| List B Electives: Honours students are required to complete a minimum of 6 credit hours; Major students must complete a minimum of 6 credit |  |
| hours from the following courses: |  |
| GEOL 2390 | Environmental Geology (3) |
| GEOL 2770 | Principles of Inorganic Geochemistry (3)L |
| GEOL 3110 | Petrogenesis of Igneous Rocks (3)L |
| GEOL 3420 | Engineering Geology (3) |
| GEOL 3440 | Structure and Metamorphism (3)L |
| GEOL 3450 | Hydrogeology (3)L |
| GEOL 3490 | Glacial Geology and Geomorphology (3)L |
| GEOL 3750 | Geology and Geophysics of the Planets (3)L |
| GEOL 3900 | Sedimentology (3)L |
| GEOL 3910 | Introduction to Field Mapping (3) |
| GEOL 4270 | Advanced Studies in Earth Sciences (3) |
| GEOL 4300 | Mineral Deposits (3)L |
| GEOL 4360 | Mineral Exploration Techniques (3)L |
| GEOL 4370 | Global Change (3) |
| GEOL 4520 | Petroleum Geology (3)L |
| GEOL 4890 | Basin Analysis (3)L |
| GEOL 4910 | Advanced Field Mapping (3) |
| GEOG 2250 | Introduction to Geographic Information Systems (3)L |
| Any List A or P not already taken, or any advanced level Geological Sciences, Physics or Mathematics courses) approved by department. |  |
| List P Electives: Honours students are required to complete a minimum of 6 credit hours; Major students must complete a minimum of 3 credit |  |
| hours from the following courses: |  |
| CHEM 2290 | Chemical Energetics and Dynamics: Macroscopic De-scriptions (3)L |
| MECH 2260 | Introduction to Fluid Mechanics (3)L |
| PHYS 2610 | Circuit Theory and Introductory Electronics (3)L |
| PHYS 2650 | Classical Mechanics 1 (3) |
| PHYS 3630 | Electro - and Magnetostatic Theory (3) |
| PHYS 3670 | Classical Thermodynamics (3) |
| Or alternate physical science course(s) approved by department. |  |

### 8.6 B.Sc. Geological Sciences (General) Program Chart

| 8.6 B.Sc. Geological Sciences (General) |  |
| :---: | :---: |
| UNIVERSITY 1 | YEAR $2 \times$ YEAR 3 |
| GENERAL 90 CREDIT HOURS |  |
| GEOL $1340^{1}$ (C) plus one of GEOL 1400, GEOL 1410, or GEOL 1420 <br> A minimum grade of ' C ' on 6 credit | GEOL $2540^{2}$ plus a further 21 credit hours in Geological Sciences courses numbered at the 2000-level or above |

hours from a second department or
program for a minor ${ }^{3}$
Meet any University 1 requirements ${ }^{5}$
A further 12 credit hours for the minor ${ }^{4}$

It is recommended that students complete the M and W course in University 1 or Year 2.

## MINOR GEOLOGICAL SCIENCES 18 CREDIT HOURS

GEOL 1340 and one of GEOL 1400, GEOL 1410, or GEOL 1420

## Notes:

${ }^{1}$ Students who have GEOL 1440 ( 007.144 ) or the former 007.124 should consult with the department. At the discretion of the department, GEOL 1440 (007.144) or 007.124 may be permitted in lieu of GEOL 1340 for entry.
One of GEOL 1400, GEOL 1410, or GEOL 1420 is highly recommended to be taken in Year 1, but will not be considered when assessing entrance requirements to the program. If this requirement is not fulfiled in Year 1, it must be completed by the end of Year 2.
${ }^{2}$ GEOL 2500 may be used in lieu of GEOL 2540. Manitoba 40 S Chemistry, CHEM 0090 or equivalent is a prerequisite for GEOL 2540 and GEOL 2500. CHEM 1300 is highly recommended and should be taken in U1.
${ }^{3}$ Students should determine their minor prior to the end of the Year 2 of the program.
${ }^{4}$ A minor will normally correspond to a Minor as outlined in a program chart for a specific department or program, e.g. refer to program charts for departments in the Clayton H. Riddell Faculty of Environment, Earth, and Resources, or in the Faculty of Arts, or in the Faculty of Science
${ }^{5}$ Any U1 requirements not met in Year 1 must be completed before graduation.
NOTE:

- To fulfil prerequisite requirements, a grade of ' $C$ ' must be achieved in any course stipulated as prerequisite to a further course in Geological Sciences.
- All courses are not offered every year. The course schedule for the current academic term is available from the Class Schedule
- Students registering in certain courses may be required to pay a portion of the costs associated with field trips. For details, contact the department general office.
Equivalent courses offered through Université de Saint- Boniface may be used in lieu of the specified courses identified in the degree program chart. Université de Saint-Boniface courses end in the number '1' (e.g. GEOG 1281).

### 8.7 Environment, Earth, and Resources 1000 Level

EER 1000 Earth: A User's Guide Cr.Hrs. 3
This course will present a multi-disciplinary introduction to the Planet Earth as both the source of essential resources and as the site of resulting negative impacts. Focus in the course will be provided by addressing important and current topics, case studies, and concepts that the well-educated citizen of the Earth should understand and will include
natural and human-induced processes within a broad range of spatial and temporal scales.

### 8.8 Geological Sciences - 1000 Level

GEOL 1340 The Dynamic Earth Cr.Hrs. 3
(Lab Required) (Formerly 007.134) An introduction to dynamics of the Earth's interior and surface that created the environment in which life evolved and that continue to change the world in which people now live. Taught with GEOL 2250. Not to be held with (GEOL 1440 or 007.144 ) or GEOL 2250 (007.225) or (007.123) or (007.124).
Recommended for students intending to proceed in further courses in the Geological Sciences.

GEOL 1400 Time-Trekker's Travelog: Our Evolving Earth Cr.Hrs. 3

Take a trip across billions of years, as we explore awesome times in the evolution of our planet and its life -- from dust to us! Not to be held with (GEOL 1350 or 007.135 or 007.123).

GEOL 1410 Natural Disasters and Global Change Cr.Hrs. 3 Discover how and when natural disasters occur, and how to identify and recognize them. Explore the Earth processes that lead to natural disasters and global change. Not to be held with (GEOL 1360 or 007.136).

GEOL 1420 Exploring the Planets Cr.Hrs. 3
Discover the Solar System as we explore ancient ideas and modern concepts. Emphasis will be on recent space exploration and a comparison of the Earth and its neighbours. Not to be held with (GEOL 1370 or 007.137 or 007.124).

### 8.8 Geological Sciences -2000 Level

GEOL 2060 Introductory Geophysics Cr.Hrs. 3 (Lab Required) (Formerly 007.206) An introduction to geophysical exploration, Earth physics, satellite geophysics and remote sensing. Emphasis will be on quantitative modeling and will include geophysical measurements and handling of data. Prerequisites: [GEOL 1340 or (007.134), or (GEOL 1440 or 007.144), or (007.123), or (007.124) (C)], and [MATH 1300 (136.130), or MATH 1310 (136.131), or MATH 1500 (136.150), or MATH 1510 (136.151), or MATH 1520 (136.152), or MATH 1530 (136.153) (C)], and [PHYS 1020 (016.102), or PHYS 1050 (016.105) (C)], or permission
of department head.
GEOL 2250 Geology for Engineers Cr.Hrs. 4 (Lab Required) (Formerly 007.225) Principles of physical geology; materials in processes in geology; classification of igneous, metamorphic, and sedimentary rocks; elementary geological and geophysical surveying techniques; geological hazards, volcanism, earthquakes, landsliding, processes of weathering, transportation and geomorphology. For
Engineering students only. Not to be held with GEOL 1340 (007.134), or (GEOL 1440 or 007.144), or (007.123), or (007.124).

GEOL 2390 Environmental Geology Cr.Hrs. 3 (Formerly 007.239) Examination of geological processes and material as they interact with human activities, environmental planning, and management. Also available by correspondence. Prerequisite: university geology or GEOG 1290 or GEOG 1291 (053.129) (C), or (GEOG 1200) or GEOG 1201 (053.120) (C), or permission of department head.

GEOL 2440 Structural Geology 1 Cr.Hrs. 3 (Lab Required) (Formerly 007.244) Elementary mechanical principles of rock deformation, brittle and continuous deformation, geometry of faults, folds, joints, cleavage, lineations. Descriptive geometric and stereonet solution to structural geology problems, cross sections, structural contour maps. Prerequisite: GEOL 1340 (007.134) (C), or (GEOL 1440 or 007.144 ) (C), or (007.123) (C), or (007.124) (C).

GEOL 2500 Introduction to Mineralogy Cr.Hrs. 3 (Lab Required) (Formerly 007.250) An introduction to the chemistry, physics and classification of minerals. Brief, systematic description of about 200 of the most important minerals. Laboratory: hand specimen identification. For Major and Honours Geology students only. Entry to other students would be after consultation with the department and by permission. Not to be held with GEOL 2540 or (007.207) or (007.262). Prerequisites: (40S Chemistry or CHEM 0900 (002.090) (Pass)), and (GEOL 1340 (007.134) (C), or (GEOL 1440 or 007.144$)(C)$, or $(007.123)(C)$, or (007.124) (C), or (007.132) (C), or (007.133) (C)), or permission of department head. CHEM 1300 (002.130) is highly recommended. This course is intended for Major or Honours Geology students.

GEOL 2520 Igneous and Metamorphic Petrology Cr.Hrs. 3 (Lab Required) (Formerly 007.252) The classification, occurrence and origin of igneous and metamorphic rocks. The study and identification of rocks using hand specimens and thin sections. Prerequisites: (GEOL 2500 (007.250) (C) and GEOL 2800 (C), or (007.260)(C)), or GEOL 2540 (C).

GEOL 2530 Introductory Sedimentary Petrology and Stratigraphy Cr.Hrs. 3
(Lab Required) (Formerly 007.253) An introduction to sedimentary deposits and principles of stratigraphic analysis. Occurrence, classification and origin of sedimentary deposits. Facies concept, stratigraphic classification and correlation. Prerequisites: (GEOL 2500 (007.250) (C) and GEOL 2800 (C), or (007.260) (C)), or GEOL 2540 (C).

GEOL 2540 Introductory Mineralogy with Essential of Mineral Optics Cr.Hrs. 3
(Lab Required) An introduction to the chemical composition,
crystal structure, physical and optical properties of the most common minerals. Discussion of the occurrence of minerals in nature. Laboratory: Identification of minerals in hand specimens and thin sections. Not intended for students in Major or Honours Geology programs. Not to be held with GEOL 2500 (007.250). Prerequisites: (40S Chemistry or CHEM 0900 (002.090) (Pass) or equivalent), and (GEOL 1340 (007.134) (C), or (GEOL 1440 or 007.144 ) (C), or (007.123) (C), or (007.124) (C)), or permission of department head. CHEM 1300 (002.130) is highly recommended.

GEOL 2570 Energy and Mineral Resources Cr.Hrs. 3 (Formerly 007.257) An introduction to the geological factors and processes responsible for the origin, concentration and distribution of fuels, geothermal resources, metallic and nonmetallic minerals. Available by correspondence only. Not for credit in a Major or Honours program in Geological Sciences. Prerequisite: Any university-level Geology course, or permission of department head.

GEOL 2770 Principles of Inorganic Geochemistry Cr.Hrs. 3 (Lab Required) (Formerly 007.277) The cosmic abundance of the elements, nucleosynthesis, geological differentiation of the elements; chemical petrology of igneous, metamorphic and sedimentary rocks. An introduction to aqueous and lowtemperature geochemistry. Prerequisite: GEOL 2500 (007.250) (C), or GEOL 2540 (C). Prerequisite or Concurrent Requirement: CHEM 1300 (002.130).

GEOL 2800 Optics and Spectroscopy of Minerals Cr.Hrs. 3 (Lab Required) Use of the petrographic microscope; microscopic recognition of common rock-forming minerals; introduction to spectroscopic techniques in geosciences (including optical, vibrational and luminescence techniques). Not to be held with (007.260). Prerequisite or Corequisite: GEOL 2500 (007.250) (C), or permission of department head.

### 8.8 Geological Sciences -3000 Level

GEOL 3110 Petrogenesis of Igneous Rocks Cr.Hrs. 3 (Lab Required) (Formerly 007.311) Crystallization processes in magma and resultant textures; physical, chemical, and kinetic processes of magmatic systems. Prerequisites: (GEOL 2520 (007.252) (C)), and (GEOL 2770 (007.277) (C)).

GEOL 3130 Communication Methods in the Geological Sciences Cr.Hrs. 3
(Lab Required) (Formerly 007.313) Practice in oral and written description of geologic subjects; tools of library and database research; manuscript organization; abstract writing; computer-aided table, figure, and slide preparation. Prerequisites: (GEOL 2500 (007.250) (C)), and (GEOL 2440 (007.244) (C)). This course is for students in the Honours and Major Geological Sciences programs only.

GEOL 3140 Gemology Cr.Hrs. 3
(Lab Required) (Formerly 007.314) An introduction to the scientific study of natural and synthetic gem materials, methods of their identification and principles of gemstone appraisals. Laboratory: identification of gemstones using optical methods. Prerequisites: (GEOL 2500 (007.250) (C)), and (GEOL 2800 (C), or (007.260) (C), or GEOL 2540 (C)).

GEOL 3310 Paleontology Cr.Hrs. 3
(Lab Required) (Formerly 007.331) The study of fossils: invertebrate paleontology, with an introduction to paleontologic principles, vertebrate paleontology, and paleobotany. Prerequisite: GEOL 1340 (007.134) (C), or (GEOL 1440 or 007.144 (C), or (007.123) (C), or (007.124) (C), or permission of department head.

GEOL 3420 Engineering Geology Cr.Hrs. 3 (Formerly 007.342) Engineering properties of rocks, laboratory testing and site investigations in engineering geology. Rocks as construction materials, engineering geology of tunnels, bridges, dams, reservoirs, shorelines, sanitary landfills, landslides, seismic risk areas, etc. Prerequisites: (GEOL 2440 (007.244) (C)), and (GEOL 2520 (007.252) (C)), and (GEOL 2530 (007.253) (C)).

GEOL 3440 Structure and Metamorphism Cr.Hrs. 3 (Lab Required) Structural and metamorphic geology, links between deformation and metamorphism, and the application of pressure-temperature and time paths to study metamorphic equilibria. Not to be held with (GEOL 3290 or 007.329). Prerequisities: GEOL 2440, and GEOL 2520, and GEOL 3910, or permission of department head.

GEOL 3450 Hydrogeology Cr.Hrs. 3
(Lab required) The hydrologic cycle and basic hydrologic processes; properties of aquifers and principles of groundwater flow; well hydraulics and groundwater resource evaluation; regional groundwater flow and subsurface geology; and basic chemical hydrogeology. Not to be held with CIVL 4250 . Prerequisites: (MATH 1500 or MATH 1510 (C)), and (PHYS 1020 or PHYS 1050 (C)), and CHEM 1300 (C), and (GEOL 2060 or GEOG 2310 (C)), and GEOL 2530 (C).

GEOL 3490 Glacial Geology and Geomorphology Cr.Hrs. 3 (Lab Required) (Formerly 007.349) Principles of landform development with emphasis on glacial deposition. Aerial photo and map interpretation in lab. Not to be held with GEOG 3580 (053.358). Prerequisite: GEOL 2530 (007.253) (C).

GEOL 3740 Exploration Seismology Cr.Hrs. 3 (Lab Required) (Formerly 007.374) Collection of seismic data (land and sea); simple elastic wave theory; geometry of refraction and reflection seismology; rock velocity determination; seismic noise and signal; data corrections; data enhancement techniques; representation of data; survey procedures. Prerequisites: (GEOL 2060 (007.206) (C)), and (MATH 1500 (136.150) (C), or MATH 1510 (136.151) (C), or MATH 1520 (136.152) (C), or MATH 1530 (136.153) (C), or MATH 1690 (136.169) (C)).

GEOL 3750 Geology and Geophysics of the
Planets Cr.Hrs. 3
(Lab Required) (Formerly 007.375) Physical and chemical nature of the inner and outer planets and their satellites, asteroids and meteorites. The application of geophysical, geochemical and petrological techniques to planetology; remote sensing study of geological features of planetary surfaces and atmospheres. Prerequisite: GEOL 2060 (007.206) (C), or permission of department head.

GEOL 3810 Applied Geophysics Cr.Hrs. 3
(Lab Required) (Formerly 007.381) The application of geophysical methods including gravity, magnetics, seismic
reflection and refraction, electrical and electromagnetics methods in exploration, and environmental and engineering problems. Prerequisite: GEOL 2060 (007.206) (C).

GEOL 3900 Sedimentology Cr.Hrs. 3
(Lab Required) (Formerly 007.390) The study of depositional environments of sedimentary rocks. Facies analysis and modeling of sedimentary deposits. Prerequisite: GEOL 2530 (007.253) (C).

GEOL 3910 Introduction to Field Mapping Cr.Hrs. 3 (Formerly 007.391) Twelve day course introducing field mapping techniques including field navigation and basic field interpretations. Students are responsible for costs of room and board during the field course. Offered in the Summer term. Not to be held with (007.449). Prerequisites: (GEOL 2440 or 007.244)(C)), and (GEOL 2520 (007.252)(C)), and (GEOL 2530 (007.253)(C)), and permission of department head.

### 8.8 Geological Sciences -4000 Level

GEOL 4250 Theory and Application of Geophysical Inversion Methods Cr.Hrs. 3
(Lab Required) (Formerly 007.425) Introduction to generalized and linear/non-linear inversion theory. Inversion techniques for the potential field, electrical and seismic data will be discussed. Application to global problems will also be discussed. Prerequisites:(GEOL 2060 (007.206) (C)), and(MATH 2100 (136.210) (C), or MATH 1300 (136.130) (C), or MATH 1310 (136.131) (C)).

GEOL 4260 Applied Geophysics Field Course Cr.Hrs. 3 (Formerly 007.426) One and one-half weeks field instruction in the planning and execution of geophysical surveys and the use of portable geophysical instruments. Taught with the first half of GEOL 4740 (007.474). Not to be held with GEOL 4740 (007.474). Prerequisites: GEOL 3810 (007.381 or 007.380 ) (C), and permission of department head.
gEOL 4270 Advanced Studies in Earth Sciences Cr.Hrs. 3 (Formerly 007.427) Advanced study in a selected subject in Earth sciences. Prerequisite: Permission of department head.

GEOL 4280 Instrumental Techniques in Geology Cr.Hrs. 3 (Lab Required) (Formerly 007.428) Lecture and laboratory course covering the application of microbeam, mass spectrometer, diffraction and wet geochemical analytical techniques in mineralogy and geochemistry. Includes coverage of ICP, PIXE, powder and single crystal diffraction and electron microprobe analysis. Prerequisites: (GEOL 2520 (007.252) (C)), and (GEOL 2530 (007.253) (C)), and (GEOL 2770 (007.277) (C)).

GEOL 4300 Mineral Deposits Cr.Hrs. 3
(Lab Required) (Formerly 007.430) The tectonic setting and deformational and structural nature of ore deposits. The physics and chemistry of ore deposition and ore bearing fluids. The mineralogical, textural and environmental constraints on resource exploitation. Prerequisites: (GEOL 3110 (007.311) (C)), and (GEOL 3900 (007.390) (C)).

GEOL 4310 Paleontologic Principles Cr.Hrs. 3 (Lab Required) (Formerly 007.431) Interpretation of Earth history using fossils: topics in taxonomy, functional
morphology, paleoecology, evolution, biostratigraphy, and biogeography. Prerequisite: GEOL 3310 (007.331) (C), or permission of department head.

GEOL 4320 Physics of the Earth: Seismology and Heat Flow Cr.Hrs. 3
(Formerly 007.432 ) Seismology and the structure, physical properties and equations of state of the Earth's interior; thermal constitution and the history of the Earth.
Prerequisites: (GEOL 2060 (007.206) (C)), and (PHYS 2390 (C), and PHYS 2490 (C), or (016.237) (C)).

GEOL 4330 Physics of the Earth: Geomagnetism and Gravity Cr.Hrs. 3
(Formerly 007.433) Geomagnetism and geoelectricity; paleomagnetism; figure, rotation and gravity of the Earth. Prerequisites: (GEOL 2060 (007.206) (C)), and (PHYS 2390 (C), and PHYS 2490 (C), or (016.237) (C)).

GEOL 4360 Mineral Exploration Techniques Cr.Hrs. 3 (Lab Required) The course will examine methodologies used in exploration and evaluation of Canadian mineral deposits and case studies illustrating the application of these methods. Prerequisite: GEOL 3910 (C), or GEOL 3810 (C). Recommended pre- or co-requisite: GEOL 4300.

GEOL 4370 Global Change Cr.Hrs. 3
(Formerly 007.437) Examination of the major processes controlling global change through time. The causes, magnitude, and periodicity of changes in the geological record resulting from the variability and interaction of continents, oceans, atmospheres, climate, Earth-sun relationships, and ice sheets, with an emphasis on paleoclimate. Prerequisite: GEOL 3900 (007.390) (C). Prerequisite or Concurrent Requirement: GEOL 3490 (007.349).

GEOL 4520 Petroleum Geology Cr.Hrs. 3 (Lab Required) (Formerly 007.452) A study of the physical properties, origins and maturation, migration, and accumulation of petroleum products. Prerequisite: GEOL 3900 (007.390) (C).

GEOL 4670 Global Tectonics Cr.Hrs. 3 (Lab Required) (Formerly 007.467) The structure and properties of, and physical processes taking place within, the Earth's interior. Continental cratons and their margins, orogenic belts, structural and petrologic features of the ocean basins, modern diastrophism, global tectonic theories. Prerequisites: (GEOL 3440 or (GEOL 3290) (C)), or GEOL 4320 (C), or permission of department head.

GEOL 4740 Geophysics Field Course Cr.Hrs. 6 (Formerly 007.474) Three weeks of making geophysical surveys. Starts immediately following April examinations. Maps and reports to be submitted at the end of the threeweek period. Students are responsible for costs of room and board during the field course. Offered in alternate Summer terms. Not to be held with GEOL 4260 (007.426). Prerequisites: GEOL 3810 ( 007.381 or 007.380 ) (C), and permission of department head.

GEOL 4810 Geophysical Data Analysis Cr.Hrs. 3 (Formerly 007.481) The theory and application of spectral methods in geophysics. The use of Fourier Transforms, convolution, power spectra, coherence, transfer functions, covariance, correlation and filtering. Prerequisite: PHYS

2490 or (016.237) (C), or permission of department head.
GEOL 4870 Honours Thesis Cr.Hrs. 6
(Formerly 007.487) A thesis based on a research project conducted by a fourth-year Honours student in Geology or Geophysics. Selection of a project and supervisor to be arranged prior to September 30 and submitted in writing to the department head. Consult with the department for submission deadlines. Not to be held with (007.495) or (007.496). Prerequisite: Permission of department head.

GEOL 4890 Basin Analysis Cr.Hrs 3
(Lab Required) (Formerly 007.489) The study of major sedimentary basins. Qualitative and quantitative aspects of basin origin, classification, evolution, fluid content and diagenesis, and sedimentary facies architecture. Prerequisite: GEOL 4520 (007.452) (C).

GEOL 4910 Advanced Field Mapping Cr.Hrs. 3 (Formerly 007.491) Twelve-day course developing field mapping techniques including independent mapping and interpretation and synthesis in complex geological terrains. Students are responsible for costs of room and board during the field course. Offered in the Summer term. Not to be held with (007.449). Prerequisites: (GEOL 3440 or (GEOL 3290) (C)), and GEOL 3910 (C), and permission of department head.

GEOL 4920 Technical Report Cr.Hrs. 3
(Formerly 007.492) A technical report based on a geoscience research project conducted by a fourth year Major student in Geology or Geophysics. Not to be held with GEOL 4870 ( 007.487 ). Normally this course is available after completion of Year 3 requirements in Geology or Geophysics Major program. Prerequisite: Permission of department head.

SECTION 1: Extended Education

## SECTION 2: Program Areas

2.1 Access/Aboriginal Focus Programs
2.2 Continuing Education Programs
2.3 Distance and Online Education
2.4 English Language Studies and International Programs
2.5 General Studies
2.6 Inter-Universities North
2.7 Military Support Office
2.8 Off Campus Study
2.9 Summer Session

## SECTION 3: Certificate/Diploma Programs

3.1 Agriculture
3.2 Education
3.3 General Management
3.4 Health and Social Services
3.5 Human Ecology
3.6 Management/Professional Institute Affiliation

## SECTION 1: Extended Education

Extended Education provides a central focus for adult, distance, mature and summer continuing education in the university and undertakes planning and general administration for these programs and services. Insofar as possible, the university accepts the principle of parity of accessibility to its services in all areas of the province regardless of economic, geographic, physical, or social disadvantage.

Extended Education coordinates a wide range of programs through which degree courses and non-degree or certificate courses are offered. Degree courses are drawn from the offerings of various faculties and schools. Students must apply to, be admitted to, and register in a particular faculty or school to receive credit towards a degree.

## SECTION 2: Program Areas <br> 2.1 Access/Aboriginal Focus Programs,

Area Director: Diedre Desmarais
General Office: 188 Extended Education Complex
Telephone: 204-474-8000

## Aboriginal Focus Programs

The Aboriginal Focus Programs area of Extended Education offers a range of programs that are designed to respond to the continuing education needs and concerns of Aboriginal people. The mission of the area is to create paths of choice in post-secondary education that are based on Indigenous worldviews and developed through partnerships with Indigenous Peoples and communities.

AFP offers certificate and diploma programs as well as degree programs through cooperative arrangements with Aboriginal stakeholders and faculties of The University of Manitoba. Programs are offered in a central location, as inhouse training to staff of an organization, or as communitybased programs. Programs are offered as 'open enrolment' or as block-funded cohort programs through an arrangement with an employer or sponsor. Delivery methodology can be part-time or full-time study, and can incorporate technologybased delivery where technology access permits. Aboriginal organizations that identify a need for specific post-secondary or adult education not currently available may be interested in knowing that AFP has the capacity to develop new programs to meet their needs. The following are programs currently being offered:

| Degree/Diplomas | Years to <br> Complete | Total Credit Hours |
| :--- | :--- | :--- |

## Aboriginal Child and Family Services Diploma

This off-campus program provides an opportunity for students to build their knowledge and skills base in the area of social services work. It would be of interest to individuals working, or anticipating future employment, in the Aboriginal Child Welfare field.

## Aboriginal Counselling Skills Certificate

This foundation program gives individuals in the helping professions, who are employed by First Nation and/or Aboriginal social service agencies, knowledge and skills in how to provide culturally appropriate counselling services to individuals and families. The Faculty of Social Work offers graduates 3 allocated and 6 unallocated hours of credit.

## Aboriginal Environmental Stewardship Diploma

This diploma is a partnership program between Aboriginal focus Programs and the University of Manitoba's Clayton H. Riddell Faculty of Environment, Earth and Resources, the Faculty of Arts; Department of Native Studies and Building Environmental Aboriginal Human Resources (BEAHR). This two-year diploma will address the assessment, monitoring, protection, management, sustainability, legal requirements and current issues in the environmental field. All courses include both Aboriginal and western world views on the environment. BEAHR will coordinate work experience for students enrolled in this diploma making it easier to obtain employment upon graduation.

## Child Sexual Abuse Intervention and Treatment Certificate

The disclosure of sexual abuse, as in the residential school experience, has highlighted the need for counsellors with specialised expertise. The CSAIT program builds on prior training and experience in counselling.

## Health Career Transition Year

This program enables students to gain the knowledge, skills and confidence needed to successfully pursue a professional health career. Students take a combination of preparatory and degree credit courses (21-24 credits) over one year. Tutorial, personal, financial and Aboriginal cultural supports are available to students.

This degree credit program provides a professional development opportunity in community wellness for Aboriginal health and wellness service workers and those wishing to enter the field. The program is offered through a partnership between The University of Manitoba and the Manitoba Community Wellness Working Group. Each course in the program incorporates an indigenous wellness perspective. The diploma is designed to meet the educational needs for generic and specialized fields of practice (e.g., addictions).

## Special Education Educational Assistant Certificate

This program provides culturally relevant accredited training for teacher assistants who work with special needs children under the direction of classroom and/or resource teachers.

## Transition Year (18 to 24 credit hours)

The off-campus Transition Year is designed to facilitate the successful transition of students from their community to fulltime post-secondary study. Students take a combination of preparatory and degree credit courses (21-24 credits) over one year. Emphasis is on building students' academic and personal skills through specific support to students such as expanded instruction, tutorial support and orientations to the expectations of post-secondary education programs.

## Access Programs

General Office: $\mathbf{2 2 0}$ Migizii Agamik, 45 Currie Place
Telephone: 2044748000
umanitoba.ca/extended/access
University of Manitoba Access Program (UMAP)
In cooperation with the Province of Manitoba, the University of Manitoba Access Program (UMAP) facilitates university studies at the degree level for persons who traditionally have not had the opportunity for such experience because of social, economic and cultural reasons, lack of formal education or residence in remote areas. Preference will be given to Aboriginal Manitobans (Status, Non-status, Metis, Inuit). Students in this program are provided with academic and personal supports. Financial assistance may be available. For information, call 474-8000 or, within Manitoba, 1-800-432-1960, extension 8000.

Health Careers Access Program (HCAP)

## Aboriginal Community Wellness Diploma

University of Manitoba

This program is designed to prepare Manitoban Aboriginal persons (Status, Non-Status, Metis, Inuit) for entry to the health professional programs such as Medicine, Dentistry, Dental Hygiene, Pharmacy, Medical Rehabilitation (Occupational, Physical and Respiratory Therapy) and Nursing. Through the cooperation of the Province of Manitoba and the University of Manitoba, students in this program are provided with academic and personal supports. Financial assistance may be available. For information call 474-8000 or, within Manitoba, 1-800-432-1960, extension 8000.

## Professional Health Program (PHP)

This program is designed to support Aboriginal persons (Status, Non-Status, Metis, Inuit) in any of the professional health programs. Housed within the Centre for Aboriginal Health Education at the Bannatyne Campus this program provides academic and personal supports. Limited financial assistance may be available. For information call 474-8000 or, within Manitoba, 1-800-432-1960, extension 8000.

## Education Access Program (EAP)

The Education Access Program (EAP) is a partnership between the Faculty of Education and the Access Program. EAP provides students with supports to complete a Bachelor of Education (B.Ed.) degree at the University of Manitoba. Because the Bachelor of Education degree is an afterdegree program, EAP students must complete their first degree with Access. For information call 474-8000 or, within Manitoba, 1-800-432-1960 extension 8000.

### 2.2 Continuing Education Programs

Director: Atlanta Sloane-Seale
General Office: 188 Extended Education Complex Telephone: 2044748036

A variety of certificate programs, seminars, and short courses are offered for professional and personal development in general management, health and social services, adult education and training, accounting, municipal management and horticulture.

## Certificate Programs

Extended Education offers a range of professional continuing education certificate programs, in cooperation with agencies in the community and faculties and schools on campus. These programs vary in length, comprehensiveness, and level of certification. Most certificate programs are offered annually. See Section 4.0 below for a listing of certificate programs.

In addition to advising on existing programs, the staff of Extended Education will consult with individuals, groups, and organizations (profit and non-profit) who have an interest in or desire to develop learning experiences specific to their needs.

Copies of the current calendars of Continuing Education Programs are available by calling (204) 4748016 or toll-free in Canada 18882167011 (extension 8016) or visit our website: umanitoba.ca/extended/coned

### 2.3 Distance and Online Education

Director: Jonathan Dyck
General Office: 188D Extended Education Complex
Telephone: 204-474-8012
Website: umanitoba.ca/distance
Each year, over 8,000 students complete degree credit courses offered by Distance and Online Education. Our courses are open to all University of Manitoba (UM) students and provide an opportunity to complete courses without attending scheduled classes. If you require a flexible study schedule, would like to study year round, or simply appreciate the convenience of studying at home, Distance and Online Education provides you the opportunity to complete your degree. Many students choose to enroll in on-campus and Distance and Online Education courses at the same time.

Over 140 degree credit courses are offered from the following schools/faculties: Agricultural and Food Sciences; Art; Arts; Education; Engineering; Clayton H. Riddell Environment, Earth and Resources; Human Ecology; Kinesiology and Recreation Management; Science; and Social Work. Degree programs offered include a Bachelor of Arts, Bachelor of Arts in Geography, Bachelor of Social Work and Post-Baccalaureate Diploma in Education.

All Distance and Online Education courses are offered online. Course features include: online course materials; audio/video resources; chat, student lounge and e-mail; and online assignment submission. For further information regarding studying online, please see
umanitoba.ca/distance.
To request a copy of the 2012-13 Distance and Online Education course calendar, call 474-8012 (toll free in Canada at 1-888-216-7011, ext. 8012), visit umanitoba.ca/distance, or stop by Distance and Online Education at 188D Extended Education Complex.

### 2.4 English Language Studies and International Programs

Director: Stephanie Olson
General Office: 188 Extended Education Complex
Telephone: 2044748738
English Language Studies provides opportunities for language learners to gain proficiency in additional languages. The area offers conversational language courses in French, Spanish, German, Japanese, Mandarin, Ukrainian, Korean and Arabic for beginner to advanced level students. Courses are part-time; sessions run from September to December, January to April and April to June.

The Area also offers part-time and full-time iB TOEFL and IELTS preparation courses several times a year and is an official iB TOEFL testing site.

Eight levels of Intensive English Program sessions ranging in lengths from four weeks to one year, and consisting of 25 hours of classroom instruction per week are offered throughout the year. Academic instruction, and socio-cultural activities constitute the basis of this program. Students are housed in residence on campus or with a homestay family. Similar programs are also offered for groups coming from Mexico, Japan and Korea. At our U of M Tokyo Campus, several Intensive English Program instructors spend the month of March teaching English to students from Sagami Women's University. At its downtown Winnipeg campus, English Language Studies offers Adult EAL classes for Newcomers.

In collaboration with the Faculty of Education, a Certificate in Teaching English as a Second Language (CTESL) is offered to meet the needs of individuals who are pursuing a teaching career in ESL. The Certificate program consists of five 40hour courses, including four required courses and one approved elective course. Courses can be taken full-time or part-time.

### 2.5 General Studies

Director: Bill Kops
General Office: 188 Extended Education Complex
Telephone: 204-474-8330 or 474-7154
General Studies provides opportunities for students to take credit courses at the University of Manitoba without being enrolled in a degree program. Our students come from all walks of life: professionals developing their careers; students satisfying entrance requirements to professional and other faculties; seniors enriching their lives; students visiting from other institutions; individuals exploring a career change. Whatever your educational interests, General Studies is a great option for study at the University of Manitoba. Courses are available in the Fall and Winter terms, Summer Session, through Distance and Online Education and Off-Campus Study.

## Entrance Requirements to General Studies

Students may be admitted in one of the following categories: Auditing Student; Mature Student (Canadian Military only); Special Student; Visiting Student. Detailed information on the entrance requirements and a description of the student categories can be found in the Admissions section of this Calendar or by contacting the General Studies office.

## Student Services

A Student advisor is available to assist students with course and program planning, and to provide admission and registration information on a drop-in basis Monday through Friday - 9:00 am to 3:00 pm, 188 Extended Education.

For information call (204) 4748330 or 4747154 , or toll-free in Canada, 18882167011 (extension 7154 or 8330 ) or visit our website at umanitoba.ca/extended/general studies.

### 2.6 Inter-Universities North Program

In cooperation with Brandon University and the University of Winnipeg, courses in Arts, Science and Education are offered in communities north of the 53rd parallel. Telephone: 18004420462.

### 2.7 Military Support Office

General Office: 188 Extended Education Complex Telephone: 2044748006

The Military Support Office is designed to assist CF personnel and their immediate family members in the pursuit of a university education. The office has experienced staff to assist in overcoming the problems which can result from the frequent moves and deployments experienced by members of the Defence family.

Through this unique office, the University of Manitoba takes into account the difficulty which extensive mobility can create in satisfying the residency requirement for graduation. Recognition is given for a wide range of military training, academic counselling services are provided by highly qualified student advisors, and provision is made for academic and financial relief when military duties interrupt studies.

Courses are available through Distance and Online Education or on campus, either part-time or full-time, and a Mature Student entry program is also offered.

Call toll-free within North America 1800850 6166, or e-mail military@umanitoba.ca. The MSO website is at umanitoba.ca/extended/ military.

### 2.8 Off-Campus Study

Director: Bill Kops
General Office: 188 Extended Education Complex Telephone: 2044748019

Off-Campus Study is designed to improve accessibility and success in university for students. A flexible and convenient alternative, Off-Campus Study allows students to take degree courses at sites within Winnipeg other than the Fort Garry Campus. Courses are taught by University of Manitoba instructors in the evenings and on weekends. Courses in High School program allow Senior 4 students to take university courses while still in high school and receive university credit.

For information call (204) 4748019 , or toll-free in Canada 1 8882167011 (extension 8019) or e-mail aclaman@ms.umanitoba.ca, or visit our website at umanitoba.ca/extended/off-campus

### 2.9 Summer Session,

Director: Bill Kops
General Office: 188 Extended Education Complex Telephone: 2044746963

Summer Session offers a wide range of courses in the spring and summer, including feature programs, summer institutes, travel/study, off-campus and distance and online courses. Summer Session provides an opportunity to accelerate degree completion, ease course loads in the fall and winter, or catch up on missed courses.

May and June Day courses begin in early May and continue to late June. Most classes meet for two hours each day either in the morning or early afternoon.

May to August Evening courses run from early May to early August. Classes are generally scheduled two evenings each week and meet for two and one-half hours.

July and August Day courses begin in early July and continue to late August. Most classes meet for two hours each day either in the morning or early afternoon.

For information about Summer Session, call (204) 474-6963 or (204) 474-8008, or toll-free in Canada 18882167011 (extension 6963) or e-mail summer@umanitoba.ca, or go to umanitoba.ca/summer.

## SECTION 3: Certificate/Diploma Programs <br> 3.1 Agriculture, <br> Prairie Horticulture

The purpose of this program is to focus on horticulture specific to the prairies, especially with respect to production and market conditions, climate, crop type, pests, disease, and other relevant prairie topics. Offered by independent study, part-time study.

### 3.2 Education, <br> Adult and Continuing Education

To develop and enrich the knowledge and level of competence of those practicing in the field of adult education. Offered by face-to-face, blended and distance study. Part-time study. Some courses are cross-listed as degree credit in the Faculty of Education.

## Teaching English As a Second Language

The Certificate Program objectives are to meet local, national, as well as international needs of teacher development in ESL and EFL. The program provides a focused initial preparation for teaching ESL. Upon successful completion of the program, CTESL participants will be able to: Discuss the theoretical basis of second language
instruction; demonstrate a variety of effective ESL teaching techniques; and explain, in pedagogically relevant ways, the linguistic structures of the English language.

### 3.3 General Management, Applied Management

This certificate is designed to provide individuals in various work environments with the opportunity to combine management studies with applications relevant to their own careers and industries. Registrants select a particular specialization appropriate to their own development interests. Specializations are available in: police service, records management, retail management, organizational effectiveness and utilities management. Part-time study over two to three years.

## Financial \& Management Accounting

This certificate program is designed to provide an intermediate level accounting education to anyone working with accounting information. The program provides a solid technical and conceptual foundation in accounting processes. Courses can be applied to an accounting designation or transferred for degree credit. Part-time study, evening classes.

## Human Resource Management

Human Resource Management requires leadership, teamwork, communication and strategic planning. Our program provides these skills through seven required and one elective course which will enable you to gain more specialized knowledge. You will benefit from this program whether you have some work experience or are new to the HR field. Part-time study over three years.

## Interdisciplinary Studies

This program provides a certificate to students completing a minimum of 200 contact hours within the Continuing Education Program Area. Students must identify their learning objectives and develop a program to meet these objectives. A specialized stream offered in partnership with the Manitoba Customer Contact Association, and the Learning Technologies Centre are also offered.

## Leadership \& Management Development

This program develops leadership and management skills that can be applied immediately in the work environment.

## Municipal Administration

This certificate program provides an essential body of knowledge required to assume administrative responsibilities within small to mid-size municipalities in Manitoba. Available by independent study. Part-time study over four years.

## ACADEMIC CALENDAR

## Quality Management

This certificate program offers a management approach to the design and implementation of quality programs. Offered by independent study. Part-time study over one year.

### 3.4 Health and Social Services, Applied Behaviour Analysis

This program combines degree credit courses and supervised practicum courses to help individuals understand and practice the principles and techniques of applied behaviour analysis. Part-time study over three years.

## Applied Counselling

The ACC Program provides knowledge of the counselling process and practical counselling skills development. It is for people who are involved in direct counselling through their paid or volunteer work. Participants' varied workplaces include: health care, education, social services, government, vocation employment counsellors, managers, and other work places where counselling takes place. Part-time study over one and a half to five years. The two specialization areas are general counselling and addiction studies.

## General Case Management

This program is for individuals who want to prepare for future positions in Canada's rapidly changing health and social service sectors by gaining a general background in case management. Part-time study over three years.

## Rehabilitation Case Management

This program prepares individuals to work in rehabilitation programs (e.g., medical, social and physical services, claims management, long term care, education). Participants learn varied case management models, principles of social and physical rehabilitation and functional and psychosocial theories in rehabilitation. Part-time study over three years.

### 3.5 United Way of Winnipeg Leadership Development Certificate Program,

This program is offered in partnership with the United Way of Winnipeg and provides extensive training to sponsored executives. Full-time program for 16 weeks.

### 3.6 Management/Professional Institute Affiliations, Canadian Institute of Management Certificate Program in Management and Administration* (CIM)

To offer management training for managers and supervisors in industry, business, and government. four years part-time study.

[^3]To offer management training for new and developing midmanagers employed by the provincial government. One-year part-time study program delivered in Blended Learning format integrating face-to-face sessions with online learning.

## Purchasing Management Association of Canada* (PMAC)

The University of Manitoba participates with the PMAC in the offering the Strategic Supply Chain Management Program, a series of courses designed to develop proficiency in functional area processes and technical competencies, as well as a number of core and elective courses.

## Credit Union Institute of Canada (CUIC)*

This program provides in-depth understanding of the key competency areas in credit union business management. Individual courses.

NOTE: * Certificate awarded by an external agency.

## Distance and Online Education

## Section 1: Welcome and General Information,

 Distance and Online Education (DE) courses are open to all UM students and provide an opportunity for students to complete courses without attending classes. If you require a flexible study schedule, would like to study year round, or simply appreciate the convenience of studying at home, Distance and Online Education provides you the opportunity to complete your degree. Many students choose to enroll in on-campus and Distance and Online Education courses at the same time.Over 140 degree credit courses are offered from the following faculties/schools: Agricultural and Food Sciences; Art; Arts; Clayton H. Riddell Environment, Earth, and Resources; Education; Engineering; Human Ecology; Kinesiology and Recreation Management; Science; and Social Work. Degree programs offered by distance include a Bachelor of Arts, Bachelor of Arts in Geography, Bachelor of Social Work, and a Post-Baccalaureate Diploma in Education.

To request a copy of the 2012-13 Distance and Online Education course calendar, call 474-8012 (toll free in Canada at 1-888-216-7011, ext. 8012), visit umanitoba.ca/distance or stop by Distance and Online Education at 188D Extended Education Complex.

## Online Course Delivery

All Distance and Online Education courses are offered online. Courses are hosted by a learning management system (LMS) where you can log on to the UM web server and access your course website in a secure environment.

Course features include: online course materials; audio/video resources; chat, student lounge and e-mail; and online assignment submission. Some courses also have required online audioconferences. For further information
regarding studying online, please see umanitoba.ca/distance.

Required textbooks and/or audio/visual materials can be confirmed and ordered from the UM Book Store at umanitoba.ca/bookstore. Early registration is recommended to ensure that you receive required materials prior to the start of term.

Campus Manitoba (CMB) offers courses at a variety of locations around the province through a consortium that includes: Brandon University, the University of Manitoba, the University of Winnipeg, Université de Saint-Boniface, University College of the North, Red River College, and Assiniboine Community College. CMB is a unique program in that students receive transfer of credit for courses offered by any of the participating institutions. Courses are offered using a variety of technologies including virtual classroom software, and web-based components. Campus Manitoba courses are offered in the following locations:

## Campus Manitoba

www.campusmanitoba.com

| Altona | Cross Lake | Flin Flon | Swan River |
| :--- | :--- | :--- | :--- |
| Boissevain | Dauphin | Killarney | The Pas |
| Brandon | Deloraine | Portage la Prairie | Thompson |
| Carman | Eriksdale | Steinbach | White Bear |

For a list of course offerings and tuition fees, contact: Campus Manitoba, Brandon University, Brandon, Manitoba R7A 6A9; telephone: 204-727-9668 (toll free at 1-866-445-0063); e-mail: campus mb@brandonu.ca
http://www.campusmanitoba.ca/

## Accessing Online Courses

The technologies required for studying by DE can vary depending on the course. Some courses may require a headset and microphone for online audioconferences or access to a DVD player.

Further information regarding requirements for accessing courses can be found in the DE Course Calendar or at umanitoba.ca/distance. Specific course requirements can be found under Syllabus Available in the DE course search ("D" section numbers) in Aurora Student.

## Section 2: Registration, Initial Access Times

To determine your registration access time, please see the faculty for which you were admitted.

Fall (3 cr. hrs.)
Winter ( 3 cr . hrs.)
Fall/Winter (6 cr.hrs.)
Dist Ed Winter/Summer ( 6 cr . hrs.)
Summer (3 cr. hrs.)

## Section 3: Additional Information, 3.1 Examinations

Final exams are held in April, July, August, and December. You are expected to be available at the scheduled day and time, and should consider this when registering for courses.

Most students are able to write exams in their community; students living in Winnipeg must write at the UM Fort Garry Campus.

All course registration activities must be done using Aurora Student. You may register for DE courses and on-campus courses at the same time. It is recommended that you register for courses immediately upon your initial registration access time or immediately after the registration period opens.

The section number acts as an identifier for a specific course section. All DE section numbers are prefaced by the letter 'D', i.e. D01, D02, etc. It is important that you select the appropriate section number prior to course registration.

Please refer to the Registration System section or to umanitoba.ca/distance for registration dates and procedures. If you have questions regarding registering for DE courses, please call 474-8012 (toll free at 1-888-2167011, ext. 8012).

### 2.1 Distance and Online Education Terms

September 2012 - December 2012
January 2013 - April 2013
September 2012 - April 2013
January 2013 - July 2013
May 2013 - August 2013

### 3.2 Distance and Online Education Course Fees

For information regarding Distance and Online Education tuition fees and any additional compulsory fees (e.g., registration fee, library fee, student services fees, etc.) please refer to umanitoba.ca/registrar or call 474-9420. Undergraduate International Students are subject to an International Differential Fee; please refer to umanitoba.ca/registrar.

## Section 4: Contacting Distance and Online

## Education,

For further information and program and, go to umanitoba.ca/distance or see the Distance and Online Education Course Calendar. To obtain a copy, call (204) 474-8012 (toll-free at 1-888-216-7011, ext. 8012), or go to umanitoba.ca/distance.

For other inquiries, contact:

8:30 a.m. - 4:30 p.m. Monday to Friday
Telephone: (204) 474-8012
Canada: Toll-Free 1-888-216-7011, ext. 8012
Fax: (204) 474-7661
Email: de info@umanitoba.ca
umanitoba.ca/distance

## General Studies

## Section 1: Initial Access Times,

General Studies students registering for on-campus, distance education or online education courses may register starting in August 2012. For more information about initial access times and how to determine your specific time, please refer to the University of Manitoba home page: umanitoba.ca or access Aurora Student in July (select: Enrolment \& Academic Records, Registration, Registration Time \& Status).

## Section 2: Registration Assistance,

Welcome to General Studies (Extended Education). We encourage you to review the Admissions section for information about registration, , rules, regulations and procedures.

Please take the time to become familiar with the academic regulations and requirements of the University of Manitoba and the specific academic regulations and requirements of General Studies (below) or check the website umanitoba.ca/extended/general studies As well, you may wish to seek the advice of a General Studies Student Advisor.

General Studies Student Advisors are available to assist you with course and program planning and to provide admission and registration information on a drop-in basis or by appointment throughout the year.

Drop-in basis: Monday through Friday, 9:00 a.m. to 3:00 p.m.

## 188 Extended Education Complex

Telephone: Monday through Friday, 8:30 a.m. to 4:30 p.m. Student Advisor: Karen Nickerson (204) 474-8330
Assistant Student Advisor: Michelle Kidd (204) 474-7154
Toll free in Canada: 1-888-216-7011 (ext. 7154 or 8330)
Fax: (204) 474-7661 Email: general studies@umanitoba.ca
Web: umanitoba.ca/extended/general studies

## Section 3: Registration Information,

 3.1 InstructionsYou may register for up to a maximum of 30 credit hours in the combined Fall and Winter terms, and up to a maximum of 15 credit hours in any one term, including Summer Session.

For more information on how to register for courses using Aurora Student, check our website: www.umanitoba.extended.general studies.

### 3.2 Returning Students

If you have successfully completed 24 credit hours or more, you are eligible to apply directly to a faculty or school providing you have met that faculty or school entrance requirements. For detailed information on other faculties and schools refer to the appropriate chapter listed in this catalog or check the Admissions Office Applicant Information Bulletin for entrance requirements and deadline dates
(www.umanitoba.ca/admissions). If you need help with course selection or have any concerns about your status, please contact a General Studies Student Advisor.

### 3.3 Visiting Students

New visiting students must apply for admission. Please contact the General Studies Office for information.

Visiting students who have been admitted and registered previously in at least one course are eligible to register in a subsequent session without reapplying for admission provided: your home university has not changed since you last registered in General Studies; you have a Letter of Permission from your home university approving the selected courses in which you wish to register; and, you provide the Letter of Permission to General Studies prior to registering.

### 3.4 Auditing Students

New auditing students must apply for admission. Please contact the General Studies Office for information. Auditing students must obtain written permission from the course instructor to audit a specific course. The written permission form would then be submitted to a General Studies Student Advisor who will manually register the student for the course (with the student's written consent).

## Section 4: Information Applicable to All General Studies Students, <br> 4.1 Academic Assessment Policy

Academic Assessment gauges student success at the University. Formal academic assessment shall be done following each academic term for all General Studies students who have completed 30 credit hours or more of attempts. In order to be in "good standing" in General

Studies, a student must achieve a degree Grade Point Average (GPA) of 2.00 or greater at each assessment period. Students in "good standing" may continue in General Studies or, preferably, transfer to a target faculty.

Students who do not achieve a degree GPA of 2.00 will be placed "on probation", which will appear on the student's transcript. Once "on probation", a student will be allowed to register for another term (or terms). At each point of assessment, students "on probation" must achieve a term GPA of 2.00 in order to proceed. In order to clear probation, a student must achieve a degree GPA of 2.00. While "on probation", students are encouraged to consult the General Studies student advisor prior to registration and on a regular basis thereafter.

If a student does not succeed in achieving a term GPA of 2.00 , they will be placed on "academic suspension" for one calendar year. A student on "academic suspension" is normally not allowed to register in another faculty or school at the University of Manitoba or to attend any other postsecondary institution during the time of suspension. Following the suspension period, a student may reapply for admission to General Studies.

### 4.2 Credit Hour Policy

In an effort to assist students with academic decisions, all students who have completed 30 credit hours of study with General Studies will be required to meet with a student advisor before being allowed further registration. Until such time as the student meets with the advisor, a block will be placed on their record to prevent further registration.

### 4.3 Transferring to Other Faculties or Schools

General Studies students will need to determine the specific subject and credit hour requirements of the faculty to which they plan to apply. This information is available in this catalog or from the Application Information Bulletin under your interested target faculty on the Admissions Office website at umanitoba.ca/admissions. Students are encouraged to apply to a faculty of their choice as soon as the requirements have been satisfied.

Entry to every faculty and school requires a formal application for admission to be submitted to the Admissions Office. Admission dates and forms are available at the Admissions Office, 424 University Centre or on the Admissions Office website at umanitoba.ca/admissions, click on Apply for Admission. It is always in your best interest to seek admission or transfer to a faculty or school as early as possible.

### 4.4 Courses Available to General Studies Students

All courses in the following faculties and schools are available to General Studies students. Prerequisites may be required for some courses as specified in the :

Clayton H. Riddell Faculty of Environment, Earth, and Resources

Faculty of Agricultural and Food Sciences
Faculty of Arts

Faculty of Science
I. H. Asper School of Business

School of Art

All courses offered in the following faculties require teaching faculty written approval before registering, with the exception of courses open to all students as listed under University 1:

Faculty of Architecture<br>Faculty of Education (5000 level courses only)<br>Faculty of Engineering<br>Faculty of Human Ecology

Faculty of Kinesiology and Recreation Management

Faculty of Nursing

Faculty of Social Work (students with less than 30 credit hours)

Marcel A. Desautels Faculty of Music

## Off-Campus Study

Section 1: Initial Access Times,
You can register for Off-Campus Study and on-campus courses in the same transaction. For more information about initial access times and how to determine your specific time, please refer to the University of Manitoba home page at umanitoba.ca or please refer to the registration information in the Calendar (umanitoba.ca/calendar).

## Section 2: Registration and General Information,

A flexible and convenient alternative, Off-Campus Study allows students to take degree courses at various community sites within Winnipeg, including the $U$ of $M$ Bannatyne Campus, Vincent Massey Collegiate, Gray Academy of Jewish Education, the McLeod Adult Education Centre and the Canadian Mennonite University.

Students can register for Off-Campus Study courses on-line at umanitoba.ca. See the information in the Calendar (umanitoba.ca/calendar) for details on registration. Contact Off-Campus Study for more information on courses or for assistance concerning registration procedures. For questions regarding your academic program, contact a student advisor in your faculty or school.

### 2.1 Registration

## 

## ACADEMIC CALENDAR

It is your responsibility to be familiar with the requirements of your program and to complete the prerequisites for any courses you plan to take.

Where faculties/schools require written consent, for courses where written consent of the department head or instructor is required, you must submit the written consent to your faculty/school prior to registering.

### 2.2 Fall and Winter (September 2012 - April 2013)

Registration for all courses scheduled in Fall and Winter begins mid-July in accordance with the initial access times that apply to your faculty or school for registration as outlined in the Calendar, and continues until early September for courses beginning in September, and until mid January for courses beginning in January.

The period for late registration and registration revisions is usually from the first day of classes in September until midSeptember for all Fall and Fall/ Winter courses. A late fee will be assessed on all registrations during this period.

### 2.3 Fee Information

When you register on-line, one of the transactions you must complete is a fee assessment, which will indicate the exact amount owing and the fee payment deadline.

### 2.4 Examinations

Final examinations are normally scheduled for the same location and time as the class. In some cases, examinations may be written at the University of Manitoba Fort Garry Campus. The examination schedule is published well in advance of the examination period. Students are expected to check the schedule and be available to write examinations as scheduled.

### 2.5 For Information

Off-Campus Study: 188 Extended Education Complex
8:30 a.m. - 4:30 p.m., Monday to Friday
Telephone: (204) 4748019
Toll-Free in Canada telephone: 18882167011 extension 8019
Fax: (204) 4747661

### 1.2 Available Minors,

Family Social Sciences Minor
Human Nutrition and Metabolism Minor

Health Sciences and Health Studies Minors

Textile Sciences Minor
1.3 Available Options, Concentrations and Streams, Family Social Sciences Options

Aging and Developmental Health Option

Child and Youth Developmental Health Option
Family Economic Health Option

Family Violence Option
Social Development Option

Human Nutritional Sciences Options and Concentrations

Foods Option

Food Industry Option: Food Industry Management
Concentration; Food Product Development Concentration;
Quality Assurance Concentration

Nutrition Option
Second Degree in Human Nutritional Sciences:

Dietetics Focus; Foods Focus; Human Nutrition Focus

## Textile Sciences Streams

Product Development Stream

Textile Development Stream: Engineering Sciences Option; Exercise and Sports Science Option; Microbiological Sciences Option

## The Interfaculty Option in Aging

1.4 Professional Designations,

Graduates from the Human Nutritional Sciences program who have completed the Dietitians of Canada (DC) accredited undergraduate degree with courses as stipulated by DC may apply for a dietetic internship either through PreSelection by the Manitoba Partnership Program (MPP) or by application to dietetic internship programs in the final year of their degree or after completion of their degree.

Home economists in Manitoba, and other provinces, are regulated by legislation. Graduates may apply to the Manitoba Association of Home Economists (MAHE) for interim professional home economist (IPHE) status, and subsequently qualify as a professional home economist (PHEc).

## SECTION 2: Admission Requirements

Admission requirements are described in an applicant information bulletin that is available together with application deadline dates and forms from the Admissions Office, Enrolment Services, 424 University Centre. Detailed admission information is posted on the university website: http://www.umanitoba.ca/student/admissions/application/dea dlines/human ecology/.

General Entrance Requirements to the Faculty of Human Ecology: A minimum adjusted grade point average (AGPA) of 2.0 in at least 24 credit hours of University 1, including 6 credit hours from Arts and 6 credit hours from Science to total 12 credit hours, plus $12-18$ credit hours of other

University 1 courses, for a total of $24-30$ credit hours. Students must complete at least 6 more credit hours of Arts or Science courses once admitted to the Faculty. Beginning in September, 2012, high school students will be eligible to apply for direct entry to the Faculty. Detailed information is posted on the University website (above).

## Other requirements for University study

High school prerequisites required for University level courses in certain programs: Mathematics 40S (pre-calculus or applied) and Chemistry 40 S are required for the science requirements in Human Nutritional Sciences, the Interdisciplinary Health program, and textiles courses in Textile Sciences. Students who consider subscribing to the Engineering Sciences option in Textile Sciences must have pre-calculus Mathematics 40S, Physics 40S, and Chemistry 40S. Students planning to take BIOL 1020 for any program must have Biology 40S and any Grade 12 Mathematics course.

Minimum Adjusted GPA for consideration: 2.0.
The written English and Mathematics requirements are satisfied by required courses HMEC 2000 (or the former HMEC 2030) and STAT 1000 within the Human Ecology program. HMEC 2000 will be available to students upon admission to the Faculty of Human Ecology.

For students wishing to choose the focused approach for entry to the Faculty of Human Ecology, the course requirements for each of the programs or areas of concentration offered by the Faculty of Human Ecology are described in the U1 Start Book found at http://umanitoba.ca/student/u1/startbook/index.html.

## Direct Admission into the Faculty of Human Ecology from High School

To be eligible for admission based on high school, students must have: General Requirements to the University of Manitoba, plus a minimum $85 \%$ average over the following, with no less than $60 \%$ in each course:

## a. English 40S

b. Chemistry 40S, Biology 40S, or a Mathematics 40 S
c. A third 40 S course

See Applicant Bulletin for complete details. http://umanitoba.ca/student/media/direct_entry_guide.pdf.

## SECTION 3: Faculty Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Human Ecology has regulations and requirements, published below, that apply specifically to its students.
3.1 Prerequisite, Corequisite, and Course Availability: Definitions,
Prerequisite: If a course is prerequisite to a second course, the prerequisite must be met in order to continue in the second course. The department giving the second course may require a minimum grade of ' $C$ ' in the first course to register in the second course. Some inactive (legacy) courses may be used as prerequisites. Please check with an Academic Advisor in Human Ecology.

Corequisite: If a first course is a corequisite to a second course, the first course (unless previously completed) must be taken in the same term as the second course.

Course Availability: Not all courses listed in this Calendar are offered every year. Students are referred to the on-line calendar for courses offered in the year. Human Ecology courses at the 3000 and 4000 level are available only to students registered in the Faculty of Human Ecology or one of the minors or options associated with the Faculty. Courses at the 3000 and 4000 level may be taken with written permission from an Academic Advisor as long as there is space.

### 3.2 Scholastic Standards, Graduation and Grade Point Average

To graduate, a student must have passed 120 credit hours acceptable for credit in the current degree program and have obtained a minimum of 240 quality points. This is equivalent to a Degree Grade Point Average of 2.0. A pass indicates a grade of ' $D$ ' or better. A student=s Degree Grade Point Average (DGPA) will be determined from the number of effective courses which apply at a particular stage. The effective courses consist of all courses passed, in addition to all failures which have not been cleared, or substituted for, in the students record. A maximum of 150 credit hours ( 25 courses or the equivalent) may be attempted in order to obtain the 120 credit hours. Effective for the admissions cycle beginning September 2009, to graduate, students in the Interdisciplinary Health Program (IHP) must attain a Degree Grade Point Average of 2.5 (300 quality points on 120 credit hours) on graduation and meet the probation standards as stated below.

## Assessment

The status of each student will be assessed in May of each year in which a student is registered. Assessments can include the following comments: Faculty minimum met (grade point average meets the standards listed below); Dean's Honour (see 3.8); probationary status (see below); suspension (see below); suspension - all attempts used (see below); academic warning to indicate a grade point average between the minimum required and the DGPA requirement of 2.0. There is a maximum of 30 credit hours of attempts allowed for each academic program; once those attempts are used (repeated courses, grades of F or D), it is impossible to graduate.

Students must achieve or exceed the following standards at the specified stages in their academic careers. Failure to obtain the standard results in probation. Once placed on probation, students who fail to meet the appropriate performance level at the next assessment following the next

Effective Credit hours
24-30 hours
$33-60$ hours
63-90 hours

Probationary Standards - Interdisciplinary Health Program
Effective Credit hours
24-30 hours
$33-60$ hours
63-90 hours
93-117 hours
120+ hours

## Suspension

Suspended students must remain out of the Faculty of Human Ecology for one academic year from the date of suspension and must apply for reinstatement at the Admissions Office no later than May 1.

Where mathematically possible for a suspended student to complete the degree by repeating failed courses, a suspended student shall be automatically reinstated after remaining out of the faculty for one calendar year, or by achieving a degree GPA above the probationary standard.

## Suspension (All Attempts Used)

Where it is mathematically impossible for a student to complete the degree by repeating failed courses, a suspended student, after remaining out of the faculty for one calendar year, may attempt reinstatement. By completing at least 12 credit hours in one term with a minimum ' $D$ ' grade in all courses and a term grade point average of at least 2.0, the student will be reinstated. The student will start the program afresh, with previous grades of ' C ' or better applicable to the program.

### 3.3 Part-time Students,

The maximum time allowed for completion of the degree is 10 years. After completion of 24 credit hours, part-time students will be evaluated each May and must conform to the minimum performance levels.

### 3.4 Repeating Courses,

A student may repeat any course for the purpose of attaining a better grade. The latest registration of a repeated course will count in GPA calculations. There are no supplemental examinations for students who have failed final or deferred examinations.
registration will be academically suspended. A student is not permitted to be on probation for two consecutive years.

## Probationary Standards

Minimum DGPA

1.80
1.85
1.90
1.95
2.00

Minimum DGPA
2.00
2.20
2.40
2.50
2.50

### 3.5 Challenge for Credit,

A student wishing to challenge a course for credit should contact an Academic Advisor. Letter grades are granted upon completion of the course that is challenged for credit. A list of courses for challenge is available in the General Office. An application is required.

### 3.6 Transfer of Credit,

See the chapters on Admissions and Academic Regulations and Requirements at the beginning of this Calendar. Students from faculties other than University 1 or from other institutions must make an appointment with an Academic Advisor by the end of their first academic year to arrange for transfer of credit.

### 3.7 Appeals of Academic Regulations,

The Faculty Committee on Student Standing considers petitions from students who request special consideration with respect to rules and regulations governing their programs of study and qualification for graduation.

### 3.8 Dean's Honour List,

Eligible students who achieve term Grade Point Averages of 3.5 or higher in at least 12 credit hours per term will be included in the Deans Honour List.

### 3.9 Degree With Distinction,

Students who graduate with a degree GPA of 3.75 and higher will receive a degree with distinction.

### 3.10 Work Permit for Study Purposes,

International students who are registering for courses or programs that require work placement must obtain a valid Work Permit, in addition to maintaining a valid Study Permit. Work placement includes, but is not limited to, any paid or unpaid practicum, internships, work experience, field placement, and co-op programs that are a required component for the completion of their degree, diploma or certificate. Please contact your program advisor or the International Centre for Students for further information.
3.11 Release and Indemnification Forms,

In elective courses, students may be required to sign a release form for off-campus activities.

### 3.12 Written English and Mathematics Requirements,

 The written English and Mathematics requirements are satisfied by required courses HMEC 2030 and STAT 1000 within the Human Ecology program. HMEC 2030 will be available to students upon admission to the Faculty of Human Ecology.
## SECTION 4: Program and Graduation

## Requirements

Within an overall health promotion orientation, the mission of the Faculty of Human Ecology is to sustain, develop and transmit knowledge that supports individuals and their interactions in families and communities as they enhance their quality of life and improve their physical and social environments. Our teaching and research integrates both basic and applied sciences, incorporating innovative technologies and emergent areas of knowledge. The Faculty of Human Ecology contributes to the health of people in Manitoba, Canada and elsewhere by promoting good health. This health promotion contribution is distinct from the treatment of ill health. The Faculty uses the WHO (World Health Organization) definition of health as the framework for planning and activities: A state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. The Faculty uses the Ottawa Charter definition of health promotion: The process of enabling people to increase control over, and to improve, their health (Ottawa Charter for Health Promotion, 1986).

Programs in the Faculty of Human Ecology are specialized to meet the needs of students, employers and society. Scholarship, learning and research range from metabolic and clinical aspects to psychological, behavioural and community aspects. The Faculty's work extends along the continuum from cellular and biochemical aspects to health related products and policies. Study in the Faculty in one of seven undergraduate programs offers background that can lead to career opportunities in business and industry, dietetics and institutional administration, education, social services, government and research. We are one of the founding units of the University of Manitoba; our graduates

## Admitted in September 2012 or Later:

- A faculty core of 9 credit hours consisting of:

## Course No.

HEAL 2600
HMEC 2000
HMEC 3000
Reearch Methods and Presentation Introduction to Social Epidemiology

- Plus a minimum of 51 additional credit hours within the Faculty;
- Plus a minimum of 30 additional credit hours outside the Faculty of which at least 6 credit hours must be from the Faculty of Science and six from the social sciences;
have contributed to improving human health and well-being locally, nationally, and internationally for 95 years.

Students entering the Faculty will select one of the following six programs:

- Family Social Sciences Program
- Health Sciences Program
- Health Studies Program
- Human Ecology Program
- Human Nutritional Sciences Program
- Textile Sciences Program

In order to qualify for a degree, students must complete the 120 credit hours ( 123 for TS, Eng. Sci. option) specified for the selected program. Elective choices provided in each program can permit students to transfer between them; however, this opportunity decreases as students progress. Students who transfer to another program must meet the full requirements of that program. There is a quota in effect for intake to each program per academic year. The quota may affect movement into a program after the September intake.

### 4.1 Advisement Content

The Faculty will provide entering students with orientation information and will refer a student to a program advisor if the student requests. The program advisor will be a Faculty member from the student's department or program. Individual programs of study for returning students will be planned in consultation with departmental representatives at sessions scheduled in March of each year. All returning students in the Faculty of Human Ecology must submit a program plan for the succeeding year before the end of the Winter term.

### 4.2 Faculty Program Requirements Content

The following are the guidelines for the program requirements in the Faculty. The courses outlined for each program in the sections which follow, meets these basic requirements.

- Plus a minimum of 12 additional credit hours of free electives leading to a degree requirement of 120 (123) credit hours.

## Notes:

1.Students in the Interdisciplinary Health Program complete

PSYC 2250 or HMEC $2000 . \quad$ Credit Hours s2.Students admitted before September, 2005 ançgraduating after May, 2005, will make the following program 3 adjustments because of the deletion of the formeb028.408 (HMEC 4080) as a degree requirement.

- Family Social Sciences students must complete an additional 3 credit hours of Faculty electives at the 3000 or 4000 level.
- Human Ecology program students must complete an additional 3 credit hours of Faculty electives.
- Human Nutritional Sciences students must complete an additional 3 credit hours of free electives.
- Textile Sciences students must complete an additional 3 credit hours of free electives.

### 4.3 Program Electives Content

Courses within each program fall into one of three categories:

- Department electives must be chosen from within the program department.
- Outside electives must be chosen from a Faculty other than Human Ecology.
- Free electives may be chosen from within or outside the Faculty of Human Ecology.

### 4.4 Family Social Sciences Content

Head: Caroline Piotrowski

Applying knowledge from the social and physical sciences, students in Family Social Sciences examine factors affecting human psychosocial health and wellbeing. They study
3. Students admitted between September 2005 and September 2012 are urged to seek academic advising assistance for advice regarding completion of core course requirements.
human development from infancy to old age within the context of families, communities, and culture.

Students are required to choose at least one area, or option, in which to focus their studies. The name of their option will appear as a "comment" on their transcripts. They may select from the following options: 1) Aging and Developmental Health Option; 2) Child and Youth Developmental Health Option; 3) Family Economic Health; 4) Family Violence; 5) Social Development. Family Social Sciences graduates are permitted to complete any option after their degree as a Special Student. Not every Family Social Sciences course will be offered every year. A chart providing course rotation information is available on the Family Social Sciences web page.

The Family Social Sciences program can provide students with academic preparation or complementary courses for programs such as Law, Social Work, Education or Graduate Studies.

In March of each year, program planning sessions are provided to assist students in their selection of courses for subsequent years of study.

### 4.4 Students Admitted in September 2012 or Later

Courses to be taken by all Family Social Sciences students:

| Course No. |  | Credit Hours |
| :---: | :---: | :---: |
| STAT 1000 | Basic Statistical Analysis | 3 |
| One of: |  |  |
| 1260 | Basic Statistical Analysis 2, Introductory Computer Usage 1, or any other Science course | - 3 |
| One of: |  |  |
| ECON 1010, ECON |  |  |
| 1020, ECON 1210 or | Principles of Economics, Introduction to Canadian Economic Issues, or | 3-6 |

|  | Department Electives | 24 |
|  | Faculty Electives (3000 or 4000 level) | 3 |
|  | Outside Electives | 12-15 |
|  | Free electives | 30 |

## NOTES:

## 

ACADEMIC CALENDAR
University of Manitoba

1) If students choose ECON 1010 and 1020 (former 1200) or ECON 1210 and 1220, 12 credit hours of outside electives are required.
2) All courses listed in the general Family Social Sciences section (above) are required. In addition, students must choose at least one area, or option, in which to focus their studies. In the following section, the courses required to fulfill each option are listed. They will partially meet department, outside and free elective requirements. More courses will be required to complete the 120 credit hour degree. Students are encouraged to take more than one option. Each option must consist of 18 non-overlapping credit hours; that is, no course can satisfy the requirements of more than one option.

### 4.4 Aging and Developmental Health Option

This option is also part of the Interfaculty Option in Aging, which can fulfill the requirement for an option within the Family Social Sciences major.

| HMEC or SWRK or REC 2650 | Social Aspects of Aging | 3 |

### 4.5 The After Degree Program in Family Social Sciences Content

An After Degree Program (ADP) in Family Social Sciences is offered to students who have completed a previous undergraduate degree. ADP students must complete 60 credit hours in total to earn their second degree in Family Social Sciences. All Family Social Sciences U1 prerequisites are waived. In order to facilitate ADP students completing the program in a timely manner, they will automatically be permitted (without special permission from the course
instructor) to take Family Social Sciences 2000 level prerequisites as corequisites for any required Family Social Sciences 3000 and/or 4000 level courses. Please consult with the Academic Advisor when planning programs prior to registration. ADP students are required to choose at least one option and meet its requirements at the second year level and beyond. These 18 credit hours may include courses external to the Faculty of Human Ecology that are required to complete an option. If a second option is not chosen, then these credit hours must be taken within the department. There are no free electives in the ADP.

Students admitted in September 2012 or Later
Faculty of Human Ecology Core Courses (any 6 credit hours. See note 3):
At least 6 credit hours from:
HMEC 2000, HMEC Resarch Methods and Presentation, Introduction to Social Epidemiology, or

Family Social Sciences Electives (see note 7) $\quad 15-18$
STAT $1000 \quad$ Basic Statistical Analysis (see note 8)
3
TOTAL
60

## NOTES:

1. The same entrance requirements will be applied to ADP students in order to maintain current Faculty of Human Ecology standards.
2. Basic social science knowledge is assumed because ADP students have previously completed an undergraduate degree; waiving

U1 requirements for FSS courses acknowledges the skills, background and maturity of this particular group of students.
3. This choice provides students who have previously taken a research methods course with the option of avoiding redundancy in their program. Students are free to take all three core courses if they feel it would benefit them. If students select 9 credit hours of core courses, the FSS electives component is reduced to 15 credit hours.
4. This set of courses is currently required of all undergraduate FSS students and is required for students in the ADP.
5. Students are required to take a minimum of any two ( 6 credit hours) of the introductory level courses across options. Review the list of options found in the 120 credit hour undergraduate degree program to assist with planning for prerequisites for higher level courses.
6. Each FSS option is a total of 18 credit hours; ADP students will have taken at least one 2000 level course ( 3 credit hours) required by the chosen option as part of their program requirements, leaving the remaining 15 credit hours to be completed to fulfil the option. Completion of the option may include courses external to the Faculty of Human Ecology that are required to complete an option
7. ADP students are encouraged to specialize in two options simultaneously to strengthen and broaden their expertise. If a second option is chosen, these credit hours may include courses external to the Faculty of Human Ecology that are required to complete the option. If students have completed the 2000 level course required for the second option, the requirement to complete the option is 15 credit hours. If a second option is not chosen, then these credit hours must be taken within the department.
8. Students who have previously completed an undergraduate statistics course can either transfer it in directly (if already assessed as equivalent) or can request to have it assessed for advanced standing; if successful, students will be required to add 3 credit hours to their program from courses selected from the Department of Family Social Sciences.

### 4.6 The Family Social Sciences Minor Content

A minor in Family Social Sciences is offered by the Department of Family Social Sciences. Students must complete 18 credit hours, distributed as follows: Six (6) credit hours in Family Social Sciences at the 1000 level, and at least three (3) credit hours in Family Social Sciences at the 2000 level, and at least three (3) credit hours in Family Social Sciences at the 3000 or 4000 level, with no more than 6 credit hours at the 1000 level.

Students must check with their home Faculties to see if the Family Social Sciences minor is available in their programs.

### 4.7 Human Ecology Program Content <br> Chair: Gustaaf Sevenhuysen

The Human Ecology program is one of five degree choices in the Faculty of Human Ecology and is designed for
students who have career goals that require basic preparation in each of the major subject areas of the faculty. The program provides course work in Human Nutritional Sciences, Textile Sciences and Family Social Sciences as well as the requirement of an 18 hour Minor in a related field - the minor designation will also appear on the student's transcript. The program has a large elective course component to permit students to select courses to meet individual interests and career options. Persons who intend to select this program are advised that high school Chemistry 40S and Mathematics 40S are prerequisites to CHEM 1300 University 1: Structure and Modeling in Chemistry, which is highly recommended as an elective course.

Before entering continuing years in the Faculty of Human Ecology, the overall program must be planned in consultation with the Chair or committee member. Course planning sessions are held in March of each year.

### 4.8 Human Nutritional Sciences Content <br> Head: James D. House

Students majoring in Human Nutritional Sciences will choose the Nutrition Option, the Foods Option, the Food Industry Option, or will select the second degree in Human Nutritional Sciences. The educational requirements to qualify for a dietetic internship and membership with the College of Dietitians of Manitoba (CDM) or dietetic colleges in other Canadian provinces may be met within the Nutrition Option with the recommended selection of courses. Students can apply for a dietetic internship during the program (see application requirements and procedures for Pre-Selection by the Manitoba Partnership Program), in the final year of their degree or after completion of their degree. Internships are awarded competitively by external institutions. Review
the section on academic requirements for eligibility to apply for a dietetic internship for students admitted in September, 2007 and later. Those who plan to enter Human Nutritional Sciences are advised that Applied Math or Pre-Calculus Mathematics 40S and Chemistry 40S are prerequisites to CHEM 1300 University 1: Structure and Modeling in Chemistry. A student admitted to the Human Nutritional Sciences program must take a minimum of one HNSC required course in the year they are admitted. Before entering continuing years in the Faculty of Human Ecology, the overall program must be planned with departmental advice. Sessions are held in March of each year.

Students admitted in September 2010 or later must register for at least one HNSC course (3 credit hours) in order to stay in the Human Nutritional Sciences program.

## Students Admitted in September 2012 or Later Course No. Course Name Credit Hours

Courses to be taken by all Human Nutritional Sciences students
CHEM $1300 \quad$ University 1: Structure and Modeling in Chemistry
CHEM $1320 \quad$ University 1: Introduction to Organic Chemistry (See Note 1)

### 4.8.1 Pre-Professional Preparation

Students in the Human Nutritional Sciences program can complete the entrance requirements for several professional programs as part of the degree.

## A. Dietetics Focus: Academic requirements for eligibility to enter a dietetic internship.

1. Courses required in addition to the Human Nutritional Sciences program:

| Course No. | Course Name | Credit Hours | Placement in Program |
| :--- | :--- | :--- | :--- |
| GMGT 1010 or GMGT Business and Society or Administrative Theory | 3 | Free Elective |  |

| HNSC 3342 | Management for Food and Nutrition Professionals | 3 | Department Elective |
| :--- | :--- | :--- | :--- |
| HNSC 4140 | Quantity Food Production and Management | 3 | Department Elective |
| HNSC 4XXX | One of HNSC 4300, HNSC 4310, HNSC 4362, or | $3-6$ | Department Elective |

2. Entry into a Dietetic internship is competitive. It is strongly recommended that students seek advice from the Department on all aspects of preparing an application to an internship.

## i. Students admitted prior to September 2007:

Students admitted prior to September, 2007 will follow regulations regarding Dietetic internship applications in the final year of their degrees (information available on the Human Ecology web site and from the Dean's Office).

## ii. Students admitted for September 2007 or later:

Students admitted to the Faculty of Human Ecology's Department of Human Nutritional Sciences in September, 2007 or later, will be eligible to apply to be pre-selected by the Manitoba Partnership Dietetic Education Program (MPP) after completion of $60-90$ credit hours. Details of the pre-selection process and the academic rating selection criteria will be published by the MPP and a link is available on the Faculty of Human Ecology's web site. If students are not pre-selected by the MPP, there are other opportunities to apply in the final year of degree for internships following degree completion.
3. For those intending to apply for a Dietetic internship, the second degree's Dietetics Preparation program meets the course requirements in Human Nutritional Sciences, but not all the other supporting course requirements, for example, psychology/sociology, humanities or social sciences, microbiology, research methods, communication arts, basic principles of management. Check with an Academic Advisor to review the supporting course requirements from previous academic work.

## B. Medicine or Dentistry: Eligibility for entry into the program Doctor of Medicine, or the program Doctor of Dental Medicine, at the University of Manitoba.

Courses required in addition to the Human Nutritional Sciences program (can be taken as electives in the program):

| Course No. | Course Name | Credit Hours | Placement in Program |
| :---: | :---: | :---: | :---: |
| CHEM 2210* | Introduction to Organic Chemistry 1: Structure and Function (see Note 7) | 3 | Free Elective |
| CHEM 2220 | Introduction to Organic Chemistry 2: Reactivity and Synthesis (See Note 7) | 3 | Free Elective |
| $\begin{aligned} & \text { CHEM } 2360^{* *} \text { or MBIO } \\ & 2360 \end{aligned}$ | Biochemistry 1: Bio-molecules and an Introduction to Metabolic Energy | 3 | Free Elective |
| $\begin{aligned} & \text { CHEM } 2370 * * \text { or MBIO } \\ & 2370 \end{aligned}$ | Biochemistry 2: Catabolism, Synthesis and Information Pathways | 3 | Free Elective |
|  | Humanities requirement (Check the Faculty of Medicine's application information regarding the Humanities/ Social Science requirement). |  | Free Elective |
| PHYS 1020 | General Physics 1 | 3 | Free Elective |
| PHYS 1030 | General Physics 2 | 3 | Free Elective |
| * Cannot be held with CHEM 1320 in the same program. Prerequisite is CHEM 1310 (University 1: Introduction to Physical Chemistry). |  |  |  |

## C. Law: Eligibility for entry into the program Bachelor of Laws at the University of Manitoba.

1. The Human Nutritional Sciences program meets the entrance requirements of the Faculty of Law.

## NOTES:

1. Under required courses, students can take either CHEM 1320 (University 1: Introduction to Organic Chemistry) or CHEM 1310 (University 1: Introduction to Physical Chemistry).
2. Under required courses, students can take either CHEM/MBIO 2770 (Elements of Biochemistry 1) or CHEM/MBIO 2360 (Biochemistry 1: Bio-molecules and an Introduction to Metabolic Energy).
3. Under required courses, students can take either CHEM/MBIO 2780 (Elements of Biochemistry 2) or CHEM/MBIO 2370
(Biochemistry 2: Catabolism, Synthesis, and Information Pathways).
4. Under required courses, students can take either BIOL 1412 (Physiology of the Human Body) or BIOL 2410 (Human Physiology
1) and BIOL 2420 (Human Physiology 2). Note that students selecting BIOL 1020 and 1030 are not required to complete BIOL

1410, and will decrease electives to 12 credit hours. The selection of BIOL 1020 and 1030 will have more options with regard to taking higher level Botany, Zoology and Microbiology courses as electives.
5 . Nine credit hours of courses from either the Asper School of Business and/or from $3^{\text {rd }}$ and $4^{\text {th }}$ year courses in the Department of Food Science.
6. For students who do not take CHEM 2210 and CHEM 2220, CHEM 1320 is preferred.
4.9 Minor in Human Nutrition and Metabolism Content

The Minor in Human Nutrition and Metabolism (18 credit hours) requires the following courses:

Course No.
HNSC 1200
HNSC 1210
HNSC 2140
HNSC 3300
HNSC 3310
HNSC 4120 or

HNSC 4540

## NOTES:

1. Under required courses, students can take either CHEM 1320 (University 1: An Introduction to Organic Chemistry), or CHEM 1310 (University 1: An Introduction to Physical Chemistry). Students can take CHEM 2210 (Introduction to Organic Chemistry 1: Structure and Function) and CHEM 2220 (Introduction to Organic Chemistry 2: Reactivity and Synthesis) instead of CHEM 1300 and CHEM 1310 or CHEM 1320. For students who do not take CHEM 2210 and CHEM 2220, CHEM 1320 is preferred. 2. Under required courses, students can take either CHEM/MBIO 2770 (Elements of Biochemistry1) or CHEM/MBIO 2360 (Biochemistry 1: Bio-molecules and in Introduction to Metabolic Energy).
2. Under required courses, students can take either CHEM/MBIO 2780 (Elements of Biochemistry 2) or CHEM/ MBIO 2370
(Biochemistry 2: Catabolism, Synthesis, and Information Pathways).
3. Under required courses, students can take either BIOL 1412 (Physiology of the Human Body) or BIOL 2410 (Human Physiology 1) and BIOL 2412 (Human Physiology 2). Note that students selecting BIOL 1020 and 1030 are not required to complete BIOL 1410 , and will decrease electives to 12 credit hours. The selection of BIOL 1020 and 1030 will have more options with regard to taking higher level Botany, Zoology and Microbiology courses as electives.
4. If BIOL 1020 and BIOL 1030 are taken, the additional 3 credit hours are considered to be free electives.

### 4.11 Interdisciplinary Health Program Content <br> Program Chairperson: Shahin Shooshtari

This curriculum consists of two degree programs: the Bachelor in Health Sciences and the Bachelor in Health Studies. These degree programs offer new approaches to planning, administration and delivery of health services by fully integrating biological science and social science in understanding the health of people. Students will gain experience of dealing with health issues at the individual, community and institutional levels, as well as across the
lifespan. The two degrees can serve as the foundation for careers in health care teams and community health management. They offer a general course of study, not a professional status. Students can use both degree programs to build the knowledge and prerequisites for entry into professional programs in the health and social science fields, such as medicine, dentistry and others. The Bachelor of Health Sciences degree provides students with an interdisciplinary background and skill set that will contribute to their preparation for a future in biomedical and healthrelated careers. This interdisciplinary skill set is seen as advantageous for future physicians and students applying for professional education.

### 4.11.1 Health Sciences Degree

| Free Electives |  | 15 |

Free Electives
Notes:

## Notes:

1. Before entering continuing years in the Faculty of Human Ecology, the overall program must be planned with academic advice.

Sessions are held in March of each year.
2. Students are strongly encouraged to seek the advice of Academic Advisors in the Faculty of Human Ecology in order to plan their programs to develop pathways of knowledge that will assist them in moving toward careers in chosen fields. Advice is available in the Dean's Office and on the Human Ecology web site.
3. Students in both programs are required to structure their course selections as follows:

In Health Sciences, students are required to take 21 credit hours of science and 12 credit hours of social science courses from 36 credit hours of Approved Electives.
In Health Studies, students are required to take 21 credit hours of social science and 12 credit hours of science courses from 36 credit hours of Approved Electives.
4. Students in both programs are required to take at least 24 credit hours at the 3000 and 4000 levels from 36 credit hours of Approved Electives.
Students should consult the University Calendar to ensure that they have the appropriate pre- or corequisites before they attempt to register in a course. A number of courses are cross-listed between departments/faculties. The Academic Advisor will give additional guidance.

### 4.11.3 Health Sciences and Health Studies Minors

Minors in Health Sciences and Health Studies are offered by the Interdisciplinary Health Degree program.

## Health Sciences Minor:

### 4.12 Textile Sciences Content <br> Head:

The Textile Sciences undergraduate program imparts knowledge and skills which meet the demands of work and research environments driven by scientific, technological, and logistical innovations in textiles. It comprises two streams - product development and textile development. The product development stream is structured to help students develop problem solving abilities systematically through the application and integration of knowledge in textile science, human and organizational behaviour, environmental forces, and methods of quantifying and interpreting observations. The textile development stream is a response to the emerging significance of textiles in health and health promotion. Within the textile development stream,
three options will be offered - Exercise and Sports Science, Engineering Sciences, and Microbiological Sciences. These options capitalize on the strengths of other academic disciplines within the University of Manitoba which are relevant to the study of textiles for health and health promotion. Students who choose the textile development stream must have Pre-Calculus or Applied Mathematics 40S and Chemistry 40S to take CHEM 1310. Students who consider subscribing to the Engineering Sciences Option must have Pre-Calculus or Applied Mathematics 40S, Physics 40S, and Chemistry 40S. Students must choose either the Textile Development or Product Development choice upon first registration in the Faculty.

In March of each year program planning sessions are provided to assist students in their selection of courses for subsequent years of study.

Students Admitted in September 2012 or Later

### 4.13 Textile Sciences Minor Content

A minor in Textile Sciences is offered by the Department of Textile Sciences. Students must complete 18 credit hours, distributed as follows: A maximum of six (6) credit hours in Textile Sciences at the 1000 level, and at least three (3) credit hours in Textile Sciences at the 2000 level, and at least three (3) credit hours in Textile Sciences at the 3000 or 4000 level, with no more than 6 credit hours at the 1000 level.

Students must check with their home Faculties to see if the Textile Sciences minor is available in their programs.

### 4.14 Interfaculty Option in Aging Content

An Option in Aging is offered by and in the following faculties: Arts, Human Ecology, Nursing, Kinesiology and Recreation Management and Social Work.

- HMEC 2650 or REC 2650 or SWRK 2650, The Social Aspects of Aging;
- NURS 2610 or KIN 2610, Health and Physical Aspects of Aging;
- At least three credit hours of professional/discipline specific applied work on aging within the student's department of registration (a list of courses is available in the general office); and,
- An additional nine credit hours of aging-related courses from the participating units; a list is available in the General Office. Upon completion of these requirements, a "comment" will be added to the student's transcript.

To complete the option, students in Human Ecology must complete each of the following requirements:

University of Manitoba

### 4.15 The Minor in Management Content

A Management Minor is offered by the Asper School of Business. Human Ecology students may complete this Minor as part of the electives portion of their programs. The Minor will consist of any 18 credit hours of Management courses. Students must meet prerequisites for all courses. Further information is available from the Human Ecology General Office.

### 4.16 The Voluntary Minor Content

Students in the Faculty of Human Ecology may declare and complete a Minor from departments and interdisciplinary programs in which a Minor is offered. The Family Social Sciences Minor and the Minor in Human Nutrition and Metabolism are available through the Faculty of Human Ecology. Information about Minors in programs other than Human Ecology is found in the appropriate description of departmental/school/faculty program offerings in the Undergraduate Calendar.

Completion of the Minor is entirely optional. Students may not, however, declare both their Major and Minor from the same department/interdisciplinary program. No course may be used as part of a prescribed program in the Faculty of Human Ecology and also be part of a prescribed Minor. For example, if a course in Chemistry is part of a student's degree requirements in the Faculty of Human Ecology, it cannot be used as part of a Minor in another program. Completion of a Minor may require that a student take more than the minimum number of credit hours for graduation.

## SECTION 5: Family Social Sciences -1000 Level

FMLY 1010 Human Development in the Family Cr.Hrs. 3 (Formerly 062.101) Introductory survey of key aspects of human development processes within the family context from a life span perspective. Not to be held with NURS 1260 (049.126).

FMLY 1012 Introduction to Social Development Cr.Hrs. 3 This course is an introduction to Social Development with a particular emphasis on families and communities. Social development is concerned with the advancement of the common good, the effective management of social problems, the meeting of human needs, and the equitable distribution of society's resources. As such, this course explores the social factors and conditions that promote or hinder social development and how this affects the wellbeing of individual, families, and communities in contemporary societies. Not to be held with 062.172 or FMLY 1900

FMLY 1020 Family Issues across the Lifespan Cr.Hrs. 3 (Formerly 062.102) Introduction to contemporary issues involving families across the lifespan. Topics include mate selection, marriage, parenthood, divorce, lone-parent families, work-family balance, family violence, families and older persons, and poverty in families. Not to be held with 062.114.

FMLY 1420 Family Management Principles Cr.Hrs. 3 (Formerly 062.142) An introductory course that uses an ecosystem perspective resources, decision-making, planning, implementing, evaluating, and communication within family contexts. Applications to balancing work and family, individual and family stress, family finance, environmental issues, and the use of time and human resources will be made. Not to be held with the former 062.142.

FMLY 1900 Families, Housing and Community: An Introductory Perspective Cr.Hrs. 3
(Formerly 062.190) An introduction to understanding housing and community for individuals and families; shelter outside mainstream; neighbourhoods and communities; links between well being and poverty, housing, and community; some policy and program issues; various approaches used in studying this topic. Opportunity for some field experience. Not to be held with 062.172.

## SECTION 5: Family Social Sciences -2000 Level

FMLY 2012 Development, Conflict, and
Displacement Cr.Hrs. 3
The course is an introduction to development, conflict, and displacement as they affect individuals, families and communities. Specifically, this course examines the current phenomenon of induced displacement due to social conflicts, natural disasters, or uneven development in developing countries. Students will examine concepts and issues arising from induced displacement and explore community based responses to this problem. Not be held with FMLY 2900. Prerequisite: 1012 or consent of the instructor.

FMLY 2350 Multicultural Family Issues Cr.Hrs. 3 (Formerly 062.235) A focus on multicultural issues that affect family interaction in Canada, which is designed to prepare students for professional practice. Emphasizes dominant/minority family relationships, internal family dynamics of minority families, social policies directed toward creating and maintaining multiculturalism and diversity education for future professionals. Manitoba Aboriginal family life is accentuated. Prerequisite: FMLY 1020 (062.102) or equivalent.

FMLY 2400 Family Financial Health Cr.Hrs. 3
A survey of topics that have an impact on the financial health of Canadian families, including personal money management, mortgage financing, credit and debt, educational and retirement planning, taxation, insurance, savings and investments. The course prepares students to help families maximize resources and increase their financial literacy. Prerequisite: FMLY 1420 (051.142). Not to be held with the former FMLY 2070 (062.207).

FMLY 2600 Foundations of Childhood Developmental Health Cr.Hrs. 3
(Formerly 062.260) This course examines implications of theory and research in child development for promoting developmental health. Laboratory component focuses on working with children and evaluating effects of developmental progress. Prerequisite: Minimum grade of C in FMLY 1010 (062.101). Limited enrolment.

FMLY 2800 Family Violence Cr.Hrs. 3 (Formerly 062.280) A survey of the extent and nature of various forms of family violence across the life course. Topics include physical and sexual child abuse, sibling violence, partner violence, and elder abuse. Emphasis is on prevalence, incidence, causes, consequences and solutions. Prerequisite: FMLY 1010 (062.101) or FMLY 1020 (062.102) or PSYC 1200 (017.120) or SOC 1200 (077.120).

FMLY 2900 Families, Housing and Community: A Development Perspective Cr.Hrs. 3
(Formerly 062.290) Focus is on developmental issues for individuals, families and communities. Of particular interest is the interrelationship between facilitating community development and the developmental well being of residents. Social, psychological, cultural and political components are considered. Prerequisite: FMLY 1900 (062.190 or 062.172) or consent of instructor.

## SECTION 5: Family Social Sciences -3000 Level

FMLY 3012 Theories of Social Development Cr.Hrs. 3 This course is a survey of social development theories that have influence the study and practice of development since the 1950s. It addresses the question of why theories of social development are necessary and why different theories emerged at particular times in history. This course examines explanations of development and underdevelopment as they impact on individuals, families and communities. Not be held with FMLY 4900. Prerequisite: FMLY 1012.

FMLY 3220 Death and the Family Cr.Hrs. 3 (Formerly 062.322) An examination of dying and death of family members throughout the family life cycle. Specific topics included are the meaning of death, the process of dying, caring relationships, grief and bereavement. Prerequisite: FMLY 1020 (062.102) or PSYC 1200 (017.120) or SOC 1200 (077.120).

FMLY 3240 Families in Later Years Cr.Hrs. 3 (Formerly 062.324) An investigation of family issues in the later years of life, such as housing, intergenerational relations, adjustment to retirement, sibling relations, grandparenting, death. Students may not hold credit for FMLY 3240 ( 062.324 ) and the former 062.321.
Prerequisites: [FMLY 1010 (062.101) and FMLY 1020 (062.102)] or PSYC 1200 (017.120) or SOC 1200 (077.120).

FMLY 3330 Parenting and Developmental Health Cr.Hrs. 3 Examines parenting and its influence on developmental health, with consideration of change across time, the context in which parenting occurs, and the effect of the parent-child relationship on developmental health. Prerequisites: FMLY 2600 or FMLY 3600. Not to be held with 062.435.

FMLY 3400 Families as Consumers Cr.Hrs. 3 An examination of the factors that influence the consumer behaviour of individuals and families across the life course, with particular attention to the situation of vulnerable consumers. Theory, education, policy and practice are related to contemporary consumer issues and the impact of consumption behaviour on the environment. Prerequisites: FMLY2400 or FMLY 2070 (062.207) and ECON 1200 (018.120) or ECON 1210 (018.121) or ECON 1220 (018.122). Not to be held with the former FMLY 3450
(062.345).

FMLY 3470 Selected Studies in the Family I Cr.Hrs. 3 (Formerly 062.347) The opportunity to carry out an individual study in the area of the family of particular interest to the student. When enrolment warrants, the department may offer selected topics in a regular course format. Prerequisite: consent of instructor.

FMLY $\mathbf{3 6 0 0}$ Adolescents in Families and Society Cr.Hrs. 3 (Formerly 062.360) This course is designed to help students understand the nature of adolescent relationships with their families in communities. The application of theory and research on adolescent relationships to professional practice with families and communities is emphasized. Prerequisite: FMLY 2600 ( 062.260 ) and completion of 54 credit hours.

FMLY 3610 Developmental Health of Children and Youth Cr.Hrs. 3
(Formerly 062.361) Population health gradients are largely set early in life and are affected by the environments in which children live. This course examines current knowledge of the social determinants of child and adolescent health. Consideration is given to policy implications, including directions for program development and evaluation. Not to be held with the former 062.450. Prerequisite: FMLY 2600 (062.260). Not to be held with 062.450.

FMLY 3780 Introduction to the Development of Programs for Children and Families Cr.Hrs. 3
(Formerly 062.378) An introduction to the theory and practice of program development with special emphasis on programs for children and families. The course will cover techniques for conducting need assessments, as well as the process of planning and implementing programs to address community need. Prerequisite: HMEC 2000 or HMEC 2050 (028.205).

FMLY 3790 Introduction to the Evaluation of Programs for Children and Families Cr.Hrs. 3 (Formerly 062.379) An introduction to the theory and practice of program evaluation with special emphasis on child and family programs. Considers the purpose of evaluation, types of evaluation, evaluation design and analysis, and the evaluation process. Prerequisite: HMEC 2050 (028.205).

FMLY 3800 Conflict Resolution in the Family Cr.Hrs. 3 (Formerly 062.380) Students will examine the nature and development of conflict in family relationships throughout the life span. Implications of conflict for the quality of family relationships and individual development will be addressed. Prerequisite: FMLY 2800 (062.280) and completion of 54 credit hours.

FMLY 3802 Intimate Partner Violence Cr.Hrs. 3
A critical examination of theory and research on violence in intimate relationships. Topics will include violence in dating, common-law, marital, ex-partner and same-sex relationships. Prerequisite: FMLY 2800.

FMLY 3806 Children, Violence and Rights Cr.Hrs. 3 Violence against children in their families takes many forms, from sexual exploitation to honour killings. We will explore, through a child rights lens, the forces contributing to violence against children, its impact on human lives, and approaches to prevention being implemented around the world.

Prerequisite: FMLY 2800. Not to be held with FMLY 3804.
FMLY 3900 Families, Housing and Community: A Policy Perspective Cr.Hrs. 3 (Formerly 062.390) Examines policy relative to families, housing and community. Primer on public policy process and links to families. Examines housing policies at federal, provincial, and municipal levels and their impact on individuals and families. Opportunity for some field experience. Prerequisite: FMLY 1900 (062.190) or consent of instructor. Not to be held with 062.473.

## SECTION 5: Family Social Sciences -4000 <br> Level

FMLY 4012 Social Development Policies Cr.Hrs. 3 This course examines the formulation of social development policies and the impact of these policies on the well-being of individuals, families, and communities. The course uses a seminar format to foster students' capacity to understand and examine policy issues. Students will develop skills in understanding, analyzing, and formulation social development policies. Actual social development case studies will be evaluated and alternative family and community oriented policies discussed. Not be held with FMLY 3900. Prerequisite: 3012.

FMLY 4220 Aging and Risk in a Global Context Cr.Hrs. 3 This course will take an interdisciplinary perspective on definitions of risk associated with a variety of determinants that shape the daily lived experience of older adults, their families and communities, and the institutions that care for them. Students will evaluate programs, policies and research, and engage in a final project of their choice. Prerequisite or Corequisite: HMEC 2650 or SWRK 2650 or REC 2650 or NURS 2610 or KIN 2610.

FMLY 4300 Field Experience Cr.Hrs. 6 (Formerly 062.430) Provide students with field experience in a supervised setting. The course consists of 120 hours of supervised work in an assigned setting and seminar time with peers and field experience coordinator. Grade is pass/fail. Prerequisite: 84 credit hours and consent of instructor. Not to be held with 062.436 or 062.455 or 062.456 or 062.457.

FMLY 4330 Management of Family Stress Cr.Hrs. 3 (Formerly 062.433) Theories which influence family behaviour during stress are discussed, and coping/managerial skills to mitigate the effects of the stressors are examined. Stress management advice from agencies and in educational settings is analyzed. Prerequisite: FMLY 1020 (062.102

FMLY 4400 Family Economics: Poverty and
Wealth Cr.Hrs. 3
Analysis of principles, major problems and trends in the economic welfare of individuals and families in both the Canadian and global economies. Emphasis on families and their relationships to the economy such as income inequality, family economic policy, human capital, proverty and resource distribution within families. Prerequisites: [FMLY 2400 or FMLY 2070 (or 062.207] and [one of ECON 1200 (04018.120) or ECON 1210 (or 018.121 ) or ECON 1220 (or 018.122)]. Not to be held with the former FAMLY 4450 (or
062.445).

FMLY 4460 Family Financial Counselling Cr.Hrs. 3 (Formerly 062.446) Theory and practice of financial counselling of debt-burdened families. Debt analysis. Appraisal of alternate solutions and of legal and psychosocial factors in terms of family well-being and financial capacity. Prerequisite: FMLY 3450 (062.345).

FMLY 4470 Selected Studies in the Family II Cr.Hrs. 3 (Formerly 062.447) The opportunity to carry out advanced study in the area of the family of particular interest to the student. When enrolment warrants, the department may offer selected topics in a regular course format. Prerequisite: consent of instructor.

FMLY 4480 Work and Family Issues Cr.Hrs. 3
(Formerly 062.448) An exploration of the interface between paid work and unpaid work and families in the Canadian and international contexts. Topics include demographic trends; parenting, child and elder care; management of work-family conflict; development of workplace solutions; and social policy implications. Prerequisite: FMLY 2400 or FMLY 2070 or 062.207 and 84 credit hours.

FMLY 4500 Senior Thesis Cr.Hrs. 6
The preparation and presentation of a comprehensive review of the literature and an empirical investigation of an approved topic. Prerequisite: Registered in the final year of the Family Social Sciences program and consent of Department Head. Application required. Enrolment limited.

FMLY 4600 Risk and Resilience in Behavioural and Social Development Cr.Hrs. 3
(Formerly 062.460) The development of behavioural and social difficulties are examined from a risk and resilience perspective. The interaction of factors at all levels of the human ecological system are considered in terms of their impact on increasing risk and/or building resilience in children and youth. Prerequisite: FMLY 2600 (062.260. Not to be held with 062.437.

FMLY 4602 Family Relationships, Health and Wellbeing Cr.Hrs. 3
This course provides an indepth survey of the interaction between family relationship dynamics, health and well-being across the life course period. The influence of family members on health-related behaviours is reviewed and preventive family-based interventions are evaluated. Prerequisite: FMLY 3600 (or 062.360).

FMLY 4604 Children in Adversity Cr.Hrs. 3 Millions of children live with violence, trauma and other adverse circumstances. We will explore the interactions among individual, family, cultural, legal and policy factors as they affect children's developmental pathways in the face of adversity. Prerequisite: FMLY 2600 or FMLY 3600. May not be held with FMLY 4600 or 62.437 .

FMLY 4800 Senior Seminar in Family Violence and Conflict Resolution Cr.Hrs. 3
(Formerly 062.480) Advanced study in the areas of family violence and/or conflict resolution. Special emphasis is placed upon current research and/or practice. Prerequisite: FMLY 3800 ( 062.380 ) and completion of 72 credit hours.

FMLY 4802 Family Violence Prevention Cr.Hrs. 3 Family violence prevention theories, research, practices and policies will be critically reviewed with regard to issues such as gender, culture, sexual orientation and others. Prerequisites: FMLY 3802 or FMLY 3806. Not to be held with the former FMLY 4800 (0662.480).

FMLY 4900 Families, Housing and Community: An Action Perspective Cr.Hrs. 3
(Formerly 062.490) Examines relationships between families, housing and community; impact of communities on children; best practices for enhancing quality of life in communities; participatory processes for working with communities. Significant on-site learning. Emphasis on inner-city. Prerequisite: FMLY $2900(062.290)$ or FMLY 3900 (062.390) or consent of instructor.

## SECTION 5: General Human Ecology -2000 Level

HMEC 2000 Research Methods and Presentation Cr.Hrs. 3 An introduction to research designs, methods and techniques, as well as the practice of disseminating results, in the context of selected determinants of health.
Applications in natural and social sciences will be presented. Skills related to presenting research findings will be taught. Prerequisite: STAT 1000 (005.100). Not to be held with HMEC 2050 (028.205).

HMEC 2030 Human Ecology: Perspectives and Communication Cr. Hrs. 3
(Lab Required)(Formerly 028.203) Theory and practice of written and oral communication set within the context of the subject matter of areas of Human Ecology. Students may not hold credit for HMEC 2030 (028.203W) and 028.103 and 028.204.

HMEC 2050 Introduction to Research in Human Ecology Cr.Hrs. 3
(Formerly 028.205) A general introduction to research issues in natural and social sciences and their application in the various subject areas in human ecology. Prerequisites: [HMEC 2030 (028.203W or 028.103W)] and STAT 1000 (005.100)M.

HMEC 2650 The Social Aspects of Aging Cr.Hrs. 3 (Formerly 028.265) An examination of the social aspects of aging. Emphasis on understanding the aging process as a life transition involving adaptation through interaction with social and physical environments. Students may not hold credit for HMEC 2650 (028.265) or SWRK 2650 (047.265) or REC 2650 (123.265).

## SECTION 5: General Human Ecology -3000 Level

HMEC 3000 Introduction to Social Epidemiology Cr.Hrs. 3 This course provides an overview of the basic concepts, principles and methods of social epidemiology and their applications for research and practice from a human ecology perspective. Applications to social determinants of health across the life course may include but are not limited to income and food security, early child development and others. Prerequisites: HMEC 2000[ or HMEC 2050] or any

2000-level or higher research course and HEAL 2600[or HMEC 2030].

HMEC 3100 Communication for Professional
Practice Cr.Hrs. 3
(Formerly 028.310) Advanced communication skills as applied to professional practice in the fields of human ecology. Students may not hold credit for HMEC 3100 (028.310) and 028.204. Prerequisites: 39 credit hours in the Human Ecology program and HMEC 2030 (028.203 or 028.103).

HMEC 3500 Developmental Health Cr.Hrs. 3
This course examines how social inequalities affect population health across the lifespan. It is guided by the determinants health with a particular focus on socioeconomic variables. Local, provincial, national and international perspectives provide meaningful insight into the roles of equality and inequality. Prerequisite: Any 2000 level research methods course.

## SECTION 5: General Human Ecology -4000 Level <br> HMEC 4090 Practicum in Human Ecology Cr.Hrs. 6

 (Formerly 028.409) This is a partnership among the university, field supervisor, and the student. It provides an opportunity for students to work in a supervised setting (e.g., health, social services or business) with health professionals as field supervisors. Students also have in-class experiences and assignments with an academic instructor. Prerequisite: 84 credit hours in the Human Ecology General or Interdisciplinary Health program and consent of instructor. Application required. Limited Enrolment.
## SECTION 5: Human Nutritional Sciences 1000 Level

HNSC 1100 Nutrition for Healthy Living Cr.Hrs. 3 An introduction to nutrition and practical approaches for healthy diet and disease prevention. Prerequisites: Enrollment in the Aboriginal Community Wellness Diploma program. Not to be held with HNSC 1210

HNSC 1200 Food: Facts and Fallacies Cr.Hrs. 3 (Formerly 030.120) This course will present facts and fallacies about food from harvest to market forms. Emphasis will be placed on technological development, consumer concerns and factors affecting nutritional quality. Current issues related to food safety and nutritional trends will also be discussed. Not to be held with 030.119.

HNSC 1210 Nutrition for Health and Changing
Lifestyles Cr.Hrs. 3
(Formerly 030.121) This course addresses the relationship between nutrition and health. The focus is on healthy eating and on strategies for modifying food patterns within the context of lifestyle and culture. Not to be held with 030.117 or 030.323 or HNSC 1100.

## SECTION 5: Human Nutritional Sciences 2000 Level

HNSC 2130 Nutrition Through the Life Cycle Cr.Hrs. 3 (Formerly 030.213) Examination of nutritional needs throughout the life cycle, the nutritional concerns of different age groups and the development of healthy eating practices. Not to be held with 030.304. Prerequisite: HNSC 1210 (030.121).

HNSC 2140 Basic Principles of Human Nutrition Cr. Hrs. 3 (Formerly 030.214) The scientific principles underlying nutrient function and dietary requirements. Prerequisites: A grade of C or higher in [CHEM 2770 or MBIO 2770 (002.277 or 060.277) or CHEM 2360 or MBIO 2360 (002.236 or 060.236)] and [HNSC 1210 (030.121) and HNSC 1200 (030.120)] or [FOOD 2500 (078.250]. Not to be held with the former 030.325.

HNSC 2150 Composition, Functional and Nutritional Properties of Foods Cr.Hrs. 3
(Formerly 030.215) Food composition, food market forms, food composition data for nutritional assessment and labelling. Prerequisites: HNSC 1200 (030.120) and HNSC 1210 (030.121) and [CHEM 1320 or CHEM 1310 (002.132 or 002.131)].

HNSC 2160 Principles of Food Preparation and Preservation Cr.Hrs. 3
(Lab Required)(Formerly 030.216) Food preparation, preservation, handling and storage; quality and safety implications; scientific basis for culinary practice; use and application of equipment. Prerequisite: HNSC 1200 (030.120) and [CHEM 1320 or CHEM 1310 (002.132 or $002.131)$ ]. Not to be held with 030.211 or 030.324 .

## SECTION 5: Human Nutritional Sciences 3000 Level

HNSC 3260 Food Quality Evaluation Cr.Hrs. 3 (Formerly 030.326) Discussion of quality concepts and quality assurance principles for food applications, and of methods for evaluation of sensory, chemical and physical aspects of quality. The course will include food industry visits and demonstrations of food testing techniques. Prerequisites: [HNSC 2160 (030.216) or FOOD 3010 (078.301)] and STAT 2000 (005.200).

HNSC 3300 Vitamins and Minerals in Human Health Cr.Hrs. 3
(Formerly 030.330) The physiological importance of vitamins and minerals in the human body, including factors affecting dietary requirements, metabolism and roles in disease progression and prevention. Prerequisites: [CHEM 2780 or MBIO 2780 (002.278 or 060.278) or CHEM 2370 or MBIO 2370 (002.237 or 060.237)] and HNSC 2140 (030.214) and [BIOL 1412 or 2420 (ZOOL 1330 or 2540, 022.133 or 022.254)]. Not to be held with the former 030.426.

HNSC 3310 Macronutrients and Human Health Cr.Hrs. 3 (Formerly 030.331) Macronutrient functions and metabolic roles in human health, including the prevention and pathogenesis of various diseases. Prerequisites: [CHEM 2780 or MBIO 2780 (002.278 or 060.278) or CHEM 2370 or

MBIO 2370 (002.237 or 060.237)] and [HNSC 2140 (030.214) and ZOOL 1330 (022.133 or 022.254)]. Not to be held with former 030.325.

