné seulement au l'Université de Saint-Boniface.

CHEM 4371 Glycobiologie et activation des protéines Cr.Hrs. 3
(Ancien 002.437) Le rôle des biomolécules contenant des glucides en biochimie et leur importance dans la connaissance des maladies génétiques. L'importance de la
protéolyse limitée dans l'activation des biomolécules. On ne peut se faire créditer CHEM 4371 et CHEM 4370 et 002.449. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370 (002.237), MBIO 2371 ou MBIO 2370 (060.237) (ou 002.235, 060.235). Donné seulement au l'niversité de Saint-Boniface.

CHEM 4621 Biochimie des acides nucléiques Cr .Hrs. 3 (Ancien 002.462) La structure des acides nucléiques; synthèse et détermination des séquences. Interactions avec les protéines et les médicaments. On ne peut se faire créditer CHEM 4621 et CHEM 4620. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370 (002.237), MBIO 2371 ou MBIO 2370 (060.237) (ou $002.235,060.235)$. Donné seulement au l'Université de Saint-Boniface.

CHEM 4631 Biochimie des protéines Cr.Hrs. 3 (Ancien 002.463) Les structures et fonctions des protéines, leurs propriétés physiques et chimiques et les méthodes utilisées pour les étudier. On ne peut se faire créditer CHEM 4631 et CHEM 4630. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370 (002.237), MBIO 2371 ou MBIO 2370 (060.237) (ou 002.235, 060.235). Donné seulement au l'Université de Saint-Boniface.

CHEM 4711 Projet de recherche en chimie ou biochimie Cr.Hrs. 6
Un projet de recherche dans n'importe quel aspect de la chimie ou de la biochimie, choisi en consultation avec l'administrateur du cours ou un superviseur approprié de la Faculté. Des rapports écrits et des présentations orales à la fin du projet seront nécessaires. Cours normalement offert seulement lors de leur dernière année du programme de chimie. On ne peut se faire créditer CHEM 4711 et CHEM 4710 et MBIO 4530 (60.453). Préalable : permission de l'administrateur du cours. Donné seulement au l'Université de Saint-Boniface.

## Faculté des sciences-Computer Science

COMP 1011 Introduction à l'informatique I Cr.Hrs. 3 (Labo requis) (Ancien 074.101) Introduction à la programmation par un langage procédural évolué. On ne peut se faire créditer plus d'un cours parmi les suivants: le COMP 1010 et les anciens $074.112,074.121,074.123$ ou 074.125 . Donné seulement au Université de Saint-Boniface. Préalable: N'importe quel cours de mathématiques de 12e année ou de niveau 40S, ou l'équivalent. Donné seulement au l'Université de Saint-Boniface.

COMP 1021 Introduction à l'informatique II Cr.Hrs. 3 (Labo requis) (L'ancien 074.102) Introduction à la programmation orientée objet, aux structures de données informatiques et à l'algrorithmique. On ne peut se faire créditer à la fois le COMP 1020 (074.102). Préalable: COMP 1010 ou COMP 1011; ou Informatique 40 S (avec une not minimale de $75 \%$ ) et n'importe quel cours de mathématiques de la 12ième année ou du niveau 40S, ou l'équivalent. Donné seulement au l'niversité de Saint-Boniface.

COMP 1261 Introduction aux services informatiques modernes I Cr.Hrs. 3
(Ancien 074.126) Entre autres, l'accent est mis sur le traitement de texte, les chiffriers, les systèmes pour la
gestion de données et le traitement graphique. Ce cours ne demande aucune connaissance préalable en informatique. On inscrit(e) à un programme de majeure ou de spécialisation en Informatique ne peut s'inscrire à ce cours. On ne peut se faire créditer à la fois le COMP 1260. Donné seulement au l'Université de Saint-Boniface.

COMP 1271 Introduction aux services informatiques modernes II Cr.Hrs. 3
(Ancien 074.127) Utilisation de nouveaux outils pour la creation de pages WEB, apprendre les techniques de présentations efficaces, se familiariser avec d'autres systèmes d'exploitation, utiliser les outils de transfert de fichiers, programmer des scripts de base lors de la conception de pages WEB, comprendre les question actuelles liées à la technologie dans la société. On ne peut se faire créditer à la fois le COMP 1270 (074.127). Préalable: COMP 1260 ou COMP 1261 (ou connaissances equivalents) fortement recommandé. Donné seulement au l'Université de Saint-Boniface.

COMP 2061 Structures discrètes et programmation Cr.Hrs. 6
(Labo requis) (Ancien 074.206F) Introduction aux éléments de la représentation, de l'organisation et de la manipulation des données dans les systèmes informatisés. Méthodes permettant de concevoir et d'utiliser des logiciels d'envergure. On ne peut se faire créditer à la fois le 074.206 et le COMP 2140 (074.214). Préalables: COMP 1021 or COMP 1020 (074.102) (ou l'ancien 074.123), un de MATH 1301 ou MATH 1300 (ou 136.130) (C) ou MATH 1310 (ou 136.131) (ou les anciens 010.114 ou 013.146), et un de MATH 1501 ou MATH 1500 (ou 136.150), MATH 1510 (ou 136.151), l'ancien 136.153, ou MATH 1690 (ou 136.169) (C). Donné seulement au l'Université de Saint-Boniface.

COMP 2191 Introduction au calcul scientifique Cr.Hrs. 3 (Ancien 074.219) Un cours en informatique appliquée introduisant des concepts tels que l'approximation par polynômes, la résolution d'équations non linéaires, les systèmes linéaires, la simulation et la géométrie analytique. On ne peut se faire créditer à la fois le COMP 2190. Préalables: COMP 1020 ou COMP 1021 (ou 074.102) (C), et un de MATH 1500 ou MATH 1501 (ou 136.150) (C), MATH 1510 (ou 136.151) (C), MATH 1520 (ou 136.152) (C), l'ancien 136.153 (C) ou MATH 1690 (ou 136.169) (C). Préalable ou concomitant: Un de MATH 1300, MATH 1301, ou MATH 1310. Donné seulement au l'Université de SaintBoniface.

## Faculté des sciences-Mathematics

MATH 0401 Habiletés mathématiques Cr.Hrs. 0
Ce cours a été conçu principalement, mais non exclusive, en fonction des besoins d'étudiants se préparant à suivre des cours d'informatique, de mathématiques, de statistiques ou de physique de niveau universitaire, sans avoir réussi le préalable normal, le Mathématiques 40S. L'étudiant va y apprendre à appliquer des outils mathématiques à des situations élémentaires, puis computationnellement plus compliquées. Les leçons magistrales comporteront une révision de concepts fondamentaux, des exemples, des résolutions de problèmes pratiques, des applications et de la rétroaction. Ce cours ne comporte aucun crédit universitaire; il n'est pas conçu pour remplacer le Mathématiques 40S
comme condition d'admission à certains cours de niveau 1000; un résultat de C (60\%) est requis au MATH 0401. Préalable : autorisation par le chef du secteur des sciences mathématiques au Collège. Selon le niveau de résussite au test de dépistage en mathématiques administré au Collège, l'étudiant peut être constraint de suivre ce cours avant d'être autorisé à s'inscrire à des cours ayant le préalable Mathématiques 40S.

MATH 1191 Sujets choisis en mathématiques Cr.Hrs. 6 (Ancien 136.119) Ce cours offre aux étudiants de diverses facultés un aperçu des mathématiques modernes. Les sujets étudiés sont tirés des systèmes de nombres, de la géométrie et de la combinatoire. Ce cours est terminal et ne peut être reconnu comme préalable à aucun autre cours universitaire en mathématiques. Ce cours ne peut pas être reconnu aux fins d'un programme spécialisé ou général, majeure ou mineure en sciences mathématiques. L'inscription est interdite à tout étudiant ayant obtenu une note de C ou mieux dans un quelconque cours de mathématiques, à l'exception des cours MATH 1010 (136.101) ou MATH 1020 (FA 1020, 136.102, 054.102). Ce cours ne peut pas être suivi en même temps qu'un autre cours de mathématiques, à l'exception des cours MATH 1010 ou MATH 1020 (FA 1020). Aucun préalable. Donné seulement au l'Université de Saint-Boniface.

MATH 1201 Éléments de mathématiques discrètes Cr.Hrs. 3 (Labo requis) (Ancien 136.120) Suites et séries, trigonométrie, nombres complexes, algèbre de polynômes, approximation des zéros de fonctions, équations aux différences. On ne peut se faire créditer le MATH 1201 et le MATH 1200 ou MATH 1210. L'inscription est interdite à tout étudiant ayant obtenu des crédits de niveau 2000 ou plus en mathématiques, à moins que le cours MATH 1201 soit obligatoire dans le programme de l'étudiant. Préalable : Mathématiques 40S (précalcul) ou l'ancien Mathématiques 40S (300) avec une note minimale de $60 \%$, ou une note minimale de C dans le l'ancien 136.100 ou le cours Mathematical Skills offert par Extended Education de I'Université du Manitoba, ou le cours Habiletés mathématiques offert au l'Université de Saint-Boniface. Donné seulement au l'Université de Saint-Boniface.

MATH 1301 Géométrie vectorielle et algèbre linéaire Cr.Hrs. 3
(Labo requis) (Ancien 136.130) Introduction aux vecteurs, aux matrices, aux systèmes d'équations linéaires et à la géométrie à trois dimensions. On ne peut se faire créditer le MATH 1301 et les MATH 1310 (ancien 136.131), MATH 1680 (ancien 136.168), MATH 1210. Préalable : Mathématiques 40 S (précalcul) ou l'ancien Mathématiques 40 S (300) avec une note minimale de $60 \%$, ou une note minimale de C dans le l'ancien 136.100 ou le cours Mathematical Skills offert par Extended Education de I'Université du Manitoba, ou le cours Habiletés mathématiques offert au l'Université de Saint-Boniface. Donné seulement au l'Université de Saint-Boniface.

MATH 1501 Introduction au calcul Cr.Hrs. 3 (labo requis) (Ancien 136.150) Différentiation et intégration des fonctions élémentaires avec application à la théorie des extrêmes, aux taux de changements ainsi qu'aux aires et aux volumes. On ne peut se faire créditer le MATH 1501 (ancien 136.150) et les MATH 1510 (ancien 136.151), MATH 1520 (ancien 136.152), l'ancien 136.153, MATH 1680 (ancien 136.168), MATH 1690 (ancien 136.169). Préalable :

Mathématiques 40 (précalcul) ou l'ancien Mathématiques 40 S (300) avec une note minimale de $60 \%$, ou une note minimale de C dans l'ancien 136.100 ou le cours Mathematical Skills offert par Extended Education de I'Université du Manitoba, ou le cours Habiletés mathématiques offert au l'Université de Saint-Boniface. Donné seulement au l'Université de Saint-Boniface.

## MATH 1701 Calcul II Cr.Hrs. 3

(Labo Requis) (Ancien 136.170) Théories et techniques d'intégration, tracés de courbes, calculs de volume, de longueur d'arc, d'aires et des dérivées partielles. On ne peut se faire créditer le MATH 1701 (ancien 136.170) et les MATH 1690 (ancien 136.169), MATH 1700, MATH 1710 (ancien 136.171), ancien 136.173. Préalable : MATH 1501 (ancien 136.150), MATH 1510 (ancien 136.151), MATH 1520 (ancien 136.152), l'ancien 136.153 ou l'ancien MATH 1680 (ancien 136.168). Donné seulement au l'Université de Saint-Boniface.

MATH 2301 Algèbre linéaire II Cr.Hrs. 3
(Ancien 136.230) Suite du MATH 1301 (ancien 136.131 ou 013.146 ). Espaces vectoriels à dimensions finies, transformations linéaires et matrices; vecteurs réels et valeurs réelles. La diagonalisation et ses applications. Espaces avec produits scalaires. On ne peut se faire créditer le MATH 2301 et les MATH 2300, MATH 2352, ancien MATH 2350 (136.235), MATH 3130. Préalables : MATH 1301 ou MATH 1300 (ancien 136.130), MATH 1310 (ancien 136.131), et un de MATH 1501 ou MATH 1500 (ancien 136.150), MATH 1510 (ancien 136.151), MATH 1520 (ancien 136.152), l'ancien 136.153 ou MATH 1690 (ancien 136.169). Donné seulement au l'Université de SaintBoniface.

MATH 2451 Mathématiques combinatoires Cr.Hrs. 6 (Ancien 136.245) Une introduction à certains sujets d'intérêt courant en mathématiques combinatoires, c'est-à-dire les techniques d'énumération, les graphes, les dessins de blocs et les généralisations, les récursions linéaires. On ne peut se faire créditer le MATH 2451 (ou MATH 2450) à la fois avec l'ancien 136.245. Préalable: une moyenne de " C " ou plus dans un cours d'introduction en sciences mathématiques à l'exception l'ancien 136.100, MATH 1010 (ou 136.101), MATH 1020 (ou 136.102), FA 1020 (ou 054.102) et MATH 1190 ou MATH 1191 (ou 136.119) (ou un cours de Mathématiques de l'ancien niveau 1000), ou consentement du département. Donné seulement au l'Université de SaintBoniface.

MATH 2501 Introduction à la théorie des nombres Cr.Hrs. 3 (Ancien 136.250) Étude de la divisibilité, de la factorisation unique, des congruences linéaire et quadratique et du théorème de Fermat. On ne peut se faire créditer le MATH 2501 et le MATH 2500. Préalable : une note minimale de C dans un cours d'introduction en sciences mathématiques à l'exception de l'ancien 136.100, MATH 1010 (ancien 136.101), MATH 1020 (ancien 136.102) FA 1020 (ancien 054.102 ) et MATH 1191 ou MATH 1190 (ancien 136.119) ou l'autorisation écrite du département de mathématiques. Donné seulement au l'Université de Saint-Boniface.

MATH 2551 Géométrie moderne Cr.Hrs. 6 (Ancien 136.255) Approche moderne à la géométrie à l'aide de transformations géométriques. Sujets variés, tels isométries, symétries, similarités, inversion circulaire et groupes. On ne peut se faire créditer le MATH 2551 et
l'ancien MATH 2550. Préalables: MATH 1690 (ancien 136.169) ou un de MATH 1501, MATH 1500 (ancien 136.150), MATH 1510 (ancien 136.151), MATH 1520 (ancien 136.152), ancien 136.153; aussi, un de MATH 1301 (ancien 136.130), MATH 1310 (ancien 136.131), MATH 1701 ou MATH 1700 (ancien 136.170), MATH 1710 (ancien 136.171), ancien 136.173. Donné seulement au l'Université de Saint-Boniface.

MATH 2601 Mathématiques numériques I Cr.Hrs. 3 (Ancien 136.260) Techniques élémentaires de solution numérique de problèmes mathématiques: solution d'équation; différences finies; interpolation, systèmes d'équations; différentiation numérique; intégration numérique. On ne peut se faire créditer le MATH 2601 et le MATH 2600, MATH 2120. Préalables : MATH 1301 ou MATH 1300 (ancien 136.130) ou MATH 1310 (ancien 136.131), MATH 1690 (ancien 136.169), MATH 1701 ou MATH 1700 (ancien 136.170), MATH 1710 (ancien 136.171) ou ancien 136.173, et COMP 1011 ou COMP 1010 (ancien 074.101 ) ou son équivalent, ou l'autorisation écrite du professeur. Donné seulement au l'Université de SaintBoniface.

MATH 2701 Calcul III A Cr.Hrs. 3
(Ancien 136.270) Calcul des variables multiples. On ne peut se faire créditer le MATH 2701 et le MATH 2751 (ancien 136.275) ou les anciens 006.277, 006.228, 006.243, 013.239 ou 013.234. Préalables : le MATH 1301 (ancien 136.130) ou MATH 1311 (ancien 136.131) (ou l'ancien 013.146 ) et un des MATH 1691 (ancien 136.169), MATH 1701 (ancien 136.170), MATH 1711 (ancien 136.171) ou MATH 1731 (ancien 136.173) (ou les anciens 013.149, 013.159 ou 006.126 ).

MATH 2711 Calcul III B Cr.Hrs. 3
(Ancien 136.271) Analyse, suites et séries. On ne peut se faire créditer le MATH 2711 et le MATH 2751 (ancien 136.275), ou les anciens 006.237, 006.238, 006.244, 013.249 ou 013.234. Préalable : un de MATH 1690 (ancien 136.169), MATH 1701 (ancien 136.170), MATH 1711 (ancien 136.171) ou MATH 1731 (ancien 136.173) (ou les anciens 013.149, 013.159, ou 006.126) et un de MATH 1201 (ancien 136.120) ou MATH 2201 (ancien 136.220). Concomitant : MATH 1301 (ancien 136.130) ou le MATH 1311 (ancien 136.131) (ou l'ancien 013.146).

MATH 2721 Calcul à plusieurs variables Cr.Hrs. 3 (Ancien 136.270) Calcul différentiel et intégral à plusieurs variables. On ne peut se faire créditer le MATH 2721 et le MATH 2720 ou le MATH 2751 (ancien 136.275) ou le 136.270 ou le MATH 2110 (ancien 136.211) ou le MATH 2130. Préalables : le MATH 1301, MATH 1300 (ancien 136.130) ou MATH 1311 (ancien 136.131) (ou l'ancien 013.146 ) et un de MATH 1691 (ancien 136.169), MATH 1701, MATH 1700 (ancien 136.170), MATH 1711 (ancien 136.171) ou l'ancien 136.173. Donné seulement au l'Université de Saint-Boniface.

MATH 2731 Suites et séries Cr.Hrs. 3
(Ancien 136.271) Analyse, suites et séries. On ne peut se faire créditer le MATH 2731 et le MATH 2730 ou le MATH 2750 (ancien 136.275), ou le 136.271 ou le MATH 2132 ou le MATH 2100 (ancien 136.210). Préalables : un de MATH 1690 (ancien 136.169), MATH 1701, MATH 1700 (ancien 136.170), MATH 1711 (ancien 136.171) ou l'ancien 136.173. Concomitant : le MATH 1301, MATH 1300 (ancien 136.130)
ou le MATH 1311 (ancien 136.131). Donné seulement au l'Université de Saint-Boniface.

MATH 2801 Équations différentielles ordinaires et leurs applications I Cr.Hrs. 3
(Ancien 136.280) Introduction à la théorie des équations différentielles ordinaires. Techniques pratiques de solution, principalement en ce qui a trait aux équations du premier ordre et aux équations linéaires d'ordre plus élevé. Systèmes linéaires. Applications à des problèmes en sciences ou à d'autres domaines. On ne peut se faire créditer le MATH 2801 et le MATH 2800 ou le MATH 2132 ou le MATH 2100 (ancien 136.210). Préalable : MATH 1301 ou MATH 1300 (ancien 136.130) ou MATH 1310 (ancien 136.131). Concomitant : MATH 2721, MATH 2720 ou MATH 2750. Donné seulement au l'Université de Saint-Boniface.

MATH 3601 Mathématiques numériques II Cr.Hrs. 3 (Ancien 136.360) Différentiation numérique; quadrature Gaussienne; lissage à l'aide de splines; méthods numériques pour les problèmes à vleurs initiales et problèmes aux frontières; transformations; problèmes où interviennent les systèmes de grade taille, pars ou mal conditionnés. On ne peut se faire créditer à la fois avec le MATH 3600 (ou 136.360). Préalables: MATH 2600 ou MATH 2601 (ou 136.260) (C); MATH 2800 ou MATH 2801(ou 136.280) (C); MATH 2720 ou MATH 2721 (ou 136.272) (C) et MATH 2730 ou MATH 2731 (ou 136.271) (C), ou MATH 2750 (ou 136.275) (C); et le COMP 1010 ou COMP 1011 (ou 074.101) (C); ou le consentement du professeur. Donné seulement au l'Université de Saint-Boniface.

MATH 3821 Introduction à la modèlisation mathètique 1 Cr.Hrs. 3
(L'ancien 136.382) Une introduction aux principles et aux techniques entourant le design, le développement, la resolution, l'expérimentation et la revision de modéles mathématiques de phénoménes du "vrai monde" àl'aide d'études de cas. Préalables:MATH 2600 ou MATH 2601, puis MATH 2800 ou MATH 2801 (ou l'ancien 136.280)(C). Préalable ou concomitant: STAT 1000 ou STAT 1001. Donné seulement au l'Université de Saint-Boniface. L'étudiante(e) ne peut se faire créditer à la fois le MATH 3821 et le MATH 3820.

MATH 3911 Sujets choisis en mathématiques I Cr.Hrs. 3 (Ancien 136.391) Sujets d'intérêt courant en mathématiques appliquées, selon les besoins et intérêts des étudiants et des étudiantes et du professeur ou de la professeure incluant notamment des sujets spécialisés non abordés dans les autres cours offerts par le secteur. Préalables : autorisation écrite du professeur ou de la professeure. Donné seulement au l'Université de Saint-Boniface.

MATH 4921 Sujets choisis en mathématiques Cr.Hrs. 3 (L'ancient 136.492) Sujets d'intèrêt courant en mathèmatiques ou en mathèmatiques appliqués, selon les besoins et interet des ètudiants et professeurs, incluant notamment des sujets specializes non disponibles dans les autres cours offerts par le secteur. Prèalable: autorisation par le chef du secteur des sciences mathèmatiques. Donneè selement au l'Université de Saint-Boniface. L'ètudiant(e) ne peut se fair crèditer à la fois le MATH 4921 et le MATH 4920.

## Faculté des sciences-Microbiology <br> MBIO 1011 Microbiologie I Cr.Hrs. 3

(Labo requis) Le cours traitera de la définition et de l'historique de la microbiologie, des concepts pratiques de la microbiologie, de la structure des cellules procaryotes, de l'expression des gènes spécifiques aux procaryotes, du transfert de l'information génétique, du rôle des microbes dans l'environnement incluant le corps humain, ainsi que des applications de la microbiologie dans la production des aliments et dans la biotechnologie. On ne peut se faire créditer MBIO 1011 et MBIO 1010 et MBIO 2101, MBIO 2100 (060.210), MBIO 2111, ou MBIO 2110 (060.211). Préalable ou concomitant : BIOL 1021. Donné seulement au l'Université de Saint-Boniface.

MBIO 2021 Microbiologie II Cr.Hrs. 3
(Labo requis) Le cours traitera de la croissance bactérienne, de la réplication de l'ADN, des processus de la transcription et de la traduction ainsi que leurs rôles dans la régulation de l'expression génétique. Les familles des bactéries et de virus animaux, leurs modes de reproduction, leurs pouvoirs pathogènes seront discutés. L'introduction aux mutations et au transfert de gènes bactériens sera également discutée. On ne peut se faire créditer MBIO 2021 et MBIO 2020 et MBIO 2111 ou MBIO 2110 (060.211). Préalables : MBIO 1011 ou MBIO 1010 et un des suivants : CHEM 1311, CHEM 1310 ou CHEM 1320 (002.132). Donné seulement au l'Université de Saint-Boniface.

MBIO 2361 Biochimie I: Les molécules biochimiques et une introduction à l'énergie métabolique Cr. Hrs. 3 (Labo requis) (Ancien 060.236) Introduction aux différents types moléculaires rencontrés en biochimie ainsi qu'au concept d'énergie métabolique comme produit du catabolisme nécessaire à la biosynthèse. Aussi offert par le département de chimie sous la cote CHEM 2361. On ne peut se faire créditer MBIO 2361 et MBIO 2360 (060.236) et MBIO 2770 (060.277), CHEM 2361, CHEM 2360 (002.236), CHEM 2860 (002.286) ou CHEM 2770 (002.277). Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131) et une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). NOTE : MBIO 2361 ne peut être reconnu aux fins des 12 crédits requis par le département de chimie pour les étudiantes et les étudiants inscrits à Université 1 avant 2007-2008. Pour les personnes qui suivent les nouveaux règlements du baccalauréat général (2008-2009), MBIO 2361 peut faire partie des 18 crédits de chimie ou de microbiologie de niveau avancé. Donné seulement au l'Université de Saint-Boniface.

MBIO 2371 Biochimie II : Catabolisme, synthèse et les voies d'information Cr.Hrs. 3
(Labo requis) (Ancien 060.237) Introduction aux processus métaboliques cellulaires de base incluant la production et l'utilisation de l'énergie métabolique, la dégradation et la synthèse des molécules biochimiques, la synthèse de l'ADN, de l'ARN et des protéines et la régulation de ces processus. Aussi offert par le département de chimie sous la cote CHEM 2371. On ne peut se faire créditer MBIO 2371 et MBIO 2370 (060.237) et MBIO 2780 (060.278), CHEM 2371, CHEM 2370 (002.237), ou CHEM 2780 (002.278).
Préalables : une note minimale de C dans un de MBIO 2361, MBIO 2360 (060.236), CHEM 2361 ou CHEM 2360
(002.236) et dans CHEM 2211 ou CHEM 2210 (002.221) .

NOTE : MBIO 2371 ne peut être reconnu aux fins des 12
crédits requis par le département de chimie pour les étudiantes et étudiants inscrits à Université 1 avant 20072008. Pour les personnes qui suivent les nouveaux règlements du baccalauréat général (2008-2009), MBIO 2371 peut faire partie des 18 crédits de chimie ou de microbiologie de niveau avancé. Donné seulement au l'Université de Saint-Boniface.

MBIO 3011 Mécanismes des maladies microbiennes Cr.Hrs. 3
(Ancien 060.301) Étude des relations hôtes-parasites. Introduction à la réponse immunitaire, à la pathogénie microbienne, aux maladies virales, à la microbiologie clinique, à la santé publique et aux agents antimicrobiens. On ne peut se faire créditer MBIO 3011 et MBIO 3010. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2100, MBIO 2101, 060.210) et une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237). Donné seulement au l'Université de Saint-Boniface.

MBIO 3031 Microbiologie III Cr.Hrs. 3 (Labo requis) Ce cours présentera une introduction à la croissance microbienne et aux approches génomiques utilisées pour l'analyse du métabolisme microbien. En utilisant ses outils, la physiologie de la paroi cellulaire microbienne, le transport, la mobilité ainsi que le métabolisme microbien en relation avec la production d'ATP, la respiration, la fermentation et la fixation du carbone seront discutés. On ne peut se faire créditer MBIO 3031 et MBIO 3030 et MBIO 2101 ou MBIO 2100 (060.210). Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 ou l'autorisation du professeur et une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237).

MBIO 3411 Biologie moléculaire Cr.Hrs. 3
(Ancien 060.341) Traitement rigoureux des bases de la biologie moléculaire moderne reliées à la maladie moléculaire, aux manipulations génétiques et cellulaires, ainsi qu'aux contrôles cellulaires. On ne peut se faire créditer MBIO 3411 et MBIO 3410. Préalables: une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371, CHEM 2370 (002.237), MBIO 2780 ( 060.278) ou CHEM 2780 (002.278) et un des cours suivants (avec une note minimale de C) : MBIO 2021, MBIO 2020, (MBIO 2111, MBIO 2110, 060.211), BIOL 2521 ou BIOL 2520 (ZOOL 2281, ZOOL 2280, 022.228), ou BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460, 001.246). Donné seulement au l'Université de Saint-Boniface.

MBIO 3451 Régulation des processus
biochimiques Cr.Hrs. 3
(Ancien 060.345) Mécanismes de régulation de l'activité enzymatique, incluant l'allostérie, le contrôle de certaines routes biosynthétiques ou dégradatives sélectionnées, ainsi que la régulation de l'expression génétique. On ne peut se faire créditer MBIO 3451 et MBIO 3450. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2111, MBIO 2110, 060.211) ou l'autorisation écrite de la professeure ou du professeur, et une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237). Donné seulement au l'Université de Saint-Boniface.

MBIO 3461 Biochimie membranaire et cellulaire Cr.Hrs. 3 (Labo requis) (Ancien 060.346) Isolement, fractionnement,
structure et fonction des membranes cellulaires et des composés subcellulaires. Mise en évidence du rôle central joué par ces éléments dans la biochimie des processus cellulaires. On ne peut se faire créditer MBIO 3461 et MBIO
3460. Préalables : une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237). Donné seulement au l'Université de Saint-

## Boniface.

MBIO 4011 Immunologie Cr.Hrs. 3
(Labo requis) (Ancien 060.401) Étude des antigènes, des anticorps, des réactions antigènes-anticorps, de l'immunogénétique, de la régulation de la réponse du système immunitaire, du complément, des réactions d'hypersensibilité, de l'auto-immunité, des déficiences immunitaires, de l'immunologie des greffes et des tumeurs. On ne peut se faire créditer MBIO 4011 et MBIO 4010 (060.401) et MBIO 4020 (060.402) ou l'ancien 060.444. Préalable : une note minimale de C dans MBIO 3011 ou MBIO 3010 (060.301). Donné seulement au l'Université de Saint-Boniface.

MBIO 4411 Virologie Cr.Hrs. 3
Analyse détaillée des propriétés fondamentales des virus, de la taxonomie virale ainsi que des façons dont les virus se reproduisent. Examen des méthodes expérimentales utilisées en virologie et des façons dont les virus provoquent des maladies. On ne peut se faire créditer MBIO 4411 et MBIO 4010 et MMIC 7010 (097.701). Préalables : une note minimale de C dans MBIO 3011 ou MBIO 3010 (060.301) et dans MBIO 3411 ou MBIO 3410 (060.341). Donné seulement au l'Université de Saint-Boniface.

MBIO 4541 Transduction de l'énergie biologique Cr.Hrs. 3 (Ancien 060.454) Biochimie des processus biologiques comportant l'interconversion des différentes formes d'énergie comme la phosphorylation oxydative, le transport dans les membranes et les processus de contractions. On ne peut se faire créditer MBIO 4541 et MBIO 4540. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2111, MBIO 2110, 060.211) et une note minimale C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237), ou l'autorisation écrite de la professeure ou du professeur. MBIO 3031 (MBIO 3030) est recommandé. Donné seulement au I'Université de Saint-Boniface.