HNSC 3320 Nutrition Education and Dietary Change Cr.Hrs. 3
Formerly 030.332) Theoretical and practical aspects influencing dietary change at the individual and population level, with emphasis on nutritional education. Prerequisites: [PSYC 1200 (017.120) or SOC 1200 (077.120)] and HNSC 2130 (030.213) and HNSC 2140 (030.214)

HNSC 3330 Ingredient Technology for Designed Foods Cr.Hrs. 3
(Formerly 030.333) Chemical and functional properties of ingredients and their application in designed foods: low fat, low calorie, high fibre, high energy and innovative food products. Prerequisites: [CHEM 2780 or MBIO 2780 (002.278 or 060.278) or CHEM 2370 or MBIO 2370 (002.237 or 060.237) and HNSC 2150 (030.215)] or [CHEM 2220 (002.222) and FOOD 2500 (078.250)].

HNSC 3342 Management for Food and Nutrition Professionals Cr.Hrs. 3
Management strategies and cost control principles as applied to food and nutrition organizations. Topics include leadership, organizational design, teamwork, human resource management, performance improvement, cost management, and the interpretation of financial statements. Not to be held with HNSC 3340 (030.334). Prerequisites: HNSC 1200 (030. 120) and [GMGT 2030 (027.203) or GMGT 2070 (027.207) or GMGT 2080 (027.208)].

HNSC 3350 Culture and Food Patterns Cr.Hrs. 3 (Lab Required) A study of the cultural, sociological and psychological aspects of food patterns and behaviour. Not to be held with 030.329. Prerequisites: [PSYC 1200 (017.120) or SOC 1200 (077.120)] and HNSC 1200 (030.120) and HNSC 1210 (030.121).

HNSC 3870 Food Geographies Cr.Hrs. 3
This course provides a critical examination of the geographies of food at a variety of scales, from the body to the global. The course focuses on themes in three interconnected areas: 1) food production and the global food system from farm to plate including agribusiness and alternative food production and distribution models; 2) food consumption habits and beliefs and foodways as geographically contingent material culture; and 3 ) food (in) security and its relationship to health and wellbeing. This course is cross-listed with GEOG 3870. Prerequisites: A grade of "C" or better in GEOG 1280, GEOG 1281, GEOG 1200 or HNSC 1200, or permission of the department head.

## SECTION 5: Human Nutritional Sciences 4000 Level

HNSC 4120 Senior Thesis Cr.Hrs. 3
The preparation and presentation of a report based on a survey of the literature or on a laboratory investigation of an approved topic. Prerequisites: Students must be registered in their final year of Human Nutritional Scinces program or the Minor in Human Nutrition and Metabolism. Application required. Enrolment limited. Not to be held with HNSC 4122 or HNSC 4600.

HNSC 4122 Research Project in Human Nutritional Sciences Cr.Hrs. 6
A research project in any aspect of human nutritional sciences, chosen in consultation with the supervising faculty member. A written report and a poster or oral presentation required at the end of the project. Students must be registered in their final year of Human Nutritional Sciences program. Application required. Enrolment limited. May not be held with HNSC 4120 (030.412) OR HNSC 4600.

HNSC 4140 Quantity Food Production and
Management Cr.Hrs. 3
(Lab Required)(Formerly 030.414) Menu planning. Food costing. Experience in standard methods of institutional food production and service. Prerequisites: HNSC 3340 or HNSC 3342 (030.334) and HNSC 2160 ( 030.216 ) or consent of instructor. Additionally, students must complete the Food Handlers Certificate Program and must submit the form to the Department by June 15th in order to be permitted to enter HNSC 4140.

HNSC 4160 Seminar in Foods and Nutrition Cr.Hrs. 3 (Formerly 030.416) A critical study of research in the field of foods and nutrition; oral and written reports required. Restricted to 4th year majors in the Department. Prerequisites: completion of 84 credit hours in the HNS program and HMEC 2000 or HMEC 3100 (028.310).

HNSC 4260 Selected Topics in Human Nutrition Cr.Hrs. 3 (Formerly 030.426) Recent developments in human nutrition research. Prerequisite: consent of instructor.

HNSC 4270 Sensory Evaluation of Food Cr.Hrs. 3 (Lab Required)(Formerly 030.427) Sensory perception, principles of the sensory analysis of food, requirements for sensory testing, test methods, selection and training of panelists, statistical analysis and interpretation of data. Prerequisites: [HNSC 2160 (030.216) or FOOD 3010 (78.301) or ENTM 3240 (038.324)] and STAT 2000 (005.200) or equivalent.

HNSC 4280 Food Product Development Cr.Hrs. 3 (Formerly 030.428) This course focuses on food industry product development procedures. Emphasis will be on application of basic knowledge of foods and food processing in designing a new product. Prerequisites: MKT 2210 (118.221) and STAT 2000 (005.200) and [one of FOOD 3010 (078.301) or HNSC 3330 (030.333)]. Not to be held with FOOD 4510 (078.451).

HNSC 4290 Food, Nutrition and Health Policies Cr.Hrs. 3 (Formerly 030.429) Principles and applications of policies, regulations and legislation in the areas of food and health that address nutrition and health problems of populations. Not to be held with the former 030.328 . Prerequisites: HMEC 2000(or 2050 or 028.205) and HNSC 2130 (030.213) and HNSC 2150 (030.215) and STAT 2000 (005.200).

HNSC 4300 Community Nutrition Intervention Cr.Hrs. 3 (Formerly 030.430) Principles of planning and evaluating nutrition related interventions. Examples of community needs assessments, program planning strategies and types of program evaluation will be examined. Not to be held with 030.411. Prerequisite: HNSC 3320 (030.332).

HNSC 4310 Nutrition and the Elderly Cr.Hrs. 3 (Formerly 030.431) The role of nutrition in health promotion
and disease prevention during aging. Prerequisites: HNSC 3310 (030.331) and HNSC 3320 (030.332). Prerequisite or corequisite: HNSC 3300 (030.330). Offered in alternate years, opposite HNSC 4340.

## HNSC 4320 Nutrition Management of Disease

## States Cr.Hrs. 3

(Lab Required)(Formerly 030.432) Nutritional assessment and dietary management of acute and chronic disease states. Prerequisite or corequisite: HNSC 3300 (030.330) and HNSC 3310 (030.331) and HNSC 3320 (030.332). Not to be held with 030.423 or 030.424 .

HNSC 4340 Maternal and Child Nutrition Cr.Hrs. 3 (Formerly 030.434) The role of nutrition in normal human development from conception through childhood. Prerequisites: HNSC 3310 (030.331) and HNSC 3320 (030.332). Prerequisite or corequisite: HNSC 3300 (030.330). Offered in alternate years opposite HNSC 4310.

HNSC 4350 Nutrition in Exercise and Sport Cr.Hrs. 3 (Formerly 030.435) The application of nutritional regimens to meet exercise requirements and improve athletic performance. Current practices and recommendations for different types of sports will be examined. Prerequisites: [HNSC 1210 (030.121)] and [PHED 3430 (057.343), or KIN 3470, or PHED 3470] or [ZOOL 1330 (002.1330)

HNSC 4362 Nutrition Option Practicum Cr.Hrs. 6 Practical applications of nutrition principles in a variety of public service and research applications. Prerequisites: completion of 84 credit hours in the Human Nutritional Sciences program with two of the following courses: HNSC 3300, HNSC 3310, HNSC 3320, and HNSC 3330. Application to the department is required. Limited enrolment.

HNSC 4364 Foods Industry Option Practicum Cr.Hrs. 6 This course involves supervised application of food quality, safety, and management principles in a commercial or government setting. Requirements include 280 hours of work related to the field experience. Prerequisites: Completion of 84 credit hours in Human Nutritional Sciences, including the following courses from the Food Industry Option: HNSC 3260, HNSC 3330, FOOD 4150 and one of GMGT 2030, GMGT 2070 or GMGT 2080. Application to department is required. Limited enrolment.

HNSC 4540 Functional Foods and Nutraceuticals Cr.Hrs. 3 (Formerly 030.454) This course will examine the bioactive components of functional foods and nutraceuticals, their sources, chemistry, process technology, efficacy, safety and regulation. Prerequisite: [CHEM 2770 or MBIO 2770 (002.277 or 060.277) or CHEM 2360 or MBIO 2360 (002.236 or 060.236)]. Not to be held with FOOD 4540 (078.454).

HNSC 4600 Practice-based Research in Human Nutritional Sciences Cr.Hrs. 3
A practice-based research project relevant to dietetic practice. Prerequisite: Registration in the 4th year of the Human Nutritional Sciences program and any two of HNSC 3300, HNSC 3320 \& HNSC 3330, and instructor permission required. Enrolment limited to students pre-selected by the Manitoba Partnership Dietetic Education Program. Not to be held with HNSC 4120 or HNSC 4122

## SECTION 5: Interdisciplinary Health Degree Program - 2000 Level <br> HEAL 2600 Integration of Health Determinants of

 Individuals Cr.Hrs. 3Students study, integrate and apply the determinants that affect the health of individuals throughout the life span to selected case or learning scenarios. The case or learning scenarios present a variety of issues in the delivery of health-related services that are intended to benefit individual health. Prerequisites: One of CHEM 1300 (002.130) or BIOL 1020 (071.102) or STAT 1000 (005.100); and one of PSYC $1200(017.120)$ or SOC $1200(77.120)$ or consent of instructor.

## SECTION 5: Interdisciplinary Health Degree

## Program -3000 Level

HEAL 3600 Integration of Health Determinants for Communities Cr.Hrs. 3
Students study, integrate and use community level determinants of population health in selected case or learning scenarios. These cases present a variety of issues in the design of health related services that are intended to benefit population health. Prerequisites: HEAL 2600 and 39 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor.

## SECTION 5: Interdisciplinary Health Degree Program - 4000 Level

HEAL 4600 Integration of Health Determinants for Canada and World Cr.Hrs. 3
Students use selected case or learning scenarios to study the determinants of population health that depend on decision making in governmental or international agencies. The case scenarios present a variety of issues in the governance and management of population health.
Prerequisites: HEAL 3600 and 57 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor.

HEAL 4610 Health Studies Capstone Cr.Hrs. 3 Students will explore selected topics from the social sciences to synthesize and evaluate actions that can affect the health of people. The course summarizes the social sciences knowledge that forms the basis for all health related professional work. Prerequisite: A grade of C+ in HEAL 3600 and 57 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor. Restricted to students in Health Sciences and Health Studies.

HEAL 4620 Health Sciences Capstone Cr.Hrs. 3 Students will explore selected topics from the biological sciences to synthesize and evaluate actions that can affect the health of people. The course summarizes the biological science knowledge that forms the basis for all health related professional work. Prerequisite: a grade of C+ in HEAL 3600 and 57 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor. May not hold with HEAL 4610

HEAL 4650 Selected Topics in Interdisciplinary Health Cr.Hrs. 3
The opportunity to carry out individual study in the area of interdisciplinary health. When enrolment warrants, special topics may be offered in a regular course format. Prerequisite: Consent of Instructor and Chairperson.

## SECTION 5: Textile Sciences -1000 Level

TXSC 1600 Textiles for Living Cr.Hrs. 3
(Lab Required)(Formerly 064.160) This course covers the fundamental knowledge of textiles in a product development context. It includes properties of fibres, yarns and fabrics; characteristics of natural and manufactured fibres; chemical structures of the most commonly used natural and manufactured fibres for apparel and non-apparel end uses; woven, knitted, and non-woven structures; and dyeing and printing. Not to be held with 064.102.

TXSC 1610 Textiles, Product, and Consumers Cr.Hrs. 3 (Formerly 064.161) This course covers the structure and characteristics of the natural and manufactured fibre sectors; downstream industries which transform natural or manufactured fibres into intermediate goods; the manufacturing industry which transforms intermediate supplies to final products; and the retailing industry which distributes final textile products to consumers or organizations.

## SECTION 5: Textile Sciences -2000 Level

TXSC 2420 History of Textiles Cr.Hrs. 3
(Formerly 064.242) Development and diffusion of textile fibres, fabrics, and finishes from prehistoric times to present. May not hold with 064.332.

TXSC 2500 Preparation for Product Development Cr.Hrs. 1 Designed for students with little or no background in textile product assembly or for students who require a refresher course. This course provides an orientation to textile product assembly equipment, construction, techniques, and terminology. Students must pass this course before they will be permitted to continue in TXSC 2630. For Textile Sciences students only. NOTE: The credit associated with this course will not be counted toward the minimum credit hour requirements of the Textile Sciences degree. (Pass/fail grade).

TXSC 2600 Textiles for Apparel End Uses Cr.Hrs. 3 (Formerly 064.260) Theories of product development and their applications to creating textile products for apparel end uses including fashion apparel; apparel for consumers throughout the lifespan, including childhood, young adults, older adults; apparel for consumers with disabilities; apparel for professional sports and recreation; and apparel for the healthcare sector. Prerequisites: [064.102] or [a minimum grade of C in TXSC 1600 (064.160) and TXSC 1610 (064.161) and 3 credit hours of 100 -level chemistry].

TXSC 2610 Textiles for Non Apparel End Uses Cr.Hrs. 3 (Formerly 064.261) Product development theories from engineering and management perspectives to illustrate the development of textile fibres, fabrics, and products for the industrial and healthcare sectors. Industrial uses of textiles include the automotive and the aerospace industries. End

## ACADEMIC CALENDAR 2012-2013 b

University of Manitoba
uses for the healthcare sector include textiles or textile products for rehabilitation, protection from bacteria, healing of wounds, and implantable textiles. Assessment of selected fabric properties such as strength, flammability, colourfastness and air permeability will be introduced. Prerequisites: [064.102] or [a minimum grade of C in TXSC 1600 (064.160) and TXSC 1610 (064.161) and 3 credit hours of 100 -level chemistry].

TXSC 2620 Consumer and Organizational Behaviour Toward Textile Products Cr.Hrs. 3 (Formerly 064.262) Theories and practics of consumer and organizational decision making with respect to textile products. Prerequisites: TXSC 2600 (064.260) or TXSC 2610 (064.261). Not to be held with MKTG 3230 (118.323).

TXSC 2630 Pattern Development in an Industrial Environment Cr.Hrs. 3 (Lab Required)(Formerly 064.263) This course covers the process of communicating product design through pattern development. Students will learn the terminologies of pattern development, techniques of pattern development and manipulation, and the importance of anthropometry in creating apparel to suit its end uses. Prerequisite: TXSC 2500; TXSC 2600 (064.260). Not to be held with the former 064.348 .

## SECTION 5: Textile Sciences -3000 Level TXSC 3470 SELECTED TOPICS Cr.Hrs. 3

 (Formerly 064.347) Directed study in a specific area of clothing and/or textiles. Prerequisite: consent of instructor and 60 credit hours in the Clothing and Textiles program.TXSC 3500 Textiles for the Healthcare Sector Cr.Hrs. 3 (Formerly 064.350) This course covers the recent developments of a range of technical textiles for the healthcare sector, including implantable textiles, barrier fabrics, and smart textiles. Prerequisite: TXSC 2610 (064.261) and [HMEC 2050 (028.205) or any 2000-level or 3000-level research method course] and CHEM 1000 (001.100) or CHEM 1300 (002.130). Not to be held with 064.347 which was offered from September 2004 to September 2005/2006.

TXSC 3600 Global Apparel and Textiles Trade Cr.Hrs. 3 (Formerly 064.360) Covers the role of apparel and textiles trade in economic growth and development of industrialized, transitional, and developing nations. It will take into account the evolution of trade relations among apparel and textile producing countries and regions. Prerequisite: [TXSC 2620 (064.262)] and [ECON 1010 and 1020 (ECON 1200 (018.120) or ECON 1210 (018.121)] and [ECON 1220 (018.122)] and [HMEC 2000 or HMEC 2050 (028.205)]. Not to be held with the former 064.340.

TXSC 3610 Product Standards and Specifications Cr.Hrs. 3 (Formerly 064.361) Challenge students to apply their knowledge and skills gained in TXSC 2600, TXSC 2610 and TXSC 2620 to develop textiles and textile product standards and specifications for various forms of product development (e.g., private lable, national brands, licensed goods) where there are no known precedents. Students will learn the process of developing product standards by working on case studies. Textile products will include apparel and nonapparel end uses. Prerequisites: TXSC 3620 (064.362) and
[HMEC 2000 or HMEC 2050 (028.205)]. Not to be held with 064.220 or 064.221 or 064.337 .

TXSC 3620 Evaluation of Textile Performance Cr.Hrs. 3 (Lab Required)(Formerly 064.362) Covers the serviceability of textile products for apparel and non apparel end uses. Students will learn to carry out commonly used textile testing methods for assessing durability, comfort, aesthetic properties and safety. Prerequisites: TXSC 2600 (064.260) and TXSC 2610 (064.261). Not to be held with the former 064.220 or 064.221or 064.337.

TXSC 3630 Line Planning and Visual
Communication Cr.Hrs. 3
(Formerly 064.363) Covers the steps in developing a line of textile products for apparel and home furnishings end uses and the techniques of communicating product information to relevant members of the supply chain. Students will learn manual methods and computer aided design solutions to communicate product concepts. Prerequisite: TXSC 2630 (064.263). Not to be held with the former 064.225.

TXSC 3640 Pattern Development in a Computer Aided Design Environment Cr.Hrs. 3
(Formerly 064.364) This course is a continuation of TXSC 2630. It covers advanced pattern manipulations using an industrial computer aided design system. Prerequisite: TXSC 2630 (064.263) and TXSC 3650 (064.365). Not to be held with 064.349.

TXSC 3650 Production of Textile Products Cr.Hrs. 3 (Formerly 064.365) Covers the role of production in the product development process. Students will learn the terminology which meets industrial standards, the most commonly used production techniques for apparel and non apparel products, time studies, costing, development of specifications, manufacturing systems, and selected test methods for quality management. Prerequisites: TXSC 2630 and [HMEC 2000 or HMEC 2050 (028.205)\}. Not to be held with 064.224 and 064.342

TXSC 3700 Special Topics in Textile Sciences Cr.Hrs. 6 This course will vary from year to year depending on the trends within the textile/apparel complex. Students will be given the opportunity to study a detailed area of textile sciences throuigh a field experience or travel study. Prerequisite: Permission of the instructor.

## SECTION 5: Textile Sciences -4000 Level

TXSC 4210 Seminar in Clothing and Textiles Cr.Hrs. 3 (Formerly 064.421) Critical study of literature and other information sources in the field of clothing and textiles. Oral and written reports required. Restricted to fourth year majors in the department.

TXSC 4260 Cr.Hrs. 3
(Formerly 064.426) Application of marketing in the textile industries. Prerequisites: 064.340 and MKTG 2210 (118.221).

TXSC 4310 PRACTICUM Cr.Hrs. 3
(Formerly 064.431) Supervised practical experience in the clothing and textile field in an appropriate off-campus setting. Prerequisite: completed 84 credit hours in the Clothing and

Textiles program. GPA is considered; limited enrolment.
TXSC 4320 Selected Topics in Clothing and Textiles I Cr.Hrs. 3
(Formerly 064.432) Directed study in a specific area of clothing and/or textiles. Prerequisite: Consent of instructor and 84 credit hours in the Clothing and Textiles program.

TXSC 4340 SENIOR PROJECT Cr.Hrs. 3
(Formerly 064.434) Independent study on an approved topic in a) marketing, production or design of apparel, b) history of costume and textiles, c) sociopsychological aspects of clothing, or d) textile performance, preservation and use. A detailed proposal for the study must be submitted in order to register. Prerequisite: completed 84 credit hours in the Clothing and Textile program and consent of department head.

TXSC 4500 Advanced Textiles for the Healthcare Sector Cr.Hrs. 3
Covers the latest developments in technical textiles for the healthcare sector and the measurement of attributes which are essential to the performance of textiles for medical or healthcare end uses. Prerequisites: A grade of "C" or better in: [TXSC 2600 (064.260)] and [TXSC 2610 (064.261)] and [TXSC 3620 (064.362)] and [TXSC 3500 (064.350)] and [CHEM 2220 (022.222)].

TXSC 4600 The Information Age and the Textiles Supply Chain Cr.Hrs. 3
Covers the evolution of the textile complex from a production orientation to a logistics orientation; the role of information technology in creating or enhancing competitive advantage; the range of technologies used by the textile complex to communicate design, production, and management information throughout the supply chain; decision making process executives go through to decide which types of technology to purchase, how to implement them within the firm, the financial implications, the effects on business-tobusiness communication, and the effects on business-toconsumer communication. Prerequisite: TXSC 3600.

TXSC 4610 Integrative Project Cr.Hrs. 6
This is a required course in which students are required to demonstrate their ability to integrate the skills and knowledge accumulated in the program. Specifically, students will solve a specific textile or product development problem which may originate from the students' interests, developed in collaboration with academic staff, or community-based. Prerequisite: TXSC 3610 (064.361) and TXSC 3630 ( 064.363 ) and TXSC 3640 (064.364). Not to be held with the former 064.430 or TXSC 4340 (064.434) or TXSC 4210 (064.421) or TXSC 4310 (064.431).

TXSC 4620 Colour Management Cr.Hrs. 3
Covers the basic concepts and principles of colour science, the process of determining seasonal colour palette, colour specification systems, colour notation systems, commercial colour identification systems, the colour approval process in industrial, institutional, and consumer goods settings, colour measurement, and interpretation of colour data. Stduents will learn the process of preserving colour integrity throughout the supply chain. Prerequisites: TXSC 3610 ( 064.361 ). Not to be held with the former 064.339 or 064.430.

TXSC 4630 Quality Assurance Systems Cr.Hrs. 3
Covers the concept of total quality management; the role of
total quality management in apparel and textiles; the role of standard setting agencies in developing standards of product and service quality; management systems such as ISO 9000 and case studies of textiles and apparel firms which have adopted these systems. Students will learn by solving a series of problems presented to them in the format of case studies. Prerequisites: TXSC 3650 and TXSC 4620. Not to be held with 064.220 or 064.221 or 064.337 .

University of Manitoba

## Faculty of Kinesiology and Recreation Management

Dean: Jane Watkinson
Associate Dean(s): Associate Dean (Academic): Joannie Halas
Campus Address/General Office: 102 Frank Kennedy Building
Telephone: (204) 4749747
Fax: (204) 4747634
Email Address: kinrec@cc.umanitoba.ca
Website: umanitoba.ca/kinrec
Academic Staff: Please refer to the faculty website at umanitoba.ca/faculties/kinrec/about/faculty.html

## Chapter Contents

SECTION 1: Degree Programs Offered

3.4 University Gold Medal and Program Medals

5.8 Challenge for Credit<br>5.9 Courses Available to Students in Other Faculties and Schools

5.10 Departmental Permission

SECTION 6: Course Descriptions

## Faculty of Kinesiology and Recreation <br> Management Information

The mission of the faculty is to discover and disseminate knowledge related to physical activity, human movement, sport, and leisure to improve the health, well-being and quality of life of Manitobans, Canadians and citizens of the world.

## Academic Program Strategic Goals:

To provide high quality, evidence-based degree programs that prepare students academically and professionally to
create and disseminate knowledge in areas related to human movement and leisure.

## Undergraduate Program Goals:

To deliver sound undergraduate curricula to students in areas broadly related to physical activity, recreation, and applied health, who by the completion of their undergraduate degrees will:

- have general knowledge and specific knowledge in their fields, including knowledge of current research;
- be able to use critical thinking skills across a broad range of issues in their fields;
- be able to communicate effectively (orally, in writing, and technologically);
- be competent in relevant skills and practices;
- be literate in common information technology;
- be advocates for healthy living;
- respect diversity;
- be prepared for future employment and/or study in their fields.

## SECTION 1: Degree Programs Offered

1.1 Programs/Majors,

| Program/Degree | Years to Complete | Total Credit Hours |
| :--- | :--- | :--- | :--- |
| Bachelor of Physical Education | 3 | 102 |
| Bachelor of Kinesiology | 4 | 120 |
| Bachelor of Kinesiology- Athletic Therapy | 4 | 126 |
| Bachelor of Recreation Management and Community Development | 4 | 120 |

*This includes one year ( $\mathbf{3 0}$ credit hours) of study in University 1.
1.2 Available Minor,

Minor in Recreation Studies (See Section 4.6 for details)

### 1.3 Available Option,

Interfaculty Option in Aging (See Section 4.7 for details)

### 1.4 Available Areas Of Emphasis:,

- Aging (BKin and BRMCD)
- Community Development and Wellness (BKin and BRMCD)
- Culture and Diversity (BKin and BRMCD)
- Coaching (BKin only)
- Fitness Professional (BKin only)
- $\quad$ Sport and Event Management (BRMCD only)
- Sustainable Tourism and Recreation (BRMCD only)

## SECTION 2: Admission Requirements Admission Information

The following is a summary of the admission requirements for the Faculty of Kinesiology and Recreation Management. All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the University of Manitoba website in January each year.

## Direct Entry (from High School)

New for the 2012-2013 academic year, the Faculty of Kinesiology and Recreation Management began accepting some students into our three degree programs (excludes Athletic Therapy) directly from High School.

In addition to the general U of M admission requirements for high school students, to be considered for direct entry into the Faculty of Kinesiology and Recreation Management you
will require a minimum $85 \%$ average over the following courses, with no less than $60 \%$ in each individual course:

- English 40S
- Mathematics 40S
- Biology 40S (recommended for B.Kin.), Chemistry 40S, Physics 40S, or Social Studies 40S (World Human Geography, Western Civi-lization History, or Social Studies: World Issues)

Any student applying for Direct Entry admission to this faculty will automatically be considered for admission to University 1, should they not be granted Direct Entry admission.

## Regular Admission (from U1 or another academic program)

The general admision requirement for all degrees except Bachelor of Kinesiology - Athletic Therapy is completion of any 24 credit hours of University 1 coursework. However, in order to complete the degree in the shortest time possible it is recommended that students take the required Year 1 courses before applying to the Faculty. Entering students who have not completed all of the required Year 1 courses must complete them during their program. Equivalent ac-ademic course work completed from other recognized post secondary institutions will be considered.

Minimum GPA for admission consideration is 2.0 but admission is competitive.

Applicants who are members of traditionally disadvantaged groups (i.e., Aboriginal peoples, persons with disabilities, visible minori-ties, recent immigrants, etc.) may apply under a Special Consideration Cat-egory. Further information on the criteria for this category is available by contacting the Faculty.

### 2.1 Admission Requirements: Bachelor of Kinesiology,

 Completion of a minimum of any 24 credit hours in University 1. However, in order to complete the degree in four years, the following first-year courses are recommended ( 30 credit hours):BIOL 1020 Biology 1: Principles and Themes and BIOL 1030 Biology 2: Biological Diversity, Function and Interaction (with a minimum grade of "C" in each) or BIOL 1000 Biology: Foundations of Life and BIOL 1010 Biological Diversity and Interaction (with a minimum av-erage grade of "C+"). Successful completion of BIOL 1020 and BIOL 1030 or BIOL 1000 and BIOL 1010 is required for admission to the Athletic Therapy Program and is strongly recommended for admission to Kinesiology.

PERS 1200 Physical Activity, Health and Wellness
PERS 1400 Concepts of Recreation and Leisure

PERS 1500 Foundations of Physical Education and Kinesiology

PSYC 1200 Introduction to Psychology
STAT 1000 (M) Basic Statistical Analysis 1

3 credit hours to fulfill the Written English Requirement

3 credit hours of Electives

### 2.2 Admission Requirements: Bachelor of Physical Education,

Completion of a minimum of any 24 credit hours in University 1. However, in order to complete the degree in three years, the following first-year courses are recommended ( 30 credit hours):

BIOL 1410 Anatomy of the Human Body and BIOL 1412 Physiology of the Human Body (minimum grade of "C") NOTE: BPE students who have completed BIOL 1020 and BIOL 1030 will also be required to take BIOL 1412, as BIOL 1412 is a pre-requisite for KIN 3470.

Written English Requirement: ENGL 1XXX English Literature (6 credit hours)

PERS 1500 Foundations of Physical Education and Kinesiology

PSYC 1200 Introduction to Psychology

A course that satisfies the Mathematics requirement from the Mathematics or Statistics department

6 credit hours of Electives (in area of teachable minor)
2.3 Admission Requirements: Bachelor of Recreation Management and Community Development,
Completion of a minimum of any 24 credit hours in University 1. However, in order to complete the degree in four years, the following first-year courses are recommended ( 30 credit hours):

PERS 1200 Physical Activity, Health and Wellness
PERS 1300 Introduction to Leisure Travel

PERS 1400 Concepts of Recreation and Leisure

PERS 1500 Foundations of Physical Education and Kinesiology

PSYC 1200 Introduction to Psychology
STAT 1000 (M) Basic Statistical Analysis 1

3 credit hours to fulfill the Written English Requirement

6 credit hours of Electives

### 2.4 Additional Admission Requirements,

High School Prerequisites: Math 40S (minimum grade of $50 \%$ ) is required for all programs. Biolo-gy 40S (minimum grade of $50 \%$ ) is required for BKin and BPE. Chemistry 40 S and Physics 40 S are not required but may be helpful for $B K i n$ and BPE.

Valid Health Care Provider CPR and Standard First Aid certification are required for successful applicants to the Bachelor of Kinesiology - Athletic Therapy Program, prior to the commencement of courses in this program.

### 2.5 Transfer and Second Degree Students,

Students admitted to the Faculty of Kinesiology and Recreation Manage-ment following the completion of another recognized university degree or coursework may transfer in credit that is deemed equivalent toward the course requirements of a Kinesiology and Recreation Management undergraduate degree. Students are eligible to transfer a maximum of 50 credit hours to the Bachelor of Physical Education degree and a maximum of 60 credit hours to the Bachelor of Kinesiology and Bachelor of Recreation Management and Community Development programs.

Students who hold a degree and have completed further cours-es at the University of Manitoba which are applicable to their second degree in the Faculty of Kinesiology and Recreation Manage-ment but which were not used for credit toward their first degree may receive additional transfer credit for that work.

Equivalent courses completed at other universities or postsecondary insti-tutions will be considered for admission and transfer credit only if the courses have been taken within the last 10 years.

Students are encouraged to contact an Academic Advisor in the Faculty General Of-fice for information on how to optimize their transfer credit. Course transfer equivalencies will not be processed until after an application and all necessecary documents have been submitted.

### 2.6 Visiting Students,

Students who are enrolled and pursuing a degree at another institution may apply to be a visiting student with the Faculty of Kinesiology and Recreation Management. A Letter of Permission from the home institution granting permission to register for courses from the University of Manitoba is re-quired in order for access to be granted to those courses.

### 2.7 Special Students, After-Degree Special Students

Students who have successfully completed a first degree program in a related field who are not seeking another degree and wish to register for courses from the Faculty of Kinesiology and Recreation Management are eligible to apply as Spe-cial Students.

## SECTION 3: Faculty Academic Regulations

All students are asked to note that some academic policies and regulations may be subject to change. Please check the Web Calen-dar at umanitoba.ca for updated information.

The provisions of the following chapters from the Undergraduate Calendar (Uni-versity Policies, and General Academic Regulations and Requirements) ap-ply to all students. In addition, the Faculty of Kinesiology and Recreation Management has regulations and requirements, published below, that ap-ply specifically to its students.

### 3.1 Scolastic Standards: Academic Assessment, Scholastic Standards:

Formal academic assessments are performed following each term for all Faculty of Kinesiology and Recreation Management students who have completed 3 or more credit hours. As a result of this assessment students will be determined to be minimum met, satisfactory, on probation, suspension warning, or academic suspension for one year. All academic assessments will appear on the student's official transcript.

## Minimum Met

Students must achieve a minimum DGPA of 2.0 at each point of assessment in order to have met the minimum requirements of the Faculty of Kinesiology and Recreation Management. Students who do not achieve a minimum DGPA of 2.0 will be placed on probation.

## Probation

Once placed on probation, a student will be placed on hold and must meet with an academic advisor to review performance and to receive an override in order to register for another term. Students on probation who achieve a minimum term GPA of 2.0 will be assessed as satisfactory. Students who do not achieve a minimum term GPA of 2.0 will be placed on suspension warning.

## Satisfactory

The assessment of satisfactory is used once a student has been placed on probation but has subsequently achieved a minimum term GPA of 2.0. Students with satisfactory standing will be able to register without restrictions. Students who do not maintain a minimum term GPA of 2.0 will be placed on suspension warning.

## Suspension Warning

Once placed on suspension warning, a student must meet with an academic advisor before registering for another term. Students on suspension warning who achieve a minimum term GPA of 2.0 will be assessed as satisfactory. Students who do not achieve a minimum term GPA of 2.0 will be placed on academic suspension.

## Academic Suspension

A student placed on academic suspension in the Faculty of Kinesiology and Recreation Management is not permitted to register for a period of one calendar year. The notation "Academic Suspension for 1 Year" will be recorded on the student's transcript.

Once a student has served a one year suspension, they must contact an academic advisor in order to be reinstated for future registration.
3.2 Policy on Repeating Faculty Required Courses, A minimum grade of " $C$ " is required to pass all Facultyrequired courses. Students will be permitted to repeat a failed Faculty-required course only once while in the program. Students who fail the same Faculty-required course twice will normally be required to withdraw from the program.

### 3.3 Dean's Honour List,

Students enrolled in 12 credit hours or more who achieve a Term GPA of 3.50 or higher will be placed on the Dean's Honour List. The Dean's Honour List will be calculated after each term (i.e. Fall, Winter, and Summer).

The Dean's Honour List designation will appear on the student's transcript.

### 3.4 University Gold Medal and Program Medals, Gold Medal

The Faculty of Kinesiology and Recreation Management will award the University Gold Medal to the graduating student who:

1) has achieved the highest grade point average of all graduating students (minimum 3.75) on courses constituting the last two years of an eligible program (and including transfer courses in the applicable years); and,
2) has completed at least 80 percent of what is considered to be the normal full course-load in each of the last two years of the eligible program.

## Program Medals

There are two program medals awarded each year in the Faculty of Kinesi-ology and Recreation Management to the two students with the highest standing (according to the University Gold Medal criteria) in the programs in which the winner of the University Gold Medal in Kinesiology and Rec-reation Management is not registered (the three programs are Kinesiology, Physical Ed-ucation, and Recreation Management and Community Development).

### 3.5 Degree With Distinction,

Awarded to students who graduate with a cumulative Degree GPA of 3.8 or higher. The notation of 'Degree with Distinction' will ap-pear on the student's parchment and transcript.

### 3.6 Attendance and Withdrawal,

Students absent from class for three or more days due to illness are required to present a certificate from a physician. Unexcused absence of more than three hours of class time in a theory course or experiential learning course may result in the student being required to withdraw from the course or may result in an "F" grade being assigned.

### 3.7 Leave of Absence,

Students who have not registered for a full academic session will need to reactivate their status by contacting the Faculty General Office and must consult with an Academic Advisor. Students who have been absent from study for more than 5 years or have attended another institution since their last registration (not on a Letter of Permission) will have to reapply for ad-mission to the university.

### 3.8 Time Limit for Completion of the Degree,

Students admitted to the Bachelor of Kine-siology, Bachelor of Physical Education, or Bachelor of Recreation Management and Community Develop-ment degree programs must complete all requirements to graduate within ten years of admission to the program. Students with questions relating to the time limit regulation should consult the Undergraduate Program Ad-ministrator.

### 3.9 Academic Integrity,

The Faculty of Kinesiology and Recreation Management strictly adheres to the University of Manitoba Student Discipline By-Law and will enforce these regulations. It is the responsibility of the student to know what con-stitutes academic dishonesty. Plagiarism or any other form of cheating is subject to academic penalty, which could be as serious as suspension or expulsion from the Faculty or university. Students are encouraged to avoid academic misconduct by learning more about the University of Manitoba regulations at:
http://umanitoba.ca/student/resource/student_advocacy/inde x.html

### 3.10 Student Academic Appeals,

Students who wish to appeal matters concerning their academic status should contact the Faculty of Kinesiology
and Recre-ation Management Associate Dean (Academic).
The Faculty has an academic ap-peals process for students who wish to appeal a policy or decision affecting their program of study.

## SECTION 4: Program and Graduation <br> Requirements <br> Degree Requirements and Course Selection

It is the student's responsibility to have read the Undergraduate Calendar and Registration Guide carefully, and to know all relevant university and faculty regulations, policies and practices. Completion of degree require-ments is the responsibility of the student. Returning students should con-tact their advisor if they have any questions concerning their curriculum.

The following requirements apply to students in all four undergraduate de-gree programs in the Faculty. The four degree programs have a base of shared introductory core courses, as well as shared upper level courses with a professional focus. Shared core courses are intended to ensure stu-dents recognize the interconnections across our Faculty and its related fields of practice, and to facilitate the professional education of students.

## Course Prefixes:

KIN Denotes required and elective courses in the Kinesiology degree program

PERS Denotes elective and core courses common to the undergraduate degree programs

PHED Denotes required and elective courses in the Physical Education degree program

REC Denotes required and elective courses in the Recreation Manage-ment and Community Development degree program

## Introductory Core Courses (18-21 credit hours):

PERS 1400 Concepts of Recreation and
Leisure 3

PERS 1500 Foundations of Physical Education and Kinesiology 3
PSYC 1200 introduction to
Psychology
University Math Requirement:

## STAT 1000 Basic Statistical Analysis

**In lieu of PERS 3460, KIN 2540 Psychology of Sport and Physical Activity (3) fulfils the social science requirement for Athletic Therapy Program stu-dents only
$\dagger$ BKin and BRMCD only
4.1 Program Requirements: Bachelor of Kinesiology, (Students admitted in September 2011 or later)

## Program and Graduation Requirements: Bachelor of Kinesiology

To graduate with a four-year Bachelor of Kinesiology degree, a student must have passed the 120 credit hours of the program outlined below and must have achieved a Degree Grade Point Average (DGPA) of 2.00 with a minimum grade of " $C$ " in all Faculty-required courses.

A maximum of 158 credit hours may be attempted in order to obtain the 120 credit hours required for graduation with the Bachelor of Kinesiology degree.

Degree Exit Requirement: Current Basic Rescuer CPR and Emergency or Standard First Aid Certification

### 4.2 Program Requirements: Bachelor of Kinesiology -

## Athletic Therapy,

(Students admitted in September 2011 or later)

## Program and Graduation Requirements: Bachelor of Kinesiology - Athletic Therapy

To graduate with a four-year Bachelor of Kinesiology Athletic Therapy degree, a student must have passed the 126 credit hours of the program outlined below and must have achieved a Degree Grade Point Average (DGPA) of 2.00 with a minimum grade of " $C$ " in all Faculty-required courses.

A maximum of 166 credit hours may be attempted in order to obtain the 126 credit hours required for graduation with the Bachelor of Kinesiology - Athletic Therapy.

Students are expected to progress through the Athletic Therapy program as outlined below. It is strongly recommended that courses be completed in the sequence and year indicated, otherwise an additional year may be re-quired.

Successful completion of BIOL 1020 and BIOL 1030, with a minimum grade of "C", or BIOL 1000 and BIOL 1010, with a minimum average grade of " $\mathrm{C}+$ " is a re-quirement for admission to the Athletic Therapy Program.

Valid Health Care Provider CPR and Standard First Aid certification are required before the beginning of each term of registration (if lapsed, students must re-certify). Each year while in the program, Athletic Therapy students must also register as members with both the Manitoba Athletic Therapists Association (MATA) and Canadian Athletic Therapists Association (CATA).

Athletic Therapy Practica (KIN 3912, KIN 3914 \& KIN 4910)

## 

## ACADEMIC CALENDAR

 2012-2013 bUniversity of Manitoba

Students in the Athletic Therapy Program will be required to complete sev-eral hours of clinical and field (sports team) experiences on campus and in the community during their degree. These experiences pro-vide opportunities to apply the knowledge and skills students obtain via their educational curriculum, in a practical hands-on manner, and
there-fore enhance their preparation for the Canadian Athletic Therapy Associa-tion (CATA) examinations. Students must successfully com-plete the previous year's courses and be registered in all of the present year's courses in order to register in each practicum (KIN 3912, KIN 3914 \& KIN 4910).

Degree Exit Requirement: Current Basic Rescuer CPR and Emergency or Standard First Aid Certification

### 4.3 Program Requirements: Bachelor of Physical <br> Education,

(Students admitted in September 2011 or later)
To graduate with a three-year Bachelor of Physical Education degree, a stu-dent must have passed the 102 credit hours of the program outlined below and must have achieved a Degree Grade Point Average (DGPA) of 2.00 with a minimum grade of " C " in all Faculty-required courses.

## Program and Graduation Requirements: Bachelor of Physical Education

A maximum of 132 credit hours may be attempted in order to obtain the 102 credit hours required for graduation with the Bachelor of Physical Ed-ucation degree.

YEAR 1 / University 1: 30 Credit Hours
Course No. Cr.Hrs.
BIOL 1410
Anatomy of the Human Body
BIOL $1412 \quad$ Physiology of the Human Body 3
ENGL 1XXXW English (1200, 1300, or 1310 \& 1340)

*Note: Advanced Recreation Electives offered change each year. Consult with an Academic Advisor for a list of approved courses that may fulfil this requirement.
** PERS 4630 Supervised Fieldwork Experience is strongly recommended in Year 4 (12 credit hours)
** A maximum of 18 credit hours of electives may be taken from outside the Faculty following Year 1.
Degree Exit Requirement: Current Basic Rescuer CPR and Emergency or Standard First Aid Certification

### 4.5 Program Requirements for Students Admitted Prior

 to 2011,Faculty of Kinesiology and Recreation Management Students admitted before September 2011 will notice changes to course and program requirements. Students admit-ted prior to 2011 should contact the Undergraduate Program Administrator or Academic Advisor at the Faculty General Office for information on their specific degree requirements and courses needed for graduation.
4.6 Minor in Recreation Studies (123),

To qualify for and declare the Minor in Recreation Studies, students must achieve a grade of "C" or better in the two introductory courses PERS 1300 and PERS 1400. A student must obtain approval and declare the minor with their home faculty for access into advanced REC courses.

Required Core Courses for the Minor in Recreation Studies (12 credit hours):

- PERS 1300 Introduction to Leisure Travel (3 credit hours)
- PERS 1400 Concepts of Recreation and Leisure (3 credit hours)
- REC 2400 Management and Marketing of Leisure Services (3 credit hours)
- REC 3090 Sustainable Nature-Based Tourism (3 credit hours)

Electives (Choose 6 credit hours from the following):
REC 4090 Sustainable Nature-Based Tourism Planning, Management and Research (3 credit hours)

REC 4170 Sport Management (3 credit hours)
REC 4250 Leisure and Aging (3 credit hours)

REC 4310 Administration of Special Events (3 credit hours)
REC 4350 Parks and Protected Areas Planning and Management (6 credit hours) (Summer Session Travel Study - Instructor Permission Required)

PERS 4200 Special Topics (3 credit hours)
**External students may complete up to 12 credit hours from the Recreation Studies Minor course list without declaring the minor. Students who declare the minor must take the minimum 18 credit hours but will be allowed to take up to 30 hours from the above courses.

Note: No minor in Physical Education or Kinesiology is offered.

### 4.7 Interfaculty Option in Aging,

The Option in Aging is offered by and in the following faculties: Arts, Hu-man Ecology, Nursing, Kinesiology and Recreation Management, and Social Work.

Students in the Faculty of Kinesiology and Recreation Management can elect to complete the Option in Aging which consists of 18 credit hours of aging-related course-work. All Option in Aging students MUST complete the following two courses ( 6 credit hours):

- KIN 2610/ NURS 2610 Health and Physical Aspects of Aging (alternates between faculties)
- REC 2650/HMEC 2650/SWRK 2650 Social Aspects of Aging (alternates between faculties)

PLUS ONE OF (3 credit hours):

- REC 4250 Leisure and Aging (BRMCD students; not offered every year)
- KIN 4500 Physical Activity and Aging (BKin students)

AND ELECTIVES* (9 credit hours):

- Approved age related courses from Kinesiology and Recreation Management or other faculties. A current list of applicable courses is available at the Faculty General Office.

In order to declare the Option in Aging, students must meet with an Academic Advisor once they have successfully completed the two compulsory courses of KIN 2610/ NURS 2610 and REC 2650/HMEC 2650/SWRK 2650.

Upon graduation, a student who has met all the requirements will have the concentration added to their transcript indicating they have completed the Option in Aging.

### 4.8 Supervised Fieldwork Experience (PERS 4630),

The supervised fieldwork experience is a professionally supervised experience that provides the student with the opportunity to apply knowledge gained in academic courses, and gives exposure to a workplace environment in a related field.

Students in the BKin and BRMCD programs are eligible to register for the 12 credit hour course provided they will complete 90 credit hours toward the degree and achieve a minimum Degree Grade Point Average of 2.5 or higher at the end of the third year of their degree. Student placements are scheduled for 13 weeks (working full-time) during the Fall Term (September through December). Information on the application process, deadlines and course details are available on the Faculty website and at the Faculty General Office.

### 4.9 External Minors,

Kinesiology and Recreation Management students may choose and declare an external minor offered by the Faculty of Arts, Clayton H. Riddell Faculty of Environment, Earth, and Resources, Faculty of Human Ecology, Faculty of Science, Faculty of Management, Marcel A. Desautels Faculty of Music, or School of Art. Completion of a declared minor is optional. See the applicable faculty and department chapters for the requirements of each minor. Minors must be declared with an Academic Advisor at the Faculty General Office in order to be approved and appear on a student's transcript.

In order to declare the Management Minor from the I. H. Asper School of Business, Faculty of Kinesiology and Recreation Management students must achieve a 3.0 DGPA (or higher). If a student has successfully completed 18 credit hours of course work from the Faculty of Management, and a 2.0 GPA in the Management course work by the time of graduation, the Minor in Management may also be declared upon completion of the degree program.

### 4.10 Education Teachable Minors (BPE Program),

Students who intend to apply for admission to the Faculty of Education af-ter completing their BPE degree should review the information in the cur-rent Undergraduate Calendar and consult with the Faculty of Education to ensure they are selecting an appropriate teachable minor and courses for their choice of the Early, Middle or Senior Years stream.

### 4.11 Canadian Society for Exercise Physiology Certifications (CSEP: CPT \& CEP),

The Canadian Society for Exercise Physiology Certified Exercise Physiologist (CSEP-CEP) is the highest level of professional certification for Kinesiology graduates in Canada. Through specific theory and practical based course work students are prepared for the national certification process. Further information can be found on the Faculty's website on how to become a Certified Personal Trainer (CSEP-CPT) or a Certified Exercise Physiologist (CSEPCEP).

## SECTION 5: Registration Information for All Students <br> Faculty Academic Advisors

If you require further information after reading the Undergraduate Calendar, contact the Kinesiology and Recreation Management academic advisors, 8:30 a.m. 4:30 p.m. Monday - Friday.

Patti Dickieson, Academic Advisor
103B Frank Kennedy Centre
telephone (204) 4749748
Advising/Office Assistant
102 Frank Kennedy Centre
telephone (204) 4749747

### 5.1 Faculty Orientation Sessions,

All new students admitted to the Faculty must attend an Orientation session in order to be unblocked from registra-tion. Dates will be provided with the letter of acceptance (normally in early July before registration initial access) and on the Faculty website.

At this session students will receive important information regarding their program, registration, and an orientation manual. Upon acceptance into the Faculty, students from outside of the province will be sent an orientation manual and should contact an Academic Advisor to discuss registration and other matters prior to registration initial access.

### 5.2 Course Sequencing and Prerequisites,

Planning the sequence of required courses is essential. Several Faculty courses in all degrees require suc-cessful completion of another course in order to register. Some courses may only be offered once per year. Please check current catalogue and class schedules in your program to
ensure that you achieve what is necessary for efficient course enrolment in future terms.

### 5.3 Repeating Courses,

When a course is repeated, the most recent attempt of that course will be included in the calculation of the Degree Grade Point Average; however, both grades will appear on the student academic history and official transcript. If a student wishes to repeat a course in which a grade has previously been assigned, they should contact an Academic Advisor for the necessary registration override prior to initial access.

Students will be permitted to repeat a failed Faculty-required course only once while in the program. Students who fail the same Faculty-required course twice will normally be required to withdraw from the program.

### 5.4 Course Space Reserves,

Each degree program requires courses from outside faculties and depart-ments. Specific sections in the following required courses have spaces reserved for students:

Recreation Management and Community Development:
There are select reserved sections for STAT 1000.

Kinesiology/AT: There are select reserved sections for BIOL 2410, BIOL 2420, and STAT 1000.

Physical Education: There are select reserved sections for BIOL 1410 and BIOL 1412.

Students with the appropriate program code, major and/or minor will be able to access the reserve section of a required course. These courses can be identified in the Class Schedule as having section codes that appear as R01, R02...during registration initial access.
5.5 Experiential Learning Courses (ELCs), Experiential learning courses (ELCs) provide three credit hours of integrated theory and practice, and include applied activities that are designed to translate theoretical components to hands-on-learning in the gymnasium, dance studio, fitness studio, playing field, outdoor environment or clinic. Below is a list of Faculty of Kinesiology and Recreation Management experiential learning courses:

- KIN 2750 Athletic Therapy Skills
- KIN 3740 Resistance Training and Conditioning
- PHED 2400 Coaching Theory and Practice
- PHED 2402 Advanced Coaching Theory and Practice
- PHED 2710 Human Movement Principles
- PHED 2720 Developmental Games and Activities
- PHED 2730 Gymnastics, Dance and Rhythmic Activities
- PHED 2740 Fitness Theory and Practice
- PHED 3102 Aboriginal Song and Dance
- PHED 3710 Active Health and Human Potential
- PHED 3750 Lifestyle Activities
- PHED 3760 Diverse Populations Mentorship
- PHED 3770 Aboriginal Games and Activities
- PHED 4710 Outdoor Education
- REC 4720 Wilderness Adventures
5.6 Courses Requiring a Paid Facility Use Pass, In some courses students will be required to purchase a facility use pass in order to gain access into and utilize various learning environments. Students should be prepared to have their pass within the first week of class in the applicable term. Students report to the Recreation Services Customer Service Desk in Frank Kennedy Centre and must present a current proof of registration. Recreation Services information and rates can be found at:

## http://umanitoba.ca/faculties/kinrec/bsal/programs

The following courses require a facility use pass:

KIN 3470 Exercise Physiology
KIN 3740 Resistance Training and Conditioning (ELC)

KIN 4460 Fitness Appraisal and Lifestyle Counselling

KIN 4560 Advanced Fitness Appraisal and Lifestyle Counselling

PHED 2400 Coaching Theory and Practice (ELC)
PHED 2402 Advanced Coaching Theory and Practice (ELC)

PHED 2710 Human Movement Principles (ELC)
PHED 2720 Developmental Games and Activities (ELC)

PHED 2730 Gymnastics, Dance and Rhythmic Activities (ELC)

PHED 2740 Fitness Theory and Practice (ELC)

PHED 3102 Aboriginal Song and Dance
PHED 3750 Lifestyle Activities (ELC)

PHED 3770 Aboriginal Games and Activities (ELC)

REC 3200 Advanced Program Planning and Leadership

### 5.7 Course Field Work Fees,

PERS 1500 Foundations of Physical Education and Kinesiology: \$50.00

PHED 3750 Lifestyle Activities: $\$ 30.00$
REC 3090 Sustainable Nature-Based Tourism: $\$ 40.00$

KIN 3320 Advanced Human Anatomy: \$55.00
PHED 3770 Aboriginal Games and Activities: \$25.00

PHED 3102 Aboriginal Song and Dance: \$25.00

REC 4090 Sustainable Nature-Based Planning, Management, and Research: \$40.00

REC 4720 Wilderness Adventures: $\$ 50.00$

### 5.8 Challenge for Credit,

PERS 1500 Foundations of Physical Education and Kinesiology is open to challenge for credit. Students must demonstrate their competence in this course before challenging (e.g., students with significant professional experience and training who may have the necessary knowledge; transfer students who may have completed several related courses at other institutions that are not directly equivalent to PERS 1500). The Academic Schedule in the front section of this Calendar contains the relevant registration deadline dates appropriate to challenge for credit.
5.9 Courses Available to Students in Other Faculties or Schools,
Students from University 1 and other faculties or schools may register for the following courses:

- PERS 1200 Physical Activity, Health and Wellness
- PERS 1300 Introduction to Leisure Travel
- PERS 1400 Concepts of Recreation and Leisure
- PERS 1500 Foundations of Physical Education and Kinesiology
- KIN 2610 Health and Physical Aspects of Aging
- REC 2650 Social Aspects of Aging

Students from other faculties or schools (not University

1) may register for the following courses:

- PERS 3170 Canadian Sport History
- KIN 3520 Coaching the High Performance Athlete A
- KIN 3530 Coaching the High Performance Athlete B

PHED 2740 Fitness Theory and Practice: $\$ 10.00$

- REC 4250 Leisure and Aging

Students who have declared the Recreation Studies Minor may register for additional Recreation Studies courses refer to requirments in Section 4.6.

Note: During the Summer Session, students from other faculties and schools may register for additional courses after the initial registration access week, provided that they have the pre-requisite courses. Check the course descriptions.

### 5.10 Departmental Permission,

Students from other faculties who wish to register for courses other than those mentioned above may seek departmental permission by obtaining a form from the Faculty General Office (102 Frank Kennedy Centre) at the end of the initial registration access period of the applicable session.

## SECTION 6: Kinesiology -2000 Level

KIN 2320 Human Anatomy Cr.Hrs. 3
(Lab Required) Structure of the skeletal, articular, and muscular systems of the human body. May not be held for credit with PHED 2320 (057.232), REHB 1480 (068.148), REHB 1490 (068.149), or REHB 1500 (068.150). Prerequisite: BIOL 1030 (C) or both BIOL 1000 (071.100) and BIOL 1010 (071.101) (C+ in each) or BIOL 1412 (ZOOL 1330 or 022.133 ) (C).

KIN 2330 Biomechanics Cr.Hrs. 3
(Lab Required) The mechanical and anatomical analysis of human movement. May not hold for credit with PHED 2330 or PHED 2310 (057.231). Prerequisite: KIN 2320 or PHED 2320 (057.232) (C).

KIN 2540 Psychology of Sport and Physical
Activity Cr.Hrs. 3
This course will provide the student with an understanding of psychological variables affecting individuals within sporting and physical activity contexts. Among the topics to be explored with be motivation, arousal/anxiety, group dynamics and youth involvement in sport. May not hold for credit with PHED 2540. Prerequisite: PSYC 1200.

KIN 2610 Health and Physical Aspects of Aging Cr.Hrs. 3 An introduction to health, well-being and aging. Emphasis on health as multidimensional including physical, social and mental health. Integration of theory and research in examining selected issues related to health and physical aspects of aging. This is an Option in Aging course and may not be held for credit with PHED 2610 (057.261) or NURS 2610 (049.261).

KIN 2750 Athletic Therapy Skills Cr.Hrs. 3 This course will focus upon the theoretical study and practical application of massage therapy (basic and advanced) and sport specific taping, splinting and bracing techniques. The intent of this course is to help prepare students for their future in the profession of Athletic Therapy. May not hold for credit with PHED 2020 (057.202) or PHED 3180 (057.318). Open to Athletic Therapy students only.

## SECTION 6: Kinesiology -3000 Level

KIN 3160 Pathology and Sport Medicine Cr.Hrs. 3
(Lab required) Analysis of types of injuries and emergency procedures, and practical experience in first aid, taping and wrapping, massage, and various preventive techniques. May not be held for credit with PHED 3160 or PHED 3060
(057.306). Prerequisite: KIN 2320 or PHED 2320
(057.232)(C).

KIN 3200 Basic Trauma and Life Support Cr.Hrs. 3
(Lab required) Assessment and management of medical emergencies common to sports. Topics will include on-field primary and secondary surveys, airway management, assessment and management of head, spinal, chest, abdominal and extremity trauma. Open only to Athletic Therapy students or with permission of the instructor. May not hold for credit with PHED 3200 (057.320 or 057.319).

KIN 3320 Advanced Human Anatomy Cr.Hrs. 3
(Lab Required) This course will concentrate on the structure and function of the human body's various tissues, organs and systems with particular emphasis upon basic histology, function and gross anatomy. This course will help prepare students who are interested in pursuing careers in Athletic Therapy and Kinesiology. Note: A fieldwork fee is attached tothe course. Prerequisite: [KIN 2320 or PHED 2320 (057.232) (C)]

KIN 3330 Functional Assessment and Restoration
A Cr.Hrs. 3
(Lab required) General principles of assessment and restoration; assessment of acute and chronic musculoskeletal injuries of the lower extremity; rehabilitation techniques to ensure full restoration of function. May not be held with KIN 3300 (PHED 3300 or 057.330). Prerequisite: KIN 3320 (C).

## KIN 3332 Functional Assessment and Restoration

B Cr.Hrs. 3
Assessment of acute and chronic musculo-skeletal injuries of the upper extremity and spine; rehabilitation techniques to ensure full restoration of function. May not be held with KIN 3300. Prerequisite: KIN 3330 (C).

KIN 3400 Therapeutic Modalities Cr.Hrs. 3 (Lab Required) This course will concentrate on the use of therapeutic modalities commonly utilized in the profession of Athletic Therapy. It will introduce the student to various thermal mechanical, and electromagnetic agents used for therapeutic purposes. May not hold for credit with PT 2720 (167.272). Prerequisite: [BIOL 2420) or ZOOL 2540 (22.254].

KIN 3450 Motor Learning Cr.Hrs. 3
(Lab Required). Principles underlying human motor performance and motor skill learning. May not hold for credit with PHED 3450 (057.345).

KIN 3470 Exercise Physiology Cr.Hrs. 3 (Lab required) Physiological and functional responses to acute and chronic exercise, focusing on the cardiovascular, respiratory and neuromuscular systems. May not be held for credit with PHED 3470 or PHED 3430 (057.343).
Prerequisites: BIOL 2420 (ZOOL 2540 or 022.254 ) (D) or

BIOL 1412 (ZOOL 1330 or 022.133 ) (C).
KIN 3512 Principles of Fitness Training Cr.Hrs. 3 Theoretical concepts of designing programs employing the principles of overload and adaptation for all components of fitness for all age groups. May not hold with PHED 3090 (057.309) or PHED 3512. Prerequisite: PHED 3430 (057.343) or KIN 3470 or PHED 3470 (C).

KIN 3520 Coaching the High Performance Athlete A Cr.Hrs. 3
The development of advanced technical and theoretical expertise in coaching, including conflict management, psychology of performance, effective leadership, making ethical decisions, and practice planning. The course prepares students to be "Trained" in the Competition Development level of the National Coaching Certification Program (NCCP). May not hold for credit with PHED 3520. Prerequisite: Faculty permission and 45 credit hours of university-level course work. The student must demonstrate a high level of proficiency as an athlete, coach or official in their sport.

KIN 3530 Coaching the High Performance Athlete B Cr.Hrs. 3
The development of advanced technical and theoretical expertise in coaching, including prevention and recovery, leading drug free sport, developing athletic abilities, and designing a basic sport program. The course completes the fully "Trained" component in the Competition - Development level of the National Coaching Certification Program (NCCP). May not hold for credit with PHED 3530. Prerequisite: KIN 3520 or PHED 3520.

KIN 3740 Resistance Training and Conditioning Cr.Hrs. 3 Development of theoretical and practical knowledge of strength training and conditioning for programming over the entire healthy population from inactive sedentary individuals to elite athletes. May no hold for credit with PHED 2620 (057.262 or PHED 3740). Prerequisite: KIN 2320 (PHED 2320 or 057.232 ) (C) and KIN 3470 (PHED 3470 or PHED 3430 or 057.343 ) (C). Co-requisite: KIN 3512 (KIN 3090, PHED 3512, PHED 3090 or 057.309 ) (C). Requires a paid facility use pass.

KIN 3912 Athletic Therapy Practicum Cr.Hrs. 4 To provide clinical and on-field internship experiences on campus and in the community for prospective Athletic Therapy candidates. May not hold for credit with PHED 3910 (057.391), KIN 3910. Evaluated on a pass-fail basis. Prerequisite [KIN 2750 (C)] and [KIN 2320 (C) or equivalent] and [KIN 3200 (C).

KIN 3914 Clinical Block Placement Cr.Hrs. 2 Clinical internship experiences on campus and in the community for prospective Athletic Therapy candidates. Evaluated on a pass/fail basis. May not be held for credit with KIN 3910 or PHED 3910 (057.310). Prerequisites: KIN 3912.

## SECTION 6: Kinesiology -4000 Level

KIN 4060 Drugs and Ergogenic Aids in Sport Cr.Hrs. 3
A multidisciplinary examination of drugs, hormones, dietary supplement and methods used by athletes in attempting to
enhance athletic performance. Ethical concerns and mechanisms of action will be examined for steroids, stimulants, masking agents, blood doping, and hormonal and dietary supplements among others. May not hold for credit with PHED 4060 (057.406). Recommended prerequisite BIOL 1412 (ZOOL 1330 or 022.133) or BIOL 2420 (ZOOL 2540 or 022.254).

KIN 4160 Advanced Pathology and Sport Medicine Cr.Hrs. 3
Basic principles of pathology and clinical manifestations of cardiac respiratory, and neurologic disorders. Preventative measures, assessments and tratement methods employed in care of patients with there disorders will also be examined. May not be held for credit with PHED 4050 (057.405). Prerequisite: [KIN 3160 or PHED 3160 or PHED 3060 (057.306)] (C) and [KIN 3470 or PHED 3470 or PHED 3430 (057.343)] (C) and [KIN 3320 (C)]

KIN 4330 Advanced Biomechanics Cr.Hrs. 3 (Lab required) A biomechanical analysis of the skills and techniques of the major sports, games, and exercises. May not be held for credit with PHED 4360 (057.436). Prerequisite: KIN 2330 or PHED 2330 or PHED 2310 (057.231) (C).

KIN 4400 Therapeutic Exercise Rehabilitaion Cr.Hrs. 3 This course will concentrate on therapeutic exercise for the upper and lower extremities, torso and spine. Content will focus upon using exercise and basic therapy techniques to restore function by addressing deficiencies in range of motion, flexibility, strength, power, endurance, proprioception, coordination, agility and speed. Prerequisite: [KIN 3740 or PHED 3740 (C)] and [KIN 3160 (C)].

KIN 4460 Fitness Appraisal and Lifestyle
Counselling Cr.Hrs. 3
Theoretical knowledge and practical training related to physical activity, fitness and lifestyle appraisal and counseling. Note: Prepares students to certify as "Certified Personal Trainer (CPT) (Canadian Society for Exercise Physiology)." B. Kin. Students who wish to prepare for the Certified Exercise Physiologist (CEP) Canadian Society for Exercise Physiology) Certification should consult the Undergraduate Program Administrator for information. May not be held for credit with PHED 446 (057.446). Prerequisite: [KIN 3470 or equivalent (C)]. Pre or Co requisites: [PERS 1200 or equivalent (C)] and [KIN 3512 or equivalent (C)].

KIN 4470 Advanced Exercise Physiology Cr.Hrs. 3 An advanced examination of the physiological factors that affect human performance during physical activity. This will include exposure to related research and the development of techniques for its critical assessment. May not hold for credit with PHED 4410 (057.441). Prerequisites: [KIN 3470 or PHED 3470 or PHED 3430 (057.343) (C)].

KIN 4500 Physical Activity and Aging Cr.Hrs. 3
The study of the aging processes and the effects of exercise and lifestyle factors on the health and fitness of the aging adult. May not be held for credit with PHED 4500 (057.450). Prerequisite: [KIN 3512 (C) or equivalent] or permission of the Instructor.

KIN 4540 Advanced Topics in Sport Psychology Cr.Hrs. 3
This course will provide the student with a deeper understanding of psychological variables affecting individuals within sport contexts, including an exploration of
various research methods and theories/research related to motivation, youth, and applied work in sport psychology. May not hold for credit with PHED 4540. Prerequistie: PHED 2540 or KIN 2540.

KIN 4560 Advanced Fitness Appraisal and Lifestyle Counselling Cr.Hrs. 3
Advanced theoretical knowledge and experiential learning related to physical activity, fitness and lifestyle assessment, counselling, and exercise prescription for apparently healthy and clinical populations. Prepares students for Canadian Society of Exercise Physiology "Certified Exercise Physiologist" (CSEP-CEP) exams. May not hold for credit with PHED 4350. Prerequisites: [KIN 4460 (C) or equivalent] and [KIN 3512 (C) or equivalent]. Requires a paid facility use pass.

KIN 4910 Athletic Therapy Practicum Cr.Hrs. 6 To provide clinical and on-field internship experiences on campus and in the community for prospective Athletic Therapy candidates. May not be held for credit with PHED 4910 (057.491). Evaluated pass/fail. Prerequisite: KIN 3914 (KIN 3910, PHED 3910 or 057.310) (C) and KIN 3400 (C) and KIN 3320 (C).

## SECTION 6: Phys Ed \& Rec Studies General 1000 Level <br> PERS 1200 Physical Activity, Health and Wellness Cr.Hrs. 3

 An examination of the importance of physical activity for health and wellness, theories and determinants of health promoting behaviours, and strategies for promoting health behaviours. Examination of the benefits of physical activity for health and wellness, the present and recommended levels of physical activity, the factors influencing participation in physical activity, and individual organizational and national interventions for increasing physical activity. May not be held for credit with PHED 1200 (057.120)PERS 1300 Introduction to Leisure Travel Cr.Hrs. 3 To provide an introduction to tourist behaviour and the tourism system through an overview of: why people travel; the components of tourism; the scope and organization of tourism in Canada; and the interrelationship between recreation and tourism. May not be held for credit with REC 1200 (123.120).

PERS 1400 Concepts of Recreation and Leisure Cr.Hrs. 3 The nature and scope of recreation and leisure, the past influences and implications for the future. An overview of the types and roles of various components of the leisure service delivery system. May not be held for credit with REC 1400 (123.140).

PERS 1500 Foundations of Physical Education and Kinesiology Cr.Hrs. 3
An introduction to physical education and kinesiology as a profession and a discipline, including an overview of subdisciplines, resources, and careers; a personal physical assessment; and principles for achieving physical fitness. Note: A fieldwork fee is attached to the course. May not be held for credit with PHED 1500 (057.150).

## SECTION 6: Phys Ed \& Rec Studies General 2000 Level

PERS 2000 Special Topics (Introductory) Cr.Hrs. 3
An introductory examination of selected topics in the fields of kinesiology, physical education and recreation. Topics will vary depending on faculty expertise and student need.

PERS 2100 Introduction to Professional Practice Cr.Hrs. 3 An introduction to professional values and behaviours in the broad fields related to kinesiology, phpysical education, and recreation management including accountability, commitment, ethical decision making, interpersonal communication, respect for diversity, and service. Prerequisites: PERS 1200 (PHED 1200 or 057.120 ) (C) or PERS 1500 (PHED 1500 or 057.150 (C) and PERS 1400 (REC 1400 or 123.140) (C).

PERS 2200 Program Planning Principles Cr.Hrs. 3 While contexts in practice may vary, program planning is an essential competency for all professionals in recreation, kinesiology, and physical education. To ensure the requisite skill set is acquired, the emphasis in this course will be on principles and processes in effective program planning, implementation, and evaluation. May not hold for credit with PHED 3080 (057.308, REC 2530 or 123.253). Prerequisites: PERS 1200 (PHED 1200 or 057.120 (C) or PERS 1500 (PHED 1500 or 057.150 ) (C) and PERS 1400 (REC 1400 or 123.140) (C).

## SECTION 6: Phys Ed \& Rec Studies General 3000 Level

PERS 3100 Inclusive Physical Activity and Leisure Cr.Hrs. 3 This course introduces the foundations of inclusive physcial activity and leisure and the application of this knowledge to individuals from divers backgrounds and experiences with a focus on people with various forms of impairment. May not hold for credit with PHED 3390 (057.339) or REC 3060 (123.306). Prerequisite: [PERS 2100 (C)].

PERS 3170 Canadian Sport History Cr.Hrs. 3
This course will emphasize the rise of modern sport in Canada and will reflect on the ways in which social change has influenced sport and physical activity. This course provides an overview of issues and topics related to the development of modern sports in Canada. Using the concepts of class, gender, race and ethnic identity as interpretive tools, the course will examine: physical activities and games of First Nations; sport and recreation in new France and British North America; sports in postConfederation Canada; and developments in the 20th and 21st centuries. May not be held for credit with KIN 3170 (PHED 3170, PHED 3070 or 057.307). Requires a paid facility use pass (day pass acceptable).

PERS 3340 Philosophy of Physical Activity and Leisure Cr.Hrs. 3
Issues in sport, physical education and recreation will be examined from a philosophical perspective. May not be held for credit with KIN 3340 (REC 3340, PHED 2340 or 057.234 ). Prerequisite: PERS 2100 (C).

University of Manitoba

PERS 3350 Introduction to Research Cr.Hrs. 3
Students will become familiar with the basic principles and methods of research in the biological, life and social sciences. Students will have the conceptual foundations and practical skills needed to locate, understand, and evaluate primary research publications. May not hold for credit with KIN 3350 (REC 3350, REC 2010 or 123.201). Prerequisite: STAT 1000 or STAT 1001 (005.100).

PERS 3460 Sociology of Physical Activity and Leisure Cr.Hrs. 3
This course examines sociological factors that influence and shape participation in the areas of physical activity, sport and leisure. The exploration of students' own experiences in this field is emphasized, using an analytical model examining experiences as they arise out of the interplay of social structure and individual agency. May not hold for credit with PHED 3460 (057.346).

## SECTION 6: Phys Ed \& Rec Studies General 4000 Level

## PERS 4100 Current Issues Cr.Hrs. 3

A capstone course examining current issues and strategies for addressing them in the broad fields related to kinesiology, recreation management, and physical education.
Prerequisite: Successful completion of 90 credit hours of course work in the BKin or the BRMCD degree programs.

PERS 4200 Special Topics Cr.Hrs. 3 A theoretical and practical examination of selected topics in the fields of recreation, leisure and kinesiology. Topics will vary depending on faculty expertise and student need. Prerequisite: PERS 1400 (REC 1400 or 123.140)(C) or PERS 1500 (PHED 1500 or 057.150)(C) or PERS 1200 (PHED 1200 or 057.120) or departmental approval.

PERS 4600 Directed Studies Cr.Hrs. 3
Completion of an independent study or fieldwork experience, including a major written submission, approved by the department and under the direction of a faculty member.

PERS 4630 Supervised Fieldwork Experience Cr.Hrs. 12 The fieldwork practicum is a professionally supervised field experience that provides an opportunity to apply knowledge gained in academic courses, and exposure to new concepts of professional practice in the fields of physical activity, health and wellness, or leisure. Students are placed for a 13week period of full-time work within a suitable agancy. May not be held for credit with PHED 4620 (057.462) or REC 3080 (123.308) or REC 4630. Prerequisite: Successful completion of 90 credit hours of couirse work in the Bachelor of Kinesiology degree program and a minimum DGPA of 2.5.

## SECTION 6: Physical Education -2000 Level

PHED 2400 Coaching Theory and Practice Cr.Hrs. 3 An introduction to theoretical and practical aspects of coaching at the community and school level, including the examination of topics of philosophical, psychological, ethical and technical significance. The course prepares students for certification from the national Coaching Certification Program (Competition A). May not hold for credit with KIN 2400, PHED 3720 or PHED 3050 (057.305). Requires a paid
facility use pass.
PHED 2402 Advanced Coaching Theory and
Practice Cr.Hrs. 3
An analysis of the theoretical and practical aspects of coaching at elite levels, with a particular focus on topics of psychological and technical significance. An emphasis is placed on the sport psychology research literature. The course prepares students for certification from the National Coaching Certification Program (Competition B). May not be held for credit with KIN 2402 or KIN 3730 or PHED 3730. Requires a paid faciltiy use pass. Prerequisite: KIN 2400 or PHED 2400 or PHED 3720 or KIN 3720 (C).

PHED 2550 Growth and Motor Development Cr.Hrs. 3 (Formerly 057.255) Detailed study of physical growth and motor development from conception to adolescence, with implications for physical activity programs.

PHED 2710 Human Movement Principles Cr.Hrs. 3
An introduction to the principles of inclusive physical education through the integration of theory, practice and guided relection pertaining to the development of fundamental movement skills and strategies applied to educational games, gymnastics, and dance. May not hold for credit with PHED 1420 (057.142 or 047.141). Requires a paid facility use pass.

PHED 2720 Developmental Games and Activities Cr.Hrs. 3 Practical and theoretical aspects of designing educational game experiences applicable to early through senior years physical education, to include the design, implementation, and assessment of safe and inclusive physical activities as well as planning, organizational and teaching strategies. Introduces students to Manitoba Curriculum Student Learning Outcomes in "Movement, Safety, Personal and Social Management". May not hold for credit with PHED 2650 (057.265). Requires a paide facilty use pass. Prerequisite: PHED 2710 (C).

PHED 2730 Gymnastics, Dance and Rhythmic
Activities Cr.Hrs. 3
Practical and theoretical aspects of designing gymnastics, dance and rhythmic activity experiences applicable to early through senior years physical education, to include the design, implementation, and assessment of safe and inclusive physical activities as well as planning, organizational and teaching strategies. Incorporates Manitoba Curriculum Student Learning Outcomes in "Movement" and "Safety." May not hold for credit with PHED 3410 (057.314). Requires a paid facility use pass. Prerequisite: PHED 2710 (C).

PHED 2740 Fitness Theory and Practice Cr.Hrs. 3 Integrates theory and practice necessary to design and lead safe and effective grouip fitness programs, following performance standards established by the National Fitness Leadership Alliance. Introduces students to Manitoba Curriculum Student Learning Outcomes in "Fitness Management," and prepares them for Manitoba Fitness Council Theory and Group Fitness Specialty exams. May not be held for credit with PHED 1640 (057.164) or PHED 2640 (057.264) or PHED 2630 (057.263) or KIN 2740. Note: A fieldwork fee is attached to the course. Prerequisite: KIN 2320 (PHED 2320 or 057.232 )(C). Requires a paid facility use pass.

## SECTION 6: Physical Education -3000 Level

PHED 3102 Aboriginal Song and Dance Cr.Hrs. 3 An introduction to a variety of traditional and culturally relevant Aboriginal songs and dances representative of Canada's Aboriginal peoples, including First Nations, Metis and Inuit, taught using western and traditional teaching styles with an emphasis on hands-on learning. A fieldwork fee is attached to the course.

PHED 3360 Culturally Relevant Physical Education and Health Cr.Hrs. 3
An investigation of physcial health and education from a critical theorist perspective, that is, one that investigates the different relations of power and privilege (based on ability, gender, race, socio-economic class, sexuality ....) experienced within education experiences of young people from diverse backgrounds will be analyzed from a holistic perspective. May not hold for credit with PHED 3100 (057.310). Prerequisite: PHED 2720 (PHED 2650 or $057.265)(\mathrm{C})$.

PHED 3710 Acitve Health and Human Potential Cr.Hrs. 3 An examination of lifestyle behaviours which can enable or constrain human wellness and potential. By integrating theory with practice, current wellness models and motivational theories will quide strategies for wellness planning personal and professional practice. Introduces students to Manitoba Curriculum Student Learning Outcomes in "Personal and Social Management", and " Healthy Lifestyle Practices", as well as curricular connections for the teaching of "active health". May not be held for credit with PHED 3440 (057.344).

PHED 3750 Lifestyles Activities Cr.Hrs. 3
An introduction to the knowledge, skills, and attitudes that aid in the development of lifelong physically active and healty lifestyles. May not hold for credit with KIN 3750 and or REC 3750. Requires a paid facility use pass.

PHED 3760 Diverse Populations Mentorship Cr.Hrs. 3 Practical and theoretical aspects of designing physical activity experiences for students from diverse population, including on site leadership opportunities in a multicultural school context. Evaluated pass/fail.

PHED 3770 Aboriginal Games and Activities Cr.Hrs. 3 This course will provide students with a unique opportunity to explore, in theory and practice, traditional and contemporary world views related to historical, cultural, and environmental approaches to Aboriginal games and activities. Requires a paid facility use pass. Evaluated pass/fail.

## SECTION 6: Physical Education -4000 Level <br> PHED 4710 Outdoor Education Cr.Hrs. 3

To introduce the students to the basic outdoor skills associated with summer/winter backpacking/cross-country skiing/snow shoeing trips. Students will then learn to use a variety of outdoor settings for education opportunities on a variety of topics and disciplines. May not hold for credit with KIN 4710 (REC 4710). A fieldwork fee is attached to the course.

## SECTION 6: Recreation Studies - 2000 Level

REC 2400 Management and Marketing of Leisure
Services Cr.Hrs. 3
Basic management, and marketing principles and practices and their applicability to delivery of leisure services. Topics include financial resources, budgeting, people-centred management, and marketing. Prerequisite: PERS 1400 (REC 1400 or 123.140 ) (C).

REC 2650 The Social Aspects of Aging Cr.Hrs. 3 (Formerly 123.265) An examination of the social aspects of aging. Emphasis on understanding the aging process as a life transition involving adaptation through interaction with social and physical environ $\neg m e n t s$. This is an Option in Aging course and may not be held for credit with IDES 2650 (051.265) or HMEC 2650 (028.265) or SWRK 2650 (047.265).

## SECTION 6: Recreation Studies - $\mathbf{3 0 0 0}$ Level

REC 3090 Sustainable Nature-Based Tourism Cr.Hrs. 3 Analysis of the growth and development of sustain $\neg$ able nature-based tourism as a global and regional phenomenon. Particular emphasis will be placed upon the fundamental principles of sustainability, natural resource and visitor management for recreation, and the role of outdoor recreation and education in Sustainable Tourism Planning and Management. May not be held for credit with 123.309. Prerequisite: PERS 1300 (REC 1200 or 123.120) (C) and PERS 1400 (REC 1400 or 123.140) (C). Note: A fieldwork fee is attached to the course.

REC 3200 Advanced Program Planning and Leadership Cr.Hrs. 3 Consideration and application of program planning principles as they relate to sepecialized contexts and diverse populations. Foundations of leadership and interpersonal communication for effective and successful program implementation. May not hold for credit with REC 2540 (123.254, REC 3870 or 123.387). Prerequisite: PERS 2200 (PHED 3080, 057.308, REC 2530 or 123.253)(C). Requires a paid facility use pass.

REC 3850 The Planning of Recreation Areas and

## Facilities Cr.Hrs. 3

The process used to plan both recreational open spaces and facilities. Spe $\neg$ cial consideration is given to the role of the recreation professional in relationship to other planners. May not be held for credit with 123.385. Prerequisite: PERS 1400 (REC 1400 or 123.140) (C) and PERS 2200 (PHED 3080, 057.308, REC 2530 or 123.253 ) (C).

## SECTION 6: Recreation Studies -4000 Level

REC 4060 Person Centred Leisure Education Cr.Hrs. 3 A detailed examination of person-centred leisure education with an emphasis on both theoretical and practice models and their application to the recreation service delivery system. May not be held for credit with 123.406. Prerequisite: PERS 3100 (REC 3060, 123.306, PHED 3390 or 057.339) (C).

REC 4070 Community Development and the Leisure Service Delivery System Cr.Hrs. 3
(Formerly 123.407) The nature of community and the unique role that lei-sure service organizations play in the complex process of community development. Prerequisites: must have completed 70 percent of the core courses in Recreation Management and Community Development. May not be held for credit with 123.404. Prerequisites: [(PERS 2200 or REC 2530 (123.253) (C)] and [REC 2400 (C)].

REC 4090 Sustainable Nature-Based Tourism Planning, Management and Research Cr.Hrs. 3
(Formerly 123.409) Building upon the changes to REC 3090 this course ex $\rightarrow$ amines planning and management frameworks as they relate to sustainable nature-based tourism. The course examines the expansion of tourism as a global phenome $\_$non and considers sustainable naturebased tourism as a community development process. In addition the role and importance of research in informing the tourism planning and management decision making processes is examined. Prerequisites: [REC 3090 (123.309) or (123.330) (C)]. May not be held for credit with 123.430 . Note: A fieldwork fee is attached to the course.
Prerequisites: [(REC 3090 (123.309) or (123.330) (C)].
REC 4120 Recreational Travel and Tourism Cr.Hrs. 3 (Formerly 123.412) The purpose of this course is to provide students with a better understanding of the travel and tourism industry through an examination of its history, service systems and issues. Prerequisites: [PERS 1300 or REC 1200 (123.120) (C)].

## REC 4140 Marketing Recreation and Park

Services Cr.Hrs. 3
(Formerly 123.414) A review of the general principles of marketing and an introduction to strategies for their implementation in public sector and not-for-profit recreation agency programs and services. Prerequisites: [REC 2400 or REC 3860 (123.386) (C)] or [MKT 2210 (118.221] and [PERS 1400 or REC 1400 (123.140) (C)]. Pending Senate Approval

REC 4150 Clinical Aspects of Therapeutic

## Recreation Cr.Hrs. 3

(Formerly 123.415) An examination of the current principles of therapeutic recreation in relation to their practical application to individuals in clinical settings such as nursing homes, hospitals and other long-term care facilities. Prerequisite: [PERS 3100 or REC 3060 (123.306) (C)].

## REC 4170 Sport Management Cr.Hrs 3

An in-depth coverage of sport management, focusing on Canadian amateur sport systems (municipal, provincial, national) and professional sport organizations. May not be held for credit with 123.417. Prerequisite: REC 2400 (C).

REC 4250 Leisure and Aging Cr.Hrs. 3
The nature of the aging process and its impact on leisure behaviour. The factors influencing leisure among older adults, policy issues, and program and service methods and implications will be examined. This is an Option in Aging course. May not be held for credit with REC 4130 (123.413). Prerequisite: [PERS 3100 (C)] or [REC 2650] or permission of the instructor.

REC 4350 Parks and Protected Areas Planning and Management: Field Studies Cr.Hrs. 6

The course is taught in two segments, an on-campus component and field study component taking place in Banff National Park. The on-campus conponent examines the historical development of the concept of parks and protected areas, the role of interpretation, management and research in the parks and emerging issues in the management of parks and protected areas. In addition, during the oncampus component planning for the field will take place. The field segment will focus on a wide variety of management issues with particular attention to Banff National Park. Emerging issues and trends will be examined and past management responses evaluated. There will be opportunities for students to investigate specific management issues of interest to them and to participate in current research being conducted in the park. Prerequisite: Written permission of the instructor required. Offered with GEOG 4350.

REC 4400 The Administration of Special Events Cr.Hrs. 3 Advanced management principles and practices and their applicability to the delivery of leisure services. May not be held for credit with REC 4310 (123.431). Prerequisite: REC 2400 (REC 3860 or 123.386 ) (C).

REC 4720 Wilderness Adventures Cr.Hrs. 3
Student will learn how to plan and participate in one or more wilderness adventure activities such as canoe tripping, sailing, kayaking, climbing, winter camping, etc. Students will also concentrate on conducting these activities safely with clients. It is hoped that this experience will positively affect future life sport and recreation activities. A fieldwork fee is attached to the course. May not be held for credit with KIN 4720 or PHED 4720 Wilderness Adventures

REC 4850 Advanced Planning of Recreation Areas and Facilities Cr.Hrs. 3
Advanced planning considerations with opportunity for application of planning process theories. May not be held for credit with REC 4340 (123.434). Prerequisite: REC 3850 (123.385) (C).

## SECTION 1: Degree Programs Offered

| Program/Degree | *Years to Compete | Total Credit Hours |
| :--- | :---: | :---: |
| Bachelor of Laws (J.D.) | 5 | 157 |
| Master of Laws (LL.M.) | 6 | $161-163$ and Thesis |

*This includes two years ( 60 credit hours) of study in an undergraduate program.

Equivalent academic courses completed at recognized universities elsewhere will be considered. For all admission requirements see: http://law.robsonhall.ca/llb/admission-to-first-year
*The Master of Laws is a thesis-based program designed for completion in one year after the completion of a three year J.D. program. The program consists of participation in the Graduate Legal Theory Seminar, two additional courses and completion of a substantial thesis. Further details are available through the LL.M. website: www.umanitoba.ca/law/newsite/research.php. Applicants should also consult the Faculty of Graduate Studies website: umanitoba.ca/graduate studies/.

## SECTION 2: The Profession and the Faculty of Law <br> SECTION 2: Bachelor of Laws - J.D.,

Robson Hall, Faculty of Law, offers a three year J.D. program that starts with the fundamental doctrinal courses that allow students to acquire a solid foundation in law. From the foundational courses, students can move into legal specialities of their choice, or choose to pursue an J.D.
concentrating on Aboriginal law, business law, or human rights. Clinical legal education has been a part of the J.D. program since the early 1970s and students develop lawyering skills under faculty guidance, expanding their perspectives and ethical understanding of the role of practising lawyers. Scholarship and research is built into the J.D. program so students have an opportunity to develop a critical understanding of law and its development.

### 2.1 The Study of Law,

Legal education in Canada is divided into two phases: the academic study of law at one of the university law schools and practical training under the auspices of a provincial law society for those who wish to be admitted to practise and called to a Bar. As there is a reciprocal recognition of university law degrees between the common law provinces (all provinces except Quebec), the academic study can be taken in any one of these provinces.
A sound education in law provides a good foundation for a great variety of careers. In the past most law graduates have entered the private practise of law to concentrate on various types of legal work: real estate transactions, commercial contracts, company law, family law, taxation, etc. Contrary to popular belief only a few lawyers concentrate on court work and even fewer specialize in criminal cases. While the tendency to specialize in the practise of law is becoming more prevalent, most lawyers continue to be general practitioners prepared to perform most types of legal work according to the needs of their clients.
Besides the private practice of law, law graduates can join the legal departments which many corporations find it expedient to maintain; others enter the employ of various government departments to serve in a variety of capacities. A few pursue nonlegal vocations in, business, journalism, social work, and law enforcement. At the University of Manitoba consideration is given to the fact that while most students take law to become practising lawyers, some are taking law as an additional discipline to enhance their opportunities in fields other than the practise of law; thus, while the emphasis is on the academic study of substantive law, the study is carried on in a practical context.

### 2.2 Clinical Learning,

The curriculum invites critical assessment of the role of law in society as well as the development of skills relevant to the practice of law. In addition to lectures and seminars, students are given an opportunity to develop, under supervision, some of the research, writing, and forensic skills which will prove useful in the practise of law. In first year, students are acquainted with the various resource materials available in a law library, and they follow a program designed to develop legal research and writing techniques. In second and third years, students participate in moot courts, fictitious trials and appeals, which provide practise in research, examination of witnesses, and courtroom argument. This advocacy training is just one element of the program at Robson Hall that contributes to the excellent reputation of our graduates. In third year students may choose from a range of Clinical Courses or may participate in national competitive moot competitions.
Throughout their legal studies students may serve actual legal clients through volunteer work with the University Law Centre, Pro Bono Students, L. Kerry Vickar Business Law Clinic and The Legal Help Centre.

### 2.3 Research and Scholarly Writing,

Research and scholarly writing are integral elements of the mission of the University and the law school. Professors research, write and consult with the larger legal community in their particular area of expertise and students have similar opportunities. Each year students must take a perspective course which provides an opportunity to explore a particular area of law in depth. Perspective courses have limited enrolment and students must research and write a major paper.

### 2.4 Faculty of Law Centres of Excellence,

Robson Hall is home to two named research chairs. In 1999, the Faculty of Law established the Asper Chair of International Business and Trade Law. The Asper
Chair sponsors a variety of research including bi-annual academic conferences in international business and trade law. An internship program allows up to four students a year to work with the Asper Chair and creates opportunities for students to advance their education, while gaining skills necessary to pursue careers in law or business with an international focus. Additionally, students involved in the Asper program have the opportunity to participate in international commercial dispute resolution competitions. The Marcel Desautels Chair in Private Enterprise and the Law has a mandate to conduct research and provide education on issues of specific interest to the privately held or family owned businesses. The Desautel Centre's focus is on the needs of closely held businesses. The Faculty of Law also operates the Kerry Vickar Small Business Law Clinic which is headed by a director who is assisted by volunteer mentors from the practising bar.

### 2.5 Student Organizations,

All Law students are members of the Manitoba Law Students' Association (MLSA), the student government. Student participation in Faculty governance takes place through the representation of elected members of the MLSA. In addition to the Manitoba Law Students Association there exisits a diversity of student groups at Robson Hall. No matter what your interests, joining a student group can greatly enhance your law school experience by providing you with greater opportunities throughout the year to interact with the community and other students. Student groups include:

Business Law Group
Canada Law Games
Citator
Christian Legal Fellowship (CLF)
Family Law Group
Feminist Legal Forum
Manitoba Aboriginal Law Students Association (MALSA)
MBA Mentorship Program
Mediators Beyond Borders
Pro Bono Students Canada (PBSC)
Outlaws
Robson Hall Bilingual Students Association

SECTION 3: Admission to the Faculty of<br>\section*{Law}<br>3.1 Course Requirements for Admission to J.D.<br>\section*{Program,}<br>Robson Hall, Faculty of Law offers three First Year Admission categories:<br>Index Score (Regular) Category (50\% GPA and 50\% LSAT score)<br>Individual Consideration Category<br>Aboriginal Category<br>The minimum academic requirement for the Index score category is two (2) full years of university level courses including a mathematic requirement (equivalent of 60 credits). The JD. requirement fulfils the Universtiy's English requirement.<br>All applicants must write the Law School Admission Test (LSAT).<br>Download a copy of the Applicant Information Bulletin.

## SECTION 4: Academic Regulations

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Web Calendar at www.umanitoba.ca for updated information.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Law has regulations and requirements, published below, that apply specifically to its students.
4.1 Residence requirements for the J.D. Degree, To obtain the J.D. degree from the University of Manitoba, ordinarily a student must successfully complete two of the three years of the J.D. program at the University of Manitoba. The remaining year may be completed at another law school as approved by the Admissions Committee or the Dean's office.

### 4.2 Licence to Practise Law,

Graduates who wish to practise must apply to the Law Society of the province in which they wish to practise. Law
societies generally require applicants to complete a bar admission course The Law Society must be satisfied as to the good character and repute of its applicants, as well as their academic competence and qualifications. Inquiries with regard to the Province of Manitoba should be made to the Law Society of Manitoba.
4.3 Regulations of the Faculty of Law,

Regulations of the Faculty of Law, as amended from time to time governing attendance, evaluation, prizes, and progression may be consulted at the Faculty's website (www.umanitoba.ca/faculties/law).

### 4.4 Miscellaneous Registration Matters,

The dean's office, with the recommendation of a special faculty-based committee if so requested, shall, subject to appeal to the Faculty Council, consider and determine all applications from students admitted to the faculty: 1) for a letter of permission, with conditions, to take part of their law studies for credit at the University of Manitoba, at another university; 2) for permission, with conditions, to defer their law studies for a period of one or more academic years after successfully completing first or second year, and to permit such students to re-register following such an absence; 3) for permission to withdraw before completing the academic year for which they are then registered and to permit, in the case of a student who withdraws from first year under exceptional circumstances, that student to re-register for a subsequent academic year as a supernumerary student, and in the case of a second or third year student, to permit such student to re-register for a subsequent academic year; in all cases with or without conditions; 4) for permission to switch from the full-time program to the half-time program and vice versa.

## SECTION 5: Program Requirements

## Program Requirements

SECTION 5: Program Requirements,
This Section describes the program requirements that are in effect for the 2012-2013 academic year. However, prospective students should be aware that the Faculty of Law regularly reviews its curriculum to ensure that it continues to meet the current needs of our students.

## Third Year

You may only take one of: Clinical Administrative Law, Advanced Advocacy, Intensive Criminal Law, Legal Help Centre Clinical or Clinical Family. If you take Art of the Deal
you may take Clinical Administrative Law, Advanced Advocacy, Intensive Criminal Law Legal Help Centre Clinical or Clinical Family. You may not take any other clinical course if you are taking Clinical Criminal Law.

## SECTION 6: Registration

First year students in the Faculty of Law are registered by the faculty after the middle of August. Returning Second and Third year students should register themselves through Aurora. It is the students responsibility to check their Aurora account to confirm: their registration, to verify that they meet Faculty of Law requirements for graduation and access fee statements. In the event that a student fails to properly select courses the dean's office may reject the courses selected by the student and assign courses to that student and such assignments shall ordinarily be final.

## SECTION 7: Law -1000 Level

LAW 1100 Contracts Cr.Hrs. 6
(Formerly 045.110 ) This course explores the basic principles of contract law. How is a contract formed? What is an offer? What constitutes acceptance? Are all promises enforceable as a contract? When should parties be allowed to avoid obligations? What happens if one party misrepresents the quality of subject matter of the contract? What if a party makes a mistake about what they buy or sell? What should happen if one party takes advantage of another for a better deal for themselves?

LAW 1140 Criminal Law and Procedure Cr.Hrs. 5 (Formerly 045.114) A general introduction to criminal law and procedure dealing with principles of criminal liability, common defenses to criminal charges, selected specific offences, and the basic procedures to be followed in the administration of criminal justice in Canada.

LAW 1460 Constitutional Law Cr.Hrs. 5
(Formerly 045.146) An examination of the legal problems arising from the nature of the Canadian political structure and, in particular, the distribution of legislative powers between the federal parliament and the provincial legislatures and an introduction to the impact of the Canadian Charter of Rights and Freedoms.

LAW 1480 Torts and Compensation Systems Cr.Hrs. 5 (Formerly 045.148) A general introduction to the law of torts and other compensation systems such as the Workers' Compensation and Criminal Injuries Compensation schemes.

LAW 1500 Property Cr.Hrs. 5
(Formerly 045.150) A general introduction to the principles of property with special emphasis on the principles of real property, their historical development and modern application.

## LAW 1530 Legal System Cr.Hrs. 2

(Formerly 045.153) An introduction to the study of law including initial analysis of various aspects of legal history, the structure of the legal system, legal reasoning, statutory interpretation, dispute resolution and the role of the judiciary. This course is graded pass/fail.

LAW 1540 Legal Methods Cr.Hrs. 5
(Formerly 045.154) An introduction to legal research and
writing skills and oral advocacy. Grading: Pass/Fail

## SECTION 7: Law -2000 Level <br> LAW 2400 Wills and Succession Cr.Hrs. 3

(Formerly 045.240) The law of testate and intestate succession, Part IV of The Marital Property Act, and The Dependents' Relief Act.

LAW 2490 Trusts Cr.Hrs. 3
(Formerly 045.249) The nature and functions of modern inter vivos and testamentary trusts. The creation of express, private trusts, charitable trusts, resulting trusts, and constructive trusts. The administration of trusts, and real and personal remedies of beneficiaries under trusts.

LAW 2510 Problems in Contract and Tort Cr.Hrs. 2 (Formerly 045.251) A detailed study of significant topics in the area of tort and contract at an advanced level. Special attention will be paid to the inter-relationship of the two subject areas.

LAW 2530 Debtors' and Creditors' Rights Cr.Hrs. 2 (Formerly 045.253) Remedies of the unsecured creditor, enforcement of judgments, fraudulent conveyances and preferences, general assignments and bankruptcy. Mechanics' liens and special rights arising out of builders' and workers' legislation relating to real estate transactions.

LAW 2600 Evidence Cr.Hrs. 4
(Formerly 045.260) A study of the rules relating to the admissibility and weight of evidence in judicial proceedings.

LAW 2640 Family Law Cr.Hrs. 3
(Formerly 045.264) An overview of key legal issues regarding familial relationships and family breakdown in Canadian society. Topics include cohabitation, marriage, separation, divorce, child custody and access, spousal and child support and property division.

LAW 2650 Introduction to Advocacy Cr.Hrs. 3
(Formerly 045.265) A detailed study of the conduct of a case from its inception through to trial. The course requires that students prepare and conduct a trial. Grading: Pass/Fail.

LAW 2670 Civil Procedure Cr.Hrs. 2
(Formerly 045.267) An introduction to the rules of civil procedure.

LAW 2680 Legal Negotiation Cr.Hrs. 3
(Formerly 045.268 ) Most legal disputes settle before trial. This course examines how lawyers assist their clients through effective interviewing, counseling, strategic planning and negotiation as well as some of the mechanisms, both judicial and non-judicial, that facilitate pre-trial dispute settlement.

LAW 2690 Corporations I Cr.Hrs. 3
(Formerly 045.269) A study of the major legal, practical and policy issues arising out of the formation and operation of business organizations in Canada, with a particular focus on business corporations. Students will examine major principles of Canadian corporate law, including corporate personality, management power, majority rule and minority protection.

LAW 2700 Income Tax Law and Policy Cr.Hrs. 3 (Formerly 045.270) The object of this course is to develop a working knowledge of the basic principles and rules of the income tax system as these apply to individuals. A parallel objective is the discovery of the major policy positions that inform the personal income tax system and the development of the ability to use tax policy analysis to evaluate advantages of, and problems with, the current system.

## SECTION 7: Law - 3000 Level

LAW 3010 Agency Cr.Hrs. 2
(Formerly 045.301) The course will cover the entire landscape of the law of agency, including the various kinds of authority, the duties of principals and agenets, and the legal ramifications for each person when one person acts (purportedly) on behalf of another person.

LAW 3012 International Business Law Cr.Hrs. 3 Explores the legal, practical and social realities of international business transactions.

LAW 3014 International Trade Law Cr.Hrs. 3
The course will deal with the doctrine, practice and policy issues in international trade and business.

LAW 3016 Corporations II Cr.Hrs. 3
An advanced study of corporations law from various theoretical and practical perspectives.

LAW 3018 Human Rights Law Cr.Hrs. 3
Critical and constructive study, at an advanced level, of a significant major subject or set of topics in Human Rights Law.

LAW 3020 Clinical Administrative Law Cr.Hrs. 3 The primary purpose of this course is to train students in lawyering skills. Students will be required to engage in classroom work and participate in simulated exercises. Emphasis will be given to the difference between board and court advocacy.

LAW 3022 Insurance Law Cr.Hrs. 3 Introduction to the basic principles of insurance law. The fundamental elements to most types of policies will be examined with particular emphasis on propert and liability insurance. The terms and provisions specific insurance policies and coverages such as automobile, property, liability policies will also be covered.

LAW 3024 The Legal Profession and Professional Responsibility Cr.Hrs. 3
A general introduction to the problems of professional responsibility and the ethics of lawyers individually, as well as the legal profession collectively. Topics dealt with will include ethical problems of the lawyer in the role of the advocate and in the role of counsellor (confidentiality, conflict of interest, etc.); professional responsibilty in the delivery of legal service (competency, fee determination, specialization, regulation etc) and the legal profession and the public interest (goverance of profession, discipline, professional liability etc) These problems are to be studied by the critical examination of case law, codes, canons, and other published materials, by classroom discussion and debate on problems; and by workshops and panels which involve
practising lawyers.

An in-depth examination of the law of Trade-marks and Patents, including underlying policy objectives.

LAW 3028 Copyright Law Cr.Hrs. 3
An in-depth examination of the law of Copyright.
LAW 3040 Sales and Consumer Law Cr.Hrs. 2 (Formerly 045.304) The Sale of Goods Act and related statutes including a study of the duties and remedies of the parties and questions of title. Manitoba Consumer Protection Law in the area of sales and credit.

LAW 3050 Commercial Law Cr.Hrs. 3 (Formerly 045.305) A study of secured transactions and negotiable instruments.

LAW 3070 Gender and the Law Cr.Hrs. 3
(Formerly 045.307) An exploration of ideas about gender differentiation in law, the legal system, legal education and the legal profession. It will offer an introduction to the feminist critique of law and feminist theories about sexual equality and discrimination.

LAW 3090 Children and the Law Cr.Hrs. 3 (Formerly 045.309) Relationships between child, family, state and law are examined within an interdisciplinary context, focusing on such issues as rights theories and the public/private distinction; regulation of young offenders, child protection and state intervention; and child victims in the courts.

LAW 3140 Clinical Administrative Law Cr. Hrs. 4 (Formerly 045.314 ) The primary purpose of this course is to train students in lawyering skills. Students will be required to engage in classroom work and participate in simulated exercises. Emphasis will be given to the difference between board and court advocacy. Grading:Pass/Fail.

LAW 3162 Topics in Dispute Resolution Cr.Hrs. 2
This course offers a detailed exploration of the theory and practice of dispute resolution focusing on the various approaches, private and court-connected, currently used to resolve conflict. In critically examining selected alternative dispute resolution mechanisms, the course exposes students to issues such as rights-based and interest-based dispute resolution, power, gender and culture in ADR processes and the functions, and skills required of, third party interveners. May not be held with the former LAW 3160 (045.316).

LAW 3190 Law and Literature Cr.Hrs. 3
(Formerly 045.319) Law and Literature is the legal analysis of literary texts and the literary analysis of legal texts. By introducing images of law and social control found in literature and popular culture, and exploring legal language and the construction of narrative, the course invites speculation about the nature and impact of law.

LAW 3200 Immigration and Refugee Law Cr.Hrs. 2 (Formerly 045.320 ) An explanation of immigration and refugee law through a study of a representative section of problems.

LAW 3210 Competitions A Cr.Hrs. 2
(Formerly 045.321) Credit for selected students who satisfactorily participate in those academic competitions approved by Faculty Council. Grading: Pass/Fail.

LAW 3220 Competitions B Cr.Hrs. 3
(Formerly 045.322) Credit for selected students who satisfactorily participate in those academic competitions approved by Faculty Council. Grading: Pass/Fail.

LAW 3230 Aboriginal Peoples and Land Claims Cr.Hrs. 3 (Formerly 045.323) The course shall provide an overview of land claims and treaty land entitlement policies in Canada and their impact upon land claims by Aboriginal communities.

LAW 3240 Current Legal Problems C Cr.Hrs. 2 (Formerly 045.324) Critical and constructive study, at an advanced level, of a significant major subject or set of topics. Grading: Pass/Fail.

LAW 3250 Current Legal Problems D Cr.Hrs. 3 (Formerly 045.325) Critical and constructive study, at an advanced level, of a significant major subject or set of topics. Grading: Pass/Fail.

LAW 3260 Insurance Law Cr.Hrs. 4
(Formerly 045.326) A general introduction to the basic principles of insurance law. The fundamental elements common to most types of policies will be examined with particular emphasis on property and liability insurance. The terms and provisions of specific insurance policies and coverages such as automobile, property, liability policies will also be covered.

LAW 3300 Clinical Criminal Law Cr.Hrs. 8
(Formerly 045.330) The primary purpose of this offering is to train students in lawyering skills in the criminal law area. To this end instruction is given on an intensive basis in small groups. Students may be required to engage in classroom work; to participate in various forms of simulation exercises and to conduct actual client based cases under the supervision of the instructor. Particular emphasis will be given to questions of professional responsibility and ethics. Grading: Pass/Fail.

LAW 3310 Aboriginal Peoples and the Law Cr.Hrs. 3 (Formerly 045.331) A study of the laws relating to Aboriginal Peoples in North America from the colonial period to the present. Special emphasis will be given to aboriginal rights, hunting and fishing rights, the legal aspects of Indian Treaties and the Indian Act. A more general treatment will be given to a study of Aboriginal Peoples' relationship to civil and criminal law in modern Canadian society.

LAW 3330 Employment Law Cr.Hrs. 3
(Formerly 045.333) A detailed study of employment law including employment principles, constructive and wrongful dismissal, just cause, human rights and remedies.

LAW 3340 Advanced Advocacy Cr.Hrs. 3
(Formerly 045.334) Advanced topics in trial presentation, procedure and evidence with concentration on jury trials.

LAW 3360 Advanced Legal Research Cr.Hrs. 3
(Formerly 045.336) This course will provide students with the wherewithal to conduct legal research across a number of
jurisdictions using both print and digital formats. Students are evaluated on a number of research exercises, a midterm examination, a major research pathfinder and a presentation of research results.

LAW 3370 The Legislative Process Cr.Hrs. 3
(Formerly 045.337) A study of how statues and regulations are made in the Province of Manitoba, and how lawyers can effectively represent their clients in the context of lawmaking by politicians, civil servants and regulators.

LAW 3380 Issues in Law and Bio Ethics Cr.Hrs. 3 (Formerly 045.338) The course deals with the legal aspects of prevention, creation, alteration, maintenance and termination of life through medical and other scientific means.

LAW 3390 Securities Law Cr.Hrs. 2
(Formerly 045.339) A study of the basic concepts and application of the securities regulatory system in Canada.

LAW 3410 Canadian Legal History Cr.Hrs. 3
(Formerly 045.341) The historical background of the Canadian legal system.

LAW 3450 Remedies Cr.Hrs. 3
(Formerly 045.345) A study of the law relating to damages, specific performance, injunctions, and other equitable remedies.

LAW 3480 Restitution Cr.Hrs. 2
(Formerly 045.348) Principles and remedies of the common law and equity capable of preventing unjust enrichment; quasi-contract and constructive trusts.

LAW 3490 Research Paper Cr.Hrs. 2
(Formerly 045.349) Details in each case to be worked out with the associate dean.

LAW 3500 Intellectual Property Cr.Hrs. 4 (Formerly 045.350) A study of the law of, and issues related to, the major areas of intellectual property, including trademarks, copyright and patent, as well as ancillary doctrines including some or all of industrial design, trade secrets, appropriation of personality and plant breeders' rights.

## LAW 3510 Corporate Taxation Cr.Hrs. 3

(Formerly 045.351) A study of federal tax laws as they affect corporation income, as well as a discussion of the effects of income tax laws on corporate and other commercial planning.

LAW 3520 Taxation of Trusts and Estates Cr.Hrs. 3 (Formerly 045.352 ) A study of taxation principles as they relate to partnership and trust income and estate planning.

LAW 3530 Administrative Law Cr.Hrs. 3
(Formerly 045.353) An introduction to administrative law generally, with concentration on the judicial review of the exercise of statutory authority by administrative entities.

LAW 3550 Crime, Law and Society Cr.Hrs. 3 (Formerly 045.355 ) A study of various social problems in legal and sociological perspectives with emphasis on criminal law and the administration of criminal justice. Topics may include police discretion, preventive detention, plea
bargaining, sentencing theory and practise in correction, drug abuse and the mentally ill.

LAW 3590 Charter Issues in Criminal Law Cr.Hrs. 3 (Formerly 045.359) The rules of Criminal Procedure and principles underlying and unifying such rules with a particular emphasis on the effect of the Charter of Rights and Freedoms on those rules.

LAW 3600 Environmental Law Cr.Hrs. 3
(Formerly 045.360 ) The balance between technical development and the life-support capacity of the environment. The acquisition and nature of private rights in natural resources and their control by legislation and common law. Remedies for environmental degradation. Constitutional and international legal issues.

LAW $\mathbf{3 6 2 0}$ Comparative Law Cr.Hrs. 3
(Formerly 045.362) An introduction to civil law; a brief historical survey, codification, judicial philosophy, detailed study of selected comparative law topics in tort and contract with special reference to the Civil Code of the Province of Quebec. An introduction to Soviet law, detailed study of selected topics in Soviet law.

## LAW 3680 Land Titles Cr.Hrs. 3

(Formerly 045.368 ) The law relating to the registration of assurances and titles.

LAW 3690 Real Estate Transactions Cr.Hrs. 3 (Formerly 045.369) The law relating to vendors and purchasers of land and to mortgages and other security on land.

LAW 3740 International Law Cr.Hrs. 3
(Formerly 045.374) An introduction to the nature, sources, and some of the fundamental concepts of international law.

LAW 3760 Jurisprudence Cr.Hrs. 2
(Formerly 045.376) This seminar will cover all the major "schools" of jurisprudential theory, with attention paid to particular areas of legal theory and debate, to the nature and function of law, its relation to morality, and to the analysis of rights and other legal relationships. Efforts will be made to relate these areas of debate to legal issues of current interest and practicality.

LAW 3770 Labour-Management Relations Cr.Hrs. 3 (Formerly 045.377) A survey of the development of trade unions; their present status under both federal and provincial legislation regarding the right of association, collective bargaining, and the settlement of disputes.

LAW 3820 Manitoba Law Journal Cr.Hrs. 2
(Formerly 045.382) The editor of the Manitoba Law Journal who successfully completes his/her term of office, and all other editors and journal staff who in addition to successfully completing their terms of office satisfactorily complete a written requirement, may opt for the Manitoba Law Journal credit. Grading: Pass/Fail.

LAW 3822 Scholarly Publications Cr.Hrs. 2
Senior editors of scholarly publications approved by the Academic Affairs Committee who successfully complete their terms of office and any writing requirements. Grading: Pass/Fail.

LAW 3830 Legal Aid Clinic Cr.Hrs. 2
(Formerly 045.383) Students who are selected to act as student supervisors at the University Law Centre during the summer and who continue to actively serve the University Law Centre during their third year may, by successfully completing a written assignment approved by a faculty supervisor, opt for the Legal Aid Clinic. Grading: Pass/Fail.

## LAW 3850 Conflict of Laws Cr. Hrs. 3

(Formerly 045.385 ) Sometimes called private international law, it has to do with choosing what place to sue, what law applies when the law of more than one place might apply, and with the enforceability of judgments through foreign courts.

LAW 3862 Business Transactions: The Art of the Deal Cr.Hrs. 6
A study, involving practical exercises of certain aspects of solicitors' work, including interviewing, negotiating, counseling and memo writing.

LAW 3880 Municipal and Planning Law Cr.Hrs. 3 (Formerly 045.388) A general course in municipal law, including important aspects of land-use control and planning law. Although the course deals generally with the nature, structure, functions, and powers of the various units comprising the local level of government, the focus is primarily on municipal corporations. Topics covered include assessment and taxation, land-use planning and control, tort liability, judicial review of bylaws, qualification and accountability of councillors, and the law relating to expropriation,as well as some discussion of contemporary urban problems..

LAW 3930 The Legal Profession and Professional Responsibility Cr.Hrs. 3
(Formerly 045.393) A general introduction to the problems of professional responsibility and the ethics of lawyers individually, as well as the legal profession collectively. Topics dealt with will include ethical problems of the lawyer in the role of advocate and in the role of counsellor (confidentiality, conflict of interest, etc.); professional responsibility in the delivery of legal service (competency, fee determination, specialization regulation, etc.) and the legal profession and the public interest (government of profession, discipline, professional liability, etc.). These problems are to be studied by the critical examination of case law, codes and canons, and other published materials; by classroom discussion and debate on problems; and by workshops and panels which involve practising lawyers.

LAW 3940 Canadian Charter of Rights and Freedoms Cr.Hrs. 3
(Formerly 045.394) An in-depth study of the legal, philosophical and historical foundations of the Canadian Charter of Rights and Freedoms. Included is a study of both the American and European experience with Charters of Rights as well as Canadian case law.

LAW 3970 Current Legal Problems A Cr.Hrs. 2 (Formerly 045.397) Critical and constructive study, at an advanced level, of a significant major subject or set of topics.

LAW 3980 Current Legal Problems B Cr.Hrs. 3
(Formerly 045.398) Critical and constructive study, at an advanced level, of a significant major subject or set of topics.

3.21 Letter of Permission to Take Courses at Another University for Transfer of Credit
3.22 Plagiarism, Cheating and Personation
3.23 Student Appeals of Academic Regulations
3.24 Security of Academic Records
3.25 Transcripts and Degree Parchements

SECTION 4: Program and Graduation Requirements
4.1 Program Requirements for the Bachelor of Commerce (Honours) Program - Direct Entry, Track 1 and Track 2
4.2 Program Requirements for Majors
4.3 Program Requirements for the Co-operative Education Option
4.4 Program Requirements for the Asper School of Business/Red River College Joint Program
4.5 Program Requirements for the Asper School of Business /Assiniboine Community College Joint Program
4.6 Program Requirements for the Asper School of Business /University College of the North Joint Program
4.7 Program Requirements for the Asper School of Business /fcole technique et professionnelle joint program

## SECTION 5:

See Listing of with each Department Listing
5.1 Accounting and Finance

Includes subjects: ACC (Accounting), FIN (Finance), MIS
(Management Information Systems)
5.2 Warren Centre for Actuarial Studies and Research Includes subjects: ACT (Actuarial Studies)

GMGT (General Management), HRIR (Human Resource Management/Industrial Relations), INTB (International Business)
5.4 Interdepartmental Courses

Includes subjects: IDM (Interdisciplinary Management))
5.5 Marketing

Includes subjects: MKT (Marketing)
5.6 Supply Chain Management

Includes subjects: MSCI (Management Sciences), OPM
(Operations Management), SCM (Supply Chain Management)
5.3 Business Administration Includes subjects: ENTR (Entrepreneurship/Small Business),

## SECTION 1: Degree Programs Offered

1.1 Degree Programs Offered,

| Degree | Years to <br> Complete | Total Credit Hours |
| :--- | :--- | :--- |
| Bachelor of Commerce Honours | 4 | 120 |
| Bachelor of Commerce Honours <br> (Co-operative Education Option) | $4.33+$ | 120 |

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

### 1.2 Available Majors and Option,

The following Majors may be used to complete the Bachelor of Commerce (Honours) program:

Aboriginal Business Studies
Accounting
Actuarial Mathematics

Entrepreneurship/Small Business

Finance
Generalist
Human Resources Management/Industrial Relations
International Business
Logistics and Supply Chain Management
Management Information Systems

Management of Organizations
Marketing

Operational Research/Operations Management

A detailed explanation of the requirements for each major may be found in Section 4.2.

The Co-operative Educaton Option is the only option that may be used to complete the Bachelor of Commerce (Honours) program. Complete details on the requirements for the Co-operative Education Option are found in Section 4.3.

### 1.3 Accreditation,

In 2009, the Asper School of Business received reaccreditation from AACSB International - The Association to Advance Collegiate Schools of Business.

In 2009, the Asper School of Business received accreditation from the SOA - Society of Actuaries.

These prestigious recognitions affirm the faculty's commitment to the continuous improvement of its courses and programs. The mission of the Asper School of Business is to provide management education in Manitoba by creating and disseminating leading edge knowledge and developing skills relevant to current and future managers in organizations operating in a global environment.

## SECTION 2: Admission Requirements

 2.1 Admission Requirements from High School and Previous Post-Secondary Institutions,The following is a summary of the admission requirements for the Bachelor of Commerce (Honours.). Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years. All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin that is available from the Admissions Office, 424 University Centre. This information is also posted on the University of Manitoba's website.

## Direct Entry from High School

To be eligible to apply high school students must have:

1. Manitoba high school graduation, with five full credits at the Grade 12 level, in courses designated S (Specialized), G (General), or U (Dual Credit -University), with
2. A minimum $85 \%$ average over three courses: PreCalculus Math 40S or Applied Math 40S (Recommended Pre-Calculus 40S), English 40S, and one other 40S/U course, and
3. A minimum $60 \%$ in each of the three courses noted in point 2 above, and
4. Applicants may require a higher average than stipulated in point 2 to be successful in the annual competition for admission.

See Applicant Bulletin for complete details.

## Track 1 Transfer Students

The following is a summary of the admission requirements for the Bachelor of Commerce (Honours.) for Track 1 transfer students. Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years. All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin that is available from the Admissions Office, 424 University Centre. This information is also posted on the University of Manitoba's website.

## Requirements (for Track 1 Transfer students)

- Economics ECON 1200 (6) or [ECON 1010 (3) and ECON 1020 (3)] (6)
- 6 credit hours from: Anthropology, History, Mathematics,

Philosophy, Political Studies, Psychology, or Sociology (6)*

- Mathematics MATH 1520 or MATH 1500 (3)
- Statistics STAT 1000 (3)
- A 3 credit hour Written English ("W") course from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are
not considered to be from a specific discipline) (3)
- 3 credit hours of electives (3) **

Minimum 24 credit hours completed by April 30. Although 24 credit hours is the minimum requirement for admission, a full year course load would require 30 credit hours; therefore, students only taking 24 credit hours for admission will need to pick up an extra 6 credit hours of course work once in the Asper School of Business.

If students want to complete 30 credit hours in Year 1, students are recommended to take 6 credit hours from this suggested list of recommended courses: GMGT 1010 plus one of GMGT 2060, GMGT 2070 or MKT 2210.

* Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.
${ }^{* *}$ Critical Thinking (Philosophy) PHIL 1290 is a preferred elective choice**

Students must achieve a minimum grade of " $C$ " on each course listed above. Admission in this category is competitive.

See Applicant Bulletin for complete details.

## Track 2 Transfer Students

Applicants who are missing one or more of the Track 1/Foundation course requirements may apply under Track 2 provided they have met the following criteria: completed a minimum of 24 credit hours; achieved a minimum admission GPA of 3.1 ; and achieved a minimum grade of " C " on each course comprising the 24 credit hours. Track 2 applicants are encouraged to complete all outstanding Track 1/Foundation required courses during their first year after admission to the Asper School of Business.

Minimum 24 credit hours completed by April 30. Although 24 credit hours is the minimum requirement for admission, a full year course load would require 30 credit hours; therefore, students only taking 24 credit hours for admission will need to pick up an extra 6 credit hours of course work once in the Asper School of Business.
*Students must achieve a minimum grade of " $C$ " on each course listed above. Admission in this category is competitive.

See Applicant Bulletin for complete details.

## Priority for Admission

Admission to the Asper School of Business is limited to an annual quota. The quota will be filled by selecting students from a rank-ordered list of applicants in the following order:

For September 2011:

First Priority -Direct Entry from High School applicants.
Second Priority - Track 1 applicants with an AGPA of 2.60 or greater in descending order of AGPA. Thirty spaces are reserved for the Track 2 applicants with an AGPA of 3.10 or higher in descending order of AGPA.

Third Priority - Track 2 applicants (who are not already admitted under the Second Priority) with an AGPA of 3.10 or greater in descending order of AGPA.

Fourth Priority - Track 1 applicants with an AGPA of 2.00 2.59 in descending order of AGPA.

Both Track 1 applicants and Track 2 applicants may require an AGPA well in excess of the minimum to be successful in the annual competition for admission.

## Other requirements

High school prerequisite: Grade 12 Pre-Calculus Mathematics 40S (or equivalent, with a minimum $60 \%$ )

The Written English and Mathematics requirements are satisfied by Track 1/Foundation courses.

Minimum AGPA for consideration: 2.0 for Track 1 applicants; 3.1 for Track 2 applicants.

Admission to the Asper School of Business is limited to an annual quota and is competitive.

The Bachelor of Commerce (Honours) program does not have a Mature Student Category for admission.

All students seeking admission to the Bachelor of Commerce (Honours) program must first complete either the Direct Entry, Track 1 or Track 2 requirements.

All students planning to enter the Bachelor of Commerce (Honours) program must obtain a minimum of 60 per cent in Grade 12 Pre-Calculus Mathematics 40S (or equivalent) in order to complete all degree requirements.

The Bachelor of Commerce also has a Special Consideration Category.

See Applicant Bulletin for complete details.

## Advance Standing: Transfer and Second Degree Students

Students who do not meet the eligibility requirements for admission after their first year of University can spend another year (or more) in another faculty, complete the eligibility requirements, and then apply (or re-apply) for admission. Students who complete additional course credits beyond the Track 1/Foundation or Track 2 requirements are
eligible to receive applicable advance standing upon admission to the Asper School of Business.

The following regulations apply to students who must (or choose to) take more than one year to qualify for admission to the Asper School of Business.

## All transfer and second degree students will be required to:

Meet the admission requirements of Track 1 or Track 2 in the year of application.

Complete all 120 credit hours required in the Bachelor of Commerce (Honours) program, including the 24 credit hours that comprise the specific Track 1/Foundation course requirements, the Core requirements, the course requirements for one Major, Business Options, and Elective courses. After admission to the Asper School, students in Track 2 must complete all outstanding courses listed in the Track 1/Foundation course requirements and achieve a minimum grade of " $C$ " in each course.

Students who are admitted to the Asper School of Business who have completed more than the minimum 24 credit hours requirement of Track 1/Foundation course or Track 2 may be eligible to receive transfer credit for the additional work completed, provided the additional course work is creditable toward the degree requirements of the Bachelor of Commerce (Honours).

Students who are admitted to the Asper School of Business following the completion of another degree program are eligible to receive a maximum of 60 hours of transfer credit for applicable courses completed as part of their first degree. Students who, within their first degree, have more than 60 hours of transferable credits would be required to take substitute courses for credits in excess of the 60 hour limit on transfer.

Students who have a degree and in addition have completed further courses at the University of Manitoba which are applicable to the B. Comm. (Hons.) program that were not used for credit toward their first degree may receive additional transfer credit for that work.

Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years.

Students are encouraged to contact a Undergraduate Program Advisor in the Undergraduate Program Office for information on how to optimize their transfer credit and advance standing.

See Applicant Bulletin for detailed information on admission requirements.
2.2 Admission Requirements from Joint Programs with Manitoba Colleges,

The Asper School of Business has established Joint Programs with Red River College, Assiniboine Community College, University College of the North, and école technique et professionnelle. Graduates of the Business Administration Diploma (University Stream) from these four colleges are eligible to apply directly to the Asper School of Business.

Successful applicants will receive block transfer credit for their courses completed in the Business Administration Diploma and are required to complete specified courses at the University of Manitoba in order to receive the Bachelor of Commerce (Honours) degree. Requirements for the Joint Programs are listed in Section 4.

Admission to each Joint Program is limited to an annual quota and is competitive. Students must achieve a minimum grade point average of 3.00 on their Business Administration Diploma (University Stream) to be eligible for admission. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Applicants are ranked in descending order of their grade point average and are admitted until the annual quota is met.

See Applicant Bulletin for detailed information on admission requirements.

## SECTION 3: Academic Regulations

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Undergraduate Program Office for updated information.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Asper School of Business has regulations and requirements, published below, which apply specifically to its students and to nonbusiness students taking business courses.

### 3.1 Changes in Program Requirements,

Once students are admitted to the Asper School and have successfully completed any portion of the program, they will not be required to meet new course requirements subsequently stipulated for that portion of the program, whether the requirements be for the faculty or for an individual major.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

### 3.2 Evening Program,

The Asper School of Business does not offer an evening program. Although a limited number of business courses may be offered in evening time slots during both the Regular and Summer Sessions, it is not possible to complete all the
course requirements of the Bachelor of Commerce (Honours) program without recourse to daytime attendance.
3.3 Management Minor for Non-Business Students, The Management Minor consists of any 18 hours of credit in courses offered by the Asper School of Business. Entrance requirements and enrolment limits vary with a student's faculty of registration. Students planning to enrol in this minor should consult a student advisor in your home faculty.

### 3.4 Student Responsibility,

The Bachelor of Commerce (Honours) program undergoes changes from time to time. As a result, some changes in program structure, content and regulations may be made for the current and upcoming academic year. Specific program information for the regular program, the co-operative education program option, Joint Programs, and 2+2 Programs may be obtained from the Undergraduate Program Office.

## Student's Responsibility

It is the responsibility of all students to ensure that they follow the program of study as outlined in their chosen Major and that they meet all the requirements as specified by the University of Manitoba and the Asper School of Business.

When you are registering for courses, it is your responsibility to ensure that you have satisfied all prerequisite and concurrent course requirements.

It is your responsibility to ensure you have registered for the correct courses to satisfy the requirements of the Bachelor of Commerce (Honours) degree.

Read carefully to make sure you are not registered for a course that "May Not Be Held With" a course you have already taken. You will not be allowed to apply both courses toward your degree requirements.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

### 3.5 Prerequisite Requirements,

Prerequisite requirements must be met for entry into and continuance in the faculty.

Students must also meet all individual course prerequisites for further study in the program.

A passing grade is acceptable for prerequisite purposes for courses offered by the Asper School of Business unless a higher grade is called for in the course description.
3.6 Degree GPA Requirement for Graduation, Students Admitted in 2011 and Thereafter

Students admitted to the Asper School of Business in 2011 and thereafter must achieve a minimum degree GPA of 2.00 on all 120 credit hours required in the Bachelor of Commerce (Honours) degree program. Students must also achieve a passing grade of "D" or better in each course except for the individual courses required in the Track 1/Foundation course requirements that require a grade of "C" or better in each course.

All Track 1/Foundation courses, Core courses, Major courses, Business Options, and Electives applicable to the Bachelor of Commerce (Honours) degree requirements, as well as the grades achieved in each course, are transferred into the Asper School of Business and are included in the degree GPA.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

### 3.7 Calculation of the Cumulative GPA,

The computation of the cumulative GPA is the same as that described in the chapter, General Academic Regulations and Requirements.

### 3.8 Residency Requirement,

All Business students must complete a minimum of 60 credit hours at the University of Manitoba in order to satisfy the residence requirement of the Bachelor of Commerce (Honours) degree.

Students participating in approved International Exchange Programs may be exempt from the 60 credit hour requirement. Please consult with the Undergraduate Program Office for more details.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

Students considering completing course work at another university are referred to the chapter, General Academic Regulations and Policy, and the section on Letter of Permission.

### 3.9 Time Limit for Completion of the Degree,

The maximum period of eight years for completion of degree requirements will be reduced by one year for each block of 15 credit hours of advance standing received at the point of admission. This time limit applies to all students, whether full-time or part-time.

The maximum period for completion of degree requirements for students enrolled in the co-operative education option is currently under faculty review.

A student who does not complete all degree requirements within the time limit permitted will be required to withdraw from the faculty. Students may appeal to the Undergraduate

Program Committee for a one year time extension; all appeals must be accompanied by a detailed letter explaining the student's circumstances and appropriate supporting documentation.

### 3.10 Maximum Number of Failures,

Each student in the Asper School of Business is permitted a maximum of 15 credit hours of failures. Students who exceed their limit of failures will be placed on Academic Suspension. Such students may enter the Reinstatement Program and should contact an Undergraduate Program Advisor in the Undergraduate Program Office for details.

### 3.11 Repeating, Substituting and Extra Courses, Maximum Limit Allowed

Each student will be permitted to repeat or substitute a maximum of 12 credit hours of previously passed courses, with a maximum of 6 credit hours per course within the regulations detailed below.

After completion of the approved course repeat or substitution, only the latest of the grades achieved will be included in the computation of the degree GPA.

## Required Courses

A student who withdraws from a Core course or who obtains a grade of " $F$ " in such a course should repeat that course during the following Fall or Winter Term. If a student repeats a course for which a grade was recorded, only the latest of the grades achieved will be included in the computation of the degree GPA. Therefore, if on repeating the course, the student does not complete the course successfully, a grade of "F" will be recorded for that course on the student's history.

Students may not substitute another course for a Core course.

## Major Courses

Students who achieve a grade of " $F$ " in a Major course must either repeat that course or substitute another Major course if the Major requirements permit an alternate choice. Upon completion of the Major course, only the latest of the grades achieved will be included in the computation of the degree GPA. When a course is to be substituted, the student must seek the approval of the Undergraduate Program Office, in writing, prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

## Electives and Business Options

Students who achieve a grade of "F" in an Elective or Option may either repeat that course or substitute another approved course in its place. Upon completion of the course, only the latest of the grades achieved will be included in the computation of the degree GPA. When a course is
substituted for a failed Elective or Option, a student must request approval from the Undergraduate Program Office in writing prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

## Voluntary Repeats

In order to improve their degree GPA, or to meet a prerequisite requirement, students may, with prior approval from the Undergraduate Program Office, voluntarily repeat any course in which a passing grade has been received, subject to any registration restictions that may be published on the faculty website and subject to the limits imposed at the point of admission. Students must request approval from the Undergraduate Program Office prior to enrolling in the course; failure to do so may result in a denial of the course substitution.

After completion of the approved course repeat or substitution, only the latest of the grades achieved will be included in the computation of the degree GPA.

## Extra Courses

Students who would like to take courses extra to their degree are permitted providing prior approval of the Undergraduate Program Office is obtained prior to registration. When a course is extra to the degree but a student would like to substitute the course for another already in the degree, the student must seek the approval of the Undergraduate Program Office, in writing, prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

### 3.12 Completing Two Majors (Second Major), Students Wishing to Complete Two Majors

Note the following Asper School of Business policy: "Students will not be given any registration priority for a second major." The Asper School of Business cannot guarantee that you will obtain space in the courses you would like for a second major.

Students who have completed all the requirements or who have all the courses in registration for a major are not permitted to formally declare a different major unless there is space in the courses needed to complete the different major. Students are not permitted to declare a different major in order to obtain space in full courses.

### 3.13 Failure to Meet Requirements and the Suspension \& Reinstatement Regulations,

Failure to meet the requirements for graduation within the limits specified above will result in the student being placed on Academic Suspension. Such students may enter the Reinstatement Program and should contact an Undergraduate Program Advisor in the Undergraduate Program Office for details.

Students in jeopardy should carefully monitor their first term results since they will be withdrawn from all second term Business courses if suspended, regardless of the date of official notification of the suspension.

Students who have been placed on Academic Suspension will only be considered for reinstatement into the Asper School of Business after the specific conditions of reinstatement have been met. Details concerning reinstatement are available from the Undergraduate Program Office.

### 3.14 Withdrawal from the Bachelor of Commerce (Honours) Program,

- A student who does not register for any courses in the Fall or Winter term after admission will cease to be a student in the Asper School of Business. Such students must re-apply for admission if that is desired and will have to meet the requirements for admission at the time of the new application.
- A student who registers for course work in the Fall or Winter term after admission but subsequently voluntarily withdraws from all course work may be permitted to re-register at any time thereafter, subject to all faculty policies and requirements as they existed at the time of first admission and completing a signed declaration of non-attendance at another post-secondary institution. Such students should be aware of the time limit for completion of the degree.
- A student who applies for transfer to another university program and subsequently registers for courses will cease to be a student in the Asper School of Business. Such a student must re-apply for admission if that is desired and will have to meet the requirements for admission at the time of the new application.

### 3.15 Withdrawal from Individual Courses, Required Courses

Students in the Asper School of Business may withdraw without academic penalty from a required Core course provided they have not previously failed or withdrawn from that course and that they have met the Voluntary Withdrawal deadlines established by the university (see Deadline for Withdrawals in the Academic Schedule).

## Electives and Business Options

Students may withdraw without academic penalty from an Elective or Option provided they do so before the final date for withdrawal (see Deadline for Withdrawals in the Academic Schedule).

## Authorized Withdrawals

Authorized Withdrawals from courses after the registration revision period in each term may be granted on the basis of medical and compassionate grounds. A medical certificate signed by a physician or other appropriate professional must
document medical grounds. Appeals based on compassionate reasons and circumstances must be supported by appropriate documentation. Students requesting Authorized Withdrawals should contact the Undergraduate Program Office.

### 3.16 Withdrawal from the Co-operative Education Option,

Students may be required to withdraw from the program for any of the following reasons:

- Failure to maintain the minimum academic requirements of the Asper School of Business,
- Failure to maintain the minimum credit hour requirements of the academic term in the co-op option,
- Unsatisfactory performance in the work place during a work term,
- Failure to observe the ethical standards of the Asper School and the University in place at the time; including being found guilty of academic dishonesty, or
- When, in the opinion of the Co-op Director and Faculty Advisor, the student does not exhibit sufficient qualities of ability, skills, aptitudes, attitudes, diligence or motivation to complete the program successfully.

Students who wish to withdraw voluntarily from the Co-op Program may do so by written letter to the Co-op Director at any time prior to accepting a position for a work term. Any work term grades earned by the co-op student up to the date of the letter of withdrawal will stand.

Details for all continuing requirements or withdrawal procedures can be found in the Co-operative Education Option/Program Academic Regulations document.

### 3.17 Maximum Course Load/Minimum Course Load,

Students are not permitted to take more than 18 credit hours during an academic term without permission from the the Undergraduate Program Manager.

Students enrolled in the Co-operative Education Option are not permitted to take more than 3 credit hours during a cooperative work term.

Students enrolled in the Co-operative Education Option must register in a minimum of 9 credit hours between co-op work terms.

### 3.18 Course Selection and Requirements,

All students are limited to a maximum of six credit hours of IDM 4050 Readings in Management, IDM 4070
Management Research 1, and IDM 4080 Management Research 2. These courses are considered Business Options, rather than as part of any Major.

ACC 3050 Taxation Accounting, FIN 3270 Personal Financial Planning, FIN 3420 Security Analysis and FIN 3440 Real Estate Investments are also considered general Options. They are not part of any Major.

### 3.19 Eligibility Requirements for Awards,

To be eligible for the Dean's Honours List a student must complete a minimum of 12 credit hours of courses at the University of Manitoba during one academic term and achieve a term GPA of at least 3.50. Students participating in approved International Exchange Programs may be eligible for the Dean's Honour List.

To be eligible for most awards, a student must complete a minimum of 24 credit hours of courses at the University of Manitoba during an academic year consisting of consecutive Fall and Winter terms. Co-operative Education students are eligible to apply for most awards; please check the Asper Undergraduate Program web site and/or with the Financial Aid and Awards Office for more information on the eligibility requirements for Co-operative Education students.

The degree "With Distinction" will be awarded to all students graduating with the Bachelor of Commerce (Honours) Degree who attain a degree GPA of 3.80 or better on the following criteria: students admitted to the Asper School of Business in 2011 and thereafter will have their degree GPA determined on the basis of all courses which form a part of the 120 credit hours required in the four-year degree program.

The University Gold Medal in Business shall be awarded annually. The candidate for the one medal may be a graduate from either the Bachelor of Commerce (Honours) or the Bachelor of Commerce (Honours) [Co-operative Education Option]. Students graduating in October, February, and May are eligible for the Gold Medal in Business which shall be awarded annually at the spring convocation.

Students interested in the detailed terms of reference for the University Gold Medal in Business or who are interested in bursaries, awards and scholarships should contact the Undergraduate Program Office in Asper or the University's Financial Aid and Awards Office.

### 3.20 Examination Regulations,

The faculty adheres to the General University Examination Regulations Policy. For particular examination regulations, including deferred examinations, pertinent to the Faculty, students are referred to the pamphlet, Examination Regulations for the Asper School of Business, available from the Undergraduate Program Office. The faculty does not offer supplemental examinations. The faculty does not offer Challenge for Credit examinations.

### 3.21 Letter of Permission to Take Courses at Another

 University for Transfer of Credit,Students wishing to complete courses at another institution for credit at the University of Manitoba will apply for written permission from the Registrar's Office prior to registering at the other institution. Students should apply for the Letter of Permission at least 4-6 weeks in advance. Information about "Studying at another University" and applying for a Letter of Permission are on the Registrar's web site at: umanitoba.ca/student/records.

University of Manitoba

To be eligible to take courses on a Letter of Permission, a Business student must:
i) be applying to take a course not currently offered by Asper (when applying to take a course transferred as an Asper course) in the term for which they are applying and
ii) have completed a minimum of 24 credit hours in the Asper School of Business in addition to any transfer credits received upon admission.

Grades achieved in courses taken on a Letter of Permission shall be transferred to the student's academic record and shall be included in the cumulative and degree GPA, but will not be included in a students term GPA.

### 3.22 Plagiarism, Cheating and Personation,

The Asper School of Business has adopted the Senate definition and policy on plagiarism, cheating and personation as described in the chapter, General Regulations and Requirements. A student found guilty of participating in any of these activities is subject to serious academic penalty and possible prosecution under the Canadian Criminal Code.

### 3.23 Student Appeals of Academic Regulations,

Except as otherwise noted, student appeals should be directed to the Secretary of the Undergraduate Program Committee in the Undergraduate Program Office. The Committee considers appeals from Asper students who request special consideration in respect to rules and regulations governing their programs of study.

A certificate from an appropriate professional agency, such as the University Counselling Service or a licensed medical practitioner, should support appeals based on compassionate or medical problems.

### 3.24 Security of Academic Records,

The Asper School of Business has adopted supplementary criteria and procedures on access to student academic records to supplement the university policy on Disclosure and Security of Student Academic Records. Copies of these policies are available in the Undergraduate Program Office. (Currently under review.)

### 3.25 Transcipts and Degree Parchments, Majors on Transcripts

After you graduate with your Bachelor of Commerce (Honours) degree, your formally declared major will appear on your University of Manitoba transcript. Your major will appear on your transcript once you have formally declared it on Aurora. Your major will not be listed on the Bachelor of Commerce (Honours) parchment.

If you complete the requirements of a second major within the credit hours required for the Bachelor of Commerce (Honours) degree, you may request that the second major
also appear on your transcript after you graduate. See the Undergraduate Program Office in your graduating term to complete a request form.

## Co-operative Education Option on Transcripts

If you have successfully completed the Co-operative Education Option, it will appear on your University of Manitoba transcript after you graduate with your Bachelor of Commerce (Honours) degree. The Co-operative Education Option will appear on your transcript once you have formally declared it on Aurora. Also, the Co-operative Education Option will appear on the Bachelor of Commerce (Honours) parchment.

## SECTION 4: Program and Graduation Requirements

The Bachelor of Commerce (Honours) program comprises 120 credit hours of course work. The Co-operative Education Option also comprises 120 credit hours of course work plus a minimum of three 4-month approved work terms. The degree encompasses the following components which will be listed in detail below: Track 1/Foundation courses, Program Core courses (common to all students), Major courses, Business Options and Elective courses. Each student must declare at least one major and present a minimum Degree Grade Point Average of 2.00.
Detailed information on the degree regulations is found in Section 3, in the Undergraduate Program Office (268 Drake) or on the undergraduate web site at: umanitoba.ca/faculties/management/programs/undergraduat e/
NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.
4.1 Program Requirements for the Bachelor of Commerce (Honours) Program - Track 1 with Guaranteed Admission, Track 1 and Track 2
All students admitted under these tracks (including International Students and International from 2+2 Joint Programs) will complete the Bachelor of Commerce Honours Program. The Bachelor of Commerce (Honours) degree is comprised of 120 credit hours and can be divided into the following components:

- The Track 1/FoundationCourse Requirements (24 credit hours)
- The Core (51 credit hours)
- The Major (12 credit hours)
- Business Options (15 credit hours)
- Electives ( 15 credit hours)
- Business Option or Elective (3 credit hours)

These components comprise 120 credit hours; their associated limits are defined below.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

Track 1/Foundation Course Requirements

All students must complete the specified Track 1/Foundation course requirements. Direct Entry stduents from high school will complete the Track 1/Foundation courses in their first year. Track 1 students complete these requirements prior to their admission to the Asper School of Business. Track 2 students have completed 24 credit hours of university course work but are missing one or more of the specific Track 1/Foundation courses courses. Track 2 students should complete all outstanding Track 1/Foundation courses during their first year after admission to the Asper School of Business and must achieve a minimum grade of " $C$ " in each outstanding Track 1/Foundation courses.

## The Core

The CORE consists of 51 credit hours of specified mandatory courses from all four departments in this faculty as well as courses taught by the departments of Economics, Environment, Global Political Economy, Political Studies, Philosophy and Sociology. All students are required to complete the Core. The Core presents the essence of a business degree program. The majority of the Core courses are taken in Years 2 and 3 of the Bachelor of Commerce Honours Program.

## The Major

Each student is required to complete the course requirements of one MAJOR. Each department and the Dean's Office have developed one or more Majors. Each Major consists of a 12 credit hours of course work specified by the department. Subject to demand and faculty resources, specialized Majors are available in Aboriginal Business Studies, Accounting, Actuarial Mathematics, Entrepreneurship/Small Business, Finance, Generalist, Human Resources Management/Industrial Relations, International Business, Logistics and Supply Chain Management, Management Information Systems, Management of Organizations, Marketing, and Operational Research/Operations Management. A list of the Departments and the Majors they oversee is outlined below.

Students will normally choose a Major at the beginning of the third year of the program, following completion of many of
the Core courses, which introduce the areas. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

## Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students are required to complete 15 credit hours of Options. Some students may want to take Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in another or several other Majors. Students who want to supplement their Majors may take up to 12 hours of their Options from that area. Students may complete a second Major as part of their Options requirements. Such students should consult with staff in the Undergraduate Program Office.

## Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must complete 15 credit hours of Electives that meet the following criteria; a minimum of 6 credit hours of the Electives must be at the 2000 Level or higher plus a minimum of 3 credit hours of the Electives must comprise a freely chosen course that meets the Written English "W" requirement at any level.

## Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

## Course Requirements for Direct Entry, Track 1 and Track 2 Students

The tables below list the Core courses that all Business students must complete. The courses are listed by year in a suggested sequence. Students normally complete the Core courses in the sequence shown.

To determine which additional courses to take each year (i.e., non-Core courses) students should consult the listing of course requirements for each year of their chosen Major.

| YEAR 1: Track1/Foundation Courses | Cr. Hrs. |
| :--- | :--- |
| ANTH, HIST, MATH, PHIL, POLS, PSYC, SOC (see Note 1) | 6 |
| ECON 1010 AND ECON 1020 | 6 |
| MATH 1520 OR MATH 1500 | 3 |
| STAT 1000 | 3 |
| Written English "W" (see Note 2) | 3 |
| Elective (see Note 3) | 3 |
| Minimum credit hours to qualify (see Note 4) | 24 |

|  |  |
| :---: | :---: |
| Year 1: Core Courses |  |
| GMGT 1010 | 3 |
| One of : GMGT 2060, GMGT 2070 or MKT 2210 | 3 |
| Total credit hours (see Note 4) | 30 |
|  |  |
| YEAR 2 |  |
| ACC 1100 | 3 |
| ACC 1110 | 3 |
| FIN 2200 | 3 |
| GMGT 2010 | 3 |
| Two of : GMGT 2060, GMGT 2070, MKT 2210;whichever two courses not taken in Year 1 (see Note 5) | 6 |
| MIS 2000 | 3 |
| MSCI 2150 | 3 |
| Electives (see Note 6) | 6 |
| Total credit hours | 30 |
|  |  |
| YEAR 3 |  |
| HRIR 2440 | 3 |
| GMGT 3300 | 3 |
| SCM 2160 | 3 |
| International Business Requirement (see Note 7) | 3 |
| Ethics (see Note 8) | 3 |
| Electives, Options \& Major Courses (see Notes 6 and 10) | 15 |
| Total credit hours | 30 |
|  |  |
| YEAR 4 |  |
| GMGT 4010 | 3 |
| Alternative Management Studies (see Note 9) | 3 |
| Electives, Options and Major Courses (see Notes 6 and 10) | 24 |
| Total credit hours | 30 |
|  |  |
| Total Credit Hours Required for Degree | 120 |

## NOTES:

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.
2) Students are required to select a three credit hour course to satisfy the Written English "W"requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.
3) PHIL 1290 Critical Thinking is a preferred elective.
4) For Track 1 transfer students these 24 credit hours of specified courses are the minimum requirements for admission. Direct Entry high school admits will also be taking these Foundation courses in Year 1. All students regardless of admit type must take these courses and achieve a minimum grade of " $C$ " (see applicant bulletin for complete details).
5) The prerequiesite to GMST 2060 and GMGT 2070 is GMGT 1010 (D).
6) In addition to 51 credit hours of Core courses all students must take 12 credit hours in one Major, 15 credit hours of Business Options, 15 credit hours of Electives (which must include a minimum of 6 credit hours at the 2000 Level or higher plus 3 credit hours of Written English "W") plus 3 credit hours of either Business Options or Electives (which must be at the 2000 Level or higher).
7) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.
8) Ethics requirement: One of the following courses: PHIL 2290, PHIL 2750, PHIL 2790, PHIL 2830, GMGT 3030 or GMGT 3581. If a 6 credit hour course is chosen, 3 credit hours will count as Electives.
9) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMGT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.
10) Students may register for Electives in any year. Registration in Options and Major courses normally begins in Year 3 of the 4Year program.

## Course Key

All Core courses are taught by the Asper School of Business except the following:

University of Manitoba

| SUBJECT | Cr. Hrs. |  |  |
| :--- | :--- | :--- | :---: |
| Economics | 3 |  |  |
| ECON 2540 | Political Economy 1: Production and <br> Distribution | 3 |  |
| ECON 2630 | An Intro to the World's Economies | 6 |  |
| ECON 3710 | Sustainable Development: Issues and Policy | 3 |  |
| ECON 3810 | Alternative Approached to Macroeonomic <br> Analysis | 3 |  |
| Environment | 3 |  |  |
| ENVR 4110 | Critical Thinking and the Environment | 3 |  |
| Global Political Economy | 3 |  |  |
| GPE 2700 | Perspectives on Global Political Economy | 3 |  |
| Political Studies | 3 |  |  |
| POLS 3220 | Globalization and the World Economy | 3 |  |
| POLS 3250 | International Political Economy | 3 |  |
| Sociology |  |  |  |
| SOC 3870 | Social Inequality | 6 |  |
| Philosophy | Ethics and Society | 3 |  |
| PHIL 2290 | Ethe | 6 |  |
| PHIL 2750 | Ethics and the Environment | 3 |  |
| PHIL 2790 | Moral Philosophy |  |  |
| PHIL 2830 | Business Ethics |  |  |

### 4.2 Program Requirements for Majors

Students who intend to complete a second major should note that when a course is applicable to two different majors, that course may be used to satisfy only one set of major requirements.

## Aboriginal Business Studies

The Major consists of NATV 4220, IDM 3000 plus six credit hours from ENTR 3100, ENTR 4100, FIN 3250, FIN 3470, GMGT 4150, IDM 4090, NATV 3000 (topic: Aboriginal Wisdom and Spirituality), or NATV 3350.

NOTE: This major is currently under review: Check with the Undergraduate Program Office for a list of acceptable alternatives.

## Accounting

The Major consists of: ACC 2010, ACC 2020, ACC 3040 and ACC 4030. The prerequisite for ACC 2010 is "ACC 1100 (C+) and for ACC 3040 is ACC 1110 (C+).

## Actuarial Mathematics

The Major consists of any 12 hours from ACT 2020, ACT 2120, ACT 3130, ACT 3230, ACT 3340, ACT 3530, ACT 4140 and ACT 4340.

Prior to registration, all students interested in or enrolled in Actuarial Mathematics should consult the Director or a Undergraduate Program Advisor for program planning advice.

To facilitate entry into and understanding of material covered in some advanced Actuarial courses, students entering the second year of the four-year program are advised to take the following courses: MATH 2720 plus MATH 2730 or MATH 2750 (which satisfies the elective requirement). Students declaring Actuarial Mathematics as their first major may take these course as either Business Options or non-Business Electives.

Students admitted in Fall 2006 and thereafter are required to attain a minimum grade of "C+" in all Actuarial courses in order to graduate with a Actuarial Mathematics Major.

Student interested in the Actuarial Mathematics major are encoraged to take MATH 1300 and MATH 1700 as Track 1/Foundation courses or alternately as electives in Year 1.

## Entrepreneurship/Small Business

The Major consists of: ENTR 3100, ENTR 4100, FIN 3470 and one of: ACC 3050, FIN 3250, ACC 3530, , ENTR 3102 (not to be held with the former GMGT 3050), ENTR 3104, ENTR 3106, GMGT 3080, MKT 3220, MKT 3310 or MKT 4270.

## Finance

The Major consists of: FIN 3410, FIN 3460, FIN 3480, and FIN 4400.

Finance Options are: FIN 3450, FIN 4230, FIN 4260, and FIN 4270. Students in the Finance Major may take all of these courses.

The prerequisite for FIN 3410, FIN 3460 and FIN 3480 is FIN 2200 (C+), MATH 1300 (C) or MATH 1310 (C), and STAT 2000 (C).

## Generalist

The Major consists of one course from the required list of courses from four different Majors (i.e., Options that are not part of a Major's required course requirements are not eligible for the Generalist Major).

## Human Resources Management/Industrial Relations

The Major consists of: HRIR 3450 plus three of the following: HRIR 4410, HRIR 4420, HRIR 4480, HRIR 4520 OR HRIR 3450 plus two of the following: HRIR 4410, HRIR 4420, HRIR 4480, HRIR 4520, plus one of the following: HRIR 3430, LABR 3010, LABR 3060, LABR 3070, LABR 3130, and LABR 3140.

Students entering the second year of the four-year program are advised to take HRIR 2440 since it is a prerequisite to advanced courses in the area.

## International Business

The Major consists of: FIN 3450, INTB 2200, HRIR 4520, and MKT 3300.

One of the above four courses may be used in the core program; therefore the major will be comprised of the remaining three courses plus one course from the following list: MKT 3240 Special Topics in Marketing (Cross-Cultural Brand Management topic only), ACT 4250 Managing Insurance Operations in the International Business Environment or SCM 3230 Global Chain Management.

Students majoring in International Business are permitted to take 12 credit hours of a foreign language and/or courses with an international focus from an approved list and have these non-business courses count as Business Options. The list is available in the Undergraduate Program Office.

## Logistics and Supply Chain Management

The Major consists of: SCM 2210, SCM 2230, SCM 3360 plus one of the following: SCM 2220, SCM 2240, SCM 3230, SCM 4250 (not to be held with the former SCM 4240), OPM 4630.

Recommended Business Options/Electives in this area include: MIS 3500, MIS 3510, INTB 2200, HRIR 3450, GMGT 3160, GMGT 4160, MSCI 3400, IDM 4050, IDM 4070, IDM 4080, MKT 3220, MKT 3340, , GEOG 3800, ECON 2450, ECON 2460.

## Management Information Systems

The Major consists of MIS 3500, MIS 3510, MIS 3520, and MIS 4500.

Options available in this area are ACC 3530 and MIS 4250.

Students interested in pursuing the Management Information Systems Major are encouraged to take MIS 2000 in the second year of the four-year program since it is a prerequisite to advanced courses in the area.

Students interested in pursing the Management Information Systems Major are also encouraged, but not required, to complete COMP 1020.

## Management of Organizations

The Major consists of any 12 hours from: GMGT 3010, GMGT 3020, GMGT 3160, GMGT 4040, GMGT 4140 and GMGT 4150. Students entering the second year of the fouryear program are advised to take GMGT 2070 and GMGT 2080 since they are prerequisites to advanced courses in the area.

## Marketing

The Major consists of MKT 3220*, MKT 3230, MKT 4210 and 3 hours from MKT 3240, MKT 3250, MKT 3300, MKT 3310, MKT 3340, MKT 3390, MKTG 4270 or MKTG 4410. In addition to the 12 credit hours required for the major, Marketing students may take up to an additional 12 credit hours from the above list.
*Marketing students are also required to take STAT 2000 as one of their electives since it is a prerequisite for MKT 3220.

## Operational Research/Operations Management

The Major consists of any 12 hours from MSCI 3400, OPM 3650, OPM 3660, OPM 3670, MSCI 4220, MSCI 4230, OPM 4620, and OPM 4630.

Prior to registration, all students enrolled in Operational Research/Operations Management should consult the Department Head or a Undergraduate Program Advisor for program planning advice.

### 4.3 Program Requirements for the Co-operative Education Option

All students must complete all 120 credit hours of the program including the Core, one of the Majors listed above in Section 4.2, as well as the Option and Elective course components. Students who intend to complete a Cooperative Education Option must also complete a minimum of three (3) 4-month work terms. Students admitted from September 2011 and who successfully complete the minimum three 3 work terms can combine the work terms together to satisfy 3 credit hours of Business Options. Complete details for entrance and continuing requirements may be obtained from the Undergraduate Program Office.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

### 4.4 Program Requirements for the Asper School of Business/Red River College Joint Program

Prior to admission to the Asper School of Business/Red River College Joint Program, students must complete the Business Administration Diploma (University Stream) at Red River College with a minimum cumulative grade point average of 3.00 . Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 66 credit hours to earn the Bachelor of Commerce (Honours) degree. The 66 credit hours can be divided into the following components: the Core, the Major, Business Options, and Electives. These components and their associated limits are defined below.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

NOTE: The Joint Program is currently under review; transfer credit details are subject to change.

## The Core

The CORE comprises 30 credit hours of the 66 required in the Joint Program. The Foundation courses ( 6 credit hours) should be taken in the first year at the Asper School. Students must achieve a minimum "C" grade in each Foundation course. The Program Core courses ( 24 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student's final term. Core courses are listed below in the Course Requirements for RRC Joint Program Students.

## The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed in Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to
transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/Red River College Joint Program who want to major in Finance will be required to take FIN 2200 as one of their Business Options. Likewise, students who want to major in Management of Organizations must take GMGT 2060 as one of their Business Options.

## Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take at least 12 credit hours of Business Options. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in another or several other Majors. Students who want to supplement their Majors may take up to 12 credit hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

## Electives

This component of the program is the ELECTIVE requirement. An elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must take at least 9 credit hours of Electives that meet the following criteria; a 3 credit hour course at the 2000 Level or higher, 3 credit hours must be a freely chosen course that meets the Written English "W" requirement at any level plus a 3 credit hour elective at any level.

## Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

## Course Requirements for RRC Joint Program Students

The course requirements for the Asper School of Business/Red River College Joint Program are as follows.
Students should register for the Foundation courses in their first year at the University of Manitoba and must achieve a minimum " $C$ " grade in each course.

| Foundation Courses | Cr. Hrs |
| :--- | :--- |
| MATH 1520 or MATH 1500 (see Note 1) | 3 |
| Written English Course (see Note 2) | 3 |
|  |  |
| Program Core Requirements |  |
| ACC 1110 | 3 |
| MIS 2000 | 3 |
| GMGT 1010 | 3 |
| SCM 2160 | 3 |
| GMGT 4010 (must be taken in final term) | 3 |

| Ethics (see Note 3) | 3 |
| :--- | :--- |
| Alternative Management Studies (see Note 4) | 3 |
| International Business (see Note 5) | 3 |
| Total Credit Hours |  |
| NOTES: |  |

## NOTES:

1) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40 S or equivalent or a grade of " $C$ " in the Mathematical Skills course taught by Extended Education. Students who have been admitted into the Asper School of Business/Red River College Joint Program and who successfully complete the Mathematical Skills course may be entitled to an additional three credit hour Elective from their Business Administration diploma.
2) Students are required to select a three credit hour course to satisfy the Written English "W"requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.
3) All Management students must complete three credit hours of Ethics. Students may fulfil this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMGT 3030 (3) or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.
4) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMGT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.
5) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

| Overall Program Requirements | Cr. Hrs. |
| :--- | :--- |
| Foundation Courses | 6 |
| Program Core Courses | 24 |
| Major Courses | 12 |
| Business Options | 12 |
| Electives | 9 |
| Business Option or Elective | 3 |
| Total Credit Hours |  |

### 4.5 Program Requirements for the Asper School of Business /Assiniboine Community College Joint <br> Program

Prior to admission to the Asper School of Business/Assiniboine Community College Joint Program students must complete the Business Administration Diploma (University Stream) at Assiniboine Community College with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 66 credit hours to earn the Bachelor of Commerce (Honours) degree. The 66 credit hours can be divided into the following components: the Core, the Major, Business Options, and Elective courses.

These components and their associated limits are defined below.

NOTE: The Joint Program is currently under review; transfer credit details are subject to change.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

## The Core

The CORE comprises 39 credit hours of the 66 required in the Joint Program. The Foundation courses ( 12 credit hours) should be taken in the first year in the Asper School. Students must achieve a minimum "C" grade in each Track 1/Foundation course. The Program Core courses (27 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student's final term. Core courses are listed below in Course Requirements for ACC Joint Program Students.

## The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/Assiniboine Community College Joint Program who want to major in Finance will be required to take FIN 2200 as one of their Business options. Likewise, students who want to major in Marketing must take MKT 2210 as one of their Business Options.

## Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take 9 credit hours of Business Options. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in other Majors. Students who want to supplement their Majors may take up to 9 hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

## Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must 3 credit hours of Electives that is a freely chosen course that meets the Written English "W" requirement at any level.

## Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

Course Requirements for ACC Joint Program Students
The course requirements for the Asper School of Business/Assiniboine Community College Joint Program are as follows. Students should register for the Track 1/Foundation courses in their first year at the University of Manitoba and must achieve a minimum "C" grade in each course.

| Foundation Courses | Cr. Hrs. |  |  |  |
| :--- | :--- | :---: | :---: | :---: |
| 6 credit hours from: ANTH, HIST, MATH, <br> PHIL, POLS, PSYC OR SOC (See Note 1) | 6 |  |  |  |
| MATH 1520 or MATH 1500 (see Note 2) | 3 |  |  |  |
| Written English Course (see Note 3) | 3 |  |  |  |
|  |  |  |  |  |
| Program Core Requirements |  |  |  |  |
| MIS 2000 | 3 |  |  |  |

## NOTES:

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.
2) The prerequisite for MATH 1520 or MATH 1500 is 60 per cent in Grade 12 Pre-Calculus Mathematics 40 S or equivalent or a grade of "C" in the Mathematical Skills course taught by Extended Education. Students who have been admitted into the Asper School of Business/ Assiniboine Community College Joint Program and who successfully complete the Mathematical Skills course may be entitled to an additional three credit hour Elective from their Business Administration diploma.
3) Students are required to select a three credit hour course to satisfy the Written English "W"requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.
4) All Business students must complete three credit hours of Ethics. Students may fulfil this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), , GMGT 3030 (3) or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.
5) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMGT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.
6) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520 , MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

#### Abstract

4.6 Program Requirements for the Asper School of Business /University College of the North Joint Program Prior to admission to the Asper School of Business/University College of the North Joint Program students must complete the Business Administration Diploma (University Stream) at University College of the North with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 81 credit hours to earn the Bachelor of Commerce (Honours) degree. The 81 credit hours can be divided into the following components: the Core, the Major, Business Options, and Electives. These components and their associated limits are defined below.

NOTE: The Joint Program is currently under review; transfer credit details are subject to change.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

## The Core

The CORE comprises 39 credit hours of the 81 required in the Joint Program. The Foundation courses ( 15 credit hours) should be taken in the first year in the Asper School. Students must achieve a minimum "C" grade in each Foundation course. The Program Core courses ( 24 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student's final term. Core courses are listed below in Course Requirements for UCN Joint Program Students

## The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of
course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed in Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/University College of the North Joint Program who want to major in Finance will be required to take FIN 2200 as one of their Business Options. Likewise, students who want to major in Marketing must take MKT 2210 as one of their Business Options.

## Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take 15 credit hours of Business Options. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in other Majors. Students who want to supplement their Major may take up to 12 hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

## Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must take 12 credit hours of Electives that meet the following criteria; 6 credit hours must be at the 2000 Level or higher, 3 credit hours must be a freely chosen course that meets the Written English "W" requirement at any level plus a 3 credit hour elective at any level.

## Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

## Course Requirements for UCN Joint Program Students

The course requirements for the Asper School of Business/University College of the North Joint Program are as follows. Students should register for the Foundation courses in their first year at the University of Manitoba and must achieve a minimum "C" grade in each course.

| Foundation Courses | Cr. Hrs. |  |  |  |
| :--- | :--- | :---: | :---: | :---: |
| 6 credit hours from: ANTH, HIST, MATH, <br> PHIL, POLS, PSYC OR SOC (See Note 1) | 6 |  |  |  |
| MATH 1520 or MATH 1500 (see Note 2) | 3 |  |  |  |
| Written English Course (see Note 3) | 3 |  |  |  |
| STAT 1000 | 3 |  |  |  |
|  |  |  |  |  |
| Program Core Requirements | 3 |  |  |  |
| MIS 2000 | 3 |  |  |  |
| GMGT 1010 | 3 |  |  |  |
| MSCI 2150 | 3 |  |  |  |
| SCM 2160 | 3 |  |  |  |
| GMGT 4010 (must be taken in final term) | 3 |  |  |  |
| Ethics (see note 4) | 3 |  |  |  |
| Alternative Management Studies (see Note 5) | 3 |  |  |  |
| International Business (see Note 6) | 3 |  |  |  |
| Total Credit Hours |  |  |  |  |

## NOTES:

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.
2) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40 S or equivalent or a grade of " $C$ " in the Mathematical Skills course taught by Extended Education. Students who have been admitted into the Asper School of Business/University College of the North Joint Program and who successfully complete the Mathematical Skills course may be entitled to an additional three credit hour Elective from their Business Administration diploma.
3) Students are required to select a three credit hour course to satisfy the Written English "W"requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.
4) All Business students must complete three credit hours of Ethics. Students may fulfil this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMGT 3030 or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.
5) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMGT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.
6) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

### 4.7 Program Requirements for the Asper School of Business /École technique et professionelle joint program

Prior to admission to the Asper School of Business/École technique et professionnelle Joint Program students must complete the Business Administration Diploma (University Stream) at École technique et professionnelle with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 66 credit hours to earn the Bachelor of Commerce (Honours) degree. The 66 credit hours can be divided into the following components: the Core, the Major, Business Options, and Electives. These components and their associated limits are defined below.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

## The Core

The CORE comprises 36 credit hours of the 66 required in the Joint Program. The Foundation courses ( 12 credit hours) should be taken in the first year in the Asper School. Students must achieve a minimum "C" grade in each Foundation course. The Program Core courses ( 24 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student's final term. Core courses are listed below in Course Requirements for ETP Joint Program Students.

## The Major

## ACADEMIC CALENDAR

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed in Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/École technique et professionnelle joint program who want to major in Finance will be required to take FIN 2200 as one of their Business Options.

## Business Options

This component of the program consists of a required number of Business courses freely selected by the student.
These courses are referred to as Business OPTIONS. Students must take at least nine and not more than 9 hours of Business Options. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their
educational base by selecting Business courses in other Majors. Students who want to supplement their Majors may take up to 9 hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

## Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must take at least six credit hours of Electives that meet the following criteria; 3 credit hours must be at the 2000 Level or higher and 3 credit hours must be a freely chosen course that meets the Written English "W" requirement at any level.

## Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective but it must be at the 2000 Level or higher.

## Course Requirements for ETP Joint Program Students

The course requirements for the Asper School of Business/École technique et professionnelle Joint Program are as follows. Students should register for the Foundation courses in their first year at the University of Manitoba and must achieve a minimum " $C$ " grade in each course.

| Foundation Requirements | Cr. Hrs. |  |  |  |
| :--- | :--- | :---: | :---: | :---: |
| 6 credit hours from: ANTH, HIST, MATH, PHIL, | 6 |  |  |  |
| POLS, PSYC OR SOC (See Note 1) |  |  |  |  |
| MATH 1520 or MATH 1500 (see Note 2) | 3 |  |  |  |
| Written English Course/Elective (see Note 3) | 3 |  |  |  |
|  |  |  |  |  |
| Program Core Requirements |  |  |  |  |
| MIS 2000 | 3 |  |  |  |
| GMGT 1010 | 3 |  |  |  |
| MSCI 2150 | 3 |  |  |  |
| SCM 2160 | 3 |  |  |  |
| GMGT 4010 (must be taken in final term) | 3 |  |  |  |
| Ethics (see note 4) | 3 |  |  |  |
| Alternative Management Studies (see Note 5) | 3 |  |  |  |
| International Business (see Note 6) | 3 |  |  |  |
| Total Credit Hours |  |  |  |  |

## NOTES:

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.
2) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40 S or equivalent or a grade of " $C$ " in the Mathematical Skills course taught by Extended Education. Students who have been admitted into the Asper School of Business/École technique et professionelle Joint Program and who successfully complete the Mathematical Skills course may be entitled to an additional three credit hour Elective from their Business Administration diploma.
3) Students are required to select a three credit hour course to satisfy the Written English "W"requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.
4) All Business students must complete three credit hours of Ethics. Students may fulfil this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMGT 3030 or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.
5) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMGT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.

## ACADEMIC CALENDAR

6) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520 , MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

## SECTION 5.1 Accounting and Finance-

## Accounting 1000 Level (ACC)

ACC 1100 Introductory Financial Accounting Cr.Hrs. 3 (Lab required) Examination of accounting postulates underlying the preparation and presentation of financial statements.

ACC 1110 Introductory Managerial Accounting Cr.Hrs. 3 (Lab required). Role of accounting in creation and application of business information used by decision-makers in the management of enterprise. Prerequisite: ACC1100 (009.110) (D). Prerequisite or Concurrent Requirement: ECON 1010 (D) and ECON 1020 (D) or the former ECON 1200 (018.120) (D).

## SECTION 5.2 Accounting and Finance-

 Accounting -2000 Level (ACC)ACC 2010 Intermediate Accounting - Assets Cr.Hrs. 3 (Formerly 009.201) Accounting policies and practices dealing with calculation and measurement of assets and related reporting problems. Prerequisite: ACC 1100 (or 009.110) (C+).

ACC 2020 Intermediate Accounting - Equities Cr.Hrs. 3 (Formerly 009.202) Consideration of current accounting relating to equities with attention to the accounting treatment of current and long-term liabilities, income tax allocation, share capital, and surplus. Students may not hold credit for both ACC 2020 (or 009.202) and FIN 3250 (or 009.325). Prerequisite: ACC 2010 (or 009.201) (D).

## SECTION 5.3 Accounting and FinanceAccounting - $\mathbf{3 0 0 0}$ Level (ACC)

ACC 3030 Advanced Accounting Cr.Hrs. 3 (Formerly 009.303) Topics include: partnerships, consolidations, mergers, reporting on conglomerates, and fund accounting. Not offered every year. Prerequisites: ACC 2010 (or 009.201) (D) and ACC 2020 (or 009.202)(D)or approval of department head.

ACC 3040 Cost Accounting Cr.Hrs. 3
(Formerly 009.304) Study of accounting concepts and functions as they relate to product costing, planning, control, and decision-making. Prerequisite: ACC 1110 (or 009.111)

## (C+).

ACC 3050 Taxation Accounting Cr.Hrs. 3
(Formerly 009.305) Structure and concepts of the Canadian tax system, emphasis on current tax practices. Prerequisite: ACC 1100 (or 009.110 ) (C+).

ACC 3530 Accounting Information Systems Cr.Hrs. 3 (Formerly 009.353) Role of accounting systems in total management information systems; design and installation of accounting systems. Prerequisites: ACC 1110 or ACC 1111 (or 009.111) (D) and MIS 2000 or MIS 2001 (or 009.200)(D).

## SECTION 5.4 Accounting and Finance- <br> Accounting 4000 Level (ACC) <br> ACC 4010 Auditing Cr.Hrs. 3

(Formerly 009.401) Study of philosophy and concepts of auditing, legal and ethical responsibilities of the auditor, basic techniques of auditing including statistical sampling and flowcharting, and the operational audit. Prerequisites: [ACC 2010 (or 009.201) and ACC 2020 (or 009.202) (D)] or approval of department head.

ACC 4030 Accounting Theory Cr.Hrs. 3
(Formerly 009.403) Examination of principles and postulates of accounting theory. Coverage of selected topics will vary from year to year depending on interests of course participants. Prerequisites: ACC 2010 (or 009.201) (D) and FIN 2200 (or 9.220 ) (D). Prerequisite or Concurrent Requirement: ACC 2020 (or 009.202) (D).

ACC 4040 Advanced Managerial Accounting Cr.Hrs. 3 (Formerly 009.404) A critical examination of managerial accounting techniques and the controllership function. Prerequisite: ACC 3040 (or 009.304) (D).

## SECTION 5.5 Accounting and FinanceFinance 2000 Level (FIN) <br> FIN 2200 Corporation Finance Cr.Hrs. 3

An introduction to corporate finance regarding the allocation \& acquisition of funds. Topics include: discounted cash flows, capital budgeting, financial instruments, cost of capital, risk-return trade-offs, market efficiency, capital structure and the use of derivatives. Prerequisite: [ACC 1100 (or 009.110 ) (D)] and [MATH 1500 or MATH 1520 (C)] and [STAT 1000 or STAT 1001 (C)] and [ECON 1010 (C) and ECON 1020 (C) or the former ECON 1200 (or 018.120 ) (C)].

University of Manitoba

## SECTION 5.6 Accounting and FinanceFinance 3000 Level (FIN) <br> FIN 3250 Financial Statement Analysis Cr.Hrs 3

 (Formerly 009.325) A study of the methods and techniques used for interpretation of annual financial reports and the significance of alternative accounting policies on reported income. Students may not hold credit for both FIN 3250 (or 009.325) and ACC 2020 (or 009.202). Prerequisite: ACC 1100 (or 009.110) (D).FIN 3270 Personal Financial Planning Cr.Hrs. 3 (Formerly 009.327) An introduction to financial planning techniques used in professional practice. Topics include financial assessment, income tax planning, risk management, insurance, debt and credit management, investments, retirement planning, and estate planning. Prerequisite: FIN 2200 (or 009.220) (D).

FIN 3400 Investment Banking Cr.Hrs. 3
(Formerly 009.340) The practice and theory of investment banking including valuation, initial public offerings, mergers and acquisitions, and restructuring. Prerequisite: FIN 2200 (or 009.220) (C+).

FIN 3410 Investments Cr.Hrs. 3
An introduction to investment analysis and modern portfolio theory. Topics include equilibrium in the capital markets, fixed income securities, equities and deriviative instruments. Prerequisite: [FIN 2200 (or 009.220) (C+)] and [MATH 1300 or MATH 1310 (C)] and [STAT 2000 (C)].

FIN 3420 Security Analysis Cr.Hrs. 3
This course provides a practical application of techniques to analyse a company for investment purposes and evaluate purchases of stock and fixed-income securities. Topics include financial statement analysis, ratio analysis, alternative methods for forecasting corporate profits and dividends, risk assessment, and valuation techniques. Prerequisites: FIN 2200 (or 009.220) (C+).

FIN 3440 Real Estate Investments Cr.Hrs. 3
An introduction to real estate finance. Topics include valuation, financing, transaction, tax and legal issues. Prerequisite: FIN 2200 (or 009.220) (C+).

FIN 3450 International Finance Cr.Hrs. 3 An introduction to the theory of comparative advantage, foreign exchange markets, international parity relations, international debt and equity markets, international debt operating exposures, and international capital budgeting. Prerequisite: FIN 2200 (or 009.220) (C+).

FIN 3460 Financial Markets and Institutions Cr.Hrs. 3 A study of financial systems with emphasis on Canada. Major topics include monetary policy, financial markets, financial institutions, financial regulation and risk management. Students may not hold credit for both FIN 3460 (or 009.346) and ECON 3640 ( or 018.364). Prerequisite: [FIN 2200 (or 009.220) (C+)] and [MATH 1300 or MATH 1310 (C)] and [STAT 2000 (C)].

FIN 3470 Small Business Finance Cr.Hrs. 3
(Formerly 009.347) Study of the financial issues faced by small business enterprises. Prerequisite: FIN 2200 (or
009.220) (D).

FIN 3480 Corporate Finance Theory and Practice Cr.Hrs. 3 Intermediate Corporate Finance including the following topics: Capital budgeting theory and techniques, determination of relevant cost of capital, capital structure, dividend policy, leasing and other special topics. Prerequisite: [FIN 2200 (or 009.220) (C+)] and [MATH 1300 or MATH 1310 (C)] and [STAT 2000 (C)].

## SECTION 5.7 Accounting and FinanceFinance -4000 Level (FIN)

FIN 4230 Selected Topics in Finance Cr.Hrs. 3
(Formerly 009.423) A study of current issues in finance.
Topics considered will depend on the interests and needs of the participants. Prerequisite: FIN 2200 (or 009.220) (C+).

FIN 4260 Advanced Finance Theory Cr.Hrs. 3 (Formerly 009.426) Theories that provide the foundation for modern corporate finance. Empirical tests of finance theories. Implications for managers. Prerequisites: FIN 3410 (or 009.341) (D) and FIN 3480 (or 009.348) (D).

FIN 4270 Options and Futures Cr.Hrs. 3
Mechanics of futures, options and swaps markets. Topics include arbitrage, hedging, forward rate agreements, models of derivative valuation and value-at-risk. Prerequisite: FIN 3410 (or 009.341) (D).

FIN 4400 Financial Management Practices Cr.Hrs. 3 Application of theoretical models in finance to real-world problems using cases. Topics include working capital management, long-term investment and financing decisions, valuation, risk management, reorginaztions and international financial mangement. Prerequisite: FIN 3480 (or 009.348) (D).

## SECTION 5.8 Accounting and FinanceManagement Info Systems 2000 Level (MIS)

MIS 2000 Information Systems for Management Cr.Hrs. 3 (Lab required) Introduction to information systems in organizations, systems development/acquisition, and management issues concerning information technology in organizations.

## SECTION 5.9 Accounting and FinanceManagement Info Systems 3000 Level (MIS)

MIS 3500 Database Management Systems Cr.Hrs. 3 (Formerly 009.350) Designing, developing and managing database systems, by using mainstream design methodologies and popular development tools. Prerequisites: [MIS 3510 (or 009.351) (D)] and [COMP 1010 (or 074.101) (C)].

MIS 3510 Systems Analysis and Design Cr.Hrs. 3 (Formerly 009.351) Analyzing business tasks, processes,

University of Manitoba
information and information technology, and designing information systems by employing methodologies, techniques and popular software used by information systems professionals. Prerequisites: MIS 2000 (or 009.200) ( $\mathrm{C}+$ ).

MIS 3520 Data Communications and Networking Cr.Hrs. 3 (Formerly 009.352) A study of basic data communications topics, including communication media, protocols, network security, network topologies (local and wide area networks), Web development and network management issues. Prerequisite: MIS 2000 (or 009.200 ) (C+).

## SECTION 5.10 Accounting and FinanceManagement Info Systems 4000 Level (MIS)

MIS 4250 Advanced Topics in Management Information Systems Cr.Hrs. 3
(Formerly 009.425) A study of current issues in MIS. The topics for this course will vary over time, depending on student interests, faculty interests, and student demand. Not offered every year. Prerequisite: consent of instructor.

MIS 4500 Management Information Systems
Strategy Cr.Hrs. 3
(Formerly 009.450) A survey of the various issues associated with managing information as a resource. Explores MIS planning frameworks and tools, and the linkages between information systems, organizational structure and organizational strategy. Prerequisites: at least two of the following: (Formerly 009.450) A survey of the various issues associated with managing information as a resource. Explores MIS planning frameworks and tools, and the linkages between information systems, organizational structure and organizational strategy. Prerequisites: at least two of the following: ACC 3530 (or 009.353) (D), MIS 3500 (or 009.350) (D), MIS 3510 (or 009.351) (D), MIS 3520 (or 009.352 ) (D), MIS 4250 (or 009.425) (D).

## SECTION 5.11 Warren Centre for Actuarial Studies 2000 Level (ACT)

ACT 2020 Economic and Financial Applications Cr.Hrs. 3 (Formerly 010.202) A synthesis of macroeconomic issues, quantitative aspects of finance using interest theory, and insurance economics. Prerequisite: ACT 2120 (or 010.212) (C+).

ACT 2120 Interest Theory Cr.Hrs. 3
The application of calculus and probability to discrete and continuous interest functions. Key topics are the measurement of interest, present and accumulated values, and annuities. May not be held with the former 010.212 or 010.232 or ACT 3320 (or 010.332). Prerequisite: MATH 1690 (or 136.169) (B) or MATH 1700 or MATH 1701 (or 136.170 ) (B) or MATH 1710 (or 136.171) (B). Prerequisite or Concurrent Requirements: [MATH 2750 (or 136.275 (D) or MATH 2720 (or 136.272 or 136.270) (D) or MATH 2730 (or 136.273 or 136.271 ) (D)] and STAT 2400 (D).

ACT 2210 Introduction to Risk Management Cr.Hrs. 3 (Formerly 010.221) Mathematical tools for the quantitative
assessment of risk and their application to problems encountered in risk management. Prerequisite: MATH 1700 (or 136.170) or MATH 1690 (or 136.169) (D). Prerequisite or Concurrent Requirement: [MATH 2750 (or 136.275) (D) or MATH 2730 (or 136.273 or 136.271) (D)] and [STAT 2000 or 005.200 (D)]; or consent of instructor.

## SECTION 5.12 Warren Centre for Acturial Studies $\mathbf{3 0 0 0}$ Level (ACT) <br> ACT 3130 Actuarial Models 1 Cr.Hrs. 3

(Formerly 010.313 ) Elementary concepts respecting the quantification of the financial impact of contingent payments. May not be held with the former 010.347. Prerequisite or Concurrent Requirements: ACT 2120 (or 010.212 ) (C+); and STAT 3400 (or the former STAT 3500 or 005.350 ) (D).

ACT 3230 Actuarial Models 2 Cr.Hrs. 3
(Formerly 010.323) Intermediate and advanced concepts respecting the quantification of the financial impact of contingent payments. Not to be held with the former 010.348. Prerequisite: ACT 3130 (or 010.313 ) (C+). Prerequisite or Concurrent Requirement: STAT 3800 (or the former STAT 3600 or 005.360 ) (D).

## ACT 3340 Financial Derivatives for Actuarial

Practice Cr.Hrs. 3
Introduction of interest rate models and rational valuation of derivative securities. Prerequisite: ACT $2020(\mathrm{C}+$ ) or consent of instructor.

ACT 3530 Actuarial Models 4 Cr.Hrs. 3
(Formerly 010.353) Survival Models, Stochastic Process Models, and Simulation Models. May not be held with the former 010.447. Prerequisite: ACT 3130 (or 010.313) (C+). Prerequisite or Concurrent Requirement: ACT 3230 (or 10.323) (D).

## SECTION 5.13 Warren Centre for Acturial Studies 4000 Level (ACT)

ACT 4000 Advanced Actuarial Topics Cr.Hrs. 3
(Formerly 010.400 ) A selection of advanced topics of current actuarial interest. Prerequisite: ACT 3230 (or 010.323 ) (D).

## ACT 4060 Actuarial Aspects of Investment

Practice Cr.Hrs. 3
(Formerly 010.406) This course examines stochastic interest rates and tools and techniques for coping with general product issues in asset/liability management. May not be offered every year. Students may not hold credit for both ACT 4060 (or 010.406 ) and the former 010.448 Topic Asset/Liability Management. Prerequisites: [FIN 2200 (or 009.220 ) (C+)] and [FIN 3410 (or 009.341) (D)], or consent of instructor.

ACT 4140 Actuarial Modeling Methods 1 Cr.Hrs. 3
(Formerly 010.414) Estimation and Fitting of Survival Models. May not hold credit with the former 010.448 Topic Survival Models. Prerequisite or Concurrent Requirement: STAT 3800 (or the former STAT 3600 or 005.360 ) (D).

ACT 4150 Pension Mathematics Cr.Hrs. 3
(Formerly 010.415) Actuarial applications for defined benefit

University of Manitoba
pension plans. Actuarial cost methods, funding levels, operation of pension plans from an actuarial perspective. Students may not hold credit with ACT 7550 (or 010.755). May not be offered every year. Prerequisite: ACT 3230 (010.323) (D).

ACT 4240 Actuarial Modeling Methods 2 Cr.Hrs. 3 (Formerly 010.424) Estimation and Fitting of Frequency and Severity Models. May not be offered every year. Prerequisite: ACT 3330 (or 010.333) (D).

ACT 4250 Managing Insurance Operations in the International Business Environment Cr.Hrs. 3 Introduction of the risks inherent in insurance products and assets, as well as the relationships between assets and liabilities across the entire operations of the global insurance enterprise. Prerequisites: FIN 2200 (C+) or consent of instructor.

ACT 4340 Actuarial Modeling Methods 3 Cr.Hrs. 3 (Formerly 010.434) Classical, Bayesian and Buhlmann Credibility Models. The connection between Credibility Theory and Experience Rating. Underlying assumptions for the different methods. Simulation in Estimating and Fitting Actuarial Models. May not hold credit with the former 010.488 Topic Credibility Theory. May not be offered every year. Prerequisite: ACT 4140 (010.424) (C+).

## SECTION 5.14 Business AdministrationEntrepreneurship/Small Business 2000 Level (ENTR). <br> ENTR 2010 Managing the Smaller Business Cr.Hrs. 3

 Small firms dominated the Canadian economic scene and contribute to the nations' economic welfare in a major way but pose different managerial issues and problems for their owner/managers than larger organizations. This course will focus specifically on how to effectively manage and grow the smaller firm. Students may not hold credit for both ENTR 2010 and ENTR 3100. This course is not open to students in the Asper School of Business. This course is not for students who will pursue a major in Entrepreneurship/Small Business. U1 students may take this course.ENTR 2020 Starting a New Business Cr.Hrs. 3
This is a course for students in all Faculties who may wish to start a business of ther own at some time or assess their potential for such an option. It will cover a broad range of topics to increase your understanding of what it takes to succeed in an entrepreneurial career. Students may not hold credit for both ENTR 2020 and ENTR 4100. This course is not open to students in the Asper School of Business. This course is not for students who will pursue a major in Entrepreneurship/Small Business. U1 students may take this course.

## SECTION 5.15 Business AdministrationEntrepreneurship/Small Business 3000 Level (ENTR) <br> ENTR 3100 Small Business Management Cr.Hrs. 3

 (Formerly 118.310) An appreciation of the primary issues that should be considered in starting and managing a smallbusiness within the Canadian context. Students may not hold credit for both ENTR 3100 and ENTR 2010. Prerequisites: ACC 1100 (or 009.110) (D), and MKT 2210 (or 118.221) (D), and GMGT 2060 (GMGT 2080 or 027.208) (D)].

ENTR 3102 Technological Entrepreneurship Cr.Hrs. 3 An overview of the inter-relationship between technology and entrepreneurship. An appreciation of the role of technical entrepreneurship in the economy, how a technology strategy is developed, implemented and defended as well as the societal implications of technological entrepreneurship. Prerequisite: MKT 2210 (or 118.221) (D).

ENTR 3104 Selected Topics in Small
Business/Entrepreneurship Cr.Hrs. 3
A study of selected areas of recent development related to small business/entrepreneurship. Topics may include innovation and creativity, venture financing, opportunity identification and recognition, franchising and entry strategies of new business. Prerequisite: [MKT 2210 (118.221) (D)] and [GMGT 2060 (D) or GMGT 2080 (027.208) (D)].

ENTR 3106 Family Business Management Cr.Hrs. 3 An examination of the unique challenges inherent in the management of a family business. Topics include founder reliquishment, the need for succession planning and firm regeneration, the core actors and their issues, ownership structure and estate planning. Prerequisite: GMGT 2060 (D) or GMGT 2080 (027.208) (D).

## SECTION 5.16 Business AdministrationEntrepreneurship/Small Business 4000 Level (ENTR) <br> ENTR 4100 New Venture Analysis Cr.Hrs. 3

A project oriented course focusing on the identification and evaluation of viable new venture concepts and their associated risks, problems, and opportunities. Students may not hold credit for both ENTR 4100 and ENTR 2020. Prerequisites: MKT 2210 (or 118.221) (D) and ACC 1110 (or 009.111 ) (D) and [GMGT 2060 (D) (or GMGT 2080 (or 027.208) (D)].

## SECTION 5.17 Business AdministrationGeneral Management 1000 Level (GMGT) <br> GMGT 1010 Business and Society Cr.Hrs. 3

The course will provide over arching frameworks to examine the nature, role, and importance of business in society. Key internal operations of business organizations will be discussed (e.g. finance, marketing, operations), but the majority of the course examines the relationships that business firms must balance among key stakeholders in their external environment (i.e. government, owners, customers, communities, suppliers, future generations, etc.). Students will examine various institutional contexts (e.g. economic, political-legal, and socio-cultural) and critically think about relationships between business and society, mindfully considering alternative approaches to management. Special emphasis will be placed on contemporary social issues in business (e.g. sustainable

University of Manitoba
development, corporate social responsibility).

## SECTION 5.18 Business AdministrationGeneral Management 2000 Level (GMGT)

 GMGT 2010 Business Communications Cr.Hrs. 3 The course provides an introduction to theoretical, cultural, and ethical bases of effective communication. Another goal is to develop students' interpersonal, oral, and written communication skills at individual, group, and organizational levels. The students will also develop analytical, problemsolving, rhetorical, and critical thinking abilities required in organizational and business settings. Students are strongly recommended to take GMGT 2010 in their first 30 credit hours in Asper. Not to be held for credit with GMGT 2000.GMGT 2030 Administrative Theory Cr.Hrs. 3 (Formerly 027.203) Examination of the underlying principles concerning internal management of organizations. Emphasis on the study and analysis of various theoretical approaches to management. This course is not open to students registered in the Asper School of Business. Students may not hold credit for both GMGT 2030 (or 027.203) and GMGT 2060 (formerly GMGT 2080 or 027.208 ) or GMGT 2070 (or 027.207).

GMGT 2060 Management and Organizational
Theory Cr.Hrs. 3
Examination of the underlying principles concerning the formation of organizations and their internal management. Emphasis on the study and analysis of vairous theoretical approaches to organization theory and management.
Prerequisite: GMGT 1010 (D). Students may not hold for credit with either GMGT 2080 (027.208) or GMGT 2030 (027.203).

## GMGT 2070 Introduction to Organizational

Behaviour Cr.Hrs. 3
(Formerly 027.207) Examination of the impact of human behaviour on the formal and informal organization. Topics include leadership, work groups, organizational conflict, and communications. Prerequisite: GMGT 1010 (D). Students may not hold credit for both GMGT 2070 (or 27.207) and GMGT 2030 (or 027.203).

GMGT 2120 Business/Government Relations Cr.Hrs. 3 (Formerly 027.212) Analysis of the interaction between business firms and government in the creation, modification, and implementation of government policies that affect business. Study of the ways business can influence government decision-making. Prerequisite: [ECON 1010 (D) and ECON 1020 (D)] or ECON 1200 (or 018.120) (D).

## SECTION 5.19 Business AdministrationGeneral Management 3000 Level (GMGT)

GMGT 3010 Management Decision-Making Cr.Hrs. 3 (Formerly 027.301) The decision-making process and factors that enter into making the decisions, including the objectives and approaches to decision-making, the basic type of managerial decisions, and exemplification of decision in operations. Prerequisites: [GMGT 2060 (GMGT 2080 or 027.208 ) (D)] and GMGT 2070 (or 027.207) (D).

GMGT 3020 Seminar in Administration Cr.Hrs. 3 (Formerly 027.302) Selected problem areas and issues as they relate to administration of complex organizations. Prerequisites: [GMGT 2060 (or GMGT 2080 (027.203) (D) or GMGT 2080 (or 027.208) (D)] and GMGT 2070 (or 027.207) (D), or consent of instructor.

GMGT 3030 Contemporary Social Issues in
Business Cr.Hrs. 3
Study of key issues in the relationship of business organizations and society with emphasis on the impact of management. Prerequisites: [GMGT 2060 or former GMGT 2080 (or 027.208 ) (D)] and GMGT 2070 (or 027.207) (D).

GMGT 3080 Issues in Technological Change Cr.Hrs. 3 (Formerly 027.308) Analysis of the nature of invention and innovation including human, financial, economic, and legal factors. Social implications of innovation. Public policy towards research, invention, and innovation.

GMGT 3160 Managerial Economics Cr.Hrs. 3
(Formerly 027.316) Principles and techniques of managerial economics with applications from business and the public sector. Prerequisite: [ECON 1010 and ECON 1020] or ECON 1200 (or 018.120) (D) or equivalent.

GMGT 3170 Administration of the Public Sector Cr.Hrs. 3 (Formerly 027.317) Application of contemporary concepts of the administrative process: approaches and problems involved in performing managerial functions in public sector organizations with emphasis on socio-political issues.
Prerequisite: GMGT 2060 (or GMGT 2080 or 027.208) (D).
GMGT 3300 Commercial Law Cr.Hrs. 3
(Formerly 027.330 ) General history of law, the organization of courts, the Canadian Constitution, federal and provincial legislative functions. Legal concepts and problems relating to business organization, contracts, principal and agent, negotiable instruments, common torts, and bankruptcy proceedings.

GMGT 3500 Communications: Contextual
Applications Cr.Hrs. 3
(Formerly 027.350) This course is designed to introduce students to basic linguistically specialized areas of typical business and administrative settings. Course offered at St. Boniface College.

## SECTION 5.20 Business AdministrationGeneral Management 4000 Level (GMGT) <br> GMGT 4010 Administrative Policy Cr. Hrs. 3

 (Formerly 027.401) Studies of policies available to business enterprise; with case studies to focus attention on problems involved in formulating and administering policies with interdisciplinary considerations. Take only in final term of program or with consent of department head. Prerequisite: prior to being admitted to GMGT 4010, students must be in Year 4, in the final term prior to graduation in the Asper School and have successfully completed (with a minimum grade of (D) in each course) all 30 credit hours of courses specified in Year 2 of the 4-Year Program. Prerequisite or Concurrent Requirement: all remaining core courses specified in Year 3 and 4 of the 4 -Year Program (with a minimum grade of ( $D$ ) in each course).GMGT 4040 Advanced Organization Theory and Behaviour Cr.Hrs. 3
(Formerly 027.404) An analysis of the human and structural aspects of organizations and how their interrelationship influences organizational performance. Topics covered include leadership, motivation, conflict, and organizational politics. The influence of technology, size, and the external environment on organizational structure is also examined. Prerequisite: [GMGT 2060 (D) or GMGT 2080 (or 027.208) (D)] and GMGT 2070 (or 027.207) (D).

## GMGT 4110 Commercial Law 2 Cr.Hrs. 3

(Formerly 027.411) Aspects of the law relating to business units, including a study of the law relating to proprietorships, partnerships and corporations, and secured transactions. Not taught every year. Prerequisite: GMGT 3300 (or 027.330 ( D ).

GMGT 4140 Evaluation Techniques for
Management Cr.Hrs. 3
(Formerly 027.414) The development of specific techniques for program evaluation, the design of evaluations, the implementation of an evaluation within an ongoing organizational environment, and the problems associated with applying findings. Prerequisite: MIS 2000 (or 009.200) (D).

GMGT 4150 Managing Not-For-Profit
Organizations Cr.Hrs. 3
(Formerly 027.415) A description and analysis of the management perspective that is unique to organizations operating in the not-for-profit sector of the economy. Examination of both the internal and external environment of management in not-for-profit organizations. Prerequisites: [GMGT 2060 (D) or GMGT 2080 (or 027.208) (D)] and GMGT 2070 (or 027.207) (D).

GMGT 4160 Seminar in Business-Government Relations Cr.Hrs. 3
(Formerly 027.416) Description and analysis of significant, current issues in the business-government relationship at an advanced level. Prerequisite: GMGT 1010 (D) or GMGT 2120 (or 027.212) (D).

## GMGT 4210 Seminar in Management and

Capitalism Cr.Hrs. 3
This course provides students with an understanding of the institutions, developments, and debates associated with modern capitalism and their implications for management. Students will explore alternative management perspectives and bi-directional interactions within the context of larger issues. It is designed to ensure that students are introduced to a variety of different perspectives, and that no single perspective is unduly privileged over others. Prerequisite: GMGT 1010 (D) or GMGT 2120 (D).

## SECTION 5.21 Business AdministrationHuman Resources/Industrial Relations 2000 Level (HRIR)

HRIR 2440 Human Resource Management Cr.Hrs. 3 (Formerly 027.244) Introduction to principles and procedures in the management of human resources. Topics include diversity management, conflict resolution, employment, law, planning, job analysis, performance appraisal, staffing,
compensation, union-management relations, and current issues.

## SECTION 5.22 Business AdministrationHuman Resource/Industrial Relations 3000 Level (HRIR)

HRIR 3430 Selected Topics in Industrial Relations Cr.Hrs. 3 (Formerly 027.343) Analysis of specific topics or issues in the employment relationships in an industrial society. Prerequisites: [HRIR 2440 (or 027.244) (D)] and [HRIR 3450 (or 027.345 or 027.341 ) (D)]. or consent of instructor.

HRIR 3450 Labour and Employment Relations Cr.Hrs. 3 (Formerly 027.345 ) This course is to enhance knowledge and understanding of labour and employment relations in Canada and beyond. It addresses various issues and debates about these relations; their history, structure, and functioning; management employment relations practices; the role of labour unions; collective bargaining; and contemporary developments and alternatives. May not be held with the former 027.341.

## SECTION 5.23 Business AdministrationHuman Resources/Industrial Relations 4000 Level (HRIR)

HRIR 4410 Staffing and Management
Development Cr.Hrs. 3
(Formerly 027.441) A review of: employment planning; recruitment and selection; internal placement; out placement; performance appraisal; career development. Training needs analysis, methods and evaluation. Prerequisite: HRIR 2440 (or 027.244) (D).

HRIR 4420 Compensation Cr.Hrs. 3
(Formerly 027.442) A review of the major concepts and design of compensation systems including: strategy, internal equity, external competitiveness, rewarding individual contributions, performance incentives, employee benefits, government regulations, union role in compensation; budgets and administration. Prerequisite: HRIR 2440 (or 027.244 (D).

HRIR 4480 Collective Bargaining and
Administration Cr.Hrs. 3
(Formerly 027.448) Detailed examination of the elements and issues in contract negotiation and administration and of the legal framework imposed on public and private negotiations. Comparison of Canadian industrial relations system with other national systems. Prerequisite: HRIR 3450 (or 027.345 or 027.341 ) (D).

HRIR 4520 Comparative Industrial Relations and Human Resource Management Cr.Hrs. 3
(Formerly 027.452) To provide an international perspective on industrial relations (IR) and human resource management (HRM) through analysis and comparison of IR systems and HRM practice across selected countries and of current developments therein. Also covers theories and issues relevant to these topics. Students are encouraged, but not required, to complete HRIR 3450 (or 027.345 or 027.341 )

University of Manitoba
(D) prior to taking this course.

## SECTION 5.24 Business Administration-

 International Business 2000 Level (INTB)INTB 2200 International Management Cr.Hrs. 3 (Formerly 027.220) Analysis of the practice of management in an international setting. Examines the cultural, political, and economic environments which influence managerial decision-making in an international context.

## SECTION 5.27 Business AdministrationLeadership (LEAD)

LEAD 2010 Learning to Lead Cr.Hrs. 3
This seminar provides students with an introduction to and understanding of effective leadership and its application to a variety of group and organizational contexts. The classes encourage interdisciplinary discussions of theoretical, philosophical, historical, and technical elements of effective leadership. The course allows students to reflect on and develop their own leadership style through interactive lectures, experiential activities, and action learning in groups and organizations in which students want to lead and be led. This seminar is intended for all students that have an interest in leadership theory and effective leadership practices. Students may not hold credit for both LEAD 2010 and ARTS 1160. Prerequisite: Students must have completed 15 credit hours of passed courses to register in LEAD 2010.

## SECTION 5.28 Interdepartmental Courses 2000 Level (IDM)

IDM 2980 Work Term 1 Cr.Hrs. 0
Work assignment in business, industry, or government for students registered in the Asper School of Business Cooperative option. Requires submissions of a written report covering the work completed during the four-month professional assignment. (Pass/Fail).

IDM 2982 Co-op Work Term 1 Cr.Hrs. 1 Work assignment in business, industry, or government for students registered in the Asper School of Business cooperative option. Prerequisite: Written permission from the Asper School of Business Co-operative Education Office. May not be held with IDM 2980.

## SECTION 5.29 Interdepartmental 3000 Level (IDM) <br> IDM 3980 Work Term 2 Cr.Hrs. 0

Work assignment in business, industry, or government for students registered in the Asper School of Business Cooperative option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail).

IDM 3982 Co-op Work Term 2 Cr.Hrs. 1
Work assignment in business, industry, or government for students registered in the Asper School of Business cooperative option. Prerequisite: IDM 2980 with a grade of P or

IDM 2982 with a grade of $C$ and written permission from the Asper School of Business Cooperative Eduction Office. May not be held with IDM 3980.

## SECTION 5.30 Interdepartmental Courses 4000 Level (IDM) <br> IDM 4050 Readings in Management Cr.Hrs. 3

 (Formerly 098.405) Supervised readings in one of the areas of Management. Students are limited to a maximum of six hours of readings and research courses.IDM 4070 Management Research $1 \mathrm{Cr} . \mathrm{Hrs} 3$
(Formerly 098.407) Individually supervised preparation of a detailed research proposal for an advanced study in one of the areas of Management. Students are limited to a maximum of six hours of readings and research courses.

IDM 4080 Management Research 2 Cr.Hrs. 3 (Formerly 098.408) Individually supervised research and preparation of a paper in one of the areas of Management based on the proposal developed in IDM 4070 (or 098.407). Students are limited to a maximum of six hours of readings and research courses.

IDM 4980 Work Term 3 Cr.Hrs. 0
Work assignment in business, industry, or government for students registered in the Asper School of Business Cooperative option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail)

IDM 4982 Co-op Work Term 3 Cr.Hrs. 1
Work assignment in business, industry, or government for students registered in the Asper School of Business cooperative option. Prerequisite: IDM 3980 with a grade of $P$ or IDM 3982 with a grade of C and written permission from the Asper School of Business Co-operative Education Office. Not to be held with IDM 4980.

## SECTION 5.31 Marketing 2000 Level(MKT)

MKT 2210 Fundamentals of Marketing Cr. Hrs. 3 (Formerly 118.221) Analysis of marketing problems, emphasizing various alternatives available for achieving economic efficiency in the distribution process; public policy with respect to marketing.

## SECTION 5.32 Marketing 3000 Level (MKT)

MKT 3220 Marketing Research Cr.Hrs. 3
Study of the planning and implementation of research required to make informed marketing decisions. Prerequisites: MKT 2210 (or 118.221) (D) and STAT 2000 (or 005.200) (D) or consent of instructor.

MKT 3230 Consumer Behaviour Cr.Hrs. 3
(Formerly 118.323) Study of buying behaviour of individuals and organizations as affected by psychological and sociological forces within society. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3240 Selected Topics in Marketing Cr.Hrs. 3
(Formerly 118.324) Analysis of marketing as it relates to

University of Manitoba
specialized fields. Prerequisite: MKT 2210 (or 118.221) (D).
MKT 3250 Marketing Strategy Cr.Hrs. 3
(Formerly 118.325) Integration of sales and marketing strategies, including planning, formulation, and implementation. Emphasis on the role and importance of marketing strategy in overall corporate growth. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3300 International Marketing Cr.Hrs. 3
(Formerly 118.330) A study of international similarities and differences in marketing structures, functions and processes as related to the socio-economic and cultural environment and a consideration of the opportunities and problems of international marketing. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3310 Retail and Channel Management Cr.Hrs. 3 (Formerly 118.331) The study of the functions performed by traditional and e-commerce distributors. Topics include location and competitive analysis, promotion, merchandising, buying, design, selection and historical development. (Formerly 118.331) The study of the functions performed by traditional and e-commerce distributors. Topics include location and competitive analysis, promotion, merchandising, buying, design, selection and historical development. May not be held with the former 118.321. Prerequisite: MKT 2210 (or 118.221) (D).
MKT 3340 Services Marketing Cr.Hrs. 3
(Formerly 118.334) An examination of the differences in the marketing of goods versus services. Topics covered include service process design and management, problem identification and resolution, positioning issues, the importance of human resources, and promotional issues. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3390 Integrated Marketing Communications Cr.Hrs. 3 (Formerly 118.339) The process of using promotional tools in a unified way so that a synergistic communications is created. The course examines the roles of advertising, sales promotion, direct marketing, and the internet within this broader framework. May not hold with the former 118.329. Prerequisite: MKT 2210 (or 118.221) (D).

## SECTION 5.33 Marketing 4000 Level (MKT)

 MKT 4210 Marketing Management Cr.Hrs. 3Study of location and nature of markets, techniques by which firms attempt to affect the demand for their goods and services and the significance of these effects on business and society. Can be taken only in final year of program. Prerequisites: MKT 3220 (118.322) (D) or MKT 3230 (118.323) (D), and one other 3000 or 4000 level Marketing course (D), and ACC 1110 (009.111). Pre- or co-requisite: either MKT 3220 (118.322) (D) or MKT 3230 (118.323) (D), but not both.

MKT 4270 Sales Management Cr.Hrs. 3
(Formerly 118.427) The study of the management of the personal selling area including an examination of the selling function, the sales manager, and sales management.
Prerequisite: MKT 2210 (or 118.221) (D).

## SECTION 5.34 Supply Chain ManagementManagement Science 2000 Level (MSCI)

MSCI 2150 Introduction to Management Sciences Cr.Hrs. 3 An introduction to management science techniques and models. Topics include linear programming, distribution problems, deicison theory and queuing models. May not hold with the former 164. 215 or 027.215 or ABIZ 2520. Prerequisites: [MATH 1520 (or 136.152) (C) or MATH 1500 (or 136.150 ) (C) or equivalent] and [STAT 1000 (005.100) (C) or equivalent]

## SECTION 5.35 Supply Chain ManagementManagement Science $\mathbf{3 0 0 0}$ Level (MSCI) <br> MSCI 3400 Intermediate Management Science Cr.Hrs. 3

 (Formerly 164.340) Operations research models used in the analysis of management problems. Topics include network analysis, deterministic inventory models, dynamic programming and game theory. May not hold with the former 027.340. Prerequisite: MSCI 2150 (or 164.215) (D) or consent of instructor.
## SECTION 5.36 Supply Chain Management Management Science 4000 Level (MSCI)

MSCI 4200 Topics in Managment Science Cr.Hrs. 3 (Formerly 164.420) Topics of current interest in management science. May not hold with former 027.420. Prerequisite: MSCI 2150 (or 164.215) (D). Not taught every year.

MSCI 4220 Management Science Models in Business and Industry Cr.Hrs. 3
(Formerly 164.422) An applied course providing practical experience in modeling and solving business and industrial problems. Emphasis to be placed upon analysis, formulation, solution and implementation. Not taught every year. May not hold with former 027.422. Prerequisite or Concurrent Requirement: one of MSCI 3400 (or 164.340 or 027.340 (D) or MSCI 4200 (or 164.420 or 027.420 ) (D) or MSCI 4230 (or 164.423 or 027.423 ) (D).

## SECTION 5.38 Supply Chain ManagementOperations 3000 Level (OPM)

OPM 3630 Simulation Models for Operations
Management Cr.Hrs. 3
(Formerly 164.363) Currently not offered. May not hold with former 027.363.

OPM 3640 Project Planning and Control Cr.Hrs. 3 (Formerly 164.364) Currently not offered. May not hold with former 027.364.

OPM 3650 Management of Quality and Reliability Cr.Hrs. 3 (Formerly 164.365) This course offers a practical introduction to modern quality assurance and reliability management concepts, methods and practices. It builds upon the relevant subject matter in basic courses in production management and prepares for positions in the field of quality and reliability management. May not hold with
former 027.365. Prerequisite: SCM 2160 [or the former OPM 2600 (or 164.260) (D)] and STAT 1000 (C).

OPM 3660 Operations Management in Service
Organizations Cr.Hrs. 3
(Formerly 164.366) This course explores the applications of operations management concepts to the management of service operations. The characteristics of a service operation, while generally comparable to manufacturing a product, often place a unique demand opon the service manager. These demands, along with the analysis of actual company situations through case study applications, are emphasized. May not hold with former 027.366. Prerequisite: SCM 2160 [or former OPM 2600 (or 164.260)] (D) and STAT 1000 (C).

OPM 3670 POM Project in Industry Cr.Hrs. 3 An applied course, designed to bridge the gap between theoretical concepts developed in previous POM courses and current industrial practices by means of an industrial project. May not hold with former 027.367. Prerequisites: [SCM 2160 or former OPM 2600 (or 164.260 or 027.260) (D)] and STAT 1000 (C) or consent of instructor.

## SECTION 5.39 Supply Chain ManagementOperations 4000 Level (OPM) <br> OPM 4620 Production Management Seminar Cr.Hrs. 3

 (Formerly 164.462) Problems, development, and application of analytical methods in production and operations management with emphasis on planning and control. May not hold with former 027.462. Prerequisite: MSCI 2150 (or 164.215 ) (D) and SCM 2160 or OPM 2600 (or 164.260) (D). May not hold with former 027.462.
## SECTION 5.40 Supply Chain ManagementSupply Chain Management 2000 Level (SCM)

SCM 2160 Supply Chain and Operations
Management Cr.Hrs. 3
Study of supply chain management (SCM) and operations management. Positions operations management as a critical area of study within SCM. Focuses on process approach and system design. May not hold credit for both SCM 2160 and the former OPM 2600. Prerequisites: None.

SCM 2210 Transportation Principles Cr.Hrs. 3 (Formerly 164.221) Demand forecasting, cost analysis, regulation of carriers, role of transport in economic development, project appraisal and transport planning. Also offered as ABIZ 2210 by the Department of Agribusiness and Agricultural Economics. May not be held with ABIZ 2210 (or 061.221). Prerequisite: [ECON 1010 and ECON 1020 (C)] or former ECON 1200 (or 018.120) (D).

SCM 2220 Selected Topics in Logistics and
Transportation Cr.Hrs. 3
(Formerly 164.222) This course provides coverage on a number of critical topics in Supply Chain Logistics and Transportation. Areas of emphasis are based on current issues confronting managers and regulators/policy makers such as global supply chain logistics and transportation
policy.
SCM 2230 Introduction to Supply Chain
Management Cr.Hrs. 3
(Formerly 164.223) An examination of the management activities that are necessary to ensure an efficient flow of materials, funds, and information among the various organizations in supply chains, from the acquisition of raw materials to the deleivery of the finished product to the end user.

SCM 2240 Purchasing and Supply Management Cr.Hrs. 3 Purchasing and supply management is an increasingly important element of corporate strategy as global supply chains become longer and more complex. In this course, students will learn about a major paradigm shift in purchasing, from a clerical activity to a strategic corporate function. The course covers strategic supply management, inter-organizational relationships, product and service specifications, price and cost analysis, negotiation, quality management, supply chain information technology, and other important purchasing topics, from a supply chain management perspective. Students may not hold credit for both SCM 2240 and SCM 2220 Topic: Purchasing Management.

## SECTION 5.41 Supply Chain ManagementSupply Chain Management 3000 Level (SCM)

SCM 3230 Global Supply Chains Cr.Hrs. 3
(Formerly 164.323) The course provides a global orientation to supply chain management, with a particular emphasis on the global linkages between organizations in international supply chains. Supply chain management practices in selected countries are also examined. Prerequisite: SCM 2230 (or 164.223) (D) or SCM 3360 (or 164.336 or 118.336) (D); or consent of instructor.

SCM 3360 Supply Chain Logistics Cr.Hrs. 3
(Formerly 164.336) The course provides an international/global orientation to logistics and supply chain management. May not be held with the former 118.336 or 118.326.Prerequisite: MKT 2210 (or 118.221) (D).

## SECTION 5.42 Supply Chain Management-Supply Chain Management 4000 Level (SCM)

SCM 4250 Beyond Business: Advanced Issues in Supply Chain Management Cr.Hrs. 3
The material covered in this course moves beyond a business perspective and analysizes the relationship between supply chain management (SCM) and other parts of society as a whole. It examines the issues that arise as supply chain management interests with government and society. May not be held with the former SCM 4240 (or 164.424). Prerequisite: SCM 2230 (D); or the former 164.230 (D); or consent of instructor.

## SECTION 1: Degree Programs Offered

1.1 Programs,

| Program/Degree | Years to Complete | Total Credit Hours |
| :---: | :---: | :---: |
| Master of Occupational Therapy (M.O.T.) | Regular Program: 2 years* | 107 |
|  | Accelerated Program: 1 year** | 12 |
| Master of Physical Therapy (M.P.T.) | 2 years* | 102 |
| Bachelor of Medical Rehabilitation (Physical Therapy) (B.M.R.(P.T.) ${ }^{\star * *}$ | 4 years (University 1 plus 3 years) | 140 |
| Bachelor of Medical Rehabilitation (Respiratory Therapy) (B.M.R.(R.T.) | Regular Program: <br> 4 years (University 1 plus 3 years) | 116 |
|  | Degree Completion Program: 5 years | 30 |

* Requires prior completion of a 3 or 4-year undergraduate degree.
** Requires prior completion of a Bachelor of Medical Rehabilitation (Occupational Therapy) degree or equivalent.
*** The B.M.R. (P.T.) program is being phased out. The last year (Year 3) of the program will be in 2012-2013.
1.2 Professional Designations,

Master of Occupational Therapy (M.O.T.)
profession, by law. To be eligible for employment in
Manitoba, graduates must register with the College of

Occupational Therapists of Manitoba (COTM) and must successfully complete the Canadian Association of Occupational Therapists (CAOT) National Certification Examination. Regulations are similar in most other Canadian provinces, in that students must be registered with the regulatory body in that jurisdiction and must pass the CAOT National Certification Exam. Writing of the national exam is scheduled twice a year. The University occupational therapy department provides a list of potential MOT graduates to CAOT to verify their eligibility to write the National Certification Exam. Newly-educated occupational therapists are eligible for registration with COTM (or other provincial regulatory body) and for employment prior to convocation and/or writing the national exam, provided they have successfully completed all academic and fieldwork requirements for the MOT program, and have provided the appropriate personnel at the regulatory body with a letter of verification from the Head of the Department of Occupational Therapy (students must request these letters). For information on the registration process in Manitoba, you can visit the COTM web site at www.cotm.ca or contact them by calling 957-1214. Other provinces have similar provisions to allow some form of registration and thus employment prior to convocation. A listing of provincial regulatory organizations is available from COTM (957-1214) and posted at SMR, or can be found at
www.caot.ca/default.asp?changeID=63\&pageID=50.

The Occupational Therapy program maintains accreditation through the Canadian Association of Occupational Therapists and a 7-year accreditation was received in 2012.

## Physical Therapy

Physical therapy is a regulated health profession in Canada and as such "provincial and territorial legislation stipulates that no persons other than registrants of a provincial or territorial regulator may use the titles "physical therapist", "physiotherapist" and the abbreviation "PT". The intent of the legislation is to protect the public by ensuring appropriate and authorized use of title. The granting of title is a privilege awarded to members of a regulatory jurisdiction who have demonstrated that they possess the required educational qualifications, knowledge, skills and attributes to practice their profession and are accountable for the delivery of professional services. Title provides members of the public with important information about the titleholder."

It is recommended that registered physical therapists use the title "PT" before their academic credential. "What differentiates a physical therapist as a regulated health professional is the use of title - not the fact that you have an academic degree." Excerpted from
http://manitobaphysio.com/documents/officialmarksguideline sdec2009.pdf

To be eligible for employment in Manitoba, graduates must register with the College of Physiotherapists of Manitoba (CPM) and must successfully complete the written component of the Canadian Alliance of Physiotherapy Regulators (The Alliance) Physiotherapy Competency Examination (PCE). To be eligible to attempt the written component of the PCE, student physical therapists must be in their last year and last term of study. There are multiple
dates available throughout the year for attempting the written component of the PCE in Winnipeg. Please refer to The Alliance website:
http://www.alliancept.org/exams candidates registering.php and click on the link for the Exam Handbook for details.

Graduands of the physical therapy program (that is, those who have completed all academic requirements for graduation but have not yet convocated) will be allowed to register to practice under the mentorship of a graduate physiotherapist prior to completion of the PCE and prior to convocation from the university under the following procedure:

1. Following successful completion of all academic and clinical coursework, the Department Head, Physical Therapy will notify the College Registrar that the student has completed all of the academic requirements for graduation.
2. The new graduate will be eligible to register with the regulatory college on the Examination Candidate Register to practice under mentorship once the new graduate has:
a) successfully completed Part 1 (The Qualifying Examination) of the PCE;
b) provided evidence of professional liability insurance coverage;
c) completed the registration form and paid the registration fees;
d) provided the Registrar with the name of a currently registered physiotherapist who has agreed to serve as the applicant's mentor.
3. The graduate is expected to complete the PCE at the next available session. Once the new graduate has successfully completed Part 2 of the PCE and has provided the Registrar with a copy of his/her Baccalaureate degree, the Registrar will place the graduate's name on the Active Practice Register and the graduate will be entitled to practice independently.

For information on the registration process in Manitoba, you can visit the CPM web site at www.manitobaphysio.com or contact the office at (204) 287-8502. Other provinces have similar provisions for registration. A listing of provincial regulatory organizations is available from The Alliance website at
http://www.alliancept.org/about us.php3GOVMEMBERS

The Department of Physical Therapy, University of Manitoba is seeking accreditation by Physiotherapy Education Accreditation Canada (PEAC) for the Master of Physical Therapy program. The Department has submitted a letter of intent to participate in the pre-accreditation process. The pre-accreditation process denotes an affiliation with PEAC and indicates that the education program is considering accreditation standards in its planning stages. Submission of the letter of intent and participation in the pre-accreditation
process does not assure that the program will be granted accreditation status when the final program is implemented.

The Bachelor of Medical Rehabilitation (Physical Therapy) program at the University of Manitoba was awarded ongoing accreditation status until 2015. Details about the accreditation status and report are available here (PDF).

Bachelor of Medical Rehabilitation (Respiratory Therapy) (B.M.R.(R.T.)

Respiratory Therapists are able to work throughout Canada after graduation from a Council on Accreditation in Respiratory Therapy accredited (CoARTE) educational program and successful completion of the credentialing examination produced by the Canadian Board for Respiratory Care (CBRC). Only the Canadian Society of Respiratory Therapists (CSRT) has the right to confer the title of Registered Respiratory Therapist (RRT) by virtue of a candidate's successful completion of the national certification examinations. The examination produced by the CBRC is recognized both nationally and internationally. In order to write the CBRC examination, applicants must have graduated from a respiratory therapy educational program in Canada, which has been accredited by CoARTE. Writing of the national exam is scheduled twice a year. The University respiratory therapy department provides a list of potential program graduates to the CBRC in order to verify eligibility to write the national certification exam. Further information regarding the national certification exam can be found at http://www.csrt.com/en/education/index.asp.

Students admitted into the program of studies in respiratory therapy should note carefully that while the University of Manitoba, School of Medical Rehabilitation may admit students to its course of studies, the right to practice as a respiratory therapist is granted only through the appropriate authority of the province concerned, through a process of licensure. To be eligible for employment in Manitoba, graduates must register with the Manitoba Association of Registered Respiratory Therapists (MARRT). Regulations are similar in most other provinces in that the students must pass the CBRC examination and be registered with the regulatory body in that jurisdiction. Further information regarding registration in Manitoba can be found at http://www.marrt.org/index.jsp?p=membership. Students are highly encouraged to become student members of both provincial and national professional associations.

The Respiratory Therapy program maintains accreditation through the Council on Accreditation of Respiratory Therapy Education (CoARTE). Accreditation was most recently awarded in 2007 for a 6 -year term.

## SECTION 2: Admission Requirements

The following is a summary of the admission requirements. Equivalent academic courses completed at the University of Manitoba or recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in applicant information packages that are available from the

## School of Medical Rehabilitation website

(http://umanitoba.ca/medrehab). R.T. info can also be obtained from the Admissions Office, Enrolment Services, 424 University Centre. This information is also posted on the university's website.

### 2.1 Course Requirements: Occupational Therapy , Regular Program

Completion of a previous undergraduate degree, minimum $B$ average in last 60 credit hours of study, completion of all program prerequisite courses or approved alternates with no grade in prerequisites below a B. Prerequisite courses include all of the courses listed below or equivalents* approved by the M.O.T. Admissions Committee:

Basic Statistical Analysis

Anatomy of the Human Body

Physiology of the Human Body
Minimum 3 credit hours in Psychology

Minimum 3 credit hours in Social Sciences
*A list of prerequisite courses and equivalents is available at www.umanitoba.ca/medrehab/ot/ot prerequisite.html

## Accelerated Option

Completion of a B.M.R.(O.T.) degree or equivalent, minimum $B$ average in the last 60 credit hours of the degree, completion of an additional 42 credit hours of non-O.T. degree credits, and evidence of having passed the Canadian Association of Occupational Therapists (C.A.O.T.) certification examination and/or eligibility for registration in Manitoba by the College of Occupational Therapists of Manitoba (C.O.T.M.).

### 2.2 Course Requirements: Physical Therapy,

1. An accredited bachelor's degree in any area of study. Successful completion of at least 24 credit hours in one regular fall/winter session (from September to April)
2. A minimum grade point average of 3.25 in the last 60 credit hours of university-level courses
3. Equivalent IB and/or AP courses will be accepted in lieu of prerequisite courses
4. Successful completion of the Multiple Mini-Interview; interview dates will be published yearly.
5. A minimum grade of a 3.0 or a " $B$ " in the following prerequisite courses: *

Human Anatomy (3 credit hours)
Human Physiology (3 credit hours)
Introductory Biology with genetics content (3 credit hours)
Introductory Psychology (6 credit hours)
Childhood Psychology (3 credit hours)
Developmental Psychology Adolescence to Old Age (3 credit hours)

Introductory Statistics (3 credit hours)
English Literature (6 credit hours)
*All prerequisite courses need to be completed by the fall term in the year prior to entry.

Admission criteria for the M.P.T. program can be found at: http://www.umanitoba.ca/faculties/medicine/units/medrehab/ pt/pt mpt eligibility.html

### 2.3 Course Requirements: Respiratory Therapy , Regular Program

BIOL 1020 and BIOL 1030 Biology 1 \& 2, or both BIOL 1000 and BIOL 1010 Biology

SOC 1200 Introduction to Sociology, or PSYC 1200 Introduction to Psychology

STAT 1000 Introductory Statistics

3 credit hour course to satisfy the written English requirement

6 credit hours of electives to total 24 credit hours in University 1

## Other requirements: Respiratory Therapy

Minimum GPA required for consideration: 3.0. Minimum GPA required in core courses: 3.0.

The written English and mathematics requirement must be satisfied in University 1. For students admitted prior to 2011, the mathematics requirement was satisfied after admission to Respiratory Therapy by required course REHB 2460.

While Respiratory Therapy does not require specific high school courses, Biology 40S and either Physics 40S or Chemistry 40 S are required in order to take Biology 1 : Principles and Themes (BIOL 1020), which is a required
course option for admission. English 40S and Math 40S are highly recommended.

Selection Criteria: 67\% Grades and 33\% Interview.

## Degree Completion Program

In addition to the regular degree program in Respiratory Therapy, the School offers a degree completion program. Generally, individuals who have attained a diploma in respiratory therapy from an accredited program of studies in Canada, who are actively involved in the practice of the profession, and who demonstrate an interest in continuing their studies in this field, will be accepted. The degree completion program requires a minimum of 30 credit hours of study to be determined by the student in consultation with the department head and/or faculty advisor.

## SECTION 3: Faculty Academic Regulations 3.1 General, Occupational Therapy

Program requirements are those of the Faculty of Graduate Studies. M.O.T. Program Supplemental Regulations are available on the School of Medical Rehabilitation website: www.umanitoba.ca/medrehab/media/supplementary regulati ons.pdf

## Physical Therapy (M.P.T.)

Program requirements are those of the Faculty of Graduate Studies, found in the Graduate Studies Regulations section of this Calendar. M.P.T. Program Supplemental Regulations are available on the Physical Therapy, School of Medical Rehabilitation website:
http://umanitoba.ca/faculties/graduate studies/media/Physic al Therapy 2011 01.pdf

## Physical Therapy and Respiratory Therapy

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the School of Medical Rehabilitation has regulations and requirements, published below, that apply specifically to its' students.

Policies with regard to admissions (R.T. only), selection (R.T. only), academic progression of the student, compulsory attendance, examination procedures, supplemental examination procedures, and withdrawal dates are in force and are on file in the general office of the School of Medical Rehabilitation.

### 3.2 Health Requirements,

Students in all departments are required to provide a health history and immunization record. A student will not be permitted to attend fieldwork/clinical placements until all
health, immunization, CPR and mask fit requirements are current.

## Immunizations

Standard Health Record Form Packages are sent to new students in Occupational Therapy, Physical Therapy and Respiratory Therapy upon acceptance into the programs. New students in Occupational Therapy, Physical Therapy and Respiratory Therapy are required to return forms to their respective departments by the dates published yearly in the Health Record Form Packages. Returning students in all three programs are required annually to review and update immunizations as necessary.

## Cardiopulmonary Resuscitation Certification

All students of the Department of Occupational Therapy are required to obtain certification in cardiopulmonary resuscitation. Certification must be at the Basic Rescuer Level. New students in the program must provide proof of certification within the first 2 weeks of classes of the academic year in which they commence classes. This certification must have an issue date on or after July 1 of the year the student commences classes in the program. Second year students must provide proof of re-certification by October 1 of their second year in the program. This certification must have an issue date during or after the last week of August of the current year. Certification must remain current for all fieldwork experiences.

All students (both new and returning) in the Department of Physical Therapy are required to obtain certification in cardiopulmonary resuscitation annually. Certification must be at the Basic Rescuer Level. Proof of certification must be provided by October 1 and must not have an issue date prior to the last week of August of the current year. This will ensure that the certification remains current until the end of the clinical placement period for each year of the program.