MBIO 4581 Technologie de I'ADN recombinant Cr.Hrs. 3 (Ancien 060.458) Techniques d'isolement de plasmides, la digestion de l'ADN par les enzymes (endonucléases) de restriction, le clonage, la détermination de la séquence des nucléotides dans l'ADN, la transformation de l'ADN, le transfert de gènes. On ne peut se faire créditer MBIO 4581 et MBIO 4570 (060.457). Préalable : une note minimale de C dans MBIO 3411 ou MBIO 3410 (060.341). Donné seulement au l'Université de Saint-Boniface.

MBIO 4601 Génétique moléculaire des
procaryotes Cr.Hrs. 3
(Labo requis) (Ancien 060.460) Étude détaillée de la réplication, de l'expression, de la mutagénèse de la réparation de l'ADN ainsi que des éléments génétiques transposables des bactéries et des virus. On ne peut se faire créditer MBIO 4601 et MBIO 4600 et les anciens 060.452 ou 060.456. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2111, MBIO 2110, 060.211) et une note minimale de C dans un de MBIO 2371, MBIO 2370
(060.237), CHEM 2371 ou CHEM 2370 (002.237). BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460, 001.246) est recommandé. Donné seulement au l'Université de SaintBoniface.

## Faculté des sciences-Physics

PHYS 1021 Physique générale I Cr.Hrs. 3 (Labo requis) (Ancien 016.102) Ce cours d'initiation à la physique ne requiert pas de calcul et traite de certains thèmes tirés de la mécanique et de la thermodynamique avec des exemples tirés des sciences biologiques et physiques. Ce cours, de même que le PHYS 1030 (ou 016.103), est particulièrement conseillé aux étudiants désireux d'avoir une vue d'ensemble de la physique ou qui ont l'intention d'entreprendre des études dans les sciences de la santé. Il peut aussi servir comme cours de base pour un programme de spécialisation en physique ("B+" ou mieux) ou de majeure en physique ("B" ou mieux). On ne peut se faire créditer à la fois le PHYS 1020 (ou 016.102) avec le PHYS 1050 ou PHYS 1051 (ou 016.105), le PHYS 1410 (ou 016.141), ou le PHYS 1420 (ou 016.142). Préalables: Soit Physique 40S, PHYS 0900 (ou 016.090) (avec Pass) ou l'équivalent, et soit le cours de Mathématiques précalcul 40S, ou une note de $70 \%$ dans les cours de Mathématiques appliquées 40S, ou l'équivalent. II est fortement recommandé aux étudiants d'obtenir une note de $70 \%$ dans les cours de Mathématiques précalcul 40S et de Physique 40S. Donné seulement au l'Université de SaintBoniface.

PHYS 1031 Physique générale II Cr.Hrs. 3 (Labo requis) (Ancien 016.103) Ce cours d'initiation à la physique ne requiert pas de calcul et traite de certains thèmes tirés de l'électricité, du magnetisme, de l'optique et de la physique moderne et appuyé d'exemples pris des sciences biologiques et physiques. Ce cours, de même que le PHYS 1020 (ou 016.102), est particulièrement conseillé aux étudiants désireux d'avoir une vue d'ensemble de la physique ou qui ont l'intention d'entreprendre des études des sciences de la santé. Il ne peut servir aux programmes de majeure ou de spécialisation en physique. On ne peut se créditer à la fois le PHYS 1030 (ou 016.103) et le PHYS 1410 (ou 016.141) ou le PHYS 1420 (ou 016.142 ) ou les anciens 016.120. Préalable: PHYS 1020 ou PHYS 1021 (ou 016.102 ) (C) ou PHYS 1050 ou PHYS 1051 (ou 016.105) (C). Donné seulement au l'Université de Saint-Boniface.

PHYS 1051 Physique I : La mécanique Cr.Hrs. 3 (Labo requis) (Ancien 016.105) Une introduction, basée sur le calcul, à la mécanique classique. Les sujets suivants seront traités: les vecteurs, la dynamique et la cinématique du mouvement de translation. La cinématique de la rotation, I' énergie, le travail, le moment linéaire, les collisions, le mouvement oscillatoire. Ce cours est destiné particulièrement aux étudiants qui voudraient poursuivre leur programme d'études dans les sciences physiques ou en indignerai. On ne peut se faire créditer à la fois le PHYS 1050 (ou 016.105) et le PHYS 1020 ou PHYS 1021 (ou 016.102) ou PHYS 1410 (ou 016.141) ou le PHYS 1420 (ou 016.142 ) (et les anciens $016.118,016.120$ ou 016.127). Préalables: Mathématiques pré-calcul 40 S (ou l'équivalent) et Physique 40S (ou l'équivalent) ou le PHYS 0900 (ou 016.090) (avec "Pass"). Il est fortement recommandé que l'étudiant obtienne une moyenne de $80 \%$ dans les Préalables de mathématiques précalcul 40 S et de Physiqes

40S. Préalables ou concomitants: Un de MATH 1500 ou MATH 1501, MATH 1510, MATH 1520, l'ancien 136.153 ou MATH 1690. Donné seulement au l'Université de SaintBoniface.

PHYS 1071 Physique II : La physique des ondes et la physique moderne Cr.Hrs. 3
(Labo requis) (Ancien 016.107) Une introduction, basée sur le calcul, à la physique des ondes et à la physique moderne. Les sujets suivant seront traités: les oscillations: les ondes, la superposition, l'interférence, la relativité, l'effet photoélectrique, le modèle quantique, l'atome de Rutherford, le modèle de Bohr, les spectres atomiques, la théorie de deBroglie, le principe d'incertitude de Heisenberg, les réactions nucléaires, la fission, la fusion, les particules sousatomiques. Ce cours, tout comme le PHYS 1050 (ou $016.105)$ Physique, est destiné aux étudiantes et aux étudiants qui veulent suivre un programme d'études en sciences physiques. On ne peut se faire créditer à la fois le PHYS 1070 (ou 016.107) avec le PHYS 1410 (ou 016.141), ou le PHYS 1420 (ou 016.142). Préalables: PHYS 1050 ou PHYS 1051 (ou 016.105 ) (ou l'ancien 016.118) (C) ou PHYS 1020 ou PHYS 1021 (ou 016.102) (B), et MATH 1500 ou MATH 1501(ou 136.150) ou MATH 1510 (ou 136.151), MATH 136.152 (ou 136.152), ou l'ancien 136.153 (C). Préalables ou concomitants: MATH 1700 ou MATH 1701 ou MATH 1690 ou MATH 1710. Donné seulement au I'Université de Saint-Boniface.

PHYS 1301 Énergie et environnement Cr.Hrs. 6 (Ancien 016.130) Ce cours présente les particularités physiques générales de notre environnement. On insistera sur certains problèmes d'actualité, à savoir l'atmosphère, le cosmos, la structure de la matière et de l'énergie, les sources d'énergie, l'application des principes de la physique à la technologie moderne, etc. Le cours comportera des projections de films et des démonstrations. La participation aux discussions et aux choix des sujets à traiter est encouragée. Ce cours est conçu pour les étudiants de toutes les facultés et n'exige aucune connaissance des mathématiques ou de la physique. Il ne peut faire partie des programmes de Mineure ou de Majeure en Physique. On ne peut se faire créditer à la fois le PHYS 1300. Donné seulement au l'Université de Saint-Boniface.

PHYS 2201 Électricité et magnétisme Cr.Hrs. 6 (Labo requis) (Ancien 016.220) Champs électrostatique, potentiel électrostatique, loi de Gauss, capacitance, matériaux diélectriques, champs magnétiques, loi d'Ampère, induction magnétique, matériaux magnétiques, courant de déplacement, forme intégrale des équations de Maxwell, loi d'Ohm, lois de Kirchoff, analyse de circuits en courant continu, circuits équivalents, analyse de circuits en courant alternatif, impédance complexe, circuits RLC, couplage magnétique, transformateurs, diodes et circuits avec diodes. On ne peut se faire créditer à la fois le PHYS 2200 (ou 016.220 ) et le PHYS 2600 (ou 016.260) ou le PHYS 2610 (ou 016.261). Préalables: Un de PHYS 1070 ou PHYS 1071(ou 016.107) (ou les anciens 016.106 ou 016.120 ) (C), ou PHYS 1020 ou PHYS 1021(ou 016.102) (C+) et PHYS 1030 ou PHYS 1031 (ou 016.103) (C+) (C); et un de MATH 1500 ou MATH 1501 (ou 136.150) (C), MATH 1510 (ou 136.151) (C), MATH 1520 (ou 136.152) (C), l'ancien 136.153 (C) ou MATH 1690 (ou 136.169) (C). Préalables ou concomitants: MATH 1200 ou MATH 1201 et un de MATH 1690, MATH 1700 ou MATH 1701, MATH 1710 ou l'ancien 136.173. Donné seulement au l'Université de Saint-

Boniface.
PHYS 2251 Introduction à la physique moderne Cr.Hrs. 3 (Ancien 016.225) Un cours d'introduction en physique atomique et nucléaire. Théorie cinetique des gaz, théorie de la relativité, effets de quantum, physique atomique, physique nucléaire. Ce cours n'est pas disponible aux étudiants qui auraient Préalablement obtenu des crédits ou qui sont concurremment inscrits dans le cours PHYS 2380 (ou 016.238 ) (ou les anciens 016.250 ou 016.230 )). Ce cours n'est pas disponible aux étudiants dans les programmes de spécialisation ou de majeure en Physique. On ne peut se faire créditer à la fois le PHYS 2250. Préalables: Un de: PHYS 1070 ou PHYS 1071 (ou 016.107) (C), ou PHYS 1020 ou PHYS 1021 (ou 016.102 ) (C+) et PHYS 1030 ou PHYS 1031 (ou 016.103)(C+) (ou l'ancien 016.121) (C+), (ou les anciens 016.127 (C); et un de MATH 1500 ou MATH 1501 (ou 136.150) (C), MATH 1510 (ou 136.151) (C), MATH 1520 (ou 136.152) (C), l'ancien 136.153 (C) ou MATH 1690 (ou 136.169) (C). Préalables ou concomitants: MATH 1200 ou MATH 1201 et un de MATH 1690, MATH 1700 ou MATH 1701, MATH 1710 ou l'ancien 136.173. Donné seulement au I'Université de Saint-Boniface.

PHYS 2261 Optique Cr.Hrs. 3
(Labo requis) (Ancien 016.226) Étude de la réfraction, réflexion, des systèmes de lentilles simples et des systèmes optiques, dispersion, achromatisme et vuee lementerai de la diffraction, interférence et polarisation. On ne peut se faire créditer à la fois le PHYS 2260. Préalables: Un de: PHYS 1070 ou PHYS 1071 (ou 016.107) (C), ou PHYS 1020 ou PHYS 1021 (ou 016.102) (C+) et PHYS 1030 ou PHYS 1031 (ou 016.103) (C+); et un de MATH 1500 ou MATH 1501 (ou 136.150) (C), MATH 1510 (ou 136.151) (C), MATH 1520 (ou 136.152 ) (C), l'ancien 136.153 (C) ou MATH 1690 (ou 136.169) (C). Préalables ou concomitants: MATH 1300 ou MATH 1301 ou MATH 1310 et un de MATH 1690, MATH 1700 ou MATH 1701, MATH 1710 ou l'ancien 136.173. Donné seulement au l'Université de Saint-Boniface.

PHYS 2271 Éléments de physique pour les sciences biologiques A Cr.Hrs. 3
(Ancien 016.227) Ce cours introduit les éléments de physique ayant un rapport direct avec les sciences biologiques. En particulier, le transfert d'énergie par rayonnement, les effets de surface, la conduction thermique, les phonèmes de diffusion, les phonèmes de transport ainsi que l'utilisation de matériaux radioactifs. On ne peut se faire créditer à la fois le PHYS 2270. Préalable: PHYS 1070 ou PHYS 1071 (ou 016.107) (C) ou PHYS 1030 ou PHYS 1031 (ou 016.103) (C) ou le consentement du département. Donné seulement au l'Université de Saint-Boniface.

PHYS 2281 Éléments de physique pour les sciences biologiques B Cr.Hrs. 3
(Ancien 016.228) Ce cours traite des propriétés physiques des solides, des liquides et des gaz ainsi que des phénomènes de radiation et de la radioactivité. L'accent sera mis sur les aspects ayant un rapport direct avec les sciences biologiques. On ne peut se faire créditer à la fois le PHYS 2280. Préalable: PHYS 1070 ou PHYS 1071 (ou 016.107) (C) ou PHYS 1030 ou PHYS 1031 (ou 016.103) (C) ou le consentement du département. Donné seulement au l'Université de Saint-Boniface.

## Faculté des sciences-Statistics

STAT 1001 Analyse statistique de base I Cr.Hrs. 3
(Ancien 005.100) Une introduction aux principes fondamentaux de la statistique et aux procédures utilisées en analyse de données. Les sujets traités incluent: la cueillette des données, l'affichage et l'élagage des données, les relations entre variables, les distributions échantillonnelles, l'estimation et les tests de signification, l'inférence pour les moyennes. On ne peut se faire créditer à la fois le STAT 1000 (005.100) et le STAT 2220 (005.222).
Préalable: Un cours de mathématiques 40 S ou l'équivalent. Donné seulement au l'Université de Saint-Boniface.

STAT 2001 Analyse statistique de base II Cr.Hrs. 3 (Ancien 005.200) L'étude des procédures d'estimation et de tests d'hypothèses pour les moyennes et les proportions dans les contextes d'échantillonnage à une, deux ou plusieurs variables; introduction à l'analyse de variance; régression et corrélation; les sujets optionnels peuvent inclure les méthodes nonparamétriques, la conception d'expériences, les modèles probabilistes. On ne peut se faire créditer à la fois le STAT 2000. Préalable: STAT 1000 ou STAT 1001(ou 005.100) (C). Donné seulement au l'Université de Saint-Boniface.

## École de service social

SWRK 1311 Introduction à l'analyse de la politique de bienêtre social Cr.Hrs. 3
Étude de la politique de bien-être social en tant que produit fini d'idéologies. Introduction à quelques éléments de l'idéologie et comparaison des systèmes idéologiques concurrents. Analyse de l'interaction des visions économiques, politiques et ethniques de la société et de leurs manifestations en tant que réponses sociétales aux besoins humains et aux services sociaux. On ne peut se faire créditer le SWRK 1310 ( ou 047.131) et (ancien 047.130).

SWRK 2051 Théorie et organisation
communautaire Cr.Hrs. 3
Étude de concepts tels que le conflit et le pouvoir qui ramènent la pratique du travail social à la nature des relations humaines de second niveau. Application de ces concepts à la dynamique en vigueur au sein des communautés et des organisations et entre celles-ci. On ne peut se faire créditer le SWRK 2050 (047.205) Préalable : première moitié de SWRK 2091

SWRK 2071 Dynamique des petits groupes Cr.Hrs. 3 Explication des normes de groupe, des valeurs et des buts qui influencent la prise de décision et les modèles de communication dans les groupes. Influcence du rôle des membres et des styles de leadership sur le développement et le fonctionnement du groupe. On ne peut se faire créditer le SWRK 2070 (047.207). Préalable : première moitié de SWRK 2091.

SWRK 2081 Habiletés en communication
interpersonnelle Cr.Hrs. 3
Acquisition d'une gamme essentielle d'habiletés interpersonnelles pour communiquer efficacement et pour établir et maintenir des relations tant dans des situations individuelles que de groupe. Accent sur l'apprentissage
expérientiel utilisant une variété de techniques.
SWRK 2091 Comportement humain et pratique du travail social Cr.Hrs. 6
Application d'une théorie générale des systèmes à l'étude de la situation de la personne dans une famille et dans son environnment avec examen subséquent des implications pour la pratique du travail social. Critique de modèles variés du développement humain. Sessions d'information sur des dimensions du comportement qui s'avèrent critiques par rapport à la pratique du travail social.

SWRK 2101 Perspectives sur les transitions de la vie et de l'individu Cr.Hrs. 3
Examen de l'impact du cours transitoire de la vie sur le bienêtre psychosocial des individus. Concentration sur les crises et les impasses problématiques qui surgissent aux moments décisifs avec leurs implications pour l'intervention en travail social. Préalable : première moitié de SWRK 2091. On ne peut se faire créditer SWRK 2101 (SWRK 2100/047.210) et l'ancien 047.206.

SWRK 2111 Émergence de l'État-providence canadien de bien-être social Cr.Hrs. 3
Examen et comparaison des systèmes de bien-être social de trois sociétés modernes. Analyse des facteurs économiques, politiques, sociaux, religieux, géographiques, démographiques et cataclysmiques influençant les modèles variés de la prestation sociale quant à leur signification par rapport au système canadien de bien-être social. On ne peut se faire créditer le SWRK 2110 (ou 047.211) et (ancien 047.130). Préalable : SWRK 1311

SWRK 2651 Aspects sociaux du vieillissement Cr.Hrs. 3 Examen des aspects sociaux du vieillissement. Accent sur la compréhension du processus de vieillissement dans toute transition de vie impliquant une adaptation à l'interaction entre l'environnement social et l'environnement physique. On ne peut se faire créditer le SWRK 2651 et le REC 2650 (or 123.265) ou IDES 2650 (or 051.265 ) ou HMEC 2650 ou REC 2650 (047.265).

SWRK 3101 L'enquête systématique en travail social Cr.Hrs. 3
Lien entre les méthodes systématiques de recherche scientifique et la pratique du travail social, la construction théorique pour la pratique, la collecte d'information et de données descriptives pour le processus décisionnel pour la compréhension des matériaux techniques de la recherche et introduction aux enjeux et aux défis de sdevis de recherche. On ne peut se faire créditer le SWRK 3100 (ancien 047.310)

SWRK 3111 Perspectives sur la déviance Cr.Hrs. 3 Étude des problèmes humains àl'aide de plusieurs modèles analytiques communément appliqués dans la pratique du travail social. Préalable : première moitiée de SWRK 2091.

SWRK 3131 L'État canadien contemporain du bien-etre social Cr.Hrs. 3
Étude du bien-être social dans la société canadienne menant à une évaluation des approches actuelles à la lumière des transformations des conditions économiques et sociales et des besoins mouvants. On ne peut se faire créditer le SWRK 3131 et l'ancien 047.301. Préalable : SWRK 1311.

SWRK 3141 Introduction à la pratique du travail social Cr.Hrs. 3
Introduction à la perspective écologique ou à d'autres approches généralistes sur lesquelles se fondent les cadres opératoires de la pratique du travail social et le rôle des travailleuses sociales et des travailleurs sociaux professionnels. Accent mis sur les valeurs et les connaissances dans le contexte d'une approche rationnelle de résolution de problème incluant ainsi la définition même du problème, la consultation, le contrat, l'intervention et l'évaluation. On ne peut se faire créditer le SWRK 3140 (ancien 047.314). Préalable ou concomitant : SWRK 1311 ou SWRK 1310 (ou 047.131), SWRK 2081 ou SWRK 2080 ( ou 047.208) et SWRK 2091 ou SWRK 2090 (ou 047.209).

SWRK 3151 Formation a la pratique du terrain 1 Cr.Hrs. 12 Première expérience de formation pratique sur le terrain au cours de laquelle l'étudiant ou l'étudiante aura l'occasion d'assumer une responsabilité dans son engagement pour le travail social, la consultation, la planification, l'intervention, l'évaluation et l'application concrète de la théorie apprise en classe. Les heures requises sont calculées sur une base de 28 semaines, 2 jours par semaine, 7.5 heures par jour pour un total de 420 heures. Ces heures comprennent la participation aux activités de stage et l'évaluation de la performance. Ces heures incluent aussi les réunions et les entrevues formatives avec la personne qui supervise le stage sur une base individuelle ou en groupe de sessions. En plus, il y aura 13 sessions obligatoires d'ateliers d'application d'application d'habiletés de 3 heures chacune aux deux semaines pendant les semestres pour un total de 39 heures. Préalables: SWRK 1311 et SWRK 2081 et SWRK 2091 et SWRK 4141. Concomitant: SWRK 4201.

SWRK 4051 Sujets spéciaux Cr.Hrs. 3
Lectures dirigées ou études concentrées sur un aspect particulier du service social selon l'intérêt de l'étudiant ou de l'étudiante. Préalable : l'autorisation écrite de la professeure ou du professeur. On ne peut se faire créditer le SWRK 4051 et SWRK 4050 (ou 47.450).

SWRK 4071 Problèmes sociaux et pratique du travail social Cr.Hrs. 3
Étude en profondeur des situations à problèmes. Exploration des voies par lesquelles d'autres disciplines envisagent ou abordent le problème et le renforcement des habiletés d'intervention chez l'étudiant ou l'étudiante. Préalables :SWRK 3041 (SWRK 3040/047.304), SWRK 3121 (SWRK 3120/047.312), SWRK 4201/SWRK 3151 (SWRK 4200/SWRK 3150; 047.420/.047315) ou l'autorisation écrite de la professeure ou du professeur.

SWRK 4081 Enjeux actuels en bien-être social Cr.Hrs. 3 Étude d'un champ particulier du bien-être social en vue d'améliorer les politiques et les pratiques. L'étudiante ou l'étudiant aura à choisir un séminaire parmi de nombreux autres qui sont offerts. Ceux-ci peuvent varier d'une année à l'autre.

SWRK 4121 Formation à la pratique du terrain II Cr. Hrs. 12 Seconde expérience de formation pratique sur le terrain construite à partir du cours 3151. Occasion d'apporter une contribution professionnelle soutenue dans des situations nécessitant une intégration des valeurs, connaissances et aptitudes au niveau débutant du praticien professionnel. Les heures requises sont calculées sur la base de 28 semaines, 2 jours par semaine, 7.5 heures par jour pour un total de 420

## ACADEMIC CALENDAR 2012-2013 •

heures. Ces heures incluent aussi les réunions et les entrevues formatives avec la personne qui supervise le stage sur une base individuelle ou en groupe de sessions. En plus, il y aura 13 sessions obligatoires d'ateliers a'application, d'habiletés de 3 heures chacune aux deux semaines pendant les deux semestres pour un total de 39 heures. Préalables: SWRK 3151 et SWRK 4201. Concomitant: SWRK 4301.

SWRK 4131 Habiletés en communication interpersonnelle avancée Cr.Hrs. 3
Cours expérentiel pour la compréhension de soi et la vigilance à soi pour produire une utilisation consciente et disciplinée de soi dans la communication et les relations professionnelles. Préalables : SWRK 2081 (SWRK 2080/047.208) et l'autorisation écrite de la professeure ou du professeur.

SWRK 4201 Champs d'intervention et de pratique du travail social Cr.Hrs. 6
Séminaire d'enseignements des habiletés requises dans la pratique du travail social soit en contexte de stage ou d'intervention pratique. Insistance sur la pratique en termes de planification des changements (le système client), les politiques et les réseaux d'interrelations (le système services). Les séminaires peuvent varier d'une année à l'autre et sont organisés pour couvrir une variété de terrains ou de cadres d'interventions pratiques. Préalables : SWRK 1311 ou SWRK 1310, SWRK 2081 ou SWRK 2080, SWRK 2091 ou SWRK 2090 et SWRK 3141 ou SWRK 3140. Concomitant : SWRK 3151.

SWRK 4211 Les perspectives féministes de la pratique du travail social et de la politique du bien-etre social Cr.Hrs. 6 Analyse de la pratique du travail social et de la politique de bien-être social selon la perspective féministe. Accent mis sur l'imbrication synergique de l'intervention sociale avec les politiques dans le contexte du bien-être social et avec des concepts superposés tels que : potentialisation, pratique écologique, oppression et pratique en contexte de diversité culturelle. On ne peut se faire créditer le SWRK 4211 (ou 047.421) et SWRK 4171 (ou 047.417) ou SWRK 4211 (ou 047.421) et SWRK 4191 (ou 047.419). P réalables : SWRK 1311, SWRK 2081, SWRK 2091 et SWRK 3141.

SWRK 4221 Peuple autochtone et pratique du travail social Cr.Hrs. 6
Analyse de la pratique du travail social et de la politique de bien-être social à partir d'une perspective autochtone. Insistance sur l'imbrication entre la pratique du travail social, les politiques sociales et des concepts superposés tels que: potentialisation, pratique écologique et pratique en contexte de diversité culturelle. On ne peut se faire créditer SWRK 4220 (047.412) et SWRK 4160 (047.416) ou SWRK 4180 (047.418). Préalables : SWRK 1311 (SWRK 1310/047.131), SWRK 2081 (SWRK 20808047.208), SWRK 2091 (SWRK 2090/047.209) et SWRK 3141 (SWRK 3140/047.314).

SWRK 4301 Champs d'intervention et de pratique du travail social I Cr.Hrs. 6
Séminaire d'enseignement des habiletés requises dans la pratique du travail social soit en contexte de stage ou d'intervention pratique. Insistance sur la pratique en termes de planification des changements (le système client), les politiques et les réseaux d'interrelations (le système services). Les séminaires peuvent varier d'une année à l'autre et sont organisés pour couvrir une variété de terrains
ou de cadres d'interventions pratiques. Préalables: SWRK 1311 (SWRK 1310/047.131), SWRK 2081 (SWRK 2080/047.208), SWRK 2091 (SWRK 2090/047.209), SWRK 3141 (SWRK 3140/047.314), 6 crédits de SWRK 4201 (SWRK 4200/047.420) et SWRK 3151 (SWRK 3150/047.315). Concomitant : SWRK 4121 (SWRK 4120/047.412)

## Faculté d'éducation-education(EDSB)

## EDSB 5011 L'ÉDUCATION BILINGUE ET L'ACQUISITION

D'UNE LANGUE SECONDE Cr.Hrs. 3
(Ancien 120.501) Etude du développement linguistique de l'enfant tout en considérant un grand nombre de facteurs socioaffectifs et cognitifs qui influencent le développement linguistique, facteurs permettant de réfléchir à toute la question de l'immersion et d'appliquer ces connaissances à la situation qui existe au Manitoba.

EDSB 5031 Histoire de l'Éducation Française au Manitoba Cr.Hrs. 3
(Ancien 120.503) Les fondements de l'éducation française au Manitoba. Examen, dans une perspective historique, des événements majeurs, de nature sociologique et politique, qui ont marqué le développement de l'éducation française au Manitoba. On ne peut se faire créditer le EDSB 5031 (ancien 120.503) et l'ancien 116.503.

EDSB 5041 Théories d'Apprentissage en Situation d'Immersion Cr.Hrs. 3
(Ancien 120.504) Étude des connaissances théoriques concernant les processus, les mécanismes et les facteurs reliés à l'apprentissage d'une langue seconde.
Développement d'une compréhension plus englobante de l'expérience pratique en immersion. Préalable : le EDSB
5011 (ancien 120.501) ou le EDSB 5021 (ancien 120.502).
EDSB 5051 L'Intégration des Matières en Situation d'Immersion Cr.Hrs. 3
(Ancien 120.505) Familiarisation avec les principes de l'intégration des matières et les stratégies d'intégration de la lecture et de l'écriture dans l'enseignement des mathématiques, des sciences naturelles et des sciences humaines. Contenu du cours adapté au contexte de l'immersion.

EDSB 5061 Théories d'Apprentissage en Milieu Minoritaire Cr.Hrs. 3
(Ancien 120.506) Familiarisation avec les recherches en éducation compensatoire et bilingue et dégagement des implications en regard de l'apprentissage en milieu minoritaire.

EDSB 5071 Difficultés dans l'Enseignement du Langage Écrit Cr.Hrs. 3
(Ancien 120.507) Familiarisation avec les principes et les méthodes de prévention des difficultés d'apprentissage du langage écrit en tenant compte du contexte francomanitobain.

EDSB 5081 Stage et Séminaires de Recherche-
Action Cr.Hrs. 3
(Ancien 120.508) Utilisation du processus et des méthodes de recherche-action en vue de la résolution de problèmes éducatifs pratiques. Cours qui exige un minimum de 150 heures consacrées au stage de recherche. Pour s'inscrire à
ce cours, il faut être en fonction dans le milieu éducatif.

## Faculté d'éducation-3000 Level(EDUB)

EDUB 3011 Pratique du Microenseignement Cr.Hrs. 3
(Ancien 063.301) Étude du comportement de l'enseignante ou de l'enseignant. Utilisation de vidéos fournissant le décor pour la pratique contrôlée de quelques-uns des éléments de l'enseignement, en particulier de l'analyse et de l'application des techniques suivantes: l'exposition, l'interrogation, la discussion et la démonstration. On ne peut se faire créditer le EDUB 3011 (ancien 063.301) et le EDUB 3161 (ancien 063.316).

EDUB 3013 Microenseignement et pratiques pédagogiques Cr.Hrs. 3
Réflexions sur la mise en pratique d'habiletés d'enseignement par l'analyse de leçons, d'activités ou de cours.

EDUB 3021 Sujets particuliers en sciences humaines Cr.Hrs. 3
(Ancien 063.302) Étude de sujets choisis dans le domaine de l'enseignement des sciences humaines.

EDUB 3031 La Lecture au Secondaire Cr.Hrs. 3 (Ancien 063.303) Étude des habiletés de base en lecture et des relations de celles-ci avec les divers contenus disciplinaires du niveau secondaire. Examen de divers outils susceptibles de contribuer au développement des habiletés en lecture ainsi que diverses techniques d'évaluation.