All students (both new and returning) in the Department of Respiratory Therapy are required to obtain Heart and Stroke Foundation of Canada certification in cardiopulmonary resuscitation annually. Certification must be at the Basic Life Support (BLS) for Healthcare Providers. Students in year 1 and 2 of the program will be required to provide proof of certification by September 1. Students in year 3 of the program will be required to provide proof of certification before the first day of their fieldwork placement. For students in all years of the program, proof of certification must not have an issue date prior to the last week in June of the current year. This will ensure that the certification remains current until the end of the clinical education period for each year in the program.

## Mask Fit Certification

Clinical/fieldwork education sites require students to maintain mask fit certification. Information on acquiring this certification is provided to new students with the Health

Record Form Packages. All students are required to maintain mask fit certification throughout the program.

### 3.3 Dean's Honour List, <br> Undergraduate Students (Physical Therapy and Respiratory Therapy)

Students carrying a full course load, with a sessional Grade Point Average of 3.7 or higher and have not done resit or supplemental exams, are placed on the Dean's Honour List.

### 3.4 Attendance,

Regular attendance is expected of all students in all courses. Prior permission is required for any anticipated absences. Students absent from class due to illness may be required to present a certificate from a physician. Unexcused absence from an examination may result in a grade of zero for that examination. Make-up examinations may be allowed under special circumstances.

### 3.5 Criminal Record Check and Child Abuse Registry Check,

Students are advised that clinical/fieldwork education sites require that students complete a Criminal Record Check and a Child Abuse Registry Check.

New students in the Master of Occupational Therapy program must provide results of a Child Abuse Registry Check and a Criminal Record Check (including a vulnerable sector screen) within the first 2 weeks of classes of the academic year in which they commence classes. Both checks must have an issue date after July 1 of the year the student commences classes in the program. Second year students must provide updated results by October 1 of their second year in the program. Both checks must have an issue date during or after the last week of August of the current year.

All physical therapy students are required to obtain a formal Criminal Record Check and a formal Child Abuse Registry Check by October 1 of each year of the program. Both documents must not have an issue date prior to the last week of August of the current year, to ensure that they remain current until the end of the clinical placement period for each year of the program. Additionally, new students are required to complete a criminal record self-declaration form at the time of application to the program.

All respiratory therapy students are required to obtain a formal Criminal Record Check and a formal Child Abuse Registry Check by the first day of classes of each year of the program. These records must have been issued within the ninety (90) days previous to that date to ensure that they remain current until the end of the clinical education period for each year of the program.

Students may not obtain any grade lower than "C" in all required courses.

### 4.2 Clinical/Fieldwork Education, Occupational Therapy

See University of Manitoba Graduate Calendar for descriptions of courses in the Master of Occupational Therapy (M.O.T.) program.

## Physical Therapy (M.P.T.)

See University of Manitoba Graduate Calendar for descriptions of courses in the Master of Physical Therapy (M.P.T.) program.

## Physical Therapy (B.M.R.(P.T.)

1,200 full-time hours of clinical/practical experience are required. Clinical placements are conducted from January to March for the first year of the program, and from March to August for the second and third years of the program. Placements occur primarily in locations in Manitoba, Saskatchewan, northwest Ontario and Kivalliq Region of Nunavut. Students are advised to take into account the financial implications of the summer placement requirements of the B.M.R.(P.T.) program. All students should be prepared to be placed outside of Winnipeg for a minimum of one placement.

## Respiratory Therapy

1,560 full-time hours of clinical/fieldwork experience are required. 160 hours of clinical education time is organized into one-week blocks that occur at four intervals throughout years one and two of the B.M.R.(R.T.) program. The
remaining 1,400 hours of clinical education is conducted throughout year three. All placements occur in Manitoba, with the majority of these occurring within greater Winnipeg.

## SECTION 5: -Occupational Therapy <br> OT 4130 Re-Entry Fieldwork Cr.Hrs. 8

(Formerly 168.413) Self-directed period of fieldwork preparation followed by a seven-week fieldwork education experience under the supervision of a licensed occupational therapist. Course evaluated on a pass/fail basis.
Prerequisites: an earned degree in occupational therapy, permission of Head of Department of Occupational Therapy.

## SECTION 5: -Physical Therapy

PT 1700 Psychosocial Issues Cr.Hrs. 6
(Formerly 167.170) A general course to provide an overview of psychosocial behaviour and the implication for physiotherapy practice. 75 hours.

PT 1730 Physical Therapy Management Cr.Hrs. 10 (Formerly 167.173) A theory and practical course on applying physical therapy techniques to patients with cardio and respiratory disorders. 166 hours.

PT 1740 Cardiorespiratory Clinical Education Cr.Hrs. 7 (Formerly 167.174) Consists of an introductory period of clinical practice and specific practice related to the management of cardiorespiratory conditions. Course evaluated on a pass/fail basis. 245 hours.

PT 1750 Rehabilitation Exercise 1 Cr.Hrs. 6
(Formerly 167.175) Consists of lecture, tutorials, and

University of Manitoba
practical sessions focused on topics of exercise physiology, fitness testing and training and rehabilitation exercise skills related to the healthy adult and selected patient populations. 105 hours.

PT 1910 Pathology and Clinical Manifestations Cr.Hrs. 5 (Formerly 167.191) A theory course including the basic principles of pathology and microbiology; the natural history, pathology, clinical manifestations, management and prognosis of patients with disorders of the cardiovascular and respiratory systems. Corequisite: REHB 1200 (or 068.120). 83 hours.

PT 2720 Electro-Physical Agents in Physical Therapy Management Cr.Hrs. 3
(Formerly 167.272) Selection and application of electrophysical agents in physical therapy. 45 hours.

PT 2750 Rehabilitation Exercise 2 Cr.Hrs. 2 (Formerly 167.275) A lecture and lab based course which focuses on the development of comprehensive rehabilitation, health, and fitness exercise programs for normal subjects, clients with specific conditions/disabilities, and athletes. 34 hours.

PT 2760 Orthopedic Assessment and Management
1 Cr.Hrs. 6
(Formerly 167.276) Integrated approach to the orthopedic assessment and management of upper limb, lower limb, and spinal disorders. 113 hours.

## PT 2770 Orthopedic Assessment and Management

## 2 Cr.Hrs. 6

(Formerly 167.277) Integrated approach to the physiotherapy assessment and management of upper limb, lower limb, and spinal disorders. Successful completion of PT 2760 (or 167.276) and PT 2770 (or 167.277) equivalent to E2/V2 level of professional classification. 112 hours.

PT 2780 Musculoskeletal Clinical Education Cr.Hrs. 10 (Formerly 167.278) Consists of a period of clinical practice related to the management of musculoskeletal conditions. Course evaluated on a pass/fail basis. 375 hours.

PT 2790 Physical Therapy Management of Musculoskeletal Disorders Cr.Hrs. 8
(Formerly 167.279) A theory and practical course on physical therapy management of patients with specific disorders. 150 hours.

PT 2890 Rehabilitation Biomechanics Cr.Hrs. 3 (Formerly 167.289) Theory and practical application of biomechanics of human movement in relation to rehabilitation. Prerequisites: REHB 1480 (or 068.148), REHB 1490 (or 068.149 ) and REHB 1500 (or 068.150 ), or equivalent. 40 hours.

PT 3730 Advanced Musculoskeletal Topics Cr.Hrs. 3 (Formerly 167.373) A theory, practical and tutorial-based course designed to provide the opportunity for problemsolving through the integration of relevant information, in the areas of orthopedic and sports physiotherapy. 61 hours.

PT 3740 Integrated Tutorials Cr.Hrs. 3
(Formerly 167.374) A theory, practical and tutorial-based course designed to provide the opportunity for problemsolving through the integration of relevant information, in the
physiotherapy management of geriatric, women's health, and multi-system conditions. 41 hours.

PT 3750 Physical Therapy Neurological Interventions Across the Lifespan 1 Cr.Hrs. 6
(Formerly 167.375) A theory and practical course on the basic principles of the application of techniques used in the Physical Therapy management of clients with neurological conditions, with a focus on neurological assessment and the treatment for spinal cord injured clients and clients with certain neurological conditions. 108 hours.

PT 3760 Physical Therapy Neurological Interventions Across the Lifespan 2 Cr.Hrs. 7
(Formerly 167.376) A theory and practical course on the basic principles of the application of techniques used in the Physical Therapy management of clients with neurological conditions, with a focus on neurological treatment. 115 hours.

PT 3880 Clinical Education in Neurological
Disorders Cr.Hrs. 8
(Formerly 167.388 ) Consists of a period of clinical practice related to the management of neurological conditions. Course evaluated on a pass/fail basis. 300 hours.

PT 3920 Summer Internship Cr.Hrs. 8
(Formerly 167.392) An eight-week period of clinical/practical experience under the direction and supervision of registered physiotherapists. Course evaluated on a pass/fail basis. 300 hours.

## SECTION 5: -Medical Rehabilitation

REHB 1200 Basic Clinical Sciences Cr.Hrs. 3 (Formerly 068.120) A lecture and tutorial course covering basic physiology related to membrane, muscle, pain and the cardiovascular, respiratory, endocrine, and immune systems. 50 hours.

REHB 1480 Human Anatomy - Systems Cr.Hrs. 3
(Formerly 068.148 ) Lecture and laboratory study of the microscopic and macroscopic structure of the major systems of the human body. Living anatomy of the cardiorespiratory system. 90 hours.

REHB 2410 Pathology and Clinical Manifestations Cr.Hrs. 4 (Formerly 068.241) A theory course including the basic principles of pathology and clinical manifestations, management and prognosis of patients with musculoskeletal disorders. Prerequisite: PT 1910 (or 167.191). 60 hours.

REHB 2450 Research Methodology for Medical
Rehabilitation Cr.Hrs. 3
(Formerly 068.245) A theory and practical course designed to provide a basic understanding of research principles and their application in Medical Rehabilitation. 45 hours.

REHB 2460 Statistics Cr.Hrs. 3
(Formerly 068.246) A theory and practical course designed to provide a basic understanding of statistics with application to Medical Rehabilitation. 45 hours.

REHB 3410 Pathology and Clinical Manifestations of Neurological Conditions Cr.Hrs. 3
(Formerly 068.341) Theoretical study of neurological
pathology and clinical manifestations of the basic principles of medical management of persons with neurological disorders. Prerequisite: REHB 2410 (or 068.241). 37 hours.

REHB 3460 Introduction to Health Care Administration and Management Cr.Hrs. 3
(Formerly 068.346) An introduction to professional and administrative issues of current concern to respiratory and physical therapists. Topics to be covered in lecture and seminar format are health care systems, professional ethics, departmental administration, principles of supervision, and medical and legal responsibilities. 39 hours.

REHB 3930 Neuroanatomy Cr.Hrs. 3
(Formerly 068.393) The study of neuroanatomy and neurophysiology of the human body. 47 hours.

REHB 3940 Neurosciences Cr.Hrs. 3
(Formerly 068.394) The study of neuroanatomy and neurophysiology of the human body. 45 hours.

## SECTION 5: -Respiratory Therapy

RESP 1270 Respiratory Anatomy and Physiology Cr.Hrs. 3 (Formerly 169.127) Principles of pulmonary mechanics, ventilation, diffusion, perfusion, ventilation-perfusion relationships, gas transport, control of ventilation, and acidbase physiology. 60 hours.

RESP 1280 Medical Microbiology and Disease
Transmission Cr.Hrs. 2
(Formerly 169.128) Introduction to Medical Microbiology with emphasis on common pathogens, disease transmission, principles of asepsis, isolation sterilization and disinfection procedures. 32 hours.

RESP 1290 Cardiopulmonary Pharmacology Cr.Hrs. 2 (Formerly 169.129) Pharmacology principles, phases of drug events, factors modifying drug effect, drug preparation, individual pharmacologic agents including: ANS drugs, CNS drugs, cardiac medications, respiratory medications, antibiotics. 36 hours.

RESP 1320 Applied Sciences for Respiratory
Therapy Cr.Hrs. 3
(Formerly 169.132) Gas laws, unique behaviour of specialty gases, fluid dynamics, fundamental principles of electricity, electronics and electrical safety, concepts of basic and advanced chemistry not treated in REHB 1200 (or 068.120). 53 hours.

RESP 1330 Technical Aspects of Respiratory
Therapy Cr.Hrs. 3
(Formerly 169.133) Medical gas and supply systems, flowmetering devices, regulators, medical gas outlets, vacuum systems, regulatory authorities on the supply, production and distribution of medical gases. 45 hours.

RESP 1360 Treatment Administration in Respiratory Care Cr.Hrs. 3
(Formerly 169.136) Administration of medical gases, humidity and aerosol therapy, environmental therapy, positive pressure breathing devices, respiratory exercises, incentive spirometries and bedside spirometry. 50 hours.

RESP 1370 Ventilatory Support Principles Cr.Hrs. 6 (Formerly 169.137) Physical principles of continuous ventilatory support including: physics of ventilator operation and physiological aspects of ventilatory support. Provides a framework for RESP 2310 (or 169.231) and RESP 2320 (or 169.232). 120 hours.

RESP 1380 Basic Fieldwork 1 Cr.Hrs. 4
A seminar based preparatory period, followed by 80 hours of clinical fieldwork experiences in respiratory therapy, delivered with concurrent tutorial and laboratory based learning opportunities. The field work portion will be provided under the supervision of registered respiratory therapists at one or more approved clinical sites. Course is evaluated on a pass/fail basis.

RESP 2300 Respiratory Clinical Assessment Cr.Hrs. 6 (Formerly 169.230) The correlation of patho-physiological mechanisms with the clinical manifestations of the common respiratory diseases and how rational management evolves from this understanding. 90 hours.

## RESP 2310 Clinical Aspects of Ventilatory

Management Cr.Hrs. 3
(Formerly 169.231) Lecture, seminar and laboratory simulation on adult and pediatric ventilatory management. Estimation of ventilatory requirements, ventilator selection, weaning, ventilatory adjuncts, transport, and long term ventilatory support. 45 hours.

RESP 2320 Ventilatory Support Instrumentation Cr.Hrs. 6 (Formerly 169.232) Comprehensive review of the components, operation and use of specified adult, pediatric and neonatal mechanical ventilators. Classroom and laboratory sessions. 180 hours.

RESP 2330 Pulmonary Investigations Cr.Hrs. 3 (Formerly 169.233) Lung function testing principles and procedures including: static and dynamic measures, determination of volumes and capacities, exercise physiology. An analysis of lung function changes relative to common disease physiology. 50 hours.

RESP 2340 Physiologic Measurements and Instrumentation Cr.Hrs. 3
(Formerly 169.234) Acid base physiology, interpretation of physiologic values, design theory, operation and care of gas analyzing devices, oximetry, capnography. 45 hours.

## RESP 2350 Cardiology Cr.Hrs. 3

(Formerly 169.235) Aspects of clinical assessment of the cardiovascular system, pathophysiology and selected treatment regimens and modalities. Laboratory on rhythm analysis and aspects of advanced cardiac life support. 60

## hours.

RESP 2360 Pediatrics Cr.Hrs. 3
(Formerly 169.236) Normal physiology, diseases and treatment, the child in hospital environment, high risk neonates, principles of intensive care, pediatric emergencies and fetal and maternal medicine. 60 hours.

RESP 2370 Anesthesiology Cr.Hrs. 3
(Formerly 169.237) Principles of anesthesia, airway management, pain management, anesthetic agents, function of the anesthesia machine, pre- and postoperative assessment, recovery and safety features in the operating
room. 45 hours.
RESP 2380 Basic Fieldwork 2 Cr.Hrs. 4
Building on RESP 1380 (Basic Fieldwork1) and RESP 2390 (Clinical Integration and Simulation), this course is comprised of fieldwork experiences which provide the student the opportunity to apply the integrated concepts learned in the first two years of the Respiratory Therapy program in a clinical setting. This course will prepare students for advanced clinical education coursework. Prerequisites: RESP 1380, RESP 2390.

RESP 2390 Clinical Integration and Simulation Cr.Hrs. 6 This course provides the student an opportunity to integrate concepts learned in the first two years of the Respiratory Therapy program, and to learn life support protocols prior to participation in advanced clinical education coursework. The course will be delivered through a variety of formats including classroom, seminar, and clinical simulation. Prerequisite: This course is restricted to students registered in year two of the Bachelor of Medical Rehabilitation in Respiratory Therapy program who have completed all required courses for year one of the program.

RESP 3300 Seminars in Respiratory Care Cr.Hrs. 3 (Formerly 169.330) A series of seminars on Respiratory Disease and other clinical topics designed to bring together practical and theoretical aspects of the program. 60 hours.

RESP 3310 Clinical Education in Intensive Care Cr.Hrs. 10 (Formerly 169.331) This course consists of 10 weeks of clinical experience in the adult intensive care setting in an approved clinical site. Course evaluated on a pass/fail basis. 432 hours.

## RESP 3320 Clinical Education in Pediatric Respiratory

Care Cr.Hrs. 3
(Formerly 169.332) Three weeks of clinical experience in the Pediatric Intensive Care Unit at Children's Hospital. Shiftwork and extended shifts may be required. Course evaluated on a pass/fail basis. 144 hours.

RESP 3330 Clinical Education in Neonatal Respiratory Care Cr.Hrs. 4
(Formerly 169.333) Four weeks of clinical experience in the Neonatal Intensive Care Unit at Children's Hospital and/or St. Boniface General Hospital. Shiftwork and extended shifts may be required. Course evaluated on a pass/fail basis. 180 hours.

RESP 3340 Clinical Education in Maternal/Fetal
Health Cr.Hrs. 1
(Formerly 169.334) One week of clinical experience in maternal and fetal health at the Women's Centre, Health Sciences Centre. Course evaluated on a pass/fail basis. 36 hours.

RESP 3350 Clinical Education in Pulmonary
Diagnostics Cr.Hrs. 3
(Formerly 169.335) Three weeks of clinical experience in the pulmonary diagnostic laboratory of an approved clinical site. Course evaluated on a pass/fail basis. 144 hours.

RESP 3360 Clinical Education in Anesthesia Cr.Hrs. 3 (Formerly 169.336) Three weeks of clinical experience designed to acquaint the student with actual clinical techniques and procedures used in the operating and
recovery room. Course evaluated on a pass/fail basis. 144 hours.

RESP 3370 Clinical Education in Community Care Cr.Hrs. 4 (Formerly 169.337) Four weeks of clinical experience in community care settings including: pre-hospital care, health and wellness promotion, interfacility transport, chronic care, home care and community outreach. Course evaluated on a pass/fail basis. 180 hours.

RESP 3380 Clinical Education in Respiratory Care Cr.Hrs. 4 (Formerly 169.338) Four weeks of clinical experience spent in the non-intensive care setting working with a variety of medical and surgical patients. Course evaluated on a pass/fail basis. 180 hours.

## Faculty of Medicine

Dean: Brian Postl
Associate Dean(s): Associate Dean (Undergraduate): Ira Ripstein Associate Dean (Professionalism \& Diversity): Samia Barakat Associate Dean (Students): Bruce Martin
Campus Address/General Office: 260 Brodie Centre, 260727 McDermot Avenue, Winnipeg MB R3E 3P5
Telephone: (204) 7893557
Fax: (204) 7893929
Email Address: registrar med@umanitoba.ca

## SECTION 1: Medical Education

### 1.1 Mission Statement,

The Mission of the Faculty of Medicine is to develop and deliver high quality educational programs for undergraduate and postgraduate students of medicine and medical rehabilitation, for graduates and post-doctoral fellows in the basic medical sciences and for physicians in practice; conduct research and other scholarly inquiry in the basic and applied medical sciences; and, contribute to the improvement of health status in Manitoba and beyond by providing advice, disseminating information to health professionals and the public, and by cooperating in the planning for the development and delivery of health care services.

The Mission of the Undergraduate Medical Education Program is to provide an environment which will assist students to become competent, caring, ethical physicians with the ability to think critically. This experience will prepare students to choose their area of training wisely, to successfully continue their education, and subsequently to meet responsibilities to their patients and society.

Medical education in Manitoba is designed to provide students with the knowledge and experience they need to practise medicine in a profession where new developments

University of Manitoba
in science and public health policy create an ever-changing environment. In the first two years of the program the subject matter is divided into blocks which cover core concepts in health and medicine, human development and body systems. Clinical Skills, Problem Solving, Medical Humanities, Laboratory and Investigative Medicine, and Survival Tactics are integrated into the six blocks. The final two years, called the "clerkship" are spent in direct contact with patients and doctors in a clinical setting in which students gain experience with increasing responsibility for patient care and management.

### 1.2 History of Faculty,

Medical education in Manitoba had its beginnings in 1883 when 13 physicians applied to the local legislature for a charter to form the Manitoba Medical College. The college was chartered as an affiliate of the University of Manitoba. The number of students registered for the first session was 15 , and the number in attendance at each session from that date to the present has ranged from 15 to 440 . The university came to the aid of the Medical School from time to time by furnishing full-time professors in chemistry, physiology, pathology, bacteriology, and zoology. With the session of 1918-1919 the Manitoba Medical College ceased to exist as a separate institution. It made a gift of all its property and equipment to the University of Manitoba "on condition that the university establish a Faculty of Medicine, and carry on the work of medical education in an efficient manner."

In 1921, a building for the accommodation of the departments of Physiology, Biochemistry, and Bacteriology was erected on the old Medical School property, and a further unit was completed in February, 1922. In January, 1956, the new wing of the medical building was officially opened, which included new quarters for the Medical Library. In February, 1965, the Chown Building was opened providing five-stories of administration offices and space for Pharmacology and Therapeutics and the Computer Department for Health Sciences. The Basic Medical Sciences Building, containing undergraduate teaching facilities, opened in 1973. It provides accommodation for anatomy, biochemistry, physiology, and medical microbiology. The Brodie Centre officially opened in the spring of 1996; it provides a library, research and recreational facilities. In 2004, the Office of the Dean and the Education Offices relocated to new administrative facilities in the Brodie Centre. General teaching facilities are located in the medical buildings, and facilities for clinical instruction are provided in the teaching hospitals affiliated with the University of Manitoba and in related institutions. The varied settings in which medicine is practised in Winnipeg and in rural and northern Manitoba also provide students with the opportunity to study community medicine outside the major teaching institutions.

### 1.3 Neil John Maclean Health Sciences Library,

The Neil John Maclean Health Sciences Library provides access to a wide range of evidence-based medicine resources in print and electronic format. Online resources include core medical textbooks such as Harrison's Priniciples of Internal Medicine, drug reference resources such as Lexi-Comp, and clinical point of care tools such as

UptoDate, First Consult, MD-Consult, and Access Medicine. The Library subscribes to over 4,500 online journals and the articles in this collection are dynamically linked from important medical databases such as PubMed, EMBASE, and Scopus. Students can access all of the online resources on-campus using the Bannatyne campus wireless network and from home with a student ID number and password. The Library's facilities include 12 seminar rooms, which can be booked by students for group study, 92 study carrels, and 32 computers for walk-in use. Librarians offer training on the use of key medical resources and information management both as part of the curriculum and in regularly scheduled sessions throughout the year.

### 1.4 Graduate Studies,

Graduate Studies information about graduate studies in medicine or related sciences, and information regarding opportunities for medical research may be obtained from: The Assistant Dean (Graduate Studies and Research), Faculty of Medicine, University of Manitoba, A108 Chown Build-ing, 753 McDermot Avenue, Winnipeg, MB, R3E OW3.

More than 300 graduate students are doing research and pursuing Masters and Doctoral degree programs in the Faculty of Medicine. Their research training programs offer opportunities to conduct research at a number of sites including Bannatyne Campus, the National Virology Lab, St. Boniface Research Centre, and the Institute for BioDiagnostics. Graduate programs are available in the Departments of Anatomy, Biochemistry and Medical Genetics, Community Health Sciences, Immunology, Medical Microbiology, Pathology, Pharmacology, Physiology, and Surgery.

### 1.5 Physician Assistant Education Program,

The Physician Assistant Education Program is the first graduate-level program for Physician's Assistant education in Canada. Upon completion of the comprehensive two year program, graduates receive a Master of Physician Assistant Studies degree. The program aims to educate outstanding Physician Assistant clinicians, to advance the academic field of the profession, and to foster leaders who will serve their communities and advance the physician assistant profession in Manitoba and Canada.

### 1.6 Department of Medical Education,

The mandate of the Department of Medical Education is to work in a collaborative manner across all programs and schools within the Faculty of Medicine to provide expertise and services related to medical education including: curriculum development, faculty development, design of evaluation tools and assessment strategies and the provision of standardized patients. The second purpose of the department of Medical Education is to engage in research and scholarly activity related to medical education and serve as an academic home for faculty with primary appointments within medical education.
1.7 Continuing Professional Development,

This office is responsible for the Continuing Professional Development programs of the faculty, which are conducted in the Medical School, teaching hospitals, and in urban and rural medical centres. Information regarding programs may be obtained from: The Office of Continuing Professional Development, Faculty of Medicine, University of Manitoba, S203-753 McDermot Avenue, Winnipeg, MB R3E OW3.

## SECTION 2: Admission to the Faculty of <br> Medicine

The Applicant Information Bulletin is the official policy document for Admission. The document can be found at: www.umanitoba.ca/student/admissions/media/medicine bull etin.pdf

### 2.1 Degree Offered,

Doctor of Medicine (M.D.)

Minimum time to graduation: Four years in the Faculty of Medicine following an undergraduate degree.

### 2.2 Eligibility Requirements for Admission,

Refer to the Applicant Information Bulletin for the eligibility requirements:
http://umanitoba.ca/faculties/medicine/admissions/applying.h tml
All applicants must meet the following eligibility requirements:

- Canadian citizen or permanent resident of Canada;
- Bachelor's degree no later than June 30, 2013 from a university recognized by the University of Manitoba
- A minimum of 6 credit hours in Biochemistry at the university level with a minimum grade of $C$; applicants should refer to the Acceptable Biochemistry Course Combinations spreadsheet found on the Admissions website:
http://umanitoba.ca/faculties/medicine/admissions/info.html3
Eligibility Requirements To Apply
Credit hours in the humanities/social sciences;
- Medical College Admission Test (MCAT); the MCAT is administered by the AAMC and further information can be found at:
www.aamc.org ;
- Adjusted Grade Point Average (AGPA) of 3.30 or higher;
- Technical Standards Requirement; the Faculty of Medicine has identified the requisite skills and abilities for admission, promotion and graduation in the MD program; these can be found at the following link:
http://umanitoba.ca/faculties/medicine/media/Essential Skills and Abilities for Admissions Promotion and Graduation. pdf
- Accommodation Policy; the Faculty of Medicine supports individuals with disabilities who may require accommodation to meet the requisite skills and abilities; the policy can be found at the following link:
http://umanitoba.ca/faculties/medicine/
- Proficiency in English Language; all applicants whose primary language is other than English must demonstrate proficiency in the English language; please contact Enrolment Services at the University of Manitoba;
- Adult Criminal Record and Child Abuse Registry Checks; all applicants must complete a selfdeclaration regarding adult criminal records, pending criminal charges and registration on the child abuse registry as an offender; this selfdeclaration must be done at the time of application; an adult criminal record check, declaration of pending criminal charges and child abuse registry self-check are required at the time of registration and annually thereafter;
- Professional Registration; all medical students must be eligible for, and become registered with the College of Physicians and Surgeons of Manitoba (CPSM) by the time of registration; eligibility requirements can be viewed on the CPSM website at:
www.cpsm.mb.ca;
- All applicants must have participated and been successful in the Multiple Mini Interview (MMI).
2.3 Eligibility Requirements for Transfer, Applications for transfer are only accepted from students registered and in good standing at an LCME accredited medical school. Transfers can only be considered if there is a seat available through attrition. Details regarding the transfer policy can be found at the following
link: http://umanitoba.ca/faculties/medicine/alumni/media/Tra nsfer Policy.pdf.

### 2.4 Immunization Requirements,

Immunization requirements can be viewed at:
http://umanitoba.ca/faculties/medicine/education/undergradu ate/immunestatus.html.

### 2.5 Certification in Cardio-Pulmonary Resuscitation (CPR), <br> Students must have CPR designated as "Health Care

 Provider Level C" acceptable to the standards of the Heart and Stroke Foundation at the time of registration in Year I. Students must have annual renewal of their CPR registration acceptable to the standards of the Heart and Stroke Foundation throughout the Undergraduate Medical Education program. Evidence of current renewal must be provided on an annual basis prior to the beginning of theacademic year. Failure to comply, may result in exclusion from all academic programs until renewal is obtained.

## SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. Faculty of Medicine regulations and requirements change from time to time. Detailed information concerning the general regulations governing admissions, evaluation, academic progress and withdrawal for an undergraduate medical student may be obtained from the Undergraduate Medical Education Office. These regulations include the following:

- A student will not be permitted to register unless the student is in good academic and financial standing from the previous year.
- No student may repeat more than one year, and no year may be repeated more than once except by special permission of the Faculty Executive Council or Progress Committee.
- A student who withdraws from the Faculty of Medicine without prior written notice will be considered to have terminated connection with the Faculty and will not be eligible for re-admission.
- A student who withdraws from the Faculty having given due notice of intention to withdraw is eligible for re-admission. If re-admission is approved the student will be required to conform to the rules and regulations, fee schedules, sequence of courses, in effect at the time of such readmission.
- A student may, after completion of the work of a full year, be granted a leave of absence for one year subject to certain conditions related to the purpose of the leave of absence and on subsequent registration will be required to conform to the rules and regulations, fee schedules, and sequence of courses in effect at the time of such registration.
- A student who has been or expects to be prevented from attending any regular examination by reason of illness or other cause beyond the student's control should at once notify the Associate Dean, Students and must abide by the requirements of the Deferred Examination Policy and Procedures found at:
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/DeferredExamination.pdf.
- The Faculty Executive Council reserves the right to require a student to withdraw from the program for which the student is enrolled when it believes the student to be unsuited, on general considerations of scholarship, or conduct for the profession, or the field within the profession, to which the program of studies normally leads. This right prevails notwithstanding any other provision in the faculty regulations.
- Each student is required to present the personal and professional appearance, attitudes and behaviours expected of members of the medical profession. The Faculty of Medicine has a process through which lapses in professionalism are reported, investigated, and, when necessary, will result in remedial or punitive actions up to and including dismissal. The Faculty of Medicine Professionalism website provides additional information:
http://umanitoba.ca/faculties/medicine/education/undergradu ate/professionalism.html.
- The Faculty of Medicine has a Conscientious Objection Policy through which medical students may request exemption from participation in specific medical procedures or services. Requests are evaluated and, if granted, do not absolve students from the following aspects of the procedure or service in question, including: cognitive knowledge (indications, contraindications, benefits and risks); full and nonselective disclosure to support Informed Consent by patients; patient non-abandonment; appropriate patient referral; and nondiscrimination. A full list of criteria can be found on the Conscientious Objection application form. A Conscientious Objection cannot limit a student's educational experience such that the student's overall medical education will be compromised and all affected curricular time must be made up otherwise. For information, contact the Undergraduate Medical Education Office.
- Each student must complete the undergraduate program for the M.D. degree of the Faculty of Medicine within six years of entry to first-year Medicine, exclusive of those students undertaking additional academic pursuits which are acceptable to the Progress Committee or whose progress is delayed by medical illness. When a student fails to complete the program Progress Committee will review the academic record of the student. If the student is in good academic standing at that time, the committee may grant one further year for the completion of the program. The reasons for the prolonged duration of the student's program are confidential but must be approved as valid by the Associate Dean, UGME.

### 3.1 Requirements for the Degree of Doctor of Medicine

 (M.D.)Every candidate for the degree of Doctor of Medicine must have satisfied the following requirements:

- Subsequent to the successful completion of the required university studies, a student must have attended four full sessions of not less than nine months each in this or some other school of medicine approved by the University of Manitoba,
the last two years of which must have been spent as a student of the University of Manitoba.
- A student must have completed the required work, have fulfilled satisfactorily all special requirements, have received satisfactory grades throughout the entire medical program, and have discharged all indebtedness to the university.

Degrees: All degrees in Medicine will be conferred by the Senate of the university on the recommendation of the Faculty Executive Council at a regular meeting of the University Senate or at a meeting specially called for that purpose.

### 3.2 Requirements for Registration to Practise Medicine,

 A university degree in medicine does not in itself confer the right to practice the profession of medicine in Canada. That right is obtained from a provincial registering body in the particular province in which the graduate desires to practice, and follows the successful completion of the Medical Council of Canada's two qualifying examinations.
### 3.2.1 Federal Registration: The Medical Council of Canada

The Medical Council of Canada was established in 1912 by the Canada Medical Act. Its purpose is to grant a qualification to practice medicine acceptable for license in every province of Canada. It is not a licensing body, but "anyone who secures the diploma of the Medical Council of Canada by examination is registered on the Canadian Medical Register. This registration entitles one to become licensed to practice medicine in any province in Canada upon payment of the necessary fee and on meeting other provincial requirements."

The Medical Council of Canada examinations are normally taken by undergraduate medical students of the University of Manitoba at the end of the fourth year. There is a fee for this examination. Examinations are held annually in Winnipeg in May and November, and registration for these examinations may be made with The Registrar, Medical Council of Canada, 2283 St. Laurent Boulevard, Ottawa, ON K1G 5A2. The deadline for application is usually in December; candidates are advised to contact the Medical Council of Canada for current information: www.mcc.ca.

### 3.2.2 Provincial Registration

The College of Physicians and Surgeons of Manitoba is the regulation body for the physicians in Manitoba. Each medical student must be registered with the College of Physicians and Surgeons of Manitoba in each year of the academic program. For information on registration in Manitoba contact: The College of Physicians and Surgeons of Manitoba, 10001661 Portage Ave., Winnipeg, MB R3G 3T7; telephone: (204) 7744344 or http://cpsm.mb.ca/.

## SECTION 4: The Program for the M.D. Degree <br> 4.1 Governance,

The program and its curriculum are the responsibility of the Faculty Executive Council (FEC). The policies, regulations, implementation and modifications of the educational program for the M.D. degree are determined by the FEC on the recommendation of the Faculty of Medicine
Undergraduate Medical Education Curriculum Executive Committee. The Curriculum Executive Committee is chaired by the Director, UGME Curriculum. The Terms of Reference for this committee and committee membership can be viewed at
http://umanitoba.ca/faculties/medicine/education/undergrad uate/curriculum/Links.html. The Curriculum Executive Committee is responsible for the curriculum, teaching, and evaluation in the educational program leading to the M.D. degree.

### 4.2 General Statement,

The program is a continuum over the four years but is divided into the Pre-Clerkship, Years 1 and 2, and the Clerkship, Years 3 and 4, for administrative purposes. The mission and objectives of the program can be found at: http://umanitoba.ca/faculties/medicine/education/undergradu ate/ugme_mission_objectives.html. They are given to faculty and students and are the guide for the curriculum. The curriculum is based on the view that it is neither necessary nor desirable for the faculty to present all the knowledge, skills and behaviours that are expected of a student by graduation. Instead the students are provided with the core material which lies in the mainstream of medical science. Students are expected to acquire further knowledge and skills for themselves through study, discussion and scholarly development. They are encouraged to take the initiative to approach instructors and colleagues with regard to learning. The program values the search for knowledge, the evaluation of its worth and its application to the analysis and solution of problems as opposed to the simple memorization of information. Students are expected to develop skills to acquire new knowledge and to realize that these skills will be used throughout their professional lives irrespective of their field of medicine. The curriculum encourages an interdisciplinary and integrated approach to medicine. Teaching sessions promote participation and active learning by students. Instructors, whatever their own discipline, ensure that their teaching is relevant to the overall development of students to become undifferentiated graduates of medicine with the potential to enter any postgraduate position for which they have the ability and aptitude. The Faculty of Medicine does not support students' limitation of their studies to only fields and disciplines of personal interest. Nonetheless, students are encouraged to pursue areas of interest and to develop their own education through electives. Students learn to use information, skills and behaviour from multiple sources of teaching to prevent and solve the problems that face their patients and society. Students learn that physicians are part of an interdisciplinary team and health care system that provide adequate,

## ACADEMIC CALENDAR

University of Manitoba
accessible, continuous and comprehensive health care. In order to modify and enhance the educational program, the opinions of students and their evaluation of the program and its teachers are formally sought and respected by faculty. This information is used by the Curriculum Executive Committee to improve the program.

### 4.3 The Plan of the Curriculum,

The curriculum is in the process of renewal. The renewed curriculum will be person/patient centered and will be presented over the four academic years as a fully integrated spiral scaffold curriculum.

### 4.3.1 Professionalism

Professionalism, behaviour and attitudes befitting medical professionals, an important component of the Undergraduate Medical Education curriculum. The goal is to instill the attributes of professionaism and to emphasize to medical learners that professional charateristics and attributes are necessary for the practice of medicine and for their identity as physicians.

The Faculty of Medicine has developed a professionalism charter that serves as a framework for defining and demonstrating medical professionalism.

The Faculty of Medicine looks forward to learning of students who display exceptional professionalism through letters sent to the Associate Dean, UGME. The Faculty of Medicine uses a Professionalism Report by which single egregious or recurrent lapses in student professionalism can be brought to the school's attention. A summary statement will be included on an individual's Medical Student Performance Record if two or more validated reports have been received. The Faculty of Medicine maintains the option to dismiss students on the basis of unprofessional behaviour, regardless of performance in the curriculum.

### 4.3.2 Pre-Clerkship Program:

The goals and objectives of the UGME Pre-Clerkship curriculum are based on the mission and objectives of the undergraduate program as outlined:
http://umanitoba.ca/faculties/medicine/education/undergradu ate/ugme mission objectives.html. The evaluation of student academic progress is based on achievement of the learning objectives provided to students on-line through the curriculum management system.

The curriculum is composed of six instructional blocks over two years that address the basic medical sciences, population health, human growth and development as well as systems-based learning (for example, cardiovascular, reproduction, etc.) The two-year Pre-Clerkship curriculum brings together teachers and facilitators from across all Faculty Departments, other healthcare related faculties and disciplines as well as members of the public. All basic medical sciences, including anatomy, molecular biology, bio-chemistry, human genetics, immunology, microbiology, physiology contribute to the curriculum as do the clinically applied basic sciences of pathology, pharmacology and
community health sciences. Clinical departments including anaesthesia, clinical health psychology, family medicine, internal medicine, obstetrics, gynaecology, ophthalmology, otolaryngology, paediatrics, psychiatry, surgery are involved in all aspects of the curriculum. An overview of each Block within the Pre-Clerkship component of the Undergraduate Medical Education program can be viewed at:
http://umanitoba.ca/faculties/medicine/education/undergradu ate/program overview.html.

## Methods of Teaching

A variety of approaches are used to facilitate learning. These include self-directed learning, small group tutorials, lectures, lab practicals or demonstrations and simulation.

## Methods of Assessment

Formative and summative assessments are provided throughout the Pre-Clerkship curriculum. These include selfreflection, learning portfolios, tutor feedback, instructional tests, multiple choice examinations, practical examinations, and short and long answer examinations.

## Attendance

Certain learning sessions in the UGME program are designated as "mandatory attendance" sessions. These are generally sessions in which patients or their families are involved; clinical skills are being taught; or clinical care is being provided. Attendance at these sessions is recorded and reported to the UGME office, and contributes to the evaluation of the learner's professionalism, The Attendance Policy can be viewed at
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/Pre-Clerkship Student Attendance.pdf.

The procedures outlined in this policy do not preclude course directors, session leaders and instructors from tracking student learner attendance in their sessions and discussing any concerns related to attendance with the learners.

### 4.3.3 Clerkship Program:

The Clerkship component of the undergraduate program is designed to give medical students didactic instruction, supervised responsibility for patient care and frequent feedback and evaluation. The program is governed by the Clerkship Curriculum Committee for which the terms of reference and membership can be viewed on the website: http://umanitoba.ca/faculties/medicine/education/undergradu ate/ugme governance.html.

The Clerkship Program consists of the Introduction to Clerkship, core clerkship rotations, a multiple specialty rotation, and electives. It lasts 20 months. Core clerkships last a minimum of six weeks, multiple specialty clerkships are comprised of shorter individual rotations and electives are offered in units of two weeks or longer.

Clerkship Phase I:

Introduction to Clerkship (ITC) (4.5 weeks): The Clerkship Program begins with the ITC that is a preparation for clerkship. Each department that provides instruction in ITC has the goal of presenting information and clinical experiences that are relevant to clerkship as a whole.

Core Clerkship Rotations (48 weeks): The primary responsibility of the clerks in the program is the care of patients under the supervision of post-graduate students and faculty. Rotation through all major clinical disci-plines is provided and these are supplemented by "elective" periods. Six-week periods are spent in family/community medicine, internal medicine, selectives in medicine and surgery, obstetrics/ gynaecology, paediatrics, psychiatry, surgery, and a multiple specialty rotation consisting of anaesthesia, emergency medicine, ophthalmology, otolaryngology and a community health sciences project. Settings for the clerkship experience are varied, including wards and outpatient facilities of the hospitals, doctors' offices, rural and community-based hospitals. Formal teaching and evaluation of the knowledge, skills, attitudes and behaviours pertinent to the discipline are provided during the rotations.

## Clerkship Phase II:

Electives and CaRMS National Interview Period (24 weeks): There are three major elective periods during clerkship. The first period occurs from the end of the core clinical rotations to the December break; the second occurs in January prior to the CaRMS National Interview Period; and the third period follows the CaRMS National Interview Period. Throughout the elective periods, students must pursue education in a minimum of three different disciplines with a minimum duration of two weeks each. Electives may be pursued in a setting of the student's own choice, but must be approved by the Director, Electives.

Students are responsible for all costs associated with electives and CaRMS interviews, e.g. transportation, accommodation etc.

MCCQE Part I Refresher Series ( 5.5 weeks): This is a short program of half day lectures and time for self study in preparation for the licensing examination of the Medical Council of Canada Qualifying Examination Part I (MCCQE Pt 1) and then the actual writing of the MCCQE Part 1 examination. The clerkship program ends with students participating in a mandatory ACLS course.

## SECTION 5: Student Evaluation and

## Academic Progress

### 5.1 Responsibility,

The policies and procedures for the evaluation of the students in the pro-gram for the M.D. degree are the responsibility of the Faculty Executive Council (FEC).

The responsibilities of the Progress Committee include:

- Recommending to FEC the academic standards by which the progress of students are judged and ensuring that examiners have followed the policies and procedures set by FEC.
- Determining which students may proceed to the next stage of the program or to graduation.
- Determining which students should write supplemental examinations, or be required to take remedial study, or be required to repeat all or part of the academic year before promotion to the next stage of the program or graduation.
- Placing students on Monitored Academic Status or Probationary Academic Status.
- Ensuring that the Committees of Evaluation have followed the policies and regulations of evaluation that have been approved by the FEC.

The Committees of Evaluation (COE): The COE, PreClerkship Year 1, COE Pre-Clerkship Year 2 and Clerkship (Years 3 and 4) conduct the evaluation of the students. The knowledge, clinical and communication skills, attitudes and behaviour of the students are evaluated by examination, assessment of performance and completion of assignments.

## The responsibilities of the COEs include:

- Planning and administration of the evaluation of all aspects of student examinations and performance.
- Planning and administration of all supplemental examinations.
- Planning and administration of all other measures of academic performance.
- Planning and administration of remedial training for students with unsatisfactory academic performance.
- The reporting of the results of examinations, supplemental examinations, other academic performance evaluation and remedial training to the Progress Committee.

### 5.2 Evaluation in the Pre-Clerkship Program, <br> 5.2.1 Summative Examinations

The COEs will inform the students of the pre-determined pass mark for all examinations at the beginning of their block. The student, however, will be given the overall as well as the actual marks obtained in the different sections of the examination. Student results will be reported to them as a pass or fail; neither grades nor honours will be given. Grades and relative performance will be recorded in the student's active file. A student can view his or her active file in accordance with the Student Records Policy an procedures at:
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/Student Records.pdf.

The Faculty of Medicine uses a Pass/Fail system where grades are not reported external to the Faculty of Medicine. Transcripts and Medical Student Performance Reports will indicate only whether a student has passed or failed a year or block. However, within the Faculty of Medicine, student grades will be used to help identify students at academic risk and to help select students for distinctions such as awards and specialized programs.
There are written comprehensive examinations based on the objectives at the end of each block i.e. three in first year and three in second year. In addition, there is a mid-block examination in Block 1. Each examination may use various methods of evaluation: multiple choice questions, short answer questions, etc. There may also be take-home assignments in each course that contribute to the final mark. The student's performance in the Clinical Skills course will be assessed by OSCE-type examination, typically conducted at the end of Year II. Expectations for student conduct and information related to pass marks for summative examinations can be found in the following UGME policies.

- Examination Conduct Policy
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/ExaminationConduct.pdf
Examination Results Policy
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/Examination Results.pdf
Deferred Examinations Policy
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/DeferredExamination.pdf
Examination Accommodation Procedures
http://umanitoba.ca/faculties/medicine/media/Accommodatio ns Procedures.pdf

### 5.2.2 Failures of the Evaluation in Pre-Clerkship Years 1

 and 2The UGME Promotion and Failure Policy governs decisions related to student promotion and failure at the Pre-Clerkship level
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/PromotionAndFailure.pdf.
Students failing in up to two examinations can write supplementary examinations in accordance with the Supplemental Examination Policy that can be viewed at http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/SupplementalExams.pdf. Students who fail any supplementary examination in first- or second-year will fail that year.
Students who are granted supplemental privileges are expected to under-take remedial study at a time determined by the Director, Remediation during the summer period. Following the remediation, they will sit a supplemental examination comparable but different to that failed. Students who fail the Clinical Skills program will be granted supplemental privileges and receive a remedial period during the summer vacation that will take into account the areas of weakness revealed by their performance and the examination. The performance of students during the remedial period will be evaluated by a preceptor and will normally include an oral and/or written examination and/or repeated OSCE. Students who fail to reach the standard expected after remediation will fail the year.
Students in Year 1 and Year 2 who are successful on the supplemental examination(s) will be promoted.

Year 1 students who fail the year must apply for readmission to medical school before June 1. Students being considered for re-admission will usually be interviewed by the Admissions Committee to determine how they might better approach medical school so that they might succeed on a second attempt. The Admissions Committee will advise the Associate Dean, Students who will recommend to the Progress Committee whether the student should be readmitted.
Students who fail Year 2 will automatically repeat it and are not subject to review by the Admissions Committee.

### 5.2.3. Formative Evaluation in Pre-Clerkship

A variety of formative evaluative exercises are conducted in Pre-Clerkship including instructional tests, practice questions, reflective writing, self-evaluation, and peerevaluations.

### 5.2.4. Remediation in Pre-Clerkship

The student will be required to meet with the Director, Remediation to develop a remedial plan. The exact nature of the remediation may vary with the student and will be designed to meet individual learning needs as defined by the student. The student will also be required to meet with the Associate Dean, Students, who may also direct the student to other faculty members or services for students.
5.3 Evaluation of Students in the Clerkship Program, During the clerkship years students will be evaluated on their competence and this will include assessment of their cognitive knowledge and understanding, clinical skills, problem solving and judgement, technical skills, interpersonal attributes and general professional responsibility. Evaluation will be the responsibility of the Committee of Evaluation, Clerkship (COE Clerkship).
5.3.1 Methods of Summative Evaluation (General)

The policy and procedures applicable for evaluation are:

- Examination Conduct Policy
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/ExaminationConduct.pdf
- Examination Results Policy
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/Examination Results.pdf
Deferred Examinations Policy
http://umanitoba.ca/faculties/medicine/education/ed dev/me
dia/DeferredExamination.pdf
Examination Accommodation Procedures
http://umanitoba.ca/faculties/medicine/media/Accommodatio ns Procedures.pdf
Various methods will be used to assess students including the final evaluation re-ports (FITERs); written external NBME examinations and OSCE-type exams. Student performance for evaluation purposes during examinations may be recorded in writing, orally, by computer, by audio or by video taping. All material necessary to generate the mark such as papers, computer records, tapes will be destroyed once the
student has passed that evalua-tion (such material can be of help to a student needing remediation before the pass). To achieve this quality assurance the Committee of Evaluation Clerkship may use direct observation or indirect observation by audio and video monitoring. Quality assurance material is subject to the aforementioned regulations of the university and the faculty. Furthermore, this material, which could identify the individual student will not be released to anyone, other than the Dean and Committee of Evaluation Clerkship, without the written consent of the student.

### 5.3.2 The Introduction to Clerkship (ITC)

The goal of Introduction to Clerkship (ITC) is to prepare the student for clerkship rotations. Students will be assessed for attendance and performance in learning groups. The purpose of student evaluations in ITC is to ensure that students are ready to begin the clerkship rotations.

Readiness for clerkship must be demonstrated in many areas including: basic medical knowledge and its application; clinical skills in evaluating patients; analysis of clinical data; problem identification and diagnosis; planning of investigation; planning of management and therapy; relationships to patients and staff. These attributes will be evaluated in a variety of ways throughout ITC.

## Method of Evaluation

Students failing to attend mandatory sessions will be reported to the Associate Dean UGME, who will inform the COE Clerkship. Each student will receive a warning from the Associate Dean's office. If this warning is ignored the student's attendance record and performance will be considered by the COE Clerkship and the student may be failed for the sessions missed. A suitable remedial period may be provided. If the student does not perform satisfactorily in the remedial period the ITC will be failed.

The student must be informed of a recommendation for failure within seven working days of the end of the session. The pass/fail decision will be given by the departmental representative to the COE Clerkship. In the case of a failing evaluation the reasons for failure must be documented and submitted to the COE Clerkship.

### 5.3.3 ITC Remediation

## Failure for inadequate attendance

The coordinator of the block of sessions missed may, with approval of the Director, Clerkship Curriculum, provide the student with a remedial course, of comparable educational experience in that subject and the student will have to attend and perform satisfactorily to pass the ITC.

### 5.3.4 The Major Clinical Clerkships

## Method of Evaluation

selective rotation. For core surgery the NBME examination will take place following the major surgery rotation. The passing standard for National Board Exams will be the 11th percentile of the entire reference group. Students failing a NBME examination will re-sit this examination as outlined in the Supplemental Examination Policy:
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/SupplementalExams.pdf.

### 5.3.5 The Comprehensive Clinical Examination (CCE)

The goal of the Comprehensive Clinical Examination (CCE) is to objectively evaluate student clinical competence in generic skills of data collection, interpersonal relationships, along with the content of the case for diagnosis, investigation, and management of common clinical problems. This examination frequently uses standardized patients to test these clinical skills. The CCE committee is a sub-committee of the COE Clerkship and is chaired by the CCE coordinator. The CCE is marked to a standard predetermined by the CCE committee and the results of the examination are submitted to the COE Clerkship.

### 5.3.6 The Multiple Specialty Rotation in Clerkship (MSR)

## Method of Evaluation

The evaluation of students during each component of the MSR clerkship rotation includes assessments of attendance, performance and could include faculty prepared examinations. Students will be expected to attend all clinical, small group, and laboratory sessions. Clinical performance will be judged, where applicable, as in the major clerkships. The Clerkship Director, or designate, must advise each student by the mid-way point of each component of the rotation if his or her performance is likely to lead to a fail-ing assessment in that component. Failing students must be given due opportunity to improve their performance to the expected standard. The Clerkship Director, or designate, will use all evaluations to make a final decision on the student's performance at the end of each component of that rotation. A failing student must be informed of the failure by the preceptor, Clerkship Director, or designate preferably before the end of the rotation but not later than seven working days after the rotation is complete. All results will be submitted to the undergraduate committee of the department, who, in the case of a failure will review all the evaluations and preceptor(s) pass/fail assessments to determine the overall, pass/ fail standing for the student in that department.

### 5.3.7 The Elective Periods

## Method of Evaluation

Electives are evaluated in a similar manner to other clerkship rotations and students are required to obtain a completed elective evaluation form for every elective pursued. These evaluations will be reviewed by the Director, Electives, and unsatisfactory assessments will be submitted to the COE Clerkship.

### 5.3.8 Remediation during Clerkship

Generally in the Clerkship program remediation is scheduled during electives or other suitable time as determined by the Faculty. The Director, Remediation in consultation with the Clerkship Director, or designate will design this remediation which may include further clinical experience.

## Clerkship Clinical Performance Remediation

The COE Clerkship will provide the student who has failed a clinical rotation an appropriate remedial period with the department in which the rotation was failed. The rotation will be an equivalent educational experience to the clerkship failed, and its goal will be to assist the student to reach the expected standard of clinical competence. A similar process of evaluation will be used, and this may be supplemented by a clinical oral examination if the departmental undergraduate committee deems it necessary. The remedial rotation will be taken during an elective period.

## Remediation for NBME Examination Failures

Students failing any two NBME examinations (in the same subject or different subjects) will receive a remedial period of training from the department of that subject. The Director, Remediation in conjunction with the Clerkship Director, or designate, will design the remediation; further clinical experience may be needed to meet that purpose. Such a remedial period will be a maximum of four weeks and will be taken in an elective period and followed by a third attempt at the National Board examination.

## Remediation for Failure in the CCE

The COE Clerkship will devise an appropriate remedial period which will take into account the areas of weakness demonstrated by the CCE and will be taken during elective time. This remediation will be evaluated by a clinical assessment and may include an oral and/or written exam.

## Remediation for an MSR Clerkship Failure

The COE Clerkship will provide the student who has failed a clinical component of the MSR with a remedial period in the department in which the rotation was failed. This period is flexible but can be up to the same length as the failed rotation. Such a remedial rotation will be an equivalent educational experience to that failed and its goal will be for the student to reach the expected standard of clinical performance. A similar process of evaluation will be used and may be supplemented by a clinical oral and/ or written examination if the department deems it necessary. The remedial will be taken in an elective period.

## Remediation for an Electives Failure

The COE Clerkship will devise a remedial period of up to four weeks which will take into account the areas of weakness revealed by the student's elective evaluation. This will be taken in the next available free time for the student. The remedial period will be evaluated by clinical assessment and can include an oral examination if the COE Clerkship deems it necessary.

University of Manitoba

### 5.3.9 Failure of a Student in the Clerkship Program

The Clerkship Program is a continuum held over Year 3 and Year 4. A failure of the Clerkship Program is considered to be a failure of one year, see Section 3 Academic
Regulations, above.
Failure of the Clerkship
The student will be determined to have failed the Clerkship Program if:

## 1. Failure of Clinical Assessments

The student has received failing evaluations in one or more of the following:
a) Two major clerkships in different disciplines (Internal

Medicine, Internal Medicine Selective, Surgery, Surgery
Selective, Paediatrics, Obstetrics/ Gynaecology, Psychiatry, and Family Medicine)
OR
b) One major clerkship and:
i) its remedial, or
ii) an ITC remedial, or
iii) an MSR remedial, or
iv) an elective remedial

OR
c) Remedials in two of the following:
i) Anesthesia
ii) Emergency Medicine
iii) Otolaryngology
iv) Ophthalmology
v) Community Health Sciences
vi) Elective
vii) ITC

## 2. Failure of Examinations

The student has failures in one or more of the following: a) A single NBME subject examination three times OR
b) A total of five NBME examinations

OR
c) The CCE after remediation

## 3. Remediation Related Failures

If the remediation period recommended for a student, for whatever cause, requires more than eight weeks, then the student will be deemed to have failed the Clerkship Program. Complete information related to promotion and failure in any year of the Undergraduate Medical Education program can be found in the Undergraduate Medical Education Promotion and Failure Policy and Procedures at
http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/PromotionAndFailure.pdf.

### 5.3.10 Terms for the Repeat Clerkship

A student who fails the Clerkship Program, be it because of failure of clin-ical assessments, failure of examinations, or failure of remediation (as above), immediately ceases in the program, and will be required to repeat the Clerkship Program. The Repeat Clerkship will consist of the following, at a minimum: Six-week rotations in each of Core Internal Medicine, Core Surgery, Paediatrics, Family Medicine, Psychiatry, and Obstetrics/Gynaecology, plus 12 to16 weeks of electives. A student in the Repeat Clerkship will also be required to complete the ACLS course ( 0.5 weeks), the LMCC refresher course ( 4.5 weeks). The student will be granted 3 weeks for CaRMs interviews and two weeks for vacation. Furthermore, if the failure occurred prior to the completion of the Medicine Selective, Surgery Selective, Mul-tiple Specialty Rotation (MSR), or Community Health Sciences Project, then these will be required components of
the Repeat Clerkship as well. The student must satisfactorily meet all clinical assessments, examinations, the CCE, as well as remedial rotations (as appropriate), regardless of whether they had been passed previously. The terms of the Repeat Clerkship will be submitted to the Progress Committee for review and final approval.

### 5.3.11 Terms for Failure of the Repeat Clerkship

The terms for failure of the Repeat Clerkship are the same as listed above in 5.3.7 "Failure of a Student in the Clerkship Program." A student who has failed the Repeat Clerkship will be required to withdraw from the Faculty of Medicine program.

### 5.4 Regulations for Students Taking Leave from the Clerkship Program ,

Students may, for health or personal reasons, withdraw from clinical rotations or take temporary leave. For planned leave, prior permission must be obtained from the Associate Dean, UGME and/or Associate Dean, Students or designate. For leaves due to sudden or unexpected circumstances, the Associate Dean, UGME, the Director, Clerkship Curriculum, and the Clerkship Director or designate of the rotation must be informed. Written docu-mentation of the reason for leave will be required by the Associate Dean, UGME. The information is confidential to the Associate Dean, UGME and Associate Dean, Students or designate.

Students who require an extended leave from the Clerkship Program may have a delayed graduation.

If a student misses more than $25 \%$ of a rotation, the student will not receive credit for the rotation regardless of the reason. The student will be required to repeat the entire rotation.

Brief periods of leave may be taken upon notification and approval by the Director, Clerkship Curriculum. For complete details on attendance during clerkship please refer to the full Clerkship Attendance Policy and procedures at:
http://umanitoba.ca/faculties/medicine/education/undergrad uate/policies.html.

Generally, the Clerkship program is completed in 79 weeks, excluding CaRMS interview time and holiday time. When, due to leaves of absence, a student will take more than 79 weeks, including elective periods, to complete the Clerkship Program the Committee of Evaluation Clerkship will review the student's record (clinical assessments and exam-inations) during the Clerkship Program to ensure that the time lost has not compromised the overall achievement of the student.

### 5.5 Reappraisal and Appeal of Failed Rotations and Examinations,

A student who has failed or received "Unsatisfactory" on a Block examination or an OSCE-Type examination can request a reappraisal of the evaluation in accordance with the Reappraisal of Student Evaluations Policy
http://umanitoba.ca/faculties/medicine/media/Reappraisal of

University of Manitoba

## Student Evaluations Policy FEC February 2011.pdf Policy.

If the student is not accepting of the decision reached by a Reappraisal Committee as outlined in the above stated policy, the student can appeal the decision to the Undergraduate Student Appeals Committee: http://umanitoba.ca/faculties/medicine/education/ed dev/me dia/UGME Student Appeals.pdf.

A student can appeal a decision of the Undergraduate Student Appeals Committee to the Faculty of Medicine Student Appeals Committee and a student appeal of the Faculty of Medicine Student Appeals Committee can be brought to the Senate Committee on Student Appeals.

The Faculty of Medicine will not accept requests for reappraisal of external examinations. The National Board of Medical Examiners (NBME) provides a Score Recheck Service, details of which are posted on the NBME website at:http://www.nbme.org/Schools/Subject-Exams/score.html. Students are responsible for the cost of a Score Recheck that may be requested on their behalf by the Faculty of Medicine.

## SECTION 6: Academic Research in Medical Education

Part of the educational responsibility of the Faculty of Medicine is to perform research on innovations and effectiveness in medical education. Whenever students are the research subjects, all such research must have approval from the Faculty of Medicine Research Ethics Board. Where students are studied individually their participation will be voluntary. Research findings will not identify individuals.

## SECTION 7: Additional Degrees in Medicine 7.1 Bachelor of Science in Medicine (B.Sc. (Med.)),

 7.1.1 General InformationThe Bachelor of Science in Medicine program is offered over two summer terms; following the first and second year of the undergraduate program in Medicine. The B.Sc. (Med) program is designed to provide the undergraduate medical student with an opportunity to gain firsthand experience in medical research. A large variety of basic science, translational and clinical research projects are available for the student to choose from each year.

The program consists of four components:

- Research project
- Clinical exposure
- Written report
- Dissertation

The program is open to undergraduate students in the Faculty of Medicine and, if approved by the B.Sc. (Med) Committee, to selected undergraduate students from other Canadian and international medical schools. The work for this degree may be carried out in any department of the Fac-ulty of Medicine at the University of Manitoba as well as approved external facilities. This program may not be taken concurrently with any part of the medical curriculum nor by a student who is not in good standing. To enrol in the B.Sc.(Med) program the student must find a supervisor in any field within the Faculty of Medicine. The supervisor must be a member of the Faculty of Medicine. Together, the student and supervisor submit an application which includes a project proposal to the B.Sc.(Med) Committee. If the project proposal is accepted by the committee, students are accepted into the B.Sc. (Med) Program and can then be registered with the university for the B.Sc.(Med) summer sessions.

An examining committee comprised of faculty members excluding the B. Sc.(Med) program director, one from outside the department in which the research work is carried out, will be established for each student by their respective supervisor.

Students will be required to produce research and present their findings ac-ceptably in both a written report and oral presentation at the conclusion of their second summer. Students will be evaluated by their Supervisor after the first summer and by their examining committee following the completion of the requirements for the B.Sc.(Med) degree. Students will be required to withdraw from the program if they make unsatisfactory progress, including after the first summer of research.

The B.Sc.(Med) degree will be conferred at the same time as the M.D. de-gree unless the student, having satisfactorily completed the requirements for the B.Sc.(Med) degree, discontinues the study of Medicine at the University of Manitoba or other approved institution. In this case, the B.Sc.(Med) degree will not be conferred.

The program is on a Pass/Fail basis. Incompletion of the program outside of the normal voluntary withdrawal time frame will be considered a fail.

### 7.1.2 Program Fees

The program fees will be additional to the Faculty of Medicine tuition fees. Program fees change annually.

### 7.1.3 Stipendiary Support

Students receive stipendiary support during each 13 week term. Presently support is in the amount of $\$ 5000.00$ per 13 week term.

### 7.2 MD/PhD Program, <br> 7.2 MD/PhD Program

### 7.2.1 Purpose

University of Manitoba

The combined-degree MD/PhD Program in the Faculty of Medicine is designed to produce academic clinician scientists who are interested in a career that combines both research and clinical medicine, providing them advanced clinical, academic and research skills.

### 7.2.2 Duration

The minimum program of study is the total required by the Faculty of Medicine for the MD program (4 years) plus the minimum requirements of the Faculty of Graduate Studies (3 years from honours undergraduate degree). Students who obtained advanced/graduate training prior to admission may be granted advanced standing. Students will be considered to be full-time graduate students (see Faculty of Graduate Studies guidelines pertaining to Full-Time Status) throughout the entire period. Typically, following completion of Med II, students undertake a 3-4 year sabbatical from MD training to undertake and complete doctoral research training. They then return to third year Medicine to begin Clerkship.

### 7.2.3 Eligibility

Medical Students are eligible to apply upon initial admission to Medicine and at any time during the first two years of the MD program. Semi-annual competition deadlines are posted at the program website :
http://www.umanitoba.ca/faculties/medicine/education/under graduate/6696.html.

### 7.2.4 Application Process

Potential applicants should carefully review full details on the application process posted on the program website. Students wishing to apply should contact the Director of the Program early in the process (hayglass@cc.umanitoba.ca). Acceptance will minimally require: 1) identification of a supervisor (within a department at the University of Manitoba which has an approved PhD pro-gram) who has adequate resources for the research expenses necessary for proposed program of study and whose department recommends acceptance, 2) interview with the Faculty MD/PhD Selection Committee and their recommendation for acceptance, and 3) acceptance by the Faculty of Graduate Studies.

### 7.2.5 Program Fees

The total tuition fees payable are the sum of the fees required for the MD and PhD programs of study. Continuing fees (Faculty of Graduate Studies) are also applicable. Under current tax regulations, such fees are largely refunded as tax credits to graduates who continue to reside in the province of Manitoba. In most instances, a tax free stipend (current minimum $\$ 21,000 \mathrm{pa}$ ) is provided for six years to trainees who enter the program and remain in good standing. The six years of support is NOT shortened for trainees who achieve their research-based PhD in less than six years before returning to medical training.

After initial assessment of the complete application dossier by the MD/PhD Program Director, the program advisory and admission committee (PAAC), chaired by the MD/PhD Program Director, reviews all eligible applications and makes a recommendation to the Faculty of Graduate Studies. The Associate Deans for Research, UGME, and Students, Faculty of Medicine and the Associate Dean, Faculty of Graduate Studies, are advisory to the Program Director, Advanced Degrees in Medicine. They will ensure: 1) adequate resources for all aspects of the delivery of the program, 2) liaison with the Trainee's host Department, the Faculty of Medicine (in-cluding flexibility re: leaves for research) and Faculty of Graduate Studies, 3) review of advisory committee composition/function and of student progress and 4) the provision of program elements consid-ered important to the success of the Option.

### 7.2.7 Coursework

The minimum course requirements of the Faculty of Graduate Studies, as defined by individuals departmental supplementary regulations, are applicable in addition to the normal curriculum of undergraduate medical studies.

### 7.2.8 Research/Thesis Requirements

The quality and quantity of research supporting the thesis shall be consistent with that required for all other doctoral candidates in the field.

### 7.2.9 Additional Program Elements: Seminar Series and Research Progress Evaluations

Each student will be required to regularly attend a designated research seminar series organized by the sponsoring research discipline of the student. In addition, mandatory attendance will be required of all MD/PhD students and their supervisory faculty advisors to participate in a semi-annual program-wide, MD/PhD Student Research in Progress Forum. These regular research days will provide time for students to present their work to a critical audience (research proposals, work-in-progress, critical reviews in major areas of recent scientific advances, etc.), and promote networking within the program. Each student will be required to present a research update once a year, and satisfactory performance at this yearly assessment a requirement for continuation of program support.

### 7.2.10 Conferment of the Dual Degrees of MD/PhD

The MD and PhD degrees will usually be conferred simultaneously during convocation upon satisfactory completion of the MD and PhD programs.

### 7.2.6 Administration

## SECTION 8: Registration Information

### 8.1 Initial Registration Access Times,

Students in the Faculty of Medicine Undergraduate Medical Education Pro-gram will be given access time to the registration system (Aurora Student) in July. For instructions
on how to register online, please refer to the chapter, "Registration Information: Aurora Student". Registration must be complete prior to the first day of classes.

Each student is registering in the same course for both the Fall AND Winter sessions. Med III students will be able to register in their Summer session in mid-March. Students are asked to contact Admissions and Enrolment Services at (204) 789-3569 if registering difficulties are encountered.

Courses for the Undergraduate Medical Education program are:

| Program <br> \& Year | Faculty/ School <br> Codes | Terms | Dept. Number <br> \& Course Number | Lecture Section | Lab Section |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Medicine I | 05 | Fall 2012 and Winter <br> 2013 | UGME 1000 | L01 | Not Applicable |
| Medicine II | 05 | Fall 2012 and Winter <br> 2013 | UGME 2000 | L01 | Not Applicable |
| Medicine III | 05 | Fall 2012 Winter and <br> Summer 2013 | UGME 3000 | L01 | Not Applicable |
| Medicine IV | 05 | Fall 2012 and Winter <br> 2013 | UGME 4000 | L01 | Not Applicable |

### 8.2 Web Registration Exceptions,

Students who have a failing grade/s registered against them and/or have other outstanding academic matters (i.e. deferred or supplemental examinations, modified program, etc.) in regards to the previous academic session will not be allowed to register using the web registration system. Students who fall into this category should contact the Admissions and Enrolment Services at (204) 789-3569 for further information.

## Bachelor Science in Medicine and Summer Early

 Exposure ProgramsStudents approved to participate in summer enrichment programs will be registered by the Faculty.

### 8.3 Prior to Registration,

New Students: All incoming students must complete an application to the College of Physicians and Surgeons of Manitoba, complete a Heart and Stroke certified course in BLS for Healthcare Providers (HCP-C) and submit the following documentation prior to the first day of class: immunization records, Adult Criminal Records Check (with vulnerable sector search), Child Abuse Registry Self-Check, Essentail Skills and Abilities (Technical Standards) for Admission, Promotion and Graduation in the MD Program, and Accommodation for Undergraduate Medical Students with Disabilities. If you are unable to submit these documents by the first day of class please contact Admis-sions and Enrolment Services.

Returning Students: All returning students must re-certify their CPR in a Heart and Stroke certified course in BLS for Healthcare Providers (HCP-C) and submit a copy of their card to the Faculty of Medicine office prior to the first day of
class. Returning students must be registered with the College of Physicians and Surgeons of Manitoba by June 30 of each year and must provide current documentation on Adult Criminal Record Check ( with vulnerable sector search) and Child Abuse Registry Self-Check prior to the first day of class.

## SECTION 9: Biochemistry \& Medical Genetics - $\mathbf{3 0 0 0}$ Level

BGEN 3020 Introduction to Human Genetics Cr.Hrs. 6 (Formerly 137.302) Principles necessary to understand and study genetically influenced malformations, diseases and variation in individuals and in populations. Two terms. Lectures, tutorials and assignments. Not to be held with the former 080.301 or 125.301 .

## SECTION 9: Biochemistry \& Medical Genetics -4000 Level

BGEN 4010 Project Course in Human Genetics Cr.Hrs. 6 (Formerly 137.401) A research project chosen in consultation with and supervised by a faculty member. A written report is required. The course is available primarily to final year Honours students in the Honours Genetics program. Selection of project and supervision to be arranged prior to September 30 and submitted in writing to department head. Deadline for submission of first draft to supervisor by March 1. Deadline for submission of final draft to supervisor and course coordinator is March 31.

## 

## SECTION 9: Human Anatomy \& Cell Science

## -1000 Level

ANAT 1030 Human Anatomy Cr.Hrs. 3
(Formerly 080.103) To present the essentials of the organization and structure of the human body. Surface, functional and applied anatomy will be taken into consideration. For Pharmacy students only.

## SECTION 9: Pharmacology -4000 Level

PHAC 4020 Pharmacology Basics Cr.Hrs. 6
General mechanism of action of the important groups of drugs and factors which control and modify their effects. Overview of the use and side effects of drugs. Not to be held with the former 089.210.

PHAC 4030 Drugs in Human Disease I Cr.Hrs. 3 Foundation physiological principles underlying human disease intergrated with drug dispostion and effects of important drug groups on disorders of the authonomic and centreal nervous systems, and the cardiovascular system. May not be held with PHAC 4020 . Prerequisites: BIOL 2410 (or ZOOL 2530 or 022.253) and BIOL 2420 (or ZOOL 2540 or 022.245).

PHAC 4040 Drugs in Human Disease II Cr.Hrs. 3 Foundation physiological principles underlying human disease integrated with effects of important drug groups on endocrine and organ system disorders, allergy and inflammation, infection, and cancer. The course also offers an introduction to basic clinical pharmacology as well as several current specialized topics in pharmacology. May not be held with PHAC 4020. Prerequisites: BIOL 2410 (former ZOOL 2530 or 022.253) and BIOL 2420 (former ZOOL 2540 or 022.254).

## SECTION 9: Physiology -1000 Level

PHGY 1030 Fundamentals of Medical Physiology Cr.Hrs. 6 (Formerly 090.103) The function and regulation of the systems and major organs of the human body as they relate to clinical disorders. For Pharmacy students only.

## SECTION 9: Pharmacology -2000 Level

PHAC 2100 Pharmacology Cr.Hrs. 6
(Formerly 089.210) General principles of pharmacology including consideration of the pharmacodynamics of important drugs and control and modification of drug action.

4.1 First Year
4.2 Second Year
4.3 Third Year
4.4 Fourth Year
4.5 Fifth Year
4.6 Electives: Third and Fourth Years

SECTION 5: Post-Baccalaureate Diploma in Performance
5.1 Admission Requirements
5.2 Admission Procedures
5.3 Program Requirements
5.4 Academic Standing
5.5 Maximum Time Limits
5.6 Courses Available
5.7 Credit Transfer
5.8 Completion of the Program
5.9 Assessment

SECTION 6: Offerings for Non-Music Students
6.1 Courses Offered outside the B.Mus. and B. Jazz Programs for Students in Other Faculties
6.2 Music Minor for Students in the Faculty of Engineering, the Faculty of Arts, and the Faculty of Science

SECTION 7:
7.1 Undergraduate
7.2 Post-Baccalaureate

## SECTION 1: Degree and Diploma Programs Offered

| Degree | Years to Complete | Total Credit Hours |
| :--- | :---: | :---: |
| Bachelor of Music | $4^{*}$ | 126 |
| Bachelor of Music <br> (Composition) | $4^{*}$ | 126 |
| Bachelor of Music (History) | $4^{*}$ | 126 |

| Bachelor of Music <br> (Performance) | $4^{*}$ | 126 |
| :--- | :--- | :--- | :--- |
| Bachelor of Music/ <br> Bachelor of Education | $5^{* *}$ | $174-177$ |
| Bachelor of Jazz Studies | $4^{*}$ | 126 |
| Post-Baccalaureate Diploma in Performance | 1 | 30 |

* Minimum time to graduation: Four years if admission is directly from high school and five years if admission is via University 1.
** An integrated degree that combines Music with Education; minimum time to graduation: five years in Music and Education if admission is directly from high school and six years if admission is via University 1.

## SECTION 2: Admission to Music <br> 2.1 Course Requirements for Admission from High School, <br> Admission to the Faculty is directly from high school, although admission from University 1 is an option.

## Other requirements

High school prerequisites: Music 40 S is strongly recommended, while a second 40 S language is recommended. Private lessons in your instrument and formal instruction in music theory and keyboard study are strongly recommended. Good academic performance in subject areas other than music is also strongly recommended. Refer to:
umanitoba.ca/faculties/music/prospective/Undergraduate.ht ml http://umanitoba.ca/faculties/music/future/210.htmfor audition information or admissions@umanitoba.ca

## SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty has regulations and requirements, published below, which apply specifically to its students. Detailed information regarding regulations is available in the general office of the Faculty. The aim of the Bachelor of Music and Bachelor of Jazz Studies programs is to provide a basic framework of knowledge and ability; both theoretical and practical, from which either professional activities or graduate specialization can start. The Bachelor of Music four-year program contains concentrations in specified areas in the third and fourth years. After their first two years, students select the area in which their interests and abilities are strongest. The faculty offers four-year programs leading to the degree of either Bachelor of Music, with the following concentrations: Performance, Composition, History, and General Music and the five-year Integrated Bachelor of Music/Bachelor of Education. The four-year Bachelor of Jazz Studies is a direct entry program from high school. Practical study may be in piano, organ, harp, harpsichord, classical guitar, lute, recorder, voice, or any standard orchestral instrument: strings, woodwinds, brass, and percussion, and all the traditional jazz instruments. Ensemble work is included in all years of the program. Music courses are available to students in other faculties and schools. Consult section 6.0 or the appropriate section of this Calendar for regulations.

### 3.1 Written English Requirement and Mathematics

 Requirement,Students in the Bachelor of Music and the Bachelor of Jazz Studies programs meet the university's written English requirement through three credit hours of English; ENGL 1310 or an equivalent. The university's mathematics requirement is met through the required course, MUSC 3230 Acoustics of Music ( 3 credit hours). These courses are listed as requirements to complete the first year of all Bachelor of Music programs and Bachelor of Jazz Studies.

### 3.2 Electives (Non-Music),

Students are required to take one course in a subject other than music for each year of the Bachelor of Music and Bachelor of Jazz Studies program to a total of 21 credit hours (18 for the Integrated B.Mus./B.Ed.). With the exception of the university's written English requirement in the first year, the student is free to choose any subject but is advised to seek the advice of faculty.

### 3.3 Ensembles,

The Faculty offers a wide variety of opportunities for participation in ensembles such as the Women's Choir, Concert Choir, University Concert Band, University Singers, University Symphony Orchestra, University Wind Ensemble, University Jazz Orchestra, Jazz Ensembles, Collegium Musicum, Opera Theatre, Chamber Ensemble, Percussion Ensemble, Musical Theatre, XIE (eXperimental Improv Ensemble), Brass Choir, Classical Guitar Ensemble and other wind, string and keyboard combinations. Bachelor of Music students are required to participate in two ensembles each year for four years. Bachelor of Jazz Studies students are required to participate in one ensemble each year for four years. The Ensemble Committee determines placement in credit ensembles; such participation will normally be in ensembles directly relevant to the student's major practical study area. Students from other faculties and non-university musicians are welcome to participate as space and instrumental balance allow, but all participation is at the discretion of the conductor or coach of the ensemble. Some ensembles are offered for credit in other faculties.

### 3.4 Scholarships,

Entrance and continuing scholarships are available for Faculty students. Details may be obtained from Financial Aid and Awards or the Marcel A. Desautels Faculty of Music.

## 

## ACADEMIC CALENDAR 2012-2013 b

University of Manitoba

### 3.5 Scholastic Progress,

Within the first week of the term, students will be informed of the organization of materials, the nature and timing of testing, and the proportionate weighting of marks that contribute to the final grade in all academic courses at the Marcel A. Desautels Faculty of Music. Regulations regarding the grading of all practical courses at the Faculty are contained in the Student Handbook; special attention is called to the Recital and Master Class Attendance Policy which is an integral part of the grading system for Major Practical Study in each year of the program. A grade of " C " or better is required in each Music course throughout the Bachelor of Music and Bachelor of Jazz Studies programs, except where the Faculty Student Handbook states otherwise. Students who take Music elective courses and fail to achieve a minimum grade of " $C$ " in them should repeat these courses. Due to the system of rotating electives, this may not be possible and in such a case another approved Music elective may be substituted. Supplemental examinations are not normally given in the Faculty, with the following exception: where a jury mark of " $D$ " has been assigned in Major Practical Study, the juried examination may be reheard prior to the next registration. A sessional (September to April) Grade Point Average of less than 2.0 (C), or failure to achieve a grade of "C" or better in two Music courses will result in a student being placed on probation. While on probation, the student remains in the program but is subject to a set of conditions that are established by the Faculty of Music. A student failing to meet these conditions may be placed on suspension. Each student is permitted a maximum 21 credit hours of failed Music courses in the Bachelor of Music and Bachelor of Jazz Studies programs. Students will not be permitted to register for a required music course more than twice without the permission of the Dean.
B.Mus. and B.Jazz students who achieve a sessional (September to April) Grade Point Average of 3.5 and are registered in a minimum of $80 \%$ of a full-time program in both fall and winter terms will be eligible for the Dean's Honour List. Students who are granted incomplete or deferred status will not be eligible.

### 3.7 Attendance,

Regular attendance is expected of all students in all courses.
Any unexcused absences from ensemble or practical study courses or three unexcused absences from any other music course may result in the student being required to withdraw from the course or ensemble, or may result in a failing grade being assigned. Students absent from a class for three or more consecutive meetings due to illness may be required to present a certificate from a physician. Prior approval for extended absences from class for reasons other than illness must be obtained from the instructor and the director. Unexcused absence from a class test may result in a grade of zero for the test. Make-up tests may be allowed in special circumstances.

## SECTION 4: Program Requirements

## 4.0: Program Requirements Introduction

## SECTION 4: Program Requirements Intro,

These programs are in effect for students admitted since 1997-98. Students who entered in previous years should consult earlier calendars.

| MUSC 4780 | Band and Orchestral Techniques 2 | 3 |

## General Notes Regarding Electives

Most electives are not offered every year; some are offered every other year and some are offered less frequently. The listing of a subject as an elective does not guarantee that it will always be available or that it will be possible to fit it into all of the many varied timetable combinations of full- and part-time students. There may be a maximum limit set on the number of students permitted to take an elective in a particular session. Similarly, there will be a minimum limit. If registration is below the minimum, the elective will be cancelled for the session, and those registered will be required to transfer to another elective before the course change deadline date. Students are urged to discuss their elective program with members of the faculty toward the end of their second and third years to obtain advice concerning the best choice of electives for their needs. Each year, second-year and third-year students will be asked to complete a questionnaire concerning their choice of electives for the following year.

## SECTION 5: Post-Baccalaureate Diploma in

## Performance

The Marcel A. Desautels Faculty of Music offers a PostBaccalaureate Diploma in Performance designed for musicians who wish to further their performance skills in preparation for further study or professional activity. The unique features of the PBDP program are that students can design their own program of study and tailor it to their own areas of interest. They may take courses at the Faculty as well as in other faculties and schools at the University of Manitoba.

### 5.1 Admission Requirements,

Applicants for Admission must submit the completed application form and fee, and must possess a Bachelor of Music degree or a Conservatory Diploma taken in residence. They must also pass an entrance audition, which requires the performance of three works of contrasting styles and/or historical periods appropriate to the audition medium. This audition would normally be held in person, but video auditions may be accepted where distance is a prohibitive factor. Application materials which misrepresent the level of performance ability, will be treated as fraudulent, resulting in dismissal from the program. Admission may not be possible
for all qualified applicants, as it is dependent on number of spaces available, the major practical study area, and instructor availability. Applicants who hold the PostBaccalaureate Diploma in Performance from the University of Manitoba (or an equivalent Post-Baccalaureate one-year program from another institution) may apply for a second PBDP if studying a different applied instrument than that of their first PBDP in their Major Practical Study, and Recital courses, and if the remaining course credits taken do not duplicate those of the first PBDP.

### 5.2 Admission Procedures,

Application forms may be obtained from the Faculty. Completed application forms must be received by February $15^{\text {th }}$ to begin study in September, or June $15^{\text {th }}$ for a January start date.

### 5.3 Program Requirements,

MUSC 5400 Major Practical Study, 1 hr. instruction/week or the equivalent, 6 credit hours

MUSC 5560 Recital, 1 hr . instruction/week, 6 credit hours

MUSC 5180 Ensemble, 3 credit hours

Electives: chosen from available 3000 and 4000 level courses recommended by the advisor and approved by the Faculty, 15 credit hours

Total Credit Hours: 30

Note: A minimum of 18 credit hours must be taken in the Marcel A. Desautels Faculty of Music (although all 30 may be taken within the Faculty).

Reminder: While Faculty staff and faculty are available to clarify Faculty and university regulations and degree requirements, it is the student's responsibility to ensure that diploma and program requirements are met.

### 5.4 Academic Standing,

Regulations for the Post-Baccalaureate Diploma program regarding academic standing, scholastic progress, attendance, required GPA, probation and suspension will follow those governing the Bachelor of Music and Bachelor of Jazz Studies programs as outlined in the Faculty Student Handbook.

### 5.5 Maximum Time Limits,

Expected time to complete program: 1 year. The maximum time allowed for completing the Post-Baccalaureate Diploma program is 3 years. Students will not be permitted to transfer for credit any course completed more than five years prior to the completion date of the diploma.

### 5.6 Courses Available,

Undergraduate 3000 and 4000 level courses approved by the Dean may be used as electives in designing the program of study. Students will register for their courses after their program has been determined in consultation with their major practical study teacher who will act as academic advisor during the Post-Baccalaureate Diploma program. Students may not count toward the PBDP any courses that counted for credit in a previous degree.

### 5.7 Credit Transfer,

The Faculty's Registrar will process transfer of credits into the PBDP program. A maximum of 12 credit hours of courses may be transferred into the PBDP program provided that they have not counted toward any previous degree. A minimum of 18 credit hours must be taken within the Faculty, although up to the full 30 credit hours of the diploma program may be taken within the Faculty. Transfer of credits from the PBDP program into the M.Mus. is processed
through the Faculty of Graduate Studies. Courses may not be counted for more than one degree, and may be transferred from the PBDP to the M.Mus. only if they have not been counted toward the PBDP or more than the minimum credit hours have been taken.

### 5.8 Completion of the Program,

Minimum: 1 year, Maximum: 3 years. The Dean may grant extensions for medical or compassionate reasons. Medical: A letter from the student's physician stating the diagnosis and treatment with projected recovery. Compassionate: A letter from the student outlining the reasons for the extension showing that extenuating circumstances beyond the student's control have contributed to the need for an extension.

### 5.9 Assessment,

Student Assessment: Type of evaluation: Academic freedom dictates that there will be variation between classes according to the professor's preferred systems, approaches, materials, readings, and assignments. However, the University of Manitoba regulations as outlined in the General Calendar state that within the first week of lectures, instructors must inform the class of the method of evaluation to be used in each course. Minimum Grade Requirements: In the Faculty students must attain a grade of " C " or higher for a course to count toward a degree, except in the case of Recital where a minimum of " B " is required. The PBDP program will be governed by these regulations, as outlined in the Student Handbook. Should the student transfer to another faculty in the university that faculty's regulations would apply relating to transfer of credit. Successful completion of the program will be achieved by receiving a "C" or higher in 30 credit hours. Teacher Assessment: The SEEQ course evaluations will be used in the PBDP program for academic courses, and the Faculty's specialized forms will be used for the performance-related courses.

## SECTION 6: Offerings for Non-Music

## Students

6.1 Courses Offered in the B.Mus. and B.Jazz Program for Students in Other Faculties,
Some courses are offered outside the B.Mus. and B.Jazz programs for students in other faculties.

### 6.2. Music Minor for Students in the Faculty of

 Engineering, the Faculty of Arts, and the Faculty of Science,A Minor in Music is available to students in the Faculty of Engineering, the Faculty of Arts, and the Faculty of Science. The requirements for a Minor in Music for Engineeringstudents can be found in the Faculty of Engineering section of this calendar, the requirements for a Minor in Music for Arts students can be found in the Faculty of Arts section of this calendar. The requirements for a Minor in Music for Science students are as follows:

University of Manitoba

| Minor Option 1 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| UNIVERSITY 1 |  | YEAR 2 | YEAR 3 | YEAR 4 |
| MUSC 1280 and <br> (At most, 12 c minor) | MUSC 1290 <br> edit hours numbered at the 1000 level may be used toward the | 12 credit hours of Music courses from List A (Students who elect ensemble courses from List A are required to complete all three courses) |  |  |
| Minor Option 2 |  |  |  |  |
| MUSC 1110 and MUSC 1120 <br> (At most, 12 credit hours numbered at the 1000 level may be used toward the minor) |  | 12 credit hours of Music courses from List A (Students who elect ensemble courses from List A are required to complete all three courses) |  |  |
| NOTE: Unless otherwise noted, these courses are available to all students in the Faculty of Science who have completed the required prerequisites. Courses in list B are not available to students completing the minor. Ensemble courses (MUSC 2180, MUSC 3180, and MUSC 4180) are acceptable for credit towards a degree in Science only when applied to the minor. They are not acceptable for credit as options. |  |  |  |  |
| Minor Program |  |  |  |  |
| For entry to the minor, the prerequisite is a grade of "C" or better in each of MUSC 1280 and MUSC 1290 or a grade of " $C$ " or better in each of MUSC 1110 and MUSC 1120. A maximum of 12 credit hours numbered at the 1000 level may be used towards 18 credit hours for a minor. |  |  |  |  |
| List A |  |  |  |  |
| Students are responsible for ensuring that all prerequisites have been met. |  |  |  |  |

## SECTION 7: Music - $\mathbf{1 0 0 0}$ Level

MUSC 1050 The Well-Tempered Concert-Goer Cr.Hrs. 3
(Formerly 033.105) This course is an introduction to the art of music with the listening component based on attendance at ten live performances by Winnipeg's superior performing ensembles. Topics include instruments of the orchestra, musical materials, forms and structures, historical periods and biographical information on composers.

MUSC 1070 Introduction to the History of Music Cr.Hrs. 3 (Formerly 033.107) Introduction to the study of music history with emphasis on historical and stylistic developments of the Middle Ages and Renaissance.

MUSC 1080 History of Music 2 Cr. Hrs. 3 (Formerly 033.108) A study of the development of style, idiom and performance practise in the music of the 17th and early 18th centuries. Prerequisite: MUSC 1070 (or 033.107) or equivalent, or consent of the Faculty of Music.

MUSC 1110 Music Theory 1 Cr. Hrs. 3
(Formerly 033.111) This course is designed to develop fluency in the writing and recognition of the elements of music: melodic and harmonic intervals, modes and scales, rhythm and metre, triads and inversions, and the principles of melodic and homophonic design. Prerequisite: Knowledge of music rudiments as demonstrated by a Placement Test given during the first week of classes, or by completing MUSC 1930 (or 033.193) with a mark of "C" or better.

MUSC 1120 Music Theory 2 Cr. Hrs. 3
(Formerly 033.112) An examination of the idioms of vocal melody through the writing and analysis of duple paraphrase, duple- and syncopated-rhythm counter-point in two parts, and tonal homophony leading to the Chorale phrase and Bar form. Prerequisite: a grade of " C " or better in MUSC 1110 (or 033.111).

MUSC 1180 Ensemble Cr.Hrs. 2
(Formerly 033.118) Participation in University Symphony Orchestra, University Wind Ensemble, Women's Choir, Bison Men's Chorus, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student's background and/or major applied area (placement to be determined by ensemble committee).

MUSC 1182 Jazz Ensemble 1 Cr.Hrs. 2
Participation in jazz ensemble(s) as assigned by the ensemble committee.

MUSC 1190 Ensemble Cr.Hrs. 2
(Formerly 033.119) Participation in a Faculty of Music Ensemble other than the one designated in MUSC 1180 (or 033.118 ) (to be chosen in consultation with the Faculty of Music).

MUSC 1192 Jazz Rhythm Performance Techniques Cr.Hrs. 2 A practical approach to rhythmic proficiency in jazz, including emphasis on rhythmic and harmonic etudes, standard song form interpretation, interaction, call and response language for jazz performance.

MUSC 1280 Musical Style and Structure 1 Cr.Hrs. 3 (Formerly 033.128 ) An integrated study of the history and theory of Western music to 1750. Prerequisite: Canadian Conservatory Grade 4 or RCT Grade 2 Theory or consent of the Faculty of Music. Continuation in the Music Major or Minor requires a grade of $C$ or better in this course.

MUSC 1290 Musical Style and Structure 2 Cr.Hrs. 3 (Formerly 033.129 ) An integrated study of the history and theory of Western music from 1750 to the present. Prerequisite: MUSC 1280 (or 033.128). Continuation in the Music Major or Minor requires a grade of " C " or better in this course.

MUSC 1380 Basic Music Skills 1 Cr.Hrs. 2
(Formerly 033.138 ) A practical approach to the cultivation of critical aural perception: specifically, to develop the student's sight-singing, transcription and keyboard skills.

MUSC 1390 Basic Music Skills 2 Cr.Hrs. 2
(Formerly 033.139) A continuation of MUSC 1380.
Prerequisite: MUSC 1380 (or 033.138).
MUSC 1400 Major Practical Study Cr.Hrs. 6 (Formerly 033.140) Individual instruction in one of the following: any of the standard orchestral instruments (strings, woodwinds, brasses, percussion), classical guitar, harp, harpsichord, lute, organ, piano, recorder composition or voice. An important constituent of the grading procedure for this course is performance in, and attendance at, the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 1460 Minor Practical Study Cr.Hrs. 3
(Formerly 033.146) Individual instruction in an area other than that selected for MUSC 1400 (or 033.140) or in composition by special permission. Written consent of the
director is required prior to registration.
MUSC 1930 Rudiments of Music Cr.Hrs. 3 (Formerly 033.193) An introduction to fundamental aspects of music such as sound generation, notation, melodic and harmonic construction, with emphasis on an aural approach.

## SECTION 7: Music -2000 Level

MUSC 2070 History of Music 3 Cr.Hrs. 3 (Formerly 033.207) A study of music in the eighteenth century from the Rococo and pre-Classical repertoire through the works of Haydn and Mozart. Prerequisites: MUSC 1070 (or 033.107) and MUSC 1080 (or 033.108) or equivalents, or consent of the Faculty of Music.

MUSC 2072 Jazz History 1 Cr.Hrs. 3
A broad survey of the development of jazz and early popular styles of the 20th Century up until the early 1950s. This course is designed to reveal the origins of modern jazz and conventional jazz performance practices.

MUSC 2080 History of Music 4 Cr.Hrs. 3
(Formerly 033.208) A study of the changing styles, forms and contexts of music from the late 18th century to 1915. Prerequisite: MUSC 2070 (or 033.207) and MUSC 2110 (or 033.211) or consent of the Faculty of Music. First offering in the 1998-99 academic year.

MUSC 2082 Jazz History 2 Cr.Hrs. 3
A broad survey of jazz styles from 1950 to the present, with an emphasis on the development of contemporary performance practices. Prerequisite: MUSC 2072 or consent of the Faculty of Music.

MUSC 2110 Music Theory 3 Cr.Hrs. 3
(Formerly 033.211) An examination of the idioms of instrumental melody through the writing and analysis of triple paraphrase, triple- and quadruple-rhythm counterpoint in two parts, and chromatic homophony leading to the Minuet and binary form. Prerequisite: MUSC 1120 (or 033.112) or the consent of the Faculty of Music.

MUSC 2112 Jazz Theory 1 Cr.Hrs. 3
This course is designed to develop fluency in the writing and recognition of the elements of jazz: melodic and harmonic intervals, modes and scales, rhythm and meter, harmonic structure, and the principles of melodic and homophonic design. Prerequisite: MUSC 1120 (or 033.112) or consent of the Faculty of Music.

MUSC 2120 Music Theory 4 Cr.Hrs. 3 (Formerly 033.212) An examination of the diffusion of tonality in instrumental textures through the writing and analysis of chromatic paraphrase, florid counterpoint in two parts and chromatically-extended homophony leading to the Cavatina and ternary form. Prerequisite: MUSC 2110 (or 033.211) or consent of the Faculty of Music.

MUSC 2122 Jazz Theory 2 Cr.Hrs. 3
A continuation of Jazz Theory 1. New topics will include transcription analysis, transposition of lead sheets, modal and substitute harmony. Prerequisite: MUSC 2112 or consent of the Faculty of Music.

MUSC 2180 Ensemble Cr.Hrs. 2
(Formerly 033.218) Participation in University Symphony Orchestra, University Wind Ensemble, Women's Choir, Bison Men's Chorus, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student's background and/or major applied area (placement to be determined by the ensemble committee).

MUSC 2182 Jazz Ensemble 2 Cr.Hrs. 2
Participation in jazz ensemble(s) as assigned by the ensemble committee. Prerequisite: MUSC 1182 or consent of the Faculty of Music.

MUSC 2190 Ensemble Cr.Hrs. 2
(Formerly 033.219) Participation in a Faculty of Music Ensemble other than the one designated as appropriate to the student's background and/or major applied area (to be chosen in consultation with the Faculty of Music).

MUSC 2192 Jazz Improvisation 1 Cr.Hrs. 2
A course designed to give the student practical application of rhythmic devices, rhythmic modes, melodic and harmonic devices, scales, chords, and substitutions in the context of song forms, song fragments, repertoire. The student will be required to keep a journal of melodic devices and original jazz compositions. Prerequisite: MUSC 1120 (or 033.112) or consent of the Faculty of Music.

MUSC 2380 Basic Music Skills 3 Cr.Hrs. 2
(Formerly 033.238) A continuation of MUSC 1390.
MUSC 2390 Basic Music Skills 4 Cr.Hrs. 2
(Formerly 033.239) A continuation of MUSC 2380.
Prerequisite: MUSC 2380 (or 033.238).
MUSC 2400 Major Practical Study Cr.Hrs. 6
(Formerly 033.240) Individual instruction, normally in the area chosen in MUSC 1400 (or 033.140). An important constituent of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 2460 Conducting Cr.Hrs. 3
(Formerly 033.246) The principles and development of baton technique and expressive gestures. Fundamentals of vocal and instrumental score reading, preparation and interpretation. Prerequisites: MUSC 1120 (or 033.112) or equivalent, or consent of the Faculty of Music.

MUSC 2480 Minor Practical Study Cr.Hrs. 3
(Formerly 033.248) Individual instruction in an area other than that selected for MUSC 2400. Normally a continuation of MUSC 1460. Written consent of the director is required to register.

## SECTION 7: Music -3000 Level

MUSC 3050 Research Methods Cr.Hrs. 3
(Formerly 033.305) Techniques of bibliography and expository writing in music. Minor research projects in selected areas; the use of primary and secondary sources.

MUSC 3090 Introduction to Ethnomusicology Cr.Hrs. 3 (Formerly 033.309) A study of style, performance methods and social role of selected non-Western and indigenous Western music, with particular emphasis on native Canadian
music, through readings in field studies and methodology.
MUSC 3100 Opera Repertoire Cr.Hrs. 3
(Formerly 033.310) The nature of the opera, its beginnings and development to modern times.

MUSC 3112 Jazz Composition and Arranging 1 Cr.Hrs. 3 A study of the fundamentals of part writing such as instrumental range and transposition, various styles of unison writing, simple harmonic writing, melodic, harmonic and rhythmic devices along with standard and non-standard song structures. Course will culminate in a recital of student compositions and arrangements. Prerequisite: MUSC 2112 or consent of the Faculty of Music.

MUSC 3130 Music for Children 1 Cr.Hrs. 6
(Formerly 033.313) The philosophy, techniques and materials in Orff-Schulwerk, including practical activities in the areas of Basic Orff, creative movement, recorder, aural skills and choral techniques. Applicants should have a knowledge of music rudiments. Prerequisite: a grade of "C" or better in MUSC 1930 (or 033.193) or equivalent preparation (CC grade 4 theory; RCT grade 2 theory; an introductory Orff-Schulwerk course) or consent of the Faculty of Music.

MUSC 3140 Music for Children 2 Cr.Hrs. 6
(Formerly 033.314) Further study of the Orff-Schulwerk approach to music education, including the areas of Basic Orff, creative movement, recorder, aural skills, improvisation and choral techniques. Prerequisite: a grade of "C+" or better in MUSC 3130 (or 033.313) or equivalent preparation, plus consent of the Faculty of Music.

MUSC 3150 Orchestration Cr.Hrs. 3
(Formerly 033.315) A study of the technical capabilities and tonal characteristics of orchestral instruments, as well as practical scoring and arranging for various groups, from chamber to full orchestra and band. Prerequisite: MUSC 2120 (or 033.212) or consent of the Faculty of Music. Required course for Composition majors.

MUSC 3180 Ensemble Cr.Hrs. 2
(Formerly 033.318) Participation in University Symphony Orchestra, University Wind Ensemble, Women's Choir, Bison Men's Chorus, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student's background and/or major applied area (placement to be determined by ensemble committee).

MUSC 3182 Jazz Ensemble 3 Cr.Hrs. 2
Participation in jazz ensemble(s) as assigned by the ensemble committee. Prerequisite: MUSC 2182 or consent of the Faculty of Music.

MUSC 3190 Ensemble Cr.Hrs. 2
(Formerly 033.319) Participation in a Faculty of Music Ensemble other than the one designated as appropriate to MUSC 3180 (or 033.318) (to be chosen in consultation with the Faculty of Music).

MUSC 3192 Jazz Improvisation 2 Cr.Hrs. 2
A continuation of Jazz Improvisation 1. Rhythmic devices, rhythmic modes, melodic and harmonic devices, scales, chords and substitutions in the context of song form, song fragments, repertoire. The student will be required to keep a journal of melodic devices and original jazz compositions.

Prerequisite MUSC 2192 or consent of the Faculty of Music.
MUSC 3230 Acoustics of Music Cr.Hrs. 3
(Formerly 033.323) A study of the physical basis of music; consideration of the nature of musical sound, tone production of typical musical instruments, scales, and temperaments, and architectural acoustics. Experiments and projects.

MUSC 3270 Performance Skills Cr.Hrs. 3
(Formerly 033.327) For performance majors in the Faculty of Music. Provides training in performance-related skills of the music profession, including such topics as acting, body awareness, self-promotion, career management, master classes, concert organizing, concert promotion and participation.

MUSC 3272 Jazz Performance Skills Cr.Hrs. 3
A course designed to equip the student with the techniques necessary to rehearse, interact and perform effectively with an ensemble in various situations.

MUSC 3300 Composition Study Cr.Hrs. 6
(Formerly 033.330) Individual instruction in composition. For Music students only.

MUSC 3360 Topics in Music Education Cr.Hrs. 3 (Formerly 033.336) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3380 From Rock to Rap and Beyond: A History of Popular Music in the Later 20th Century Cr.Hrs. 3 (Formerly 033.338) A survey of popular music in North America and Britain from the mid-sixties to the present, beginning with the two foremost bands of the British Invasion, the Beatles and Stones, and the development of folk rock and psychedelic rock. Coverage of the seventies consists of a survey of the various genres of mainstream and album oriented rock while coverage of the eighties juxtaposes the superstars of MTV with radical developments in rap/hip hop and punk/new wave. The nineties focuses on the continual mainstreaming of music on the edge of rap, alternative and world beat.

MUSC 3390 From Ragtime to Rock'n'Roll: A History of Popular Music in the 20th Century Cr.Hrs. 3 (Formerly 033.339) A survey of popular music in North America from the ragtime craze and Tin Pan Alley tradition, through the development of blues and country to the emergence of Rhythm and Blues and Rock.n.Roll to the beginnings of the .British Invasion..

MUSC 3442 Jazz Pedagogy 1 Cr.Hrs. 3
A course designed to instruct jazz musicians on procedure and methodology for teaching jazz song form, rhythmic concepts, repertoire and history to K-8 students. Class members will teach and perform with students from the Faculty of Music Preparatory Division.

MUSC 3470 Major Practical Study Cr.Hrs. 6 (Formerly 033.347) Individual instruction, normally in the area chosen in MUSC 2400 (or 033.240). An important constituent of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 3480 Minor Practical Study Cr.Hrs. 3
(Formerly 033.348 ) Individual instruction in an area other than that selected for Major Practical Study. Normally a continuation of MUSC 2480. Written consent from the Faculty of Music is required prior to registration.

MUSC 3550 Recital 1 Cr.Hrs. 3
(Formerly 033.355) Prerequisite: consent of the instructor and the director required.

MUSC 3552 Jazz Recital 1 Cr. Hrs. 6
A performance of works written by the student in Jazz Improvisation and Jazz Compositon and Arranging, along with repertoire from Jazz Ensemble classes.

MUSC 3600 Conducting Cr.Hrs. 3
(Formerly 033.360) Development of the conducting craft including the use of the baton, effective verbal and nonverbal rehearsal skills and practise in score preparation.

MUSC 3620 Independent Study 1 Cr.Hrs. 3
(Formerly 033.362) Individual project designed by the student and a supervising faculty member. This study may be in an academic or applied area. Approval from the Faculty of Music is required.

MUSC 3650 Electroacoustic Music Cr.Hrs. 3 An introduction to electroacoustic music composition with the focus on acousmatic music. The course covers sound aesthetics, historical perspective of electro-acoustic music, repertoire and basic studio techniques such as sound editing, digital signal processing, multi channel techniques and sound mixing.

MUSC $\mathbf{3 6 9 0}$ Percussion Techniques Cr.Hrs. 3 (Formerly 033.369) Class instruction in percussion instruments. Development of basic playing techniques and examination of materials and procedures for individual and group instruction.

MUSC 3730 Early Music Development Cr.Hrs. 3 (Formerly 033.373) Procedures and materials for the development of musicality in children through listening activities, movement, creativity, singing and classroom instruments.

MUSC 3770 Vocal Techniques Cr.Hrs. 3
(Formerly 033.377) Class instruction in vocal technique.
Development of good vocal and choral sound and examination of materials and procedures for individual and group instruction.

MUSC 3780 Woodwind Techniques Cr.Hrs. 3 (Formerly 033.378) Class instruction in woodwind instruments. Development of music playing techniques and examination of materials and procedures for individual and group instruction.

MUSC 3790 Brass Techniques Cr.Hrs. 3
(Formerly 033.379) Class instruction in brass instruments.
Development of basic playing techniques and examination of materials and procedures for individual and group instruction.

MUSC 3800 String Techniques Cr.Hrs. 3
(Formerly 033.380) Class instruction in string instruments. Development of basic playing techniques and examination of
materials and procedures for individual and group instruction.

MUSC 3820 Topics in Music Cr.Hrs. 3
(Formerly 033.382) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3830 Topics in Music Cr.Hrs. 3
(Formerly 033.383) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3840 Topics in Music Cr.Hrs. 3
(Formerly 033.384) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3850 Topics in Music Cr.Hrs. 3 (Formerly 033.385) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3880 Jazz Ensemble Techniques Cr.Hrs. 3 (Formerly 033.388) Procedures for organizing, rehearsing, and directing small and large group jazz ensembles. Study of repertoire and performance materials, with emphasis on personal understanding of jazz improvisation and style. Prerequisite: enrollment in the B.Mus./B.Ed. integrated program or consent of the Faculty of Music.

MUSC 3960 Music of the Twentieth Century 1 Cr.Hrs. 3 (Formerly 033.396) An introduction to music written between 1900 and 1945. Works will be examined from both a compositional/theoretical perspective and in terms of their historical/social/philosophical contexts. Prerequisites: MUSC 2120 (or 033.212) and MUSC 2070 (or 033.207) and MUSC 2080 (or 033.208).

MUSC 3970 Music of the Twentieth Century 2 Cr.Hrs. 3 (Formerly 033.397) A continuation of MUSC 3960, examining works from 1945 to the present. Prerequisites: MUSC 3960 (or 033.396) and MUSC 2120 (or 033.212) or consent of the instructor.

## SECTION 7: Music -4000 Level

MUSC 4010 French Diction and Repertoire Cr.Hrs. 3 (Formerly 033.401) Specialized instruction in French diction, translation and transcription using the International Phonetic Alphabet, with direct application to performance activities in French vocal repertoire. This course will be rotated on a three-year cycle with MUSC 4020 (or 033.402) and MUSC 4030 (or 033.403).

MUSC 4020 Italian Diction and Repertoire Cr.Hrs. 3 (Formerly 033.402) Specialized instruction in Italian diction, translation and transcription using the International Phonetic Alphabet, with direct application to performance activities in Italian vocal repertoire. This course will be rotated on a three-year cycle with MUSC 4010 (or 033.401) and MUSC 4030 (or 033.403).

MUSC 4030 German Diction and Repertoire Cr.Hrs. 3
(Formerly 033.403) Specialized instruction in German diction, translation and transcription using the International

Phonetic Alphabet, with direct application to performance activities in German vocal repertoire. This course will be rotated on a three-year cycle with MUSC 4010 (or 033.401) and MUSC 4020 (or 033.402).

MUSC 4110 Special Area Paper Cr.Hrs. 3
(Formerly 033.411) The student will select a particular area of special interest or significance, work under supervision of a faculty member, and present results in an extended paper. Prerequisites: MUSC 2120 (or 033.212) and MUSC 2070 (or 033.207), or consent of the Faculty of Music.

MUSC 4112 Jazz Composition and Arranging 2 Cr.Hrs. 3 A continuation of Jazz Composition and Arranging 1. The student will write for larger ensembles, including jazz orchestra. Course will culminate in a recital of student compositions and arrangements. Prerequisite: MUSC 3112 or consent of the Faculty of Music.

MUSC 4130 History of Women in Music Cr.Hrs. 3 (Formerly 033.413 ) A study of the female contribution to the art of music from the Middle Ages to the present; emphasis on the changing roles of, and attitudes towards, women as composers and performers.

MUSC 4140 History of Canadian Music Cr.Hrs. 3 A survey of music in Canada from Colonial times to the present, encompassing both folk, popular and classical traditions.

MUSC 4150 Choral Repertoire Cr.Hrs. 3
(Formerly 033.415) A study and examination of choral repertoire suitable for community and church choir.

MUSC 4160 Major Practical Study Cr.Hrs. 3
(Formerly 033.416) Individual instruction, normally in the area chosen in MUSC 3470 (or 033.347). An important constituent of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 4180 Ensemble Cr.Hrs. 2
(Formerly 033.418) Participation in University Symphony Orchestra, University Wind Ensemble, Women's Choir, Bison Men's Chorus, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student's background and/or major applied area (placement to be determined by ensemble committee).

MUSC 4182 Jazz Ensemble 4 Cr.Hrs. 2
Participation in jazz ensemble(s) as assigned by the ensemble committee. Prerequisite: MUSC 3182 or consent of the Faculty of Music.

MUSC 4190 Ensemble Cr.Hrs. 2
(Formerly 033.419) Participation in a Faculty of Music Ensemble other than the one designated as appropriate in MUSC 4180 (or 033.418) (to be chosen in consultation with the Faculty of Music).

MUSC 4192 Jazz Improvisation 3 Cr.Hrs. 2
A continuation of Jazz Improvisation 1 and 2. Rhythmic devices, rhythmic modes, melodic and harmonic devices, scales, intervallic devices, chords, and substitutions in the context of song forms, song fragments, repertoire. The student will be required to keep a journal of melodic devices and original jazz compositions. Prerequisite: MUSC 3192 or
consent of the Faculty of Music.
MUSC 4300 Composition Study Cr.Hrs. 6
(Formerly 033.430) A continuation of MUSC 3300; under the instructor's supervision, the student will compose a major work intended for performance at the conclusion of the course. For Music students only.

MUSC 4330 Advanced Analysis Cr.Hrs. 3
A survey of analytical approaches to tonal and post-tonal music. Aspects of musical structure, perception and performance will be explored through readings and the analysis of major works from the core repertoire.
Prerequisite: MUSC 2120 or consent of the Faculty of Music.
MUSC 4350 Music for Children 3 Cr.Hrs. 6
(Formerly 033.435) Advanced study of the Orff-Schulwerk approach to music education. Prerequisite: a grade of " B " or better in MUSC 3140 (or 033.314), plus consent of the instructor.

MUSC 4360 Wind Repertoire Cr.Hrs. 3
(Formerly 033.436) A selected survey of wind literature from 1500 to the present. Prerequisite: MUSC 4770 (033.477) and MUSC 4780 (033.478), or consent of the Faculty of Music.

MUSC 4370 Wind Conducting Techniques Cr.Hrs. 3 (Formerly 033.437) A study of the psychological, philosophical and practical aspects of conducting wind ensembles at all levels. (entry to professional). Prerequisite: MUSC 4770 (033.477) and MUSC 4780 (033.478), or consent of the Faculty of Music.