EDUB 3101 Méthodologie de la lecture à l'élémentaire Cr.Hrs. 3
(Ancien 063.310) Étude de l'apprentissage et de l'enseignement de la lecture à l'élémentaire dans les écoles franco-manitobaines et les écoles d'immersion. Compréhension en lecture, analyse des structures textuelles, lecture à voix haute et analyse du mot. Survol des habiletés préalables à la lecture et de quelques techniques d'évaluation de la lecture.

EDUB 3161 Stages et Séminaires III Cr.Hrs. 3
(Ancien 063.316) Choix d'expérience initiale ou d'enrichissement dans un des domaines suivants : niveau scolaire primaire ou intermédiaire, situation en éducation spécialisée ou expérience dans un service communautaire relié de façon ponctuelle à l'éducation totale. Aspects théoriques et pratiques traités en ateliers d'initiation et en discussions de groupes. On ne peut se faire créditer le EDUB 3161 (ancien 063.316) et le EDUB 3011 (ancien 063.301).

EDUB 3171 Stages Et Séminaires lii Cr.Hrs. 3 (Ancien 063.317) Cours qui fournira de multiples occasions de rédiger différents genres de textes en français. Composition, transcription et révision de textes. Familiarisation avec le processus de l'écrit qui peut être adapté et appliqué aux niveaux primaire, élémentaire et secondaire.

EDUB 3211 Enseignement Du Français Au Primaire D'immersion Cr.Hrs. 3
(Ancien 063.321) Enseignement du français langue seconde au primaire. Étude des principes de la communication orale
et écrite dans la salle de classe, de la nouvelle pédagogie dans l'enseignement de la lecture et de l'écrit et de l'intégration des savoirs et des matières. Concomitant : EDUB 2201 (ancien 063.220).

EDUB 3251 Sujets Particuliers - Curriculum et Pédagogie Cr.Hrs. 3
(Ancien 063.325) Etude de sujets choisis en enseignement et apprentissage en immersion.

EDUB 3261 L'acquisition Et L'apprentissage Du Français En Contexte D'immersion Cr.Hrs. 3
(Ancien 063.326) Cours théorique. Familiarisation avec les théories explicatives de l'acquisition et l'apprentissage d'une langue seconde et les approches pédagogiques qui en découlent. On ne peut se faire créditer le EDUB 3261 (ancien 063.326) et l'ancien 063.319.

EDUB 3271 Développement Langagière en Immersion Française à l'Élémentaire Cr.Hrs. 3
(L'ancien 063.327) Étude des aspects pratiques de l'enseignement en situation d'immersion à l'élémentaire. Sensibilisation aux méthodes et aux techniques susceptibles de développer les compétences en français langue seconde. On ne peut se faire créditer l'ancien 063.327 ou l'ancien 063.320. Préalable: EDUB 3261 (063.326) ou l'ancien 063.319.

EDUB 3281 Développement Langagière En Immersion Française Cr.Hrs. 3
(Ancien 063.328) Étude des aspects pratiques de l'enseignement en situation d'immersion au secondaire. Sensibilisation aux méthodes et aux techniques susceptibles de développer les compétences en français langue seconde. Préalable : EDUB 3261 (ancien 063.326) ou l'ancien 063.319.

EDUB 3291 Principes et pratiques de l'évaluation des apprentissages Cr.Hrs. 3
Ce cours permettra aux étudiantes et aux étudiants de comprendre les approches et les principes permettant d'évaluer la progression des apprentissages et le degré d'acquisition des compétences des élèves.

EDUB 3311 Perfectionnement du français Cr.Hrs. 3 Appronfondissement des notions de la grammaire des particularités orthographiques du français. Étude des outils et des stratégies à l'autocorrection. Bref aperçu des anglicismes, de la cohérence textuelle et des stratégies de lecture et d'écriture.

EDUB 3313 Perspectives autochtones en contexte scolaire Cr.Hrs. 3
Introduction aux perspectives culturelles autochtones et metisses en contexte scolaire dimensions historique, anthropologique, ethique et pedagogique. Developpement de competences professionnelles relatives a l'enseignement dans un environnement autochtone et metis.

EDUB 3991 ÉTUDE INDIVIDUELLE Cr.Hrs. 3
(Ancien 063.399) Étude individuelle et recherche dirigées vers un sujet d'intérêt.

EDUB 3993 ÉTUDE INDIVIDUELLE Cr.Hrs. 3
(Ancien 081.399) Étude individuelle et recherche dirigées vers un sujet d'intérêt

## Faculté d'éducation-4000 Level(EDUB)

EDUB 4011 Stages Cr.Hrs. 9
(Ancien 063.401) Période d'application, en milieu scolaire, des connaissances acquises, sous la surveillance du personnel de la Faculté et de l'école qui reçoit le ou la stagiaire.

EDUB 4013 Stages Cr.Hrs. 3
(Ancien 081.401) Période d'application, en milieu scolaire, des connaissances acquises, sous la surveillance du personnel de la Faculté et de l'école qui reçoit le ou la stagiaire.

EDUB 4021 Didactique - Élémentaire Cr.Hrs. 6 (Ancien 081.402) Étude des programmes actuels au niveau élémentaire et des méthodes pratiques d'enseignement.

EDUB 4023 Didactique - Élémentaire Cr.Hrs. 6
(Ancien 081.402) Étude des programmes actuels au niveau élémentaire et des méthodes pratiques d'enseignement.

EDUB 4051 Méthodologie Générale Cr.Hrs. 3 (Ancien 063.405) Étude des fondements et de l'application de la méthodologie.

EDUB 4061 Didactique En Anglais (Secondaire) Cr.Hrs. 3 (Ancien 063.406) Étude des programmes et des méthodes d'enseignement en anglais au niveau secondaire.

EDUB 4071 L'Enseignement du Français de Base au Secondaire Cr.Hrs. 3
(Ancien 063.407) Étude de l'enseignement et de l'apprentissage du français langue seconde aux niveaux présecondaire et secondaire. Familiarisation avec l'approche communicative en tenant compte du programme d'études et des ressources disponibles au Manitoba.

EDUB 4081 Didactique en Géographie
(Secondaire) Cr.Hrs. 3
(Ancien 063.408) Étude des programmes et des méthodes d'enseignement en géographie au niveau secondaire.

EDUB 4091 Didactique En Langues Vivantes
(Secondaire) Cr.Hrs. 3
(Ancien 063.409) Étude des programmes et des méthodes d'enseignement en langues vivantes au niveau secondaire.

EDUB 4101 Didactique En Histoire (Secondaire) Cr.Hrs. 3 (Ancien 063.410) Étude des programmes et des méthodes d'enseignement en histoire au niveau secondaire.

EDUB 4103 Didactique En Biologie (Secondaire) Cr.Hrs. 3 (Ancien 081.410) Étude des programmes et des méthodes d'enseignement en biologie au niveau secondaire.

EDUB 4113 Didactique En Chimie (Secondaire) Cr.Hrs. 3 (Ancien 081.411) Étude des programmes et des méthodes d'enseignement en chimie au niveau secondaire.

EDUB 4123 Didactique En Informatique
(Secondaire) Cr.Hrs. 3
(Ancien 081.412) Étude des programmes et des méthodes d'enseignement en informatique au niveau secondaire.

EDUB 4131 Didactique En Théâtre (Secondaire) Cr.Hrs. 3 (Ancien 063.413) Étude des programmes et des méthodes d'enseignement en théâtre au niveau secondaire.

EDUB 4133 Didactique En Sciences Générales
(Secondaire) Cr.Hrs. 3
(Ancien 081.413) Étude des programmes et des méthodes d'enseignement en sciences générales au niveau secondaire.

EDUB 4141 Didactique en Art (Secondaire) Cr.Hrs. 3 (Ancien 063.414) Étude des programmes et des méthodes d'enseignement en art au niveau secondaire.

EDUB 4151 Didactique En Sciences De L'écologie Humaine li Cr.Hrs. 3
(Ancien 081.415) Étude des programmes et des méthodes d'enseignement en sciences de l'écologie humaine au niveau secondaire.

EDUB 4161 Didactique en Éducation Physique (Secondaire) Cr.Hrs. 3
(Ancien 081.416) Étude des programmes et des méthodes d'enseignement en éducation physique au niveau secondaire.

EDUB 4171 Didactique En Physique (Secondaire) Cr.Hrs. 3 (Ancien 081.417) Étude des programmes et des méthodes d'enseignement en physique au niveau secondaire.

EDUB 4181 Didactique En Mathématiques
(Secondaire) Cr.Hrs. 3
(Ancien 081.418) Étude des programmes et des méthodes d'enseignement en mathématiques au niveau secondaire.

EDUB 4201 Didactique du/en Français au
Secondaire Cr.Hrs. 3
Ce cours est axé autour des questions didactiques soulevées par les programmes d'études de français langue première et ceux de français langue seconde -- immersion établis, pour les niveaux 7 e années à Secondaire 4, par la Division du Bureau de l'éducation française d'Education, Citoyenneté et Jeunesse Manitoba.

EDUB 4203 Didactiques l'Approche
Transdisciplinaire Cr.Hrs. 6
Elaboration d'une unite d'enseignement menant a une synthese de la formation initiale.

## Faculté d'éducation-5000 level (EDUB)

EDUB 5201 Lectures dirigées en curriculum, en enseignement et en apprentissage $1 \mathrm{Cr} . \mathrm{Hrs} .3$ (Ancien 132.520) Lectures et recherches traitant de domaines particuliers de l'étude du curriculum.

EDUB 5221 Courants Actuels En Curriculum, En
Enseignement Et En Apprentissage 2 Cr.Hrs. 3
(Ancien 132.522) Étude de la théorie qui sous-tend les courants actuels et les problématiques émergeantes dans le domaine et de leurs applications pratiques.

EDUB 5231 COURANTS ACTUELS EN CURRICULUM, EN ENSEIGNEMENT ET EN APPRENTISSAGE 2 Cr.Hrs. 3 (Ancien 132.523) Approfondissement de thèmes choisis qui ont fait l'objet d'études dans le EDUB 5221 (ancien
132.522).

EDUB 5261 Introduction Aux Fondements De La Lecture Cr.Hrs. 3
(Ancien 132.526) Étude de la nature de la lecture par rapport à diverses composantes du développement humaine telles que le langage, la vue, l'ouïe, la cognition et la motivation. On ne peut se faire créditer le EDUB 5261 (l'ancien 132.526) et l'ancien 063.566.

EDUB 5271 Enseignement De La Lecture Cr.Hrs. 3 (Ancien 132.527) Ettude des fondements du programme d'enseignement de la lecture; objectifs du programme, conditions d'apprentissage, démarches et matériel pédagogiques et évaluation des apprentissages. On ne peut se faire créditer le EDUB 5271 (l'ancien 132.527) et l'ancien 063.567.

EDUB 5321 Séminaire Sur Les Arts Langagiers 1 Cr.Hrs. 3 (Ancien 132.532) Séminaire de recherche et de lecture, qui comprend une analyse approfondie des fondements théoriques de l'étude et de l'enseignement des arts langagiers à l'élémentaire et de la recherche qui sous-tend ces fondements. Réflexion sur la portée pratique de ces théories dans l'enseignement en ce qui a trait à la communication orale, à l'écoute et à la création dramatique. On ne peut se faire créditer le EDUB 5321 (l'ancien 132.532) et l'ancien 063.572.

EDUB 5331 Sujets Pratiques Dans Les Arts Langagiers 2 Cr.Hrs. 3
Étude des pratiques d'enseignement de l'écriture et de ses rapports avec la communication orale et la lecture. Examen attentif des démarches pédagogiques, des techniques d'évaluation, du matériel existant et des méthodologies de l'enseignement de l'épellation, de l'écriture et de la composition écrite. On ne peut se faire créditer le EDUB 5331 (I'ancien 132.533) et l'ancien 063.575.

EDUB 5341 Fondements De La Littératie Cr.Hrs. 3 (Ancien 132.532 / 132.534) Étude de la nature de la littératie par rapport aux dimensions du développement humain et de l'enseignement telles que le langage, la vision, l'audition, la cognition, la motivation et l'objectif de l'enseignement. On ne peut se faire créditer le 132.534) et le EDUB 5261 (ancien 132.526) et l'ancien 063.566.

EDUB 5351 Problematiques actuelles en langue et en Litteratie Cr.Hrs. 3
(Ancien 132.535) Étude de sujets particuliers qui vise à faire connaître les coiurants actuels en enseignement de la langue et de la littératie.

EDUB 5361 Fondements De La Littératie Cr.Hrs. 3 (Ancien 132.536) Étude de la nature et de la psychologie de la littérature enfantine à l'élémentaire. Aperçu du matériel existant, établissement de critères d'évaluation de ce matériel et résultats des recherches portant sur l'élaboration, le niveau d'intérêt et I ¿utilisation du matériel. On ne peut se faire créditer le EDUB 5361 (ancien 132.536) et l'ancien 063.544.

EDUB 5371 Littérature Pour Adolescents Et
Adolescentes Cr.Hrs. 3
(Ancien 132.537) Étude de la nature et de la psychologie de la littérature destinée aux élèves de la 7 e à la 12 e année. Aperçu du matériel existant, établissement de critères
d'évaluation de ce matériel et résultats des recherches portant sur l'élaboration, le niveau d'intérêt et l'utilisation du matériel. On ne peut se faire créditer le EDUB 5371 (ancien 132.537) et l'ancien 063.545.

EDUB 5431 Développements Récents En Curriculum: Humanités Cr.Hrs. 3
Examen des courants théoriques et des applications pratiques récents ou en émergence dans ce domaine.

EDUB 5471 Cr.Hrs. 3
(Ancien 132.547) Examen des courants théoriques et des applications pratiques récents ou en émergence dans ce domaine.

EDUB 5531 Théorie Et Pratique De L'enseignement Du Français Cr.Hrs. 6
(L'ancien 132.533) Étude de la théorie actuelle et des nouvelles pratiques de l'enseignement du français langue seconde. Examen attentif de l'analyse des procédures pédagogiques et de la tâche d'enseignement. Initiation à la recherche dans le domaine de l'enseignement d'une langue seconde. On ne peut se faire créditer le EDUB 5531 (l'ancien 132.553) et l'ancien 063.512.

EDUB 5533 Théorie et pratique de l'enseignement du français langue seconde Cr.Hrs. 3
Ce cours fournit une mise à jour des théories et des pratiques de l'enseignement et de l'apprentissage en français langue seconde (immersion et français de base).

EDUB 5535 L'utilisation des médias en enseignement du français de base Cr.Hrs. 3
Ce cours est axé autour de deux volets relatifs à l'utilisation des médias dans la salle de classe de français de base. Dans un premier temps, les étudiants développeront une appréciation critique des médias, et ce, à partir d'une étude approfondie du sujet. Dans un deuxième temps, ils apprendront à utiliser les médias pour appuyer des thèmes explorés en situation de salle de classe et à développer des stratégies pédagogiques qui en découlent.

EDUB 5537 Théorie et pratique des arts visuels et I'enseignement du français de base Cr.Hrs. 3 An examination of current methods and approaches relevant to the teaching of visual arts in the Basic French classroom with particular emphasis on the application of theory through practical activities and projects. Students will learn appropriate vocabulary as well as teaching strategies which will lead to authentic learning experiences in the Basic French classroom.

EDUB 5539 L'enseignement du français de base et les TIC Cr.Hrs. 3
Liens entre l'apprentissage, la pédagogie et les TIC. Mise à l'essai et évaluation des logiciels éducatifs. Utilisation pédagogique des logiciels comme Word, Excel, et Power Point. Développement des compétences techniques activités pédagogiques. Consultation et évaluation de sites Web. Création d'un plan de site Web pour une unité d'apprentissage. Cours en ligne.
EDUB 5541 Enseignement Du Français Cr.Hrs. 6 (L'ancien 132.554) Revue critique du programme d'études: buts et objectifs, divers aspects de la discipline du français, théorie et pratique de l'enseignement, recherche et évaluation des techniques méthodologiques pour un meilleur

## ACADEMIC CALENDAR 2012-2013 •

enseignement du français. On ne peut se faire créditer le EDUB 5541 (l'ancien 132.544) et l'ancien 063.515.

EDUB 5543 L'art dramatique et l'enseignement du français de base Cr.Hrs. 3
Ce cours examine la littérature récente sur l'utilisation de l'art dramatique en éducation, et vise, en particulier, la théorie et la pratique de l'art dramatique dans la classe de français de base.

EDUB 5545 French Immersion for Teachers Intermediate C/D Cr.Hrs. 3
Ce course de perfectionnement linguistique vise les enseignantes et enseignants du français langue seconde, et qui veulent se perfectionner en français par le biais de l'aproache communicative.

EDUB 5547 French Immersion for Teachers Advanced/Perfectionnement Cr.Hrs. 3 Ce cours de perfectionnement linguistiq vise les enseignantes et enseignants du français langue seconde, ou des personnes qui se destinent à l'enseignement du français langue seconde, et qui veulent se perfectionner en français par le biais de l'approche communicative.

EDUB 5761 Courants Actuels en Enseignement des Mathématiques Cr.Hrs. 3
(Ancien 132.576) Lectures et recherches sur । ¿enseignement des mathématiques (sujets particuliers).

EDUB 5771 Diagnostic et Intervention en Enseignement des Mathématiques à l'Élémentaire Cr. Hrs .3
(Ancien 132.577) Méthodes diagnostiques et ressources orthopédagogiques en enseignement des mathématiques à l'élémentaire. On ne peut se faire créditer le EDUB 5771 (ancien 132.577) et l'ancien 081.558.

## Faculté d'éducation-7000 Level (EDUB)

EDUB 7071 Ouvrages marquants de recherche en lecture Cr.Hrs. 3
(Ancien 132.707) Examen, analyse et synthèse critiques des ouvrages marquants de recherche en lecture dans les domaines de la psychologie, de la psycholinguistique, de la sociologie et de la pédagogie de la lecture. On ne peut se faire créditer le EDUB 7071, EDUB 7070 et l'ancien 063.713.

EDUB 7101 Recherches en langue et littératie à l'élémentaire Cr.Hrs. 3 (l'ancien 132.710) Étude du curriculum en langue et en littératie à l'élémentaire. Identification et examen des questions importantes découlant des pratiques par rapport à la théorie, à la recherche et au curriculum à l'élémentaire. Les participantes et participants auront l'occasion de réaliser un projet de curriculum portant sur un domaine de recherche qui les intéresse. On ne peut se faire créditer le EDUB 7101 (ou 132.710) et l'ancien 063.755.

EDUB 7111 RECHERCHE SUR L'ACQUISITION DE LA LANGUE ET DE LA LITTÉRATIE Cr.Hrs. 3
(Ancien 132.711) Exploration des problématiques propres à l'acquisition de la langue et de la littératie susceptibles d'intéresser les enseignantes et enseignants sur le plan professionnel. Les participantes et participants feront une analyse critique des théories qui sous-tendent l'acquisition de la langue et de la littératie, de la recherche publiée et
d'observations en salle de classe. Ils auront l'occasion d'effectuer leur propre recherche sur l'acquisition de la langue et de la littératie dans un milieu éducatif. On ne peut se faire créditer le EDUB 711 (ancien 132.711) et l'ancien 063.756.

EDUB 7161 L'enseignante et l'enseignement de langue en tant que chercheurs Cr.Hrs. 3
Examen de paramètres caractéristiques des enseignantes et des enseignants en tant que cherceurs dans le contexte de leur propre salle de classe. Trois principes fondamentaux guident les participantes et participants: voix, conversation et communauté. Sous cet angle particulier, les enseignantes et enseignants de langue effectuent une recherche en salle de classe dans le but de comprendre la langue et l'enseignement par l'entremise des élèves interrogés dans le domaine du curriculum. On en peut se faire créditer le EDUB 7161 et l'ancien 132.716 ou 063.761.

EDUB 7181 La recherche en rédaction Cr.Hrs. 3 (Ancien 132.718) Analyse critique de la recherche et des méthodes de recherche en rédaction et en pédagogie. Regard particulier sur les études classiques, l'histoire, les courants actuels et la recherche ainsi que les méthodes d'évaluation en rapport avec l'étude et l'enseignement de la rédaction. On ne peut se faire créditer le EDUB 7181 ou EDUB 7180 (ou 132.718) et l'ancien 063.763.

EDUB 7191 Recherches sur le rôle de la langue dans l'apprentissage Cr.Hrs. 3
(Ancien 132.719) Analyse critique des résultats de la recherche afin de comprendre la façon dont la langue peut faciliter l'apprentissage dans tous les domaines scolaires. Regard sur le rôle que joue la langue pour faciliter l'apprentissage des matières. Examen particulier de la recherche portant sur l'expression orale, la lecture et l'écriture en tant qu'outils servant à l'apprentissage. On ne peut se faire créditer EDUB 7191 et l'ancien 063.764

EDUB 7201 LA LITTÉRATIE ET L'ÉLABORATION DE POLITIQUES Cr.Hrs. 3
(Ancien 132.720) Un séminaire portant sur l'élaboration de politiques en littératie et leurs effets sur notre conceptualisation d'un curriculum littéraire et nos définitions de la littératie. Regard particulier sur le concept de fonctionnalité en littératie et les politiques sur l'enseignement de la littératie. On ne peut se faire créditer le EDUB 7201 (ancien 132.720) et l'ancien 063.765.

EDUB 7341 Sujets particuliers en curriculum : humanités et sciences humaines Cr.Hrs. 3
(Ancien 132.734) Lecture et recherche sur des sujets d'importance dans le domaine du curriculum en humanités et en sciences humaines.

## Faculté d'éducation- 3000 Level (EDUA)

EDUA 3011 Mesure et Évaluation Cr.Hrs. 3
(Ancien 043.301) Théorie et application pratique dans la préparation, l'utilisation et l'interprétation de tests composés par les instituteurs et les institutrices; utilisation et interprétation de divers types de tests standards; techniques de statistiques connexes.

EDUA 3021 Principes de Programmation Scolaire Cr.Hrs. 3 (Ancien 116.302) Analyse des principes fondamentaux qui
gouvernent l'élaboration des programmes scolaires et étude de l'application de ces principes à certains programmes actuels.

EDUA 3051 Troubles Particuliers de
L'Apprentissage Cr.Hrs. 3
(Ancien 043.305) Initiation à l'étude de certains troubles perçus dans le développement des élèves. Étude du rôle de l'enseignante ou de l'enseignant dans le dépistage de ces troubles et application de programmes particuliers de rééducation.

EDUA 3061 Informatique En Éducation I Cr. Hrs. 3 (Ancien 043.306) Applications pédagogiques des ordinateurs. Exploitation des logiciels, des progiciels et des didactiques applicables à l'enseignement.

EDUA 3071 Développement Du Langage Chez Le Jeune Enfant Cr.Hrs. 3
(Ancien 043.307) Étude des expériences sensorimotrices et des étapes de la communication prélinguistique et linguistique allant de l'expression vocale au développement syntaxique. Appréciation de l'importance de l'environnement linguistique et de la cognition dans le développement, l'acquisition et l'apprentissage de la langue première. Analyse particulière du développement d'une langue seconde aux niveaux préscolaire et primaire en immersion. Il est préférable mais non obligatoire de suivre le EDUA 2011 (ancien 043.201) au préalable.

EDUA 3201 Diversité culturelle dans les écoles Cr.Hrs. 3 Les écoles accueillent un grand nombre d'élèves provenant de groupes sociaux marginalisés selon, entre autres, leur race, leur ethnie, leur langue maternelle, leur religion, leur orientation sexuelle ou leur statut socioéconomique. Étude de la question de la diversité culturelle, prise dans un sens large, dans le contexte de l'enseignement. Acquisition des connaissances ainsi que des attitudes et des stratégies nécessaires pour favoriser l'équité et la qualité des apprentissages des élèves, peu importe leurs antécédents, leurs particularités ou leurs circonstances.

EDUA 3303 Integration et identite professionnelles Cr.Hrs. 3 Developpement de l'habilete a faire le lien entre la pratigue et la theorie et a mettre en oeuvre une gestion efficace de sa pratique pedagogique.

EDUA 3313 Perspectives Autochtones en Contexte Scolaire Cr.Hrs. 3
Introduction aux perspectives culturelles autochtones et métisses en contexte scolaire : dimensions historique, anthropologique, éthique et pédagogique. Développement de compétences professionnelles relatives a l'enseignement dans un environnement autochtone et métis.

EDUA 3323 La pratique reflexive dans la formation professionnelle Cr.Hrs. 3
Analyse d'experiences vecues lors du stage pratique menant a une prise de conscience de son proper style d'enseignement

EDUA 3993 Education francaise en contextes minoritaire et d'immersion Cr.Hrs. 3
Etude des aspects historique, demographique, culturel, linguistique, identitaire et des approaches pedagogiques qui encadrent le phenomene de l'education francaise en milieu minoritiare au Manitoba (ecoles d'immersion et ecoles
francaises).

## Faculté d'éducation-5000 level (EDUA)

EDUA 5531 Counselling au Secondaire Cr.Hrs. 3
EDUA l'animation de groupe et de l'acquisition des compétences connexes, particulièrement en ce qui a trait à la fonction de la conseillère ou du conseiller en milieu scolaire. On ne peut se faire créditer le EDUA 5541 (ancien 129.554 ) et l'ancien 043.512. Préalable ou concomitant: le EDUA 5501 (ancien 129.550) ou l'ancien 043.509.

EDUA 5541 Counselling de Groupes Cr.Hrs. 3 (Ancien 129.554) Étude des groupes, de l'animation de groupe et de l'acquisition des compétences connexes, particulièrement en ce qui a trait à la fonction de la conseillère ou du conseiller en milieu scolaire. On ne peut se faire créditer le EDUA 5541 et l'ancien 043.512. Préalable ou concomitant: le EDUA 5501 (ancien 129.550) ou l'ancien 043.509.

EDUA 5551 Psychologie des Relations Humaines Cr.Hrs. 3 (Ancien 129.555) Étude des relations interpersonnelles. Approche de type laboratoire visant à augmenter la sensibilité personnelle des étudiantes et des étudiants aux autres personnes. Cours qui s'adresse particulièrement au personnel enseignant, administratif et professionnel en milieu scolaire. On ne peut se faire créditer le EDUA 5551 (ancien 129.555) et l'ancien 043.515.

EDUA 5571 Éducation Familiale Cr.Hrs. 3
(Ancien 129.557) Étude de la sexualité humaine et des relations familiales, axée sur les résultats de la recherche, les ressources et les méthodes pédagogiques, le développement, ainsi que la collaboration avec les membres de la famille et la collectivité. On ne peut se faire créditer le EDUA 5571 (ancien 129.557) et l'ancien 043.517.

EDUA 5581 Orientation de carriers Cr.Hrs. 3
(l'ancien 129.558) Étude et application des théories soustendant l'orientation de carrières, le choix de carrière et la prise de décision ; évaluation et conception de programmes de connaissance de soi aux fins de prises de décision dans une contexte de counselling. On ne peut se faire créditer le EDUA 5581 et les anciens 043.513 ou 043.545.

EDUA 5601 Introduction à l'éducation inclusive Cr.Hrs. 6 (Ancien 129.560) Survol des préoccupations dans le domaine de l'éducation inclusive. Étude des barrières à l'inclusion en ce qui concerne les lois, la pédagogie, les attitudes et les organisations, de même que les modalités d'inclusion exemplaires. On ne peut se faire créditer le EDUA 5601 (ancien 129.560) et l'ancien 043.518.

EDUA 5631 Évaluation et Programmation en Éducation Inclusive Cr.Hrs. 6
(Ancien 129.563) Étude des modalités d'évaluation basées sur le curriculum et sur le fonctionnement de la classe en vue de guider l'instruction des élèves éprouvant des difficultés d'apprentissage et de comportement en contexte d'inclusion. On ne peut se faire créditer le EDUA 5631 (ancien 129.563) et l'ancien 043.536. Préalable ou concomitant : le EDUA 5601 (ancien 129.560) ou l'ancien 043.518 ou l'équivalent.

EDUA 5661 Gestion des Programmes d'Orthopédagogie et de Soutien Cr.Hrs. 3
(Ancien 129.563) Étude des modalités d'évaluation basées sur le curriculum et sur le fonctionnement de la classe en vue de guider l'instruction des élèves éprouvant des difficultés d'apprentissage et de comportement en contexte d'inclusion. On ne peut se faire créditer le EDUA 5631 (ancien 129.563) et l'ancien 043.536. Préalable ou concomitant: le EDUA 5601 (ancien 129.560) ou l'ancien 043.518 ou l'équivalent.

EDUA 5671 Stratégies pour l'organisation de classes et d'écoles inclusives Cr. Hrs. 3
(Ancien 129.567) Étude de l'organisation et de la mise en oeuvre à l'échelle de l'école de mécanismes de soutien visant à favoriser l'accès à ces écoles, l'apprentissage, la socialisation, le comportement, les rapports avec la famille, la participation de professionnels de la santé et les services communautaires. Analyse des stratégies d'organisation visant à améliorer la consultation, la coopération, la collaboration et le perfectionnement professionnel. On ne peut se faire créditer le EDUA 5671 (ancien 129.567) et l'ancien 043.540. Préalable ou concomitant : le EDUA 5601 (ancien 129.560) (ou 043.518) ou l'équivalent et le EDUA 5631 (129.563) (ou 043.536) ou l'équivalent.