MUSC 4380 Piano Repertoire Cr.Hrs. 3
(Formerly 033.438) A comprehensive survey of major composers and their compositions for solo Piano. (Required course for piano Performance majors)

MUSC 4390 Piano Chamber Music Literature
Seminar Cr.Hrs. 3
(Formerly 033.439) A selected survey of piano chamber music.

MUSC 4430 Pedagogy and Repertoire Cr.Hrs. 3
(Formerly 033.443) A consideration of approaches to the teaching of style and technique, through an examination of the repertoire for the student's major practical study.

MUSC 4440 Vocal Pedagogy Cr.Hrs. 3
(Formerly 033.444) An exploration of the foundations of the singer's art and craft, including the physical nature of the singing voice, stages of development, and various national, historical and individual pedagogical approaches to the teaching of singing. Required course for voice majors in Performance and General concentrations.

MUSC 4442 Jazz Pedagogy 2 Cr.Hrs. 3
A continuation of Jazz Pedagogy 1, with a focus on high school students. Class members will teach and perform with students from the Faculty of Music Preparatory Division. Prerequisite: MUSC 3442 or consent of the Faculty of Music.

MUSC 4470 Major Practical Study Cr.Hrs. 6
(Formerly 033.447) Individual instruction, normally in the area chosen in MUSC 3470 (or 033.347). An important constituent of the grading procedure for this course is
performance in and attendance at the recitals/concerts of the Faulty of Music. For Music students only.

## MUSC 4480 Minor Practical Study Cr.Hrs. 3

(Formerly 033.448) Individual instruction in an area other than that selected for Major Practical Study. Normally a continuation of MUSC 3480. Written consent of the director is required prior to registration.

MUSC 4490 Piano Pedagogy Cr.Hrs. 3
(Formerly 033.449) An introduction to teaching of styles and techniques through an examination of piano repertoire. (Required course for piano and organ majors in Performance and General Concentrations.)

MUSC 4520 Coaching Skills Cr.Hrs. 3 (Formerly 033.452) Introduction to and training in philosophies and techniques of vocal coaching including both song and operatic repertoire.

MUSC 4530 Operatic Piano Cr.Hrs. 3
(Formerly 033.453) Development of skills required of an operatic pianist, including standard arias, operatic scores, working with conductors and developing an orchestral sound. May include participation in community opera events. (by audition only)

MUSC 4560 Recital 2 Cr.Hrs. 6
(Formerly 033.456) Preparation and performance of a public, full-length graduation recital. The program, which must be approved by the applied instructor and the director, will normally include a major chamber music work.

MUSC 4562 Jazz Recital 2 Cr.Hrs. 6
A performance of works written by the student in Jazz Improvisation and Jazz Composition and Arranging, along with repertoire from Jazz Ensemble classes.

MUSC 4630 20th to 21st Century Piano Repertoire Cr.Hrs. 3 (Formerly 033.463) Piano repertoire from 1900 to the present.

MUSC 4650 Interactive Computer Music Cr.Hrs. 3 An introduction to interactive computer music composition. The course covers different techniques for interaction between performers and a computer. Experiments will be done using major software for live MIDI and audio processing. The course also covers sound synthesis. Possibilities are given to write with either projects involving performers or multi-disciplinary projects (for example, installation including visual elements.

MUSC 4660 Computer Assisted Composition Cr.Hrs. 3 An introduction to Computer Assisted Composition. The course covers a variety of mathematical models for structuring musical parameters, such as probability, iterative functions, spectral pitch organization, rule-based systems and morphological models. Different environments using the Lisp language are used as a base for experiments.

MUSC 4750 Choral Techniques 1 Cr.Hrs. 3
(Formerly 033.475) Procedures for organizing, rehearsing and conducting various types of choral ensembles. Examination of performance materials.

MUSC 4760 Choral Techniques 2 Cr.Hrs. 3 (Formerly 033.476) Continued study in rehearsing and
conducting standard choral ensembles. Study of repertoire and related literature. Prerequisite: MUSC 4750 (or 033.475).

MUSC 4770 Band and Orchestral Techniques 1 Cr.Hrs. 3 (Formerly 033.477) The historical development and present instrumentation of standard instrumental ensembles. Procedures for organizing, rehearsing and conducting bands and orchestras. Examination of performance and instructional materials.

MUSC 4780 Band and Orchestral Techniques 2 Cr.Hrs. 3 (Formerly 033.478) Continued study in rehearsing and conducting standard instrumental ensembles. Study of repertoire and related literature. Prerequisite: MUSC 4770 (or 033.477).

## SECTION 7: Post-Baccalaureate -5000 Level <br> \section*{MUSC 5180 Ensemble Cr.Hrs. 3}

(Formerly 033.518) Participation in a Faculty of Music ensemble as is appropriate to the student's background and/or major applied area. (To be decided by the Major Practical Study Teacher in consultation with the ensemble committee).

MUSC 5400 Major Practical Study Cr.Hrs. 6
(Formerly 033.540) Individual instruction in the instrument area of study at the Post-Baccalaureate level.

## MUSC 5560 Recital Cr.Hrs. 6

(Formerly 033.556) Preparation and performance of a public, full-length recital at the Post-Baccalaureate level. The program, must be approved by the applied instructor and the jury committee judging the recital. It should include an appropriate balance of solo and chamber repertoire.

1.1 Programs
1.2 Available Options
1.3 Professional Designation

SECTION 2: Admission Requirements
2.1 Four-Year Baccalaureate Nursing Program
2.2 Baccalaureate Program for Registered Nurses

SECTION 3: Academic Regulations
3.1 Regulations Applicable to the Four-Year Baccalaureate Nursing Program
3.2 Regulations Applicable to the Baccalaureate Program for Registered Nurses

SECTION 4: Program and Graduation Requirements
4.1 Four-Year Baccalaureate Nursing Program
4.2 Baccalaureate Program for Registered Nurses
4.3 Courses Available to Students in Other Faculties

SECTION 5:
5.1 Four-Year Baccalaureate Nursing Program
5.2 Baccalaureate Program for Registered Nurses

SECTION 1: Degree Programs Offered
1.1 Programs,

| Program/Degree | Years to <br> Complete | Total Credit Hours | Maximum Years to <br> Complete |
| :--- | :--- | :--- | :--- |
| Four-Year Baccalaureate Nursing Program/Bachelor of <br> Nursing | $4^{*}$ | 6 |  |
| Baccalaureate Program for Registered Nurses**/Bachelor <br> of Nursing | 2 | 45 | 5 |

*This includes one year (30 credit hours) of study in University 1.
**This program is designed specifically for active practicing Registered Nurses.

### 1.2 Available Options, <br> Inter-Faculty Option in Aging

a) IDES 2650 /HMEC 2650/REC 2650/SWRK 2650 The Social Aspects of Aging (3 credit hours)
Inter-Faculty Option in Aging courses are offered by the following faculties: Arts; Human Ecology; Nursing; Kinesiology and Recreation Management; and Social Work. To complete the Inter-Faculty Option in Aging, students will complete a total of 18 credit hours including each of the following:

- Required Courses (six credits). See the Registration Guide for the current course number being offered.
b) NURS 2610/KIN 2610 Health and Physical Aspects of Aging (3 credit hours)
- Electives (12 credit hours).
a) At least three credits of professional/discipline-specific applied work on aging within the student's faculty of registration; and
b) An additional nine credit hours in aging electives from the participating faculties. Students can take nine credit hours from their own faculty but are encouraged to select offerings
from other faculties. Lists of eligible elective courses are available from the student advisors.
- The nursing option in aging elective is NURS 2200 Topics in Aging.

Upon completion of these requirements, the "Option in Aging" comment will be recorded on the student's transcript. Information on the Inter-Faculty Option in Aging is available from a student advisor.

### 1.3 Professional Designation,

A graduate of the Four-Year Baccalaureate Nursing Program must write the Canadian Registered Nurse Examination (CRNE) to become eligible to practice nursing. Following successful completion of all courses, the Faculty of Nursing provides the College of Registered Nurses of Manitoba (CRNM) with a letter indicating that the student has completed the program requirements and is a potential graduand. Completion of the program entitles students to apply to work as graduate nurses and to apply to write the CRNE to obtain the designation, Registered Nurse (RN). Approval of the application to write the CRNE will be subject to the graduate's meeting the requirements of the CRNM. Application and registration information can be obtained from the CRNM website at: www.crnm.mb.ca.

## SECTION 2: Admission Requirements

2.1 Four-Year Baccalaureate Nursing Program,

The following is a summary of the admission requirements. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office website at http://www.umanitoba.ca/student/admissions/.

## Courses Completed at Recognized Universities Other Than the U of M

Non-Nursing courses must be assessed as exact equivalents in order to meet the specific course requirements for admission under Option 1 or Option 2. It may not be possible to establish equivalency of courses completed over 10 years prior to application. In those situations, required courses may have to be repeated.

Non-Nursing courses that were completed more than 10 years prior to admission and that have been evaluated by the University of Manitoba can be used in the admission process but will not be considered for transfer credit toward the Nursing degree. Thus, only courses completed within 10 years prior to the date of admission to the Faculty of Nursing will be considered for transfer credit.

All courses (regardless of age) within the most recent 60 credit hours of university level course work will be included in the calculation of AGPA.

The above information also applies to Nursing courses taken at universities other than the U of M; however, Nursing courses will be considered for evaluation and credit only if completed within 5 years prior to application/admission.

See also Section on "Advanced Standing/Transfer Credit".

## Failures in Nursing Courses

Students who fail the same Nursing course twice, prior to applying to the Faculty of Nursing, are ineligible for admission to the Faculty of Nursing.

## Course Requirements for Admission

Students must meet the entrance requirements under Option 1 or Option 2, and complete the University Written English requirement to be eligible for admission (see Note 1). All required courses must be at a 1000 level or higher. "0900" level courses (e.g. ENGL 0930) are not accepted for admission or transfer credit.

The AGPA for admission will be calculated on the most recent 60 credit hours (including repeated courses) of university level course work. If an applicant has less than 60 credit hours, the AGPA will reflect all credit hours completed (i.e.: a minimum of 30 credit hours to a maximum of 60 credit hours).

The minimum AGPA of applicants admitted under Option 2 may be significantly higher than for Option 1 applicants. An AGPA higher than the minimum is recommended as admission may be competitive. Preference will be given to Option 1 applicants. The lowest AGPA accepted in 20112012 was 3.3824 for Option 1, and 3.80 for Option 2.

Note 1: According to University policy, students who have a completed undergraduate degree are exempt from the Written English and math requirements (see appropriate section in Calendar for University policy on written English requirement).

## Option 1

The above general requirements for admission, and:
All applicants must complete a minimum of 30 credit hours in the following identified courses (or their equivalent) with a minimum grade of " C " in each course before entering the Faculty of Nursing. The University Written English requirement must be met. The minimum Adjusted GPA for admission to the Faculty of Nursing under Option 1 is 2.5. The Faculty of Nursing may admit students from Option 1 with a GPA of 2.0-2.49 (in descending AGPA order) when space is available.

BIOL 1410 Anatomy of the Human Body (formerly ZOOL 1320)

BIOL 1412 Physiology of the Human Body (formerly ZOOL 1330)

NURS 1260 Human Growth \& Development
NURS 1280 Introduction to Nursing
MBIO 1220 Essentials of Microbiology (see Note 6)
3 credit hours of Humanities electives (see Note 2)
6 credit hours of Social Science courses (see Note 3)

6 credit hours of courses offered by the Faculty of Science (see Notes 4, 5, and 6)

Note 2: Humanities: English, Philosophy, History, Religion, Languages, Classics, Native Studies, etc. Humanities information is found in the chapter for the Faculty of Arts, Additional Faculty Regulations and Policies section 4.1.1.

Note 3: Select from: Introduction to Psychology PSYC 1200 (6), or Introduction to Sociology SOC 1200 (6), or Human Origins and Antiquity ANTH 1210 (3) and Cultural Anthropology ANTH 1220 (3).

Note 4: With the exception of Geological Sciences (GEOL 1XX0), courses under the Clayton H. Riddell Faculty of Environment, Earth, and Resources do not meet the Science elective requirement if taken in 2003-2004 and later. 1000 level introductory Geological Sciences courses (GEOL 1XX0) now offered under the Clayton H. Riddell Faculty of Environment, Earth, and Resources, will be accepted as Science courses if taken prior to September 1, 2006.

Note 5: BIOL 1110 [Health and Health Professions] may not be used as a Science elective.

Note 6: Science Prerequisites. Students must meet the current Science prerequisites before registration for Science courses. See the chapter for the Faculty of Science for the current prerequisites. It is preferred that the above prerequisites have been completed within the last five years. Math 40S is a prerequisite for Microbiology and Statistics.

## Option 2

The general requirements for admission, and:

All applicants must have completed at least 30 credit hours. The University written English requirement must be met (see Note 1). A minimum adjusted grade point average of 2.5 is required. A minimum grade of $C$ is required in each of the following courses. Completed courses must include:

1000 level English (3 credit hours)

1000 level Science (3 credit hours)

## Applicants from Diploma and Degree Nursing Programs Category

Applicants who have attended but have not completed a nursing diploma or degree program, the completion of which would result in the graduate's eligibility to write the Canadian Registered Nurse Examination (or equivalent) in order to qualify for registration to practice as a Registered Nurse, must meet admission requirements under Option 1 or Option 2 , including the competitive AGPA in the year of application, and provide supplementary information, including the name of the Dean, Director, Head, or Coordinator of the Nursing Program in which the student was previously registered, and who will be contacted by the Faculty of Nursing.

The Admissions Committee reserves the right to deny admission to the University of Manitoba Nursing program based on any of the supplementary information. Applicants who would be eligible to register in third or fourth year courses will be considered for admission only if space is available.

Appeals of decision are limited to the question of procedural regularity only. The merits of the decision are not subject to review.

## Special Consideration Category

The Special Consideration Category will consider applicants from Aboriginal populations of Canada only. Applicants in this category must meet the minimum entrance requirements of Option 1 including a minimum AGPA of 2.5; however, they do not have to meet the competitive grade point average of admitted students in the admission year. Applicants must complete a supplementary application form that is sent by the Admissions Office following submission of the regular application. The Supplementary Application and information are due no later than June 1.

Detailed information is on the Faculty of Nursing website at:
http://umanitoba.ca/faculties/nursing/prospective/undergrad/ special consideration.html

Appeals of decisions are limited to the question of procedural regularity only. The merits of the decision are not subject to review.

## Provisional Admission - Criminal Record, Child Abuse Registry, Immunization and CPR

All successful applicants are admitted provisionally pending compliance with the Criminal Record, Child Abuse Registry, immunization and CPR requirements of the Faculty of Nursing. Failure to meet the requirements by August 1 will result in the offer of admission being revoked. Contact the Faculty of Nursing or
http://umanitoba.ca/faculties/nursing/prospective/media/non acad admission req 2012.pdf for further information about the Non-Academic Admission Requirements.

Applicants are advised to carefully check the recommended start dates in the above document before beginning the process of complying with these admission requirements. Immunization must be started as soon as applicants decide to apply to the program so that the August 1 deadline can be met. Any costs associated with the Non-Academic Admission Requirements are the responsibility of the applicant.

## Criminal Record Search Certificate

Following their provisional admission to the program, applicants must provide a Criminal Record Search Certificate, including Vulnerable Persons Search, by August 1. As it can take up to 120 days to obtain these documents, it is recommended that applicants apply for the Criminal Record Search certificate and Vulnerable Sector Search between March 1 and March 15 in the year of application.

A criminal conviction will not necessarily result in denial of admission to the Faculty of Nursing. However, criminal offences will be reviewed by a sub-committee of the Nursing Admissions Committee for the implications of the conviction in view of the professional mandate to protect the public.
Failure to disclose any criminal record will invalidate an applicant's application and shall result in automatic expulsion from the Faculty of Nursing if the applicant has been admitted.

The College of Registered Nurses of Manitoba (CRNM) also requires that all graduates of an approved nursing education program who wish to practice nursing in this province disclose information about any conviction for an offence under the Criminal Code (Canada). The review process by the Faculty of Nursing is independent of the review process conducted by the CRNM.

## Child Abuse Registry Check

Following their provisional admission to the program, applicants must provide a Child Abuse Registry check by August 1. As it can take up to 120 days to obtain these documents, it is recommended that applicants apply for the Child Abuse Registry check between March 1 and March 15 in the year of application.

Any applicant on the Child Abuse Registry will be denied admission.

## Immunization

A complete immunization record is an admission requirement for the program. Applicants provisionally admitted to the program must meet the August 1 deadline for submission of their immunization record or their offer of admission will be revoked. Detailed information about the Immunization admission requirement can be found in the Non-Academic Admission Requirements document found at http://umanitoba.ca/faculties/nursing/prospective/media/non acad admission req 2012.pdf.

Because it takes a number of months to complete the immunization requirements, it is recommended that all applicants start their immunizations in November prior to application in order to meet the August 1 deadline.

## CPR Certification

CPR certification at the Health Care Provider Level (C) is a requirement for admission to the Faculty of Nursing. Certification should not be obtained before April of the year of admission, as it must be valid for the entire academic year. It must be submitted to the Faculty of Nursing by August 1.

## Advanced Standing/Transfer Credit

Advanced standing will be considered for courses completed at the University of Manitoba.

Nursing courses from any university, including the University of Manitoba, will be considered for advanced standing/transfer credit only if they have been completed within five years prior to admission to the Faculty of Nursing.

Credit for Nursing courses previously completed as a student in the Faculty of Nursing is not given if there has been a lapse of five years or more since last attendance in the program.

Non-Nursing courses completed at other recognized institutions will be considered if completed within the past 10 years.

See also section on "Courses Completed at Recognized Universities other than the University of Manitoba."

## Advanced Placement Option: LPN

Applicants who graduated from the Licensed Practical Nursing (LPN) Program from Assiniboine Community College within five years of admission years prior to admission to the Faculty of Nursing may be eligible for transfer credit. Applicants must meet admission requirements.

## Advanced Placement Option: RPN

Registered Psychiatric Nurses may be eligible for advanced standing in the Four-Year Baccalaureate Nursing Program. Applicants should inform the Faculty of their RPN status

### 2.2 Baccalaureate Program for Registered Nurses,

All admission requirements for applicants who are already Registered Nurses are described in detail in an applicant information bulletin that includes application deadline dates and application forms. This material is available from the
admissions office website at:
http://www.umanitoba.ca/student/admissions/

## Admission Requirements

1) Graduation from an approved diploma of nursing education program;
2) Current active practicing membership in a Canadian provincial or territorial association/college of registered nurses; and
3) A minimum of 1125 hours of nursing experience will normally be required for selection.

The selection of students is based upon academic standing and professional experience. If applications exceed the number of spaces available, the best qualified candidates will be selected.

## Failures in Nursing Courses

Students who fail the same Nursing course twice, prior to applying to the Faculty of Nursing, are ineligible for admission to the Faculty of Nursing.

## Proof of Professional Registration

Active practicing membership must be maintained throughout the program in the Canadian jurisdiction under which the student is a practicing RN. Verification will be obtained annually from the College of Registered Nurses of Manitoba by the Faculty for returning Manitoba students.

Students from outside of Manitoba must submit proof of registration annually from the registering body to the Faculty of Nursing.

After admission and at any time prior to completing the program, students with any changes to their active practicing status with the College of Registered Nurses of Manitoba or other Canadian jurisdiction in which they hold membership, (e.g., conditions placed on a registration or ineligibility for active practicing status), are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Such changes will be reviewed on a case by case basis. Failure to report a change in status may result in disciplinary action.

## Transfer of Credit

University credits earned outside of nursing diploma programs or earned as part of an incomplete degree may be considered for transfer of credit. If a required course in the baccalaureate program was earned as part of a nursing diploma program or as part of another degree, an alternative course must be substituted. Transfer of credit will be considered for university level nursing courses completed within the five years prior to admission. Credit for previous nursing courses is not given if there is a lapse of five years
or more from the last date of attendance in the program or if taken more than five years prior to admission. Credit for nonnursing courses taken at other universities over 10 years prior to admission will not be granted.

Graduates of the Red River College Diploma Nursing Accelerated Program (DNAP) (est. 2000) will receive advanced standing in the Baccalaureate Program for Registered Nurses (BPRN) for the following courses, provided a minimum grade of C+ was achieved in each course for transfer: NURS 3210 Research Methods, NURS 4220 Law and Ethics, and 6 credit hours of non-nursing electives. The Nursing courses must have been completed within five years, and the non-Nursing courses completed within 10 years, prior to admission to the Faculty of Nursing. All remaining courses for the BPRN must be completed at the University of Manitoba in order to meet the residency requirement for the BPRN.

Transfer of Credit for Advanced Certificate Programs

No credit will be given for these certificates in the BPRN.

## SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Nursing has regulations and requirements, published below, that apply specifically to its students.

Following the regulations for all students, please see the regulations that are specific to each program.
3.1 Regulations for the Four-Year Baccalaureate Nursing Program,
Students are obligated to be familiar with all regulations governing their continued progress in the program.

## Security of Academic Records

The University's policies regarding the security of student academic records are found in the chapter, University Policies, of this Calendar.

## Registration Status in the Program

Students admitted to the Program must complete a minimum of 3 credit hours of course work in the Faculty of Nursing in the Fall or Winter term of their admission year.

Students are expected to maintain contact with the program by registering in at least one nursing course during each consecutive Fall and Winter term while they are enrolled in the Program.

Students who wish to interrupt their studies must apply in writing to the Associate Dean, Undergraduate Programs, for a leave of absence.

## Leave of Absence

Students wishing to interrupt their studies must submit a written request for a leave of absence, normally by June 1, to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Later requests may be considered in exceptional circumstances. A leave of absence may normally be granted for a maximum period of one year. Requests for an extension to the leave of absence or for a subsequent leave of absence must be made in writing and will be subject to approval by the Associate Dean, Undergraduate Programs.

In order to return to the Faculty of Nursing, students must submit a written request for reinstatement to the Associate Dean, Undergraduate Programs, no later than May 1 of the year of return. Requests for reinstatement will not normally be considered after May 1. Students who do not apply for reinstatement by May 1 will normally be considered as having left the Nursing program, and will be withdrawn from the Faculty of Nursing.

Decisions made in response to requests for leaves of absence or reinstatement can be appealed to the Faculty of Nursing Admissions Committee.

Leave of absence status does not extend the program time limit outlined in the Faculty of Nursing regulations. To maintain leave of absence status, and not be discontinued from the Faculty of Nursing, students may not attend any other faculty or institution during the period in which the leave of absence is in effect. Students on a leave of absence will be subject to the same Criminal Record and Child Abuse Registry policies as students taking courses and, at the time of requesting a return to studies, will be required to provide a current self-declaration of a criminal record and child abuse registry listing.

Students who attend another faculty or institution while on leave, or who have been withdrawn from the Faculty of Nursing because they were not granted a leave of absence and did not take at least one Nursing course in Fall or Winter term, must re-apply through Admissions should they wish to return.

## Residence Requirements

See the chapter, General Academic Regulations and
Requirements in this Calendar.

## Coursework and Evaluation

- "0900" Level Courses

Credit will not be given for "0900" courses.

- University Mathematics and Written English Requirement

The Written English requirement may be satisfied by a course also chosen to meet the Humanities requirement. Students should refer to theGeneral Academic Regulations and Requirements in this Calendar. The mathematics requirement will be met in Year 2 of Nursing by Statistics STAT 1000.

## - Prerequisite Deficiency

Students who enroll in courses provisionally pending satisfactory completion of pre- or co-requisites must, if unsuccessful, withdraw or amend their registration accordingly. The Faculty of Nursing reserves the right to not send reminders of the requirement to withdraw.

- Challenge for Credit

Students wishing to challenge a course for credit should contact a student advisor.

- Supplemental Examinations or Tests

The Faculty of Nursing does not permit supplemental examinations or tests.

## - Academic Progression

Effective September 2012 for all students:

Students are required to obtain a minimum of "C" grade (2.0) in every course, and a Program GPA of 2.5 in order to graduate. A final grade of "D" in any course taken to complete the degree requirement is considered a failure and is not accepted by the faculty.

Students shall be evaluated at the conclusion of each academic term in which they receive a final grade in a minimum of 6 credit hours of course work, with the assessment being based on the resulting Term Grade Point Average (TGPA) in those courses.

The final term of the Four-Year Baccalaureate Program (NURS 4290) will be excluded from assessment providing the student meets graduation requirements. Students are required to have a minimum Program GPA of 2.5 to be eligible for graduation.

See
http://umanitoba.ca/faculties/nursing/current/undergrad/polici es/assessment policy.html for details and procedures.

## - Good Academic Standing

A student with a TGPA of 2.5 or higher is in Good Academic Standing.

## - Academic Warning

The first time a student's TGPA drops below 2.5, the student will receive an Academic Warning.

## - Academic Probation

The second time that a student's TGPA drops below 2.5, the student will be placed on Academic Probation.

## - Academic Suspension

The third time that a student's TGPA drops below 2.5, the student will be place on Suspension. Students who are suspended shall be ineligible to take any courses at the University of Manitoba or on a letter of permission for a minimum of eight and a maximum of 15 calendar months.

A student may apply for reinstatement on academic probation after the term of suspension has been completed.

## - Required to Withdraw

Students who have been permitted to return from Suspension and whose TGPA drops below 2.5 a fourth time will be Required to Withdraw. Students who are Required to Withdraw are ineligible for re-admission to the Faculty of Nursing.

## - Dean's Honour List

Students who achieve a minimum Term GPA of 3.5, including courses taken on a Letter of Permission, and who are registered for a minimum of 12 credit hours, will be placed on the Dean's Honour list. The Dean's Honour list will be determined after each term of study.

## - Degree with Distinction

Students who obtain a Degree GPA of 3.8 and above based on the last 67 credit hours of course work will be eligible for a Degree with Distinction.

## - Voluntary Withdrawal

Students admitted in September, 2004 and later are allowed only one voluntary withdrawal per nursing course in the Faculty of Nursing.

Students who voluntarily withdraw from a nursing course a subsequent time will have their withdrawal reversed and will be expected to complete the course. Students planning to withdraw from any course are advised to speak with a student advisor regarding the implications of this decision. Any financial implications will be the responsibility of the student.

## - Attendance

Regular attendance at class is expected of all students in all courses. Attendance in on-line courses will be interpreted as regular and consistent participation in the course.
Attendance in the clinical practice/laboratory portions of nursing courses is mandatory to enable the student to satisfy the evaluative criteria of the theoretical and practical components of courses. Students absent from class or practice due to illness may be required to present a certificate of illness. This certificate must be signed by a recognized health care provider. Absence for compassionate reasons is considered on an individual basis. Where absence is involved, make-up time may be required.

A course leader may initiate procedures to debar a student from attending classes and from final examinations and/or from receiving credit where unexcused absences exceed those permitted by faculty regulations.

## - Debarment Policy

A student may be debarred from class, clinical practice, laboratories, and examinations by action of the Associate Dean, Undergraduate Programs for persistent nonattendance, unsafe clinical practice, and/or failure to produce assignments to the satisfaction of the instructor. Once the debarment process has been initiated, the student will not be able to voluntarily withdraw from the course that is presently under investigation. Students so debarred will have failed that course.

## - Failures in Nursing Courses

Students will be permitted to repeat a nursing course only once following a failure. Withdrawal from the program will be required following a second failure in the same nursing course or any two clinical courses. Students who fail a Nursing course twice and are required to withdraw from the Faculty of Nursing are ineligible for re-admission to the Faculty of Nursing.

- Clinical Absence

Four-Year Baccalaureate Nursing Program students returning following one year or more absence from clinical courses must complete a mandatory demonstration of psychomotor skills competency in the skills lab. Competency must be demonstrated prior to clinical attendance. Students should consult with a student advisor for instructions. Testing must be completed prior to July 1.

## - Failures in Clinical Course Rotations

Students who fail a rotation of a clinical course in which there are multiple rotations will be debarred from the course immediately following that rotation and will receive a final grade of "F". These students will not be permitted to voluntarily withdraw from the course following receipt of the failed grade.

- Unsafe Clinical Practice Policy

University of Manitoba

The debarment policy will be invoked when the student demonstrated unsafe clinical practice. Unsafe clinical practice involves actions or behaviours which result in adverse effects or the risk of adverse effects to the health and well-being (psychological or physical) of the client, family, staff, faculty, or other students. Unsafe clinical practice is an occurrence, or a pattern of behaviour involving unacceptable risk.

## Clinical Practice

Students enrolled in nursing courses with clinical practice components may not register for any other course during those designated clinical days. Nursing clinical practice may be scheduled during the morning, afternoon or evening. Weekends are also used for some sections in clinical courses.

All students must be registered in all clinical courses for both terms by the specified deadline. Failure to register by this date may prevent accommodation in a clinical course. Current deadlines are published in the Registration Information on the Faculty of Nursing website.

Transportation costs to clinical practice settings are the responsibility of the student.

Every effort will be made to accommodate eligible students who register for clinical courses during the initial registration period. However, spaces in clinical courses are dependent upon the availability of clinical sites, which are determined by health care agencies and the availability of clinical teachers. Therefore, the Faculty cannot guarantee that all students who registered for the course can be accommodated.

## Clinical Agency Requirements

The Faculty of Nursing has contractual arrangements with the agencies in which students are placed for clinical practice. The contracts set out specific expectations regarding the preparation of students prior to their placement in any clinical site and their fitness to practice.

The Faculty of Nursing assists the student to complete the following requirements and further information about how these requirements are met will be provided during Year 2 orientation or during NURS 0500.

## 1. Personal Health Information Act (PHIA)

PHIA cards are required for clinical practice and will be checked at clinical sites.

## 2. Non-Violent Crisis Intervention Workshop

## 3. Electronic Patient Record Training

The following requirements are the responsibility of the student and must be completed independently, according to deadlines established by the Faculty of Nursing. For newly
admitted students, instructions about how to fulfill these requirements is set out in Section 3.1 Admission Requirements. Information set out below is for returning students only.

## 4. Immunizations

Once admitted to the Faculty of Nursing, students are required to maintain an up-to-date immunization status. Deadlines for completion of required vaccines will be established for individual students as needed. Students should keep a copy of their immunization records and retrieve their immunization records from their files upon graduation

## Penalty for Non-Compliance with Immunization Policy

Returning students, including Joint Baccalaureate Nursing program students from Red River College entering fourth year, who do not comply with the deadlines for completion of their immunizations, will be placed on hold status, which blocks the student from the registration system. Students on hold will be permitted to register in mid-August after all documentation has been received. Students who register in mid-August may not be able to register in some or all of the courses they had originally planned to take, and may experience a delay in completing the program. Hold status also prevents receipt of refunds or histories/transcripts from the Registrar's Office, attending clinical practice and graduation.

## 5. Criminal Record Search Certificate

Some clinical practice sites require that students complete a current or additional Criminal Record Search Certificate prior to the first clinical practice day.

Students charged with or convicted of a criminal offence are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Failure to report a criminal offence may result in dismissal from the program. Criminal offences will be reviewed by the Faculty of Nursing Professional Unsuitability Committee for the implications of the conviction in view of the professional mandate to protect the public.

## 6. Child Abuse Registry

Some clinical practice sites require that students complete a current or additional Child Abuse Registry search check prior to the first clinical practice day.

Students listed on the Child Abuse Registry are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. A listing on the Child Abuse Registry or failure to report the listing will result in dismissal from the program.

## 7. Cardiopulmonary Resuscitation Certification (CPR)

All students are required to obtain certification in CPR at the Health Care Provider Level (C). Returning students, including those certified at the Instructor level, must recertify in April/May each year to ensure that their certification is valid for the entire academic year. Proof of re-certification must be submitted annually by June 1 to the Student Services Assistant or designate.

## Penalty for Non-Compliance with CPR Policy

Returning students, including Joint Baccalaureate Nursing program students from Red River College entering fourth year, who do not comply with the deadlines for submission of the CPR re-certification, will be placed on hold status, which blocks the student from the registration system. Students on hold will be permitted to register in mid-August after all documentation has been received. Students who register in mid-August may not be able to register in some or all of the courses they had originally planned to take, and may experience a delay in completing the program. Hold status also prevents receipt of refunds or histories/transcripts from the Registrar's Office, attending clinical practice and graduation.

## 8. Mask Fit Testing

Mask-fit test cards are required for clinical practice and will be checked at clinical sites.

## Attire for Clinical Practice

All students are required to wear uniforms, name tags and crests during clinical courses unless given specific instructions not to do so by the agency in which they are placed for clinical practice.

## Professional Unsuitability By-Law

The Senate of the University has approved a by-law granting authority to the Faculty to require a student to withdraw for reasons of professional unsuitability. A student may be required to withdraw from the Faculty when, at any time, the Faculty Council, through the Professional Unsuitability ByLaw, believes the student to be unsuited for the profession of nursing, on general considerations of scholarship, professional fitness or professional conduct.

Copies of this by-law may be obtained from the Faculty of Nursing website, umanitoba.ca/nursing. See chapter, General Academic Regulations and Requirements.

## Disciplinary Appeal

Until the final disposition of a disciplinary appeal, students in the Four-Year Baccalaureate Nursing Program will not be permitted to attend clinical practice or the nursing skills laboratory. At the discretion of the Associate Dean, Undergraduate Programs, Faculty of Nursing, students may be granted permission to attend the lecture component only of a nursing course(s) while awaiting a final disposition of an appeal currently in progress.

### 3.2 Regulations for the Baccalaureate Program for

 Registered Nurses,Students are obligated to be familiar with all regulations governing their continued progress in the program.

## Security of Academic Records

The University's policies regarding the security of student academic records are found in the chapter, University Policies, of this Calendar.

## Registration Status in the Program

Students admitted to the BPRN must complete a minimum of 3 credit hours of course work in the first or second term following admission (e.g. students admitted for Winter term must complete 3 credit hours in the Winter or Summer term following admission). Admission will be revoked for students do not complete at least 3 credit hours in their first or second term of study following admission.

Students are expected to maintain contact with the program by registering in at least one nursing course during each consecutive Fall and Winter term while they are enrolled in the Program.

Students who wish to interrupt their studies must apply in writing to the Associate Dean, Undergraduate Programs, for a leave of absence. Refer to section on Leave of Absence for further information.

## Program Planning

Students are expected to meet with a Nursing Student Advisor prior to May 15 to plan their program for the upcoming year. Students who do not meet with the Nursing Student Advisor will be placed on hold status, which blocks the student from the registration system and prevents receipt of refunds or histories/transcripts from the Registrar's Office, and graduation.

## Leave of Absence

BPRN students wishing to interrupt their studies must have completed a minimum of 3 credit hours of course work in the Faculty of Nursing in the Fall or Winter term of their admission year. Students must submit a written leave of absence request to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Leave of absence status does not extend the program time limit outlined in the Faculty of Nursing regulations. To maintain a leave of absence status at the University of Manitoba, students may not attend any other post-secondary institution during the period in which the leave of absence is in effect. See section Transfer of Credit.

## Reinstatement

Students who have withdrawn from the Faculty of Nursing (interrupted their studies without requesting a leave of
absence) must submit a written request for reinstatement to the Associate Dean, Undergraduate Programs. The student advisor will inform the student of the appropriate procedure and advanced standing, if any, that the student may receive. Note: 1) the student who does not attend another faculty or institution and requests, within five years of voluntary withdrawal, to re-enter the Faculty of Nursing will be advised to forward such a request to the Associate Dean, Undergraduate Programs; 2) the student who requests to return to the Faculty of Nursing more than five years after withdrawal must re-apply; 3) the student who has attended another faculty or an institution following withdrawal from Nursing must re-apply. See section 2.1 Advanced Standing/Transfer of Credit. Note that the BPRN must be completed within five years, including time on a leave of absence.

## Residence Requirements

Students are required to complete, with the minimum grade of "C" in each course, at least 32 credit hours of University of Manitoba courses. Of these courses, a minimum of 20 credit hours must be from among those offered by the Faculty of Nursing.

## Course Work and Evaluation

## Supplemental Examinations or Tests

The Faculty of Nursing does not permit supplemental examinations or tests.
" 0900 " Level Courses
Credit will not be given for " 0900 " courses.

## Prerequisite Deficiency

Students who enrol in courses provisionally pending satisfactory completion of pre- or co-requisites must, if unsuccessful, withdraw or amend their registration accordingly. The Faculty of Nursing reserves the right to not send reminders of the requirement to withdraw.

## Challenge for Credit

Students wishing to challenge a course for credit should contact a student advisor.

## Proof of Professional Registration

Verification of registration of returning students will be obtained by the Faculty annually from the College of Registered Nurses of Manitoba. Students not registered with the College of Registered Nurses of Manitoba (CRNM) and continuing in the program must submit proof annually of active practicing status in the Canadian jurisdiction in which they hold membership.

After admission and at any time prior to completing the program, students with any changes to their active practicing status with the CRNM, or other Canadian jurisdiction in which they hold membership (e.g., conditions placed on a registration or ineligibility for active practicing status), are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Such changes will be reviewed on a case by case basis. Failure to report a change in status may result in disciplinary action.

## Academic Progression

Students will be required to obtain a minimum of "C" grade (2.0) in every course, and a minimum Program GPA of 2.5 in order to graduate. A final grade of " $D$ " in any course taken to complete the degree requirement is considered a failure and is not accepted by the faculty.

Students must have a minimum Degree GPA of 2.5 to proceed in the program. For further information, refer to: Academic Probation - Baccalaureate Nursing Program for Registered Nurses.

## Dean's Honour List

Students who achieve a minimum Term GPA of 3.5, including courses taken on a Letter of Permission, and who are registered for a minimum of 12 credit hours, will be placed on the Dean's Honour list. The Dean's Honour list will be determined after each term of study.

## Degree with Distinction

Students who obtain a Degree GPA of 3.8 and above in their program of studies will be eligible for a Degree with Distinction.

## Academic Probation

Students will be assessed after the Winter term upon completion of a minimum of 18 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on probationary status.

Probationary students will be assessed at the end of the Winter term after completion of a minimum of 15 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on academic suspension.

## Academic Suspension

A probationary student who does not achieve the minimum academic standing is required to withdraw from the Faculty of Nursing with the status "academic suspension." While suspended indefinitely, after one year's suspension the student may apply for reinstatement on academic probation.

To request reinstatement following academic suspension, the student should submit a written request before May 1 to the Chair, Student Appeals Committee, Faculty of Nursing.

## Voluntary Withdrawal

Students admitted in September, 2004 and later are allowed only one voluntary withdrawal per nursing course in the Faculty of Nursing.

Students who voluntarily withdraw from a nursing course a subsequent time will have their withdrawal reversed and will be expected to complete the course. Students planning to withdraw from any course are advised to speak with a student advisor regarding the implications of this decision. Any financial implications will be the responsibility of the student.

## Attendance

Regular attendance at class is expected of all students in all courses. Attendance in on-line courses will be interpreted as regular and consistent participation in the course. Attendance in the clinical practice/laboratory portions of nursing courses is mandatory to enable the student to satisfy the evaluative criteria of the theoretical and practical components of courses. Students absent from class or practice due to illness may be required to present a certificate of illness. This certificate must be signed by a recognized health care provider. Absence for compassionate reasons is considered on an individual basis. Where absence is involved, make-up time may be required.

A course leader may initiate procedures to debar a student from attending classes and from final examinations and/or from receiving credit where unexcused absences exceed those permitted by faculty regulations.

## Debarment Policy

A student may be debarred from class, clinical practice, laboratories, and examinations by action of the Associate Dean, Undergraduate Programs for persistent nonattendance, unsafe clinical practice, and/or failure to produce assignments to the satisfaction of the instructor. Once the debarment process has been initiated, the student will not be able to voluntarily withdraw from the course that is presently under investigation. Students so debarred will have failed that course.

## Failures in Nursing Courses

Students will be permitted to repeat a nursing course only once following a failure. Withdrawal from the program will be required following a second failure in the same nursing course. Students who fail the same Nursing course twice and are required to withdraw from the Faculty of Nursing are ineligible for re-admission to the Faculty of Nursing.

## Professional Unsuitability By-Law

The Senate of the University has approved a by-law granting authority to the Faculty to require a student to withdraw for reasons of professional unsuitability. A student may be required to withdraw from the Faculty when, at any time, the

Faculty Council, through the Professional Unsuitability ByLaw, believes the student to be unsuited for the profession of nursing, on general considerations of scholarship, professional fitness or professional conduct.

Copies of this by-law may be obtained from the Faculty of Nursing website, umanitoba.ca/nursing. See chapter, General Academic Regulations and Requirements.

Immunization, CPR, Criminal Record Search Certificate, Child Abuse Registry Check Requirements

## Immunizations

Immunizations are a requirement mandated by the Regional Health Authorities.

Immunization forms are sent to students upon acceptance into the program. Additional forms are available upon request. New students enrolling in the BPRN must provide proof of current immunizations by August 1 for the Fall term, December 1 for the Winter term, and April 15 for the Summer term. See Penalty for Non-Compliance of Immunization and CPR section. Students should keep a copy of their immunization records and retrieve their immunization records from their files upon graduation.

## Cardiopulmonary Resuscitation Certification (CPR)

All students must be certified at the Health Care Provider Level (C). Newly admitted students must submit proof of certification to the Student Services Assistant or designate by August 1 for the Fall term, December 1 for the Winter term, and April 15 for the Summer term. Thereafter, registered nurses are to maintain current certification at the required level.

## Penalty for Non-Compliance of Immunization and CPR

Students who do not comply with the deadlines for proof of current CPR and/or immunizations will be placed on hold status, which blocks the student from the registration system. Students on hold status will be permitted to register after all documentation has been received. Hold status also prevents receipt of refunds or histories/transcripts from the Registrar's Office, attending clinical practice and graduation. Students who register after the initial registration period may not be able to register in some or all of the courses they had originally planned to take, and may experience a delay in completing the program.

## Criminal Record Search/Child Abuse Registry Check

Students are required to hold active registration with the CRNM which further requires a yearly self-declaration of any criminal charges or convictions. In addition, at any time prior to completing the BPRN (regardless of admission date), students charged with, or convicted of, a criminal offence or listed on the Child Abuse Registry are required to report this information to the Associate Dean, Undergraduate
Programs, Faculty of Nursing. Failure to report a criminal
offence may result in dismissal from the program. Criminal offences will be reviewed by the Faculty of Nursing for the implications of the conviction in view of the professional mandate to protect the public. A listing on the Child Abuse Registry or failure to report the listing will result in dismissal. In addition, please note that some clinical practice sites require that students complete a Criminal Record Search and/or a Child Abuse Registry check.

## Name Tags

Students are required to wear a University of Manitoba Faculty of Nursing name tag during clinical/project courses when meeting with patients or clients.

## SECTION 4: Program and Graduation Requirements

### 4.1 Four-Year Baccalaureate Nursing Program Curriculum <br> The program can be done by part-time and full-time study.

All courses from any given year are to be completed before proceeding to the next year.

Course No.

| University 1 | 30 credit hours |  |
| :--- | :--- | ---: |
| BIOL 1410 | Anatomy of the Human Body (see Note 1) | 3 |
| BIIL 1412 | Physiology of the Human Body (see Note 1) | 3 |
| NURS 1260 | Human Growth and Development | 3 |
| NURS 1280 | Introduction to Nursing | 3 |
| MBIO 1220 | Essentials of Microbiology (see Note 1) | 3 |
| PSYC 1200 | Social Science (6 credits - see Note 1) | 6 |
| SOC 1200 | Introduction to Psychology (6) |  |
|  | or |  |
| ANTH 1210 | Introduction to Sociology (6) |  |
|  | or |  |
| ANTH 1220 | Human Origins and Antiquity (3) |  |
|  | and |  |
|  | Cultural Anthropology (3) |  |
|  | Science (6 credits from the Faculty of Science, see Notes 1, 3, 4 \& 5) |  |

Note 1: All courses can be completed in University 1, or an equivalent program, if students do not wish to extend their program of study.
Note 2: Humanities. English, Philosophy, History, Religion, Languages, Classics, Native Studies, etc. Humanities information is found in the chapter for the Faculty of Arts, Additional Faculty Regulations and Policies section 4.1.1. Note 3: Science Prerequisites. Students must meet the current Science prerequisites before registration for Science courses. See the chapter for the Faculty of Science for the current prerequisites. It is preferred that the above prerequisites have been completed within the last five years.
Note 4: With the exception of Geological Sciences (GEOL 1XXO), courses under the Clayton H. Riddell Faculty of Environment, Earth, and Resources do not meet the Science elective requirement if taken in 2003-2004 and later. 1000 level introductory Geological Sciences courses (GEOL 1XX0) now offered under the Clayton H. Riddell Faculty of Environment, will be accepted as Science courses if taken prior to September 1, 2006.
Note 5: The course, BIOL 1110 Health and Health Professions, may not be used as a Science elective. It may, however, be used as an elective from year 4, provided that the level requirements of all electives are met.
Note 6: Six credits of the twelve credits of electives including the Native Studies and the Humanities electives, must be at the 2000 level or above. Students should check for pre-requisites for 2000 and 3000 level Native Studies courses.

Clinical Practicum (12 weeks)
Reminder: It is the responsibility of the student to ensure that degree requirements are met. It is the responsibility of students to ensure all program requirements have been met before working as a graduate nurse and/or writing the qualifying exams to become a Registered Nurse. In order to be eligible to work as a graduate nurse and/or write the Canadian Registered Nurse Examinations, students must meet all program requirements and requirements of the College of Registered Nurses of Manitoba.

## NURS 4290 Clinical Practicum

All other courses in the curriculum must be successfully completed and the grade posted prior to starting NURS 4290.

Any costs incurred in completing this course are the responsibility of the student. Proposals must meet the approval of the Faculty of Nursing and must have academic merit. A student's chosen area for completion of practicum experience must be approved by the Faculty of Nursing. The location of the practicum must meet the approval of the University of Manitoba. The location of the practicum is subject to change in the event approval is not received. There may be organizations which require contractual arrangements with the student and/or University of Manitoba prior to permitting the student to enter into the practicum experience. There is no guarantee the University of Manitoba will enter into such contractual arrangements to permit the student to carry out practice at a particular agency or site. In such cases, the student should be prepared to choose an alternate agency or site.

### 4.1.1 Courses Which May be Used as Electives

Electives are to be taken from Arts, Science, professional faculties or the Inter-Faculty Option in Aging (18 credit hours). (See section 1.2). Of the total credit hours of
electives, at least 6 credit hours must be at the 2000 level or higher. Electives offered by the Faculty of Nursing are:

Course No.
NURS 2200
NURS 3330
Topics in Aging
NURS 3330 Women and Health
NURS $3340 \quad$ Providing Care in a Culturally Diverse Society
NURS $3350 \quad$ Counselling Skills for Nurses
NURS 3400 Men's Health: Concerns, Issues and Myths
These "NURS" courses may be taken as electives only, and are not an alternative
Each course is normally offered every second year.
Inter-Faculty Option in Aging - See Section 1.2

### 4.2 Baccalaureate Program for Registered Nurses

 (BPRN)4.2 Baccalaureate Program for Registered Nurses (BPRN), The Faculty of Nursing BPRN was developed to recognize and value the knowledge and experience of practicing Registered Nurses. The learner-centred, process curriculum is designed to further the capacity of Registered Nurse practice in an ever-changing and increasingly complex health care system.

The curriculum consists of a minimum of 33 credit hours in Nursing, and 12 credit hours from Arts, Science or a professional faculty (for a total of 45 credit hours).

Students may elect full-time or part-time study. A variety of community settings are utilized for clinical experience.

## 

ACADEMIC CALENDAR

Courses may be offered in late afternoons or evenings, during Summer session and through distance education (correspondence) or internet-based study.

Students graduating with the minimum of 45 credit hours of coursework will be considered on an individual basis for admission to the graduate program in Nursing (Master of Nursing). For further information, contact the Faculty of Nursing, 474-7452.

### 4.2.1 Special Student Status in Nursing

Students who are not admitted to the BPRN may be eligible to apply to the Faculty of Nursing as a special student. Once admitted, students may register in University of Manitoba courses. Following are the guidelines for special student status:

- Special Students are allowed to register for a maximum of 15 credit hours.
- Special Students must obtain a minimum of "C" grade in a course in order to transfer credit into the BPRN.
- A nursing course completed as a special student may be accepted subsequently for credit in the BPRN up to five years from the date of completion.

Prior to registering for a nursing course, all special students must obtain written permission from a Faculty of Nursing student advisor and present a photocopy of their current Active Practising Membership with the College of Registered Nurses of Manitoba or other jurisdiction.

Completion of courses as a special student does not guarantee admission into the BPRN. All students must complete the application forms and submit required information by the application deadline for the term in which students are applying, unless otherwise indicated at the time of application.

The Faculty of Nursing will allow Registered Nurses admitted to another faculty at the University of Manitoba or another university to register for a maximum of 15 credit hours of nursing courses prior to being admitted to the Faculty of Nursing. Written permission must be obtained from a student advisor and does not guarantee space in the course.

### 4.2.2 BPRN - Curriculum

Note: Nursing electives may not be offered every year.

| Course No. | Core Courses: | 2 |
| :--- | :--- | :--- |
| NURS 3430 | Seminar in Professional Nursing Foundations (see Note 1) | 3 |
| STAT 1000 | Basic Statistical Analysis 1 |  |

STAT 1000 Basic Statistical Analysis $1 \quad 3$
NURS 3210 Nursing Research Methods 3
NURS 3220 Community Health Nursing 1 (see Notes 4 and 5) 4
NURS 4200 The Teaching-Learning Process in Nursing Practice 3
NURS 4210 Independent Study in Nursing Practice 4
NURS 4220 Law and Ethics in Nursing Practice 3
NURS $4310 \quad$ Nursing Leadership: Issues and Practices 4
Nursing Electives (see Note 2) 10
Non-Nursing Electives (see Note 3)

## Nursing Electives

NURS 3340 Providing Care in a Culturally Diverse Society (3)

10 credit hours of acceptable Nursing electives are to be chosen from the following list - at least one course chosen must be a 4 credit hour course.

NURS 3350 Counselling Skills for Nurses (3)

NURS 3390 Nursing in Rural Environments (4)

NURS 3400 Men's Health: Concerns, Issues and Myths (3)
NURS 2110 Health Assessment of Individuals (3)

NURS 2200 Topics in Aging (3)
NURS 3200 Nursing of Individuals and Families with LongTerm Illness and Disability (4)

NURS 3230 Perspectives on Mental Health Nursing (4)

NURS 3330 Women and Health (3)
NURS 4160 Community Health Nursing 2 (4)

NURS 4250 Palliative Nursing Care (BPRN specific section only) (3)

In addition, the following courses from the Inter-Faculty Option in Aging are acceptable as Nursing electives:

NURS 2610 / KIN 2610 Health and Physical Aspects of Aging (3)

SWRK 2650/ IDES 2650/ HMEC 2650/ REC 2650 The Social Aspects of Aging (3)

## NOTES:

1) NURS 3430 should be taken in the first 12 credit hours of the program. Students who have credit for the previous NURS 3190 may substitute this course for NURS 3430.
2) Nursing electives may be used to customize a student's program. Electives may be used to expand on a number of different areas of nursing or may be used to focus on a particular area of nursing practice.
3) Of the 9 credit hours of non-Nursing electives, no more than 6 credit hours may be at the 1000 (introductory) level. See section 5.4 for suggestions re: Non-Nursing Electives for the BPRN. Students may not take courses for credit for which it is assumed that the content was covered in the diploma nursing program (i.e., Anatomy, Physiology, Microbiology, Pharmacology, Psychology, Sociology, etc.).
4) Graduates of the DNA program at Red River College are required to substitute a 4 credit hour Nursing clinical course for NURS 3220.
5) NURS 3360 and NURS 4300 are no longer offered. Students who have previously completed either course within 5 years prior to admission to the Faculty of Nursing may use NURS 3360 in place of NURS 3220 and/or NURS 4300 as a nursing elective.

### 4.2.3 Clinical Courses and NURS 3200 (Long Term Illness) and NURS 4210 (Independent Study) for the BPRN

Review section 3.1 Regulations for All Students which contains information regarding the Personal Health Information Act (PHIA), immunization and CPR regulations, and other information specific to clinical practice.

A clinical project course (normally designated by the fact that it is a 4 credit hour project based course) involves a heavier workload and time commitment than a 3 credit hour course. For most of these courses, clinical placements/assignments will be arranged between the course leader and student at or prior to the start of a term.

For courses NURS 3200 (Long Term Illness) and NURS 4210 (Independent Study), students must contact the course leader at least three months prior to the start of classes to state their intention to register for these courses and to discuss preference of clinical sites. Placement sites will be arranged as requested by the student on a first-come, firstserved basis according to the availability of the agency. Registration in these courses is restricted to students who have contacted the course leader.

The Independent Study in Nursing is designed to provide the learner with an opportunity to synthesize previous learning while working with a high degree of independence. Under the guidance of a faculty advisor, students explore a topic of their choosing and design learning objectives consistent with the purpose of the course. Students are required to contact the course leader at least 8 weeks prior to the start of the course to select a topic and faculty advisor. The choice of topic, the proposed plan for completion of the Independent Study, and the faculty advisor must all be approved by the Faculty of Nursing.

Information sessions are scheduled, normally in April for the Fall session and in October for the Winter session, to familiarize students with the course. Students should check the Faculty's web page, BPRN section, for announcements about dates and times.

If a practice setting is required as part of the student's learning objectives, the student is responsible for negotiating access to the setting and addressing agency and faculty requirements. Be advised that there may be organizations which require contractual arrangements with the student and/or the University of Manitoba prior to permitting the student to enter the practice setting. These arrangements are subject to approval by the Faculty and require preplanning.

Note: the prerequisite for this course is $\mathbf{3 5}$ credit hours of completed study in the program.

### 4.2.4 Courses Which May be Used as Non-Nursing Electives in the BPRN

Courses may be selected from any faculty or school of the University, subject to faculty/department regulations and subject to the student's meeting any prerequisite requirements. See Note 4 under 4.4 BPRN Curriculum. Some suggestions follow:

Faculty of Arts courses - e.g. anthropology, native studies, psychology, sociology, religion

Faculty of Human Ecology - e.g. human nutritional sciences, family social sciences

Asper School of Business (Management) - e.g. courses in business administration, management, organizational behaviour

Faculty of Kinesiology and Recreation Management

Faculty of Science - e.g. biology, chemistry, computer science, microbiology, zoology

Faculty of Social Work - e.g. courses in social welfare policy, communication skills
4.3 Courses Available to Students in Other Faculties 4.3 Courses Available to Students in Other Faculties, Students registered in faculties other than Nursing may take the following Nursing courses without Faculty permission:

NURS 1260 Human Growth \& Development

NURS 1280 Introduction to Nursing
NURS 2200 Selected Topics in Aging and Health (see note 1)

NURS 3330 Women and Health (see note 1)
NURS 3400 Men's Health: Concerns, Issues and Myths (see note 1)

## NOTES:

1) These courses are not intended for first year students.

## SECTION 5: Nursing - 1000 Level

NURS 1260 Human Growth and Development Cr.Hrs. 3 (Formerly 049.126) Study of the normal growth and development across the lifespan, with consideration of current physiological and psychological knowledge.

NURS 1280 Introduction to Nursing Cr.Hrs. 3 (Formerly 049.128) The student is introduced to the profession of nursing and to some basic concepts relevant to nursing practice, education and research. Past, present and future roles and functions of the nurse will be explored.

## SECTION 5: Nursing - 2000 Level

NURS 2110 Health Assessment of Individuals Cr.Hrs. 3
(Formerly 049.211) The focus is on health assessment of adults including the normal changes which occur in childhood and aging. The course will provide opportunity to learn the health history and physical examination skills essential to health assessment.

NURS 2120 Nursing Health Assessment Cr.Hrs. 4 (Formerly 049.212) This course focuses on the development of nursing theory and skills required to assess and record the physical and psychosocial status of healthy individuals. Age and cultural variations are identified. A basic level of assessment of the family and community will be introduced.

NURS 2130 Nursing Skills Laboratory Cr.Hrs. 2 (Formerly 049.213) Students will learn skills required to assist healthy clients to maintain or improve health. Modifications to the skills required because of age and cultural differences of clients will be identified. Strategies for assisting family care givers to perform selected skills will be incorporated.

NURS 2180 Clinical Nursing Practice I Cr.Hrs. 3 (Formerly 049.218) Students will apply concepts of health promotion and illness prevention to the care of infants, children, adolescents and young adults. The focus is on health related nursing phenomenon and the development of assessment, communication, teaching/facilitative and basic psychomotor skills. Pre or corequisite: NURS 1280 (or 049.128); and NURS 2120 (or 049.212); and NURS 2130 (or 049.213); and NURS 2240.

NURS 2190 Clinical Nursing Practice II Cr.Hrs. 3 (Formerly 049.219) Students will apply concepts of health promotion and illness prevention to the care of healthy and at risk middle aged and elderly adults. The focus is on health risk phenomena and the development of assessment, communication, teaching/facilitative, and basic psychomotor skills. Pre- or corequisite: NURS 1280 (or 049.128); and NURS 2120 (or 049.212); and NURS 2130 (or 049.213); and NURS 2230.

NURS 2200 Selected Topics in Aging and Health Cr.Hrs. 3 (Formerly 049.220) Emphasis will be placed on theory and research related to a current topic in aging and health. Special attention will be directed to integrating concepts and processes of aging. A practicum/field work component will be an integral part of the course. Prerequisite: core courses in the Inter-faculty Option in Aging or permission from the course leader.

NURS 2210 Primary Care Skills: Comprehensive Health Assessment Cr.Hrs. 3
(Formerly 049.221) Students will engage in comprehensive data collection through obtaining a health history and performing a complete physical exam on newborn, pediatric, and adult clients.

NURS 2220 Pharmacology in Nursing Practice Cr.Hrs. 3 (Formerly 049.222) Course introduces students to basic concepts and principles related to pharmcology (pharmacokinetics, pharmacodynamics,
pharmacotherapeutics) and the nurses' role in drug therapy. The major classifications of drugs will be examined along with issues arising from the use of drug therapy in contemporary society. Prerequisites: ZOOL 1320 (or 022.132) and ZOOL 1330 (or 022.133).

NURS $\mathbf{2 2 3 0}$ Health Promotion of Older Adults and their Families Cr.Hrs. 4
Focuses on the aging changes that occur in older adults and the interaction between aging changes and illness and the resultant presentation of symptoms and functional consequences. Health promotion strategies, including health teaching are highlighted to encourage, maintain and enhance independence, based on the older adult's abilities. Selected teaching/learning models, barriers and motivators, and their application to older adults are discussed.

NURS 2240 Health Promotion of Child Bearing \& Child Rearing Families Cr.Hrs. 6
This course provides an overview of health promotion of infants, children, adolescents, and parents within the family context. The focus is on theories, concepts, nursing research, evidence-based nursing practice, and nursing care related to children and families. Prerequisite: ZOOL 1320 (or 022.132), ZOOL 1330 (or 022.133), NURS 1260 (or 049.126 ) and NURS 1280 (or 049.128). Pre or corequisite:

NURS 2120 (or 049.212).
NURS 2610 Health and Physical Aspects of Aging Cr.Hrs. 3 (Formerly 049.261) An introduction to health, well-being and aging. Emphasis on health as multidimensional including physical, social and mental health. Integration of theory and research in examining selected issues related to health and physical aspects of aging. Students may not hold credit for NURS 2610 (or 049.261) and PHED 2610 (or 057.261). (A required Option in Aging course)

## SECTION 5: Nursing - $\mathbf{3 0 0 0}$ Level

NURS 3200 Nursing of Individuals and Families with LongTerm Illness and Disability Cr.Hrs. 4
(Formerly 049.320) Nursing of individuals and families of all age groups who require palliative nursing measures or need assistance in adapting to long-term illness. The learner will participate in planning relevant clinical experiences to meet own learning objectives.

NURS 3210 Nursing Research Methods Cr.Hrs. 3 (Formerly 049.321) This course provides an overview of research strategies in nursing with a focus on the acquisition of concepts in order to appraise critically nursing research. Strongly recommended that students complete STAT 1000 (or 005.100) (formerly STAT 2200 (or 005.220)) prior to NURS 3210 (or 049.321).

NURS 3220 Community Health Nursing I Cr.Hrs. 4 (Formerly 049.322) An analysis of concepts of prevention of disease/dysfunction and promotion of health in community based populations. Focus is on primary and secondary prevention and the promotion of health with identified risk groups. Population groups are assessed for risks to their physical and psychosocial health and current preventive and promotive measures analyzed and critiqued. The impact of macro systems in promoting health are discussed. MNHW NURS 3360 (or 049.336).

NURS 3230 Perspectives on Mental Health Nursing Cr.Hrs. 4 (Formerly 049.323) Emphasis will be placed on the mental health needs of individuals and their families who are experiencing mental health problems and/or mental illness. Diverse perspectives on mental health and illness will be explored. A clinical practicum will provide an opportunity to apply mental health nursing principles in community settings.

NURS 3240 Adult Intensive Care Nursing 1 Cr.Hrs. 4 (Formerly 049.324) Focus is on the knowledge, integration and application of major intensive care nursing concepts and theories. Pre- or corequisite: NURS 3440 (or 049.344), formerly PHGY 3240 (or 090.324).

NURS 3250 Laboratory Practice in Adult Intensive Care Nursing Cr.Hrs. 2
(Formerly 049.325) Laboratory course focusing on the acquisition of selected skills associated with the nursing care of critically ill adult patients. Pre- or corequisite: NURS 3240 (or 049.324); NURS 3440 (or 049.344) or 090.324.

NURS 3260 Clinical Practice in Adult Intensive Care Nursing Cr.Hrs. 3
(Formerly 049.326) Selective clinical experience, in adult intensive care settings, is designed to enable the learner to apply critical care theory. Prerequisites: NURS 3240 (or
049.324), NURS 3250 (or 049.325) and NURS 3440 (or $049.344)$ or 090.324 .

NURS 3280 Nursing Skills Laboratory Cr.Hrs. 2 (Formerly 049.328) This course focuses on the development of clinical nursing skills required to assist ill or dying clients. Modifications to the skills required because of age, cultural differences or client preference are identified.

NURS $\mathbf{3 2 9 0}$ Health Restoration in Nursing Cr.Hrs. 6 (Formerly 049.329) This course focuses on concepts, issues and research related to nursing care of clients across the lifespan in the acute phase of disease. The impact on the family and community will be explored.

NURS 3300 Clinical Nursing Practice III Cr.Hrs. 3 (Formerly 049.330) Students will apply concepts of health restoration to the care of ill clients of all ages and their families in the acute stage of disease. The focus is on illness related phenomena, critical thinking, the development of the care provider and communicator roles, application of research findings and identification of practice issues. Preor corequisite: NURS 3280 (or 049.328); NURS 3290 (or 049.329).

NURS 3310 Health Maintenance in Nursing Cr.Hrs. 6 (Formerly 049.331) This course focuses on concepts, issues and research related to nursing care of individuals across the lifespan who require health maintenance for long term illnesses. The impact on the family and community will be explored.

NURS 3320 Clinical Nursing Practice IV Cr.Hrs. 3 (Formerly 049.332) Students will apply concepts of health maintenance to the care of clients of all ages with long term illness and their families. The focus is on illness related phenomena, analytical thinking, the development of the care provider and communicator roles, application of research findings and identification of practice issues. Pre- or corequisite: NURS 3270 (or 049.327); NURS 3280 (or 049.328); NURS 3310 (or 049.331).

NURS 3330 Women and Health Cr.Hrs. 3
(Formerly 049.333) Introduction to health concepts and issues as they relate to women from a woman's health perspective. Emphasis on enhancing self-care and prevention. Studies the relationship between a woman and the Canadian Health Care System, and appropriate methodology for self-care, vis-a-vis nutrition, reproduction, menarche, menopause, etc. Not to be held for credit with the former 049.423. Caution: This course is not intended for 1st year students.

NURS 3340 Providing Care in a Culturally Diverse Society Cr.Hrs. 3
(Formerly 049.334) This course fosters skills in recognizing and understanding the impact of culture on health related values, beliefs and practices. A culture-general approach is used to develop skills in the provision of nursing care within a culturally diverse society.

NURS 3350 Counselling Skills for Nurses Cr.Hrs. 3 (Formerly 049.335) Builds on the significance of interpersonal skills in nursing practice in health and illness. Examines theoretical basis and practical application of a counselling approach with clients. Students will have the

University of Manitoba
opportunity for experiential learning.
NURS 3360 Assessing the Health of Communities Cr.Hrs. 4 (Formerly 049.336) An analysis of concepts of prevention of disease and dysfunction in aggregate and community-based populations in First Nations Communities. MNHW NURS 3220 (or 049.322).

## NURS 3380 Primary Care Skills: Clinical

Interventions Cr.Hrs. 6
(Formerly 049.338) Acute and chronic health conditions throughout the lifespan, and as identified in First Nations and Inuit Health Branch's "Scope of Practice" will be addressed through lectures, case studies, student presentations, internet technology and independent learning, basic trauma life support and pediatric life support courses.

NURS 3390 Nursing in Rural Environments Cr.Hrs. 4 (Formerly 049.339) Emphasis will be placed on the health needs of residents in a rural environment. The nature of nursing and issues encountered in a rural setting, whether in a health care institution or a community health nursing practice are explored. A clinical practicum is an integral part of the course.

NURS 3400 Men's Health: Concerns, Issues and Myths Cr.Hrs. 3
(Formerly 049.340) An exploration and examination of concerns, issues and myths surrounding men's health and men's health related behaviours. Students will develop a knowledge base for promoting health and preventing illness in men.

## NURS 3430 Seminar in Professional Nursing

Foundations Cr.Hrs. 2
(Formerly 049.343) The study and application of academic skills, nursing informatics and theoretical foundations, designed to assist diploma-prepared registered nurses to successfully transition to university and the Baccalaureate Program for Registered Nurses. MNHW NURS 3190 (or 049.319).

NURS 3440 Principles of Disease Related to Adult Intensive Care Cr.Hrs. 3
(Formerly 049.344) Course focuses on advanced physiology and pathophysiology of the following body systems: cardiovascular, respiratory, neurological, renal and endocrine. May not be held with the former 090.324.

NURS 3450 Introduction to Legal and Ethical Foundations of Nursing Practice Cr.Hrs. 3
This course will examine the legal and ethical foundations that guide nursing practice. The processes of critical analysis and reasoning will be applied to common legal and ethical dilemmas. Not to be held with the former 049.216.

NURS 3584 Unallocated Credit Cr.Hrs. 3
Campus Manitoba course.

## SECTION 5: Nursing -4000 Level

NURS 4160 Community Health Nursing II Cr.Hrs. 4
(Formerly 049.416) Application, integration and synthesis of knowledge and skills in the utilization of the nursing process with families. Development of skills in the process of change with families. Orientation to the concept of prevention and
health promotion as focal concepts in the practice of nursing with families in communities. Pre- or corequisite: NURS 3220 (or 049.322). MNHW NURS 4300 (or 049.430).

NURS 4170 Issues and Trends in Nursing and Health Care Cr.Hrs. 3
(Formerly 049.417) Study of the forces shaping nursing education, service and research and analysis of current issues in nursing and health care. The learner will develop awareness of professional nursing roles and responsibilities.

NURS 4190 Leadership in Nursing Practice Cr.Hrs. 3 (Formerly 049.419) Focuses on selected theories of leadership and management. Effective interpersonal behaviour in health care organizations will be examined. The learner will explore own potential to effect change in the health care system.

NURS 4200 The Teaching-Learning Process in Nursing Practice Cr.Hrs. 3
(Formerly 049.420) Focuses on theories and models of teaching and learning. Principles and strategies for assessing the health/illness learning needs of individuals, groups and communities and for planning, implementing and monitoring the process in nursing situations will be examined. The nursing research base for the process will be explored. Linkages with related nursing concepts will also be demonstrated.

NURS 4210 Independent Study in Nursing Cr.Hrs. 4 (Formerly 049.421) The learner will have an opportunity to formulate a learning contract to explore, in depth, an area of nursing. This learning contract is to include a major emphasis on the theoretical basis of the selected topic. Prerequisite: 35 credit hours of completed study in the program.

NURS 4220 Law and Ethics in Nursing Practice Cr.Hrs. 3 (Formerly 049.422) A study of the legal and philosophical bases of the nursing profession and the legal and bioethical issues confronting the professional nurse primarily in the practice setting. A major goal of the course is to draw upon material specific to the professional nurse.

NURS 4240 Health Promotion in the Community Cr.Hrs. 4 (Formerly 049.424) This course will provide the opportunity to examine concepts, theories, research and nursing roles as they apply to the promotion of health in communities. Relevant theories and research about group process will be incorporated in the analysis of community health issues.

NURS 4250 Palliative Nursing Care Cr.Hrs. 3 (Formerly 049.425) This course focuses on concepts, issues, research and skills related to the nursing care of individuals across the lifespan who are experiencing irreversible loss. The impact on the family and the community will be emphasized.

## NURS 4260 Nursing Care in Mental Health and

Illness Cr.Hrs. 3
(Formerly 049.426) This course deals with the concept of mental health and illness as it applies to individuals across the lifespan. The effect on the individual, the family and the community will be stressed. The student will gain a greater awareness of the self and the therapeutic use of self in the providing of nursing care.

NURS 4270 Clinical Nursing Practice V Cr.Hrs. 4
(Formerly 049.427) Students will apply nursing concepts and relevant theories and research in the care of clients and their families who are experiencing psychological stress and to those who are dying. The focus is on critical thinking, the development of the communicator, advocate and collaborator roles. Co-requisites: NURS 4250 (or 049.425); NURS 4260 (or 049.426).

NURS 4280 Theories in Nursing Practice Cr.Hrs. 3 (Formerly 049.428) This course will enable the student to develop skill in the critical analysis of theories proposed by theorists in nursing and other disciplines. The utility of these theories for nursing practice, education and research will be examined.

NURS 4290 Clinical Practicum Cr.Hrs. 10
(Formerly 049.429) This course enables students to integrate and critically apply concepts, theories and relevant research to an area of practice and a client group of their choice. Care will address all levels of health, reflect application of a focused body of theory, and consider concepts of leadership, research, ethics, family and community care. Prerequisites: all courses in the program.

NURS 4300 Promoting Health of Communities Cr.Hrs. 4 (Formerly 049.430) Theoretical and practical application regarding the promotion of health in First Nations Communities. MNHW NURS 4160 (or 049.416).

NURS 4310 Nursing Leadership: Practice and Issues Cr.Hrs. 4
(Formerly 049.431) The study of the forces shaping nursing leadership and analysis of current issues and trends in nursing and health care. Emphasis will be placed on leadership development within the context of the health care environment now and into the future. MNHW NURS 4170 (or 049.417) or NURS 4190 (or 049.419).

NURS 4420 Health Promotion in the Community Cr.Hrs 3 This course will provide the opportunity to examine concepts, theories, research and nursing roles as they apply to the promotion of health in communities. The focus will be on promoting the health of aggregates and communities. Prerequisite: As a general principle, all courses from any given year are to be completed before proceeding to the next year.

NURS 4430 Clinical Nursing Practice 6 Cr.Hrs. 3 Students will apply relevant concepts, theories, and research in population health promotion, primary health care, and prevention of illness. The focus is on the development of nursing skills to work effectively with aggregates and communities. Prerequisites: NURS 2180 (or 049.218), NURS 2190 (or 049.219), NURS 3300 (or 049.330); and NURS 3320 (or 049.332). Corequisites: NURS 4440 and NURS 4420.

NURS 4440 Prevention of Illness Cr.Hrs. 3
This course focuses on the concepts of risk reduction and the prevention of illness and injury as they are applied to individuals, groups, and populations. The nurse's role in prevention and the early detection of health risks is highlighted. Issues and research relevant to illness and injury prevention are incorporated. Not to be held with the former NURS 2170 (or 049.217). Prerequisites: As a general principle, all courses from any given year are to be

## 

## ACADEMIC CALENDAR

 2012-2013 •University of Manitoba

## Faculty of Pharmacy

Dean: Neal Davies
Associate Dean(s): Lavern Vercaigne, Yuewen Gong
Campus Address/General Office: Apotex Centre, 750
McDermot Avenue
Telephone: (204) 474-9306
Fax: (204) 474-7617
Email Address: pharmacy@umanitoba.ca
Website: http://umanitoba.ca/faculties/pharmacy
Academic Staff: Please refer to the Faculty website for an Academic Staff listing:
http://umanitoba.ca/faculties/pharmacy/staff/academic staff. html

Pharmacists are specialists in drug therapy and provision of pharmaceutical care. This involves not only the traditional function of preparing and dispensing medications but includes designing and monitoring drug therapy plans to optimize patient care. The Faculty of Pharmacy has been educating pharmacists for over one hundred years. It has dynamic faculty members characterized by their teaching expertise, research programs and practice partnerships in the health sciences. Members of the Faculty are internationally recognized through their participation in research and various committees and agencies. Their research is funded through a variety of sources including, CIHR, NSERC, CRC, various other government agencies, and the pharmaceutical industry.

The undergraduate pharmacy program is meant to prepare students for entry-level practice in the profession of pharmacy by providing them with a solid foundation in the basic, pharmaceutical and clinical sciences which is applied to the concept of pharmaceutical care. In addition, the program is designed to provide students with a broad experience in patient care through the nineteen weeks of practical experience in health orientated health care settings and hospital and community pharmacies. The experience is further enhanced with an open elective program in the final year of studies.

| Program/Degree | ${ }^{\star}$ Years to Complete | ${ }^{*}$ Total Credit Hours |
| B.Sc. Pharmacy | 5 | 169 |

*This includes one year (30 credit hours) of study in University 1. The Total Credit Hours for this program increased from 168 to 169 for the 2012-13 academic year.

### 1.2 Professional Designation, Manitoba Pharmaceutical Association

Students who are accepted for admission to the Faculty of Pharmacy and have commenced classes in the Faculty shall, before October 31 in the year in which they are admitted to the Faculty, file an application for registration as a student of the Manitoba Pharmaceutical Association. Application forms are obtainable from The Registrar, Manitoba Pharmaceutical Association, 200 Tache Ave., Winnipeg, Manitoba R2H 1A7; telephone, (204) 233-1411 and are also provided at the orientation session. The necessary documents which must accompany the application are indicated on the form.

Full information on the requirements for licensure in the Province of Manitoba is available from the registrar of the Manitoba Pharmaceutical Association.

## Pharmacy Examining Board of Canada

All applicants for licensure must pass the qualifying examinations of the Pharmacy Examining Board of Canada.
The board requires proof of language proficiency. Applicants who did not attend primary and secondary educational institutions where English or French was the principal language of instruction must provide evidence of successful completion of designated language proficiency tests before sitting for the qualifying examinations.

## SECTION 2: Admission Requirements <br> 2.1 Course Requirements, <br> (University of Manitoba)

Chemistry CHEM 1300 and CHEM 1310
Biology BIOL 1020 and BIOL 1030

Mathematics MATH 1500, or MATH 1510 or MATH 1520

6 credit hours of Arts electives (of which 3 hours satisfy the University Written English requirement): 0900 courses such as ENGL 0940 are NOT acceptable.

9 credit hours of open electives: 0900 courses such as ENGL 0930 are NOT acceptable.

All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin which is available on the University website at: http://umanitoba.ca/student/admissions/application/programs /pharmacy-application.html

### 2.2 Other Requirements, Other requirements

High school prerequisites: Biology 40S, Chemistry 40S, and Pre-Calculus Math 40 (min. 60\%).

Minimum GPA for consideration: 3.5. (Please refer to the Faculty of Pharmacy Applicant Information Bulletin for more details.)

The admission process includes a written critical thinking essay/problem solving exercise.

Selection criteria: 70\% AGPA, 30\% written essay/problem solving exercise. Only students with an essay score of fifteen or more (out of a possible thirty) will be ranked for admission.

## Criminal Record Check/Child Abuse Registry Check

Many health care agencies where Pharmacy students are placed in a health care setting require a criminal record and/or child abuse registry check. As a result all successful applicants to the Faculty of Pharmacy are now required to provide a self-declaration of a Criminal Record and Child Abuse Registry listing following provisional admission, and subsequently a current, official Criminal Record Search and Child Abuse Registry Check. All documents must be submitted to the Faculty of Pharmacy Dean's Office by the first day of classes. Any applicant on the Child Abuse Registry will be denied admission. A criminal conviction will
not necessarily result in denial of admission to the Faculty of Pharmacy. Criminal offences will be reviewed by a subcommittee of the Pharmacy Admissions Committee for the implications of the conviction in view of the professional mandate to protect the public. Failure to disclose any adult criminal record or listing on the Child Abuse Registry will invalidate an application and shall result in automatic expulsion from the Faculty of Pharmacy if the applicant has been admitted. In addition, the Manitoba Pharmaceutical Association requires that all graduates of the Faculty of Pharmacy who wish to obtain a license to practice pharmacy in this province, must disclose information about any conviction for an offence under the Criminal Code (Canada), the Controlled Drugs and Substances Act (Canada), or the Food and Drugs Act (Canada) in order to be considered for eligibility for registration with the Manitoba Pharmaceutical Association. The review process conducted by the Faculty of Pharmacy is independent of the review process conducted by the Manitoba Pharmaceutical Association.

## Immunization

All students enrolled in the Faculty of Pharmacy must be immunized against the following diseases: diphtheria/tetanus, polio, rubella, measles, mumps, chickenpox, Mantoux/Tuberculosis and hepatitis B. The influenza vaccination is recommended but not required. Students admitted to first year Pharmacy will be provided with an Immunization package at the time of acceptance into the Faculty. Students have the option to complete their immunizations with their own healthcare provider or participate in the Bannatyne Immune Status Program on campus. Students will be required to complete their Immunization Record Form by the end of their first year. Students will not be able to attend clinical rotations until all immunization requirements are up-to-date. Students are responsible for updating their immunizations as needed. Completion of the immunization schedule is required for course progression in Pharmacy.

## SECTION 3: Faculty Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Pharmacy has regulations and requirements, published below, that apply specifically to its students.

### 3.1 Scholastic Progress,

For course progression in the Faculty of Pharmacy students must achieve a minimum combined fall and winter term GPA of 2.0, and attain the minimum passing grade of " C " in each course.

A student in any of the first three years of the pharmacy program who records no more than two grades of "D" during the academic year, and who achieves a minimum combined fall and winter term GPA of 2.00, may at the discretion of the of the dean be permitted to apply for a supplementary examination in those courses.

A student in the fourth year of the pharmacy program who records no more than one grade of "D" during the academic year, and who achieves a minimum combined fall and winter term GPA of 2.00, may at the discretion of the of the dean be permitted to apply for a supplementary examination in that course.

Application forms for supplementary examinations are available in the Faculty of Pharmacy Dean's Office, and the examination is subject to a prescribed fee. Supplementary exams will normally take place in the following mid-summer examination session each year.

A student who has failed to record a minimum grade of " C " in more than two courses within years one to three of the pharmacy program, or in more than one course in the fourth year of the pharmacy program, or who records a grade of "F" during the academic year at any stage during their program may not be granted supplementary examinations unless the dean by reason of special circumstances applicable to the student's case otherwise decides.

A candidate who has been allowed to sit for a supplementary examination may not be awarded a grade higher than " $C$ " in that course. Grade calculations for any course following supplementary examination will be inclusive of on-course assessment. Grades achieved following supplementary examination will replace those grades originally recorded on the student's academic record.

A student who fails to achieve a passing grade of " $C$ " in one course, following supplementary examination if that option is offered, and who achieves a minimum combined fall and winter term GPA of 2.00 , will be required to repeat that course and may at the discretion of the dean be required to repeat all, or a number of courses in that year.

A student whose combined fall and winter term GPA falls below 2.0, or who fails to achieve a minimum passing grade of " C " in two courses, following supplementary examination if that option is offered, and whose combined fall and winter term GPA remains above 1.75, will be considered to have failed that year, and will be required to repeat all subjects in the following academic year.

The records of all students who fail a year, and the disposition of the cases, shall be reported to Faculty Council for information, but not for debate. Students who have cause to disagree with the disposition may file an appeal against the decision.

A student who fails more than one year in the program, or who fails the same year twice, shall be required to withdraw from the Pharmacy program.

A student who fails to achieve a passing grade in more than two courses in the academic session, or whose combined fall and winter term GPA falls below 1.75, or who fails to achieve a passing grade in a repeated year, will be required to withdraw from the Pharmacy program.
3.2 Appeals Concerning Scholastic Progress,

Should a student wish to appeal against any decision concerning scholastic progress, the following procedure should be followed:

The problem should be discussed with the Associate Dean (Academic) of Pharmacy, who will supply information about the appeals procedure, academic regulations and related matters.

Students who still wish to proceed with an appeal should consult the office of Student Advocacy for advice and assistance, and a letter of appeal must be sent to the dean within 21 days of receiving notification of the decision. The letter should state the nature of the decision being appealed and the alternative that is being requested.

The Dean will respond in writing to notify the appellant of the date and time the student should attend a meeting of the Faculty Appeals Committee.

The Appeals Committee will comprise: the Dean of the Faculty (or designate) as chair; one senior support staff member as secretary; three members of the full-time faculty appointed by the full-time faculty; a representative of the profession appointed by the Manitoba Pharmaceutical Association; one student member of Faculty Council appointed by the Faculty Council. The chair and senior support staff member are non-voting members.

Appellants have the right to attend the hearing of their appeal and may have a representative to assist them at the appeal hearing. This representative may be the Student Advocate or a fellow student or other full-time member of the university community not receiving payment for appearing, or working for Legal Aid. In addition, if the student wishes, one member of his or her immediate family, and also if desired a lawyer, may be present, but as observers who do not participate. The decision of the Appeals Committee will be conveyed to the student as soon as possible after the hearing.

If the appellant is still dissatisfied they may wish to discuss the issue further with Student Advocacy. Student appellants should not expect a favourable decision when their appeal is based on grounds related to external factors such as employment, sports, or hobbies.

### 3.3 Transfer of Credit Earned Elsewhere,

Pharmacy students transferring credit from any faculty or school in the University of Manitoba or from other universities or colleges will have each course acceptable for transfer noted on the student record with the course classification of "TR" (transfer). The relevance of courses completed to the student's educational objective at the University of Manitoba and the quality of academic achievement as evidenced by the student's grades will be determining factors in assessing acceptability of credits earned elsewhere. No transfer of credit will be given for courses taken ten years or more prior to the application date. No transfer of credit will be permitted for courses where a "D" grade (or its percentage equivalent) has been awarded.

### 3.4 Residence Requirements,

A minimum of two years attendance at the university within the Faculty is required for the Bachelor of Science in Pharmacy, except with the permission of the Faculty.

### 3.5 Attendance at Class,

Regular attendance is required of all students in all courses. Students who are absent from class for a period of three days or more due to illness must present a certificate from a physician to the Dean's Office upon their return. An instructor may initiate procedures to debar a student from attending classes and from final examinations where unexcused absences exceed three continuous sessions. Students must obtain prior approval from the Dean for an absence exceeding one day for reasons other than illness.

### 3.6 Voluntary Withdrawals,

Any student seeking to withdraw from a portion of, or all of their courses must provide written notification to the Dean's Office of the reasons for this request. Re-entry to Pharmacy by students who voluntarily withdraw, will be dependent on the availability of space and external rotation facilities. Any student who has voluntarily withdrawn from a portion of, or all of their courses in Pharmacy on more than one occasion will not be permitted re-entry into the program. Withdrawals for medical or compassionate reasons will not contribute toward this maximum. Students who, for medical reasons, withdraw from the program may not re-register until they have established, through proper medical consultation, their fitness to resume studies.

### 3.7 Deferred Final Examinations,

Students may file an application for a deferred final examination with the Dean for reasons of illness or other disability, or for compassionate reasons, setting out the reasons for the deferral. The application must be filed within seven working days of the end of the examination series in which the examination was scheduled to be written and must be accompanied by a medical certificate or otherwise appropriate documentation certifying the reason for the deferral, the inability of the student to write the examination at the regular scheduled time and, where possible, indicating the period of disability. Based on the evidence provided, the Dean shall decide whether the application is approved. Students who, for medical reasons receive deferred examination privileges for all final examination series may not re-register until they have established, through proper medical consultation, their fitness to resume studies. Any students requesting a deferred examination on the grounds that they are participating in an inter-university, provincial, inter-provincial, national or international scholastic or athletic event shall be granted said deferral, provided an application is filed with the Dean of the Faculty well in advance (normally 20 working days) of the scheduled examination; and that the Dean is satisfied, based on the evidence provided, that the application should be approved and that an appropriate time, and acceptable invigilator is not otherwise available to the student. Any student requesting deferred examination(s) will be required to sign an undertaking that the student has not discussed, reviewed, had access to, or otherwise become aware of the contents of
the deferred examination except as expressly authorized by the instructor or professor for the course in which the deferred examination is being undertaken.

### 3.8 Incompletes,

A student who is unable to complete the term work prescribed in a course may apply to the instructor prior to the end of lectures for consideration of a grade classification of 'Incomplete.' Should an 'incomplete' be granted the student will still be required to write the final examination, if one is scheduled for the course, and a temporary grade of 'IF' will be submitted. In addition to the grade, the recommendation for an 'incomplete' should indicate the reason(s) for consideration being given, a description of the outstanding work to be completed, and the date by which the work must be submitted. If a final grade is not reported by the above maximum extension deadlines, the letter 'l' will be dropped and the grade of ' $F$ ' will remain as awarded, unless where specific circumstances warrant, the Associate Dean (Academic) extends the date by which an Incomplete must be cleared. Instructors must formally request such an extension prior to the elapse of the maximum deadline date. In addition, the Registrar's Office must be notified of the extension.

### 3.9 Dean's Honour List,

Eligible students who achieve a combined fall and winter sessional GPA of 4.0 or higher will be placed on the Dean's Honour List. Eligible students must have completed a minimum of 12.5 credit hours in each of the fall and winter terms. (Exception: Fourth year students must complete a minimum of 10 credit hours during the winter term). The Dean's Honour List designation is not applied until the end of the winter term.

### 3.10 Academic Self-Declaration,

All students accepted into the Faculty of Pharmacy will be required to complete a Self-Declaration of Records Form which declares current or previous academic suspensions and disciplinary actions. The disclosure contained therein must be satisfactory to the Faculty of Pharmacy.

### 3.11 Experiential Training (Structured Practical Experiential Program [SPEP]),

Approved Placement Sites are limited, and the University cannot warrant that it will be able to find sufficient suitable placement sites in convenient locations, in a timely manner or at all. Students are responsible for all costs associated with SPEP, including travel and living expenses where placements are outside Winnipeg.

### 3.12 Academic Honesty,

Many courses in the Faculty of Pharmacy require group projects and students should be aware that these are subject to the same rules regarding academic honesty as individual projects. Because of the unique nature of group work, all members of the group should exercise special care to insure that work completed does not violate academic integrity. Should a violation occur, group members will be held jointly
accountable unless the violation can be attributed to a specified individual, or group of individuals.

In the Faculty of Pharmacy all suspected cases of academic dishonesty will be passed to the Dean's Office for evaluation.

### 3.13 Professional Unsuitability By-Law,

The Senate has approved a by-law granting authority to the Faculty to require a student to withdraw for reasons of professional unsuitability. Copies of this by-law may be obtained from the Faculty of Pharmacy Dean's Office.

### 3.14 Completion of the Bachelor Program,

The maximum time allowable for completion of the Bachelor of Science, Pharmacy degree is seven years. Students must successfully complete all of the course work associated with a year in the program prior to being allowed to register for courses in the next year. In certain cases, the dean may grant exceptions to this requirement.

## SECTION 4: Program and Graduation Requirements <br> 4.1 Student Responsibility,

Students are advised to carefully review the Faculty of Pharmacy chapter of the Undergraduate Calendar to ensure compliance with degree program requirements.

It is the student's responsibility to know all relevant regulations, policies and practices.

Final completion of degree requirements is the responsibility of the student.

The University of Manitoba Registration System is not a degree audit system and the onus is on students to make sure they are selecting courses appropriate to their academic program.

### 4.2 Registration Assistance,

If you have questions or problems with your registration you can contact the Aurora Student Help Line at (204) 474-9420, or call the Faculty of Pharmacy Dean's Office at (204) 4749306.

### 4.3 Course Information by Year, First Year Orientation

A mandatory orientation session will be held on Wednesday, September 5, 2012 for $1^{\text {st }}$ Year Pharmacy Students. More information on the orientation session will be mailed out in July to all $1^{\text {st }}$ year students.

First Year Students

## 

ACADEMIC CALENDAR 2012-2013 •

University of Manitoba

It is important that you register at your initial access time to guarantee that you get space in the required Science courses. All Pharmacy reserved space in Science will only be held until mid August.

When registering for Chemistry \& Microbiology please register in the correct lecture \& lab sections that have been reserved for Pharmacy Students.

Fall Term classes commence on Thursday, September 6, 2012. Attend all lectures/laboratories scheduled for that day.

The courses in the first year of the program are as follows:
Course No. Credit HoursFirst YearCHEM 2210CHEM 2360CHEM 2370PHRM 1000PHRM 1110PHRM 1300PHRM 1430Organic Chemistry 3

| Electives: | Block 1 November 5 - December 21, 2012 |
|  | Block 2 January 7 - February 22, 2013 |
|  | Block 3 February 25 - April 12, 2013 |

The courses in the fourth year of the program are as follows:

## Fourth Year

PHRM $4230 \quad$ Pharmacy Practice Management 4
PHRM 4310 Clinical Pharmacy 3 4
PHRM 4450
PHRM 4470
PHRM 4700
4
Toxicology
3

PHRM 4800
SPEP - 4
Total Credit Hours
Electives Program10

Total Program Credit Hours: 139

NOTES:
Students may not obtain any grade lower than "C" in all required courses.

A decision will be made annually on whether these courses will be taught in first or second term, or both. therapeutics actions of medicinal compounds.

## SECTION 5:

PHRM 1000 Introduction to Pharmacy Cr.Hrs. 1 (Formerly 046.100) This course provides an orientation to Pharmacy and to the application of medicines within the context of today's dynamic medical care system. It has been designed to highlight professionalism early in the Pharmacy curriculum and will provide the opportunity for students to interact with Pharmacy professionals "at the cutting edge" of pharmacy practice.

PHRM 1110 Pharmacy Skills Laboratory Cr.Hrs. 3
This is a multifaceted course using an integrated skills laboratory format to develop essential skills that students require for pharmacy practice. These skills primarily involve communication, problem solving and critical thinking that form the foundation for life-long learning. Exploring ethical principles and professionalism are also essential components of this course.

PHRM 1300 Fundamentals of Pharmaceutics Cr.Hrs. 2 (Formerly 046.130) In a classroom and laboratory setting, this course provides an introduction to the compounding of pharmaceutical products and the physiochemical basis of product formulation. Practical aspects of formulation and an introduction to the dispensing function are also explored.

PHRM 1430 Applied Pathophysiology for Pharmacy Students Cr.Hrs. 3
(Formerly 046.143) A comprehensive theoretical foundation of the phenomena that produce alterations in human physiology function across the lifespan. Course content will prepare the student for subsequent courses related to diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations.

PHRM 1700 Structured Practical Experiential Program 1 Cr.Hrs. 1
(Formerly 046.170) This course is a service-learning experience, providing students the opportunity to work in community-based patient/client-centred settings. This course also includes two half day job shadowing experiential rotations in a variety of pharmacy practice settings (eg. community pharmacy practice, institutional pharmacy practice) under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. It serves to familiarize students with the health care setting and the pharmacist's role. Students will be graded on a pass/fail basis.

PHRM 2100 Pharmacy Skills Lab 2 Cr.Hrs. 3 (Formerly 046.210) This course develops essential skills required for pharmacy practice. Focus is on drug distribution, pharmacy law, communication with "standardized patients" and drug information.

PHRM 2220 Medicinal Chemistry 1 Cr.Hrs. 6
(Formerly 046.222) This course explores the physicochemical aspects of drug structure in absorption, distribution, metabolism, excretion and receptor interaction as they relate to the biochemical, pharmacological, and

PHRM 2270 Pharmaceutics/Biopharmaceutics Cr.Hrs. 6 (Formerly 046.227) This course introduces principles of formulation and good pharmaceutical manufacturing practice, including aspects of product development and assessment, stability testing, and quality control. It also explores the application of dosage forms to clinical situations.

PHRM 2280 Pharmacokinetics Cr.Hrs. 3
(Formerly 046.228) This course introduces principles of pharmacokinetics to predict how drugs will be absorbed, distributed, metabolized and excreted from the body. Practical application of concepts and calculations will be emphasized.

PHRM 2310 Clinical Pharmacy 1 Cr.Hrs. 4
(Formerly 046.231) This course introduces principles of drug therapy to manage uncomplicated disease states. Aspects of drug therapy including efficacy, dosage requirements, adverse effects, compliance, drug interactions, and follow-up monitoring will be emphasized. The course also introduces principles of using "over the counter (OTC)" medications as therapeutic alternatives.

## PHRM 2420 Applied Nutrition for Health Care

## Professionals Cr.Hrs. 3

(Formerly 046.242) The application of the scientific principles underlying nutrient function and dietary requirements to questions of health.

PHRM 2700 Structured Practical Experiential Program

## 2 Cr.Hrs. 2

(Formerly 046.270) This course offers experiential learning in a variety of pharmacy practice settings (eg. community pharmacy practice, institutional pharmacy practice) It consists of 2 one week rotations at the end of the second year of the program. This course builds on skills learned in SPEP 1 and focuses on the practice of drug preparation and distribution, non-prescription medication counseling, and jurisprudent under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. Students will be graded on a pass/fail basis.

PHRM 3100 Pharmacy Skills Lab 3 Cr.Hrs. 2
(Formerly 046.310) The course develops essential skills required for pharmacy practice. The focus is on interaction with patients and other health care professionals and the application of essential knowledge, skills and values required for the provision of pharmaceutical care.

PHRM 3110 Pharmacy Skills Laboratory III Cr.Hrs. 3 (Formerly PHRM 3100, 046.310) The course develops essential skills required for pharmacy practice. The focus is on interaction with patients and other health care professionals and the application of essential knowledge, skills and values required for the provision of pharmaceutical care. May not be held with PHRM 3100 or 046.310.

PHRM 3220 Medicinal Chemistry 2 Cr.Hrs. 3
(Formerly 046.322) This course builds on Medicinal Chemistry 1 , exploring the detailed interactions between drugs and their receptors which give rise to specific

University of Manitoba
biochemical and therapeutic responses.
PHRM 3230 Principles of Professional Practice Cr.Hrs. 2 This course offers the opportunity to explore professionalism, ethics and socio-economic aspects of the health care system. May not be held with PHRM 3210.

PHRM 3310 Clinical Pharmacy 2 Cr.Hrs. 10 (Formerly 046.331) This course builds on principles of drug therapy introduced in Clinical Pharmacy 1. Aspects of providing direct patient care are emphasized to identify, solve and prevent actual or potential drug-related problems. The course also expands knowledge of "Over the Counter (OTC)" medications as therapeutic alternatives and introduces home diagnostic testing

PHRM 3320 Pharmaceutical Analysis Lab Cr.Hrs. 3 (Formerly 046.332) This course offers the opportunity to prepare pharmaceutical dosage forms and perform analytical testing on the products. Qualitative and quantitative instrumental assay techniques are introduced.

PHRM 3430 Natural Products Cr.Hrs. 3
(Formerly 046.343) Medicinal products of natural origin; introduction to systems of complementary medicine. Therapeutic aspects and products are emphasized

PHRM 3500 Clinical Pharmacokinetics Cr.Hrs. 4 (Formerly 046.350) This course explores the practical application of pharmacokinetic concepts, calculations, and patient factors which effect pharmacokinetics in the clinical setting. Emphasis is on selected medications that require closer monitoring to ensure efficacy and patient safety.

PHRM 3520 Principles of Scientific Literature Evaluation Cr.Hrs. 4
Primary literature is critically analyzed. Discussion of how study results impact on treatment strategies are emphasized. May not be held with PHRM 3510.

PHRM 3550 Clinical Pharmacokinetics Cr.Hrs. 3 This course explores the practical application of pharmacokinetic concepts, calculations, and patient factors which effect pharmacokinetics in the clinical setting. Emphasis is on selected medications that require closer monitoring to ensure efficacy and patient safety. may not be held with PHRM 3500 or 046.350.

PHRM 3640 Principles of Biotechnology Cr. Hrs. 3 (Formerly 046.364). Introduction of biotechnology in pharmaceutical science and pharmacy. Students will be introduced to concepts from molecular biology, immunology, biotechnology and pharmacogenomics.

PHRM 3700 Structural Practical Experiential Program 3 Cr.Hrs. 4
(Formerly 046.370) This course offers experiential learning in a variety of pharmacy practice settings (e.g. community pharmacy practice, institutional pharmacy practice) It consists of 2 two week rotations at the end of the third year of the program. This course builds on skills learned in SPEP 1 and SPEP 2 and focuses on the introduction of applying pharmaceutical care to patients under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. Students will be graded on a pass/fail basis.

PHRM 4230 Pharmacy Practice Management Cr.Hrs. 4 (Formerly 046.460) An Introduction to administrative and behavioural sciences as they relate to planning, organization and operation of pharmacy practice and to the control of human and financial resources.

PHRM 4310 Clinical Pharmacy 3 Cr.Hrs. 4
(Formerly 046.444) A problem-based therapeutics course that builds on PHRM 3310. The emphasis is on the provision of pharmaceutical care to enhance students' ability to identify, resolve and prevent drug-related problems in given clinical scenarios.

PHRM 4450 Toxicology Cr.Hrs. 3
(Formerly 046.445) Toxicology of prescription and nonprescription medications and drugs of abuse. The emphasis is on the study of emergency treatments of the overdosed patient. Forensic aspects of common poisonings and drug overdoses are also discussed

PHRM 4470 Current Topics Cr.Hrs. 3
(Formerly 046.447) A discussion of topics of immediate interest to the profession. Subject to satisfactory completion of required projects and presentations. Attendance of $80 \%$ is mandatory. Students will be graded pass/fail.

PHRM 4700 Structural Practical Experiential Program 4 Cr.Hrs. 10
(Formerly 046.461) This course offers experiential learning in a variety of pharmacy practice settings (e.g. community pharmacy practice, institutional pharmacy practice) It consists of 2 six week rotations. This course builds on skills learned in SPEP 1, SPEP 2 and SPEP 3 and focuses on practicing advanced pharmaceutical care and further developing therapeutic and disease knowledge under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. Students will be graded on a pass/fail basis.

PHRM 4800 Cr.Hrs. 10
This program offers students the opportunity to explore areas in research and professional practice that are not part of the required undergraduate courses. Students have the option of applying to conduct projects at sites pre-approved by the Faculty or to propose alternative avenues for selfdirected learning. All project proposals need to obtain final approval from the Faculty of Pharmacy which facilitates students, placement. Assessment will be based on written reports submitted by individual students to the Faculty of Pharmacy. Students will be graded on a pass/fail basis.

## 

## ACADEMIC CALENDAR

2012-2013 b
University of Manitoba

## Faculty of Science

Dean: Mark Whitmore
Associate Dean(s): Peter Graham, Roy Roshko, Michele Piercey-Normore
Campus Address/General Office: 239 Machray Hall
Telephone: (204) 4748256
Fax: (204) 4747618
Email Address: Ask a Science Advisor
Website: umanitoba.ca/science
Academic Staff: For complete listings of the Faculty of Science Academic Staff, please refer to departmental websites

Chapter Content Science
SECTION 1: Degrees and Programs offered by the Faculty of Science
1.1 Degree Programs in the Faculty of Science
1.2 Program Offerings: Honours, Majors, Minors, Options, Concentrations, Themes, and Focus Areas

SECTION 2: Admission to the Faculty of Science
2.1 Direct Entry Admissions Requirements
2.2 From University 1 to Science: Transiting
2.3 Transfer Students
2.4 Second Degree Students
2.5 Special / Visiting Students
2.6 Auditing Students
2.7 Students Returning to Science from an Extended Leave

SECTION 3: Academic Regulations
3.1 Regulations Applicable to all Programs
3.2 B.Sc. General Degree
3.3 B.Sc. Major Degree
3.4 B.Sc. Major Cooperative Option
3.5 B.Sc. Honours Degree and B.C.Sc. Honours
3.6 B.Sc. Honours and B.C.Sc. Honours Cooperative Option
3.7 Minors
3.8 Recognition of Academic Merit (Dean's Honour List, with
Distinction, First Class Honours)
3.9 Awards
3.10 Academic Advising

4.14 Courses offered by other Faculties and Schools acceptable for credit in the Faculty of Science
4.15 Resources for students interested in related fields of study / occupations

## 

## SECTION 1: Degrees and Programs offered by the Faculty of Science

| Degree Offering Name | Minimum Years to <br> Complete | Minimum <br> Required Credit Hours |
| :--- | :---: | :---: |
| Bachelor of Science General Degree - B.Sc. General | 3 | 90 |
| Bachelor of Science Major Degree - B.Sc. Major | 4 | 120 |
| B.Sc. Major Degree - Co-operative Option | $5^{3}$ | 120 |
| Bachelor of Science Double Major Degree | 4 | $120^{2}$ |
| Bachelor of Science Honours Degree - B.Sc. Honours | 4 | $120-129$ |
| B.Sc. Honours Degree - Co-operative Option | $5^{3}$ | 120 |
| Bachelor of Computer Science Honours - B.C.Sc. Honours | 4 | 120 |
| B.C.Sc. Honours Degree - Co-operative Option | $5^{3}$ | 120 |
| Bachelor of Science Double Honours Degree | 4 | $120^{2}$ |

NOTES:

1. This number includes one year ( 24 or more credit hours) of study compled in University One.
2. The actual number of credit hours required to complete the Double Major and Double Honours programs may exceed 120 credit hours and will depend on each specific program, designed in consultation with the departments involved.
3. This number includes a minimym of 12 months paid employment.
1.2 Program Offerings ( Honours, Majors, Minors, Focus Areas)

| Program | Theme / Focus / Concentration / Option | Honours | Major | Co-op | Minor |
| :---: | :---: | :---: | :---: | :---: | :---: |

## SECTION 2: Admission to the Faculty of Science

### 2.1 Direct Entry Admissions Requirements,

1. Manitoba high school graduation with five full credits at the Grade 12 level in courses designate $\mathrm{S}, \mathrm{G}$, or U .
2. A minimum $85 \%$ average over the following, with no less than 60\% in each course:

## a. English 40S

b. Pre-Calculus Mathematics 40S (recommended) or Applied Mathematics 40S; AND,
c. One of Biology 40S, Chemistry 40S, Computer Science 40S, or Physics 40S

### 2.2 Entrance to Science from University 1: Transiting,

 To transit from University 1 to the Faculty of Science a student must have completed a minimum of 24 credit hours of courses and achieved a cumulative grade point average of at least 2.00. If a student has satisfied the minimum requirements for entry to Science, they simply perform the transit function on AURORA Student to enter the Faculty of Science. There are no fees for transiting and there is no application form required. If you need assistance with transiting to Science from University 1, please contact a Faculty of Science Student Advisor. Students who do not meet the aforementioned minimums may still be eligible to enter the Faculty of Science and can ap-peal to be considered for admission to Science on the recommendation of the Dean. For further information please contact a Faculty of Science Student Advisor and/or refer to the Faculty of Science applicant information brochure and the University Admissions website: www.umanitoba.ca/admissions.Students intending to enter a four year Major or Honours program should refer to the program charts in Section 4, Programs and Courses Offered by the Faculty of Science, for courses required for en-try into each program.
Completion of these courses in University 1 will en-sure that a student may complete a four year Major or Honours program in four calendar years.

### 2.3 Transfer Students,

Students who wish to transfer to the Faculty of Science must have completed a minimum of 24 credit hours of postsecondary courses and have achieved a minimum cumulative grade point average of at least 2.00 to be eligible for consideration. Students who do not meet this minimum may appeal to be considered for admission on the recommendation of the Dean. Please see a Science Student Advisor for information. External transfer students with 24 credit hours or more of transfer credit are assessed upon admission to the Faculty of Science.

Students who have completed less than 24 credit hours may be admitted to University 1 or the Division of Extended Education.

Students on academic suspension as a result of work completed at another post-secondary institution will not normally be considered for admission to the University of Manitoba until the suspension has been served.

## Transfer of Credit

External: Please refer to the Admissions website at umanitoba.ca/admissions or the Admissions section at the front of this Calendar. Courses completed at an external institution ten years prior to registration in the Faculty of Science are not considered for transfer credit. Students should contact a Science student advisor regarding departmental transfer credit policies. All courses acceptable to the Faculty of Science must be transferred.

### 2.4 Second Degree Students,

Students possessing a first degree from a recognized university program and who have a minimum Cumulative Grade Point Average of 2.00 (or a 2.30 adjusted grade point average - see applicant information bulletin for details on AGPA) on all previous university work are eligible for admission as Second Degree students.

Second degree requirements may be shortened by up to 60 credit hours, and once admitted to a Second Degree Program, students will be expected to conform to all continuation, residency and graduation requirements as described in Section 3.

Specific information on requirements for a Bachelor of Science degree following the completion of a degree in
another faculty or school, or at another university, is available in the general office.

### 2.5 Special Students, <br> After Degree Special Students

Students who have successfully completed a first degree from a recognized university program with a Cumulative Grade Point Average of 2.00 or better are eligible for admission as Special Students.

### 2.6 Auditing Students,

Students who wish to audit courses must have written permission from the instructor of the desired course before they can register. Auditing students must register in person in the Faculty of Science general office. The Faculty of Arts will prohibit auditors from registering in their courses until after the initial access period for registration.

### 2.7 Returning to Science after an Extended Leave,

Students who have been away from Science for more than a year are blocked from using AURORA STUDENT. They must consult with a Science Student Advisor. If the student has not attended another post-secondary institution, they are eligible to return. The advisor will determine academic progress, registration date and time, and discuss degree plans. Students planning a return to studies are strongly urged to contact an Advisor well in advance of the start of registration. Students who have attended elsewhere since their last registration in Science must normally re-apply for admission and be academically competitive for admission on all of their previous academic work. July 1 is the application deadline for Fall term.

Students who have graduated must re-apply (July 1 for Fall Term - Other deadlines may be found at umanitoba.ca/admissions) and be academically competitive for admission.

## SECTION 3: Academic Regulations

### 3.1 Regulations Applicable to All Programs,

The provisions of the chapters: "General Academic
Regulations and Requirements" and "University Policies" apply to all students. In addition, the Faculty of Science has regulations and requirements published below that apply specifically to its students.

## Repeating a Course

Science students are subject to the University of Manitoba regulations (see General Academic Regulations and Policy, Repeating a Course) and the Faculty of Science degree regulations regarding eligibility to repeat a course.

Repeating a course will not result in the removal of the first attempt and grade in that course from the student's record.

The course will appear on the transcript as many times as it has been repeated. Only the grade from the last attempt will be included in the GPA calculations relating to a student's program of study.

There is a limit on the number of ' $F$ ' grades permitted in any degree.

Students who wish to repeat a course must obtain permission to repeat the course from the Faculty of Science prior to registration.

NOTE: In most cases, professional Faculties and Schools have specific rules governing the way repeated courses are treated in their admission process. Check the applicant information bulletin of the appropriate Faculty or School, or with the Admissions Office (424 University Centre), or with a Science student advisor for information regarding how different professional programs treat repeated courses in determining admission.

## Voluntary Withdrawals

The responsibility for initiating withdrawals rests solely with the student. When eligible to do so, Voluntary Withdrawals must be done through Aurora Student, otherwise withdrawals must be authorized first by the Science general office and then through the Registrar's Office. No withdrawals will be permitted after the deadlines posted in the Academic Schedule.

There is no longer a limit on the number of Voluntary Withdrawal hours a student can accumulate (effective September 2006).

In exceptional circumstances, Authorized Withdrawals may be permitted on presentation of appropriate documentation. See the chapter, General Academic Regulations and Policy, section Voluntary Withdrawal from Programs and Courses or consult a Science student advisor for information.

## Attendance at other Institutions

Students who attend other post-secondary institutions without a Letter of Permission must reapply for admission to the Faculty of Science before the application deadline and be academically competitive for admission. Similarly, students registered in Science here may not be registered at another academic institution at the same time unless they are registered elsewhere on a Letter of Permission. The penalty for unauthorized or undisclosed attendance may be disciplinary withdrawal or academic suspension.

For more information on Letters of Permission, refer to the Registration Information section of this calendar or to the Registrar's Office website at: umanitoba.ca/registrar .

## Academic Dishonesty

Academic dishonesty is intentional cheating, fabrication, impersonation, or plagiarism. It is also knowingly helping or
attempting to help others to be dishonest. Academic dishonesty lowers scholastic quality and defrauds others who will eventually depend on their own knowledge and integrity.

Plagiarism or any other form of cheating on examinations, term tests, or assignments is subject to academic penalty as serious as suspension or expulsion from the faculty or university.

Students who are unsure of what constitutes academic dishonesty should refer to the regulations in General Academic Regulations and Policy, Plagiarism and Cheating, and consult with a Science student advisor or a faculty member. Information about academic penalties for academic dishonesty is available on the Faculty of Science website.

## Academic Suspension

Students cannot accumulate more than 36 credit hours of failures (F grades) in courses acceptable for credit in the Faculty of Science on their academic history, regardless of the origin of the grade (i.e. courses taken while in University 1, courses that are transferred from other programs or other institutions will be included) and regardless of whether the course has been repeated. If the 36 credit hour limit of $F$ grades is exceeded, the student will be placed on Academic Suspension for two calendar years. Students returning from suspension must contact a Science Student Advisor prior to registration. A Science Student Advisor will outline the minimum required academic performance to remain in good academic standing in the Faculty of Science.

## Academic Warning

If your last assessment was "Academic Warning" you must see a Science Student Advisor prior to registration to receive information about your status.

## Required to Withdraw from Major or Honours

If your last assessment was "Required to Withdraw from the Honours or the Major program," you must consult a Science Student Advisor prior to registration. An advisor will review new degree plans, determine eligibility for a desired program, and update any affected university records.

## Students on "Hold"

If a student is on "Hold", they are prevented from any registration transaction (including Voluntary Withdrawals) until you have cleared this status. Contact a Science Student Advisor if you wish to drop a course while on "Hold".

## Term work and Debarment

A student is responsible for the completion of laboratory work, assignments, tests and other class work as prescribed by departments. A student who does not meet term work requirements to the satisfaction of a department will receive a warning to this effect from the department or the general
office. If this warning is ignored, a student may be debarred from the course. Any student debarred from a course receives an automatic grade of " $F$ " in that course.

## Deferred Examinations

Students unable to write a final examination because of illness, disability, or for compassionate reasons, must file an application in the faculty general office for a deferred examination. The application must be filed within seven working days of the last examination in that series. Appropriate documentation must be provided that verifies that the incapacity existed at the time the examination was to be written.

A deferred examination is offered in a manner prescribed by the head of the department concerned. This would normally be written within 30 working days of the last examination in that series. Any other consideration would be determined by the department head.

Students requesting deferred examinations on the grounds that the examinations conflict with vacation or holiday plans shall not be granted deferrals.

A deferred examination is not normally granted to a student who has written the final examination.

Requests for retroactive deferred examinations, deferred examinations that need to be re-deferred, and / or requests where a student is seeking a deferral in a third examination series (i.e. Fall 2008, Winter 2009, Winter 2010 - any course) must be approved by the Faculty of Science Committee on Student Standing. Students must appeal, in writing, to the Committee on Student Standing and provide precise documentation that outlines why a deferral request should be granted in their case.

## Appeals Involving Academic Regulations

The Committee on Student Standing in Science considers appeals from students who request special consideration in respect of rules and regulations governing their programs of study and qualification for graduation.

Appeals should be addressed to: The Secretary, Committee on Student Standing, General Office, Faculty of Science, 239 Machray Hall.

## Appeal for Authorized Withdrawal

Students who have valid and documented reasons for withdrawal, such as medical illness or compassionate circumstances, may be authorized to withdraw without penalty. Requests for authorized withdrawals must be submitted in writing to a Faculty of Science Student Advisor. The Office of Student Advocacy located at 519 University Centre (474-7423, student_advocacy@umanitoba.ca) is available to provide information and assistance.

## Appeal for other Academic Concessions

Students who believe they have grounds for academic concessions based on their personal circumstances should consult with a Science Student Advisor. The Office of Student Advocacy located at 519 University Centre (4747423, student_advocacy@umanitoba.ca) is available to provide information and assistance.

## Laboratory Registration

If a course requires registration in both a lecture and a separate appropriate laboratory section, AURORA STUDENT will not permit you to register in that course unless you register for both.

## Laboratory Exemptions

If you think you are eligible for a laboratory exemption, you must check with the department offering the course to obtain formal consent of this. Once received, deliver the written permission to your faculty or school office, as an override may be required on your academic record. You must register for the laboratory exempt section.

It is your responsibility to ensure that you are eligible for a laboratory exemption. If you register for one of these courses and it is subsequently determined that you are not entitled to exemption, you will be required to register for a laboratory section. If no space remains available in the laboratory, you will be required to withdraw from the course.

## Laboratory release

Certain Chemistry and Microbiology courses require that you check out of the laboratory before you withdraw or change lab sections. It is your responsibility to check with the departmental office prior to making any changes to your laboratory registration. Failure to check out of your laboratory may result in your academic records being placed on HOLD.

### 3.2 B.Sc. General Degree Academic Regulations, B.Sc. (General) - Three Year Degree

The three year General program is intended to provide diversified training in Science. The design of the program is such that a student is exposed to several areas of science at an introductory level together with a requirement for more advanced study in at least two Science areas. These requirements will ensure that a student's program of study will have elements of breadth and depth.

This program is not intended for students who desire to practise in some field of specialization in the Sciences. Students with that intent are recommended to pursue the Honours or the four year Major program. However, the three year General program is flexible enough in most departments to allow a student to choose courses that would facilitate transferring to the four year Major program should that become desirable.

## B.Sc. General Academic Regulations

A student must complete 90 credit hours with passing grades ("D" or better) in each course. A student must obtain a minimum grade point average of 2.00 on the 90 credit hours which constitute the degree to qualify for the degree of Bachelor of Science (General).

There is no limit on the number of courses that can be taken within the B.Sc. (General). Students may not exceed 36 credit hours of failures.

Introductory Level Science courses (24 credit hours): Students must select 6 credit hours from each of 3 areas listed below ( 18 credit hours) in Group A. Additionally, students must select 6 credit hours from any courses listed in Group A and/or Group B.

NOTE: No more than 6 credit hours may be selected from any single subject area for use toward the 24 credit hours of introductory course requirements.

## Group A:

Astronomy: six credit hours chosen from PHYS 1810, PHYS 1820, PHYS 1830

Biology: BIOL 1020 and BIOL 1030

Chemistry: CHEM 1300 and CHEM 1310
Computer Science: COMP 1010 and COMP 1020
Mathematics: six credit hours chosen from MATH 1200, MATH 1300 (or equivalent), MATH 1500, (or equivalent), MATH 1700 (or equivalent), MATH 1690 (6).

Physics: PHYS 1020 or PHYS 1050; and PHYS 1030 or PHYS 1070

Statistics: STAT 1000 and STAT 2000

## Group B:

BIOL 1410, COMP $1012^{2}$, FORS 2000, MATH $1210^{1}$, MBIO 1010, MBIO 1220, STAT $2220^{3}$

Notes:

1. MATH 1210 is intended for Engineering students and may not be held for credit with MATH 1200 or MATH 1300.
2. COMP 1012 is intended for Engineering students and may not be held for credit with COMP 1010.
3. STAT 2220 is intended for Engineering students and may not to be held for credit with STAT 1000

University of Manitoba

Advanced Level Science Courses ( $\mathbf{3 6}$ credit hours): Effective for students entering Science September 2008 or later ${ }^{2}$, to satisfy the advanced level requirements of the 3year General Degree program, eighteen (18) credit hours at the 2000, 3000, and (or) 4000 level must be chosen from each of two of the following Science departments: Biological Sciences, Chemistry, Computer Science, Mathematics, Microbiology, Physics and Astronomy, and (or) Statistics.

Of the 36 credit hours (total) from the advanced areas of study, at least 6 credit hours must be chosen from 3000 or 4000 level courses. Students should note prerequisite requirements for upper level courses when planning their program. Appropriate courses and combinations of courses are detailed in each departmental section. Substitute courses from a department may be taken by obtaining written authorization from the chosen department.

## Biological Sciences Option - Effective Fall Term 2009:

Because of the newly formed Department of Biological Sciences, effective September 2009, students required to complete 36 credit hours of advanced level credit ${ }^{2}$ may elect to choose all 36 credit hours of the advanced level course requirements from the Department of Biological Sciences provided they follow the specified course selections prescribed in the Biological Sciences General Degree chart.

Other Faculty Courses (12 credit hours): a minimum of 12 credit hours must be taken from outside the Faculty of Science, of which at least six credit hours must be from the Faculty of Arts. A maximum of 30 credit hours may be taken from outside the Faculty of Science for use in the General Degree program.

Elective Courses (18 credit hours): 18 credit hours of the B.Sc. General Degree are open electives.

Chemistry Option - Effective Fall Term 2010: The
Department of Chemistry has introduced a 3-year Degree program with a Chemistry Focus. Effective September 2010 students required to complete 36 credit hours of advanced level credit may elect to choose a specific set of introductory courses, plus all 36 credit hours of the advanced level course requirements from the Department of Chemistry provided they follow the specified course selections (introductory and advanced levels) prescribed in section 4.5.3 (Three Year B.Sc. - Chemistry Focus Chart).

## NOTES:

1. Students having difficulty with the interpretation of these regulations or the way in which they are applied, are urged to contact a Science student advisor in the general office. Students are responsible for their own degree progress and completion.
2. Students admitted to the Faculty of Science prior to September 2008 should consult with a Science Student Advisor about degree requirements.

## B.Sc. General Degree Minimum Performance Requirements

To remain in good academic standing a student must maintain a minimum Degree Grade Point Average (DGPA) of 2.00 at each point of assessment after entrance to the Faculty of Science. Assessment will take place after Fall, Winter, and Summer Terms. If a student's DGPA falls below 2.00 at any point of assessment, the student will receive an Academic Warning which will appear on their transcript. The student will remain on Academic Warning until Good Academic Standing is achieved. Students on Academic Warning will be individually advised regarding their status, and of how to improve.

Students cannot accumulate more than 36 credit hours of failures ( $F$ grades) in courses acceptable for credit in the Faculty of Science on their academic history, regardless of the origin of the grade (i.e. courses taken while in University 1, courses that are transferred from other programs or other institutions will be included) and regardless of whether the course has been repeated. If the 36 credit hour limit of $F$ grades is exceeded, the student will be placed on Academic Suspension for two calendar years. Upon completion of the two-year suspension, the student will be permitted to return to Science and start their degree afresh. Upon returning from a $2-Y e a r$ Suspension, students may appeal to transfer up to 30 credit hours of previously completed coursework in which a minimum grade of " $C$ " was achieved.

A student placed on academic suspension is not permitted to register in the Faculty of Science during the term of the suspension. Students wishing to return to the Faculty of Science are required to achieve certain academic standards upon their return. For information regarding these standards, consult a Science Student Advisor.

## B.Sc. General Degree Residence Requirements

There are two ways in which students may fulfill the minimum requirement of credit hours that must be taken at the University of Manitoba: by taking at least 48 credit hours at the University of Manitoba; or by taking at least the final 30 credit hours at the University of Manitoba. The courses used to satisfy the residence requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

### 3.3 B.Sc. Major Degree Academic Regulations, B.Sc. (Major) - Four-Year Degree

The four year Major programs provide in-depth study and enable graduates to function competently in a career in their chosen subject area.

While this program is not intended for students pursuing graduate studies, most programs allow students to do so with a minimum of difficulty.

The four year Major program may be pursued on a part-time basis, although it must be recognized that under those conditions students would require more than four years to complete degree requirements.

## B.Sc. (Major): Academic Regulations

To qualify for the degree Bachelor of Science (Major), a student must complete 120 credit hours or more, with minimum grades of "C" on Major Program Specific courses (as specified by the department), passing grades ("D" or better) on the remaining courses, and a minimum grade point average of 2.00 on the 120 credit hours which contribute to the degree.

Program Specific courses are those identified by the department as being core to the given degree. See the Calendar entry for these departments for clarification.

At least six credit hours must be taken from outside the Faculty of Science. As of the 1999-2000 regular session, students admitted to a Major program must complete six credit hours of courses from the Faculty of Arts. Students in the Major degree programs may take a maximum of 36 credit hours from outside the Faculty of Science.

## B.Sc. (Major): Entrance Requirements

To enter a four year Major program, a student must normally have achieved a minimum grade of " $\mathrm{C}+$ " in at least one introductory course designated by the department(s). In addition, to enter a four year Major program a student shall normally have completed at least 30 credit hours, although a student may enter on the recommendation of the department with only 24 credit hours completed.

Any student who, prior to being admitted to a four year Major program that has completed more than 30 credit hours will be allowed to apply those excess credit hours which meet the specifications of the program to the four year Major program.

Students must attain a Cumulative Grade Point Average of at least 2.00 (DGPA of 2.00 for Second Degree students and Start Afresh students) regardless of the point of entry, and must meet continuation requirements as outlined below.

## B.Sc. (Major): Continuation Requirements

To continue in the program, a student must maintain a Cumulative Grade Point Average of 2.00 (DGPA of 2.00 for Second Degree students and Start Afresh students) at each point of assessment. Students who do not meet this minimum will be required to withdraw from the Major program.

There is no minimum term course load requirement for the Major program.

Failed courses: Any student that exceeds 18 credit hours of failing grades after entering a Major program will be required to withdraw from that program.

A student will be required to repeat those failed courses specified as required courses for the program; however, with
the approval of the department the student may be allowed to substitute a new course for any elective course failed.

Program Approval: The department must approve a student's Major program prior to registration for courses in each session. Students must also obtain departmental approval for any and all revisions to their program.

Major students reverting to the General program must fulfil all academic requirements of that degree.

## B.Sc. (Major): Residence Requirement

To satisfy the Faculty of Science residency requirements, a student must successfully complete at least 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

## B.Sc. Double Major Programs

Students may wish to pursue a Double-Major program in the Faculty of Science. Consultation with, in addition to specific course selection and approval from, the departments involved must occur prior to the commencement of any Double-Major program. Students must also consult with a Faculty of Science Student Advisor prior to the start of any Double-Major program.

### 3.4 B.Sc. (Major) Cooperative Option Academic Regulations,

The Major programs that offer a Cooperative Option are: Biochemistry, Biological Sciences, Biotechnology, Chemistry, Computer Science, Genetics, and Microbiology.

A cooperative education program is an arrangement whereby a student spends alternating periods in university and employment. There are several advantages to cooperative education programs for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses. During an employment period students can also typically earn enough to defray the cost of their university education. The contacts developed with potential employers are also valuable to graduating students.

All regulations governing regular Major programs apply to the Cooperative Option. In addition, the following variations apply:

## Entrance

To enter the Cooperative Option a student must be eligible to enter the Major program offered by the department.

The normal point of entry to a Major Cooperative Option is following the completion of second year in the Faculty of Science.

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option in those departments where the demand for places exceeds the number of places available. In such situations the department reserves the right to determine and select the best qualified applicants.

## Structure and Sequencing

The Cooperative Option consists of both academic terms and employment terms.

Each academic term can be either four months in duration or eight months in duration, as designated by the Major department.

Each employment term can be either four months in duration or eight months in duration, as designated by the Major department.

Each academic term and each employment term will commence in January, May or September.

The sequence of academic terms and employment terms is variable to suit the needs of each department, and is designated by each department.

Students are expected to follow the academic/employment term sequence defined by their department from admission through to graduation.

## Employment Term Requirements

All Cooperative Options will include at least 12 months spent in employment terms with a department-approved employer. Normally, each employment term will be completed with one employer.

Students are required to register in the appropriate employment term course and pay the fee prior to starting their employment term. Cooperative Option students are required to submit three written employment reports on their employment term activities. These reports are due at times designated by the Major department. Each Major department will provide students with instructions regarding the content and format requirements of the employment reports.

Indications of unsatisfactory performance by a student on an employment term will be thoroughly investigated by the Major department. As a result of the investigation, if benefits from further professional training are questionable, the student may be required to withdraw from the Cooperative Option. The student would then be eligible to enter the regular four year Major program or the General program.

While on an employment term, a Cooperative Option student is not permitted to take more than six hours of academic credit, and may not take more than one course at a time.

## Academic Term Requirements

Coursework requirements of the Cooperative Option are equivalent to the coursework requirements of the four year Major program with the exception of the Biological Sciences programs.

Cooperative Option students are expected (but are not required) to maintain a full-time course load while registered for an academic term. The "normal full load"per four-month term is three half courses ( 9 credit hours).

To continue in a four year Major Cooperative Option a student must attain a minimum Degree Grade Point Average of 2.00 at each point of assessment. Departments may designate courses within the four year Major Cooperative Option in which students are required to attain a grade above 'C'. Continuation in a four year Major Cooperative Option is also contingent upon satisfactory performance in employment terms.

A student who does not meet the academic requirements for continuation in a four year Major Cooperative Option will be required to withdraw from it.

A student who receives failing grades in more than 18 credit hours following admission to the four year Major program will be required to withdraw from the Major program.

Four year Major Cooperative Option students who are required to withdraw, or voluntarily revert to an alternative degree program must fulfil all academic requirements of that degree.

### 3.5 Honours Academic Regulations, <br> B.Sc. (Honours) and B.C.Sc. (Honours) - Four Year Degrees

The Honours programs in the Faculty of Science are the most heavily concentrated programs offered. These programs lead most directly to graduate study and are in most cases prescribed extensively by the departments. A student is required to pursue this degree full-time and may be required to achieve higher grade standards than in other degree programs. The programs are regarded as professional training.

Students graduating from the Honours program in Computer Science receive the degree designation Bachelor of Computer Science (Honours), also noted as B.C.Sc. (Honours).

A student electing an Honours program will normally begin Honours work in second year and must meet the entrance requirements set out below. Honours work will consist of three years of study in prescribed courses beyond the first year and will lead to the B.Sc. (Honours) or the B.C.Sc. (Honours).

Students must complete the university written English and Mathematics requirements as described in the chapter, General Academic Regulations and Policy, of this Calendar.

As of the 1999-2000 Regular Session, students admitted to Honours programs must complete six credit hours from the Faculty of Arts. Because many Honours programs in the Faculty of Science do not have room for electives in Years 2, 3 and 4 , these six credit hours, including the three credit hours of written English, should be completed in Year 1.

## Honours Entrance Requirements

To enter an Honours degree program, a student must have completed at least 24 credit hours, have a minimum DGPA of 3.00 , and a grade of "B" or better in at least one introductory course designated by the department(s).

Another way to gain entry to the many Faculty of Science Honours programs is through the Second Year Entry Route. If a student finds himself/herself ineligible to enter a desired Honours program following the completion of 24 or more credit hours, eligibility to enter Honours via the second year entry route can be established by taking a minimum of 18 credit hours over consecutive Fall and Winter Terms (formerly called a Regular Session) with a minimum of 9 credit hours in each term. The 18 credit hours chosen must be applicable to the program the student wishes to enter, and the student must achieve at least a " B " average on those 18 credit hours. If a student chooses to attempt more than 18 credit hours over the consecutive Fall and Winter terms, the best applicable 18 credit hours will be used to calculate whether or not the " B " average has been achieved for the purpose of assessing eligibility for entrance to the Honours program of choice. Note: Students wishing to enter an Honours program using the Second Year Entry Route must also have an overall DGPA of at least 3.00 .

Program Approval: The department must approve a student's Honours program prior to registration for each session. Students must also obtain departmental approval for any and all revisions to their program.

## Honours Continuation Requirements

A minimum Degree Grade Point Average of 3.00 is required at each point of assessment. Certain departments may have more rigorous continuation requirements. Check the specific departmental section for further information.

Students must complete a minimum of 9 credit hours in each Fall and Winter Term (or equivalent for students in the Cooperative option) to remain in Good Academic standing in the Honours program. Students failing to do so will be required to withdraw from the Honours program and may be eligible to pursue the B. Sc. Major program or the B. Sc. General degree program.

Students who do not meet the minimum requirement will be required to withdraw from the Honours program.

Students who accumulate more than 15 credit hours of failed courses after entering the Honours degree program (regardless of the origin of the grade or if the course has been repeated) will be required to withdraw from the program. Students required to withdraw from the Honours
program may be eligible to pursue the B. Sc. Major program or the B. Sc. General degree program.

## Honours Graduation Requirements

To qualify for the degree, Bachelor of Science (Honours), a student must complete a minimum of 120 credit hours or more with a minimum grade of C on all courses contributing to the 120 credit hours that satisfy the program requirements. Additionally, students must have a minimum degree grade point average of 3.00 .

## Honours Residence Requirement

A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

## Withdrawal from Honours

Honours students reverting to an alternate degree program must fulfil all academic requirements of that degree.

## Double Honours Programs

Double Honours programs may be available as specified under departmental headings. Other programs may be arranged in consultation with the departments concerned.
3.6 Honours Cooperative Option Academic Regulations, The Honours programs offering a Cooperative Option are: Biochemistry, Biological Sciences, Biotechnology, Chemistry, Computer Science, Genetics, Microbiology, Joint Computer Science - Mathematics, Joint Computer Science Physics and Astronomy, and the Joint Computer Science Statistics program (Coming Soon!).

A cooperative education program is an arrangement whereby a student spends alternating periods in university and employment. There are several advantages to cooperative education programs for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses. During an employment period students can also typically earn enough to defray the cost of their university education. The contacts developed with potential employers are also valuable to graduating students. The Honours Cooperative Option therefore offers valuable work experience and simultaneously ensures an academic program of Honours calibre.

All regulations governing regular Honours programs apply to the Cooperative Option. In addition, the following variations apply:

Entrance

To enter the Cooperative Option a student must be eligible to enter the Honours program offered by the department.

The normal point of entry to an Honours Cooperative Option is following the completion of second year in the Faculty of Science. Following that point of entry all requirements of the Cooperative Option must normally be completed in no more than four years (48 months).

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option in those departments where the demand for placements exceeds the number of places available. In such situations the department reserves the right to determine and select the best qualified applicants.

## Structure and Sequencing

The Cooperative Option consists of both academic terms and employment terms.

Each academic term can be either four months in duration or eight months in duration, as designated by the Honours department.

Each employment term can be either four months in duration or eight months in duration, as designated by the Honours department.

Each academic term and each employment term will commence in January, May or September.

The sequence of academic terms and employment terms is variable to suit the needs of each department, and is designated by each department.

Students are expected to follow the academic/employment term sequence defined by their department from admission through to graduation.

## Employment Term Requirements

All Cooperative Options will include at least 12 months spent in employment terms with a department-approved employer. Normally, each employment term will be completed with one employer.

Cooperative Option students are required to submit at least three written employment reports on their employment term activities. These reports are due at times designated by the Honours department. Each Honours department will provide students with instructions regarding the content and format requirements of the employment reports.

Indications of unsatisfactory performance by a student on an employment term will be thoroughly investigated by the Honours department. As a result of the investigation, if benefits from further professional training are questionable, the student may be required to withdraw from the Cooperative Option. The student would then be eligible to
enter the regular Honours program, the four year Major program or the General program.

While on an employment term, a Cooperative Option student is not permitted to take more than six hours of academic credit, and may not take more than one course at a time.

## Academic Term Requirements

Coursework requirements of the Cooperative Option are equivalent to the coursework requirements of the Honours program with the exception of the Biochemistry, Genetics and Microbiology programs.

Cooperative Option students must maintain a full-time course load while registered for an academic term. The "normal full load" per four-month term is three half courses (9 credit hours).

To continue in an Honours Cooperative Option a student must attain a Degree Grade Point Average of 3.00 or higher at each point of assessment. A student's performance will be evaluated following each academic term. In addition, the student must meet all individual course prerequisites for further study and departmental continuation and graduation requirements.

Continuation in an Honours Cooperative Option is contingent upon satisfactory performance on Employment Terms.

Honours Cooperative Option students who are required to withdraw or voluntarily revert to an alternative degree program must fulfil all academic requirements of that degree.

### 3.7 Minors: Academic Regulations for Science

 Students,Students in B.Sc. Major and Honours programs may, if they wish, declare and complete a Minor from any department or interdisciplinary program at the University of Manitoba which offers a listed Minor. In the Faculty of Science Minors are listed in the program charts for each department and interdisciplinary program. Other available Minor requirements can be found within the appropriate sections of the departmental/school/faculty offerings. Completion of a Minor in a B.Sc. Major or Honours program is entirely optional. Students may not, however, declare both their Major and Minor from the same department/interdisciplinary program. It should be noted that for Honours students any consideration of completing a Minor should be made early on, due to restricted opportunities in later years of their programs. Completion of a Minor may require that a student take more than the minimum number of credit hours required for graduation. If they wish, students may choose to complete and declare multiple Minors in the four year Major and Honours degree programs.

The Minor is not available to students in the B.Sc. General Degree program.

University of Manitoba

A Minor will normally consist of a minimum of 18 credit hours specified by the department(s) offering the Minor. Courses required in a student's specific Honours or Major degree program are acceptable for use in a chosen Minor, subject to the Faculty of Science regulation stating that students may not declare both their Major and Minor from the same department or interdisciplinary program.

Minors not offered by the Faculty of Science can be selected from the following list. For further information about courses required for the completion of a specific Minor, please refer to the section of the calendar that relates to the chosen area.

Animal Systems, Entomology, Food Science, Plant Biotechnology, Soil Science, Art History, Anthropology, Asian Studies, Canadian Studies, Catholic Studies, Central and East European Studies, Classics, Greek, Latin, Economics, English, Film Studies, Theatre, French, Spanish, Italian, German, Russian, Ukrainian, Polish, History, Icelandic, Labour Studies, Linguistics, Medieval Studies, Native Studies, Native Languages, Near Eastern and Judaic Studies, Philosophy, Political Studies, Psychology, Religion, Sociology, Ukrainian Canadian Heritage Studies, Women's and Gender Studies, Geography, Geological Sciences, Physical Geography, Environmental Science, Environmental Studies, Human Nutrition and Metabolism, Family Social Sciences, Management*, and Music.
*Faculty of Management/Asper School of Business: For entry to the Minor, the prerequisite is a grade of "C" or better in the first 6 hours of Business courses. The Management Minor will consist of any 18 hours of credit in courses offered by the Asper School of Business. Enrolment in this program will be limited to 20 students annually. Students planning to enrol in this minor must consult a Faculty of Science student advisor.

### 3.8 Dean's Honour List, Degree with Distinction, First Class Honours, Dean's Honour List (all programs)

Students enrolled in 12 credit hours or more who achieve a Term Grade Point Average of 3.80 or higher will be placed on the Dean's Honour List. The Dean's Honour List will be calculated after each term.

Degree with Distinction (4-Year Major Degree and 3-Year General Degree)

To obtain a Degree with Distinction a student must achieve a final minimum Degree Grade Point Average of 3.80. The term "Degree with Distinction" will appear on the student's parchment and the student's transcript of marks.

## First Class Honours (Honours Degree Only)

To graduate with First Class Honours the student must achieve a final minimum Degree Grade Point Average of 3.80. The term "First Class Honours" will appear on the student's parchment and on the student's transcript of marks.
3.9 Faculty of Science Academic Awards, Refer to the Faculty of Science Website for information regarding awards available to Faculty of Science Students:
http://umanitoba.ca/faculties/science/about/awards.html

To be eligible for any award granted exclusively on the basis of academic performance, a student must be enrolled in $100 \%$ of a full program as defined by the department.

### 3.10 Academic Advising,

## Contact Information

Science General Office: 239 Machray Hall
Telephone: (204) 4748256
Toll-Free: 1800432 1960, extension 8256
E-mail: science_advisor@umanitoba.ca
Website: www.umanitoba.ca/science
Science Advisor Availability: availability calendar

## Student Responsibility

You must ensure that you are selecting the correct courses that will enable you to satisfy your degree requirements. Specific degree requirements are listed in the program charts found in the departmental/program sections of this chapter. Final completion of specific degree requirements is the student's responsibility. Student Advisors are available to answer any questions regarding a student's academic progress.

AURORA STUDENT will not check degree requirements. You are responsible for knowing the requirements of your degree. Consult with a Science Student Advisor for advice and assistance if you are uncertain about your degree requirements.

AURORA Student will not prevent a student from registering in two (or more) courses that are designated as not to be held for credit with one another. It is the student's responsibility to ensure that they are not registered for courses that are ineligible to be held for credit with one another. Read the carefully. If you are unsure about a course you have selected, check with a Science Advisor prior to the revision deadline. No academic concessions will be granted in this regard.

You cannot add or change a course classification through AURORA STUDENT. Therefore, if you are an undergraduate student and wish to take a course as a Special Student in your degree, as an Auditor, or as a Challenge for Credit, you must add this course in person in the Science General Office within the normal deadlines for such activity.

## General Degree Program

Students in the General program are not required to contact a Science Student Advisor before registration; however, they
are strongly advised to do so. A Science Student Advisor can answer any questions about degree progress and entry to professional faculties that may affect registration.

Students reverting from a Major or Honours program to the General program must consult a Science Student Advisor prior to registration, so that their university records may be changed.

Science Student Advisors may check your degree progress periodically. These checks are completed after registration. Reminder: It is the student's responsibility to know and satisfy all degree requirements.

## Honours, Major, and Cooperative Options

Honours students are required to register in a minimum of 9 credit hours during each Fall and Winter Term. Prior to declaring graduation, Honours, Major, and Co-op students are encouraged to have their programs checked by Student Advisors on a regular basis. However, at the minimum, students must have their program checked and approved by a Science Advisor prior to the start of the term they enter their program and again prior to the term they plan on completing their degree.

Students entering or changing a program must see a Science Student Advisor so that eligibility can be checked and university records updated.

## SECTION 4: Programs and Courses offered by the Faculty of Science

## Course Selection

The courses required to complete the specific Honours, Major, General and Minor programs in Science are listed in the program charts found below.

Not all courses included in the course description sections below are currently offered. The course schedule for the current academic year is available through AURORA Student. Students should note that space in Honours and Major specific courses may be reserved for students in those programs.

All Honours and Major Degree Programs (4-year degrees) offered by the Faculty of Science satisfy the University "M" (Mathematics) requirement.

Students registered in the 3-Year General Degree programs are responsible for ensuring that they successfully complete a course that will satisfy the University's " $M$ " (Mathematics) requirement.

Students in all programs are responsible for ensuring that they successfully complete a course that will satisfy the University's "W" (Written English) requirement.

For a complete listing of courses that satisfy the University's "W" and " M " requirements refer to appendix A of the General Academic Regulations and Requirements section of this Calendar.

In the Faculty of Science, unless otherwise noted, a minimum grade of " $C$ " is required in any course listed as a prerequisite.

NOTE: Course prerequisites may be waived with written consent of the department

### 4.1 Actuarial Mathematics Program <br> Program Director: Jeffrey Pai

Campus Address/General Office: 640 Drake Centre
Telephone: 2044746412
Email Address: jpai@ms.umanitoba.ca
Website: www.umanitoba.ca/actuarial

This is an interdisciplinary program leading to a Bachelor of Science (Honours) degree in Actuarial Mathematics offered in collaboration with the Warren Centre for Actuarial Studies and Research of the I.H. Asper School of Business. The program covers mathematical, statistical, financial and economic concepts required to develop skills in the modelling and management of financial risk and contingent events. In the Faculty of Science the program has a greater emphasis on the mathematical and statistical courses than does the Actuarial Mathematics program offered by the I.H Asper School of Business.

The Warren Centre, with the department of Statistics, offers a joint Honours program (see Section 4.13.3).

To enter the program, a student must have completed a minimum of 24 credit hours with a minimum GPA of 3.00 , and also obtained a minimum grade of " B " in one of the following courses: a three (3) credit hour Written English (W) course, MATH 1300, MATH 1500, MATH 1700, STAT 1000, or both of ECON 1010 and ECON 1020. All of these courses are program requirements and students are strongly urged to take them in the first year.

To continue in the Actuarial Mathematics Honours program, students must maintain a minimum DGPA of 3.00 , and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a min-imum DGPA of 3.00, a minimum grade of "C+" in each of the Honours Program Specific courses (see below), and a minimum grade of " C " on all remaining courses that contribute to the 120 credit hours of the degree.

## Honours Program Specific Courses

Students must achieve a minimum grade of "C+" in each of the following for both prerequisite purposes and graduation requirements:

ACT 2020, ACT 2120, ACT 2210, ACT 3130, ACT 3230, ACT 3340, ACT 3530, ACT 4060, ACT 4140, ACT 4340

In order to receive course credit for, and examination exemptions from, future Society of Actuaries (SoA) and VEE courses, students must obtain a minimum grade of " $B$ " in the following courses: ECON 1010, ECON 1020, ACC 1100, FIN 2200, STAT 3470, and STAT 3490. Contact the Warren Centre for Actuarial Studies and Research for further information.
4.1.2 Actuarial Mathematics Program Chart

| YEAR 1 | YEAR 2 | YEAR 3 | YEAR 4 |
| :---: | :---: | :---: | :---: |

### 4.2 Biochemistry

Campus Address/General Office: 418 Buller Building / 360 Parker Building
Telephone: 2044749372 / 2044749321
Email Address: dcourt@cc.umanitoba.ca and Chemistry Dept@umanitoba.ca

## Website:

http://umanitoba.ca/faculties/science/departments/microbiolo gy/ OR http://www.umanitoba.ca/chemistry
Academic Staff: Deborah Court, Head, Department of Microbiology; Peter Budzelaar, Head, Department of Chemistry

The program coordinators must approve a student's Honours or Major program each session. Students must also obtain approval for any and all revisions to their program.

## Biochemistry Honours Degree Requirements

To enter the joint Honours program in Biochemistry, a student must have completed at least 24 credit hours with a minimum GPA of 3.00 and also obtained a minimum grade of " B " in CHEM 1310 and a minimum grade of " $\mathrm{C}+$ " in BIOL 1020. BIOL 1030, PHYS 1020 (or PHYS 1050), PHYS 1030 (or PHYS 1070), MATH 1500 and MATH 1700 are required courses in the program and students are strongly encouraged to complete them in first year.

To continue in the Biochemistry Joint Honours program, students must maintain a minimum GPA of 3.00 , and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the Biochemistry Joint Honours degree, a student must achieve a minimum GPA of 3.00 and obtain a
minimum grade of " C " on the courses that make up the 120 credit hours of the degree.

## Chemistry and Microbiology Option Courses for Biochemistry Honours Students:

CHEM: 2290, 3400 3360, 3370, 3390, 3490, 3580, 4370, 4570, 4580, 4590, 4600, 4640, 4650, 4670, 4680, 4690, 4710 (6)

MBIO: 3000, 3010, 3030, 3280, 3430, 3470, 4010, 4020, 4410, 4440, 4480, 4520, 4530, 4570, 4580, 4600, 4610, 4670 (or 4672)

Option courses no longer offered that may be used if taken prior to their deletion: CHEM 3380, MBIO 2280, MBIO 3440, MBIO 3480, MBIO 4320, MBIO 4470, and MBIO 4510. NOTE: Several of these courses may not be held with current course offerings found on the above option lists. Please refer to the calendar descriptions for more information about specific course restrictions.

Other options may be considered and approved by the program advisor.

## Biochemistry Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Biochemistry program may enter the Cooperative Option in April of their second year. The five year program provides students with minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry and continuation in the Cooperative Option are the same as that for regular Honours program. Each academic term in the third and subsequent years must comprise a minimum of nine (9) credit hours. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

To graduate with the B. Sc. Honours (Cooperative Option) degree, a stu-dent must achieve a minimum GPA of 3.00 and a minimum grade of "C" on all courses that contribute to the 120 credit hours of the degree.

In addition to the program specific courses, in years 3 and 4 students will select 21 credit hours from the list of optional Microbiology and Chemistry courses found below. Additionally, students will select 12 credit hours of Science electives (see note 5).

## Chemistry and Microbiology Option Courses for Biochemistry Honours Students:

CHEM: 2290, 3400 3360, 3370, 3390, 3490, 3580, 4370, $4570,4580,4590,4600,4640,4650,4670,4680,4690$, 4710 (6)

MBIO: 3000, 3010, 3030, 3280, 3430, 3470, 4010, 4020, $4410,4440,4480,4520,4530,4570,4580,4600,4610$, 4670 (or 4672)

Option courses no longer offered that may be used if taken prior to their deletion: CHEM 3380, MBIO 2280, MBIO 3440, MBIO 3480, MBIO 4320, MBIO 4470, and MBIO 4510. NOTE: Several of these courses may not be held with current course offerings found on the above option lists. Please refer to the calendar descriptions for more information about specific course restrictions.

Other options may be considered and approved by the program advisor.

Students must check with the Co-op office for the April application deadline information. Students will be notified of their provisional acceptance in the program by September. Accept-ance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

## Biochemistry Four Year Major Degree Requirements

To enter the joint four year Major program, a student must have completed a min-imum of 24 credit hours with a minimum GPA of 2.00 , and also obtained a minimum grade of "C+" in CHEM 1310, and a minimum grade of "C" in BIOL 1020. BIOL 1030, PHYS 1020 (or PHYS 1050), PHYS 1030 (or PHYS 1070), MATH 1500, and MATH 1700 are required courses in the program and students are strongly encouraged to complete these courses in first year.

To continue in the Bachelor of Science Major degree program, students must maintain a minimum GPA of 2.00.

To graduate with the Bachelor of Science Major in Biochemistry, a student must com-plete 120 credit hours or more, with minimum grades of " $C$ " on all Major Program Specific courses (see below), passing grades ("D" or better) on the remaining courses, and a minimum grade point average of 2.00 on the 120 credit hours that contribute to the degree.

## Major Program Specific Courses:

CHEM: 2210, 2220, 2280, 2360 (MBIO 2360), 2370 (MBIO 2370), 2400 (2380), 2470, 3570, 4630 and whichever one of 4620, 4360, 4370 is selected

MBIO: 1010, 2020, 3410, and whichever one of 3450, 3460 or 4540 is selected.

Students in this program should note the following:

Students must satisfy any course prerequisites and corequisites for courses selected. Care should be taken to select courses in their proper sequence, e.g. CHEM 2370 (MBIO 2370) and MBIO 2020 should be taken in Year 2 as they are prerequi-site to a number of subsequent required or optional courses.

Normally 4000 level courses are available only to students in their fourth year. MBIO 4530 and MBIO 4570 are not available to Major students.

Students are encouraged to elect other courses pertinent to the study of bi-ochemistry although this is not required for completion of the degree. The departments of Microbiology and Chemistry will be glad to suggest such supplementary courses upon request.

Students who may wish to transfer to the Honours program in Biochemistry following Year 2 should be sure to complete all courses recommended in Year 2 (see chart below).

## Biochemistry Major Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their program may enter the Biochemistry Major Cooperative Option in April of their second year. The five year program provides students with a minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry and continuation in the Cooperative Option are the same as those required for the regular Major program. Students are
encouraged, but not required, to take 15 credit hours in each academic term in the third and subsequent years. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.4.

To graduate with the degree Bachelor of Science Major (Cooperative Option), a student must complete the equivalent of 120 credit hours or more, with minimum grades of "C" on Major Program Specific courses (see below), passing grades ("D" or better) on the remaining courses, and a minimum grade point average of 2.00 on the 120 credit hours that contribute to the degree.

## Major Program Specific Courses

CHEM 2210, 2220, 2280, 2360 (MBIO 2360), 2370 (MBIO 2370), 2400 (2380), 2470, 3570, 4630 and whichever of $4620,4360,4370$ is selected

MBIO 1010, 2020, 3410, and whichever one of 3450, 3460 or 4540 selected.

Students must check with the Co-op office for the April application deadline information. Students will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

If not completed in Year 1, a "W" course must be completed prior to Year 3 in addition to the required Year 2 courses. 3 IMPORTANT: Students in the cooperative programs must ensure that they are able to satisfy the prerequisites for all 3000 and 4000 level courses they plan to take. <br> 4 The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program. <br> 5 MATH 1010, MATH 1020, MATH 1190, COMP 1260, COMP 1270 may not be chosen to satisfy this requirement <br> (Letters in brackets indicate minimum prerequisite standing for further study.) |  |  |  |

### 4.3.1 Biological Sciences

Head: Judy Anderson
Campus Address/General Office: 212 Biological Sciences Building
Telephone: 2044749245

Email Address: janders@ms.umanitoba.ca
Website: http://umanitoba.ca/science/biological sciences/

Biology is one of the most rapidly evolving and diverse sciences in the modern world, exploring all aspects of life
from biomolecules to ecosystems. The Department of Biological Sciences is committed to advancing our understanding of biological structure and function, and developing new tools and technologies to address current and emerging problems facing all living organisms. Connections will be forged between molecules, cells, tissues, organs, organisms, populations, communities, and ecosystems, highlighting the need to explore all levels of biological interactions. Programs emphasize the organism as the key element in studies of the development and evolution of form and function, and the role in adaptations to the environment. Based on a core of fundamental biological principles, our programs explore diverse areas such as organismal biology, environmental biology, genetics, cell biology and development, physiology, ecology, behaviour, and systematics and evolution. The Department focuses on the integration of research and teaching expertise to create opportunities for growth and novel synergisms in the training of future leaders in the field.

### 4.3.2 B.Sc. Honours: Biological Sciences

The Honours program is designed for students planning a professional career in Biological Sciences at the graduate level. Such students are strongly advised to enter the Honours program at the beginning of second year.

Appropriate courses will be arranged in consultation with the Theme Advisor who may be contacted through the Biological Sciences Office (212 Biological Sciences Building). Students are encouraged to select a specific theme area of study as part of their Biological Sciences program. Should a student not opt for one of the five theme groups, they may design their own program by completing the core course requirements plus 30 credit hours of 3000 and/or 4000 level Biological Sciences courses. See the information below outlining the different theme areas offered by the Department of Biological Sciences.

To enter the Biological Sciences Honours program a student must have completed at least 24 credit hours with a minimum GPA of 3.00 , and obtained a minimum grade of "B" BIOL 1030. CHEM 1300, CHEM 1310, STAT 1000 and the 3 credit hours of specified Mathematics, Physics or Statistics are program requirements and students are strongly urged to complete these courses in first year.

To continue in the Biological Sciences Honours program, students must maintain a minimum GPA of 3.00 , and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum GPA of 3.00 , and obtain a minimum grade of "C" on the courses that make up the 120 credit hours of the degree.

## Four Year Honours Cooperative Option

Students interested in alternating academic terms and work terms of paid employment as part of their Honours Biological Sciences program may apply to enter the Cooperative Option in April of their second year in Honours Biological Sciences. This program provides students with 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms, government agencies and University units.

There are several themes offered within the Biological Sciences Program and the Cooperative Option can be completed within any of these areas of study. See below for a description of the different themes and the course requirements of those themes offered by the Department of Biological Sciences.

Students may apply for openings in the Biological Sciences Honours Cooperative Option after completing at least two years ( 60 credit hours) in the Honours program, usually in April of their second year. Before the first employment term begins, the prerequisite courses listed below must be completed. Acceptance and continuation in the program is dependent upon the student receiving employment placements. Students are encouraged to check with the Coop office (214 Buller Building) for application deadlines.

Prerequisite courses to be completed before employment terms begin: BIOL 1020, BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000, 3 credit hours of specified Mathematics or Physics, BIOL 2300, BIOL 2500, BIOL 2520, and BIOL 3100 *. In addition, students must complete 9 credit hours from program core courses as follows: students must select one course from Group A (BIOL 2200, BIOL 2210), plus one course from Group B (BIOL 2240, BIOL 2242, BIOL 2260), plus one additional course from either Group A or Group B. [* A Pre-Co-op Workshop may be substituted for BIOL 3100 only to permit an employment term in September of Year 3, but BIOL 3100 must still be taken.]

Students should note that the course and grade requirements for the Biological Sciences Honours Coop-erative Option are the same as those for the regular Honours program, with the addition of the Work Term courses (see above). To continue in the Biological Sciences Honours Cooperative program a student must maintain a minimum DGPA of 3.00 , and successfully complete all work term courses.

Students should refer to the general faculty regulations for $B$. Sc. (Honours) Cooperative Options in Section 3.6.

Work term positions available to the students will be approved by the department and may include positions within Biological Sciences, other University departments or positions with employers outside the University. Employers will select the students they wish to employ. The first employment term will preferably be taken in January or May of the third year, but may under exceptional circumstances begin in the preceding September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places
exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The program will include three employment terms, each of 4months duration, two of which may be consecutive. A fourth work term is optional. Students are required to register in and pay tuition for each employment term prior to its commencement. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student must obtain a grade of "pass" for each work term report.

### 4.3.3 B.Sc. (Major): Biological Sciences

The four year Major program is also designed for students planning a professional career in the Biological Sciences, but who may not be considering graduate training. It will provide intensive training in all areas of Biology comparable to that of the Honours program, but has less demanding performance requirements. Additionally, students may complete the Major degree requirements on a part-time basis if they so choose. Students who so wish, and have appropriate standing and course selection, may transfer to the Honours program at any time up to the commencement of Year 4.

Appropriate courses will be arranged in consultation with the Theme Advisor who may be contacted through the Biological Sciences Office, 212 Biological Sciences Building. Students are encouraged to select a specific theme area of study as part of their Biological Sciences program. See the information below outlining the different theme areas offered by the Department of Biological Sciences.

Course BIOL 4100 is not available to students in this program.

To enter the Biological Sciences four year Major program a student must have completed a minimum of 24 credit hours with a minimum DGPA of 2.00 , and obtained a minimum grade of "C+" in BIOL 1030. CHEM 1300, CHEM 1310, STAT 1000 and the 3 credit hours of specified Mathematics, Physics or Statistics are program requirements and students are strongly encouraged to complete these courses in first year.

To continue in the Bachelor of Science Major degree, a student must maintain a minimum DGPA of 2.00.

To graduate with the Bachelor of Science (Major) in Biological Sciences, a student must obtain passing grades on all courses, and obtain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree.

## Four Year Major Cooperative Option

Students interested in alternating academic terms and work terms as part of their Major Biological Sciences program may apply to enter the Cooperative Option in April of their second year in the Biological Sciences Major. This program provides students with 12 months of paid employment by the time they graduate. It enables them to obtain work
experience with participating firms, government agencies and University units.

Students may apply for openings in the Biological Sciences Major Cooperative Option after completing at least two years ( 60 credit hours) in the Major program, usually in April of their second year. Before the first employment term begins, the prerequisite courses listed below must be completed. Acceptance and continuation in the program is dependent upon the student receiving employment placements. Students are encouraged to check application deadlines with the Co-op program office (214 Buller Building).

Prerequisite courses to be completed before employment terms begin: BIOL 1020, BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000, 3 credit hours of specified Mathematics or Physics, BIOL 2300, BIOL 2500, BIOL 2520 and BIOL 3100 *. In addition, students must complete 9 credit hours from program core courses as follows: students must select one course from Group A (BIOL 2200, BIOL 2210), plus one course from Group B (BIOL 2240, BIOL 2242, BIOL 2260), plus one additional course from either Group A or Group B. [* A Pre-Co-op Workshop may be substituted for BIOL 3100 only to permit an employment term in September of Year 3, but BIOL 3100 must still be taken.]

Students should note that the course and grade requirements for the Biological Sciences Major Co-operative Option are the same as those for the regular Major program (see above), with the addition of BIOL 3100 and the Work Term courses. To continue in the Biological Sciences Major Cooperative program, a student must have a Cumulative Grade Point Average of 2.00, and a pass on all work term courses.

Students should also refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.4.

Work term positions available to the students will be approved by the department and may include positions within Biological Sciences, other University departments or positions with employers outside the University. Employers will select the students they wish to employ. The first employment term will preferably be taken in January or May of the third year, but may under exceptional circumstances begin in the preceding September. Students are advised that satisfying the en-trance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified appli-cants.

The program will include three employment terms, each of 4months duration, two of which may be consecutive. A fourth work term is optional. Students are required to register in and pay fees for each employment term prior to its commencement. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student must obtain a grade of "pass" for each work term report.

University of Manitoba

### 4.3.4 Biological Sciences Theme Areas

I. Cell, Molecular and Developmental Biology: Students in the Department of Biological Sciences with an interest in the exciting field of cell and developmental biology can select the Cell, Molecular, and Developmental Biology theme for focus. This theme will provide students a selection of courses that highlight fundamental principles and many important advances in this rapidly growing area of contemporary biology. Students can concentrate on aspects that deal with the molecular structures and processes of cellular life and their roles in the function, reproduction, and development of living organisms. The theme is structured such that students can choose from a broad range of disciplines, including biochemistry, molecular biology, morphology, genetics, cell biology, and developmental biology. The organisms under study in this theme are equally diverse, ranging from microbes through to invertebrates, vertebrates, plants, and fungi. The Department collaborates with many other life sciences departments and this theme allows student to develop a highly flexibly course portfolio that includes courses from the Departments of Biological Sciences, Chemistry, Microbiology, or Plant Science.

Specific courses required for the Cell, Molecular, and Developmental Biology Theme in addition to the core course requirements: BIOL 2540 (3); Plus a minimum of 6 Credit hours of Biochemistry: CHEM 2770 (MBIO 2770) and CHEM 2780 (MBIO 2780); or CHEM 2210 and CHEM 2360 (MBIO 2360) and CHEM 2370 (MBIO 2370).
II. Ecology and Environmental Biology: Ecology is the study of interactions between organisms and their environment, both in natural settings and human-influenced habitats. In our society ecology and environmental biology provides a scientific link to the living world. Ecologists study the lives of many organisms including animals, plants, fungi, protists, and bacteria. Interactions among these organisms are investigated at many scales ranging from the microscopic to the global. At the individual level, ecology investigates the impact of environmental factors on organisms through their physiology and behaviour. Ultimately, ecologists link these factors to survival and reproduction in variable environments. At the population level, ecology examines the causes of fluctuations in numbers and changes in distribution of a single species. This work is often the focus of agencies concerned with exploitation, extinction, and rehabilitation of both commercially and esthetically important species. At the community and ecosystem level, ecology considers many coexisting species. It examines the interactions between species within the communities (competition, predation, parasitism, mutualism, etc.) as well as broader investigations of community structure and composition. Ultimately, the skills developed within this theme prepare students for future careers in academia, government agencies, private consulting companies, or NGOs whose mandates encompass ecological and environmental concerns.

Specific courses required for the Ecology and Environmental Biology Theme in addition to the core course requirements: BIOL 3310 (3); BIOL 3312 (3); BIOL 3314 (3); STAT 2000 (3).
III. Environmental and Integrative Physiology: The

Environmental and Integrative Physiology theme will be of interest to a wide array of students interested in pursuing employment opportunities in the Environmental, Consulting, Pharmaceutical, Healthcare, and Professional job markets. Based on the suggested courses and sub themes within this program students will be able to graduate with an all inclusive degree or specialize in particular disciplines ranging from molecular physiology to whole organism physiology and eco/environmental physiology, a subject area that is at the interface between ecology and physiology. Students will be exposed to modern research techniques in lab classes and will be taught by instructors and faculty with active research programs within the Department of Biological Sciences.

Specific courses required for the Environmental and Integrative Physiology Theme in addition to the core course requirements: 6 Credit hours of Biochemistry CHEM 2770 (MBIO 2770) and CHEM 2780 (MBIO 2780); or CHEM 2210 and CHEM 2360 (MBIO 2360) and CHEM 2370 (MBIO 2370); Plus: two of the following courses (one of which is already required in the four-year Biological Sciences Degree programs): BIOL 3470 (3), BIOL 3472 (3) BIOL 3450 (3), BIOL 3452 (3).
IV. Evolution and Biodiversity: Evolution is broadly defined as "descent with modification" and is the process that generates the earth's biodiversity. The theory of evolution provides a unifying framework for biology because all organisms are descended from a common ancestor. As a result, evolutionary principles permeate research and teaching throughout biology.

Evolutionary biology addresses two overarching questions. (1) What was the history of life? (2) What processes account for adaptation and diversification? Systematics reconstructs the history of life by studying relationships among species, and involves comparisons of physical appearance, development, biochemistry, genetics, behaviour, ecology and biogeography. Evolutionary Genetics investigates how processes such as natural selection, mutation, and migration interact to cause evolutionary change within populations. Evolutionary history, genetics, and ecological context are required to fully understand the evolution of traits, for example body size, wing shape or leaf structure. Thus evolution integrates knowledge from a wide spectrum of sub-disciplines within biology.

Evolutionary biology has wide-ranging practical applications. Principles of evolution are required to understand: the evolution of pathogens such as HIV and avian influenza; domestication of wild species and consequences of genetic modifications; the identification of natural products; long-term responses to environmental change; and human biology. Courses from this theme will prepare students for academia, medicine, and government agencies or NGO's that emphasize the cataloguing and conservation of biological diversity.

Specific course required for the Evolution and Biodiversity Theme in addition to the core course requirements:

ACADEMIC CALENDAR

University of Manitoba

List A: One of the following: BIOL 3360, BIOL 4240, BIOL 4242, BIOL 4362

List B: One of the following: BIOL 2262, BIOL 3200, BIOL 3242, BIOL 3250, BIOL 3270, BIOL 4212, BIOL 4214, BIOL 4216, BIOL 4218.
V. Integrative Biology: The Integrative Biology theme will be of interest to students planning to pursue careers in the various biology sub disciplines and who wish an undergraduate degree that is "interdisciplinary" within the life science departments that cuts across the traditional boundaries. This program will suit students who are interested in the "after degree" program in Education or who are intending to apply to a professional program (e.g. Medicine, Dentistry, Pharmacy, Medical Rehabilitation) and who would like a broad background in the Life Sciences. With the appropriate choice of Biological Science courses it would be possible to indicate the Integrative Biology theme along with a second theme from the department.

Specific courses required for the Integrative Biology Theme in addition to the core course requirements: All five of the following (three of which are already designated as core courses in the four-year Biological Sciences Degree programs): BIOL 2200 (3), BIOL 2210 (3), BIOL 2240 (3), BIOL 2242 (3), MBIO 1010 3); One of the following (one of which is already required in the four-year Biological Sciences Degree programs): BIOL 3450 (3), BIOL 3470; Plus: 18 credit hours in Biological Sciences (3000/4000 level courses) and 12 credit hours in Microbiology (3000/4000 level courses).

Note: a maximum of 15 credit hours of Biological Sciences and Microbiology courses at the 2000 level are permitted in the Integrative Theme for use toward the 3000/4000 level requirements of the degree.

### 4.3.5 B. Sc. General Degree: Biological Sciences

Courses taken as part of a General degree program provide an introduction to the major fields of study in the Biological Sciences. Commencing in Fall Term 2009, students will have two options for the General Degree under the Department of Biological Sciences.

Option A: 18 credit hours of 2000, 3000, and (or) 4000 level Biological Sciences courses (subject to the Faculty requirement that of the 36 credit hours in the two chosen advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level);

Option B: Students may choose 36 credit hours from the Biological Sciences provided they select the following courses: each of BIOL 2300, BIOL 2500,
BIOL 2520; one of BIOL 2200 or BIOL 2210; one of BIOL 2240, BIOL 2242, or BIOL 2260; plus 21 additional credit hours ( 2000 level or higher) from the Biological Sciences including at least a minimum of 6 credit hours at the 3000 or 4000 level.

Students anticipating a transfer to either the four year Major or Honours program at the end of their second or third year should consult with the Departmental Program Advisor before registering.

## NOTES:

1. MATH 1510, MATH 1520, or MATH 1690 may be taken in place of MATH 1500; MATH 1310 may be taken in place of MATH 1300.
2. IMPORTANT: The programs need not be completed in the manner prescribed in the chart above. The charts indicate one possible arrangement of the 120 credit hours that make up the degree and are meant to be a guide around which students can plan their programs with a view to satisfying the prerequisites of the required courses. These 120 credit hours are a combination of the courses outlined in the charts above and elective courses chosen by the student in consultation with the program advisors.
3. For the Integrative Biology Theme only, a maximum of 15 credit hours of 2000 level Microbiology and Biological Sciences courses may be used towards the 30 hours of 3000/4000 level requirements.
4. Courses from other departments or faculties may be acceptable for use towards the 30 credit hours of 3000/4000 level Biological Sciences courses required in the Honours and Major Degree programs. Please consult with the department for permission to use alternate courses.
5. Students should confirm the new regulations of the B.Sc. General Degree with a Faculty of Science Student Advisor if they wish to choose 36 hours of advanced level study from the Department of Biological Sciences.
6. BIOL 3100 is a required course in the Biological Sciences Major Co-op programs.
(The number 6 in brackets indicates a six credit hour course.)

3. For the Integrative Biology Theme only, a maximum of 15 credit hours of 2000 level Microbiology and Biological Sciences courses may be used towards the 30 hours of 3000/4000 level requirements.
4. Courses from other departments or faculties may be acceptable for use towards the 30 credit hours of $3000 / 4000$ level Biological Sciences courses required in the Honours and Major Degree programs. Please consult with the department for permission to use alternate courses.
5. Students should confirm the new regulations of the B.Sc. General Degree with a Faculty of Science Student Advisor if they wish to choose 36 hours of advanced level study from the Department of Biological Sciences.
6. BIOL 3100 is a required course in the Biological Sciences Major Co-op programs.

University of Manitoba
(The number 6 in brackets indicates a six credit hour course.)
4.3.6.7 Biological Sciences - General Degree and Minor Requirements Charts
4.3.6.7 Biological Sciences - Program Charts

| GENERAL DEGREE (90 credit hours) |  |
| :---: | :---: |
| BIOL 1020, BIOL 1030 | 18 credit hours of 2000, 3000, and (or) 4000 level Biological Sciences courses (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.); <br> or <br> Students may choose all 36 credit hours of advanced level courses from the Department of Biological Sciences as long as courses are selected following the provisions outlined below: <br> Each of BIOL 2300, BIOL 2500, BIOL 2520; one of BIOL 2200 or BIOL 2210; one of BIOL 2240, BIOL 2242 or BIOL 2260; plus 21 additional credit hours from the Biological Sciences including at least 6 credit hours at the 3000 or 4000 level $^{5}$. |
| MINOR |  |
| BIOL 1020 and BIOL 1030 | 12 credit hours from 2000, 3000, and/or 4000 level Biology courses. |
| NOTES: |  |

## NOTES:

1. MATH 1510, MATH 1520, or MATH 1690 may be taken in place of MATH 1500; MATH 1310 may be taken in place of MATH 1300.
2. IMPORTANT: The programs need not be completed in the manner prescribed in the chart above. The charts indicate one possible arrangement of the 120 credit hours that make up the degree and are meant to be a guide around which students can plan their programs with a view to satisfying the prerequisites of the required courses. These 120 credit hours are a combination of the courses outlined in the charts above and elective courses chosen by the student in consultation with the program advisors.
3. For the Integrative Biology Theme only, a maximum of 15 credit hours of 2000 level Microbiology and Biological Sciences courses may be used towards the 30 hours of 3000/4000 level requirements.
4. Courses from other departments or faculties may be acceptable for use towards the 30 credit hours of 3000/4000 level Biological Sciences courses required in the Honours and Major Degree programs. Please consult with the department for permission to use alternate courses.
5. Students should confirm the new regulations of the B.Sc. General Degree with a Faculty of Science Student Advisor if they wish to choose 36 hours of advanced level study from the Department of Biological Sciences.
6. BIOL 3100 is a required course in the Biological Sciences Major Co-op programs.
(The number 6 in brackets indicates a 6 credit hour course.)

### 4.3.7 Biological Sciences - 1000 Level

BIOL 1000 Biology: Foundations of Life Cr.Hrs. 3 (Formerly 071.100) A course in unifying principles of biology including cell biology, bioenergetics, cell division, genetics and evolution. May not be used for credit in a Major or Honours program in the Biological Sciences. Not to be held with BIOL 1001, BIOL 1020, BIOL 1021, the former 071.125, or 071.201. Prerequisite: Any grade 12 or 40 S Mathematics course (50\%), or equivalent.

BIOL 1010 Biology: Biological Diversity and Interaction Cr.Hrs. 3
(Formerly 071.101) An introduction to biological diversity including prokaryotes, protists, fungi, plants and animals; the form and function of plants and animals and basic concepts of ecology. May not be used for credit in a Major or Honours program in the Biological Sciences. Not to be held with BIOL 1011, BIOL 1030, BIOL 1031, the former 071.125, or 071.201. Prerequisite: Any grade 12 or 40 S Mathematics course (50\%), or equivalent.

BIOL 1020 Biology 1: Principles and Themes Cr.Hrs. 3 (Lab Required) A laboratory-based course in unifying principles of biology including cell biology, bioenergetics, cell division, genetics and evolution. This course is intended for major and honours students in the Biological Sciences. Not to be held with BIOL 1021, BIOL 1000, BIOL 1001 (071.100), BIOE 2590 (034.259), or the former 071.125, 071.123 or 071.201 . Prerequisite: Biology 40S (or equivalent) and any 40S Mathematics (or equivalent) and one of 40S Chemistry or 40S Physics (or equivalent); or BIOL 1000 (C). Students who complete BIOL 1000 as the prerequisite for BIOL 1020 will not be allowed to use both BIOL 1000 and BIOL 1020 towards their degree program as the two courses may not be held for credit with one another.

BIOL 1030 Biology 2: Biological Diversity, Function and Interactions Cr.Hrs. 3
(Lab Required) A laboratory-based course introducing biological diversity including prokaryotes, protists, fungi, plants and animals; the form and function of plants and animals and basic concepts of ecology. This course is intended for major and honours students in the Biological Sciences. Not to be held with BIOL 1031, BIOL 1010 or BIOL 1011 (071.101), BIOE 2590 (034.259), or the former $071.125,071.123$ or 071.201 . Prerequisite: BIOL 1020 or BIOL 1021 (C). NOTE: BIOL 1030 is a prerequisite to further courses in Microbiology and to most courses in Biological Sciences. It is also intended for students proceeding to Agricultural and Food Sciences, Dentistry, Human Ecology, Medicine, Optometry, Pharmacy, Veterinary Science,

Physical Education and Science.
BIOL 1110 Health and Health Professions Cr.Hrs. 3 (Formerly 071.111) Students discuss the inter-relationship between health, health determinants, and the impact that science, health-science, behavioural-social sciences, and technology, have on health care and the health professions. Participants will consider their own role as health care consumers. Open only to students who have completed less than six credit hours. For further information contact University 1.

BIOL 1300 Economic Plants Cr.Hrs. 3
(Formerly BOTN 1010, 001.101) A survey of economically important plants and their products. The history of plant use, plants in folklore and medicine, fermentation and viticulture, domestication of plants, and forestry are the major topics covered. Chemical, structural, and nutritional aspects of plant products are also discussed. Not to be held with the former 001.206 or 001.233.

BIOL 1340 The State of the Earth's Environment: Contemporary Issues Cr.Hrs. 3
(Formerly 071.134) A presentation of contemporary environmental issues focusing on the scientific basis of problems caused by the growth of human population, use and depletion of resources, pollution, and damage to the environment. The current state of our knowledge bases will be discussed, along with improvements in them that may be necessary. The course will consider needs for action, priorities, and opportunities. May not be used to meet a program requirement of an Honours or Major program in the Biological Sciences. Not to be held with ENVR 1000 (128.100).

BIOL 1410 Anatomy of the Human Body Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 1320, 022.132) Microanatomy and gross anatomy discussed including changes occurring from conception to old age. Although this course may be used as an elective in an Arts or Science program, it may not be used to meet a program requirement of an Honours or Major program in the Biological Sciences. No prerequisite. High school Biology strongly recommended.

BIOL 1412 Physiology of the Human Body Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 1330, 022.133) Function of all systems discussed with homeostatic regulatory mechanisms as foundation themes. Although this course may be used as an elective in an Arts or Science program, it may not be used to meet a program requirement of an Honours or Major program in the Biological Sciences. Not available to students who have previously obtained credit in,
or are currently registered in both of BIOL 2410 (or equivalent - ZOOL 2530, BIOL 2411, ZOOL 2531, 022.253) and BIOL 2420 (or equivalent - ZOOL 2540, BIOL 2421, ZOOL 2541, 022.254). Prerequisite: BIOL 1410 (ZOOL 1320, 022.132 ) (C); or one of BIOL 1030, BIOL 1031, or the former 071.125 (C). This prerequisite is waived for students in the Baccalaureate Program for Registered Nurses.

### 4.3.7 Biological Sciences -2000 Level

BIOL 2200 The Invertebrates Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 2600, 022.260) Biology and phylogeny of invertebrates. Emphasis on common taxa and on those groups of particular phylogenetic significance. Not to be held with BIOL 2201 (ZOOL 2601). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2210 The Chordates Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 2320, 022.232) A study of the origin, evolutionary history and structure of the major groups of Chordates. Provides the foundation for more specialized courses such as Biology of Fishes, Ornithology, and Systematics and Biogeography of Fishes. Not to be held with BIOL 2231 (ZOOL 2501, 022.250). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2240 The Non-Flowering Plants Cr.Hrs. 3 (Lab Required) (Formerly BOTN 2110, 001.211) An introduction to the mosses and liverworts, ferns and their allies, and conifers, specifically treating their structure, reproduction, identification and ecological significance. Not to be held with the former BOTN 2110, 001.211. Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2242 The Flowering Plants Cr.Hrs. 3 (Lab Required) (Formerly BOTN 2010, 001.201) A study of the structure and function of the flowering plants. Lecture topics are supplemented by laboratory exercises that focus on the anatomy and morphology of roots, stems, leaves and reproductive organs. Not to be held with the former 001.230. Prerequisite: one of BIOL 1010 (071.101) (B), BIOL 1011 (B), BIOL 1030 (C), BIOL 1031 (C), or the former 071.125 (C).

BIOL 2260 Biology of Fungi and Lichens Cr.Hrs. 3 (Lab Required)(Formerly BOTN 2210, 001.221) An introduction to the fungi, both free living and lichenized, with emphasis on the major taxonomic groupings, their organization and structure, their life histories, identification and general economic significance. Not to be held with BIOL 2261 or the former 001.321. Prerequisite: one of BIOL 1010 (071.101) (B), BIOL 1011 (B), the former 071.123 (B), BIOL 1030 (C), BIOL 1031 (C), or the former 071.125 (C).

## BIOL 2262 Biology of Algae Cr.Hrs. 3

(Lab Required) (Formerly BOTN 2290, 001.229, BIOL 3260) Lectures and laboratories dealing with the cellular features of major groups of algae and their phylogenetic and adaptive significance. The basics of algal taxonomy are also covered. Not to be held with the former courses BIOL 3260, 001.323, or 001.341. Prerequisite: One of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2300 Principles of Ecology Cr.Hrs. 3
(Lab Required) (Formerly BOTN 2370, 001.237, ZOOL

2370, 022.237) Principles of ecology at the individual, population, community, and ecosystems levels. This course is also offered as AGEC 2370. It is the normal prerequisite to other courses in ecology. Not to be held with BIOL 2301 (BOTN 2371, ZOOL 2371), BIOL 2390 (BOTN 2280, 001.228, ZOOL 2290, 022.229), AGEC 2370 (065.237). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C). Prerequisite or concurrent requirement: STAT 1000 or STAT 1001 (005.100) (D).

BIOL 2380 Introductory Toxicology Cr.Hrs. 3 (Formerly BOTN 2180, 001.218, ZOOL 2180, 022.218) A survey of general principles underlying the effects of toxic substances on biological systems, including consideration of the history, scope and applications of toxicology, the mechanisms of toxic action, and some major types of toxicants. This course is also taught in Environmental Science as ENVR 2180 (128.218), and in Agriculture as AGRI 2180 ( 065.218 ). Not to be held with BIOL 2381, BIOL 2382 (BOTN 2190, ZOOL 2190, 001.219, 022.219), ENVR 2190 (128.219), or AGRI 2190 (065.219). Prerequisites: one of BIOL 1030, BIOL 1031, or the former 071.125 (C); and one of CHEM 1310, CHEM 1311 (002.131), or CHEM 1320 (002.132) (C).

BIOL 2390 Introductory Ecology Cr.Hrs. 3
(Formerly BOTN 2280, 001.228, ZOOL 2290, 022.229) The course involves a study of the interrelationships of living organisms (including human) with each other and with their environment. It is not normally acceptable as a prerequisite to other courses in ecology. Not to be held with BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371), or AGEC 2370 (065.237). Prerequisite: one of BIOL 1010, BIOL 1030, BIOL 1031, or the former $071.125(\mathrm{C})$.

BIOL 2410 Human Physiology 1 Cr.Hrs. 3 (Formerly ZOOL 2530, 022.253) The mechanisms of action of the body's major control systems (nervous and endocrine) and of the muscular and reproductive systems are examined. Not to be held with BIOL 2411 (ZOOL 2531) or BIOL 3460 (ZOOL 3530, 022.353). Prerequisite: a "C" or better in one of BIOL 1030, BIOL 1031, the former 071.125, or BIOL 1412 (ZOOL 1330, 022.133); or a "C+" or better in both BIOL 1000 (or equivalent - BIOL 1001, 071.100) and BIOL 1010 (or equivalent - BIOL 1011, 071.101).

BIOL 2420 Human Physiology 2 Cr.Hrs. 3 (Formerly ZOOL 2540, 022.254) An examination of homeostatic regulation by the body's major effector organ systems (cardiovascular, respiratory, digestive, renal, and immune). Not to be held with BIOL 2421 (ZOOL 2541). Prerequisite: Completion of BIOL 2410 (ZOOL 2530, 022.253 ) (D), or BIOL 2411 (ZOOL 2531), or BIOL 3460 (ZOOL 3530, 022.353) (D); or consent of department.

BIOL 2440 Human Reproductive Physiology Cr.Hrs. 3 (Formerly ZOOL $2140,022.214$ ) This course provides an indepth understanding of human reproduction with particular emphasis on intrinsic control mechanisms and extrinsic methods of regulation of reproduction. This course also provides the basis for the understanding of alterations from normal mechanisms of reproductive processes. Prerequisites: BIOL 1410 (ZOOL 1320, 022.132) (C) and BIOL 1412 (ZOOL 1330, 022.133) (C); or consent of department. Check with the Department of Biological

Sciences for course availability.
BIOL 2500 Genetics 1 Cr.Hrs. 3
(Lab Required) (Formerly BOTN 2460, 001.246) Principles of heredity, gametogenesis and the cytological basis of inheritance in plants and animals. The concepts of dominance and genetic interaction, sex and inheritance, linkage, chromosomal variations, quantitative and population genetics, the genetic code. Not to be held with BIOL 2501 (BOTN 2461), or PLNT 2520 (039.252). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2520 Cell Biology Cr.Hrs. 3
(Formerly ZOOL 2280, 022.228) The microscopic and submicroscopic aspects of cellular structure and function are considered with emphasis on the living cell as a dynamic system. Not to be held with BIOL 2521 (ZOOL 2281). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2540 Developmental Biology Cr.Hrs. 3
(Formerly ZOOL 2150, 022.215) Principles and concepts of developmental biology including gametogenesis, fertilization, early and late development. Cellular, tissue and molecular aspects will be presented utilizing both invertebrate and vertebrate examples. Prerequisite: One of BIOL 1030, BIOL 1031, or the former 071.125 (C).

### 4.3.7 Biological Sciences - $\mathbf{3 0 0 0}$ Level

## BIOL 3100 Skills in Biological Sciences Cr.Hrs 3

This course will introduce students to the concepts and skills necessary to succeed in a Biology-based career, including: communication skills (scientific writing and oral presentations), critical thinking, strategies for employment and graduate training, familiarization with the range of biological research, and exposure to a variety of Biologybased careers. This course may not be held with the former BOTN 3570 (001.357) or ZOOL 3750 (022.375). Prerequisite: This course is restricted to Honours and Major students in the Biological Sciences.

BIOL 3200 Advanced Invertebrate Biology Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 3610, 022.361) Topics of current interest to be presented in lecture series given by staff. Students may undertake approved projects and may present reports and seminars. Prerequisite: BIOL 2200 (ZOOL 2600, 022.260) or BIOL 2201 (ZOOL 2601) (C).

BIOL 3242 Vascular Flora of Manitoba Cr.Hrs. 3 (Lab Required) (Formerly BOTN 3070, 001.307) A survey of the vascular plants of Manitoba emphasizing identification, nomenclature and classification, and including brief accounts of the distribution and post-glacial history of the main floristic associations within the province. Students must submit a collection of at least 20 different vascular plants identified to species. A guide to the collection should be obtained from the Department of Biological Sciences office in the Spring/Summer prior to commencing the course. Prerequisite: BIOL 1010 (or equivalent - BIOL 1011, 071.101 ) (B); or one of BIOL 1030, BIOL 1031 or the former 071.125 (C).

BIOL 3250 Lichens and Bryophytes Cr.Hrs. 3
(Lab Required) The biology, evolution, and ecology of lichens and bryophytes. Emphasis is placed on the role of
lichens and bryophytes in the ecosystem, gene flow, animal interactions, co-evolution, secondary compounds, and species identification. Not to be held with BIOL 3240 (BOTN 3260, 001.326) or BIOL 4246 (BOTN 4050, 001.405). Prerequisite: BIOL 1030 or BIOL 1031 or the former 071.125 (C).

BIOL 3270 Introductory Parasitology Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 3460, 022.346) General course covering major parasitic phyla: namely, Protozoa, Platyhelminthes, Aschelminthes, Acanthocephala, and Arthropoda. Emphasis will be on principles of parasitology. Prerequisite or concurrent requirement: BIOL 2200 (ZOOL 2600, 022.260) (C), or BIOL 2201 (ZOOL 2601), or consent of department.

BIOL 3280 Forest Botany Cr.Hrs. 3
(Formerly BOTN 3270, 001.327) An examination of the structure and dynamics of plant communities in forested ecosystems. Topics include forest type classification, physiological and anatomical responses of representative forest species, decomposition and nutrient cycling, disturbance and forest succession. Not to be held with the former 001.402. Prerequisites: BIOL 2242 (BOTN 2010, 001.201 ) (C); and one of BIOL 2300 (BOTN 2370, 001.237, ZOOL 2370, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237) (C); or consent of the department.

BIOL 3290 Medicinal and Hallucinogenic Plants Cr.Hrs. 3 (Formerly BOTN 3280, 001.328) A botanical and historical survey of medicinal, hallucinogenic and poisonous plants used in various cultures. Not to be held with BIOL 3291. Prerequisite: a minimum of 30 hours of university credit, or consent of department.

BIOL 3300 Evolutionary Biology Cr.Hrs. 3
(Lab Required) (Formerly BOTN 3000, ZOOL 3000)
Evolution is the ultimate cause of biological diversity. This course introduces the major questions and research methods in evolutionary biology. Topics include evolutionary genetics, adaptation, speciation, and the reconstruction of evolutionary history. Not to be held with the former 022.400. Prerequisites: a " C " or better in one of BIOL 2500 (BOTN 2460, 001.246), BIOL 2501 (BOTN 2461), or PLNT 2520 (039.252); and any one of the following with a minimum grade of "C": BIOL 2200 (ZOOL 2600, 022.260), BIOL 2210 (ZOOL 2320, 022.232), BIOL 2231 (ZOOL 2501, 022.250F), BIOL 2240 (BOTN 2110, 001.211), BIOL 2260 (BOTN 2210, 001.221), BIOL 2261, BIOL 3260 (BOTN 2290, 001.229); or consent of department.

BIOL 3310 Foundations of Population Ecology Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 3680) The study of living populations, through experimentation and theory, will be examined. Topics investigated will include population regulation, competition, predation, disease, harvest, nonlinear and spatial dynamics and individual based models. Concepts and methods are reinforced through tutorials and evaluated by assignments and examinations. Not to be held with the former 022.348. Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237); and STAT 2000 or STAT 2001 (005.200) (C); or consent of department.

BIOL 3312 Community Ecology Cr.Hrs. 3 (Formerly BOTN 3540, 001.354) Lectures and laboratories emphasizing the structure and function of terrestrial biotic communities with emphasis upon selected Manitoba situations. Prerequisite: a C or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237); or consent of department.

BIOL 3314 Field Ecology Cr.Hrs. 3
(Formerly BOTN 3420, 001.342, ZOOL 3450, 022.345) Problems, techniques and assumptions involved in measuring parameters of biological populations and environmental variables. A field trip will be held prior to the start of classes. Students must register in the department office by August 5. Prerequisites: a "C" or better in one of one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237); and STAT 2000 or STAT 2001 (005.200) (D).

BIOL 3318 Boreal Ecology Cr.Hrs. 3 (Formerly ZOOL 3380, 022.338) A survey of ecological factors in the formation, evolution, and survival of northern biota including northern peoples. There will be optional weekend field trips. Prerequisite: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237); or BIOL 2390 (ZOOL 2290, 022.229, BOTN 2280, 001.228) (C); or consent of department.

BIOL 3340 Biology of Primitive Fungi and Allies Cr.Hrs. 3 (Lab Required) Studies on the Biology of primitive fungi and slime moulds including their evolution, life histories, development, structure, taxonomy, biochemistry, and importance to humans. Environmental collection, baiting, isolation and axenic culturing stressed in laboratories. Prerequisite: BIOL 1010 (B); or BIOL 1030 (BIOL 1031) (C).

BIOL 3350 Methods of Data Collection and Analysis in Ecology Cr. Hrs. 3
This course will consider methods of collection and analysis of ecological data, emphasizing experimental design of ecological studies, sampling, analysis of ecological data sets, and presentation techniques. This course may not be held for credit with BIOL 4320 (ZOOL 4200, 022.420). Prerequisites: BIOL 2300 (C) and STAT 2000 or STAT 2001 (D); or consent of department.

BIOL 3360 Animal Behaviour Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 3100, 022.310) An introduction to the study of animal behaviour including key concepts from the parent disciplines of ethology and comparative psychology, the genetic and physiological bases of behaviours, and evolutionary aspects introducing optimality and game theoretical models characteristic of modern behavioural ecology. Laboratory work involves the design and execution of a behavioural project at the Assiniboine Park Zoo. Not to be held with the former 022.343. Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237); and BIOL 2210 (ZOOL 2320, 022.232) (C); or consent of department.

BIOL 3370 Limnology Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 3500, 022.350) Lectures
and laboratories providing an introduction to the physics, chemistry and biology of lakes. Prerequisite: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237).

BIOL 3372 Wetland Ecology Cr.Hrs. 3
(Formerly BOTN 3580, 001.358, ZOOL 3580, 022.358) Lectures and field exercises examine the biotic (algae, macrophytes, invertebrates, and vertebrates) and abiotic (hydrology, nutrient cycling) properties of Delta Marsh, a prairie lakeshore wetland. Other wetland types, including peatlands, will also be considered in lectures and field trips. The course is offered in Summer Session at the university Field Station (Delta Marsh). Prerequisite: a C or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237); or consent of department.

BIOL 3450 Plant Physiology Cr.Hrs. 3
(Lab Required) (Formerly BOTN 2020, 001.202) A study of the function of the flowering plants. The focus will be on photosynthesis, plant water relations, plant nutrition, and the role of hormonal and extrinsic factors in the regulation of plant development. Not to be held with PLNT 3500 or the former 001.230. Prerequisite: BIOL 2242 (BOTN 2010, $001.201)(C)$.

BIOL 3452 Environmental Plant Physiology Cr.Hrs. 3 (Lab Required) (Formerly BOTN 3010, 001.301) An integrated study of the major physiological processes in higher plants, and how these processes influence growth and development of plants in natural ecosystems. Stress responses of plants to water, light and nutrients will be emphasized. Not to be held with PLNT 3500 (039.350), 001.317, or 001.467. Prerequisite: BIOL 3450 (BOTN 2020, $001.202)(C)$; and CHEM 1310 or CHEM 1311 (002.131) (C).

BIOL 3470 Environmental Physiology of Animals 1 Cr.Hrs. 3 (Lab required) This course is intended to acquaint students with some of the major environmental challenges encountered by animals and stresses the diversity of physiological solutions to these problems in aquatic and terrestrial organisms. Areas covered may include thermal biology, circulation, gas exchange and buoyancy regulation. Laboratories explore related subjects in various animals. This course may not be held for credit with the former BIOL 3462, ZOOL 3540 (022.354). Prerequisite: BIOL 2200 (C) or BIOL 2210 (C); or consent of department.

BIOL 3472 Environmental Physiology of Animals 2 Cr.Hrs. 3 (Lab Required) This course is intended to acquaint students with the control and integration of organ systems and body functions of animals, and their biochemical and physiological adaptations to environmental perturbations. Areas covered may include neuroendocrinology, excretion, and water, salt, and acid-base balance. Laboratories explore related subjects in various animals. This course may not be held for credit with BIOL 3460, or the former ZOOL 3530, or the former 022.353. Prerequisites: BIOL 2200 (C) or BIOL 2210 (C) or consent of department.

BIOL 3500 Genetics 2 Cr.Hrs. 3
(Lab Required) (Formerly BOTN 3460, 001.346) The course complements Genetics I (BIOL 2500, BOTN 2460, 001.246, BIOL 2501, BOTN 2461) and deals with various aspects of linkage and crossing over, gene function, allelism, mutation
and repair, the use of bacteria and viruses as genetic tools, basics of developmental genetics and extra-nuclear inheritance. Not to be held with BIOL 3501. Prerequisite: BIOL 2500 (BOTN 2460, 001.246) (C), or BIOL 2501 (BOTN 2461) or PLNT 2520 (039.252 or 039.209 ) (C). Prerequisite or concurrent requirement: One of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), CHEM 2780 (002.278), or MBIO 2780 (060.278); or consent of department.

BIOL 3540 Advanced Developmental and Cellular Biology Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 3070, 022.307) The course focuses on contemporary concepts and approaches in developmental biology, including theoretical and practical aspects. The emphasis is on the laboratory component. Prerequisite: BIOL 2540 (ZOOL 2150, 022.215) (C); or consent of department.

BIOL 3550 Plant Anatomy Cr.Hrs. 3
(Lab Required) (Formerly BOTN 3190, 001.319) A study of the anatomical aspects of the growth and development of plants cells, tissues and organs. Laboratory exercises will complement material. Not to be held with the former 001.316 or 001.403. Prerequisite: BIOL 2242 (BOTN 2010, 001.201) (C).

BIOL 3560 Comparative Animal Histology Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 3060, 022.306) This course focuses on the cell and tissue organization of animals. Cell morphology and specialization, tissue types and a survey of the cellular and tissue organization of all organ systems are covered. The primary focus is on mammals but comparative aspects of other animal groups are also included. Not to be held with BIOL 3561 (ZOOL 3061, 022.347). Prerequisite: One of BIOL 1030, BIOL 1031, or the former 071.125 (C). Recommended prerequisite: one of BIOL 2210 (ZOOL 2320, 022.232), BIOL 2231 (ZOOL 2501, 022.250), BIOL 2520 (ZOOL 2280, 022.228), or BIOL 2521 (ZOOL 2281).

BIOL 3600 Biological Diversity and Sustainability Cr.Hrs. 3 Anthropogenic drivers of change of many components of biological diversity; the resulting impacts on ecosystem capacity to provide on-going goods and services that are essential constituents of well-being and ultimately sustainability. Prerequisites: BIOL 2300 (C); or BIOL 1030 (C) and BIOL 2390 (C).

BIOL 3980 Work Term 1 Cr.Hrs. 0
(Formerly ZOOL 3980, 022.398, BOTN 3980, 001.398) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

BIOL 3990 Work Term 2 Cr.Hrs. 0
(Formerly ZOOL 3990, 022.399 , BOTN 3990, 001.399) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

### 4.3.7 Biological Sciences -4000 Level

## BIOL 4100 Honours Thesis Cr.Hrs. 6

(Formerly BOTN 4600, 001.460, ZOOL 4110, 022.411) The student will conduct a research project, chosen in consultation with a Biological Sciences faculty member acting as an advisor, and produce a thesis in which the project, the results and conclusions are presented. The student will defend the thesis at an oral examination held on completion of the thesis. This course is restricted to final year Honours Biological Science students. Not to be taken concurrently with BIOL 4880 (ZOOL 4880, 022.488, BOTN 4880, 001.488).

BIOL 4210 Biology of Fishes Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 4170, 022.417) Lectures survey organ systems, life history, and the population biology of fishes. The ecological analysis of fish communities is addressed through a field trip and a series of workshops on the analysis of field data. Evaluation is based upon work related to the field trip and examinations based upon the lecture material. Not to be held with the former 022.467. Prerequisite: BIOL 2210 (ZOOL 2320, 022.232) (C) or BIOL 2231 (ZOOL 2501, 022.250) (C).

BIOL 4212 Systematics and Biogeography of Fishes Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 4220, 022.422) A study of the evolutionary history, interrelationships and distribution patterns of the fish-like vertebrates. Laboratories will cover the identification of the major groups of fish-like vertebrates. Not to be held with the former 022.418 or 022.467 . Prerequisite: BIOL 2210 (ZOOL 2320, 022.232) (C) or BIOL 2231 (ZOOL 2501, 022.250) (C); or consent of department.

BIOL 4214 Biology of Amphibians and Reptiles Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 4230, 022.423) Lectures consider the evolution, biology and adaptations of amphibians and reptiles. Laboratories and student presentations will deal with classification, structure, identification, and methods of field and laboratory study of these animals. Not to be held with the former 022.476. Prerequisite: BIOL 2210 (ZOOL 2320, 022.232) (C) or BIOL 2231 (ZOOL 2501, 022.250) (C); or consent of department.

BIOL 4216 Biology of Birds Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 4240, 022.424) Biology of birds including: morphology, systematics, evolution, life histories and breeding biology, ecology, migration, and distribution of birds. Not to be held with the former 022.468. Prerequisite: BIOL 2210 (ZOOL 2320, 022.232) (C) or BIOL 2231 (ZOOL 2501, 022.250) (C). Prerequisite or concurrent requirement: BIOL 3360 (ZOOL 3100).

BIOL 4218 Biology of Mammals Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 4250, 022.425) Structure, classification, evolution, life histories and distribution of mammals and their relation to human cultures. Techniques of studying mammals. Identification of the mammals of Manitoba. Offered in 2009-2010 and alternate years thereafter. Prerequisites: BIOL 2210 (ZOOL 2320, 022.232) (C) or BIOL 2231 (ZOOL 2501, 022.250) (C); and one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237) (C); or consent of department.

BIOL 4220 Marine Biodiversity Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 4260) Examines key ecological principles governing the maintenance of marine biodiversity, particularly in northern ecosystems. Topics include the definitions and global patterns of biodiversity and the ecological mechanisms influencing changes in these patterns in the context of applied population, community and ecosystem ecology. The course will also emphasize practical solutions, including fisheries' harvest models and marine protected areas. Prerequisites: a " C " or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 022.237, 001.237), BIOL 2301 (BOTN 2371, ZOOL 2371) AGEC 2370 (065.237), or BIOL 2390 (BOTN 2280, ZOOL 2290, 001.228, 022.229); or consent of department.

BIOL 4240 Advanced Plant Systematics Cr.Hrs. 3 (Lab Required) (Formerly BOTN 4040, 001.404) An examination of biosystematic principles and methods as they relate to all groups of plants. Prerequisite: BIOL 3242 (BOTN 3070, 001.307) (C).

BIOL 4242 The Evolution of Plant Structures and Systems Cr.Hrs. 3
(Lab Required) (Formerly BOTN 4130, 001.413) A comparative study of the morphological and anatomical characteristics of extant and extinct plants in the context of current evolutionary theory. Prerequisite: BIOL 2242 (BOTN 2010, 001.201) (C) or consent of department.

BIOL 4250 Principles of Plant Pathology Cr.Hrs. 3 (Lab Required) (Formerly BOTN 4210, 001.421) A study of the interactions of causal agents, environment, and host plants in the development of disease. Special attention will be given to diseases of local and regional significance. Laboratory exercises will illustrate the basic techniques of plant pathology. Prerequisites: BIOL 3450 (BOTN 2020, 001.202 ) (C) and BIOL 2260 (BOTN 2210, 001.221) (C) or BIOL 2261; or consent of department.

BIOL 4260 Experimental Parasitology Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 4730, 022.473) Principles of parasitology including immunology, ecology, biochemistry, and physiology. Students must carry out an experimental study. Prerequisite: BIOL 3270 (ZOOL 3460, 022.346) (C).

BIOL 4262 Wildlife and Fisheries Parasitology Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 4720, 022.472) Parasites of major vertebrate groups of economic importance in temperate regions. Emphasis on: identification, means of control, and how to evaluate the impact of parasites on animal populations. A major project is required. Prerequisite: BIOL 3270 (ZOOL 3460, 022.346) (C).

BIOL 4310 Applications of Population Ecology in Fisheries and Wildlife Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 4850) The material introduced in BIOL 3310 (ZOOL 3680, 022.348) is developed into the quantitative analyses of field data to form a basis for conservation and management. Topics covered include: surplus harvest models, virtual population analysis, spatial population modeling, bioeconomics, and quantitative adaptive management. Concepts are reinforced through tutorials. Prerequisite: BIOL 3310 (ZOOL 3680, 022.348).

BIOL 4312 Analysis of Biological Communities Cr.Hrs. 3 (Formerly BOTN 4650, 001.465) A survey of methods and approaches to the analysis of biological and environmental
data containing many variables. Offered in alternate years. Not to be held with BIOL 7440 (BOTN 7440). Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237); and STAT 2000 or STAT 2001 (005.200) (C).

BIOL 4330 Plant Interactions Cr.Hrs. 3 (Formerly BOTN 4150, 001.415) This course examines the ecology of interactions between plants and their biotic environment - other plants, animals and soil microbes. This is a reading course. Students will participate in discussions of key papers, examine recent and historic literature, and write a term paper examining a selected topic. Prerequisite: a "C" or better in BIOL 2300; or consent of department.

BIOL 4340 Aquaculture Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 4820, 022.482) Biology and methods of commercial culture of fish and other aquatic animals. Emphasis on: physiological, nutritional, genetic, pathological and economic aspects and on current and new technologies. Prerequisite: STAT 2000 or STAT 2001 (005.200) (D); and consent of instructor.

BIOL 4362 Behavioural Ecology and Cognitive Ethology Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 4280, 022.428) Examines proximate and ultimate questions relating to mating and parental behaviour, communication, social parasitism and animal intellect to provide insight into the intimate relationship between behavioural evolution and the environment. Laboratory and field exercises complement major topics considered in lectures. Not to be held with the former 022.448. Prerequisite: BIOL 3360 (ZOOL 3100, 022.310 ), or the former 022.343 (C); or consent of department.

BIOL 4374 Aquatic Botany Cr.Hrs. 3
(Formerly BOTN 4010, 001.401) This course examines the relationship between algae, fungi and macrophytes, and the physical, chemical and biological properties of the aquatic environment. Specific adaptations to life in water, and patterns of distribution and succession in rivers, lakes and wetlands will be covered. Prerequisite: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237); or consent of department.

BIOL 4380 Environmental Toxicology Cr.Hrs. 3
(Lab Required) (Formerly ZOOL 4840, 022.484) A survey of the principles governing the dynamics of chemicals in the environment, with emphasis on the biological systems, using case histories of known pollution problems. Prerequisites: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), CHEM 2780 (002.278), or MBIO 2780 (060.278); plus a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (065.237); plus a "C" or better in one of BIOL 2410 (ZOOL 2530, 22.253), BIOL 2411 (ZOOL 2531) or BIOL 3460 (ZOOL 3530, 022.353); and BIOL 3462 (ZOOL 3540, 022.354, or 22.352) (C); or consent of department.

BIOL 4390 Principles of Wildlife Management Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 4710, 022.471) Introduction to the biological and socioeconomic goals of wildlife management and to the basic techniques of wildlife

University of Manitoba
management in terms of these goals. There will be four or five field trips. Some weekend field trips may be required. Prerequisite: BIOL 3310 (ZOOL 3680, 022.348) (C); or consent of department.

BIOL 4460 Comparative Animal Energetics Cr.Hrs. 3 (Formerly ZOOL 4830, 022.483) Energetic strategies of animals living in ecologically diverse environments. Integration of physiological, morphological and behavioural adaptations with an emphasis on vertebrate species. Prerequisites: BIOL 2210 (ZOOL 2320, 022.232) (C) or BIOL 2231 (ZOOL 2501, 022.250) (C); and one of BIOL 2410 (ZOOL 2530, 022.253) (C), BIOL 2411 (ZOOL 2531), BIOL 3460 (ZOOL 3530, 022.353) (C), or BIOL 3462 (ZOOL 3540, $022.354)(C)$; or consent of department.

BIOL 4470 Sensory-Motor Physiology Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 4160, 022.416) Information flow in the nervous system and the control of behaviour. The diverse roles that ion channels and synaptic circuitry play in sensory reception, neuronal integration and motor control are emphasized. Prerequisite: a "C" or better in one of BIOL 2410 (ZOOL 2530, 022.253), BIOL 2411 (ZOOL 2531), BIOL 3460 (ZOOL 3530, 022.353), the former 022.245, 022.337, or 022.352; or consent of department.

BIOL 4480 Comparative Endocrinology Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 4600, 022.460) The structure, control, and function of vertebrate endocrine systems. BIOL 2520 (or equivalent - ZOOL 2280, 022.228, BIOL 2521, ZOOL 2281), and one of BIOL 2410 (or equivalent - ZOOL 2530, 022.253, BIOL 2411, ZOOL 2531), BIOL 3460 (ZOOL 3530, 022.353) or the former 022.245 or 022.352, and a course in biochemistry are strongly recommended as prerequisites. Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 4500 Molecular Genetics of Plant Development Cr.Hrs. 3
(Formerly BOTN 4180, 001.418) Analysis of plant development at the molecular level. Recent advances in model system genetics will be highlighted including seedling, root, shoot, and flower development as well as environmental responses. Prerequisite: BIOL 2500 (BOTN 2460, 001.246) or BIOL 2501 (BOTN 2461) (C).

BIOL 4540 Developmental Molecular Biology Cr.Hrs. 3 (Lab Required) (Formerly ZOOL 4150, 022.415) An examination of early development with emphasis on the molecular events. Sex determination, gametogenesis and early embryogenesis will be discussed. Prerequisite: BIOL 2540 (ZOOL 2150, 022.215) (C); or consent of department.

BIOL 4542 Genes and Development Cr.Hrs. 3 (Formerly ZOOL 4270, 022.427) An in depth examination of selected topics in embryonic development, emphasizing the genetic control of the cell and molecular mechanisms that direct embryogenesis. The course will focus primarily on vertebrate development, but insights provided by studies on invertebrates will also be covered. Prerequisites: BIOL 2520 (ZOOL 2280, 022.228) or BIOL 2521 (ZOOL 2281)(C); and BIOL 2540 (ZOOL 2150, 022.215) (C); or consent of department.

BIOL 4552 Molecular Biology Techniques for Eukayotes Cr.Hrs. 3
(Lab Required) A techniques-intensive course focusing on
the understanding of molecular biology techniques, troubleshooting problems, writing reproducible Materials and Methods for publications, accurate recording of procedures in lab journals, and bioinformatics exercises. Not to be held with BOTN 7460 (001.746) or the former 001.742.
Prerequisite: BIOL 2500.
BIOL 4560 Microtechnique Cr.Hrs. 3
(Lab Required) This intensive course covers a spectrum of animal tissue and cell preparation techniques for microscopy and a survey of the variety of types of microscopy. These span all types of microscopy; live cell techniques, fixation and tissue processing methods for both paraffin embedding media and plastic media, sectioning and staining imaging and image processing, introduction to histochemistry and immunocytochemistry and electron microscopy. This is a practical course with a major hands-on laboratory emphasis. Prerequisites: BIOL 1030 or BIOL 1031 (C+); or consent of department. This course is restricted to students in year 3 or 4 of a Major or Honours degree program.

BIOL 4610 The Business of Biotechnology Cr.Hrs. 3 A critical examination of Biotechnology development and marketing. Lectures, tutorials and workshops providing indepth study of topics including the legal, business, marketing, industrial and governmental, and scientific and ethical aspects of the biotechnology industry and, "for profit" science. Prerequisites: PLNT 2530 (C+), MBIO 3000 (C+), and MBIO 3410 or MBIO 3411 (C+). BIOL 2500 (or equivalent - BIOL 2501 (BOTN 2460, BOTN 2461, 001.246), BIOL 2520 (or equivalent - ZOOL 2280, BIOL 2521, ZOOL $2281,022.228)$ and CHEM 3590 (002.359) are highly recommended.

BIOL 4800 Special Topics in Field Biology Cr. Hrs. 3 (Formerly BOTN 4800, 001.480, ZOOL 4800, 022.480) Lectures, field studies and research projects on a selected topic. Course content to vary from year to year depending on instructor. Usually offered during the summer months. Prerequisite: consent of department.

BIOL 4890 Special Topics in Biology Cr.Hrs. 3
(Formerly BOTN 4890, 001.489, ZOOL 4890, 022.489)
Biology encompasses a broad array of ideas and special topic areas. In this course, students can pursue a specific topic in detail through lectures, seminars and research projects. Normally restricted to third and fourth year Honours and Major students. Prerequisite: Consent of department.

BIOL 4980 Work Term 3 Cr.Hrs. 0
(Formerly BOTN 4980, 001.498, ZOOL 4980, 022.498) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option.
Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only)

BIOL 4990 Work Term 4 Cr.Hrs. 0
(Formerly BOTN 4990, 001.499, ZOOL 4990, 022.499) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only)

### 4.4.1 Program Information <br> Biotechnology Honours Degree Requirements

To enter the Biotechnology Joint Honours program a student must have completed at least 24 credit hours with a minimum GPA of 3.00 , and also obtained a minimum grade of " B " in CHEM 1310 and a minimum grade of " $\mathrm{C}+$ " in BIOL 1020. CHEM 1300, BIOL 1030, MATH 1500, PHYS 1020 (or PHYS 1050), and STAT 1000 are required courses in the program and students are strongly encouraged to complete these courses in first year. Six credit hours of Arts electives, including the written English course should also be taken in Year 1.

Students will select one stream (Analytical,
Environmental/Biosystems or Molecular Biotechnology).
Students are also encouraged to select a Minor in a complementary area. There are enough free electives to cover the 18 credit hours required for a Minor. All students must complete a Common Core of required courses plus required Stream Specific courses. The remaining courses can be selected from the list of Recommended Electives.
This list is meant to give students some idea of appropriate electives; however, students have the option to choose courses not on the list in consultation with the Program Advisors.

To continue in the Biotechnology Joint Honours program, students must maintain a minimum GPA of 3.00 and complete a minimum of 9 credit hours during each Fall and Winter Term. No more than 15 credit hours of F grades may be accumulated, regardless of whether any course has been repeated and a higher grade achieved. Research Project in Biotechnology (BTEC 4000) must be taken in the final year of the program.

To graduate from the Biotechnology Joint Honours program students must achieve a minimum GPA of 3.00 and obtain minimum grade of " $C$ " on the courses that contribute to the 120 credit hours that make up the degree.

Students who do not meet these minimum requirements will be required to withdraw from the program and may be eligible to enter the 4 -Year Major degree program in Biotechnology. Depending on course selection students may also be eligible to enter other Major Programs (e.g. Biochemistry, Biological Sciences, Chemistry, or Microbiology) and/or the 3-year B.Sc. General Degree program.

## Biotechnology Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Biotechnology program may enter the Cooperative Option in April of their second year in Honours Biotechnology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program, as indicated in the chart. Students are required to complete the first and second year requirements of the program; and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Options in Section 3.6.

To continue in the Honours Cooperative program a student must maintain a minimum GPA of 3.00 , successfully complete each work term, and complete a minimum of 9 credit hours during each academic term. Students should note that the grade requirements for the Cooperative Option are the same ad that for the regular Honours program (see above).

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement.
Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

## Biotechnology 4-Year Major Degree Requirements

To enter the Biotechnology Joint Major program a student must have completed at least 24 credit hours with a minimum GPA of 2.00 and also obtained a minimum grade of "C+ in CHEM 1310 and a minimum grade of "C" in BIOL 1020. BIOL 1030, CHEM 1300, MATH 1500, PHYS 1020 or 1050, and STAT 1000 are required courses in the program and students are strongly urged to complete these courses in first year. Six credit hours of Arts electives, including the written English course should also be taken in Year 1.

Students will select one stream (Analytical,
Environmental/Biosystems or Molecular Biotechnology).

Students are also encouraged to select a Minor in a complementary area. There are enough free electives to cover the 18 credit hours required for a Minor. All students must complete a Common Core of required courses plus required Stream Specific courses. The remaining courses can be selected from the list of Recommended Electives. This list is meant to give students some idea of appropriate electives; however, students have the option to choose courses not on the list in consultation with the Program Advisors.

To continue in the Major program a student must maintain a minimum GPA of 2.00 . No more than 18 credit hours of $F$ grades can be accumulated regardless of whether any course has been repeated and a higher grade achieved.

To graduate from the Biotechnology Joint Major degree, students must maintain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree. Students must also obtain a minimum grade of " C " on all common core and stream specific courses outlined below. There is no term registration load requirement in the Major degree.

Students who do not meet these minimum requirements will be required to withdraw from the program and will normally be eligible to enter the 3 -Year B.Sc. General degree program.

## Biotechnology 4 Year Major Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Major program in Biotechnology may enter the Cooperative Option in April of their second year in Biotechnology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Major program. MBIO 3410 is required in Year 3. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Major) Cooperative Options in Section 3.4.

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

## Common Core Courses:

BIOL 2500, BIOL 2520, BIOL 4560, BIOL 4610, CHEM 2210, CHEM 2220, CHEM/MBIO 2360, CHEM /MBIO 2370, CHEM 2470, CHEM 3590, CHEM 4630, MBIO 1010, MBIO 2020, MBIO 3000, MBIO 3410, MBIO 4510, PLNT 2530, PLNT 4610

## Program Stream Courses:

Analytical Biotechnology: MATH $1700^{1}$, CHEM 4370, CHEM 4590, CHEM 4670, CHEM 4700

Environmental Biotechnology: MATH $1700^{1}$, BIOE 3200, BIOE 3530, BIOE 4510, MBIO 4672

Molecular Biotechnology: BIOL 4550, MBIO 4600, MBIO 4610, MBIO 4672

Note: In some instances pre-requisites will be waived upon approval by the appropriate department.

Complementary Existing Minors that could satisfy the Recommended Electives (Minors require 18 cr hrs of prescribed courses):

Management, Animal Systems, Food Science, Plant Biotechnology, or Human Nutrition and Metabolism

## Recommended General Electives if not required in

 Program stream:All courses in above described Minors.

Appropriate pre-requisites must also be taken for all Electives.

BIOE 3200, BIOE 3530, BIOE 4510, BIOL 1300 (BOTN
1010), BIOL 2242 (BOTN 2010), BIOL 2380 (BOTN/ZOOL 2180), BIOL 2260 (BOTN 2210), BIOL 2300 (BOTN/ZOOL 2370), BIOL 3550 (BOTN 3190), BIOL 3290 (BOTN 3280), BIOL 3500 (BOTN 3460), BIOL 4500 (BOTN 4180), BIOL 4550 (BOTN 4460), BIOL 2540 (ZOOL 2150), BIOL 3540 (ZOOL 3070), BIOL 4540 (ZOOL 4150); CHEM 4360, CHEM 4370, CHEM 4590, CHEM 4620, CHEM 4670, CHEM 4700; COMP 1010, COMP 1020, COMP 1260, COMP 1270; ENG 1420; ENTR 2020; MATH $1700^{1}$; MBIO 2110, MBIO 3280 (MBIO 2280), MBIO 3010, MBIO 3430, MBIO 4440 (MBIO 3440), MBIO 3450, MBIO 3460, MBIO 3470, MBIO 4480 (MBIO 3480), MBIO 4010, MBIO 4410, MBIO 4470, MBIO 4600, MBIO 4610, MBIO 4672; PHAC 4030, PHAC 4040; PHIL 2740, PHIL 2830; PLNT 3140, PLNT 3500, PLNT 3520, PLNT 3570, PLNT 4310, PLNT 4330, PLNT 4550, PLNT 4560, PLNT 4570, PLNT 4580, PLNT

Other suitable courses may be selected through consultation with the department heads.
4.4.2 Biotechnology Programs (incl. Co-operative Option if selected)

## NOTES:

BTEC 3980, BTEC 3990
BTEC 4980 and /or BTEC 4990

1. MATH 1510 or 1520 may be used in place of MATH 1500; MATH 1710 may be used in place of MATH 1700.
2. Program stream courses requirements can be found above the Biotechnology program charts in section 4.4.1.
3. Refer to list of recommended elective courses and complementary Minor programs (listed above charts) prior to registration in your electives.
(The number 6 in brackets indicates a 6 credit hour course.)

University of Manitoba

### 4.4.3 Biotechnology

BTEC 3980 Work Term 1 Cr.Hrs. 0
Work assignments in business, industry or government for students registered in the Biotechnology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

BTEC 3990 Work Term 2 Cr.Hrs. 0
Work assignments in business, industry or government for students registered in the Biotechnology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

BTEC 4000 Research Project in Biotechnology Cr.Hrs. 6 (Lab Required) Students can carry out independent biotechnology based research in their area of interest under the supervision of a faculty member or an approved external biotechnology professional. Results will be presented as an interim oral report and a written journal style paper. Registration restricted to Year 4 Honours Biotechnology students. Not to be held with any other Research Project courses such as MBIO 4530 or CHEM 4710.

BTEC 4980 Work Term 3 Cr.Hrs. 0
Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

BTEC 4990 Work Term 4 Cr.Hrs. 0
Work assignments in business, industry or government for students registered in the Biotechnology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

### 4.5 Department of Chemistry

Head: Peter Budzelaar
Campus Address/General Office: 360 Parker Building
Telephone: (204) 4749321
Fax: (204) 4747608
Email Address: Chemistry Dept@umanitoba.ca
Website: http://umanitoba.ca/chemistry

### 4.5.1 Department of Chemistry Program Information

Chemistry is the science concerned with the properties of atoms and mol-ecules, of which all matter is composed. Chemistry is important for all as-pects of the material world food production; the manufacture of medicines, textiles, and plastics; energy production; identifying environ-mental problems and remedies; and understanding the workings of living organisms. The department offers study in analytical, inorganic, organic and physical chemistry, and in biochemistry.

Chemistry Club: The Chemistry Club is the University of Manitoba Student Chapter of the Chemical Institute of Canada. The aim of the organization is to advance interest in
chemistry. All students engaged in chemical stud-ies are eligible for membership in the chapter and are encouraged to apply. Regular meetings, tours, publications, etc., are planned by each year's membership.

Scholarships and Awards: Several scholarships and awards are granted each year to Honours and Major students in Chemistry, Biochemistry, and Biotechnology on the basis of outstanding academic performance. To be eligible for these awards for any regular session, students are normally re-quired to have completed a full program with a minimum of 18 credit hours of Chemistry in that session. They must also be registered for a full program with a minimum of 18 credit hours of Chemistry in the next reg-ular session. Additional information is available from the Chemistry gener-al office.

The department must approve a student's Honour or Major program each session. Students must also obtain departmental approval for any and all revisions to their program.

## Honours Requirements

To enter the Honours program in Chemistry, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00 , and also obtained a minimum grade of " $B$ " in CHEM 1310. CHEM 1300, MATH 1500, MATH 1700, PHYS 1020 (1050), and PHYS 1070 are required courses in this program and students are strongly encouraged to complete these courses in first year.

To continue in the Chemistry Honours program, students must maintain a minimum DGPA of 3.00 and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate from the Chemistry Honours program students must achieve a minimum GPA of 3.00 and obtain a minimum grade of " $C$ " on the courses that make up the 120 credit hours of the degree.

## Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Chemistry program may enter the Co-operative Option in April of their second year in Honours Chemistry. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in re-search and industry with participating firms, government agencies and uni-ersity units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program, as indicated in the chart. Students are required to complete 24 credit hours of Chemistry (including CHEM 2470 and either CHEM 2280 or CHEM 2290) before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Options in Section 3.6.

Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Honours program. To continue in and graduate from the Honours Cooperative program a student must have a Degree Grade Point Average of 3.00. Each academic term while registered in Honours must comprise a minimum of 9 credit hours. To graduate with the Honours degree (Cooperative Option), a student must also have a minimum grade of "C" in all courses that contribute to the degree.

Students must apply for and be accepted into the Co-op program. The April application deadline information can be obtained by contacting the Co-op office. Students will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be ap-proved by the department, and the employers will select the students they wish to employ. Stu-dents are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

## Four Year Major Requirements

To enter the Chemistry Major program a student must have completed at least 24 credit hours with a minimum DGPA of 2.00 and also obtained a minimum grade of "C+ in CHEM 1310. CHEM 1300, MATH 1500, MATH 1700, PHYS 1020 (1050), and PHYS 1070 are required courses in this program and students are strongly encouraged to complete these courses in first year.

To continue in the Major program, a student must have a DGPA of 2.00 at each point of assessment.

To graduate from the Chemistry Major degree, students must present a grade of " $C$ " or higher on the 54 credit hours of Chemistry required in the degree plus the specified Mathematics and Physics courses. Additionally, students must obtain a DGPA of 2.00.

Students who, at the end of Year 1, are undecided between the four year Major and Honours programs should note that the prescription for Honours Year 2 satisfies both the Honours and Major program requirements.

## Major Cooperative Option

Students interested in alternating employment terms and academic terms as part of their Major Chemistry program may enter the Co-operative Option in April of their second year in Chemistry. This program provides students with a minimum of 12 months of paid employment by the time they
graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry to this option are the same as those required for entry to the Chemistry Major program. Students are required to complete 24 credit hours of Chemistry (including CHEM 2470 and either CHEM 2280 or CHEM 2290) before they begin their first work term. To continue in the Major program, a student must have a DGPA of 2.00 at each point of assessment. To graduate with the Major degree (Cooperative Option), students must present a grade of " C " or better on the 54 credit hours of Chemistry required in the degree and a Degree Grade Point Average of 2.00 . See the general faculty regulations for B.Sc. (Major) Co-operative Option in Section 3.4.

Students will apply for openings in the Co-operative Option in April of their second year in the Major program. They will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are ad-vised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

## Chemistry Program Focus Areas

Students may elect to take courses that, in combination, make up a Chemistry focus area. Currently, there are eight Chemistry focus areas. They are: Bioanalytical, Biopharmaceutical, Biophysical, Environmental, Materials Science, Organic, Physical, and Quantum / Computational. Each focus area has specific course requirements that students will satisfy in order to graduate and receive the focus area notation on their transcripts. Other focus areas may be selected with approval from the Department Head.

Required Courses for each Chemistry Focus Area (Note: Students are responsible for completing all prerequisite courses required for the completion of a specific Focus Area). The below course listings are not meant to be limiting. Plausible substitutions will be reviewed and approved by the Department of Chemistry on an individual basis.

Bioanalytical: 18 credit hours chosen from: CHEM 2550, CHEM 2370, CHEM 3570, CHEM 4550, CHEM 4590, CHEM 4630, CHEM 4660; plus a minimum of 9 credit hours from: BGEN 3020 (6), MBIO 2020, MBIO 3410, PHYS 2600, PHYS 2610, PHYS 2260, STAT 2000.

Biopharmaceutical: Each of: CHEM 3390, CHEM 3580, CHEM 4580, CHEM 4590, CHEM 4670, CHEM 4690; plus 9 credit hours chosen from: BIOL 2380, BIOL 2410, BIOL 2420, BIOL2520, BIOL 3290, BIOL 4470

Biophysical: 18 credit hours chosen from: CHEM 2370, CHEM 3360, CHEM 3370, CHEM 3490, CHEM 3570, CHEM 4590, CHEM 4620, CHEM 4630, CHEM 4640, CHEM 4700; plus 9 credit hours chosen from: BIOL 2500, BIOL 2520, MBIO 2410, MBIO 3460, MBIO 4540

Environmental: Each of: CHEM 2370, CHEM 2550, CHEM 4550, CHEM 4590, and 6 credit hours of 3000 or 4000 level Chemistry courses; plus at least 9 credit hours chosen from: ENVR 1000, ENVR 2000, ENVR 2180 (BIOL 2380), ENVR 3180, BIOL 4380.