EDUA 5681 Promotion d'un Comportement
Responsable Cr.Hrs. 3
(Ancien 129.568) Étude des besoins des enfants ayant des problèmes de comportement en milieu scolaire. Analyse de la conceptualisation des troubles du comportement, des procédures d'identification et d'évaluation de ces troubles, ainsi que des stratégies d'intervention. Le cours a pour objectif d'habiliter les enseignantes et enseignants à concevoir des stratégies d'intervention appropriées en milieu scolaire. On ne peut se faire créditer le EDUA 5681 (ancien 129.568) et l'ancien 043.542. Préalable ou concomitant : le EDUA 5601 (ancien 129.560) ou l'ancien 043.518 ou l'équivalent.

EDUA 5701 Psychologie Sociale de l'Éducation Cr.Hrs. 3 (Ancien 129.570) Examen des facteurs sociaux qui influencent le rendement et l'adaptation de l'élève à l'école. Importance accordée au fonctionnement des petits groupes et aux interactions en classe, ainsi qu'à l'analyse de la structure sociale de l'école et du rôle social de l'enseignant et de l'enseignante. On ne peut se faire créditer le EDUA 5701 (ancien 129.570) et l'ancien 043.508.

EDUA 5731 Courants Actuels en Psychologie de l'Éducation 1 Cr.Hrs. 3
(Ancien 129.573) Examen des courants théoriques et des applications pratiques récents ou en émergence dans ce domaine.

EDUA 5741 Courants Actuels en Psychologie de l'Éducation 2 Cr.Hrs. 3
(Ancien 129.574) Étude des fondements théoriques et des applications pratiques de développements récents et de nouveaux courants dans ce domaine.

EDUA 5751 Psychologie de l'Enseignement en Contexte Scolaire Cr.Hrs. 3
(Ancien 129.575) Étude des théories fondamentales d'apprentissage telles qu'elles sont appliquées à l'enseignement en salle de classe et utilisées dans l'élaboration des programmes. Analyse du traitement de
linformation cognitive et des aspects comportemental, développemental et psychosocial. On ne peut se faire créditer le EDUA 5751 (ancien 129.5751) et l'ancien 43.543. Préalable: le EDUA 1801 (ancien 129.180), le PSYC 1201 (ancien 017.120), l'ancien 043.202 ou l'équivalent.

EDUA 5761 Psychologie de l'Enseignement en Contexte

## Scolaire Cr.Hrs. 3

(Ancien 129.576) Conçu principalement, mais non exclusivement, à lintention des enseignantes, des enseignants et du personnel scolaire. Étude critique des fondements théoriques et des modèles d'enseignement principaux. Intégration et application d'approches et de stratégies d'enseignement existantes ou nouvelles. On ne peut se faire créditer le EDUA 5761 (ancien 129.576) et l'ancien 043.544. Préalable: le EDUA 1801 (ancien 129.180) ou le PSYC 1201 (ancien 017.120), l'ancien 043.202 ou l'équivalent.

## EDUA 5801 Introduction à la recherche en

éducation Cr.Hrs. 3
(Ancien 129.580) Etude de l'investigation scientifique dans le domaine de l'éducation. Examen des méthodes de recherche et d'analyse statistique dans le contexte éducatif. Cours particulièrement recommandé aux étudiantes et aux étudiants qui s'intéressent à l'évaluation et à la mise en application des résultats de la recherche. On ne peut se faire créditer le EDUA 5801 (ancien 129.580) et l'ancien 043.503.

EDUA 5811 Théories de Construction de Tests Cr.Hrs. 3 (Ancien 129.581) Étude des problèmes reliés à l'analyse d'items, à la validité, à la fidélité et à l'utilisation des tests dans le processus d'évaluation en milieu scolaire. Considération des tests normatifs et critériés. On ne peut se faire créditer le EDUA 5811 (ancien 129.581) et l'ancien 043.504.

EDUA 5851 Application de l'Informatique en Éducation 2 Cr.Hrs. 3
(Ancien 129.585) Cours avancé sur l'utilisation de logiciels d'apprentissage dans les classes ordinaires et dans l'enseignement aux élèves ayant des difficultés d'apprentissage. On ne peut se faire créditer le EDUA 5851 (ancien 129.585) et l'ancien 043.526. Préalable: le EDUB 5761 (ancien 132.576) ou l'ancien EDUB 5281 (ancien 081.528) ou l'autorisation du titulaire du cours, ou l'ancien 043.306 .

EDUA 5901 Éducation et Processus du Développement 1 Cr.Hrs. 3
(Ancien 129.590) Survol du processus du développement de la conception à la puberté. Importance accordée aux fondements biologiques, au développement cognitif et aux aspects sociaux du comportement dans leurs rapports avec le processus éducatif. On ne peut se faire créditer le EDUA 5901 (ancien 129.590) et l'ancien 043.506.

EDUA 5911 Éducation et Processus de Développement

## 2 Cr.Hrs. 3

(Ancien 129.591) Étude de la croissance et du développement à l'âge postérieur à la puberté. Attention particulière accordée à leurs effets sur l'apprentissage au niveau secondaire. On ne peut se faire créditer le EDUA 5911 (ancien 129.591) et l'ancien 043.507.

EDUA 5921 Le Jeu Chez l'Enfant Cr.Hrs. 3
(Ancien 129.592) Examen du rôle du jeu dans
l'apprentissage chez l'enfant, en incluant la perspective historique. Discussion du jeu en tant que partie intégrante du développement de l'enfant. Distinction entre les activités ludiques et non ludiques, considération des attributs conceptuels, perceptuels, linguistiques et physiques du jeu. On ne peut se faire créditer le EDUA 5921 (ancien 129.592) et l'ancien 043.529.

EDUA 5931 Observation du Comportement de
I'Enfant Cr.Hrs. 3
(Ancien 129.593) Étude des techniques d'observation qualitatives qui peuvent être utilisées en milieu scolaire pour mieux comprendre le comportement de l'enfant, ses modes de penser et ses motivations. On ne peut se faire créditer le EDUa 5931 (ancien 129.593) et l'ancien 043.530.

## EDUA 5011 Introduction à L'Administration

Scolaire Cr.Hrs. 3
(Ancien 129.501) Étude des concepts, des tâches et des processus de l'administration tels qu'ils s'appliquent à l'éducation. On ne peut se faire créditer le EDUA 5011 (ancien 129.501) et l'ancien 116.501.

EDUA 5021 Principes d'Élaboration de Curriculum Cr.Hrs. 3 (Ancien 129.502) Étude des différentes approches d'élaboration de curriculum, des facteurs qui en influencent le processus d'élaboration et des aspects de l'implantation. Participation de l'enseignant ou de l'enseignante à I'élaboration du curriculum. On ne peut se faire créditer le EDUA 5021 (ancien 129.502) et l'ancien 116.502.

EDUA 5031 Gestion des établissements scolaires Cr.Hrs. 3 (Ancien 129.503) Étude des modes fondamentaux d'organisation et du rôle de l'administration au sein d'un établissement scolaire. Attention particulière accordée à la prise de décision, à la communication, à la planification et à l'évaluation. On ne peut se faire créditer le EDUA 5031 (ancien 129.503) et l'ancien 116.503.

EDUA 5041 Administration du Personnel Scolaire Cr.Hrs. 3 (Ancien 129.504) Étude des rapports de l'administratrice ou de l'administrateur avec le personnel, en mettant l'accent sur la politique de gestion, le perfectionnement et la motivation du personnel. On ne peut se faire créditer le EDUA 5041 (ancien 129.504) et l'ancien 116.504.

EDUA 5061 Principes de la Supervision en
Enseignement Cr.Hrs. 3
(Ancien 129.506) Étude des modèles théoriques d'enseignement et de supervision et de leur application dans la pratique. On ne peut se faire créditer le EDUA 5061 (ancien 129.506) et l'ancien 116.506.

EDUA 5071 Comportement Organisationnel en Éducation Cr.Hrs. 3
(Ancien 129.507) Étude des théories et des recherches en sciences du comportement et en sciences sociales qui ont trait au comportement des individus et des groupes dans une structure organisationnelle. Analyse de la portée de ces théories et recherches par rapport à l'administration des établissements scolaires. On ne peut se faire créditer le EDUA 5071 (ancien 129.507) et l'ancien 116.507.

EDUA 5081 Courants Actuels en Administration Scolaire 1 Cr.Hrs. 3
(Ancien 129.508) Étude des fondements théoriques et de l'application pratique des développements récents et des
nouveaux courants en administration scolaire.
EDUA 5091 Courants Actuels en Administration Scolaire 2 Cr.Hrs. 3
(Ancien 129.509) Prolongement de l'étude de certains sujets abordés dans le EDUA 5081 (ancien 129.508) en vue d'approfondir les études entreprises dans ces domaines.

EDUA 5101 Questions importantes en administration scolaire Cr.Hrs. 3
(Ancien 129.510) Étude de sujets d'importance en administration scolaire. On ne peut se faire créditer le EDUA 5101 (ancien 129.510) et l'ancien 116.510.

EDUA 5241 Problèmes en rapport avec l'éducation interculturelle Cr.Hrs. 3
(Ancien 129.524) Étude de problèmes particuliers auxquels les minorités culturelles font face dans le milieu scolaire. On ne peut se faire créditer le EDUA 5241 et l'ancien 116.531.

EDUA 5481 Techniques de counselling Cr.Hrs. 3
(Ancien 129.548) Acquisition de techniques de counselling telles que l'attention et l'écoute, le reflet du contenu et des émotions, la rétroaction et la révélation de soi, la focalisation et le résumé. On ne peut se faire créditer le EDUA 5481 (129.548) et l'ancien 129.556 ou l'ancien 043.516. Préalable ou concomitant: EDUA 5501 (129.550) ou l'ancien 043.509. Une note de réussite ou échec sera attribuée pour ce cours.

EDUA 5491 Stage en counselling Cr.Hrs. 3
(Ancien 129.549) Situation réelle de counselling où les étudiantes et les étudiants auront l'occasion, sous la supervision de professionnels compétents et avec l'appui de leur professeur ou de leur professeure, de mettre en pratique les techniques de counselling qu'ils ont apprises. On ne peut se faire créditer le EDUA 5491 et les anciens 129.549 ou 043.516. Préalables ou concomitants: EDUA 5501 (129.550) (ou 043.509) et EDUA 5481 (129.548). Une note de réussite ou échec sera attribuée pour ce cours.

EDUA 5501 Théories de Counselling Cr.Hrs. 3
(Ancien 129.550) Étude de la philosophie et des théories du counselling. Sujets importants en orientation et en counselling scolaires. On ne peut se faire créditer le EDUA 5501 (ancien 129.550) et l'ancien 043.509.

## EDUA 5511 Couselling à l'élémentaire Cr. Hrs. 3

E
EDUA 5521 Counselling et éthique Cr.Hrs. 3 (Ancien 129.552) Introduction au code de déontologie des conseillères et des conseillers. Discussion des problématiques morales en lien avec les suets suivants: consentement libre et éclairé, confidentialité, tenue des dossiers, respect des limites, formation et compétence, supervision clinique, multiculturalisme et diversité. Possibilité de mettre en pratique des modèles de prise de décision.

## Faculté d'éducation- 7000 Level (EDUA)

EDUA 7011 Administration scolaire en tnt que champ d'étude et d'application Cr.Hrs. 3
(l'ancien 129.701) Aperçu de l'administration scolaire. Importance particulière accordée à quelques-unes des grandes traditions intellectuelles du domaine de l'administration scolaire et analyse de certaines forces qui influencent la pratique de l'administration. On ne peut se
faire créditer le EDUA 7011 (ancien 129.701) et l'ancien 116.731.

On ne peut se faire crédoter le EDUA 7021 (ancien 129.702) et l'ancien 116.702.

EDUA 7031 Le financement scolaire Cr.Hrs. 3 (Ancien 129.703) Étude des dimensions économiques et financieres de l'éducation. Analyse des couts et des dépenses, des sources et des types de revenus, de la productivité et de l'efficacité, de la planification et du budget. On ne peut se faire créditer le EDUA 7031 et l'ancien 116.703.

EDUA 7041 Aspects légaux en éducation Cr.Hrs. 3 (Ancien 129.704) Étude des questions légales dans le monde de l'éducation. On ne peut se faire créditer le EDUA 7041 (ancien 129.704) et l'ancien 116.704.

EDUA 7051 Perspectives théoriques de l'administration scolaire Cr.Hrs. 3
(Ancien 129.705) Étude des tendances en matière de théorie organisationnelle et de pensée administrative ainsi que de la portée de celles-ci sur l'étude et l'administration d'organisations scolaires. On ne peut se faire créditer le EDUA 7051 (ancien 129.705) et l'ancien 116.705.

EDUA 7061 Planification organisationnelle et développement éducationnel Cr.Hrs. 3
Revue des diverses approches à la planification et au développement éducationnel. Importance particulière accordée au développement systématique des organismes d'enseignement. On ne peut se faire créditer les EDUA 7061 et l'ancien 116.709 ou 129.706.

EDUA 7071 Analyse des Organismes
D'Enseignement Cr.Hrs. 3
(Ancien 129.707) Application de méthodes d'analyse organisationnelle aux établissements d'enseignement. On ne peut se faire créditer le EDUA 7-071 et l'ancien 129.707 ou 116.710.

EDUA 7081 Principes d'organisation et de mise en application du curriculum Cr.Hrs. 3
Revue des approches de modification et d'application du curriculum. Importance particuliere accordée aux approches systématiques de modification des programmes en éducation. On ne peut se faire créditer le EDUA 7081 et I'ancien 116.706.

EDUA 7091 Séminaire - Problèmes Administratifs en Education Cr.Hrs. 3
(Ancien 129.709) Application de concepts théoriques à des situations concrètes. On ne peut se faire créditer le EDUA 7091 et l'ancien 116.706 ou 129.709.

EDUA 7101 Sujets Particuliers en Administration Scolaire 1 Cr.Hrs. 3
(Ancien 129.710) Lecture sur des sujets d'importance en administration scolaire.

EDUA 7111 Cr.Hrs. 3
(Ancien 129.711) Recherche-action sur des sujets d'importances en administration scolaire.

EDUA 7211 Éducation et société Cr.Hrs. 3
(Ancien 129.721) Étude du rapport qui existe entre l'éducation et la société. Regard particulier sur l'apprtenance ethnique, la famille, le statu socioéconomique et le role que joue l'école en tant qu'agent de socialisation dans un contexte canadien. On ne peut se faire créditer le EDAU 7211 et l'ancien 116.736

EDUA 7241 Valeurs en éducation Cr.Hrs. 3 (Ancien 129.724) Étude de la place occupée par les valeurs en éducation. Approfondissement de la notion de valeur et de son omniprésence dans le domaine de l'éducation, ainsi que des approches, des tendances et des questions relatives aux valeurs en éducation. On ne peut se faire créditer EDUA 7241 et l'ancien 116.732.

## EDUA 7281 Séminaire sur l'éducation interculturelle

 2 Cr.Hrs. 3(Ancien 129.728) Analyse critique des approches et de la recherche en éducation interculturelle. On ne peut faire créditer EDUA 7281 (EDUA 7280) et l'ancien 116.725.