Materials Science: Each of: CHEM 3360, CHEM 3370, CHEM 3490, CHEM 4570, CHEM 4590, CHEM 4680; plus 9 credit hours from: BIOE 3320, ECE 3600, PHYS 2600, PHYS 2610. (MATH 1300 is highly recommended but does not count toward the 9 credit hour of non-Chemistry requirements).

Organic: 27 credit hours from: CHEM 3390, CHEM 3580, CHEM 4580, CHEM 4590, CHEM 4620, CHEM 4630, CHEM 4660, CHEM 4670, CHEM 4680, CHEM 4690. (Note: There are no non-Chemistry courses in the Organic Chemistry Focus Area)

Physical: Each of: CHEM 3360, CHEM 3370, CHEM 3490, CHEM 4640, CHEM 4650, CHEM 4660; plus 9 credit hours from: MATH 2750 (6), MATH 2800, PHYS 2390, PHYS 2490, PHYS 2600, PHYS 2610, PHYS 3680. (MATH 1300 is highly recommended but does not count toward the 9 credit hour of non-Chemistry requirements).

Quantum/Computational: Each of: CHEM 3360, CHEM 3370, CHEM 3580, CHEM 4640, CHEM 4660, CHEM 4670; plus 9 credit hours from: COMP 2160, COMP 2190, MATH 2300, MATH 2600, PHYS 2380, PHYS 4250, PHYS 4520.

## Three Year Requirements

Courses taken as part of a three-year degree program provide an introduction to the major fields of study in Chemistry. Commencing in Fall Term 2010, students will have two options for a three year Degree under the Department of Chemistry.

Option A - Three Year General: As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Chemistry, students must select a minimum of 18 credit hours from the following list of advanced level courses: CHEM 2210, CHEM 2220,

CHEM 2280, CHEM 2290, CHEM 2360, CHEM 2370, CHEM 2400 (CHEM 2380), CHEM 2470, CHEM 3360, CHEM 3370, CHEM 3390, CHEM 3400 (CHEM 3380), CHEM 3570, CHEM 3580, CHEM 3590, CHEM 4360, CHEM 4370, CHEM 4570, CHEM 4580, CHEM 4590, CHEM 4620, CHEM 4630, CHEM 4640, CHEM 4660, CHEM 4670, CHEM 4680, CHEM 4690 (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level).

Courses not allowed for use as advanced level courses in the 3-Year General Degree are: CHEM 2240, CHEM 2550, CHEM 2560, CHEM 2770, CHEM 2780, CHEM 2860, CHEM 4550, CHEM 4600, CHEM 4650, CHEM 4700, and CHEM 4710.

Option B - Three Year B.Sc. - Chemistry Focus: Students that choose this path for their three-year degree program will follow the program chart below. The 24 credit hours of introductory courses and 36 credit hours of advanced level requirements have been prescribed in such a way so that students that follow the chart can seamlessly transfer to a 4-year Chemistry Honours or Major degree program should they choose to do so after the completion of the 90 credit hours listed in the chart.

Students anticipating a transfer to either the four year Major or Honours program at the end of their second or third year should consult with the Departmental Program Advisor before registering.

## Laboratory Exemption Regulations

- valid for two calendar years only
- lab exemption given only one time per course
- laboratory marks are carried forward to the next course attempt
- students are responsible for laboratory questions on tests and examinations
- students must earn a minimum of $60 \%$ on the laboratory to be eligible for an exemption.

## Biochemistry and Biotechnology Programs

The Department of Chemistry, in conjunction with the Department of Microbiology, offers Joint Honours programs, Joint Honours Co-operative Options, Joint four year Major programs and a Joint four year Major Co-operative Options in Biochemistry and Biotechnology. See sections 4.2 Biochemistry Program and 4.4 Biotechnology Program for full details.

### 4.5.2 Chemistry Honours Degree Program Chart

| YEAR 1 | YEAR 2 | YEAR 3 | YEAR 4 |
| :--- | :--- | :--- | :--- |
| HONOURS $^{4}$ (incl. Co-operative Option if selected)120 CREDIT HOURS |  |  |  |

1. MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.
2. PHYS 1020 may be used in place of PHYS 1050; and, in the 3-year degree only - PHYS 1030 may be used in place of PHYS 1070. Students planning on completing a 4-year degree in Chemistry are required to complete PHYS 1070.
3. MATH 1010, MATH 1020, MATH 1190, MATH 1191, COMP 1260 and COMP 1270 may not be used to satisfy this requirement. 4. Students may elect to complete the requirements set out in one of the Chemistry focus areas. If a student opts for one of the focus areas, they should consult with the Department of Chemistry and a Science Student Advisor for information regarding specific course requirements for each focus area.
4. IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.
5. Elective courses should be selected in consultation with the Department of Chemistry and/or a Faculty of Science Student Advisor.

### 4.5.3 Chemistry Major Degree Program Chart

NOTES:

1. MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.
2. PHYS 1020 may be used in place of PHYS 1050; and, in the 3-year degree only - PHYS 1030 may be used in place of PHYS 1070. Students planning on completing a 4-year degree in Chemistry are required to complete PHYS 1070.
3. MATH 1010, MATH 1020, MATH 1190, MATH 1191, COMP 1260 and COMP 1270 may not be used to satisfy this requirement. 4. Students may elect to complete the requirements set out in one of the Chemistry focus areas. If a student opts for one of the focus areas, they should consult with the Department of Chemistry and a Science Student Advisor for information regarding specific course requirements for each focus area.
4. IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.
5. Elective courses should be selected in consultation with the Department of Chemistry and/or a Faculty of Science Student Advisor.
(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)
4.5.4 Chemistry General Degree and Minor Requirements

THREE YEAR B.Sc. General - Chemistry Focus 90 CREDIT HOURS

| CHEM 1300, CHEM 1310 (C) | 21 hours of required 2000 level Chemistry courses: CHEM 2210, CHEM 2220, CHEM 2280, CHEM 2290, CHEM 2400 (CHEM 2380), CHEM 2470, CHEM 2360 |
| :---: | :---: |
| BIOL 1020, BIOL 1030 | 15 credit hours of 2000 level or higher CHEM: Excluding the Chemistry service courses (2240, $2560,2770,2780$ ), Co-op courses (3980, 3990, 4980, 4990) and specialized courses (4600, $4700,4710)$. A minimum of 6 credit hours must be chosen from the $3000 / 4000$ level. |
| MATH $150{ }^{1}$, MATH $1700{ }^{1}$ | 6 credit hours of electives to be chosen from outside the Faculty of Science 18 credit hours of open electives |
| PHYS 1050 ${ }^{2}$, PHYS $1070^{2}$ |  |
| 6 credit hours from the Faculty of Arts. (Should include the student's "W" requirement.) |  |
| THREE YEAR GENERAL 90 CREDIT HOURS |  |
| CHEM 1300, CHEM 1310 (C) | a minimum of 18 credit hours from the following list of advanced level courses: CHEM 2210, CHEM 2220, CHEM 2280, CHEM 2290, CHEM 2360, CHEM 2370, CHEM 2400 (CHEM 2380), CHEM 2470, CHEM 3360, CHEM 3370, CHEM 3400 (CHEM 3380), CHEM 3390, CHEM 3570, CHEM 3580, CHEM 3590, CHEM 4360, CHEM 4370, CHEM 4570, CHEM 4580, CHEM 4590, CHEM 4620, CHEM 4630, CHEM 4640, CHEM 4660, CHEM 4670, CHEM 4680, CHEM 4690 (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level). |
| MINOR |  |
| CHEM 1300, CHEM 1310 (C) | Normally CHEM 2210 and CHEM 2220, plus an additional 6 credit hours of Chemistry |

CHEM 1300, CHEM 1310 (C) Normally CHEM 2210 and CHEM 2220, plus an additional 6 credit hours of Chemistry

## NOTES:

1. MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.
2. PHYS 1020 may be used in place of PHYS 1050; and, in the 3-year degree only - PHYS 1030 may be used in place of PHYS 1070. Students planning on completing a 4-year degree in Chemistry are required to complete PHYS 1070.
3. MATH 1010, MATH 1020, MATH 1190, MATH 1191, COMP 1260 and COMP 1270 may not be used to satisfy this requirement.
4. Students may elect to complete the requirements set out in one of the Chemistry focus areas. If a student opts for one of the focus areas, they should consult with the Department of Chemistry and a Science Student Advisor for information regarding specific course requirements for each focus area.
5. IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.
6. Elective courses should be selected in consultation with the Department of Chemistry and/or a Faculty of Science Student Advisor.
(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

### 4.5.6 Chemistry -900 Level

CHEM 0900 Preparatory Chemistry Cr.Hrs. 0
(Formerly 002.090) A course designed for students with little,
or no background in chemistry who wish to achieve the prerequisites for advanced courses, or for students who require a refresher course in basic chemistry. Concurrent registration in CHEM 0900 and any of CHEM 1300, CHEM 1301, CHEM 1311 or CHEM 1320 is not permitted. (Pass/Fail grade only.) Prerequisite or Concurrent Requirement: Any grade 12 or 40S Mathematics course or equivalent.

### 4.5.6 Chemistry $\mathbf{- 1 0 0 0}$ Level

CHEM 1000 Understanding the World through
Chemistry Cr.Hrs. 3
(Formerly 002.100) This course introduces students to the principles of chemistry necessary for an understanding of contemporary issues in agriculture, the environment, industry, medicine, and the economy. High school chemistry is not required. May be used as a prerequisite (minimum grade "B") for CHEM 1300 or CHEM 1301 (Developmental section). Not to be held with CHEM 1001 or the former 002.125. May not be used to fulfill chemistry requirements in a Chemistry Honours, Major, General or Minor program. Not available to students who have previously obtained credit in, or are concurrently registered in, any 2000 level university

Chemistry course.
CHEM 1030 Carbon Chemistry in Nature and
Society Cr.Hrs. 3
(Formerly 002.103) This course introduces organic molecules and illustrates the principles of organic chemistry with topics from cosmetics and personal care products, the petroleum industry, food preparation chemistry, polymers and plastics, poisons and biological toxins, and risk assessment. May not be used to fulfill chemistry requirements in a Chemistry Honours, Major, General or Minor program. Not available to students who have previously obtained credit in, or are concurrently registered in, any 2000 level university Chemistry course. Not to be held with CHEM 1031 or the former 002.125. Prerequisite: One of CHEM 1000, CHEM 1001 (002.100) (C), CHEM 1300, CHEM 1301 (002.130) (C), Chemistry 40S (or equivalent), or CHEM 0900 (002.090).

CHEM 1300 University 1 Chemistry: Structure and Modelling in Chemistry Cr.Hrs. 3
(Lab Required) (Formerly 002.130) Atomic and molecular models and their applications to chemistry, including a discussion of solid, liquid, and gaseous states, and of mixtures. Not to be held with CHEM 1301. Prerequisites: Applied Mathematics 40S or Pre-calculus Mathematics 40S, or the former Mathematics 40S (300); and Chemistry 40S (or equivalent) or CHEM 0900 (002.090) (P), or a minimum grade of "B" in CHEM 1000 or CHEM 1001 (002.100).

CHEM 1310 University 1 Chemistry: An Introduction to Physical Chemistry Cr.Hrs. 3
(Lab Required) (Formerly 002.131) Thermochemistry, chemical thermodynamics, and chemical kinetics.
Prerequisite: CHEM 1300 or CHEM 1301 (002.130) (C).
CHEM 1320 University 1 Chemistry: An Introduction to Organic Chemistry Cr.Hrs. 3
(Lab Required) (Formerly 002.132) Structures, properties and reactions of organic molecules. Not to be held with CHEM 2210 or CHEM 2211 (002.221) Prerequisite: CHEM 1300 or CHEM 1301 (002.130) (C).

CHEM 1804 UW CHEM-2801 Chemistry \& Society (1000 Level) Cr.Hrs. 3
Campus Manitoba course.

### 4.5.6 Chemistry -2000 Level

CHEM 2210 Introductory Organic Chemistry 1: Structure and Function Cr.Hrs. 3
(Lab Required) (Formerly 002.221) An introduction to the concepts of organic reactivity and bonding in organic molecules. Preparation and properties of functionalized organic molecules. Not to be held with CHEM 1320 (002.132) or CHEM 2211. Prerequisite: CHEM 1310 or CHEM 1311 (002.131) (C).

CHEM 2220 Introductory Organic Chemistry 2: Reactivity and Synthesis Cr.Hrs. 3
(Lab Required) (Formerly 002.222) An introduction to the reactivity of organic compounds and organic spectroscopy. The application of functional group interconversions to syntheses. Not to be held with CHEM 2221. Prerequisite: CHEM 2210 or CHEM 2211 (002.221) (C).

CHEM 2240 Applied Chemistry for Engineers Cr.Hrs. 3 (Formerly 002.224) Bonding, surface chemistry, phase rule, electrochemistry, materials and descriptive inorganic chemistry of selected elements. Prerequisite: CHEM 1300 or CHEM 1301 (002.130) (C).

CHEM 2280 Physical Chemistry: Microscopic Descriptions of Matter Cr.Hrs. 3
(Lab Required) (Formerly 002.228) Molecular based approach to understanding physical behaviour of matter. Introduction to principles of quantum mechanics, electronic structure and bonding, molecular spectroscopy. Not to be held with CHEM 2281. Prerequisites: CHEM 1310 or CHEM 1311(002.131) (C); PHYS 1030 or PHYS 1031 (016.103) (C) or PHYS 1070 or PHYS 1071 (016.107) (C); plus six credit hours of 1000 level mathematics (preferably calculus) with the exception of the former 136.100, MATH 1010 (136.101), MATH 1190, MATH 1191 (136.119), FA 1020 (054.102), or MATH 1020 (136.102).

CHEM 2290 Chemical Energetics and Dynamics: Macroscopic Descriptions Cr.Hrs. 3 (Lab Required) (Formerly 002.229) Chemical energetics, entropy and the second law of thermodynamics, chemical dynamics. Not to be held with CHEM 2291. Prerequisites: CHEM 1310 or CHEM 1311 (002.131) (C); PHYS 1030 or PHYS 1031 (016.103) (C) or PHYS 1070 or PHYS 1071 (016.107) (C); plus six credit hours of 1000 level mathematics (preferably calculus) with the exception of the former 136.100, MATH 1010 (136.101), MATH 1190, MATH

1191 (136.119), MATH 1020 (136.102), or FA 1020 (054.102).

CHEM 2360 Biochemistry 1: Biomolecules and an Introduction to Metabolic Energy Cr.Hrs. 3
(Lab Required) (Formerly 002.236) An introductory course dealing with kinds of molecules encountered in biochemistry, and the concept of metabolic energy as a product of catabolism and a requirement for biosynthesis. This course is also given in Microbiology as MBIO 2360. Not to be held with CHEM 2361, CHEM 2770 (002.277), MBIO 2360, MBIO 2361 (060.236), or MBIO 2770 (060.277). Prerequisites: CHEM 1310 or CHEM 1311 (002.131) (C); and one of BIOL 1030, BIOL 1031, or the former 071.125 (C). NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (preSeptember 2008 regulations). Those students following the new General Degree regulations (effective 2008-09) are able to use this course as part of the 18 credit hours of advanced level Chemistry or Microbiology.

CHEM 2370 Biochemistry 2: Catabolism, Synthesis, and Information Pathways Cr.Hrs. 3
(Lab Required) (Formerly 002.237) An introductory course dealing with the basic metabolic processes that occur in living cells, including the production and use of metabolic energy, the breakdown and synthesis of biomolecules; the synthesis of DNA, RNA and proteins; and the regulation of these processes. This course is also given in Microbiology as MBIO 2370. Not to be held with CHEM 2371, CHEM 2780 (002.278), MBIO 2370, MBIO 2371 (060.237), or MBIO 2780 (060.278). Prerequisites: one of CHEM 2360, CHEM 2361 (002.236), MBIO 2360, or MBIO 2361 (060.236); and CHEM 2210 or CHEM 2211(002.221), both courses with a minimum grade of " C ". NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new General Degree regulations (effective 2008-09) are able to use this course as part of the 18 credit hours of advanced level Chemistry or Microbiology.

CHEM 2400 Inorganic chemistry: Structure and
Applications Cr.Hrs. 3
(Lab Required) Overview of chemical bonding, structure and reactivity across the Periodic Table, illustrated by examples linking Inorganic Chemistry with e.g. materials science and biochemistry. The lab component involves synthesis and analysis of simple inorganic compounds. Not to be held with CHEM 2380, CHEM 2381 or CHEM 2401. Prerequisite: CHEM 1310 or CHEM 1311 (C).

CHEM 2470 Introductory Analytical Chemistry Cr.Hrs. 3 (Lab Required) (Formerly 002.247) A course in quantitative analysis provides training useful for nearly all scientists. It equips the students with the theoretical principles on which the analytical methods are based, with the ability to plan and perform experimental work, to interpret the results. Not to be held with CHEM 2471. Prerequisites: CHEM 1310 or CHEM 1311 (002.131) (C); and three credit hours of mathematics with the exception of the former 136.100, MATH 1010, MATH 1190, MATH 1191, MATH 1020, or FA 1020.

CHEM 2550 Environmental Chemistry Cr.Hrs. 3
(Lab Required) (Formerly 002.255) An introduction to the chemistry of the environment. Emphasis will be on the
composition of the natural environment and the processes of natural and human-introduced chemical species that take place within it. The course will provide students with the chemical basis for understanding the environment and environmental problems. This course is also taught in Environmental Science as ENVR 2550. Prerequisite: CHEM 1310 or CHEM 1311 (002.131) (C).

CHEM 2560 Water Quality Analysis for Engineers Cr.Hrs. 3 (Lab Required) Principles and applications of chemical and instrumental methods for the analysis of water quality. This course is restricted to students in Civil Engineering.

CHEM 2770 Elements of Biochemistry 1 Cr.Hrs. 3 (Lab Required) (Formerly 002.277) Basic concepts of biochemistry including the properties of biomolecules (amino acids and proteins, enzymes, carbohydrates, lipids, and nucleic acids) and aspects of energy production in cells. For students in Agricultural and Food Sciences, Human Ecology, and Four Year Biological Sciences programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or in Microbiology. This course is also given in Microbiology as MBIO 2770. Not be held with CHEM 2360, CHEM 2361 (002.236), MBIO 2360, MBIO 2361 (060.236), CHEM 2860 (002.286), or MBIO 2770 (060.277). Prerequisites: one of CHEM 1310, CHEM 1311 (002.131) (C), or CHEM 1320 (002.132) (C); plus six credit hours of university level biological sciences.
CHEM 2780 Elements of Biochemistry 2 Cr.Hrs. 3 (Lab Required) (Formerly 002.278) The continuation of CHEM 2770 or MBIO 2770, dealing with nitrogen and lipid metabolism, representative biosynthetic pathways, and synthesis and importance of DNA, RNA and proteins. For students in Agricultural and Food Sciences, Human Ecology, and four-year Biological Science programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or Microbiology. This course is also given in Microbiology as MBIO 2780. Not to be held with CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), MBIO 2780 ( 060.278 ) or the former courses 002.235, 002.240, 060.235, 060.240. Prerequisites: one of CHEM 2770 (002.277), MBIO 2770 ( 060.277 ) (C), CHEM 2360, CHEM 2361 (002.236), MBIO 2360, or MBIO 2361(060.236) (C).

CHEM 2860 Chemistry of Biomolecules Cr.Hrs. 3 (Lab Required) (Formerly 002.286) The chemistry of molecules encountered in biochemistry, including their structures, reactions, and physical properties. The concept of metabolic energy in biochemistry. Not to be held with CHEM 2360, CHEM 2361 (002.236), CHEM 2770 (002.277), MBIO 2360, MBIO 2361 (060.236), MBIO 2770 ( 060.277 ), or the former courses $002.240060 .240,002.235$ or 060.235 . Prerequisite: one of CHEM 1310, CHEM 1311 (002.131), or the former 002.128 with a minimum grade of " C ". This course is available only to students registered in the Chemistry Honours or Four Year Major program.

### 4.5.6 Chemistry -3000 Level

CHEM 3360 Elementary Quantum Chemistry and Molecular Bonding Cr.Hrs. 3
(Lab Required)(Formerly 002.336) Elementary quantum
chemistry and its applications to structure and bonding in molecules and solids. Prerequisite: CHEM 2280 (002.228) or

CHEM 2281 or the former 002.230 (C).
CHEM 3370 Symmetry, Spectroscopy and
Structure Cr. Hrs. 3
(Lab Required) (Formerly 002.337) Applications of symmetry in chemistry; molecular spectroscopy; structure of solids.
Prerequisite: CHEM 2280 or CHEM 2281 ( 002.228 ) or the former 002.230 (C).

CHEM 3390 Structural Transformations in Organic Chemistry Cr.Hrs. 3
(Lab Required) (Formerly 002.339) An intermediate course dealing with the reactions of organic chemistry involving functional group transformations and carbon - carbon bond forming reactions. Prerequisite: one of CHEM 2220, CHEM 2221 (002.222), or the former 002.220 (C). CHEM 2290 or CHEM $2291(002.229)$ is recommended.

CHEM 3400 Inorganic Chemistry: Reactivity and Properties Cr.Hrs. 3
(Lab Required) Advanced chemistry of the elements with emphasis on chemical reactivity, electronic structure and physical properties of inorganic compounds. The laboratory focuses on the preparation, structure determination and spectroscopic characterization of inorganic compounds. This course may not be held for credit with CHEM 3380. Prerequisite: CHEM 2400 or CHEM 2380 (C).

CHEM 3490 Introduction of Polymers Cr.Hrs. 3 (Formerly 002.349) An introduction to the formation, structure, physical properties, and degradation of polymers. Prerequisites: one of CHEM 2220, CHEM 2221 (002.222) or the former 002.220 (C); and CHEM 2290 or CHEM 2291 (002.229), or the former 002.230 (C).

CHEM 3570 Biophysical Chemistry Cr. Hrs. 3
The application of physical chemistry to biological problems, with an emphasis on quantitative interpretation. Topics include enzyme kinetics, bioenergetics, transport processes and spectroscopy. Prerequisites: CHEM 2360 and MATH 1500 (or equivalent). CHEM 2280 is recommended.

## CHEM 3580 Methods in Physical Organic

Chemistry Cr.Hrs. 3
(Lab Required) (Formerly 002.358) A course dealing with the application of physical chemical principles to organic reaction mechanisms. Prerequisite: one of CHEM 2220, CHEM 2221 (002.222) or the former 002.220 (C). Prerequisite or concurrent registration: CHEM 2290 or CHEM 2291(002.229).

CHEM 3590 Instrumental Analysis Cr.Hrs. 3 (Lab Required) A course dealing with the theory and use of standard instruments used for chemical and biochemical analyses. An introduction to the interpretation of data obtained from such analyses. This course is designed to follow a classical analytical chemistry course. Not to be held with ENVR 3550 (128.355) or the former 002.347 or the former 002.355. Prerequisite: CHEM 2470 (002.247) (C).

CHEM 3980 Work Term 1 Cr. Hrs. 0
Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only)

University of Manitoba

CHEM 3990 Work Term 2 Cr.Hrs. 0
Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

### 4.5.6 Chemistry -4000 Level

CHEM 4360 Signalling and Regulation of Gene

## Expression Cr.Hrs. 3

(Formerly 002.436) The biochemistry of cell response to external stimuli, with emphasis on animals. Cell surface receptors and ligands; signalling to the nucleus; phosphorylation and proteolysis; transcription; gradients in cell patterning. Not to be held with CHEM 4361. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371(060.237), the former 002.235, or the former 060.235.

CHEM 4370 Glycobiology and Protein Activation Cr.Hrs. 3 (Formerly 002.437) The role of carbohydrate containing biomolecules in biochemistry and their importance for understanding some genetic diseases. The importance of limited proteolysis in activation of biomolecules. Not to be held with CHEM 4371 or the former 002.449. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371(060.237), the former 002.235, or the former 060.235.

CHEM 4550 Aquatic Chemistry Cr.Hrs. 3 (Formerly 002.455) An examination of biogeochemical processes affecting the distribution, speciation and bioavailability of chemical substances in the aquatic environment. The theoretical basis for the chemical behaviour of natural water systems is discussed, as well as the description of processes involved in wastewater treatment. This course is also taught in Environmental Science as ENVR 4550 (128.455). Prerequisite: A grade of "C" or better in one of CHEM 3590, the former 002.347, the former 002.355, or ENVR 3550 (128.355); or permission of the department.

CHEM 4570 Topics in Inorganic Chemistry Cr.Hrs. 3 (Formerly 002.457) A variety of topics from recent literature. This is an advanced 4000 level course. Registration requires departmental permission. This course may not be offered every year - check with department for availability.

CHEM 4580 Topics in Organic Chemistry Cr.Hrs. 3 (Formerly 002.458) Selected topics dealing with the structure and reactivity of organic compounds. This is an advanced 4000 level course. Registration requires departmental permission. This course may not be offered every year check with department for availability.

CHEM 4590 Bioanalytical Methods Cr.Hrs. 3 (Lab Required) This course introduces different methods used currently for the analysis of biological materials. Qualitative and quantitative aspects are explored. Instrumentation is described and practical methods are designed. Not to be held with the former 002.347.
Prerequisite: a grade of "C" or better in CHEM 3590, or ENVR 3550 (128.355), or the former 002.355.

CHEM 4600 Advanced Chemical Techniques Cr.Hrs. 3 (Lab required) (Formerly 002.460) A workshop course consisting of lectures, problem solving, and advanced instrumental techniques. The course is designed to train potential research students in techniques like NMR, mass spectroscopy, and chromatography. This course is required of all final year Honours students in Chemistry. Prerequisite: one of CHEM 3360 (002.336) (C), CHEM 3400 (C), CHEM 3380 (002.338) (C), CHEM 3390 (002.339) (C), or CHEM 3580 (002.358) (C).

CHEM 4620 Biochemistry of Nucleic Acids Cr.Hrs. 3 (Formerly 002.462) The structure of nucleic acids; synthesis and sequence determination; interaction with drugs and protein. Not to be held with CHEM 4621. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), the former 002.235, or the former 060.235.

CHEM 4630 Biochemistry of Proteins Cr.Hrs. 3 (Formerly 002.463) The structure and function of proteins, their physical and chemical properties and methods for studying them. Not to be held with CHEM 4631. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), the former 002.235, or the former 060.235.

CHEM 4640 Spectroscopy, Relaxation and
Structure Cr.Hrs. 3
(Formerly 002.464) A course dealing with quantum mechanical manipulations and illustrations from magnetic resonance and other spectroscopies; relaxation and polarization phenomena. Prerequisite: CHEM 3370 (002.337) (C) or permission of the Instructor.

CHEM 4650 Molecular States and Processes Cr.Hrs. 3 (Formerly 002.465) A course dealing with various aspects of molecular states and processes including student selected topics. Prerequisite: CHEM 3370 (002.337) (C).

CHEM 4660 Computational Chemistry Cr.Hrs. 3
An overview of modern computational methods employed in the study of chemical systems, combining theoretical understanding with practical applications. Prerequisite: CHEM 3360

CHEM 4670 Drug Design and Drug Discovery Cr.Hrs. 3 An understanding of the design, synthesis and interactions of drug molecules. Emphasis will be on novel drug-like molecules in the early stages of drug discovery with special focus on brain diseases and infectious diseases.
Prerequisites: CHEM 2220 (C); and one of CHEM 2360, CHEM 2361, MBIO 2360, MBIO 2361, 002.236, 060.236 (C) or CHEM 2860 (C).

CHEM 4680 Organometallic Chemistry Cr.Hrs. 3 (Formerly 002.468) Chemistry of organometallic compounds of the transition metals and representative elements. Prerequisite: CHEM 3400 (C), or CHEM 3380 (002.338) (C), or CHEM 3390 (002.339) (C).

CHEM 4690 Specific Methods in Organic
Synthesis Cr.Hrs. 3
(Formerly 002.469) Advanced methods and principles of organic synthesis of complex molecules. Prerequisite: CHEM 3390 (002.339) (C).

CHEM 4700 Advanced Biochemistry Laboratory Cr. Hrs. 3 (Lab required) (Formerly 002.470) A laboratory and workshop consisting of lectures, problem solving, and advanced instrumental techniques such as magnetic resonance spectroscopy, mass spectrometry, circular dichroism, x-ray crystallography, fluorescence spectroscopy and computer analysis of protein sequences. This course is required for all final year Honours students in Biochemistry. Prerequisite or concurrent requirement: CHEM 4620 or CHEM 4621; and CHEM 4630 or CHEM 4631.

CHEM 4710 Research Project in Chemistry or Biochemistry Cr.Hrs. 6
(Lab required) (Formerly 002.471) A research project in any aspect of chemistry or biochemistry, chosen in consultation with the course administrator and an appropriate supervising faculty member. Written reports and oral presentation at the end of the project will be required. The course is normally available only to final year students in chemistry programs. Not to be held with CHEM 4711 or MBIO 4530 (060.453). Prerequisite: Permission of the course administrator.

CHEM 4800 Topics in Physical/Theoretical
Chemistry Cr.Hrs. 3
Selected topics related to physical chemistry properties of matter, their measurement, and computational methods for studying them. This is an advanced 4000 level course, registration only by Departmental permission. This course may not be offered every year - check with department for availability.

CHEM 4802 Topics in Analytical Chemistry Cr.Hrs. 3 Selected topics on the most recent and sensitive techniques described in the literature in the Analytical, Bioanalytical and Environmental areas. A selection of topics among separation, surface, ionization, spectroscopy, voltammetry and spectrometry techniques will be covered. This is an advanced 4000 level course, registration only by Department permission. This course may not be offered every year check with department for availability.

CHEM 4804 Topics in Biochemistry Cr.Hrs. 3
Selected advanced topics relevant to the study of biomolecules. This is an advanced 4000 level course, registration only by Departmental permission. This course may not be offered every year - check with department for availability.

CHEM 4980 Work Term 3 Cr.Hrs. 0
Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

CHEM 4990 Work Term 4 Cr.Hrs. 0
Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

### 4.6 Department of Computer Science

Head: John Anderson
Campus Address/General Office: E2-445 EITC

Telephone: 2044748313
Email Address: queries@cs.umanitoba.ca
Website: www.cs.umanitoba.ca

### 4.6.1 Program Information

Computer technology continues to advance and computer applications are found in all fields and disciplines. As new applications proliferate, opportunities for careers in computing will continue to be strong. Both the Major and the Honours programs offer a co-op option so students may combine education with employment experience.

The department must approve a student's Honour or Major program prior to registration for each Fall/Winter Term. Students must also obtain departmental approval for any and all revisions to their program.

The Computer Science Honours and Major programs, including the Coop programs, and the Software Engineering area of specialization, are accredited by the Computer Science Accreditation Council.

## Honours

The Honours program in Computer Science at the University of Manitoba was the first Honours program in Canada to be given professional accreditation by the Canadian Information Processing Society. The program provides an opportunity to study the subject in greater depth than the other programs in Computer Science and leads to an Honours Bachelor of Computer Science degree (B.C.Sc.). In addition, this program gives professional preparation for careers in areas such as software engineering, system design or project management.

An outline of the Honours program is provided below. MATH 1700 or equivalent is strongly recommended as an option. Optional courses are selected in consultation with the department advisor.

To enter the Honours program in Computer Science, a student must have completed at least 24 credit hours with a minimum GPA of 3.00 , and also obtained a minimum grade of " $B$ " in COMP 1020. Students are strongly encouraged to complete MATH 1300 and MATH 1500 (or equivalents) with at least a "C" average prior to entering the Computer Science Honours program. Failure to complete these first year Mathematics requirements will result in the inability to register for certain 2000 level required courses.

To continue in the Computer Science Honours program, students must maintain a minimum GPA of 3.00 and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate from the Computer Science Honours program students must achieve a minimum GPA of 3.00 and obtain a minimum grade of "C" on the courses that make up the 120 credit hours of the degree.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their pro-grams include at least 15 credit hours of study in science, engineering, or business, and at least 9 credit hours of study in the humanities or social sciences.

## Honours Cooperative Option

The first class of students graduated from the Cooperative program in Oc-tober 1983. This program provides students with a total of 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms in Winnipeg as well as other parts of Canada. For example, students have, in the past, found employment in Calgary, Edmonton, Toronto, Vancouver and Ottawa, and they have found the program an invaluable preparation for their working lives.

Students interested in alternating employment terms and academic terms as part of their Honours Computer Science program may apply to enter the Cooperative Option in their second year in Honours Computer Science. The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program, as indicated in the chart below.

Students should refer to the general faculty regulations for Cooperative Options in Section 3.6, especially for information on performance requirements.

Students should note that the course and grade requirements for the Coop-erative Option are the same as that of the regular Honours program. REMINDER: Students must complete at least nine (9) credit hours per each Fall and Winter Term (or equivalent for cooperative students) to remain in the Honours program.

To graduate with the Honours degree, a student must present a minimum grade of " C " in each course which contributes to the degree and a GPA of 3.00 .

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their pro-grammes include at least 15 credit hours of study in science, engineering, or business, and at least nine (9) credit hours of study in the humanities or social sciences.

Students in this program will normally graduate following the completion of the Year 4 academic requirements in December, will receive their degree in February, and will be eligible to attend the May Convocation.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students will apply for openings in the Cooperative Option in April of their second year in the Honours program. They will be notified of their provisional acceptance in the program in September.

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The employment terms will be designed to provide students with the op-portunity to acquire practical experience in a computer installation site and to acquire insight into areas of specialization within the computing field. Students can also typically earn enough to defray the cost of their university education.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each of their three employment terms.

## Four Year Major

To enter the Major Degree program in Computer Science, a student must have completed at least 24 credit hours with a minimum GPA of 2.00 , and also obtained a minimum grade of " $\mathrm{C}+$ " in COMP 1020. Students are strongly encouraged to complete MATH 1300 and MATH 1500 (or equivalents) with at least a " C " average prior to entering the Computer Science Honours program. Failure to complete these first year Mathematics requirements will result in the inability to register for certain 2000 level required courses.

To continue in the Major program a student must maintain a minimum GPA of 2.00 .

To graduate with the Computer Science Major degree, a student must present a minimum grade of "C" in: STAT 1000, COMP 2080, COMP 2130, COMP 2140, COMP 2150, COMP 2160, COMP 2280, COMP 3350, COMP 3370, COMP 3430 and in each of the 21 credit hours of 3000 and 4000 level Computer Science courses that apply to the Computer Science component of their degree program. Additionally, students must achieve a minimum GPA of 2.00 on the courses that contribute to the 120 credit hours of the degree.

This program is suitable for those students interested in combining a fairly extensive program in Computer Science with broad coverage of another subject or subjects of their choice (Science or non-Science). The program offers greater scheduling flexibility, more relaxed entrance requirements, and a wider range for the inclusion of electives from other disciplines than the Honours program, but it is not considered to offer the same professional training as the Honours program. Admission to graduate programs may be conditional upon completion of additional courses. Students intending to proceed to a master's degree from the four year Major program must consult with the department at the beginning of their second year of undergraduate study and in each subsequent year.

The student will be able to transfer to the Honours program at the end of the second year, provided that departmental
and faculty requirements for the Honours program at that stage are satisfied.

Students, who at the end of Year 1 are undecided between the four year Major program and the Honours program, should note that the required courses in Year 2 Honours satisfy the requirements for both the Honours and Major programs. It is suggested that students with the necessary prerequisite standing in Year 1 may wish to register in the courses listed for Year 2 of the Honours program, and thus keep both options open.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programmes include at least 15 credit hours of study in science, engineering, or business, and at least nine (9) credit hours of study in the humanities or social sciences. Students may be allowed to take up to 48 credit hours of courses outside the Faculty of Science with departmental permission, despite the faculty maximum of 36 credit hours. The permission would typically be granted if a student is completing a minor outside of Science and may have completed a variety of electives outside the Faculty prior to declaring a minor in one department.

## Four Year Major Cooperative Option

To continue in the Major program a student must maintain a minimum GPA of 2.00.

To graduate with the Major degree, a student must present a minimum grade of "C" in: STAT 1000, COMP 2080, COMP 2130, COMP 2140, COMP 2150, COMP 2160, COMP 2280, COMP 3350, COMP 3370, COMP 3430 and in each of the 21 credit hours of 3000 and 4000 level Computer Science courses that apply to the Computer Science component of their degree program. Students must also obtain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programmes include at least 15 credit hours of study in science, engineering, or business, and at least 9 credit hours of study in the humanities or social sciences. Students may be allowed to take up to 48 credit hours of courses outside the Faculty of Science with departmental permission, despite the faculty maximum of 36 credit hours. The permission would typically be granted if a student is completing a minor outside of Science and may have completed a variety of electives outside the Faculty prior to declaring a minor in one department.

This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms in Winnipeg as well as other parts of Canada.

Students interested in alternating employment terms and academic terms as part of their four year Major program in Computer Science may apply to enter the Cooperative Option in their third year of the four year Major pro-gram in Computer Science. The course and grade requirements for entry to this option are the same as those required for entry to the regular four year Major program, as indicated in the chart above. Students should refer to the general faculty regulations for Cooperative Options in Section 3.4.

Students should note that the course and grade requirements for the Cooperative Option are the same as that for the regular Major program. Students in this program will normally graduate following the completion of the Year 4 academic requirements in December, will receive their degree in February, and will be eligible to attend the May Convocation.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to em-ploy. Students will apply for openings in the Cooperative Option in April of their second year in the Major program. They will be notified of their provisional acceptance in the program in September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The employment terms will be designed to provide students with the opportunity to acquire practical experience and insight into areas of specialization within the computing field. Students can also typically earn enough to defray the cost of their university education.

Students are required to register in, and pay fees for, each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each of their three employment terms.

## Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Computer Science, students must select a minimum of 18 credit hours from the 2000, 3000, and (or) 4000 level courses offered by the department (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.).

### 4.6.3 Computer Science - Mathematics Joint Honours Program (Including Co-op if selected)

The departments of Computer Science and Mathematics offer a joint Honours program for in-depth study in both Computer Science and Mathematics.

## Honours Requirements

To enter the Joint Honours Computer Science-Mathematics program, the student must have a minimum grade of " B " in each of COMP 1020, MATH 1300 and MATH 1700 (or any equivalent), and have satisfied the Faculty of Science requirements for entry to the honours program. It is recommended that STAT 2000 be completed in University 1 as an elective.

| YEAR 1 | YEAR 2 | YEAR 3 | YEAR 4 |

| 6 credit hours of electives |  | 12 credit hours of 3000 or 4000 level Mathematics courses, of which at least 3 credit hours must be 4000 level |  |
|  | Work Term (if Co-op Selected) ${ }^{4}$ : | Work Term (if Co-op Selected) ${ }^{4}$ : | Work Term (if Co-op Selected) ${ }^{4}$ : |
|  | COMP 2980 | COMP 3980 | COMP 4980 |
| 30 Hours | 30 Hours | 30 Hours | 30 Hours |

## NOTES:

1 MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1310 may be taken in place of MATH 1300; MATH 1710 may be taken in place of MATH 1700 .

2 As there are no electives in Year 2 of the program, students should complete the written English requirement in University 1. If not completed in University 1, a "W" course must be completed prior to Year 3 in addition to the required Year 2 courses.
3 Students in this program will not take COMP 2130 or COMP 3130. COMP 2130 is waived as a prerequisite for students in this program.
4 When chosen, the Cooperative Option work terms $(2980,3980,4980)$ will normally be completed during the Summer Terms following years 2,3 , and 4 respectively. (Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

### 4.6.4 Computer Science - Physics \& Astronomy Joint Honours Program

The departments of Computer Science and Physics \& Astronomy offer a joint Honours program for in-depth study in both Computer Science and Physics \& Astronomy.

To enter the Joint Honours Computer Science-Physics program, the student must have a minimum grade of "B" in each of PHYS 1050 (or "B+" in PHYS 1020), PHYS 1070, MATH 1300, MATH 1500, MATH 1700 (or any equivalent), COMP 1010 and COMP 1020. Students must complete a minimum of 9 credit hours per team in each Fall and Winter term.

To graduate with the Honours degree, a student must obtain a minimum GPA of 3.00 and present a minimum grade of " C " in each course that contributes to the degree

The department must approve a student's Honour or Major program each session. Students must also obtain departmental approval for any and all revisions to their program.

| YEAR 1 | YEAR 2 | YEAR 3 | YEAR 4 |
| :---: | :---: | :---: | :---: |
| JOINT HONOURS (Including Cooperative Option if selected) 120 CREDIT HOURS |  |  |  |
| PHYS 1050 (B) (or PHYS 1020 $(\mathrm{B}+))$ and PHYS $1070^{1}$ (B) | $\begin{aligned} & \text { PHYS 2260, PHYS 2380, PHYS } \\ & \text { 2390, PHYS 2490, PHYS } 2650 \end{aligned}$ | PHYS 2600, PHYS 2610, PHYS 3380, PHYS 3670, PHYS 3680 | 15 credit hours of 3000 and 4000 level Honours Physics courses, with at least 6 credit hours at the 4000 level |
| COM | COMP 2080, COMP 2130, COMP 2140, COMP 2160, | COMP 2190, COMP 3170, COMP 3430 | 位 |

### 4.6.5 Computer Science - Statistics Joint Honours Program

The departments of Computer Science and Statistics offer a joint Honours program for in-depth study in both Computer Science and Statistics.

To enter the Joint Honours Computer Science-Statistics Program, the student must have a "B" or better in COMP 1020 and in STAT 2400 and a "C+" or better in MATH 1300, MATH 1500 and MATH 1700 or any equivalent courses.

To graduate with the Honours degree a student must present a minimum grade of " C " in each course that contributes to the degree. In addition, the student must achieve a minimum DGPA of 3.00 and a minimum grad of " $\mathrm{C}+$ " in each of the program specific courses in Statistics.

Both departments must approve a student's Honours program each session. Students must also obtain approval from both departments for any and all revisions to the program.

### 4.6.6 Computer Science -1000 Level

COMP 1010 Introductory Computer Science 1 Cr.Hrs. 3 (Lab Required) (Formerly 074.101) An introduction to computer programming using a procedural high level language. Not to be held with COMP 1011 or COMP 1012. Prerequisite: any grade 12 or 40 S Mathematics, or equivalent.

COMP 1012 Computer Programming for Scientists and Engineers Cr.Hrs. 3
(Lab Required) An introduction to computer programming suitable for solving problems in science and engineering. Students will implement algorithms for numerical processing,
statistical analysis and matrix operations. Not to be held with COMP 1010. Prerequisite: Mathematics 40 S or equivalent. Co-requisite: MATH1500 (or equivalent).

COMP 1020 Introductory Computer Science 2 Cr.Hrs. 3 (Lab Required) (Formerly 074.102) More features of a procedural language, elements of programming. Not to be held with COMP 1021. Prerequisite: COMP 1010 or COMP 1011 (074.101) (C); or COMP 1012 (C) or High School Computer Science $40 \mathrm{~S}(75 \%)$ and any grade 12 or 40 S Mathematics, or equivalent.

COMP 1260 Introductory Computer Usage 1 Cr.Hrs. 3 (Formerly 074.126) This course offers an introduction to modern computer services. Areas covered will include word

University of Manitoba
processing, spreadsheets, data management systems and graphics. No prior computer knowledge is necessary. May not hold with COMP 1261. May not be taken within the Computer Science Honours or Major program.

COMP 1270 Introductory Computer Usage 2 Cr.Hrs. 3 (Formerly 074.127) Using advanced tools to design web pages. Students will also learn how to make effective presentations, work in other operating system environments, use file transfer tools, apply simple script programming to web page designs, and understand current issues relating to technology in society. May not hold with COMP 1271. May not be taken within the Computer Science Honours or Major program. Recommended Prerequisite: COMP 1260, COMP 1261 (074.126) or equivalent knowledge is strongly recommended.

### 4.6.6 Computer Science - 2000 Level

COMP 2080 Analysis of Algorithms Cr.Hrs. 3
(Formerly 074.208) Methods of analyzing the time and space requirements of algorithms. Average case and worst case analysis. Models of computation. Prerequisites: COMP 2130 (074.213) (C); and one of COMP 2140 (074.214), the former 074.206, or COMP 2061 (C). STAT 1000 or STAT 1001 is strongly recommended.

## COMP 2130 Discrete Mathematics for Computer

Science Cr.Hrs. 3
(Formerly 074.213) An introduction to the set theory, logic, integers, combinatorics and functions for today's computer scientists. Prerequisites: COMP 1020 or COMP 1021 (C), and a "C" average in one of: MATH 1210, MATH 1300, MATH 1301 (136.130), MATH 1310 (136.131); and one of: MATH 1500, MATH 1501(136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169).

COMP 2140 Data Structures and Algorithms Cr.Hrs. 3 (Lab Required) (Formerly 074.214) Introduction to the representation and manipulation of data structures. Topics will include lists, stacks, queues, trees, and graphs. Not to be held with COMP 2061 or 074.206. Prerequisites: one of COMP 1020, COMP 1021 (074.102), or the former 074.123 (C).

## COMP 2150 Object Orientation Cr.Hrs. 3

(Formerly 074.215) Design and development of objectoriented software. Topics will include inheritance, polymorphism, data abstraction and encapsulation. Examples will be drawn from several programming languages. Not to be held with the former 074.215 or 074.227. Prerequisite: COMP 2160 ( 074.216 ); and one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C).

COMP 2160 Programming Practices Cr.Hrs. 3 (Lab Required) (Formerly 074.216) Introduction to issues involved in real-world computing. Topics will include memory management, debugging, compilation, performance, and good programming practices. Not to be held with the former 074.225. Prerequisite: COMP 1020 or COMP 1021 (074.102) (C).

COMP 2190 Introduction to Scientific Computing Cr.Hrs. 3 (Formerly 074.219) An applied computational course
introducing topics such as approximation by polynomials, solution of non-linear equations, linear systems, simulation and computational geometry. May not hold with COMP 2191. Prerequisites: One of COMP 1020 or COMP 1021 (074.102), or COMP 1012 (C); and one of MATH 1500, MATH 1501 (136.150) (C), MATH 1510 (136.151) (C), MATH 1520 (136.152) (C), the former 136.153 (C), or MATH 1690 (136.169) (C). Prerequisite or concurrent registration: One of MATH 1300, MATH 1301, or MATH 1310.

COMP 2280 Introduction to Computer Systems Cr.Hrs. 3 (Lab Required) (Formerly 074.228) Data representation and manipulation, machine-level representation of programs, assembly language programming, and basic computer architecture. Not to be held with the former 074.222 or 074.240; also not available to students who have previously completed ECE 3610. Prerequisites: COMP 2140 (074.214) (C), COMP 2160 (074.216) (C), and COMP 2130 (074.213) (C).

COMP 2980 Workterm 1 Cr.Hrs. 0
(Formerly 074.298) Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the fourmonth professional assignment. (Pass/Fail)

### 4.6.6 Computer Science -3000 Level

## COMP 3010 Distributed Computing Cr.Hrs. 3

 (Formerly 074.301) Introduction to distributed computing. Topics include task models, server-side computing, database connectivity, information sharing. Prerequisite: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C); and COMP 2150 (074.215).COMP 3020 Human-Computer Interaction 1 Cr.Hrs. 3 (Formerly 074.302) Human-computer interaction: human factors and usability, user-centered design, prototyping, usability evaluation. Not to be held with the former 074.371. Prerequisite: one of COMP 2140 (074.214), the former 074.206 , or COMP 2061 (C). A course in cognitive psychology, such as PSYC 2480 (017.248), is recommended.

COMP 3030 Automata Theory and Formal
Languages Cr.Hrs. 3
(Formerly 074.303) An introduction to automata theory, grammars, formal languages and their applications. Topics: finite automata, regular expressions and their properties; context-free grammars, pushdown automata and properties of context-free languages; turing machines. Applications: lexical analysis, text editing, machine design, syntax analysis, parser generation. Prerequisites: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C); and COMP 2080 (074.208) (C).

## COMP 3040 Technical Communication in Computer

Science Cr.Hrs. 3
(Formerly 074.304) This course is designed to help students become more effective and confident writers in the context of the computing profession. Students will be introduced to a broad range of written and oral presentation styles used in the computing workplace. Prerequisite: Students must be enrolled in third year (or higher) of a majors or honours
programme in the Department of Computer Science.
COMP 3090 Digital Logic 2 Cr.Hrs. 3
(Formerly 074.309) Design and implementation of digital circuits. Minimization and state reduction, asynchronous circuits, arithmetic circuits, implementation using modern hardware techniques. Not to be held with ECE 2200, or the former 074.342, 074.447 or 024.422. Prerequisite: COMP 2280 (074.228) (C); or both of the former 074.222 and 074.223(C).

## COMP 3170 Analysis of Algorithms and Data

Structures Cr.Hrs. 3
(Formerly 074.317) Fundamental algorithms for sorting, searching, storage management, graphs, databases and computational geometry. Correctness and analysis of those algorithms using specific data structures. An introduction to lower bounds and intractability. Prerequisites: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C); and COMP 2080 (074.208) (C).

COMP 3190 Introduction to Artificial Intelligence Cr.Hrs. 3 (Formerly 074.319) Principles of artificial intelligence: problem solving, knowledge representation and manipulation; the application of these principles to the solution of 'hard' problems. Prerequisite: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C).

COMP 3290 Introduction to Compiler Construction Cr.Hrs. 3 (Formerly 074.329) Introduction to the standard compiler phases: scanning, parsing, symbol-table management, code generation, and code optimization. The emphasis is on the simpler techniques for compiler construction such as recursive descent. Prerequisites: COMP 2140 (or 074.214 or 074.206 or COMP 2061)(C) and COMP 2280 ( 074.228 or 074.222 or ECE 3610)(C). COMP 2160 (074.216) is recommended.

COMP 3350 Software Engineering 1 Cr.Hrs. 3 (Formerly 074.335 ) Introduction to software engineering. Software life cycle models, system and software requirements analysis, specifications, software design, testing and maintenance, software quality. Prerequisites: COMP 2150 ( 074.215 ) (C), or COMP 2061(074.206) (C).

COMP 3370 Computer Organization Cr.Hrs 3 (Formerly 074.337) Principles of computer systems architecture, organization and design. Performance, instruction sets, processors, input/output, memory hierarchies. Prerequisite: COMP 2280 ( 074.228 or $074.222)(\mathrm{C})$ or ECE 3610 (C).

COMP 3380 Databases Concepts and Usage Cr.Hrs. 3 (Formerly 074.338) An introduction to database systems including the relational, hierarchical, network and entityrelationship models with emphasis on the relational model and SQL. Prerequisite: one of COMP 2140 ( 074.214 ), the former 074.206, or COMP 2061(C).

COMP 3430 Operating Systems Cr.Hrs. 3 (Lab Required) (Formerly 074.343) Operating systems, their design, implementation, and usage. Not to be held with the former 074.450 or 074.460 . Prerequisites: one of COMP 2140 ( 074.214 or 074.206 or COMP 2061)(C); and COMP 2280 (C) or ECE 3610 (C). COMP 2160 (074.216) is recommended.

COMP 3440 Programming Language Concepts Cr.Hrs. 3 (Formerly 074.344) An introduction to major concepts involved in the design of modern programming languages. The imperative, functional, and logical families and differences between them. Facilities for high level data and control structures, modular programming, data typing, and other topics will be covered. Not to be held with the former 074.310 or 074.348 . Prerequisite: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C).

COMP 3490 Computer Graphics 1 Cr. Hrs. 3
(Formerly 074.349) An introductory course in computer graphics including topics such as raster graphics, two and three dimensional transforms, and simple rendering. Prerequisite: one of COMP 2190, COMP 2191 (074.219) (C), or a calculus or algebra course at the 2000 level or higher (C).

COMP 3620 Professional Practice in Computer
Science Cr.Hrs. 3
(Formerly 074.362) Ethical, moral, and legal issues in the development and use of computer systems; standards of practice; implications of advanced computer systems. Prerequisite: one of COMP 2140 ( 074.214 ), the former 074.206, or COMP 2061(C).

COMP 3720 Computer Networks 1 Cr.Hrs. 3 (Lab Required) (Formerly 074.372) This courses examines the principles of computer networks, including network architectures, algorithms, and performance. Not to be held with ECE 3700 or the former 074.430. Prerequisites: COMP 2140 ( 074.214 ) (C) and COMP 2280 ( 074.228 ) (C).

COMP 3820 Introduction to Bioinformatics
Algorithms Cr.Hrs. 3
An introduction to problems in molecular biology and computational solutions. Focus on design and analysis of efficient algorithms. Prerequisites: COMP 2080 (074.208) and MBIO 2410 (C); or permission of instructor. Suggested concurrent requirement: COMP 3170.

COMP 3980 Workterm 2 Cr.Hrs. 0
(Formerly 074.398) Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the fourmonth professional assignment. (Pass/Fail). Prerequisite: COMP 2980 (074.298) (P).

### 4.6.6 Computer Science -4000 Level

COMP 4020 Human-Computer Interaction 2 Cr.Hrs. 3 (Formerly 074.402) Advanced issues in the field of humancomputer interaction. Topics will be selected from current research and development issues in the field of HCl . Prerequisite: COMP 3020 ( 074.302 ) (C). A course in cognitive psychology such as PSYC 2480 ( 017.248 ) is recommended.

COMP 4050 Project Management Cr. Hrs. 3 (Formerly 074.405 ) Introduction to the issues involved in managing large, complex software projects. Prerequisite: COMP 3350 (074.335) (C).

COMP 4060 Topics in Computer Science Cr. Hrs. 3 (Formerly 074.406 ) This course will examine topics of
interest at the fourth-year level. Specific topics will vary from year to year. Topics will be selected from current research in computer science. Prerequisite: Departmental permission.

COMP 4140 Introduction to Cryptography and
Cryptosystems Cr.Hrs. 3
(Formerly 074.414) Description and analysis of cryptographic methods used in the authentication and protection of data. Classical cryptosystems and cryptoanalysis, the Advanced Data Encryption Standard (ADES) and Public-key cryptosystems. Prerequisite: COMP 2130 (074.213) (C). Students must be registered in fourth year of a Major or Honours programme in the Department of Computer Science.

COMP 4180 Intelligent Mobile Robotics Cr.Hrs. 3
Topics include artificial intelligence, computer vision, humanrobot interaction, and multi-robot systems. These abstract components are grounded in the problem of developing a team of intelligent mobile robots. All topics are covered with specific emphasis on applied problems, e.g. real-time performance. Not to be held with the former COMP 4060 "Mobile Robotics". Prerequisites: COMP 2160 (074.216) and COMP 3190 (074.319) (C).

COMP 4190 Artificial Intelligence Cr.Hrs. 3 (Formerly 074.419) Reasoning with temporal knowledge; causal reasoning; plausible reasoning; nonmonotonic reasoning; abductive reasoning. Prerequisite: COMP 3190 (074.319) (C).

COMP 4200 Expert Systems Cr.Hrs. 3
Organization of expert systems; knowledge representation in expert systems; inference; knowledge engineering; tools for building expert systems; limitations of expert systems.
Prerequisite: COMP 3190 (074.319) (C).
COMP 4340 Graph Theory Algorithms 1 Cr.Hrs. 3 (Formerly 074.434) Spanning trees, connectivity, planar graphs, directed graphs, networks, colouring problems and tours are studied and their applications to computer science will be highlighted. Prerequisite: COMP 3170 (074.317) (C).

COMP 4350 Software Engineering 2 Cr.Hrs. 3 (Formerly 074.435) Advanced treatment of software development methods. Topics will be selected from requirements gathering, design methodologies, prototyping, software verification and validation. Prerequisite: COMP 3350 (074.335) (C).

COMP 4360 Machine Learning Cr.Hrs. 3
(Formerly 074.436) Learning strategies; evaluation of learning; learning in symbolic systems; neural networks, genetic algorithms. Prerequisite: COMP 3190 (074.319) (C).

COMP 4380 Database Implementation Cr.Hrs. 3 (Formerly 074.438) Implementation of modern database systems including query modification/optimization, recovery, concurrency, integrity, and distribution. Prerequisite: COMP 3380 (074.338) (C).

## COMP 4420 Advanced Design and Analysis of

Algorithms Cr.Hrs. 3
(Formerly 074.442) Algorithm design with emphasis on formal techniques in analysis and proof of correctness. Computational geometry, pattern matching, scheduling, numeric algorithms, probabilistic algorithms, approximation
algorithms and other topics. Prerequisites: COMP 3170 (074.317) (C); and STAT 1000 or STAT 1001 (005.100) (C).

COMP 4430 Operating Systems 2 Cr.Hrs. 3
(Formerly 074.443) Design and implementation of modern operating systems. Detailed analysis of an open source modern operating system and hands-on experience with its kernel and major components. Prerequisites: COMP 2160 (074.216) (C) and COMP 3430 (074.343) (C).

COMP 4490 Computer Graphics 2 Cr.Hrs. 3
(Formerly 074.449) Methods in computer graphics including topics such as representation of curves and surfaces, viewing in three dimensions, and colour models. Prerequisite: COMP 3490 (074.349) (C).

COMP 4510 Introduction to Parallel Computation Cr.Hrs. 3 (Formerly 074.451) An overview of the architectures of current parallel processors and the techniques used to program them. Not to be held with ECE 4530 or the former 024.446. Prerequisites: COMP 3370 (074.337) (C) and COMP 3430 (074.343) (C).

COMP 4520 Undergraduate Honours Project Cr. Hrs. 3 (Formerly 074.452) A research based project on a specific area of computer science. Students must find a faculty supervisor and write a proposal in their penultimate term. If acceptable, the defined research is to be carried out in the student's final term. Permission to take the course is given on an individual basis. Available to 4th Year students only. Prerequisite: departmental permission.

COMP 4550 Real-Time Systems Cr.Hrs. 3 (Formerly 074.455) An introduction to the theory and practice of real-time systems. Topics include the design of real-time systems, scheduling, event based processing, and real-time control. This course may not be held for credit if a student has previously completed both of ECE 4240 and ECE 3760. Prerequisites: COMP 3430 (074.343) (C) and COMP 3370 (074.337) (C).

COMP 4560 Industrial Project Cr.Hrs. 3
(Formerly 074.456) Students will work in teams on an industrial project. Projects are supplied by the Department. Prerequisites: COMP 3350 (074.335) (C) and departmental permission.

COMP 4580 Computer Security Cr.Hrs. 3
(Lab Required) (Formerly 074.458) Computer security and information management. This course will examine state-of-the-art knowledge about the issues relevant to data and computer security. Prerequisite: COMP 3430 (074.343) (C); and COMP 3720 (074.372) or the former 074.430 (C).

COMP 4690 Computer Systems and Architecture Cr.Hrs. 3 (Formerly 074.469) Investigation of today's modern computer architecture and system design concepts, including requirements, specifications, and implementation. Instruction sets, instruction-level parallelism, speculative execution, multi-threaded architectures, memory hierarchy, multiprocessors, storage design and implementation, and interconnection networks. Prerequisite: COMP 3370 (074.337) (C).

COMP 4710 Introduction to Data Mining Cr.Hrs. 3
Introduction to data mining concepts and their applications. Prerequisite: COMP 3380 ( 074.338 ) or consent of
department.
COMP 4720 Computer Networks 2 Cr.Hrs. 3 (Formerly 074.472) This course examines advanced topics in computer networks, including network security, network management, performance, and multimedia networking. Prerequisite: COMP 3720 ( 074.372 ) or the former 074.430 (C). Corequisite: COMP 3430 ( 074.343 ) (C).

COMP 4740 Advanced Databases Cr.Hrs. 3 (Formerly 074.474) Parallel, distributed, object-oriented, object-relational, and XML databases; other emerging database technologies. Prerequisite: COMP 3380 (074.338) (C).

COMP 4980 Workterm 3 Cr.Hrs. 0
(Formerly 074.498) Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the fourmonth professional assignment. (Pass/Fail). Prerequisite: COMP 3980 (074.398) (P).

### 4.7 Interdisciplinary Course in Forensic

## Science Course Description

FORS 2000 Introductory Forensic Science Cr.Hrs. 3 Survey course which introduces forensic science via a series of guest lectures provided by experts from within the university and from the community (e.g., Winnipeg Police, RCMP, Chief Medical Examiner, etc.). Multidisciplinary topics will be covered including how a case is studied, use of scientific techniques in investigations, collection of evidence, the role of the expert witness, and presentation of evidence in court. Prerequisites: BIOL 1030 (C+), CHEM 1310 (C+).

### 4.8 Genetics Program

Program Director: Gary Anderson
Campus Address/General Office: 212 Biological Sciences Building
Telephone: 2044749245
Email Address: andersow@cc.umanitoba.ca
Website: umanitoba.ca/science/biological sciences

The Faculty of Science offers an interdisciplinary program leading to a B.Sc. (Honours) degree in Genetics. Genetics is the science of heredity dealing with the mechanisms of inheritance and has generated concepts basic to modern biology. Three areas are represented in this program: classical genetics, population genetics, and molecular genetics. Courses from Arts, Agricultural and Food Sciences, and Medicine are included in this program.

## Genetics Entry, Continuation, and Graduation requirements <br> Honours

To enter the Honours program in Genetics, a student must have completed at least 24 credit hours with a minimum GPA of 3.00 , and also obtained a minimum grade of " B " in

BIOL 1030, and a minimum grade of " $\mathrm{C}^{+}$" in CHEM 1310. STAT 1000, MATH 1500 and the additional 3 credit hours of specified Mathematics courses are program requirements and students are strongly encouraged to complete these courses in first year.

* Students interested in studying Genetics should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Genetics Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours de-gree, a student must maintain a minimum 3.00 GPA and achieve a minimum grade of " $C$ " on all courses that make up the 120 credit hours of the degree.

## Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Genetics program may enter the Co-operative Option in April of their second year in Genetics Honours. This five year program provides students with minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry and continuation in the Co-operative Option are the same as that for regular Honours program (see above). Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Each academic term in the third and subsequent years must comprise nine (9) credit hours. Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

Students must apply for openings in the Cooperative Option and should check with the Co-op office for the April deadline information. They will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the students receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guar-antee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to deter-mine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each 4-month employment term.

University of Manitoba

## Major

To enter the Major Degree program in Genetics, a student must have completed at least 24 credit hours with a minimum GPA of 2.00, and also obtained a minimum grade of "C+" in BIOL 1030, and a minimum grade of "C" in CHEM 1310. STAT 1000, MATH 1500 and the additional 3 credit hours of specified Mathematics courses are program requirements and students are strongly encouraged to complete these courses in first year.

* Students interested in studying Genetics should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Genetics Major Degree program, students must maintain a minimum GPA of 2.00.

To graduate with the Bachelor of Science (Major) in Genetics, a student must obtain passing grades on all courses, obtain a minimum GPA of 2.00 on the 120 credit hours that make up the degree, and a minimum grade of $C$ in all required and optional courses that contribute to the Major.

## Major Cooperative Option

Students interested in alternating academic terms and terms of paid em-ployment as part of their Genetics Major program may enter the Co-operative Option in April of their second year. This five year program provides students with minimum

12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry and continuation in the Co-operative Option are the same as that for regular Major Degree program (see above). Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.6.

Students must apply for openings in the Co-operative Option and should check with the Co-op office for the April deadline information. They will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the student(s) they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to deter-mine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each 4-month employment term.

### 4.8.2 Genetics Program Charts,

ACADEMIC CALENDAR
2012-2013 >

University of Manitoba

Biological Sciences: BIOL 2410, BIOL 2420, BIOL 2540, BIOL 3290, BIOL 3300, BIOL 3560, BIOL 4500, BIOL 4540, BIOL 4542, BIOL 4560

Chemistry: CHEM 2280, CHEM 2290, CHEM 4360, CHEM 4370, CHEM 4620, CHEM 4630
Microbiology: MBIO 3000, MBIO 3010, MBIO 3030, MBIO 3430, MBIO 3440, MBIO 3450, MBIO 3460, MBIO 4010, MBIO $4020^{2}$, MBIO 4410, MBIO $4530^{1}$ (6), MBIO 4540, MBIO 4670 (or the former MBIO 4570), MBIO 4672², MBIO 4600, MBIO 4610.

Forensic Science: FORS 2000 (satisfies the University "W" requirement)
Computer Science: COMP 1010, COMP 1020, COMP 1260, COMP 1270

Physics: PHYS 1020, PHYS 1030, PHYS 1050, PHYS 1070

University of Manitoba

Animal Science: ANSC 3500, ANSC 4280
Pharmacology: PHAC 4030, PHAC 4040

Plant Science: PLNT 2530, PLNT 3500, PLNT 3520, PLNT 4330, PLNT 4610
Human Genetics: BGEN 4010*

By an appropriate selection of courses from this list, students can obtain particular program emphasis in either plant, human or molecular genetics.

All programs must contain a minimum of 18 credit hours of 4000 level courses as options in Years 3 and 4.

Other suitable optional courses may be arranged through consultation with the Genetics program committee.

## NOTES:

${ }^{1}$ MBIO 4530 (6) and BGEN 4010 are project courses. A research project is chosen in consultation with the Microbiology department (MBIO 4530) or Biochemistry and Medical Genetics (BGEN 4010) and the Genetics program committee, and is supervised by a staff member. Only one of MBIO 4530 or BGEN 4010 may be elected in this program.
${ }^{2}$ MBIO 4020 and MBIO 4672 are not available options for students in the Genetics Honours Degree program.

### 4.9 Department of Mathematics

## Head: David Gunderson

Campus Address/General Office: 342A Machray Hall
Telephone: 2044748703
Website: http://www.math.umanitoba.ca/

### 4.9.1 Program Information

Mathematics provides the language, reasoning and analytic tools that many other disciplines use to investigate their areas. These include all the physical sciences, computer and engineering sciences, social sciences, and the biological and health sciences. A wide range of business, industrial, and government programs rely on mathematics to provide insight and analysis. Students may specialize in mathematics alone or in combinations with physics, computer science, economics, or statistics.

The department must approve a student's Honour or Major program each session. Students must also obtain approval for any and all revisions to their program.

NOTE: Students entering either the Faculty of Arts or Science, and intending to take courses from the department, are strongly advised to speak to a Science student advisor or a faculty advisor in the department concerning an appropriate choice of mathematics courses. They may also consult the Department of Mathematics website at umanitoba.ca/science/mathematics.

## Honours Requirements

To enter the Honours program in Mathematics, a student must have completed at least 24 credit hours with a minimum GPA of 3.00 , and also obtained a minimum grade of " $B$ " in the following courses: MATH 1300; and one of MATH 1700 or MATH 1690 (or equivalent).

To continue in the Mathematics Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must maintain a minimum 3.00 GPA and achieve a minimum grade of " $C$ " on all courses that make up the 120 credit hours of the degree.

The program for students who elect Honours in Mathematics is as follows:

Year 2 Mathematics courses as indicated in the chart below and nine (9) credit hours from such fields as physics, chemistry, actuarial mathematics, computer science, statistics, philosophy, or economics. Other fields may be elected with the approval of the department.

Year 3 Mathematics courses as indicated in the chart below and electives to be chosen from the subject fields below or a third or forth year Mathematics course not already elected. Students performing satisfactorily in Year 2 may obtain permission to take an additional course.

Year 4 Mathematics courses as indicated in the chart below and electives to be chosen from the subject fields below or a third or forth year Mathematics course not already elected. Students performing satisfactorily in Year 3 may obtain permission to take an additional course.

Electives normally allowed are:
Statistics: STAT 2000, STAT 2400, STAT 3470, STAT 3480, STAT 3400 (STAT 3500), STAT 3800 (STAT 3600), STAT 4100 (STAT 4140), STAT 4520, STAT 4530, STAT 4580, STAT 4590, STAT 4600, STAT 4620, STAT 4630, STAT 4690.

Physics: PHYS 2380, PHYS 2600, PHYS 2610, PHYS 2650, PHYS 3670, PHYS 3680, PHYS 3650, PHYS 3660, PHYS 3630, PHYS 3640, PHYS 3380, PHYS 4390, PHYS 4620, PHYS 4640, PHYS 4650.

Chemistry: CHEM 2280, CHEM 2290, CHEM 3360, CHEM 3370, CHEM 4640, CHEM 4650.

Economics: ECON 2530, ECON 2700, ECON 3700, ECON 3730, ECON 4120, ECON 4130.

Mechanical Engineering: MECH 3490.

Other courses may be chosen with permission of the department. Students are required to obtain the approval of the department concerning their choice of electives.

Double Honours: A student may elect Honours in Mathematics and one other field, subject to the approval of both departments. The Mathematics prescription for a Double Honours program is as indicated in the table below.

Honours programs must be approved each year by the department.

## Four Year Major Requirements

To enter the four year Major in Mathematics, a student must have a "C+" in either MATH 1690 or in two of MATH 1300, MATH 1500 and MATH 1700 or any equivalent and have satisfied all Faculty requirements for entry to the program.

To continue in the Mathematics Major degree program students must maintain a minimum DGPA of 2.00 .

To graduate with the B. Sc. Major degree, a student must achieve a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree, and a minimum grade of " $C$ " in each of the Major Program Specific courses (see below).

## Major Program Specific Courses

MATH 1300, MATH 1500, MATH 1700, (or MATH 1690 in place of MATH 1500 and MATH 1700), MATH 2202, MATH 2352, MATH 2600, MATH 2750, MATH 2800, MATH 3300, MATH 3350, MATH 3400, MATH 3700, MATH 3710, MATH 3740, MATH 3760, and MATH 3800.

It is suggested that among their electives, students might choose courses in which mathematics is extensively used, for example, courses in physics, chemistry and certain courses in economics. For advice on this point students should talk to a faculty member in the department.

Four Year Major in Applied Mathematics with Option (Computer Sci-ence, Economics, Statistics)

These programs provide a sound general knowledge of applied mathematics together with a significant number of courses in the option area. Courses in the Computer Science option provide training in aspects of computer science which are most useful to the practicing mathematician. Courses in the Computer Sciences, Economics, and Statistics options are fundamental to each area and provide a strong, mathematical basis for further study.

To enter the four year Major in Applied Mathematics with one of the above three options, a student must have a "C+" in either MATH 1690 or two of MATH 1200, MATH 1300, MATH 1500, or MATH 1700, one of which must be either MATH 1500, or MATH 1700, and have satisfied all faculty requirements for entry to the program.

To continue in the Applied Mathematics Major degree programs, students must maintain a minimum DGPA of 2.00.

To graduate with the B. Sc. Major degree, a student must achieve a mini-mum GPA of 2.00 on the 120 credit hours that contribute to the degree, and a minimum grade of " $C$ " in each of the Major Program Specific courses (see below).

## Applied Mathematics Major Program Specific Courses

MATH 1200, MATH 1300, MATH 1500, MATH 1700 (or MATH 1690 in place of MATH 1500 and MATH 1700), MATH 2300, MATH 2400, MATH 2600, MATH 2720, MATH 2730, MATH 2800, MATH 3500, MATH 3600, MATH 3700, MATH 3740, MATH 3800, MATH 3810, and MATH 3820.

It is recommended that students take all 12 credit hours of 1000 level mathematics courses in their initial 30 credit hours; however, students should take at least MATH 1300, MATH 1500 and MATH 1700. See the individual charts below for additional requirements for each option.

Options List: MATH 2450, MATH 2500, MATH 2552, the former MATH 2550, or any 3rd or 4th year Mathematics course.

## Three Year General

## ACADEMIC CALENDAR

University of Manitoba

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000 , and (or) 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Mathematics, students must select a minimum of 18 credit hours of 2000, 3000, and (or) 4000 level Mathematics courses (subject to the Faculty requirement that of the 36 credit hours in the two
advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level).

See a Science Student Advisor or a Faculty Advisor in the department for information regarding entry to or completion of any of the programs outlined below.

### 4.9.2.1 Mathematics Honours Program Chart

## NOTES:

1 MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1310 may be taken in place of MATH 1300; MATH 1710 may be taken in place of MATH 1700. MATH 1690 may be taken in place of both MATH 1500 and 1700).
2 STAT 1000 and COMP 1010 must be completed by the end of Year 2.
3 Students considering graduate work in pure mathematics should note that many graduate schools may require a student to rectify any deficiencies in MATH 4200, MATH 4210, MATH 4350, MATH 4710, MATH 4720 and MATH 4750.
4 MATH 3200, MATH 3210, MATH 3740 and MATH 3910 cannot be used in an Honours program.
5 IMPORTANT: The four year Major programs need not be completed in the manner prescribed in the charts above. Each chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their programs with a view to satisfying the prerequisites of the required courses. Please refer to the text above for the minimum requirements for entry to a four year Major.
(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

### 4.9.2.2 Mathematics Double Honours Program Chart

MATHEMATICS HONOURS DOUBLE ${ }^{4}$ MINIMUM 120 CREDIT HOURS (comprising courses listed in chart below, and the required courses from the other department)

| MATH $1300^{1}$ (B), MATH 1690 (6) (B) <br> (or MATH $1500^{1}$ and MATH | MATH 2202, MATH 2352 (6), MATH 2600, MATH 2750 (6), MATH 2800 | MATH 3230, MATH 3350 (6), MATH 3710, MATH 3760 (6) | MATH 3800 <br> Plus 12 credit hours from MATH 4200, MATH 4210, MATH 4350, MATH 4710, MATH 4720, MATH |
| :---: | :---: | :---: | :---: |

| $\left.1700^{1}(B)\right)$ |  |  | 47503 |
| :--- | :--- | :--- | :--- |

## NOTES:

1 MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1310 may be taken in place of MATH 1300; MATH 1710 may be taken in place of MATH 1700. MATH 1690 may be taken in place of both MATH 1500 and 1700).
2 STAT 1000 and COMP 1010 must be completed by the end of Year 2.
3 Students considering graduate work in pure mathematics should note that many graduate schools may require a student to rectify any deficiencies in MATH 4200, MATH 4210, MATH 4350, MATH 4710, MATH 4720 and MATH 4750.
4 MATH 3200, MATH 3210, MATH 3740 and MATH 3910 cannot be used in an Honours program.
5 IMPORTANT: The four year Major programs need not be completed in the manner prescribed in the charts above. Each chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their programs with a view to satisfying the prerequisites of the required courses. Please refer to the text above for the minimum requirements for entry to a four year Major.
(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

| STAT 1000 | STAT 2000 | STAT 2400, STAT 3400, STAT 3470, STAT 3480, STAT 3800 |
| 6 credit hours from the Faculty of Arts, which should include the required "W" course | COMP 1010 <br> 6 credit hours from: <br> MATH 2450 (6), MATH 250 <br> 6 credit hours of 3000 or 40 | MATH 2552 (6), or any 3000 / 4000 level MATH course evel Statistics courses |
| 9 credit hours of electives | 18 credit hours of approved | ctives taken during years 2, 3 and 4 |

## NOTES:

1 MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1310 may be taken in place of MATH 1300; MATH 1710 may be taken in place of MATH 1700. MATH 1690 may be taken in place of both MATH 1500 and 1700).
2 STAT 1000 and COMP 1010 must be completed by the end of Year 2.
3 Students considering graduate work in pure mathematics should note that many graduate schools may require a student to rectify any deficiencies in MATH 4200, MATH 4210, MATH 4350, MATH 4710, MATH 4720 and MATH 4750.
4 MATH 3200, MATH 3210, MATH 3740 and MATH 3910 cannot be used in an Honours program.
5 IMPORTANT: The four year Major programs need not be completed in the manner prescribed in the charts above. Each chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their programs with a view to satisfying the prerequisites of the required courses. Please refer to the text above for the minimum requirements for entry to a four year Major.
(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)
4.9.2.7 Mathematics General Degree and Minor Requirements

THREE YEAR GENERAL (90 CREDIT HOURS)
18 credit hours of 2000, 3000, and (or) 4000 level Mathematics courses (subject to the Faculty requirement that of the 36 credit hours to be completed in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.)"

## MINOR

MATH $1300^{1}$, MATH $1500^{1}$, MATH $1700^{1}$ plus a minimum of 9 credit hours from: MATH 1200 and 2000 and (or) 3000 level Mathematics courses

### 4.9.2.8 Mathematics - Physics and Astronomy Joint Honours Program

Honours Requirements

To enter the Joint Honours Mathematics - Physics Honours program the student must have a minimum grade of "B" in: MATH

| $1300{ }^{1}$, MATH 1510' ${ }^{\text {² }}$ MATH $1710^{1}$ (or MATH 1690), PHYS 1050 (or "B+" in PHYS 1020) and PHYS 1070 |  |  |  |
| :---: | :---: | :---: | :---: |
| To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of " $C+$ " in each of the Honours Program Specific courses, and a minimum grade of " $C$ " on all remaining courses that contribute to the 129 credit hours of the degree. See the Calendar entry for each of the Department of Mathematics and the Department of Physics and Astronomy for the Honours Program Specific courses. |  |  |  |
| YEAR 1 | YEAR 2 | YEAR 3 | YEAR 4 |
| JOINT HONOURS 129 CREDIT HOURS (129 credit hours) |  |  |  |
| $\begin{aligned} & \text { MATH } 1300^{1}(\mathrm{~B}), \text { MATH } \\ & 1510^{1}(\mathrm{~B}),{\text { MATH } 1710^{1}}^{(B)} \end{aligned}$ | PHYS 2260, PHYS 2380, PHYS 2600, PHYS 2610, PHYS 2650³ | MATH 3230, MATH 3350 (6) (or MATH 3300 and MATH 3310), MATH 3700 or MATH | l |
| PHYS 1050 (B) (or PHYS 1020 $(B+))^{2}$ and PHYS 1070 (B) | MATH 2202, MATH 2352 (6) MATH 2750 (6), MATH 280 | , MATH 3760 | Mathematics courses, of which 3 credit hours must be at the 4000 level |
| STAT 1000 COMP 1010 |  |  | PHYS 3430 (6), PHYS 3660, PHYS 4390 |
| 6 credit hours from the Faculty of Arts, which should include the required "W" course ${ }^{4}$ |  |  | 6 credit hours from 3000 and 4000 level Physics Honours courses |
| 27 Hours | 33 Hours | 36 Hours | 3 Hours |
| NOTES: <br> 1 MATH 1310 may be taken in place of MATH 1300; MATH 1500, or MATH 1520 may be taken in place of MATH 1510; MATH 1700 may be taken in place of MATH 1710. MATH 1690 may be taken in place of both MATH 1510 and 1710. <br> 2 PHYS 1030 is not suitable for entry to the program. Students must also take PHYS 1070 if they have already taken PHYS 1030. Students can hold credit for both PHYS 1030 and PHYS 1070. <br> 3 The corequisite of PHYS 2490 is waived. It is recommended that students audit PHYS 2390 and PHYS 2490 in second year. <br> 4 As there are no electives in Year 2 of the program, students should complete the university written English requirement in University I. If not completed in University I, a "W" course must be completed prior to Year 3 in addition to the required Year 2 courses. <br> 5 The prerequisite of PHYS 2490 is waived. <br> 6 The prerequisite of MATH 3810 has been waived for students who have completed PHYS 3630, PHYS 3640 and PHYS 3380. (Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.) |  |  |  |

### 4.9.2.9 Mathematics - Economics Joint Honours Program

The Department of Mathematics along with the Department of Economics (Faculty of Arts) offer a joint Honours program for students wishing in depth study in Mathematics and Economics. For Economics course listings, refer to the Faculty of Arts chapter in the Calendar.
To enter the Joint Honours Mathematics - Economics program, the student must have a minimum grade of "B" in: ECON 1010 and ECON 1020 (or ECON 1210 and ECON 1220), MATH $1300^{1}$, MATH $1700^{1}$ and have satisfied the Faculty of Science requirements for entry to the honours program.

1710 may be taken in place MATH 1700.
2 The combination of MATH $1500^{1}$ and MATH $1700^{1}$ may be replaced by MATH 1690.
3 Some courses may be taken in a different year than indicated; STAT 1000, COMP 1010, MATH 2600 and ECON 3180 (or STAT 2000) may be taken in Year 2.

4 Of the 24 credit hours of electives in Economics in Years 3 and 4, no more than 6 credit hours may be at the 2000 level (with the exception of ECON 2530) and at least 6 credit hours must be at the 4000 level.
5 MATH 3300, plus 3 of the 6 unallocated credit hours in Mathematics in Years 3 and 4, may be replaced by MATH 3350.
6 Students are encouraged to consider useful courses in Computer Science and Statistics as electives.
7 The prerequisite of ECON 3170 is waived for students in this program.
(The number 6 in brackets indicates a 6 credit hour course.)
4.9.2.10 Mathematics - Computer Science Joint Honours Program
4.9.2.10 Mathematics - Computer Science Joint Honours Program (Including Co-op if selected)

The departments of Computer Science and Mathematics offer a joint Honours program for in-depth study in both Computer Science and Mathematics.

## Honours Requirements

To enter the Joint Honours Computer Science-Mathematics program, the student must have a minimum grade of " B " in each of COMP 1020, MATH 1300 and MATH 1700 (or any equivalent), and have satisfied the Faculty of Science requirements for entry to the honours program. It is recommended that STAT 2000 be completed in University 1 as an elective.

| YEAR 1 | YEAR 2 | YEAR 3 | YEAR 4 |

| 2 As there are no electives in Year 2 of the program, students should complete the written English requirement in Year 1. If not completed in Year 1, a "W" course must be completed prior to Year 3 in addition to the required Year 2 courses. |  |  |  |
| 3 Students in this program will not take COMP 2130 or COMP 3130. COMP 2130 is waived as a prerequisite for students in this program. |  |  |  |
| 4 When chosen, the Cooperative following years 2 , 3 , and 4 respe in brackets indicates a 6 credit h | Option work terms (2980, 3980 ctively. (Letters in brackets ind our course.) | 4980) will normally be ate minimum prerequisi | d during the Summer Terms g for further study. The numbe |

### 4.9.2.11 Mathematics - Statistics Joint Honours Program

4.9.2.11 Mathematics - Statistics Joint Honours Program

The departments of Statistics and Mathematics offer a joint Honours program for students wishing in depth study in Statistics and Mathematics.
To enter the Honours program students must have satisfied the Faculty of Science requirements for entry to the program, and have completed STAT 1000, MATH 1300 and either MATH 1690, or MATH 1500 and MATH 1700 or any equivalent with a minimum grade of "B" in each of STAT 1000 and MATH 1690 (or a " $B$ " average in MATH 1500 and MATH 1700).

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of " $\mathrm{C}_{+}$" in each of the Honours Program Specific courses, and a minimum grade of " C " on all remaining courses that contribute to the 120 credit hours of the degree. See the Calendar entry for each of the Department of Statistics and the Department of Mathematics for the Honours Program Specific courses.

| YEAR 1 | YEAR 2 | YEAR 3 | YEAR 4 |
| :---: | :---: | :---: | :---: |
| JOINT HONOURS 120 CREDIT HOURS (comprising courses listed in chart below, and electives) |  |  |  |
| MATH $1300^{1}$ (B), MATH 1690 (6) (B) (or MATH $1500^{1}$ and MATH $\left.1700^{1}(\mathrm{~B})\right)$ | STAT 2000², STAT 2400 MATH 2202, MATH 2352 (6), MATH 2600, MATH 2750 (6), MATH 2800 | STAT 3050, STAT 3470, STAT 3480, STAT 3400, STAT 3800 | $\begin{aligned} & \text { STAT 4100, STAT 4520, STAT } \\ & 4530 \end{aligned}$ |

## NOTES:

1 MATH 1310 may be taken in place of MATH 1300; MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700.
2 STAT 2000 may be taken in Year 1.
(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

### 4.9.3 Mathematics $\mathbf{- 0}$ Level

MATH 0500 Preparing for University Mathematics Cr.Hrs. 0 A voluntary non-credit mathematics course for students, holding credit in Pre-Calculus 40S or Applied Mathematics 40 S or equivalent, who would benefit from improving their knowledge and skills concerning topics included in the Manitoba secondary school mathematics curriculum. This course may be taken prior to or concurrently with MATH $1200,1210,1300,1310,1500,1510,1520,1700,1710$ or 1690. Students participating in this course should purchase the set of notes "Preparing for University Mathematics" from the University of Manitoba Bookstore. Prerequisite: a grade of 60\% in Pre-Calculus 40S, 70\% in Applied Mathematics 40 S or a grade of $60 \%$ or better in the Math Skills course offered by Extended Education. (NOTE: The fee for this course is non-refundable upon withdrawal).

### 4.9.3 Mathematics - $\mathbf{1 0 0 0}$ Level

MATH 1010 Applied Finite Mathematics Cr.Hrs. 3 (Lab Required) (Formerly 136.101) For students needing to fill the requirement of a university level mathematics course. Introduces students to modern applications of discrete
mathematics. Topics include: mathematics of finance, linear programming, graph theory, and game theory. This is a terminal course and may not be used as a prerequisite for other Mathematics courses. This course cannot be used as part of an Honours, Major, General or Minor program in the mathematical sciences. Not available to any student already holding a grade of " $C$ " or better in any Mathematics course with the exception of MATH 1020 (136.102), FA 1020 (054.102), MATH 1190, MATH 1191 (136.119). Not to be taken concurrently with any other Mathematics course with the exception of MATH 1020, FA 1020, MATH 1190, or MATH 1191. No prerequisite.

MATH 1020 Mathematics in Art Cr.Hrs. 3
(Formerly 136.102) Specific theory, structuring systems, and mathematical methods and principles used in works of art from various historical periods and contexts will be explored in relation to Euclidean and non-Euclidean geometries. Topics include: linear perspective; shapes, patterns, balance and symmetry; ratio, proportion and harmony; and order, dynamics, and chaos. The course will be one half art and one half mathematics, team-taught by faculty from the School of Art and the Department of Mathematics. This course is also given in the School of Art as FA 1020. This is a terminal course and may not be used as a prerequisite for
other Mathematics courses. This course cannot be used as part of an Honours, Major, General or Minor program in the mathematical sciences. Not available to any student already holding a grade of " C " or better in any Mathematics course with the exception of MATH 1010 (136.101), MATH 1190, MATH 1191 (136.119). Not to be taken concurrently with any other Mathematics course with the exception of MATH 1010, MATH 1190, or MATH 1191. Not to be held with FA 1020 (054.102). No prerequisite.

MATH 1190 Topics in Mathematics Cr.Hrs. 6 (Formerly 136.119) This course is designed to give students in various faculties a measure of insight into modern mathematics. Topics are taken from number systems, geometry, and combinatorics. This is a terminal course and may not be used as a prerequisite for other Mathematics courses. This course cannot be used as part of an Honours, Major, General or Minor program in the mathematical sciences. May not hold with MATH 1191. Not available to any student already holding a grade of "C" or better in any Mathematics course with the exception of MATH 1010 (136.101), MATH 1020 (136.102), or FA 1020 (054.102). Not to be taken concurrently with any other Mathematics course with the exception of MATH 1010, MATH 1020, or FA 1020. No prerequisite.

MATH 1200 Elements of Discrete Mathematics Cr.Hrs. 3 (Lab Required) (Formerly 136.120) Sequences and series, trigonometry, complex numbers, algebra of polynomials, approximation of zeros of functions, linear difference equations. Not to be held with MATH 1210, or MATH 1201. Not available to any student holding credit in any Mathematics course numbered 2000 or higher, unless MATH 1200 is a required course in a student's program. Prerequisite: a minimum grade of $60 \%$ in Pre-calculus 40 S or the former Mathematics 40S (300), or a grade of 60\% or better in the Mathematical Skills course taught by Extended Education.

MATH 1210 Techniques of Classical and Linear Algebra Cr.Hrs. 3
(Lab Required) To introduce a variety of practical algebraic concepts and skills necessary for the study of calculus and advanced engineering mathematics. The emphasis of this course is in the development of methodology and algebraic skill necessary for successful completion of subsequent engineering mathematics courses. This course is intended for Engineering and Geophysics students only. Not to be held with MATH 1200 (136.120), MATH 1201, MATH 1300 (136.130), MATH 1301, or MATH 1310 (136.131). Prerequisites: a minimum grade of $60 \%$ in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of $60 \%$ or better in the Mathematical Skills course taught by Extended Education.

MATH 1300 Vector Geometry and Linear Algebra Cr.Hrs. 3 (Lab Required) (Formerly 136.130) An introduction to vectors, matrices, systems of linear equations and threedimensional geometry. Not to be held for credit with MATH 1210, MATH 1310 (136.131), MATH 1301, or the former MATH 1680 (136.168). Prerequisite: a minimum grade of $60 \%$ in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of $60 \%$ or better in the Mathematical Skills course taught by Extended Education. NOTE: A minimum grade of $70 \%$ in Applied Mathematics 40 S may be used as a prerequisite to this course.

MATH 1310 Matrices for Management and Social
Sciences Cr.Hrs. 3
(Lab Required) (Formerly 136.131) Matrix methods with examples relevant to the Management and Social Sciences. Topics include vectors, matrices, systems of linear equations, and determinants; applications include economic models, the simplex method for linear programming, Markov chains, and game theory. Not to be held with MATH 1210, MATH 1300 (136.130), MATH 1301, or the former MATH 1680 (136.168). Prerequisite: a minimum grade of $60 \%$ in Pre-calculus Mathematics 40S or the former Mathematics 40 (300), or a grade of $60 \%$ or better in the Mathematical Skills course taught by Extended Education. NOTE: A minimum grade of 70\% in Applied Mathematics 40S may be used as a prerequisite to this course.

MATH 1500 Introduction to Calculus Cr.Hrs. 3
(Lab Required) (Formerly 136.150) Differentiation and integration of elementary functions, with applications to maxima and minima, rates of change, area, and volume. Not to be held with MATH 1501, MATH 1510 (136.151), MATH
1520 (136.152), the former 136.153, the former MATH 1680 (136.168), or MATH 1690 (136.169). Prerequisite: a minimum grade of $60 \%$ in Pre-calculus Mathematics 40 S or the former Mathematics 40S (300), or a grade of $60 \%$ or better in the Mathematical Skills course taught by Extended Education.

MATH 1510 Applied Calculus 1 Cr.Hrs. 3
(Lab Required) (Formerly 136.151) Functions and graphs; limits and continuity; differentiation of functions defined explicitly, implicitly and parametrically; applications of derivatives to velocity and acceleration, related rates, maxima and minima; differentials, indefinite and definite integrals, application of integration to area. Physical applications in this course make it especially suitable for students intending to take programs in engineering. Not to be held with MATH 1500, MATH 1501 (136.150), MATH 1520 (136.152), the former 136.153, the former MATH 1680 (136.168), or MATH 1690 (136.169). Prerequisite: a minimum grade of $60 \%$ in Pre-calculus Mathematics 40 S or the former Mathematics 40 (300), or a grade of $60 \%$ or better in the Mathematical Skills course taught by Extended Education; and Physics 40S (300) or a "P" in PHYS 0900 (016.090).

MATH 1520 Introductory Calculus for Management and Social Sciences Cr.Hrs. 3
(Lab Required) (Formerly 136.152) Differentiation and integration of functions of one variable and partial differentiation of functions of several variables. Emphasizes applications in the areas of management and social science. Not to be held with MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), the former 136.153, the former MATH 1680 (136.168), or MATH 1690 (136.169).
Prerequisite: a minimum grade of $60 \%$ in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a minimum grade of $60 \%$ in the Mathematical Skills course taught by Extended Education.

MATH 1690 Calculus Cr.Hrs. 6
(Lab Required) (Formerly 136.169) An introduction to the calculus of functions of one variable. This course covers the same material as MATH 1500 (136.150) and MATH 1700 (136.170) together, but in greater depth. Exposure to high school calculus (45S) is desirable, but not essential. This course is mathematically challenging and is intended for
students planning to enter an Honours or 4 year Major program in Mathematics. Not to be held with MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, the former MATH 1680 (136.168), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173. Prerequisite: a minimum grade of $80 \%$ in Pre-calculus Mathematics 40S or the former Mathematics 40S (300).

MATH 1700 Calculus 2 Cr.Hrs. 3
(Lab Required) (Formerly 136.170) Theory and techniques of integration, curve sketching, volume, arc length, surface area and partial derivatives. Not to be held with MATH 1690 (136.169), MATH 1701, MATH 1710 (136.171), or the former 136.173. Prerequisite: A grade of "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or the former MATH 1680 (136.168).

MATH 1710 Applied Calculus 2 Cr.Hrs. 3 (Lab Required) (Formerly 136.171) Applications of integration to volumes, centres of mass, moments of inertia, work and fluid pressure; differentiation of trigonometric, inverse trigonometric, exponential, and logarithmic functions; techniques of integration; polar coordinates. Physical applications in this course make it especially suitable for students intending to take programs in engineering. Not to be held with MATH 1690 (136.169), MATH 1700 (136.170), MATH 1701, or the former 136.173. Prerequisite: A grade of "C" or better in one of MATH 1500 (136.150), MATH 1501, MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or the former MATH 1680 (136.168). Prerequisite or concurrent Requirement: PHYS 1050 or PHYS 1051.

### 4.9.3 Mathematics -2000 Level

MATH 2120 Introductory Numerical Methods for Engineers Cr.Hrs. 4
(Lab Required) (Formerly 136.212) Numerical methods applied to problems in engineering; roots of nonlinear equations and systems of linear equations, numerical differentiation and integration, initial-value problems. For Engineering and Geophysics students only. Not to be held with MATH 2600 (136.260) or MATH 2601. Prerequisites: one of COMP 1010, COMP 1011 (074.101), the former 074.111, or the former 074.112 (C); and MATH 2132 or the former MATH 2100 (136.210) (C).

MATH 2130 Engineering Mathematical Analysis 1 Cr.Hrs. 3 (Lab required) Multivariable differential and integral calculus up to and including multiple integrals in cylindrical and spherical coordinates. For Engineering and Geophysics students only. This course may not be held for credit with MATH 2720 (136.272, 136.270), MATH 2750 (136.275), or the former MATH 2110 (136.211). Prerequisites: MATH 1210 and MATH 1710 (136.171) (C).

MATH 2132 Engineering Mathematical Analysis 2 Cr.Hrs. 3 (Lab required) Infinite series, Taylor and Maclaurin Series; ordinary differential equations including Laplace transforms. For Engineering and Geophysics students only. This course may not be held for credit with MATH 2800 (136.280), MATH 2730 (136.273, 136.271), or the former MATH 2100 (136.210). Prerequisites: MATH 1210 (C) and MATH 1710 (136.171) (C).

## MATH 2202 Fundamentals of Mathematical

Analysis Cr.Hrs. 3
(Formerly MATH 2200) The language of mathematics: logic, methods of proof, elementary set theory. Foundations of calculus: the real numbers, continuity. This course is mathematically challenging and is intended primarily for students registered in Honours, Joint Honours or the FourYear Major program. Registration for this course requires approval of the department. Not to be held with the former MATH 2200 (136.220). Prerequisites: a grade of C+ or better in one of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and a grade of C+ or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), or MATH 1710 (136.171).

MATH 2300 Linear Algebra 2 Cr.Hrs. 3 (Formerly 136.230) A continuation of MATH 1300 or MATH 1310. Finite dimensional vector spaces; linear transformation and matrices; eigenvalues and eigenvectors; diagonalization and applications; inner product spaces. Not to be held with MATH 2301, MATH 2352, the former MATH 2350 (136.235), or MATH 3130 (136.313). Prerequisites: a grade of "C" or better in one of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and a grade of " $C$ " or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169).

MATH 2352 Advanced Linear Algebra Cr.Hrs. 6 (Formerly MATH 2350 or 136.235 ) Vector spaces, linear transformations, inner product spaces, eigenvalues and eigenvectors, orthogonal and Hermitian matrices, and applications. This course is mathematically challenging and is intended primarily for students registered in Honours, Joint Honours or the Four-Year Major program. Registration in this course requires approval of the department. Not to be held with MATH 2300, MATH 2301 (136.230), the former MATH 2350 (136.235), or MATH 3130 (136.313). Prerequisites: a grade of "C+" or better in one of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and a grade of "C+" or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173.

MATH 2400 Applied Graph Theory Cr.Hrs. 3
(Formerly 136.240) Graphs, planar graphs, directed graphs. Applications such as scheduling, assignments, timetabling, tournaments, networks with algorithms. Prerequisite: one of MATH 1300 (C), MATH 1301(136.130) (C) or MATH 1310 (136.131) (C). Not available to students already holding credit for, or are currently registered in COMP 4340 (074.434).

MATH 2450 Combinatorial Mathematics Cr.Hrs. 6 (Formerly 136.245 ) An introduction to several areas of current interest in combinatorial mathematics, including techniques of enumeration, graphs, block designs and generalizations, linear recursions. This course is not normally offered every year. May not hold with MATH 2451. Prerequisite: An average of " C " or better in six credit hours of Year 1 Math courses with the exception of the former 136.100, MATH 1010 (136.101), MATH 1020 (136.102), FA 1020 (054.102), MATH 1190 (136.119), or MATH 1191; or consent of department.

MATH 2500 Introduction to Number Theory Cr.Hrs. 3 (Formerly 136.250) Topics may include divisibility, unique
factorization, linear and quadratic congruences, Fermat's theorem. This course may not be held with MATH 2501. Prerequisite: An average of " C " or better in six credit hours of Year 1 Mathematics courses with the exception of the former 136.100, MATH 1010 (136.101), MATH 1020 (136.102), FA 1020 (054.102), MATH 1190 (136.119) and MATH 1191; or consent of department.

MATH 2552 Geometry of the Plane Cr.Hrs. 6 A modern approach to geometry through the use of geometric transformations. Topics may include isometries, symmetries, similarities, circular inversion and groups. Not to be held with MATH 2551 or the former MATH 2550 (136.255). Prerequisites: MATH 1690 (136.169) (C); or a grade of "C" or better in one of MATH 1500 (136.150), MATH 1501, MATH 1510 (136.151), MATH 1520 (136.152), or the former 136.153, and a grade of " C " or better one of MATH 1300 (136.130), MATH 1301, MATH 1310 (136.131), MATH 1700 (136.170), MATH 1701, MATH 1710 (136.171), or the former 136.173.

MATH 2600 Numerical Mathematics 1 Cr.Hrs. 3 (Formerly 136.260) Elementary techniques of numerical solution of mathematical problems: solution of equations, finite differences, interpolation, systems of equations, numerical differentiation and integration. This course may not be held for credit with MATH 2120 (136.212) or MATH 2601. Prerequisites: One of MATH 1300 (136.130), MATH 1301, or MATH 1310 (136.131) (C); and one of MATH 1690 (136.169), MATH 1700 (136.170), MATH 1701, MATH 1710 (136.171), or the former 136.173 (C); and COMP 1010 (074.101) or COMP 1011 (C); or consent of instructor.

MATH 2720 Multivariable Calculus Cr.Hrs. 3 (Formerly 136.272) Calculus of several variables. Not to be held with MATH 2721 (136.272, 136.270), MATH 2750 (136.275), the former MATH 2110 (136.211), or MATH 2130. Prerequisites: A grade of "C" or better in one of MATH 1300 (136.130), MATH 1301, or MATH 1310 (136.131) (C); and a grade of "C" or better in one of MATH 1690 (136.169), MATH 1700 (136.170), MATH 1701, MATH 1710 (136.171), or the former 136.173.

MATH 2730 Sequences and Series Cr.Hrs. 3 (Formerly 136.273) Introductory analysis, sequences and series. Not to be held with MATH 2132, the former MATH 2100 (136.210), MATH 2731 (136.273, 136.271), MATH 2750 (136.275). Prerequisite: a grade of " $C$ " or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171) or the former 136.173. Prerequisite or concurrent requirement: one of MATH 1300 (136.130), MATH 1301, or MATH 1310 (136.131).

MATH 2750 Intermediate Calculus Cr.Hrs. 6 (Formerly 136.275) Sequences, series and power series. Differentiation and integration of real-valued functions of several real variables. Not to be held with MATH 2130, MATH 2132, the former MATH 2100 (136.210), the former MATH 2110 (136.211), MATH 2701, MATH 2720, MATH 2721 (136.272, 136.270), MATH 2730, MATH 2731 (136.273, 136.271). This course is mathematically challenging and is intended primarily for students registered in an Honours, Joint Honours or Four-Year Major program. Registration in this course requires approval of the department. Prerequisites: a grade of "C+" or better in one of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and a grade of "C+" or better in one of MATH

1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173.

MATH 2800 Ordinary Differential Equations with Applications 1 Cr.Hrs. 3
(Formerly 136.280) An introduction to the theory of ordinary differential equations, and practical techniques of solution, principally relating to first order and linear higher order equations; linear systems. Applications to problems in science and other selected areas. Not to be held with MATH 2801 (136.280), MATH 2132, or the former MATH 2100 (136.210). Prerequisite: a grade of " $C$ " or better in MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131) (C). Prerequisite or concurrent requirement: MATH 2720, MATH 2721 or MATH 2750.

### 4.9.3 Mathematics - $\mathbf{3 0 0 0}$ Level

MATH 3120 Applied Discrete Mathematics Cr.Hrs. 3 (Lab Required) (Formerly 136.312) Sets, groups, graphs, and Boolean algebra. For Engineering students only. Not to be held with COMP 2130 ( 074.213 ), or the former 074.212. Prerequisites: ECE 2220 (C) and MATH 2130 (C).

MATH 3130 Linear Spaces for Physicists Cr.Hrs. 3 (Formerly 136.313) A course intended for honours/major students in Physics. Review of linear algebra (MATH 1300) vector spaces; linear transformations; eigenvalues and eigenvectors; inner product spaces; additional topics as time permits. Not to be held with MATH 2300, MATH 2301 (136.230), MATH 2352, or the former MATH 2350 (136.235). Prerequisites: MATH 2750 (136.275) (C); or both of MATH 2720 (or equivalent - MATH 2721, 136.270, 136.272) (C) and PHYS 2490 (or the former 016.237) (C).

MATH 3132 Engineering Mathematical Analysis Cr.Hrs. 3 Vector integral calculus; series of Ordinary differential equations; Fourier series and Partial differential equations. For Engineering and Geophysics students only. Not to be held with MATH 3740 (136.374), MATH 3800 (136.380), or the former MATH 3100 (136.310). Prerequisites: MATH 2130 (C) and MATH 2132 (C).

MATH 3142 Engineering Mathematical Analysis 4 Cr.Hrs. 3 Introduction to discrete mathematics; systems of linear differential equations; complex function theory and applications. For Engineering and Geophysics students only. Not to be held with MATH 3110 (136.311), MATH 3700 (136.370), MATH 3710 (136.371), or MATH 3800 (136.380). Prerequisites: MATH 2130 (C); and MATH 2132 or the former MATH 2110 (136.211) (C). NOTE: MATH 3132 is highly recommended.

MATH 3220 Set Theory Cr.Hrs. 3
(Formerly 136.322) Axiom systems, cardinal and ordinal numbers, models of set theory, the axiom of choice, the generalized continuum hypothesis, etc. Not currently offered. Prerequisite: MATH 2202 or the former MATH 2200 (136.220) (C); or consent of department.

MATH 3230 Metric Spaces Cr.Hrs. 3
(Formerly 136.323) Definition of metric spaces; examples. Compactness, connectedness and continuity in metric spaces. Applications to analysis. Not to be held with MATH 3210 (136.321) Prerequisites: MATH 2750 (136.275) (C); and MATH 2202 or the former MATH 2200 (136.220) (C); or
consent of department.
MATH 3240 Topology 1 Cr.Hrs. 3
(Formerly 136.324) Topics include topologies, continuity, connectedness, compactness, and separation properties. Not to be held with MATH 3210 (136.321). Prerequisite: MATH 3230 (136.323) (C) or consent of department.

MATH 3300 Modern Algebra 1 Cr.Hrs. 3 (Formerly 136.330) Introduction to the concepts and structures of modern algebra, including groups, rings and fields; substructure, isomorphism, quotients. Not to be held with MATH 3350 (136.335). Prerequisites: one of MATH 2300 (C), MATH 2301 (136.230) (C), MATH 2352 (C), or the former MATH 2350 (136.235) (C); and an additional 6 credit hours of 2000 level mathematics courses; or consent of department.

MATH 3310 Modern Algebra 2 Cr.Hrs. 3 (Formerly 136.331) Continuation of MATH 3300. Further study of rings and fields: integral domains, polynomial rings; ideals and quotient rings; rational function fields. Lattices and Boolean algebras may be included. Not to be held with MATH 3350 (136.335). Prerequisite: MATH 3300 (136.330) (C).

MATH 3350 Advanced Algebra Cr.Hrs. 6
(Formerly 136.335) An introduction to abstract algebra with topics taken from among the theories of groups, rings, modules, fields and lattices. This course is taught at an Honours/Major level. Not to be held with MATH 3300 (136.330) or MATH 3310 (136.331). Prerequisites: MATH 2352 or the former MATH 2350 (136.235) (C); and MATH 2202 or the former MATH 2200 (136.220) (C); or consent of department.

MATH 3400 Combinatorics 1 Cr.Hrs. 3 (Formerly 136.340) Basic counting principles, pigeon-hole principle, recursion, graphs. This course is taught at an Honours/Major level. Prerequisites: MATH 2202 or the former MATH 2200 (136.220) (C); and MATH 2352 or the former MATH 2350 (136.235) (C); or consent of department.

MATH 3430 Modern Geometry Cr.Hrs. 3
(Formerly 136.343) Topics in modern euclidean geometry, affine and projective geometry, inversive geometry, etc. This course is taught at an Honours/Major level. Prerequisites: MATH 2750 (136.275) (C); and MATH 2352 or the former MATH 2350 (136.235) (C); or consent of department.

MATH 3450 Theory of Numbers Cr.Hrs. 6
(Formerly 136.345) Divisibility, congruences; quadratic residues and reciprocity; introduction to analytic and algebraic number theory. Prerequisites: MATH 2750 (136.275) (C); and MATH 2202 or the former MATH 2200 (136.220) (C); or consent of department.

MATH 3530 Mathematical Problems in the Biological Sciences Cr.Hrs. 3
(Formerly 136.353 ) Circulatory system, flow of blood. Enzyme kinetics. Cell populations. Diffusion in biology. Some ecological systems. Prerequisites: MATH 2300 or MATH 2301 (136.230) (C); and MATH 2730 (136.273) (C); and MATH 3800 (136.380) (C); or consent of department.

MATH 3600 Numerical Mathematics 2 Cr.Hrs. 3 (Formerly 136.360) Numerical differentiation and Gaussian
quadrature; curve-fitting by splines; numerical methods for initial-value problems, boundary-value problems, and transforms; problems involving large, sparse or illconditioned linear systems. Not to be held with MATH 3601 (136.360). Prerequisites: MATH 2600 or MATH 2601 (136.260) (C); MATH 2800 or MATH 2801 (136.280) (C); MATH 2720 or MATH 2721 (136.272, 136.270) (C) and MATH 2730 (MATH 2731, 136.273, 136.271) (C), or MATH 2750 (136.275) (C); and either COMP 1010 or COMP 1011 (074.101) (C); or consent of department.

MATH 3700 Applied Complex Analysis Cr.Hrs. 3 (Formerly 136.370) Concepts and techniques of complex variable theory in the context of applied mathematics. Not to be held with MATH 3142, the former MATH 3110 (136.311), or MATH 3710 (136.371). Prerequisites: MATH 2720 or MATH 2721 (136.272, 136.270) (C); and one of MATH 2730, MATH 2731 (136.273, 136.271) (C), MATH 2750 (136.275) (C), or PHYS 2490 (016.237) (C); or consent of department.

MATH 3710 Complex Analysis 1 Cr.Hrs. 3
(Formerly 136.371) The geometry of the complex plane, analytic functions, contour integration. Cauchy's theorem and formula, the residue theorem, etc. Not to be held with MATH 3142, the former MATH 3110 (136.311), or MATH 3700 (136.370) Prerequisite: MATH 3230 (136.323).

MATH 3740 Methods of Advanced Calculus Cr.Hrs. 6 (Formerly 136.374) Uniform convergence of series and integrals. Transformations, inverse and implicit function theorems. Vector analysis including Green's and Stokes theorems. Not to be held with MATH 3760 (136.376). Prerequisites: MATH 2300 or MATH 2301 (136.230) (C); MATH 2720 or MATH 2721 (136.272, 136.270) (C); MATH 2730 or MATH 2731 (136.273, 136.271) (C); or consent of department.

MATH 3760 Advanced Calculus Cr.Hrs. 6
(Formerly 136.376) Vector analysis; The Riemann and Rieman-Stieltjes integral, uniform convergence of series and integrals, power series and Fourier series. This course is taught at an Honours/Major level. Not to be held with MATH 3740 (136.375). Prerequisites: MATH 2750 (136.275) (C); and MATH 2352 or the former MATH 2350 (136.235) (C); and MATH 2202 or the former MATH 2200 (136.220) (C); or consent of department.

MATH 3800 Ordinary Differential Equations with
Applications 2 Cr.Hrs. 3
(Formerly 136.380) Laplace transforms, series solutions of ODEs, systems of linear ODEs, applications, introduction to dynamical systems. Prerequisite: MATH 2800 or MATH 2801 (136.280) (C); and one of MATH 2730 (136.273, 136.271), MATH 2731, or MATH 2750 (136.275) (C).

MATH 3810 Partial Differential Equations 1 Cr.Hrs. 3 (Formerly 136.381) Fourier series and introductory SturmLiouville theory. Derivation of wave, diffusion and Laplace equations. Solution by separation of variables. Prerequisites: MATH 2720 or MATH 2721 (136.272, 136.270) (C) and MATH 2730 or MATH 2731 (136.273, 136.271) (C), or MATH 2750 (136.275) (C); and MATH 2800 or MATH 2801 (C); or consent of department.

MATH 3820 Introduction to Mathematical
Modelling Cr.Hrs. 3
(Formerly 136.382) An introduction to the principles and

University of Manitoba
techniques involved in the design, development, solution, testing and revision of mathematical models of "real-world" phenomena illustrated through the discussion of case studies. Prerequisites: MATH 2600 or MATH 2601 (136.260) (C); and MATH 2800 or MATH 2801 (136.280) (C). Prerequisite or concurrent requirement: STAT 1000 or STAT 1001.