EDUA 7511 Séminaire en counselling Cr.Hrs. 3 (Ancien 129.751) Progrès d'ordre professionnel, théorique et scientifique. Questions acutelles importantes. Problèmes sociaux particuliers en counselling. On ne peut se faire créditer EDUA 7511 et l'ancien 043.703.

EDUA 7521 Séminaire - Stage en counselling Cr.Hrs. 6 (Ancien 129.752) Expérience supervisée en counselling individuel et de groupe. Analyse d'études de cas au moyen d'audiocassettes et de vidéocassettes. Exige un minimum de 180 heures de stage. On ne peut se faire créditer le EDUA 7521 ou l'ancien 043.704. Préalable : le EDUA 5481 (ancien 129.548), l'ancien 129.556 ou l'ancien 043.516.

EDUA 7541 Programmes d'orientation de carrières Cr.Hrs. 3 (Ancien 129.754) Cours destiné aux conseillères et aux conseillers qui souhaitent approfondir leurs connaissances des programmes d'orientation de carrières. Examen et évaluation de programmes et de diverses techniques de counselling. Elaboration de programmes innovateurs qu répondent aux besoins de ceux et celles qui ont recours aux services de counselling. On ne peut se faire créditer le EDUA 7541 et l'ancien 132.754 ou 043.719.

EDUA 7551 Théories en counselling Cr.Hrs. 3 Objectifs du counselling, évaluation des résultats du counselling, théories de la personnalité et du counselling. On ne peut se faire créditer le EDUA 7551 et l'ancien 129.755 ou 043.705.

EDUA 7601 Séminaire en éducation inclusive Cr.Hrs. 6 (Ancien 129.760) Forum de discussions sur des sujets reliés à divers handicaps. Étude en profondeur de problèmes reliés aux besoins professionnels particuliers des étudiants et des étudiantes. On ne peut se faire créditer le EDUA 7601 (ancien 129.760) et l'ancien 043.705.

EDUA 7611 Séminaire sur L'Éducation des Enfants aux Prises avec des Troubles de Comportement Cr.Hrs. 3 (Ancien 129.761) Course á l'intention des enseignants et des enseignantes, et des conseillers et des conseillères

## ACADEMIC CALENDAR

scolaires. Études des connaissances théoriques et des outills nécessaires à l'elaboration et à la mise en oeuvre des programmes éducatifs pour les élèves aux prises avec des troubles de comportement. On ne peut se faire créditer le EDUA 7611et l'ancien 043.707 ou 129.761. Préalable ou concomitant: le EDUA 5601 (ancien 129.560 ou 043.518) ou le EDUA 5681 (ancien 129.568 ou 043.542).

EDUA 7651 Stage en éducation inclusive Cr.Hrs. 6 Un minimum de 200 heures de stage supervisées s'inscrivant dans un contexte d'éducation inclusive. Des séminaires sont prévus afin de créer un cadre qui facilite l'étude dirigée et la discussion. Préalable: 18 crédits au niveau 5000 en éducation inclusive ou l'équivalent. On ne peut se faire créditer EDUA 7651 et les anciens 129.764 ou 043.706. Une note réussite ou échec sera attribuée pour ce cours.

EDUA 7741 Sujets Particuliers en Psychologie de
L'Éducation Cr.Hrs. 3
(Ancien 129.774) Lecture et recherche sur des sujets d'importance en psychologie de l'éducation.

EDUA 7761 Techniques d'entrevue avec les enfants \& les adolescents et adolescentes Cr.Hrs. 3
Étude des principes et des méthodes d'entrevue et de counselling auprès d'enfants, d'adolescents et d'adolescentes, de parents, d'enseignants et d'enseignantes, ou de toute autre personne entervenant auprès de l'enfant. Intégration de la théorie et de la pratique relatives au processus de communication et d'observation diagnostique et thérapeutique en situation naturelle auprès de l'enfant. On ne peut se faire créditer le EDUA 7761 et l'ancien129.776 ou 043.717. Préalable: le EDUA 5821 (ancien 129.582 ou 043.505), le EDUA 5551 (ancien 129.555 ou 043.515), ou le EDUA 5481 (ancien 129.548) et le EDUA 5491 (ancien 129.549, 129.556 ou 043.516).

EDUA 7801 Méthodes de Recherches en
Education Cr.Hrs. 3
(Ancien 129.780) Etude des devis expérimentaux et des techniques de collecte de données dans la recherche éducative dans le milieu: devis quasi expérimentaux, enquête et techniques d'observation, simulation, analyse du contenu et sociométrie. On ne peut se faire créditer le EDUA 7800 et l'ancien 043.709. Préalable: le EDUA 5801 (ancien 129.580) ou l'ancien EdUA 6801 (ancien 129.680) ou l'ancien 043.610 ou l'autorisation écrite de la professeure ou du professeur.

EDUA 7841 Methodes de recherche qualitative en Éducation Cr.Hrs. 3
(Ancien 129.784) Introduction aux méthodes de recherche qualitative. Discussion de l'éthique de la recherche et des théories qui sous-tendent la recherche qualitative. Cours axé sur les démarches à suivre pour effectuer une recherche, y compris la méthodologie et la collecte et l'analyse de données. Préalable: EDUA 5801 (ancien 129.580) ou l'ancien 043.503 ou l'équivalent.

Fax: (204) 7893929
Email Address: PGME@med.umanitoba.ca
Website: http://umanitoba.ca/medicine
Program Manager, Postgraduate Medical Education: Geeta Raichura

## (Postgraduate Medical Education (PGME) is not an undergraduate program)

Postgraduate medical education (PGME) at the University of Manitoba is comprised of a variety of training programs. Programs are usually organized to be in one of three categories:

- Programs accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC).
- Programs accredited by the College of Family Physicians of Canada (CFPC).
- Other training and fellowship programs approved by the Faculty of Medicine.

Programs in the first two categories are most likely to be recognized towards obtaining a license to practice medicine. The RCPSC and CFPC provide accreditation for the training program content and evaluative processes. After the successful completion of their training, candidates are eligible to challenge the appropriate national specialty exams for their particular programs. The complete listing of these programs follows in this section under the heading Description of Programs. The specific and detailed national requirements for individual programs may be obtained from the Postgraduate Medical Education Office.

The University of Manitoba is accredited every six years by the RCPSC and the CFPC to administer the training programs, and supports all training programs in a variety of ways.

Several hospitals and healthcare facilities in Winnipeg and rural areas outside of Winnipeg are used as training sites. The main teaching sites include: Health Sciences Centre, St. Boniface General Hospital, Seven Oaks General Hospital,Misericordia Health Centre, Dauphin General Hospital, and Brandon General Hospital.

## General Regulations

Once accepted into a training program the student (now usually referred to as a "resident") must pay a registration fee to the University of Manitoba. Each resident must register every subsequent year of his or her training program in person at the PGME office.

The resident must also register with the College of Physicians and Surgeons of Manitoba so that his or her name is entered onto the Clinical Assistant Register Part 1.

The resident must obtain malpractice insurance, usually from the Canadian Medical Protective Association or its equivalent.
Residents enrolled in postgraduate residency programs are expected to conform to such new requirements as may be adopted from year to year.

Residents must apply directly to either the Royal College of Physicians and Surgeons or the College of Family Physicians of Canada for evaluation of training and for permission to sit the college examinations. Being a resident in a program does not automatically enrol the resident for such examination or certification.

## Eligibility

Graduates of Canadian medical schools are eligible for consideration of PGME training, and are required to challenge the Medical Council of Canada Qualifying Examination, Part I prior to commencing their residencies.

Generally, Canadian citizens or landed immigrants are eligible for provincial funding for residency training under the contract established with the Professional Association of Residents and Interns of Manitoba (PARIM).

International medical graduates (IMGs) are eligible to apply for admission after they have challenged the Medical Council of Canada Evaluating Examination. IMGs must be Canadian or permanent residents to be eligible to apply for postgraduate medical training. IMGs may apply for possible residency positions through the CaRMS match (see below).

Visa-trainees represent a special training category for entrance to postgraduate medical training. The visa-trainee applicant must pass the Medical Council of Canada Evaluating Examination and be sponsored by an agency which has entered into a contract with the University of Manitoba for such training.

All residents must receive remuneration from an institution recognized by the Government of Manitoba while registered in a training program in PGME.

## Criteria for Selection

Selection for admission to the various training programs will be made primarily on the basis of scholastic, personal and professional attributes as determined by academic records, personal interviews, letters of reference and in-training evaluation reports. The selection process is determined by each particular training program through a set selection process. Admission to the postgraduate training year one (PGY1) for most programs is conducted through the CaRMS PGY1 match outlined below.

## University Registration

All postgraduate trainees and fellows (not registered with the Faculty of Graduate Studies for M.Sc. or Ph.D. degrees) must be registered as postgraduate trainees in the Faculty of Medicine. The normal registration period is June 15 to July 1 each year, and is done by the Faculty PGME Office.

## Program Administration

The departments which provide PGME training programs in the Faculty of Medicine are: Anesthesia, Community Health Sciences, Family Medicine, Biochemistry and Human Genetics, Emergency Medicine, Internal Medicine, Medical Microbiology, Obstetrics, Gynecology and Reproductive Sciences, Otolaryngology, Pathology, Pediatrics and Child Health, Psychiatry, Radiology and Surgery. Some departments offer more than one program, and may also offer training in sub-specialty areas.

Each program has a Program Director and a Resident Program Committee to administer the training program. There are also program coordinators at each training site. The Program Director of each program reports both to the Department Head and the Associate Dean of PGME.

Beyond the program level, administrative matters pertaining to postgraduate residency training programs are the responsibility of the Associate Dean for PGME and the Faculty PGME Executive Committee and its subcommittees. These committees are responsible for reviewing programs, allocation of residency positions, hearing resident appeals, and other duties as outlined in the terms of reference for each committee. The committees make recommendations to both the Dean of the faculty and the Faculty Executive Committee.

## Description of Programs

Postgraduate medical education will generally follow one of two pathways leading to licensure eligibility as described below.

## College of Family Physicians of Canada Accredited Programs

The training program for family physicians offers a two-year basic program in outpatient, in-hospital and community settings. This program is composed of several streams (urban, rural, aboriginal, bilingual and DND) and the program leads to eligibility for certification with the College of Family Physicians of Canada (CFPC).

A small number of positions are also available from time to time for enhanced training within the Family Medicine Training Program for a third year of training in Emergency Medicine, Anesthesia and Palliative Care. Some of these enhanced positions may be associated with a return of service requirement. A six month training program in the Care of the Elderly is also available from time to time.

## Royal College of Physicians and Surgeons of Canada Accredited Programs

The Faculty of Medicine offers a wide range of specialty and sub-specialty programs leading to eligibility for certification with the Royal College of Physicians and Surgeons of Canada. Programs vary in length from 2-7 years of medical training.

## Primary Specialties:

Anatomical Pathology
Anesthesia
Cardiac Surgery
Community Medicine
Diagnostic Radiology
Emergency Medicine
Internal Medicine
General Surgery
Neurology (Adult)
Medical Genetics
Nuclear Medicine
Neurosurgery
Ophthalmology
Orthopedic Surgery
Obstetrics and Gynecology
Pediatrics
Plastic Surgery
Radiation Oncology
Physical Medicine and Rehabilitation
Medical Microbiology
Psychiatry

## Subspecialty Programs*

(available only with completion in a primary specialty):
Cardiology (Adult)
Critical Care Medicine
Gastroenterology
Gynecologic Oncology
Infectious Diseases (Child \& Adult)
Medical Oncology
Nephrology (Child \& Adult)
Rheumatology (Adult)
Vascular Surgery
Urology

Palliative Medicine
Clinical Immunology and Allergy (Child \& Adult)
Endocrinology and Metabolism (Adult)
Geriatric Medicine
Hematology (Child \& Adult)
Maternal and Fetal Medicine
Neonatal-Perinatal Medicine
Respiratory Medicine (Child \& Adult)
Thoracic Surgery
Emergency Medicine (Child)
Developmental Pediatrics

NOTE: These programs require different primary specialty credits, and may not be offered every year at the University of Manitoba.

## Application Procedures:

All applicants for the PGY1 year of programs accredited by the RCPSC and CFPC must apply through the Canadian Residency Matching Service (CaRMS). All graduates of Canadian medical schools and international medical schools who are Canadian citizens or permanent residents and who have had no prior postgraduate medical training in Canada or the United States are eligible for the CaRMS match.

Applications for positions beyond the entry PGY1 year should be made at the PGME Office, 260 Brodie Centre or to Program Director for the specific program. Availability of positions will vary from year to year and are not guaranteed for any program. No resident can be accepted unless a funded position is available.

## The Canadian Resident Matching Service (CaRMS)

This matching service is an autonomous, national organization of the Association of Canadian Medical Colleges. It provides an orderly method for students to select where to pursue postgraduate medical education and for program directors to rank the applicants they wish to enroll. A second matching process (the second iteration) by CaRMS is subsequently available (after the 1st CaRMS match) to medical students not matched in the first iteration, and other medical graduates who have already received some prior postgraduate training. All information about registration and matching processes is available on the CaRMS website: www.CaRMS.ca. There are listings of all programs on their website.

## Evaluation of Residents in Postgraduate Medical Education Programs

Evaluation at all levels is based primarily on clinical performance in the patient care setting. The Program Director and the Resident Program Committee in each program are responsible for the implementation of the evaluation process in their own program. At the end of each clinical rotation or at other appropriate stages of the program, each trainee is evaluated by an in-training evaluation report appropriate to that program and training level. The evaluator(s) discusses the evaluation with the trainee and the report is forwarded to the program director. The written evaluation report should be signed by the resident to indicate that he or she has seen the report. This ongoing evaluation process may be supplemented by written examinations, oral examinations, supervised history and physical examination and by direct observation of clinical and technical skills.

When a resident receives an unsatisfactory evaluation or examination result, the program director will review the evaluation with the resident. Unsatisfactory evaluations will also be discussed in a confidential manner at the Resident Program Committee meeting. The committee will make recommendations regarding remedial training. If a subsequent remedial period is also evaluated as being unsatisfactory, the program director will contact the Associate Dean for Postgraduate Medical Education and the Probation Protocol and Procedure will be instituted. A failed probation period may result in a resident being discharged from his or her training program.

The Faculty Executive Council reserves the right to require any student to withdraw from the program of enrolment when it believes the student to be unsuited, on general considerations of scholarship, professional fitness or professional conduct for post-graduate medical education. However, the Faculty of Medicine does not have a professional unsuitability by-law. The right to require a student to withdraw on the basis of professional unsuitability may arise through the professional unsuitability by-law of the College of Physicians and Surgeons. This right prevails notwithstanding any other provision in the faculty regulations.

## Appeals

A postgraduate trainee who wishes to appeal the results of any aspect of the evaluation procedure must follow the written guidelines established by the PGME Committee and the Faculty of Medicine. These guidelines may be obtained from the PGME Office.