### 4.9.3 Mathematics -4000 Level <br> MATH 4200 Topology 2 Cr.Hrs. 3

(Formerly 136.420) Topics include Tychonoff spaces, ordered spaces, arbitrary products, the Stone-Cech compactification, various types of disconnectedness, generalizations of compactness, paracompactness, and introductory homotopy theory. Prerequisite: MATH 3240 (136.324) (C).

MATH 4230 Algebraic Topology Cr.Hrs. 3
(Formerly 136.423) An introduction to Algebraic Topology.
Topics include basic homotopy theory, fundamental groups of topological spaces, free groups and group presentations, classification of low dimensional manifolds, Seifert-Van Kampen theorem, covering spaces and homology theory. Prerequisite: MATH 3240 (136.324) (this course may be taken concurrently with the consent of the department) (C); and MATH 3300 (136.330) (or MATH 3350 may be taken concurrently in place of MATH 3300) (C).

MATH 4250 Mathematical Logic Cr.Hrs. 6 (Formerly 136.425) The mathematical study of propositional and predicate logic; proof theory. Introduction to model theory (completeness, compactness, Lowenheim-Skolem theorems). Recursion theory, undecidability, incompleteness. Prerequisite: MATH 3350 (136.335) (C) or consent of department.

MATH 4310 Applied Matrix Analysis Cr.Hrs. 3 Vector and matrix norms; LU, QR, Schur, and singular value decomopositions; projections; least squares; Gerschgorin theorem, perturbation theory; positive definite systems; quadratic forms; pseudoinverse; diagonalization; canonical forms; function of matrices; minimal polynomials; PerronFrobenius theory; and applications. Not to be held with MATH 3500 (136.350). Prerequisite: A grade of "C" or better in one of MATH 2300, MATH 2301 (136.230), MATH 2352, or the former MATH 2350 (136.235).

MATH 4350 Modern Algebra Cr.Hrs. 6
(Formerly 136.435) A continuation of the topics of MATH 3350, and an introduction to such further topics as category theory, universal algebra, multilinear algebra, and homological algebra. Prerequisite: MATH 3350 (136.335) (C).

MATH 4400 Combinatorics 2 Cr.Hrs. 3
(Formerly 136.440) Generating functions, combinatorial geometry, symbolic dynamics, forbidden configurations, topics from combinatorial matrix theory. Prerequisites: MATH 2750 (136.275) (C), MATH 3400 (136.340) (C), and MATH 3350 (136.335) (C).

MATH 4410 Graphs, Codes and Designs Cr.Hrs. 3 (Formerly 136.441) Graph decompositions, colourings, and applications, adjacency matrices, triple systems and generalizations, BIBD's, orthogonal designs, linear codes,

Hamming codes, error-correction codes, public key cryptography, secret sharing. Prerequisites: MATH 3400 (136.340) (C) and MATH 3350 (136.335) (C).

MATH 4420 Finite Geometry Cr.Hrs. 3
(Formerly 136.442) Finite fields, finite affine and projective planes, partial geometries and related configurations. Prerequisite: MATH 3350 (136.335) (C) and MATH 3400 (136.340) (C).

MATH 4430 Introduction to Elliptic Curves Cr.Hrs. 3 (Formerly 136.443) Homogeneous coordinates, non-singular cubic curves, cubic curves of finite fields. Prerequisites: MATH 2500 or MATH 2501 (136.250) (C); and MATH 2352 or the former MATH 2350 (136.235) (C); and either MATH 3300 (136.330) (C) and MATH 3310 (136.331) (C), or MATH 3350 (136.335) (C).

MATH 4610 Introduction to Finite Elements and Boundary Elements Cr.Hrs. 3
(Formerly 136.461) Introduction to finite element and boundary element techniques for solving partial differential equations. Prerequisites: MATH 3600 (136.360) (C); and either MATH 3740 (136.375) (C) or MATH 3760 (136.376) (C).

MATH 4700 Applied Functional Analysis Cr.Hrs. 3 (Formerly 136.470) Elements of metric, normed and inner product spaces; operators and inverses; applications in analysis and numerical analysis. Prerequisite: MATH 3740 (136.375) or MATH 3760 (136.376) (C).

MATH 4710 Complex Analysis 2 Cr.Hrs. 3
(Formerly 136.471) Conformal mappings, space of analytic functions, space of meromorphic functions, harmonic functions. Prerequisites: MATH 3240 (136.324) (C), MATH 3710 (136.371) (C), and MATH 3760 (136.376) (C).

MATH 4730 Tensor and Variational Calculus Cr.Hrs. 3 (Formerly 136.473) An introduction to tensor calculus, differential forms, and variational principles on differentiable and Riemannian manifolds. Prerequisites: six credit hours of 2000 level calculus; and MATH 2800 or MATH 2801 (136.280) (C); or consent of department. Prerequisite or concurrent requirement: MATH 3740 (136.375) or MATH 3760 (136.376).

## MATH 4750 Real Variables Cr.Hrs. 6

(Formerly 136.475) Measure and integration on the real line and on abstract spaces. Classical Banach spaces of functions, and basic functional analysis. Prerequisites: MATH 2352 or the former MATH 2350 (136.235) (C); and MATH 3230 (136.323) (C); and MATH 3760 (136.376) (C); or consent of department.

MATH 4800 Dynamical Systems: Theory and
Applications Cr.Hrs. 3
(Formerly 136.480) Systems of differential equations, linear systems, applied dynamics, phase space, stability, introduction to chaos. Prerequisites: MATH 3600 or MATH 3601 (136.360) (C) and MATH 3800 (136.380) (C).

MATH 4810 Partial Differential Equations 2 Cr.Hrs. 3 (Formerly 136.481) Partial differential equations and their classification. Special functions and generalized Eigen function expansions. Solution by separation of variables, and transform methods. Prerequisite: MATH 3800 (136.380) and

MATH 3810 (136.381) (C).
MATH 4910 Project Course in Mathematics Cr.Hrs. 3 A research project by the student in consultation with the department head and an appropriate supervising Faculty member. A written report will be required to be submitted by the end of the term. An oral examination may required. This course is restricted to students in the fourth year of the Honours or Major program in Mathematics and is not available to Gruaduate Students. This course may not be held for credit with MATH 4900. Prerequisite: Consent of Department.

MATH 4920 Topics in Mathematics Cr.Hrs. 3 (Formerly 136.492) Topics of current interest in Mathematics or Applied Mathematics upon the interests and requirements of students and faculty, and will include specialized topics not available in regular course offerings. Prerequisite: consent of department.

### 4.10 Department of Microbiology

Head: Deborah Court
Campus Address/General Office: 418 Buller Building
Telephone: 2044749372
Email Address: dcourt@cc.umanitoba.ca
Website: umanitoba.ca/faculties/science/departments/micro biology/

### 4.10.1 Program Information

Microbiology is the study of microorganisms such as bacteria, viruses, fungi, protozoa, and algae, and their interactions with the environment. It is also an area of study that plays a pivotal role in understanding other life science disciplines, such as medicine, agriculture, ecology, and pharmacy. Studies in cloning, recombinant DNA technology, and gene sequencing are part of the program. The departments of Microbiology and Chemistry offer joint Honours programs (including Co-op) and joint Four Year Major programs (including Co-op) in biochemistry and biotechnology (See Sections 4.2 and 4.4).

The department must approve a student's Honours or Major program prior to registration in each session. Students must also obtain approval for any and all revisions to their program.

## Microbiology Prerequisite Information

Students are advised to take courses in the year suggested in the charts below; otherwise difficulties may arise with timetabling and prerequisite requirements. Students are responsible for all prerequisites and corequisites of the courses required or selected in all programs below. Since Chemistry courses form an integral part of all Microbiology programs, students should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300.

## Honours Requirements and Options

To enter the Honours program in Microbiology, a student must have completed at least 24 credit hours with a minimum GPA of 3.00 , and also obtained a minimum grade of "B"in MBIO 1010, and a minimum grade of "C+" in CHEM 1310. BIOL 1020, BIOL 1030, STAT 1000 and the 3 credit hours of specified Mathematics or Physics are program requirements and students are strongly encouraged to complete these courses in first year.

* Students interested in studying Microbiology should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Microbiology Honours program, students must maintain a minimum GPA of 3.00 , and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate from the Microbiology Honours program students must achieve a minimum GPA of 3.00 and obtain a minimum grade of " $C$ " on the courses that make up the 120 credit hours of the degree.

Students who wish to elect CHEM 2280, CHEM 2290 or CHEM 2470 as options should note the prerequisites in making a choice of mathematics courses.

By careful choice of electives, programs may be selected giving emphasis to various areas of Microbiology, e.g., Biochemistry and Molecular Biology or Environmental and Ecological Microbiology. In choosing optional courses, students should be aware of any prerequisite requirements.

## Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Microbiology program may enter the Cooperative Option in April of their second year in Honours Microbiology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program (see above), as indicated in the chart. Students are required to complete the first and second year requirements of the program; and MBIO 3010 and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Co-operative Options in Section 3.6.

To continue in the Honours Co-operative program a student must maintain a minimum GPA of 3.00 , successfully complete each work term, and complete a minimum of 9 credit hours during each academic term. Students should note that the grade requirements for the Co-operative Option
are the same as that for the regular Honours program (see above).

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

## Four Year Major

To enter the Major Degree program in Microbiology, a student must have completed at least 24 credit hours with a minimum GPA of 2.00 , and also obtained a minimum grade of "C+" in MBIO 1010, and a minimum grade of "C" in CHEM 1310. BIOL 1020, BIOL 1030, STAT 1000 and the 3 credit hours of specified Mathematics or Physics are program requirements and students are strongly urged to complete these courses in first year.

* Students interested in studying Microbiology should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Microbiolgy Major Degree, students must maintain a minimum GPA of 2.00 .

To graduate from, the 4-year Major degree program in Microbiology, students are required to obtain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree.

Potential entrants to this program should also note the following:

Students who wish to elect CHEM 2280, CHEM 2290 or CHEM 2470 as options should note the prerequisites in making a choice of mathematics courses.

Chemistry CHEM 2210 must be taken before MBIO 2370 (CHEM 2370). Courses MBIO 2360 and CHEM 2360, and MBIO 2370 and CHEM 2370 are the same and credit cannot be held for both. Microbiology students will normally register in MBIO 2360 and MBIO 2370, but CHEM 2360 and CHEM

2370 will be regarded as equivalents in the four year Major program.

Students must note course and grade prerequisites when selecting 3000 and 4000 level Microbiology courses.

Microbiology MBIO 4530 is not available in this program.

By careful choice of electives, programs may be selected giving emphasis to various areas of Microbiology, e.g., Biochemistry and Molecular Biology or Environmental and Ecological Microbiology. In choosing optional courses, students should be aware of any prerequisite requirements.

The listed requirements are minimum requirements. Students are reminded that should they wish to take further courses in Microbiology, they are at liberty to do so within the degree regulations.

## Four Year Major Cooperative Option

Students interested in alternating employment terms and academic terms as part of their Major program in Microbiology may enter the Co-operative Option in April of their second year in Microbiology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Major program. MBIO 3010 and MBIO 3410 are required in Year 3. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. See the general faculty regulations for B.Sc. (Major) Cooperative Option in Section 3.4 .

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Option List for All Microbiology Programs:

University of Manitoba

## Biological Sciences:

BIOL 2242 (BOTN 2010), BIOL 2260 (BOTN 2210), BIOL 2261, BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371), BIOL 2380 (BOTN 2180, ZOOL 2180), BIOL 2381, BIOL 2410 (ZOOL 2530), BIOL 2411 (ZOOL 2531), BIOL 2420 (ZOOL 2540), BIOL 2421 (ZOOL 2541), BIOL 2540 (ZOOL 2150), BIOL 3260 (BOTN 2290), BIOL 3290 (BOTN 3280), BIOL 3291, BIOL 3330 (BOTN 3250), BIOL 3370 (ZOOL 3500), BIOL 3450 (BOTN 2020), BIOL 3452 (BOTN 3010), BIOL 3460 (ZOOL 3530), BIOL 3462 (ZOOL 3540), BIOL 3470, BIOL 3472, BIOL 3500 (BOTN 3460), BIOL 3501, BIOL 3540 (ZOOL 3070), BIOL 3560 (ZOOL 3060), BIOL 3561, BIOL 4242 (BOTN 4130), BIOL 4244 (BOTN 4160), BIOL 4246 (BOTN 4050), BIOL 4250 (BOTN 4210), BIOL 4430 (BOTN 4120), BIOL 4480
(ZOOL 4600), BIOL 4540 (ZOOL 4150), BIOL 4542 (ZOOL 4270), BIOL 4560 (ZOOL 4140)

## Chemistry:

CHEM 2280, CHEM 2290, CHEM 2380, CHEM 2400, CHEM 2470, CHEM 3390, CHEM 3590, CHEM 3570, CHEM 4590, CHEM 4360, CHEM 4370, CHEM 4620, CHEM 4630 CHEM 4670

Environmental Science: ENVR 2180

Food Sciences: FOOD 4150, FOOD 4280

General Agriculture: AGEC 2180, AGEC 2370

Pharmacology: PHAC 4030, PHAC 4040

Statistics: STAT 2000

NOTE: Other suitable options may be selected with permission of the department.

## Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000 and (or) 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Microbiology, students must take a minimum of 18 credit hours of Microbiology courses as prescribed in the chart below (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.).

Students wishing to elect courses in Microbiology in fulfilment of the requirements for the B.Sc. (General) degree should note the following:

- Students must obtain a grade of " $C$ " or better in the following: MBIO 1010, BIOL 1020, BIOL 1030, CHEM 1300 and CHEM 1310
- Students are encouraged to elect additional Microbiology courses above the required minimum.
- Microbiology MBIO 2770 and MBIO 2780 (CHEM 2770 and CHEM 2780) are not available in this program.

## Minor

Students must complete MBIO 1010, CHEM 1300, CHEM 1310, BIOL 1020, BIOL 1030, plus 12 credit hours of Microbiology courses at the 2000 and (or) 3000 level.

## Biochemistry and Biotechnology Programs

The Department of Microbiology, in conjunction with the Department of Chemistry, offers Joint Honours programs, Joint Honours Co-operative Option programs, Joint four year Major programs and Joint four year Major Cooperative Option programs in Biochemistry and Biotechnology. See Sections 4.2 Biochemistry Program and 4.4 Biotechnology Program for full details.

### 4.10.3 Microbiology -1000 Level

MBIO 1010 Microbiology I Cr.Hrs. 3
(Lab Required) Topics will include the definition and history of microbiology, concepts of practical microbiology, prokaryotic cell structure, prokaryotic specialization in gene expression and transfer of genetic information, the role of microbes in environments including the human body, and applications of microbiology to food production and biotechnology. Not to be held with MBIO 1011 or the former MBIO 2100 (MBIO 2101) or MBIO 2110 (MBIO 2111). Prerequisite or concurrent requirement: BIOL 1020.

MBIO 1220 Essentials of Microbiology Cr.Hrs. 3 (Formerly 060.122) A review of the essential principles of microbiology including immunity, with emphasis on microbial disease. Not available to students who have previously obtained credit in or are currently enrolled in MBIO 3010 or MBIO 3011 (or 060.301). Prerequisite: any grade 12 or 40S Mathamatics, or equivalent. This prerequisite is waived for students in the Baccalaureate Program for Registered Nurses. NOTE: MBIO 1220 is intended for students planning to enter the Faculty of Nursing or other health care or related programs, but may be used as an elective in an Arts or Science program. It may also be used to meet a program requirement for the Honours and Major programs in Microbiology.

### 4.10.3 Microbiology -2000 Level <br> MBIO 2020 Microbiology II Cr.Hrs. 3

(Lab Required) Topics will include bacterial growth, chromosome replication, the specifics of transcription and translation and their application to the regulation of microbial gene expression. Families of bacterial and animal viruses, their modes of reproduction and pathogenicity will be discussed. Mutation and gene transfer in bacteria will be introduced. Not to be held with MBIO 2021 or MBIO 2110 (60.211), MBIO 2111. Prerequisites: MBIO 1010 or MBIO 1011 and one of CHEM 1310, CHEM 1311 or CHEM 1320 (C).

MBIO 2230 Introductory Biogeochemistry Cr.Hrs. 3 (Formerly 060.223) The roles and interactions of biological, chemical and geological reactions in determining the composition of the environment. Microorganisms as major agents of biogeochemical change and their roles in the element cycles will be especially emphasized. Not available
to students who have previously obtained credit in MBIO 4320 ( 060.432 ) or MBIO 4440 ( 060.444 ) or are currently registered in MBIO 4440. Prerequisite: one of MBIO 1010, MBIO 1011, BIOL 1030, BIOL 1031 or the former $071.125(\mathrm{C})$; and CHEM 1310 or CHEM 1311 (002.131) (C).

MBIO 2360 Biochemistry 1: Biomolecules and an Introduction to Metabolic Energy Cr.Hrs. 3 (Lab Required) (Formerly 060.236) An introductory course dealing with kinds of molecules encountered in biochemistry, and the concept of metabolic energy as a product of catabolism and a requirement for biosynthesis. This course is also given in Chemistry as CHEM 2360. Not to be held with MBIO 2361, MBIO 2770 (060.277), CHEM 2360, CHEM 2361 (002.236), CHEM 2860 (002.286), or CHEM 2770 (002.277) Prerequisites: CHEM 1310 or CHEM 1311 (002.131); and one of BIOL 1030, BIOL 1031, or the former 071.125 , both courses with a minimum grade of "C". NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (preSeptember 2008 regulations). Those students following the new B.Sc. General Degree regulations (effective 2008-09) are able to use this course as advanced level credit in both Microbiology and Chemistry.

MBIO 2370 Biochemistry 2: Catabolism, Synthesis, and Information Pathways Cr.Hrs. 3
(Lab Required) (Formerly 060.237) An introductory course dealing with the basic metabolic processes that occur in living cells, including the production and use of metabolic energy, the breakdown and synthesis of biomolecules; the synthesis of DNA, RNA and proteins; and the regulation of these processes. This course is also given in Chemistry as CHEM 2370. Not to be held with MBIO 2371, MBIO 2780 (060.278), CHEM 2370, CHEM 2371 (002.237), or CHEM 2780 (002.278). Prerequisites: CHEM 2210 (002.221) (C); and one of MBIO 2360 (060.236), MBIO 2361, CHEM 2360 (002.236), or CHEM 2361 (C). NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new B.Sc. General Degree regulations (effective 2008-09) are able to use this course as advanced level credit in both Microbiology and Chemistry.

MBIO 2410 Essentials of Molecular Biology Cr.Hrs. 3
An introduction to the mechanisms, themes and patterns that

University of Manitoba
are present in the molecular biology of both eukaryotic and prokaryotic organisms. The applications of molecular biology to disciplines such as genomics, applied bioinformatics and medical microbiology will be discussed. Not available to students who have previously obtained credit in, or are currently enrolled in the following courses: BIOL 2500, BIOL 2501, MBIO 2020, MBIO 2021, the former MBIO 2100 (MBIO 2101), MBIO 3410 or MBIO 3411. Prerequisite: one of grade 12 Biology, grade 12 Chemistry, BIOL 1000, CHEM 1000, or any higher level Chemistry or Biology course; or consent of department. NOTE: MBIO 2410 is intended for students outside of Microbiology and Biological Sciences who require an introduction to molecular biology, such as those with interests in bioinformatics, biophysics, or bioengineering. It may be used to fulfill Microbiology Major or Honours program course requirements if completed prior to the courses listed above, and it may serve as advanced Level Microbiology in the three-year general degree program.

MBIO 2770 Elements of Biochemistry 1 Cr.Hrs. 3 (Lab Required) (Formerly 060.277) Basic concepts of biochemistry including the properties of biomolecules (amino acids and proteins, enzymes, carbohydrates, lipids, and nucleic acids) and aspects of energy production in cells. For students in Agricultural and Food Sciences, Human Ecology, and four-year Biological Sciences programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or in Microbiology. This course is also given in Chemistry as CHEM 2770. Not be held with CHEM 2770 (002.277), MBIO 2360, MBIO 2361 (060.236), CHEM 2360, CHEM 2361 (002.236), or CHEM 2860 (002.286). Prerequisites: CHEM 1310 or CHEM 1311 (002.131) (C) or CHEM 1320 (or 002.132) (C), plus six credit hours of university level biological sciences.

MBIO 2780 Elements of Biochemistry 2 Cr.Hrs. 3 (Lab Required) (Formerly 060.278) The continuation of MBIO 2770 (CHEM 2770), dealing with nitrogen and lipid metabolism, representative biosynthetic pathways, and synthesis and importance of DNA, RNA and proteins. For students in Agricultural and Food Sciences, Human Ecology, and four-year Biological Sciences programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or Microbiology. This course is also given in Chemistry as CHEM 2780. Not to be held with CHEM 2780 (002.278), MBIO 2370, MBIO 2371 (060.237), CHEM 2370, or CHEM 2371 (002.237). Prerequisite: A grade of " $C$ " or better in one of MBIO 2770 (060.277), CHEM 2770 (002.277), MBIO 2360, MBIO 2361 (060.236), CHEM 2360, or CHEM 2361 (002.236).

### 4.10.3 Microbiology -3000 Level

MBIO 3000 Applied Biological Safety Cr.Hrs. 3 A comprehensive overview of (i) applied biological safety in research and industrial environments and (ii) the diseasecausing features of relevant infectious agents and considerations for their containment. The course consists of lectures and demonstration components. Prerequisite: MBIO 1010 (MBIO 1011)(C) or the former MBIO 2100 (or equivalent MBIO 2101, 060.210) (C); and one of CHEM 1310, CHEM 1311 (002.131), CHEM 1320 (002.132) or permission of instructor. Check with department for availability.

MBIO 3010 Mechanisms of Microbial Disease Cr.Hrs. 3 (Formerly 060.301) A consideration of host-parasite relationships, an introduction to the immune response, microbial pathogenesis, viral diseases, clinical microbiology and public health, and an introduction to antimicrobial agents. Not to be held with MBIO 3011. Prerequisites: MBIO 2020 (MBIO 2021)(C) or the former MBIO 2100 (or equivalent MBIO 2101, 060.210) (C); and one of MBIO 2370, MBIO 2371(060.237), CHEM 2370, or CHEM 2371 (002.237) (C).

MBIO $\mathbf{3 0 3 0}$ Microbiology III Cr.Hrs. 3
(Lab Required) The course will include an introduction to microbial growth and genomics approaches used for the analysis of microbial metabolism. Using these tools, the physiology of microbial cell walls, transport, and motility, as well as microbial metabolism as related to ATP production, respiration, fermentation and carbon fixation will be discussed. Not to be held with MBIO 3031 or the former MBIO 2100 (60.210). Prerequisites: MBIO 2020 (MBIO 2021)(C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371 (C); or consenct of instructor.

MBIO 3280 Microbial Communities Cr.Hrs. 3
(Lab Required) This course will examine microbial communities, which will be discussed in terms of their composition, physiological adaptations and their effects on their abiotic and biological surroundings. Topics will include nutrient cycling, biodegradation and adaptation to extreme environments, and the applications arising from these microbial functions. Methods for quantitation of microbial biomass and biological activity will be discussed. This course may not be held for credit with MBIO 2280. Prerequisites: both MBIO 1010 (MBIO 1011)(C) and CHEM 1310 (CHEM 1311, 002.131)(C); or MBIO 2100 (MBIO 2101, 060.210)(C). MBIO 2020 (MBIO 2020, MBIO 2110) and MBIO 2410 are recommended prerequisites.

MBIO 3410 Molecular Biology Cr.Hrs. 3
(Formerly 060.341) A rigorous treatment of the foundations of modern day molecular biology as it pertains to molecular disease, gene and cell manipulation, and cellular controls. Not to be held with MBIO 3411. Prerequisites: One of MBIO 2370, MBIO 2371 (060.237), CHEM 2370, CHEM 2371 (002.237), MBIO 2780 (060.278), or CHEM 2780 (002.278) (C); and a C or better in one of MBIO 2020 (MBIO 2021), MBIO 2110 (MBIO 2111), BIOL 2520 (BIOL 2521, ZOOL 2280, ZOOL 2281) or BIOL 2500 (BIOL 2501, BOTN 2460, BOTN 2460).

MBIO 3430 Molecular Evolution Cr.Hrs. 3
(Formerly 060.343) An analysis starting with prebiotic evolution, progressing through the elaboration of macromolecules and examining their adaptation to their function as cellular components. Proteins, carbohydrates, and nucleic acids as structural, catalytic, and genetic elements in evolution of living systems. Prerequisite: MBIO 2410 (C) or MBIO 3410 (C) or permission of instructor. MBIO 2020 (MBIO 2021) and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371, MBIO 2780 or CHEM 2780 are strongly recommended for students who have not completed MBIO 3410.

MBIO 3450 Regulation of Biochemical Processes Cr.Hrs. 3 (Formerly 060.345) Mechanisms of regulation of enzyme activity, including allostery, control of selected biosynthetic and degradative pathways and regulation of gene
expression. Contact department regarding availability. Not to be held with MBIO 3451. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371 (C); or consent of the department.

MBIO 3460 Membrane and Cellular Biochemistry Cr.Hrs. 3 (Lab Required) (Formerly 060.346) Isolation, fractionation, structure and function of cellular membranes and subcellular components. The central role of these elements in the biochemistry of cellular processes will be stressed. Not to be held with MBIO 3461. Prerequisites: One of MBIO 2370, MBIO 2371 (060.237), CHEM 2370, or CHEM 2371 (002.237) (C).

MBIO 3470 Microbial Systematics Cr.Hrs. 3 (Lab Required) (Formerly 060.347) Characterization and classification of the major group of micro-organisms. Bases for divisions and the relatedness among organisms will be studied. Laboratory work on the identification of representative species. Prerequisite: MBIO 3030 (MBIO 3031) or MBIO 2110 (MBIO 2111) (C).

MBIO 3980 Work Term 1 Cr.Hrs. 0
(Formerly 060.398) Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

MBIO 3990 Work Term 2 Cr.Hrs. 0
(Formerly 060.399) Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

### 4.10.3 Microbiology -4000 Level

MBIO 4010 Immunology H Cr.Hrs. 3
(Lab Required) (Formerly 060.401) Topics will include antigens, antibodies, antigen-antibody reactions, immunogenetics, regulation of immune reactions, complement, hypersensitivities, autoimmunity, immunodeficiencies, transplantation and tumour immunology. Priority will be given to fourth year Science Honours students. Not to be held with MBIO 4011, MBIO 4020 (060.402), or the former 060.444. Prerequisite: MBIO 3010 or MBIO 3011 (060.301) (C).

MBIO 4020 Immunology Cr.Hrs. 3
(Formerly 060.402) Topics will include antigens, antibodies, antigen-antibody reactions, immunogenetics, regulation of immune reactions, complement, hypersensitivities, autoimmunity, immunodeficiencies, transplantation and tumour immunology. Not to be held with MBIO 4010, MBIO 4011 (060.401). Prerequisite: MBIO 3010 or MBIO 3011 (060.301) (C).

MBIO 4410 Virology Cr.Hrs. 3
(Formerly 060.441) A comprehensive examination of fundamental properties of viruses, virus taxonomy, and the different ways in which viruses replicate. The ways viruses cause disease and experimental methods used in virology
also will be examined. Not to be held with MBIO 4411, or for credit by students who have already taken MMIC 7010 (097.701). Prerequisites: MBIO 3010 or MBIO 3011 (060.301) (C); and MBIO 3410 or MBIO 3411(060.341) (C).

MBIO 4440 Systems Microbiology: from Genomes to Life Cr.Hrs. 3
(Lab Required) The purpose of this course is to use knowledge of the components of the bacterial cell to synthesize an understanding of the growth of microbes and their adaptation to their environments. The most recent research tools and systems biology approaches will be discussed. This course may not be held for credit with MBIO 3440. Prerequisites: MBIO 3030 (MBIO 3031)(C); or the former MBIO 2110 (MBIO 2111, 60.211)(C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371(C).

MBIO 4480 Microbes in our Environment Cr. Hrs. 3 (Lab Required) A course investigating the diversity of roles microbes play in our immediate environment, and how they affect it. Environments to be examined may include the human body, waste treatment facilities and extreme environments. Molecular tools to study the community structure and roles of individual organisms will also be discussed. This course may not be held for credit with MBIO 3480 or MBIO 4320. Prerequisites: MBIO 3030 (MBIO 3031)(C); or the former MBIO 2110 (MBIO 2111, 60.211)(C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371(C).

MBIO 4520 Industrial Bioprocesses Cr.Hrs. 3 (Lab Required) Bioprocesses for a range of commercially important healthcare and industrial products including antibiotics, vaccines, steroids, therapeutic recombinant proteins, monoclonal antibodies, and ethanol will be discussed. Other topics will include bioreactor design, metabolic engineering, applied genetic engineering and animal cell technology. This course may not be held for credit with MBIO 4510. Prerequisites: MBIO 3030 (or one of MBIO 2100 or MBIO 2101) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371 (C).

MBIO 4530 Project in Microbiology Cr. Hrs. 6
(Lab Required) (Formerly 060.453) A research project chosen in consultation with the department head, and supervised by a staff member. A written report is normally required. The course is available only to final year Honours students in Microbiology, the Joint Microbiology-Chemistry programs, or the Genetics program. Not to be held with CHEM 4710 (002.471).

MBIO 4540 Biological Energy Transduction Cr.Hrs. 3 (Formerly 060.454) Biochemistry of biological processes involving interconversion of different forms of energy such as oxidative phosphorylation, membrane transport and contractile processes. Not to be held with MBIO 4541. Prerequisite: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371(C); or consent of the department. MBIO 3030 (MBIO 3031) is recommended as a prerequisite to this course.

MBIO 4600 Molecular Genetics of Prokaryotes Cr.Hrs. 3 (Lab Required) (Formerly 060.460) A detailed examination of replication, expression, mutability, repair and transposition of DNA in bacteria and their viruses. Priority will be given to Science Honours and Majors students. Check with
department for availability. Not to be held with MBIO 4601, MBIO 4602 or the former 060.452 or 060.456 . Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371 (C). BIOL 2500, (BIOL 2501, BOTN 2460, BOTN 2461) is recommended.

MBIO 4602 Molecular Genetics of Prokaryotes Lectures Cr.Hrs. 3
A detailed examination of replication, expression, mutability, repair and transposition of DNA in bacteria and their viruses. Lecture material will be identical to that of MBIO 4600, but MBIO 4602 lacks the laboratory component. Honours and Major students must register in MBIO 4600. Check with the department for availability. Not to be held with MBIO 4600, MBIO 4601 or the former 060.460, 060.452 or 060.456. Prerequisites: MBIO 2020 (MBIO 2021) or the former MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, or CHEM 2370, CHEM 2371(C). BIOL 2500 (BOTN 2460, BOTN 2461) is recommended.

MBIO 4610 Molecular Genetics of Eukaryotes Cr.Hrs. 3 (Lab Required) (Formerly 060.461) A comprehensive study dealing with replication and expression of DNA, genome structure, and the involvement of genes in diseases such as cancer. Priority will be given to Science Honours and Majors students. Check with the department for availability. Not to be held with MBIO 4612. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and MBIO 3410 or MBIO 3411. BIOL 2500 (BIOL 2501, BOTN 2460, BOTN 2461) is recommended.

MBIO 4612 Molecular Genetics of Eukaryotes Lectures Cr.Hrs. 3
A comprehensive study dealing with replication and expression of DNA, genome structure, and the involvement of genes in diseases such as cancer. Lecture material will be identical to that of MBIO 4610, but MBIO 4612 lacks the laboratory component. Honours and Majors students must register in MBIO 4610. Check with the department for availability. Not to be held with the MBIO 4610. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and MBIO 3410 or MBIO 3411 (C). BIOL 2500 (BIOL 2501, BOTN 2460, BOTN 2461) is recommended.

MBIO 4670 Applied Molecular Biology H Cr.Hrs. 3 (Lab Required) The overall objective of this course is to introduce and describe current molecular techniques and their application to biological problems. These include, but are not limited to basic gene cloning, mutagenesis, and overexpression. Priority will be given to Science Honours students. Not to be held with MBIO 4672 , or the former MBIO 4570 (60.457), MBIO 4581 or the former MBIO 4580 (60.458). Prerequisites: MBIO 3410 or MBIO 3411 (60.341) (C).

MBIO 4672 Applied Molecular Biology Cr.Hrs. 3 The overall objective of this course is to introduce and describe the current molecular techniques and their application to biological problems. These include, but are not limited to, basic gene cloning, mutagenesis and overexpression. Not to be held with MBIO 4670, the former MBIO 4570 (060.457), MBIO 4581 or the former MBIO 4580 (060.458). Prerequisite: MBIO 3410 or MBIO 3411 (060.341) (C).

MBIO 4980 Work Term 3 Cr.Hrs. 0
(Formerly 060.498) Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade ony).

MBIO 4990 Work Term 4 Cr.Hrs. 0
(Formerly 060.499) Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

### 4.11 Department of Physics and Astronomy

Head: Kumar Sharma
Campus Address/General Office: 301 Allen Building
Telephone: 2044749817
Email Address: physics@umanitoba.ca
Website: http://www.physics.umanitoba.ca/

### 4.11.1 Program Information

Physics is the discipline that by experiment and logical analysis examines the laws of nature that form the basis for all relationships and interactions between matter and energy. Knowledge of physics is also essential in other natural sciences, such as chemistry and geology, and to professions such as engineering, medicine and dentistry. Astronomy, the other focus of this department, examines the universe, the earth and the planets, as well as phenomena such as quasars, pulsars, comets, and asteroids; a planetarium and an astronomical observatory are part of this program. In both Physics and Astronomy mathematical skills are developed simultaneously.

The department must approve a student's Honour or Major program prior to registration in each session. Students must also obtain approval for any and all revisions to their program.

The Department of Physics and Astronomy and the Department of Electrical and Computer Engineering have defined focus areas of study within their own programs. Students taking the courses recommended for these focus areas will find it easier to transfer between programs in Physics and Astronomy and Electrical and Computer Engineering programs. Students interested in obtaining more information about transferring to a Physics program from Electrical Engineering should consult with the Head of the Physics department.

## Honours

To enter the Honours programs in Physics and Astronomy, a student must have completed at least 24 credit hours with a minimum GPA of 3.00 , and also obtained a minimum
grade of "B" in PHYS 1070, or a "B+" in PHYS 1030. Students are strongly encouraged to complete MATH 1300, MATH 1500, and MATH 1700 in Year 1. Not only are these courses required in the Physics and Astronomy programs,
they are required prerequisites to several second year
Physics and Astronomy required courses.

To continue in the Physics and Astronomy Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum GPA of 3.00 and minimum grade of " $C$ " in each course that contributes to the 120 credit hours of the degree.

There are a number of awards - the Coish, the C.P. Loewen, the Neamtan, the Roulston, and the Sen Scholarships - available in this program.

## Joint Honours

The Department of Physics and Astronomy offers joint honours programs in conjunction with the Departments of Mathematics, Computer Science, and Chemistry.

To enter the Joint Honours Mathematics-Physics program the student must have a minimum grade of " $B$ " in: MATH 1300, MATH 1510, MATH 1710 (or MATH 1690), PHYS 1050 (or "B+" in PHYS 1020) and PHYS 1070.

To enter the Joint Honours Computer Science-Physics program, the student must have a minimum grade of " B " in: PHYS 1050 (or "B+" in PHYS 1020), PHYS 1070, MATH 1300, MATH 1500 (or equivalent), MATH 1700 (or equivalent), and COMP 1020.

To enter the Joint Honours Chemistry-Physics program, the student must have a minimum grade of "B" in: PHYS 1050 (or "B+" in PHYS 1020), PHYS 1070, CHEM 1300, CHEM 1310, MATH 1500 and MATH 1700.
4.11.2 Physics and Astronomy Program Charts

ACADEMIC CALENDAR
2012-2013 >

| W"    <br> requirement. 2650   |
| :--- |

A minimum of 18 credit hours must be chosen from this list: PHYS 2070, PHYS 2210 (or the former PHYS 2200), PHYS 2250, PHYS 22
to the Faculty requirement that of the 36 hours of advanced level courses, at least 6 credit hours must be chosen from the 3000 and (or)

## MINOR

| $\begin{aligned} & \text { PHYS } 1050 \text { (C) } \\ & \text { and PHYS } 1070 \\ & \text { (C) (or PHYS } \\ & 1020(\mathrm{C}+) \text { and } \\ & \text { PHYS 1030 } \\ & (\mathrm{C}+)) \\ & \hline \end{aligned}$ | A minimum of 12 credit hours from PHYS 2070, PHYS 2210 (or the former PHYS 2200), PHYS 2250, PHYS 2260, PHYS 2270, PHYS |
| :---: | :---: |
| JOINT HONOURS: PHYSICS - CHEMISTRY refer to section 4.5.3 |  |
| JOINT HONOURS: PHYSICS - COMPUTER SCIENCE (including Co-operative Option) refer to section 4.6.4 |  |
| JOINT HONOURS: PHYSICS - MATHEMATICS refer to section 4.9.3 |  |
| NOTES: |  |
| 1 Students must achieve a minimum grade of " C " in all courses contributing to the Honours program. |  |
| 2 MATH 1310 may be taken in place of MATH 1300; MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 |  |
| may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700. MATH 2750 may be taken as a recommended course in lieu of MATH 2720 and MATH 2730. |  |
| 3 Although they are not required courses in the Physics programs, MATH $2720^{3}$, MATH $2730^{3}$, MATH 2800, and MATH 3700 are |  |
| highly recommended electives for the Physics Honours and Four Year Major degrees, and should be taken when possible. |  |
| 4 The selection | hese 6 credit hours must be made in consultation with the Departmental Program Advisor. |

University of Manitoba

IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates the recommended arrangement of the required courses and is meant to be a guide around which students can plan their program (Letters in brackets refer to minimum prerequisite standing required for further study. The number 6 in brackets indicates a 6 credit hour course

### 4.11.3 Physics and Astronomy -0 Level

 PHYS 0900 Preparing for University Physics Cr.Hrs. 0 (Formerly 016.090) A review of elementary physics, emphasizing the laws of mechanics, for students considering enrolling in a first-year university physics course. Mathematical techniques used in solving physics problems and the relevance of physics to everyday life will be stressed. Although this course may be used as part of the prerequisite requirements for first-year Physics courses, students are encouraged to take Physics 40S whenever possible.
### 4.11.3 Physics and Astronomy - 1000 Level PHYS 1020 General Physics 1 Cr.Hrs. 3

(Lab Required) (Formerly 016.102) It's a crazy world; come and find out why objects fall, slide, bounce, stick, go in circles or stay straight, float or sink, glide or crash. Why don't satellites fall to the ground? What exactly does weightlessness mean anyway? Find answers to these and other questions as you get to know Newton's and other basic laws of nature and see what makes the world go round. This course, together with the sequel PHYS 1030 (or 016.103), is recommended for students seeking either a single, comprehensive course in Physics or entry into health science programs. It may also be used for entry into the Honours Physics program ("B+" or better) or the Major Physics program ("B" or better). Not to be held with PHYS 1021, PHYS 1050, PHYS 1051 (016.105), PHYS 1410 (016.141), PHYS 1420 (016.142), or the former 016.127. Prerequisites: Either Physics 40S, PHYS 0900 (016.090) (P), or equivalent; and either Pre-calculus Mathematics 40S, Applied Mathematics 40 (with $70 \%$ or better), or equivalent. It is strongly recommended that students attain a minimum of 70\% as the average of their marks in Physics 40S and Pre-calculus Mathematics 40S.

PHYS 1030 General Physics 2 Cr.Hrs. 3
(Lab Required) (Formerly 016.103) Discover how physics is the basis of the hi-tech world we live in and how we live in it. Learn how to use simple, intuitive physics concepts that are described using little math and no calculus to understand a diversity of topics including how electricity is made, what drives the greenhouse effect, what makes a diamond sparkle, lasers, LASIC eye surgery and the workings of the human eye. This course, together with its prerequisite PHYS 1020 (016.102), is recommended for students seeking either a single comprehensive course in Physics, or entry into health science programs. Not suitable for entry to Major or Honours in Physics. This course may not be held with PHYS 1031, PHYS 1410 (016.141), PHYS 1420 (016.142), or the former 016.120. Prerequisite: One of PHYS 1020, PHYS 1021 (016.102) (C), PHYS 1050, or PHYS 1051 (016.105) (C).

PHYS 1050 Physics 1: Mechanics Cr.Hrs. 3 (Lab Required) (Formerly 016.105) It's rocket science! Mechanics is the science of describing (Kinematics) and explaining (Dynamics) motion. The basic concepts of
calculus together with laws of conservation of momentum and energy are used to develop the tools required to describe, analyze and predict the outcomes of linear and rotational motion in simple mechanical systems. A brief introduction to the Einstein theory of special relativity provides a taste of modern approaches to this subject. This course develops a strong scientific foundation for students considering a program of study in engineering or the physical sciences. Not to be held with PHYS 1020, PHYS 1021 (016.102), PHYS 1051, PHYS 1410 (016.141), PHYS 1420 (016.142), or the former courses 016.118, 016.120, or 016.127. Prerequisites: Pre-calculus Mathematics 40S (300) (or equivalent) and Physics 40S (300) (or equivalent); or PHYS 0900 (016.090) (Pass). It is strongly recommended that students attain a minimum of 80 per cent as the average of their marks in Physics 40S (300) and Pre-calculus Mathematics 40S (300). Prerequisite or concurrent requirement: One of MATH 1500, MATH 1501, MATH 1510, MATH 1520, the former 136.153 or MATH 1690.

PHYS 1070 Physics 2: Waves and Modern
Physics Cr.Hrs. 3
(Lab Required) (Formerly 016.107) At the heart of modern communications, waves and oscillations are key to understanding the world around us from subatomic scales to biology, traffic flow, the stock market, climate change and the cosmos itself. Learn about the mysterious quantum world, the basis of the latest nanotechnology, where particles are waves and waves are particles. Explore Bohr's model of the atom and discover Heisenberg's Uncertainty Principle. This calculus based course addresses the underlying concepts for all modern science and engineering. This course, like Physics 1 (PHYS 1050), is intended for students considering a program in the physical sciences. Not to be held for credit with PHYS 1071, PHYS 1410 (016.141), PHYS 1420 (016.142). Prerequisites: PHYS 1050 (or equivalent - PHYS 1051, 016.105, 016.118) (C) or PHYS 1020 (or equivalent - PHYS 1021, 016.102) (B); and "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), or the former 136.153. Prerequisite or concurrent requirement: one of MATH 1700, MATH 1701, MATH 1690, MATH 1710, or the former 136.173.

PHYS 1300 Energy and the Environment Cr.Hrs. 6 (Formerly 016.130) This course provides a broad physical outlook on the environment in which we live. Emphasis will be placed on topics of current interest such as the atmosphere, outer space, the fundamental structure of energy and matter, energy sources, the application of physical principles in modern technology, etc. The lectures will include films and demonstrations; student participation will be encouraged in discussions and in the choice of topics. The course is designed for students of all faculties and a prior knowledge of mathematics and physics is not a requirement. Not to be held with PHYS 1301. This course cannot be used as a part of a Major or Minor in Physics.

PHYS 1810 General Astronomy 1 Cr.Hrs. 3
(Lab Required) (Formerly 016.181) The topics covered in this course outline the properties of stars and planets that can be observed and the physics necessary to interpret

University of Manitoba
these observations. It includes a brief introduction to galaxies and cosmology. Using lectures and laboratory sections, it provides an astronomy background and introduction to the scientific method. It ranges from introductory physical background to considering current research problems. This course is mainly descriptive, taught at a qualitative level, with simple arithmetic and trigonometry used frequently. Not to be held with the former 016.180.

PHYS 1820 General Astronomy 2: Exotic Stars, Galaxies and Cosmology Cr.Hrs. 3
(Lab Required) (Formerly 016.182) This course extends the material from General Astronomy 1, increasing the student's physical understanding of topics like black holes, galaxies, and the expanding universe. Topics range from the Big Bang to the formation of neutron stars. A significant amount of simple arithmetic and trigonometry is used to provide the insights into physical background and to illuminate current research problems. Labs and observing sessions are used to teach scientific method. Not to be held with the former 016.180. Prerequisites: Pre-calculus Mathematics 40 S or equivalent, or consent of department.

PHYS 1830 Perspective on the Universe Cr.Hrs. 3 (Lab Required) (Formerly 016.183) This general interest course is a qualitative course on the concepts and discoveries in astronomy. Topics may vary from year to year and could include Life on Other Worlds or Astronomy in the News. These themes are used to give the student a qualitative astronomy background ranging from planets and stars to galaxies and cosmology. A few special sessions at Glenlea Observatory and the Lockhart Planetarium introduce the student to scientific method. Although simple arithmetic and trigonometry will be used occasionally, this is a descriptive course.

### 4.11.3 Physics and Astronomy -2000 Level PHYS 2060 Fundamentals of Physics in Radiation

 Therapy Cr.Hrs. 3(Lab Required) (Formerly 016.206) Provides the student with a fundamental understanding of the physical nature of photons and electrons and the manner in which they interact with an absorbing scattering medium. The concepts presented in this series will enhance the student's ability to make decisions regarding clinical radiation therapy treatments. Also taught by Allied Heath as RTT 2060. Restricted to students in the Radiation Therapy program. Prerequisite: PHYS 1030 or PHYS 1031 (016.103) (C). Prerequisite or concurrent requirements: RTT 2040 and RTT 2080.

PHYS 2070 Observational Astronomy Cr.Hrs. 6
(Lab Required) (Formerly 016.207) Students will undertake a project on galaxies or nebulae using the University of Manitoba's Astronomical Observatory at Glenlea. Prerequisite: PHYS 1030 or PHYS 1031 (016.103) (B); or PHYS 1070 or PHYS 1071 (016.107) (C); or one of PHYS 1810 (016.181) (C) or PHYS 1830 (016.183) (C).

## PHYS 2090 Radiation Protection in Radiation

Therapy Cr.Hrs. 3
(Formerly 016.209) Previews fundamental concepts used to minimize the risk when working with radiation, with emphasis on radiation therapy. Includes types and sources of radiation, radiation quantities and units, biological effect and
potential risks, basic principles of protection, regulation and dose limits, methods of dose monitoring, and applications in radiation therapy. Also taught by Allied Heath as RTT 2090. Restricted to students in the Radiation Therapy program. Prerequisites: RTT 2100 (163.210) (C), RTT 2060 (163.206) (C).

PHYS 2150 Radiation Biology Cr.Hrs. 3
(Formerly 016.215) This course deals with the fundamentals of radiation biology and focuses on the effects of radiation at a cellular and molecular level. Also taught by Allied Heath as RTT 2150. Restricted to students in the Radiation Therapy program. Prerequisite: PHYS 1030 or PHYS 1031 (016.103) (C).

PHYS 2152 Modern Physics for Engineers Cr.Hrs. 3 (Lab Required) An overview of topics in modern physics including wave particle duality, atomic structure and quantum mechanics. Elementary classical electromagnetic theory and wave theory are reviewed as an introduction to the modern physics concepts. For Engineering students only. Not to be held with PHYS 1070 or PHYS 1071 (016.107). Prerequisites: a "C" or better in one of PHYS 1050, PHYS 1051 (016.105), or the former 016.118; or a "B" or better in PHYS 1020 or PHYS 1021 (016.102); and a "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), or the former 136.153; and a "C" or better in one of MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), the former 136.173, or MATH 1690 (136.169). Prerequisite or concurrent requirement: MATH 2130.

PHYS 2210 Understanding Electricity and
Magnetism Cr.Hrs. 3
An introduction ranging from its history to connections with real-world phenomena in engineering and biology, and common sense on the understanding of the phenomena. The student is carefully guided through mathematical derivations. Physics is used to develop the theory and the applications of such things as motors, radios, magnetic resonance imaging (MRI) systems and computers. Not to be held with PHYS 2200, PHYS 2201, PHYS 2600 (016.260) or PHYS 2610 (016.261). Prerequisites: A "C" or better in PHYS 1070 (or equivalent - PHYS 1071, 016.107, 016.106, 016.120), or a "C+" or better in both of PHYS 1020 (or equivalent - PHYS 1021, 016.102) and PHYS 1030 (or equivalent - PHYS 1031, 016.103); and a "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169). Prerequisite or concurrent requirements: MATH 1200 or MATH 1201; and one of MATH 1690, MATH 1700, MATH 1701, MATH 1710, or the former 136.173.

PHYS 2250 Introductory Modern Physics Cr.Hrs. 3 (Formerly 016.225) Come join us as we explore the ground breaking discoveries in physics during the last 100 years that have laid the foundation for our modern high-tech world and brought us nuclear power, computers, nanotechnology and new energy technologies (to name a few). Then, finish off with a look into the future, at the 21st century physics frontier. Not available to students who have previously obtained credit in, or are currently registered in PHYS 2251, PHYS 2380 (016.238) or the former 016.250. Not available to students in Honours or Major programs in Physics.
Prerequisites: a "C" or better in PHYS 1070 (or equivalent PHYS 1071, 016.107, 016.127), or a "C+" or better in both of

PHYS 1020 (or equivalent - PHYS 1021, 016.102) and PHYS 1030 (or equivalent - PHYS 1031, 016.103); and a "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169). Prerequisite or concurrent requirements: MATH 1200 or MATH 1201; and one of MATH 1690, MATH 1700, MATH 1701, MATH 1710 or the former 136.173 (D).

## PHYS 2260 Optics Cr.Hrs. 3

(Lab Required) (Formerly 016.226) A survey of refraction, reflection, simple lens systems and optical systems, dispersion, achromatism and an elementary treatment of diffraction, interference, and polarization. Not to be held with PHYS 2261. Prerequisites: A "C" or better in PHYS 1070 (or equivalent - PHYS 1071, 016.107), or a "C+" or better in both of PHYS 1020 (or equivalent - PHYS 1021, 016.102) and PHYS 1030 (or equivalent - PHYS 1031, 016.103); and a " $C$ " or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169). Prerequisite or concurrent requirements: One of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and one of MATH 1690, MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173.

PHYS 2270 Physical Topics for Biologists A Cr.Hrs. 3 (Formerly 016.227) Physical topics with a relation to biology are discussed. Radiative transfer of energy, boundary layers, heat conduction, diffusion, mass transport, and the use of radioactive materials in biology are considered. Not to be held with PHYS 2271. Prerequisite: a grade of "C" or better in one of PHYS 1050, PHYS 1051 (016.105), PHYS 1020, or PHYS 1021 (016.102); or consent of department.

PHYS 2280 Physical Topics for Biologists B Cr.Hrs. 3 (Formerly 016.228) Physical properties of solids, liquids, and gases including diffusion and membranes; radiation and radioactivity. Aspects of particular interest to the biological sciences are stressed. Not to be held with PHYS 2281. Prerequisite: a grade of " $C$ " or better in one of PHYS 1070, PHYS 1071 (016.107), PHYS 1030, or PHYS 1031 (016.103); or consent of department.

PHYS 2350 Energy Sources: Physical Aspects Cr.Hrs. 3 (Formerly 016.235) A detailed investigation of the physical aspects of energy production and utilization. Critical comparison of the various energy sources including solar, nuclear, fossil, and wind will be emphasized. The physics of energy collection, production, storage, and distribution will be discussed in the context of thermodynamics, radiation, solid state and nuclear physics. Prerequisite: a grade of "C" or better in one of PHYS 1070, PHYS 1071 (016.107), PHYS 1030, or PHYS 1031 (016.103); or consent of department.

PHYS 2380 Quantum Physics 1 Cr.Hrs. 3
(Formerly 016.238) The first in a sequence of three courses on Quantum Physics. This course introduces the basic principles of quantum theory including cavity radiation and Planck's postulate, wave-particle duality, the Bohr model, and the Schrodinger theory of quantum mechanics. Special emphasis is placed on the derivation of the time independent Schrodinger equation and its solutions in one dimension. Not to be held with the former 016.250. Prerequisites: PHYS 1070 or PHYS 1071 (016.107) (C); and one of MATH 1690 (136.169) (C), MATH 1700, MATH 1701 (136.170) (C),

MATH 1710 (136.171) (C), or the former 136.173 (C).
PHYS 2390 Theoretical Physics 1 Cr.Hrs. 3
This course provides an introduction to the mathematics required for both the Honours and Major programs in Physics and Astronomy. Topics include series expansions, partial derivatives, vector calculus and integral theorems. Not to be held with the former 016.237. Prerequisites: PHYS 1070, PHYS 1071 (016.107) (C); and a grade of "C" or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173.

PHYS 2490 Theoretical Physics 2 Cr.Hrs. 3
This course provides a continuation of the introduction to the mathematics required for both the Honours and Major programs in Physics and Astronomy. Topics include Fourier series, differential equations, special functions, boundary value problems and transform methods. Not to be held with the former 016.237. Prerequisite: PHYS 2390.

PHYS 2600 Electromagnetic Field Theory Cr.Hrs. 3 (Formerly 016.260) Electric field, electric potential, Gauss' law, capacitors, dielectric materials, magnetic fields, Ampere's law, magnetic induction, magnetic materials, displacement current, integral form of Maxwell's equations. Not to be held with PHYS 2200 or PHYS 2201 (016.220). Prerequisites: a "C" or better in one of PHYS 1070, PHYS 1071 (016.107), the former 016.106, or the former 016.120; and a "C" or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171) or the former 136.173.

PHYS 2610 Circuit Theory and Introductory
Electronics Cr.Hrs. 3
(Lab Required) (Formerly 016.261) Ohm's law, Kirchhoff's laws, DC circuit analysis, equivalent circuits, AC circuit analysis, complex impedance, RLC circuits, magnetic coupling, transformers, diodes and diode circuits. Not to be held with PHYS 2200 or PHYS 2201 (016.220). Prerequisite: PHYS 2600 (016.260) (C).

PHYS 2650 Classical Mechanics 1 Cr.Hrs. 3
(Formerly 016.265) The first in a sequence of three courses on intermediate to advanced level mechanics. Topics include dynamics of a particle, conservation theorems, rotation, rolling motion, oscillations, gravitation and central force motion, and associated mathematical methods. Prerequisite: one of PHYS 1070, PHYS 1071 (016.107), or the former 016.106 (C). Prerequisite or concurrent requirements: PHYS 2490.

PHYS 2700 Concepts of Physical Science to 1900 Cr. Hrs. 3 (Formerly 016.270) The evolution of scientific thought is traced through three major historical periods, namely the early Greeks, the scientific revolution of the 16th and 17th centuries and the modern period up to 1900. The course is designed to present the key ideas of scientific inquiry into the nature of heat, light, matter and celestial mechanics within their historical context. Not to be held with the former 016.131. This course is not to be held for credit in a Major or Honours program in Physics and Astronomy.

PHYS 2710 Concepts of Physical Science from 1900 Cr.Hrs. 3
(Formerly 016.271) This course deals with the concepts of modern physics which arose near the turn of the twentieth century and revolutionized our view of the physical world.

University of Manitoba

Einstein's Theory of Relativity, the Bohr-Rutherford atom and wave-particle duality are discussed. The impact of these ideas on modern society is explored. N.B. This course should be preceded by PHYS 2700 ( 016.270 ) or the former 016.131. Not to be held with the former 016.132. This course is not to be held for credit in a Major or Honours program in Physics and Astronomy.

### 4.11.3 Physics and Astronomy -3000 Level PHYS 3180 Stars Cr.Hrs. 3

(Formerly 016.318) This course is an application of physics to the structure of stars, their formation and evolution; theoretical models and observations; comparisons of main sequence stars like our Sun, binary star systems, post-main sequence evolution, and the final stages of stellar evolution such as the formation of white dwarfs, neutron stars and black holes. Prerequisite: PHYS 1070 or PHYS 1071 (016.107) (C).

PHYS 3220 Medical Physics and Physiological
Measurement Cr.Hrs. 3
(Formerly 016.322) This course will introduce the core subject areas of Medical Physics, in particular the physics of physiology and of radiology. The mechanics of body systems and the theory, medical applications and safety issues relating to the production, use, detection and measurements of electromagnetic radiation (both ionizing and non-ionizing) will be included. It will also cover Medical imaging (Ultrasound, CT and MRI) and will provide the student with an understanding of the physics underlying neurological, audiological, respiratory and vascular function and measurements. Prerequisite: one of PHYS 2600 (016.260) (C) or PHYS 2210 (or the former PHYS 2200 or 016.220 )(C), or PHYS 2152, or consent of the department.

PHYS 3360 Intermediate Modern Physics Cr.Hrs. 6 (Formerly 016.336) Introduction to wave mechanics and its applications in atomic, molecular, and solid state physics. A survey of nuclear and particle physics phenomena. An introduction to astrophysics. Prerequisite: PHYS 2250 or PHYS 2251 (016.225) (C).

PHYS 3380 Quantum Physics 2 Cr.Hrs. 3
(Formerly 016.338) This course is the sequel to PHYS 2380 (016.238). It focuses on solutions of the three-dimensional Schrodinger equation with special emphasis on one-electron atoms, multi-electron atoms, and single molecules. Not to be held with PHYS 4640 ( 016.464 ), PHYS 4650 ( 016.465 ), the former 016.358, or the former 016.370. Prerequisite: PHYS 2380 ( 016.238 ), or the former 016.250 (C).

PHYS 3430 Honours Physics Laboratory Cr.Hrs. 6 (Lab Required) (Formerly 016.343) Six hours per week. Prerequisites: PHYS 2260 or PHYS 2261 ( 016.226 ) (C); and one of PHYS 2610 ( 016.261 ) or the former 016.269 (C); or consent of department.

PHYS 3570 Physics of Materials 1 Cr. Hrs. 3 (Formerly 016.357) Introduction to the physics of materials. Solids within the elastic limit: stress and strain tensors, elastic constants. Liquids: continuity equation, Bernoulli, Euler and Navier-Stokes equations. Recommended prerequisite or concurrent requirement: PHYS 3680 .

PHYS 3630 Electro - and Magnetostatic Theory Cr.Hrs. 3 Material covered will include electrostatics (i.e. Gauss' Law, Laplace and Poisson equations) and magnetostatics (Lorentz force, Maxwell equations) as well as the properties of electrostatic fields in matter and magnetism in materials. Not to be held with the former 016.369. Prerequisites: PHYS 2600 (016.260) (C); and PHYS 2490 or the former 016.237(C); or consent of department.

PHYS 3640 Electro - and Magnetodynamics and Special Relativity Cr.Hrs. 3
Topics covered will include time dependent Maxwell's equations, Ohm's and Faraday's Law, electromagnetic waves, potential and fields, radiation, and special relativity including the Lorentz transformations. Not to be held with the former 016.369. Prerequisite: PHYS 3630 (C).

PHYS 3650 Classical Mechanics 2 Cr.Hrs. 3
(Formerly 016.365) The second in a sequence of three courses on intermediate to advanced level mechanics. Topics include dynamics of a system of particles, noninertial reference frames, dynamics of rigid bodies, calculus of variations, Lagrangian and Hamiltonian dynamics. Not to be held with the former 016.233. Prerequisite: PHYS 2650 (016.265) (C).

PHYS 3660 Classical Mechanics 3 Cr. Hrs. 3
(Formerly 016.366) The third in a sequence of three courses on intermediate to advanced level mechanics. Topics include nonlinear oscillations and chaos, coupled oscillations, the wave equation in continuous media, special relativity. Not to be held with the former 016.356. Prerequisite: PHYS 3650 (016.365) (C).

PHYS 3670 Classical Thermodynamics Cr.Hrs. 3
An introduction to the laws of classical equilibrium thermodynamics and their applications. Not to be held with the former 016.341. Prerequisite: PHYS 2490 or the former 016.237(C).

PHYS 3680 Statistical Mechanics Cr.Hrs. 3
An introduction to the principles of classical and quantum statistical mechanics and their applications. Not to be held with the former 016.341. Prerequisites: PHYS 2380 (016.238) (C) and PHYS 3670 (C).

PHYS 3800 Topics in Astronomy Cr.Hrs. 6
(Lab Required) (Formerly 016.380) An assignment and conference course to be taken only through consultation with the head of the department. The topics will vary depending upon student needs and interests, and will include specialized topics not available in regular course offerings.

### 4.11.3 Physics and Astronomy -4000 Level

 PHYS 4230 The Phenomenology of Galaxies Cr.Hrs. 3 (Formerly 016.423) This course describes the phenomenology of galaxies as determined by recent observational data. Topics include the characteristics and distribution of stars; radiation from the interstellar medium (hydrogen, molecular gas and dust); the kinematics of the stellar and gaseous components of the Milky Way; the formation and evolution of galaxies and clusters of galaxies. Prerequisite: PHYS 3180 (016.318) (C).PHYS 4240 Astronomy Project Cr.Hrs. 6 (Formerly 016.424) A research oriented course involving processing, analysis, and interpretations of astrophysical data. Available topics include neutron stars, supernova remnants, astrophysical jet sources, the interstellar medium, and galactic structure. Prerequisites: PHYS 2070 (016.207) (C) and PHYS 3180 (016.318) (C). Prerequisite or concurrent requirement PHYS 4230.

PHYS 4250 Computational Physics Cr.Hrs. 3
(Formerly 016.425) Application of numerical methods and programming skills to model a variety of physics problems on a computer. Topics include differential equations, boundary value and eigenvalue problems, special functions, and Monte Carlo methods, with examples from classical, quantum, and statistical mechanics. Prerequisites: PHYS 2490 or the former 016.237 (C); or consent of department.

PHYS 4300 Topics in Physics Cr.Hrs. 3
(Formerly 016.430) Topics will vary depending upon student needs and interests, and will include specialized topics not available in regular course offerings. Prerequisite: a "C" or better in one of PHYS 3380 (016.338), the former 016.370, or the former 016.358; or consent of department.

PHYS 4360 Medical Radiation Physics Cr.Hrs. 3
The relevant physics of the production and interaction of radiation beams used in both diagnostic and therapeutic medicine will be covered. Such beams included X- and grays, particle beams, visible and I.R. radiation, microwaves, and ultrasound. Prerequisite: PHYS 4560 (016.456) or consent of instructor.

PHYS 4390 Quantum Physics 3 Cr.Hrs. 3
Sequel to PHYS 3380 (016.338). Hilbert space formalism, symmetry and conservation laws, angular momentum, stationary state perturbation theory, variational methods. Not to be held with the former 016.438. Prerequisites: PHYS 2490 or the former 016.237 (C); and PHYS 3380 (016.338) (C).

PHYS 4400 Medical Imaging Cr.Hrs. 3
Fundamental principles of image formation, analysis of the characteristics of medical images, parametric description of image quality; application to transmission radiography. Prerequisite: Consent of instructor.

PHYS 4510 Introduction to Nuclear Physics Cr.Hrs. 3 (Formerly 016.451) Nuclear properties, the nuclear two-body problem; the deuteron and nucleon-nucleon scattering, nuclear models, nuclear disintegration; alpha-decay, gamma transitions, and beta-decay nuclear reactions; elementary particles. Prerequisite: a "C" or better in one of PHYS 3380 (016.338), the former 016.370, or the former 016.358.

PHYS 4520 Introduction to Solid State Physics Cr.Hrs. 3 (Formerly 016.452) An introduction to the following topics as they relate to the properties of solids: crystal structure and lattice energy; lattice vibrations and specific heat; freeelectron theory and band theory-metals, semiconductors and insulators; vacancies, diffusion, dislocations, and simple alloys. Prerequisite: a "C" or better in one of PHYS 3380 (016.338), the former 016.370, or the former 016.358.

PHYS 4560 Applied Nuclear Science Cr.Hrs. 3
(Formerly 016.456) Review of nuclear physics, radioactive decay, nuclear reactions, interaction of radiation with matter,
stopping powers, radiation dosimetry, radiation hazards; applications of nuclear science in medicine, nuclear reactors, chain reaction, moderators, neutron transport theory, nuclear fusion. Prerequisite: PHYS 4510 (016.451) (C).

PHYS 4590 Advanced Optics Cr.Hrs. 3
Light as a classical electromagnetic wave, optical fields in media, interference by wavefront and amplitude splitting, diffraction, diffraction theory of image formation, spatial filtering and image processing, coherence theory. Not to be held with the former 016.458. Prerequisites: PHYS 2260
(016.226) (C); and PHYS 3640 or the former 016.369 (C).

PHYS 4600 Lasers and Applications Cr.Hrs. 3
Light and atoms: semi-classical theory, principles of laser operation and properties of laser light, polarization optics, Gaussian beam optics, laser spectroscopy. Not to be held with the former 016.458. Prerequisites: PHYS 2260 (016.226) and PHYS 3380 (016.338) (C).

PHYS 4620 Advanced Classical Mechanics Cr.Hrs. 3 (Formerly 016.462 ) Canonical invariants and Lagrange and Poisson brackets. Hamilton-Jacobi theory, action-angle variables, normal modes of vibration. Prerequisite: PHYS 3660 (016.366) or the former 016.356 (C).

PHYS 4630 Physics of Materials 2 Cr.Hrs. 3 (Formerly 016.463) Physics of materials beyond the elastic limit, emphasizing atomistic features. Structural aspects, crystal defects, plastic deformation, radiation damage, diffusion and dislocations. Prerequisite: PHYS 3570 (016.357) (C).

PHYS 4672 Physics Laboratory A Cr.Hrs. 3
(Lab Required) For students in term 1 of their final year in Honours. Experiments are available in nuclear physics, solid state physics, and optics. All are open ended, permitting the student to pursue the investigation of a phenomenon as far as desired. First part of a two course series. Not to be held with the former PHYS 4670, 016.444 or PHYS 4570 (016.457). Prerequisites: PHYS 3430 (016.343) (C) or consent of department.

PHYS 4674 Physics Laboratory B Cr.Hrs. 3 (Lab Required) For students in term 2 of their final year in Honours. Experiments are available in nuclear physics, solid state physics, and optics. All are open ended, permitting the student to pursue the investigation of a phenomenon as far as desired. Second part of a two course series. Not to be held with the former PHYS 4670, 016.444 or PHYS 4570 (016.457). Prerequisites: PHYS 3430 (016.343) (C); and one of PHYS 4672 (C) or PHYS 4676 (C).

PHYS 4676 Honours Thesis - Proposal and Preparation Cr.Hrs. 3
For students in term 1 of their final year in Honours. The student will prepare a proposal for the undergraduate thesis and demonstrate the feasibility of the project under the supervision of a faculty member. The results of the study will be presented (in written and oral form) to an examining committee during the term. Both experimental and theoretical topics are acceptable. A grade of C (based on the presentations) is required to proceed to the next course which forms the final stage of the honours thesis. Not to be held with the former PHYS 4670, the former 016.444, the former PHYS 4570 (016.457), or PHYS 4672. Prerequisites:

PHYS 3430 ( 016.343 ) (C) and consent of department.
PHYS 4678 Honours Thesis - Dissertation Cr.Hrs. 3 For students in term 2 of their final year in Honours. The student will complete the work needed and produce an undergraduate thesis under the supervision of a faculty member. The grade will be based on the examining

### 4.12 Psychology Program

Head: Todd Mondor
Campus Address/General Office: P404 Duff Roblin Bldg.
Telephone: 2044749338
Email Address: psychugadvisor@umanitoba.ca
psychughead@umanitoba.ca
Website: http://www.umanitoba.ca/psychology/

Psychology is the scientific study of behaviour and mental processes, including the biological bases of behaviour and cognitive processes, and behavioural and cognitive neuroscience. The Honours and Major programs combine courses in Psychology with related courses in Science. Courses from the Faculty of Arts are included in this program. The Faculty of Science offers programs leading to a B.Sc. (Honours) degree in Psychology and a B.Sc. (Major) degree in Psychology.

## Honours

To enter the Honours program, students must have obtained a grade of " $\mathrm{B}+$ " or better in PSYC 1200 (or in both PSYC 1211 and PSYC 1221) and a grade of " $B$ " in six credit hours in courses offered by the Faculty of Science. In addition, students must have obtained a Grade Point Average of 3.25 or better on their first 24-30 credit hours and have no failed courses. Introductory courses in Biology, Chemistry, Computer Science, Mathematics, Statistics or Biological Sciences are highly recommended.

To continue in the Honours program, a student must register in a minimum of 9 credit hours in each Fall and Winter Term and must meet all of the continuation criteria of the Faculty of Science. In addition, students must maintain a minimum Degree Grade Point Average of 3.25 based on all courses in the program. Students who do not meet the minimum continuation requirement will be required to withdraw from the Honours program.

The department must approve a student's Honours program for each session. All revisions to the program must also have
committee's evaluation of a progress report (presented midterm) and an evaluation of the thesis manuscript and oral presentation at the end of term. Both experimental and theoretical topics are acceptable. Not to be held with the former PHYS 4670 ( 016.444 ), PHYS 4570 ( 016.457 ), PHYS 4672, or PHYS 4674.
prior approval from the Associate Head (Undergraduate) or the Undergraduate Advisor.

To graduate, a student must obtain 120 credit hours of courses with grades of " $C$ " or better in each course and with a minimum grade point average of 3.25 on the 120 credit hours that contribute to the degree. In addition, students must complete the program of study in the chart below.

## Four Year Major

To enter the Major program, students must normally have obtained a grade of C+ or better in PSYC 1200 (or in both PSYC 1211 and PSYC 1221) and in six credit hours in courses offered by the Faculty of Science and meet the Faculty of Science requirements for entry to the Major program. Introductory courses in Biological Sciences, Chemistry, Computer Science, Mathematics, or Statistics are highly recommended.

To continue in the Major program, a student must meet all of the continuation criteria of the Faculty of Science. This includes maintaining a minimum GPA of 2.00 at each point of assessment, and no more than 18 credit hours of failing grades after entry to the program. Students who do not meet the minimum continuation requirement will be required to withdraw from the Major program. The department must approve a student's Major program for each session. All program revisions must also have prior approval.

To graduate with the degree of Bachelor of Science (Major), a student must complete 120 credit hours of courses with passing grades ( $D$ or better) in each course, with a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree. In addition, the student must complete the program of study as listed in the program chart below.

NOTE: Psychology cannot be used to fulfill either the introductory or advanced level Science requirements in the 3 -year B.Sc. General Degree.

| Category E: Biological Psychology Courses | PSYC 2360, PSYC 3350, PSYC 3430 |  |  |

All Psychology courses are available to Science students. For a complete course listing, see the Faculty of Arts section.

Psychology courses taught at the université de Saint-Boniface can be used to satisfy degree requirements

### 4.13 Department of Statistics

Head: Xikui Wang
Campus Address/General Office: 338 Machray Hall
Telephone: 2044748172
Email Address: Stats Dept@umanitoba.ca
Website: umanitoba.ca/statistics/

### 4.13.1 Program Information

Statistics is a discipline grounded in mathematics that has practical applications in many other areas. Statistics is an analytical discipline that helps other disciplines carry out research projects and studies that involve measurement, comparison, and interpretation. Statistics is a useful ancillary subject to other sciences, the social sciences, and many of the professional programs. The department offers joint programs with Mathematics, Economics and Actuarial Mathematics.

## Honours Requirements

Students will normally take STAT 2000 and STAT 2400 in Year 2 and enter Honours in Year 3.

To enter the Honours program in Statistics, a student must have completed at least 24 credit hours with a minimum GPA of 3.00, and also obtained a minimum grade of " $B$ " in STAT 2400. STAT 1000, MATH 1300, MATH 1500, and MATH 1700 are all requirements of the Statistics Honours degree program and students are strongly encouraged to take these courses in Year 1.

To continue in the Statistics Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a min-imum GPA of 3.00 and minimum grade of "C" in each course that con-tributes to the 120 credit hours of the degree.

## Statistics Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Statistics program may enter the Cooperative Option in April of their second year in Honours Statistics. This program provides students with a minimym of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program (see above), as indicated in the chart. Students are required to complete the first and second year requirements of the program; and STAT 3470 and STAT 3480 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Option in Section 3.6.

To continue in the Honours Cooperative program a student must maintain a minimym GPA of 3.00 , successfully complete each work term and complete a minimum of 9 credit hours during each academic term. Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Honours program (see above).

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

## Four Year Major Requirements

Students will normally take STAT 2000 and STAT 2400 in Year 2 and enter the four year Major in Year 3.

To enter the Major Degree program in Statistics, a student must have completed at least 24 credit hours with a minimum GPA of 2.00 , and also obtained a minimum grade of "C+" in STAT 2400. STAT 1000, MATH 1300, MATH 1500 , and MATH 1700 are all requirements of the Statistics Honours degree program and students are strongly encouraged to take these courses in Year 1.

To continue in the four year Major program a student must maintain a minimum GPA of 2.00 .

To graduate from the four year Major program a student must obtain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree and also a minimum grade of " $C$ " in each of the Major Program Specific courses (see below).

## Statistics Four Year Major Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Major program in Statistics may enter the Cooperative Option in April of their second year in Statistics. This program provides students with a minimym of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Major
program. Students are required to complete the first and second year requirements of the program; and STAT 3470 and STAT 3480 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Major) Cooperative Option in Section 3.4.

To continue in the four year Major program a student must maintain a minimum GPA of 2.00 . Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Major program (see above).

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

## Major Program Specific courses

All courses specified in the program charts below (excluding the required optional courses and electives).

The department must approve a student's four year Major program each session. Students must obtain departmental approval for any and all revisions to their programs.

In order to improve their academic backgrounds as well as job opportunities, students should carefully elect the optional courses in this program. They should particularly consider the following sequence of courses in Economics and Computer Science.

Economics: ECON 1010, ECON 1020, ECON 2450, ECON 2460, ECON 2470, ECON 2480, ECON 3170, ECON 3180, ECON 3730, ECON 4120, ECON 4130.

Computer Science (Software and Artificial Intelligence): COMP 1260, COMP 1270, COMP 1010, COMP 1020, COMP 2080, COMP 2130, COMP 2140, COMP 3380, COMP 3440, COMP 4200, COMP 4380.

Computer Science (Numerical Analysis and Graphics): COMP 1260, COMP 1270, COMP 1010, COMP 1020, COMP 2080, COMP 2130, COMP 2140, COMP 2190, COMP 3140 or COMP 3490.

## Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000 , or 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Statistics, students must take a minimum of 18 credit hours of 2000, 3000 and (or) 4000 level Statistics courses.

4.13.2 Statistics

FOUR YEAR MAJOR ${ }^{5}$ (Including Co-operative Option) 120 CREDIT HOURS (comprising courses listed in chart below, and electives)

NOTES:
1 MATH 1310 may be taken in place of MATH 1300; MATH 1510, or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700. MATH 1690 may be taken in place of both MATH 1700 and 1500. MATH 2750 may be taken in place of MATH 2720 and 2730.
2 Of the electives chosen as part of the Honours Degree, 18 credit hours are to be selected from one department which represents a field of application such as: Actuarial Mathematics, Biological Sciences, Microbiology, Economics, Psychology or Sociology.
(Mathematics and Computer Science are excluded from this list.) In consultation with the department, combinations of courses from a coherent area of studies may be selected.
3 Of the electives chosen as part of the Major Degree, 15 credit hours must be selected from either, Computer Science and Mathematics, or from one of the following departments: Actuarial Mathematics, Biological Sciences, Microbiology, Economics, Psychology, or Sociology.
4 STAT 3400 and STAT 3800 have corequisites of MATH 2720 and MATH 2730. Therefore students who wish to take STAT 3400 and STAT 3800 should consider taking MATH 1300, MATH 1500 and MATH 1700 in University 1 or Year 2, as they are prerequisite to MATH 2720 and MATH 2730.
5 IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.
(The number 6 in brackets indicates a six credit hour course)

| STAT 1000 and STAT 2000 | A minimum of 18 credit hours of 2000, 3000, and (or) 4000 level Statistics courses (in addition to <br> STAT 2000) |
| MINOR |  |

## NOTES:

1 MATH 1310 may be taken in place of MATH 1300; MATH 1510, or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700. MATH 1690 may be taken in place of both MATH 1700 and 1500. MATH 2750 may be taken in place of MATH 2720 and 2730.
2 Of the electives chosen as part of the Honours Degree, 18 credit hours are to be selected from one department which represents
a field of application such as: Actuarial Mathematics, Biological Sciences, Microbiology, Economics, Psychology or Sociology.
(Mathematics and Computer Science are excluded from this list.) In consultation with the department, combinations of courses from a coherent area of studies may be selected.
3 Of the electives chosen as part of the Major Degree, 15 credit hours must be selected from either, Computer Science and
Mathematics, or from one of the following departments: Actuarial Mathematics, Biological Sciences, Microbiology, Economics, Psychology, or Sociology.
4 STAT 3400 and STAT 3800 have corequisites of MATH 2720 and MATH 2730. Therefore students who wish to take STAT 3400 and STAT 3800 should consider taking MATH 1300, MATH 1500 and MATH 1700 in University 1 or Year 2, as they are prerequisite to MATH 2720 and MATH 2730.
5 IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.
(The number 6 in brackets indicates a six credit hour course)

### 4.13.3 Statistics - Actuarial Mathematics Joint Honours Program

The Department of Statistics and the Warren Centre for Actuarial Studies and Research offer a joint Honours program for students wishing in depth study in Statistics and Actuarial Mathematics.

## Entry Requirements:

To enter the Joint Honours program, students must have completed 24 credit hours with a minimum DGPA of 3.00. Students must also obtain a minimum grade of " B " in one of the following courses: an approved Written English course, (both of) ECON 1010 and ECON 1020, MATH 1300, MATH 1500, MATH 1700 or STAT 1000; and must also obtain a minimum grade of "B" in STAT 2000.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of "C+" on all required Actuarial Mathematics (ACT) courses and a grade of "C" on all remaining courses that contribute to the 120 credit hours of the degree.

NOTE: In order to receive course credit for, and examination exemptions from, future Society of Actuaries (SoA) and VEE courses, students must obtain a minimum grade of "B" in the following courses: ECON 1010, ECON 1020, ACC 1100, FIN 2200, STAT 3470, and STAT 3490. Contact the Warren Centre for Actuarial Studies and Research for further information.

Recommended Electives:

| YEAR 1 | YEAR 2 | TYEAR 3 | YEAR 4 |
| :---: | :---: | :---: | :---: |
| JOINT HONOURS 120 CREDIT HOURS |  |  |  |
| STAT 1000, STAT 2000 (B) | STAT 2400, STAT 3400 | $\begin{aligned} & \text { STAT 3050, STAT 3480, STAT } \\ & 3800 \end{aligned}$ | STAT $3470^{3}$, STAT $3490^{3}$, STAT 4100, STAT 4200, STAT 4520, STAT 4530 |
| ECON $1010^{3}$, ECON $1020^{3}$ | ACT 2020, ACT 2120 | $\begin{aligned} & \text { ACT 2210, ACT 3130, ACT } \\ & 3230, \text { ACT 3340, } \end{aligned}$ | ACT 4060, ACT 4140, ACT |

## NOTES:

' MATH 1310 may be taken in place of MATH 1300; MATH 1510, or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of both of MATH 1500 and MATH 1700; MATH 2750 may be taken in place of both of MATH 2720 and MATH 2730; MATH 2352 (6) may be taken in place of MATH 2300.
2'Students are strongly urged to complete ACC 1100 in Year 1 when possible FIN 2200 may be taken in Year 2, 3 or 4; however, it is strongly recommended that it be completed in Year 2. Note that ACC 1100 is a prerequisite for FIN 2200.
${ }^{3}$ In order to receive course credit for, and examination exemptions from, future Society of Actuaries (SoA) and VEE courses,
students must obtain a minimum grade of " $B$ " in these courses.
(Letters in brackets indicate minimum prerequisite standing for further study.)

### 4.13.4 Statistics - Mathematics Joint Honours Program

The departments of Statistics and Mathematics offer a joint Honours program for students wishing in depth study in Statistics and Mathematics.
To enter the Honours program students must have satisfied the Faculty of Science requirements for entry to the program, and have completed STAT 1000, MATH 1300 and either MATH 1690, or MATH 1500 and MATH 1700 or any equivalent with a minimum grade of " $B$ " in each of STAT 1000 and MATH 1690 (or a " $B$ " average in MATH 1500 and MATH 1700).

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of " $\mathrm{C}_{+}$" in each of the Honours Program Specific courses, and a minimum grade of "C" on all remaining courses that contribute to the 120 credit hours of the degree. See the Calendar entry for each of the Department of Statistics and the Department of Mathematics for the Honours Program Specific courses.

### 4.13.5 Statistics - Economics Joint Honours Program

The Department of Statistics along with the Department of Economics (Faculty of Arts) offer a Joint Honours program for students wishing in depth study in Statistics and Economics. For Economics course listings, refer to the Faculty of Arts chapter in the Calendar.
Students will normally take STAT 2000 and STAT 2400 in second year and enter Honours in Year 3.
To enter the Joint Honours Statistics Economics program, the student must have a minimum grade of "B" in both of ECON 1010 and ECON 1020 (or ECON 1210 and ECON 1220) and STAT 2400; and an average grade of " B " or better with a minimum grade of "C+" in each of MATH 1500 and MATH 1700 or any equivalents and have satisfied the Faculty of Science requirements for entry to the honours program.

variables. This course is not available to any student who has previously obtained credit for STAT 3500. Prerequisites: STAT 1000 or STAT 1001 (005.100) (C); and one of MATH 1700, MATH 1701 (136.170), or MATH 1690 (136.169) (C).

### 4.13.6 Statistics -3000 Level

STAT 3000 Applied Linear Statistical Models Cr.Hrs. 3 Applied Linear regression and analysis of variance for designed experiments. This course is not for use in the Honours or Major degree programs in Statistics. Not to be held with STAT 3470 (005.347), STAT 3480 (005.348), the former STAT 3120 (005.312) or the former STAT 3130 (005.313). Prerequisite: STAT 2000 (005.200) or STAT 2001 (005.201) (C).

STAT 3050 Introduction to Probability Theory and Its Aplications Cr.Hrs. 3
(Formerly 005.305) Development of the basic concepts of probability theory and application in areas of biostatistics, actuarial science, reliability theory, queuing theory. Prerequisites: STAT 3400 or the former STAT 3500 (005.350) (C); and MATH 2720 or MATH 2721(136.272, 136.270) (C); and MATH 2730 or MATH 2731 (136.273, 136.271) (C).

STAT 3120 Topics in Regression Analysis Cr.Hrs. 3 (Formerly 005.305) Development of the basic concepts of probability theory and application in areas of biostatistics, actuarial science, reliability theory, queuing theory. Prerequisites: 005.350 (or the former 005.331 or 005.341 )
(C) and ((MATH 2720 or MATH 2721 or 136.272) and (MATH 2730 or MATH 2731 or 136.273)) (or the former 136.270 and 136.271) (C).

STAT 3170 Statistical Quality Control Cr.Hrs. 3 (Formerly 005.317) Techniques for quality improvement through the use of statistical process control. Topics will include acceptance sampling, Pareto diagrams, boxplots, normal probability plots, control charts (EWMA and CUSUM), measurements of process capability and process performance. Prerequisite: STAT 2000 or STAT 2001 (005.200) (C).

STAT 3380 An Introduction to Nonparametric Statistics Cr.Hrs. 3

STAT 2400 Introduction to Probability I Cr.Hrs. 3 (Lab Required) Basic probability, discrete distributions including binomal, hypergeometric, geometric and Poisson, joint distributions, continuous distributions, statistical inference and applications involving discrete random

University of Manitoba
(Formerly 005.338) Parametric versus nonparametric inference; inference using ranks and order statistics; tolerance intervals; contingency tables; goodness-of-fit tests; examples from the social and physical sciences. Prerequisite: STAT 2000 or STAT 2001 (005.200) (C).

STAT 3400 Introduction to Probability II Cr.Hrs. 3 (Lab Required) Continuation of STAT 2400. Continuous distributions, properties of common distributions, distributions of functions of random variables. Not to be held with the former STAT 3500 ( 005.350 ). Prerequisite: STAT 2400(C). Prerequisite or Concurrent requirement: one of MATH 2720, MATH 2721, MATH 2730, or MATH 2731.

## STAT 3470 Statistical Methods for Research Workers

 1 Cr.Hrs. 3(Formerly 005.347) Linear regression, multiple regression, correlation analysis, introduction to one way analysis of variance, some related topics. Not to be held with STAT 3000 or the former STAT 3120 (005.312). Prerequisite: STAT 2000, STAT 2001 (005.200) (C). Prerequisite or Concurrent Requirement: STAT 3400 or the former STAT 3500 (005.350).

STAT 3480 Statistical Methods for Research Workers 2 Cr.Hrs. 3
(Formerly 005.348) Analysis of variance, randomized block design, nested and Latin square experiments, analysis of covariance. Not to be held with STAT 3000 or the former STAT 3130 (005.313). Prerequisite: STAT 3470 (005.347) (C).

STAT 3490 Time Series Analysis Cr.Hrs. 3 (Formerly 005.349) Trend and seasonal components, exponential smoothing by the multiple regression method, the Box-Jenkins Methodology, analysis of seasonal data. Prerequisite: a grade of " C " or better in one of: STAT 3470 (005.347), STAT 3000 or the former STAT 3120 (005.312).

STAT 3600 Intermediate Statistical Theory 2 Cr.Hrs. 3 (Formerly 005.360) Transformations, sampling distributions, convergence and introduction to estimation and hypothesis testing. Not to be held with the former 005.331 or STAT 3410 (or 005.341). Prerequisite: STAT 3500 (or 005.350) (C). Prerequisite or concurrent requirement : Whichever of MATH 2720 (or MATH 2721) or MATH 2730 (or MATH 2731) or the former 136.270 and 136.271 not yet taken.

STAT 3800 Mathematical Statistics Cr.Hrs. 3 (Lab Required) Multivariate distributions and transformations, order statistics, sampling distributions, convergence, introduction to statistical inference. Not to be held with the former STAT 3600 ( 005.360 ). Prerequisite: STAT 3400 or the former STAT 3500 (005.350) (C). Prerequisite or Concurrent requirement: Whichever of MATH 2720 (MATH 2721) or MATH 2730 (MATH 2731) not yet taken.

## STAT 3980 Work Term 1 Cr. Hrs. 0

Work assignment in business, industry, or government for students registered in the Statistics Honours or Major Cooperative Option. Requires submission of a written report covering the work completed during the fourmonth professional assignment. (Pass/Fail grade only). Prerequisites: STAT 3470 (C) and STAT 3480 (C).

STAT 3990 Work Term II Cr.Hrs. 0
Work assignments in business, industry or government for students registered in the Statistics Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail). Prerequisite: STAT 3980 (Pass).

### 4.13.6 Statistics -4000 Level

STAT 4100 Statistical Inference 1 Cr.Hrs. 3
Introduction to methods of estimation, including asymptotic and Bayesian methods. Not to be held with the former STAT 4140 (005.414). Prerequisite: STAT 3800 or the former STAT 3600 (005.360).

STAT 4170 Lifetime Data Analysis Cr.Hrs. 3
(Formerly 005.417) An introduction to basic principles and techniques for lifetime data analysis in biostatistics and reliability, with emphasis on theory and applications. Topics to be covered include: censoring, truncation, survival and hazard functions, parametric and nonparametric methods, proportional hazards regression. Prerequisites: STAT 3480 (005.348) (C); and either STAT 3800 or the former STAT 3600 (005.360) (C); or consent of department.

STAT 4200 Statistical Inference 2 Cr.Hrs. 3
Introduction to methods of hypothesis testing, including asymptotic and Bayesian methods. Not to be held with the former STAT 4140 (005.414). Prerequisite: STAT 4100.

STAT 4520 Sampling Techniques 1 Cr.Hrs. 3 (Formerly 005.452) A development of sampling theory for use in sample survey problems, in regression estimates, in systematic sampling, sources of errors in surveys. Prerequisites: STAT 3800 or the former STAT 3600 (005.360) (C); and STAT 3480 (005.348); or consent of department.

STAT 4530 Design of Experiments 1 Cr.Hrs. 3 (Formerly 005.453) Objectives in designing experiments; designs commonly used in research including analysis and an introduction to the construction of designs. Prerequisites: STAT 3800 or the former STAT 3600 (005.360) (C); and STAT 3480 (005.348) (C); or consent of department.

STAT 4580 Sampling Techniques 2 Cr.Hrs. 3
(Formerly 005.458) A mathematical treatment of some advanced topics in sampling theory. Multistage sampling plans and other selected topics. Prerequisite: STAT 4520 (005.452) (C) or consent of department.

STAT 4590 Design of Experiments 2 Cr.Hrs. 3 (Formerly 005.459) The theory and analysis of experimental designs treated in STAT 4530 (005.453) and more advanced designs; construction of designs. Prerequisite: STAT 4530 (005.453) (C) or consent of department.

STAT 4600 Statistics Topics 1 Cr.Hrs. 3
(Formerly 005.460) Topics of current interest in Statistics that will vary with the needs and interests of students and Faculty. Prerequisite: STAT 3800 or the former STAT 3600 (005.360) (C); or consent of department.

STAT 4630 Stochastic Processes Cr.Hrs. 3
(Formerly 005.463) An introduction to stochastic processes.

## 

## ACADEMIC CALENDAR 2012-2013 •

University of Manitoba

Prerequisite: STAT 3050 (005.305) (C); and STAT 3800 or the former STAT 3600 (005.360) (C); or consent of department.

STAT 4690 Applied Multivariate Analysis Cr.Hrs. 3 (Formerly 005.469) The course will emphasize applications of various techniques in multivariate analysis and gaining familiarity with the relevant programs in statistical packages, i.e., SAS, BMDP. Prerequisites: STAT 3480 (005.348) (C); and a "C" or better in one of MATH 2300 (136.230), MATH 2301, MATH 2352, or the former MATH 2350 (136.235); or consent of instructor.

STAT 4700 Statistical Consulting Cr.Hrs. 3
(Formerly 005.470) The role of a Statistics Consultant.
Practical consulting experience. This course is normally open to fourth year and graduate students in Statistics. Prerequisites: STAT 3800 or the former STAT 3600 (005.360) (C); and STAT 3480 (005.348); or consent of department. Prerequisites or concurrent requirements: STAT 4520 and STAT 4530.

## STAT 4980 Work Term III Cr.Hrs. 0

Work assignments in business, industry or government for students registered in the Statistics Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month
professional assignment. (Pass/Fail). Prerequisite: STAT 3990 (Pass).

STAT 4990 Work Term IV Cr.Hrs. 0
Work assignments in business, industry or government for students registered in the Statistics Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail). Prerequisite: STAT 4980 (Pass).

### 4.14 Courses Offered in Other Faculties and Schools

## Acceptable

All courses acceptable for credit in any degree program at the University of Manitoba are acceptable for credit in Science (excluding Pass/Fail courses) subject to overall degree requirements. All courses will be included on admission to the Faculty and will be applied toward the elective requirement in all degree programs offered in Science. For, including any prerequisites and/or restrictions, see the chapter entitled in this Calendar.

Students are reminded that normally a maximum of 30 credit hours (General Degree) or 36 credit hours (Major Degree) from courses offered by Faculties or Schools other than the Faculty of Science can contribute to degree requirements.

## Chapter Contents

## SECTION 1: Degree Offered

1.1 Degree
1.2 Concentration in Child and Family Services
1.3 Interfaculty Option in Aging

SECTION 2: Admission Requirements
2.1 Admission to the Fort Garry Social Work Program
2.2 Admission to the Inner City Social Work Program
2.3 Admission to the Northern Social Work Program
2.4 Admission to the Distance Delivery Social Work Program
2.5 The Université de Saint-Boniface
2.6 Special Student Admission

SECTION 3: Faculty Academic Regulations
3.1 Prerequisite and Corequisite Policy
3.2 Residence Requirements for a Degree Program
3.3 Scholastic Progress
3.4 Professional Unsuitability Bylaw
3.5 Dean's Honour List
3.6 Appeal of Grades
3.7 Distance Courses Open to Fort Garry Campus and Inner City Social Work Students
3.8 Opting Into Field and Practices of the Two-Year Plan
3.9 Courses Open to Challenge for Credit
3.10 Credit for Social Work Courses Taken at Other Universities

SECTION 4: Program and Graduation Requirements

### 4.1 Curriculum Outline

4.2 Field Instruction
4.3 Requirements for Graduation

SECTION 5: Course Descriptions

## SECTION 1: Degree Offered

Historically, the social work profession has focused on the well-being of people as well as the social structures and conditions that prevent a just and equal society. The Bachelor of Social Work Program is a professional program that is designed to prepare generalists who are knowledgeable of social work theories, and who can demonstrate skills related to practice, research, and social policy analysis. Students and graduates undertake these activities in accordance with the Canadian Association of Social Workers' Code of Ethics. The program is accredited by the Canadian Association for Social Work Education.

Graduates have competence for entry level social work positions in a variety of different practice areas. The program is based on the principles of social justice, human rights, and anti-oppression, with an emphasis on critical thinking and understanding the structural roots of social problems. Foundation courses are grounded in critical theoretical frameworks including Indigenous worldviews, feminism, and anti-racism.

The program is offered at multiple geographic sites including the Fort Garry Campus, the William Norrie Centre (Innercity), the Université de Saint-Boniface, and Thompson, Manitoba as well as by Distance Delivery.

### 1.1 Program,

| Degree | *Years to <br> Complete | *Total Credit Hours |
| :--- | :---: | :---: |
| Bachelor of Social Work (Full-Time) | 4 | 123 |
| Bachelor of Social Work <br> (Concentrated)** | 2 | 123 |
| Bachelor of Social Work (Part-Time) | Up to 9 | 123 |

*This includes one year ( 30 credit hours) of prior university study.
**Please see 4.1 B

### 1.2 Concentration in Child and Family Services,

The Faculty offers the Concentration in Child and Family Services. Students are required to complete prescribed electives and core courses related to child and family services. For more information and a detailed list of concentration requirements please refer to the Faculty's website.
Upon the successful completion of these requirements, a notation will be added to the student's transcript.

### 1.3 Interfaculty Option in Aging,

The Interfaculty Option in Aging is offered by the following faculties: Arts, Human Ecology, Nursing, Kinesiology and Recreation Management, Clayton H. Riddell Faculty of Environment, Earth and Resources, and Social Work. To complete the option, students will complete each of the following requirements: a) 2610* Health and Physical Aspects of Aging; b) 2650* The Social Aspects of Aging; c) one field placement SWRK 3150 or SWRK 4120 in aging d) one Field Focus of Social Work Practice course (SWRK 4200 or SWRK 4300) in aging. Students are encouraged to take courses from the participating units other than Social Work.

NOTE: *These courses are offered on a rotational basis by participating units.

Upon the successful completion of these requirements, a notation will be added to the student's transcript. For further information on the Interfaculty Option in Aging, please refer to the Faculty's website umanitoba.ca/faculties/social_work

## SECTION 2: Admission Requirements

The following is a summary of the admission requirements to the Bachelor of Social Work. Equivalent academic courses completed at recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university's website.

### 2.1 Admission to the Fort Garry Social Work Program, Admission Requirements <br> Completion of 30 credit hours of university level courses

which are acceptable to the University of Manitoba.
The written English and mathematics requirements are recommended to be completed as part of University 1. If these requirements are not met in University 1 (i.e. the first 30 credit hours) they must be completed prior to graduation. Minimum GPA for consideration for all applicants (including Educational Equity applicants): 2.5
A Criminal Record Statement and a Child Abuse Registry
(CAR) check (for a record of those registered as an offender) must be completed following selection.
Selection criteria: Two applicant pools are created; $60 \%$ of all spaces are allocated to applicants with the highest grades, and $40 \%$ of all spaces are allocated to applicants based on the Education Equity initiative.

## Concentrated Program

All applicants wishing to complete the program in two years of full-time study must have completed a minimum of 51 credit hours of university study (which are acceptable to the University of Manitoba) prior to admission to the BSW program. Applicants wishing to complete the degree through the two year concentrated program must have an Adjusted Grade Point Average of 3.00 from all previous university study. In the event that three credit hours in each of written English and mathematics have not been completed as part of the 51 credit hours of previous university study, they must be completed within the first year of the two-year program. The deadline for submission of applications in March 1st (for September start date).

## The Selection Process

The selection process is designed to accomplish three objectives: to treat applicants fairly and equitably, to provide the diversity of practitioners required by the profession, and to provide for an efficient admissions process. The faculty selects applicants to the Fort Garry Campus B.S.W. program through two categories as described below.
Academic Achievement Category: 60\% of all available positions are awarded on the basis of highest Adjusted Grade Point Average.
Educational Equity Initiative: $40 \%$ of all available positions are allocated to those eligible for inclusion in one or more of the Educational Equity Priority Groups and awarded on the basis of highest Adjusted Grade Point Average.
The purpose of the Educational Equity initiative is to achieve equality in professional education so that no person shall be denied educational opportunities or benefits for reasons unrelated to ability. In the fulfillment of this goal, the aim is to correct the conditions of disadvantage in professional education experienced by Aboriginal peoples, persons with disabilities, gender and sexual minorities, immigrants and refugees to Canada, and persons who are, because of their
race or colour, a visible minority in Canada. Giving effect to the principle of educational equity means more than treating persons in the same way; it also requires special measures and the accommodation of difference. Details of the Educational Equity initiative are provided in the application information bulletin.
Students in the Fort Garry Social Work Program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work.

### 2.2 Admission to the Inner City Social Work Program,

 The Inner City Social Work (B.S.W.) ACCESS Program at the William Norrie Centre is an inner-city extension of the Faculty of Social Work. Students admitted to the centre are accepted directly into a four-year B.S.W. program, and do not require prior university study.The objective of this program is to enhance the accessibility of the B.S.W. program by preparing as social workers those mature students who have had inner-city or similar social service experience, but who lack the normal university entrance requirements. Special academic and social support is provided to students admitted to the program. Staff assists candidates in arranging funding resources.
All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.
Admission to the centre is limited. Applicants to the full-time program must be 21 years old, low income, and residents of Winnipeg at the time of application. The deadline date for submitting applications is early February.
A part-time B.S.W. Access program is offered to individuals who meet the above criteria, work for a Winnipeg or Aboriginal agency, and/or have two years employment in human service fields. Deadline for applications for part-time studies is mid January.
Students at the centre must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work. For further information, contact: Inner City Social Work Program, 485 Selkirk Avenue, Winnipeg, Manitoba, R2W 2M6; telephone: (204) 668-8160.

### 2.3 Admission to the Northern Social Work Program,

 The Northern Bachelor of Social Work (B.S.W.) program, based in Thompson Manitoba, is an extension of the Fort Garry Faculty of Social Work. Students are admitted directly into a four-year B.S.W. program and do not require prior university study.All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.
The objective of this program is to enhance the accessibility of the B.S.W. program by preparing as social workers mature students who, without the support of the program, would be unable to successfully complete a university degree due to lack of financial resources, lack of academic qualifications and remote location. Special academic and personal support is provided to students admitted to the program, as well as some assistance in arranging funding resources.
Students who have completed 30 credit hours of university level courses and have a minimum GPA of 2.5 may apply as External Students.
Admission to the Northern Social Work program is limited. Applicants must meet specified northern residency requirements. The deadline date for submitting applications is March 1 (classes begin in September).

Students in the Northern Social Work program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work. For further information, contact the Director, Faculty of Social Work at Thompson, 3 Station Road, Thompson, Manitoba, R8N 0N3; telephone: (204) 677-1450.

### 2.4 Admission to the Distance Delivery Social Work Program

The Faculty of Social Work is committed to the accessibility of social work education. The faculty has extended the concept of accessibility to include geographical accessibility through the delivery of the B.S.W. based on two approaches:
(1) to individuals by means of an online study program and
(2) to community-based groups using the cohort method.

The Distance Delivery B.S.W. program is intended to encourage individuals who are employed in the social services and living outside of Winnipeg, but who may not have had the opportunity to pursue professional social work education.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

Delivery methods for the online study component of the program include a combination of audioconference sessions and online study. Access to high speed internet is required.

All course examinations are scheduled and arranged by the university's Registrar's Office to take place in the student's community.

Delivery of the program to the community-based cohorts utilizes the face-to-face delivery with the option of a combination of face-to-face, audioconference and online study.

Applicants to the Distance Delivery B.S.W. program must meet all three of the following requirements to be admitted into the program:

- A minimum of two years of social service related work experience, with-in the last five years;
- Residency outside of Winnipeg;
- The university admission requirements for either a regular student or a mature student.

Complete and detailed admissions information is available on our web site at umanitoba.ca/faculties/social_work or by calling the Faculty of Social Work Distance Delivery BSW Student Advisor at (204) 474-6070.

The deadline for submission of applications in March $1^{\text {st }}$ (for September start date).

Students in the Distance Delivery B.S.W. program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work.

### 2.5 The Université de Saint-Boniface,

The Université de Saint-Boniface, in conjunction with the University of Manitoba, now offers a French language Bachelor of Social Work program. Please contact Program Coordinator at 237-1818 ext. 447 for more information.

Students are reminded they must submit an official transcript (one bearing the university seal) to the BSW Student Advisor along with the application form on their appointment day (University of Manitoba students need only provide a student history). An application fee applies. Once admitted as a Special Student, students will:

- Be limited to completion of nine credit hours of required social work courses plus SWRK 1310 and SWRK 2080.
- Be prohibited from adding courses in the Faculty of Social Work until Au-gust (refer to Aurora Student for specific dates).
- Have all courses classified as "SS," which means that grades for these courses may not generate a Grade Point Average.

## Students Enrolled in other Faculties/Schools

Students currently enrolled in other faculties or schools at the University of Manitoba may register for Social Work courses provided they have com-pleted a minimum of 30 credit hours of university study and achieved a minimum Cumulative Grade Point Average of 2.5. These students will also be limited to completion of SWRK 1310 and SWRK 2080 plus nine credit hours of required social work cours-es.

- Adjusted Grade Point Average of 2.5 (C+).

Courses available to Special Students and students enrolled in other faculties and schools at the University of Manitoba:
Required Social Work Courses:
SWRK 1310 Introduction to Social Welfare Policy Analysis
SWRK 2080 Interpersonal Communication Skills
SWRK 2090 Human Behaviour and Social Work Practice
SWRK 2110 Emergence of the Canadian Welfare State
SWRK 2130 Comparative Social Welfare Systems
SWRK 3130 Contemporary Canadian Social Welfare
SWRK 3100 Systematic Inquiry in Social Work
Elective Social Work Courses:
SWRK 2050 Community \& Organizational Theory
SWRK 2070 Small Group Dynamics
SWRK 4050 Selected Topics in Social Work
SWRK 4080 Current Issues in Social Welfare

NOTE: Special and non-Social Work students are required to abide by the same pre-/corequisite policy that applies to B.S.W. students.

## SECTION 3: Faculty Academic Regulations

All students are asked to note that some academic policies and regulations are under review and are subject to change. The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Social Work has regulations and requirements, published below, that apply specifically to its students.

### 3.1 Prerequisite and Corequisite Policy,

The faculty has established a set of pre-/corequisite requirements to assist students in planning their program of
study.
All students must abide by the pre- and corequisite requirements for all courses.
Any exceptions to the pre- and corequisite policy MUST be approved by the Committee on Academic Standings prior to course registration. Should a student violate the pre- and corequisite policy, credit(s) for the course(s) will be deleted from the student's academic record. For detailed information, please refer to the B.S.W. Student Handbook.
3.2 Residence Requirements for a Degree Program, The general university residence requirement applies to the Faculty of Social Work.

### 3.3 Scholastic Progress,

Except in circumstances covered in the official regulations referred to below, clear standing in the faculty requires both the Degree Grade Point Average and Subject Grade Point Average of $2.5\left(\mathrm{C}_{+}\right)$at the end of each term. A minimum grade of 2.0 (C) is required for all Social Work courses. The passing grades for electives taken in other faculties or schools are those required by the faculties or schools concerned. Complete statements of the regulations governing scholastic progress in the Faculty of Social Work are published in the B.S.W. Student Handbook. Students wishing to do so may consult the policy governing scholastic progress as written in the B.S.W. Student Handbook with the Chair of the Committee on Academic Standings, or the Dean. In the event of any question or dispute, this set of regulations shall be considered the official version. Directors of off-campus programs and the Student Services and Admissions/ Advising Office at Fort Garry Campus will advise students on issues concerning scholastic progress.

### 3.4 Professional Unsuitability Bylaw,

The Senate has approved a bylaw granting authority to the faculty to require a student to withdraw for reasons of professional unsuitability (see the chapter, General Academic Regulations and Requirements, Section 6.2.3.). The bylaw is published in the B.S.W. Student Handbook. Students are reminded of their obligation to be familiar with all regulations governing their continued progress in the program.

### 3.5 Dean's Honour List,

BSW student eligibility for the Dean's Honour List is considered on a term by term basis. To qualify for the Dean's Honour List a student must:

- Have completed a minimum of 9 credit hours in the term under consideration, of which a minimum 6 credit hours must be with a standard grade.
and
- Have achieved a minimum Term GPA of 3.6

Pass/Fail courses are included in the credit hour count.

### 3.6 Appeal of Grades,

The general university policy for appeal of assigned grades applies to the Faculty of Social Work. As well, the Faculty Council has approved a Social Work policy on the appeal of assigned grades and term work. The policy is outlined in the
B.S.W. Student Handbook. The Faculty Council has established the Academic Standing Appeals Committee to deal with these matters.
3.7 Distance Courses Open to Fort Garry Campus and Inner City Social Work Students,
B.S.W students who are enrolled in the Fort Garry Campus or Inner City Social Work programs may take up to six credit hours of selected social work courses through Distance Delivery. The following courses are excluded: SWRK 2080, SWRK 3100, SWRK 3140, SWRK 4200 and SWRK 4300. If any Fort Garry Campus or Inner City Social Work program students are enrolled in the above mentioned practice courses they will be withdrawn.

### 3.8 Opting Into Field and Practices of the Two-Year

 Plan,Students may apply for "opt-in" by fulfilling the following conditions:

- Consult with and submit written request for "Opt-in" to the Coordinator of Student Services and Admission/Advising Office and Field Coordinator no later than February 1.
- Successfully complete all Social Work courses required by the end of Winter term prior to opt-in year (except for SWRK 4210 Feminist Perspectives on Social Work Practice, SWRK 4220 Aboriginal People and Social Work Practice, SWRK 4200 Field Focus of Social Work Practice 1, SWRK 4300 Field Focus of Social Work Practice 2, SWRK 3150 Field Instruction 1 and SWRK 4120 Field Instruction 2) and - Successfully complete all elective courses (including written English and mathematics requirements) by the end of Winter term prior to opt-in year.
- Achieve a minimum Degree Grade Point Average of 3.00 at point of opting in.
- Achieve a minimum Subject Grade Point Average of 3.00 at point of opting in.
Final approval to opt-in is also based on faculty resources: space availability in SWRK 4210 Feminist Perspectives on Social Work Practice and SWRK 4220 Aboriginal People and Social Work Practice during Summer Session; space availability in SWRK 4200 Field Focus of Social Work Practice 1 and SWRK 4300 Field Focus of Social Work Practice 2 courses in Fall and Winter terms; and the availability of concentrated field placements.

### 3.9 Courses Open to Challenge for Credit ,

The Faculty of Social Work accommodates those students who are quali-fied and who can demonstrate acceptable knowledge and skill, by allow-ing them to challenge certain Social Work courses. They are:

SWRK 2080 Interpersonal Communication Skills

SWRK 3100 Systematic Inquiry in Social Work

SWRK 3130 Contemporary Canadian Social Welfare
Information on the procedures for challenge is available in the B.S.W. Stu-dent Handbook. The dates at which courses may be challenged are given in the academic schedule of the Undergraduate Calendar.

### 3.10 Credit for Social Work Courses Taken at Other

 Universities,The Faculty of Social Work supports the principle of granting credit for social work courses taken within the last nine years in accredited programs leading to professional social work qualification. Information on granting credits for social work courses is available in the B.S.W. Student Handbook. The Faculty of Social Work has articulated agreements with specific diploma and certificate programs. Please consult the B.S.W. Student Handbook for detailed information.

## Section 4: Program and Graduation Requirements

When planning your workload, allow approximately two hours of study/reading time for each hour of class time. It is also advisable to schedule time to use the library. The
faculty will offer as many evening courses as possible each year.

### 4.1 Curriculum Outline A) Three-Year Plan

This plan allows a Fort Garry Campus student who has completed 30-50 credit hours of general university study prior to admission, to combine Social Work professional courses with other university courses. It requires three years of full-time study, after admission to the faculty, to complete the requirements for the B.S.W. degree. A student who has already completed the 51 credit hours of general university study which are acceptable to the University of Manitoba may also register for this program ignoring the elective requirements.

Three-Year Plan Example

| Course No. Course Name | Credit <br> Hours | Year |
| :--- | :---: | :---: |
| SWRK 1310 Introduction to Social Welfare Policy | 3 | 1 |
| $\quad$ Analy-sis |  |  |
| SWRK 2080 Interpersonal Communication Skills | 3 | 1 |
| SWRK 2090 Human Behaviour and Social Work Practice | 6 | 1 |
| SWRK 3140 Introduction to Social Work Practice | 3 | 1 |
| SWRK 3150 Field Instruction 1 | 12 | 2 |
| SWRK 4200 Field Focus of Social Work Practice 1 | 6 | 2 |
| SWRK 4120 Field Instruction 2 | 12 | 3 |
| SWRK 4300 Field Focus of Social Work Practice 2 | 6 | 3 |
| SWRK 2110 Emergence of the Canadian Welfare State | 3 | 1 |
| or |  |  |
| SWRK 2130 Comparative Social Welfare Systems | 3 | 1 |
| SWRK 3100 Systematic Inquiry in Social Work | 3 | 1 |
| SWRK 3130 Contemporary Canadian Social Welfare | 3 | 2 |
| SWRK 4210 Feminist Perspectives on Social Work | 6 | 2 or |
| Prac-tice |  | 3 |
| SWRK 4220 Aboriginal People and Social Work Practice | 6 | 2 or |
|  |  | 3 |

## NOTES:

1) SWRK 1310 and SWRK 2080 are open to University 1 students,
2) All students must take the foundation courses very early in the program. Failure to do so may restrict progression through the program.
3) See (Section5) for a complete list of pre-/corequisites.
4) Students must take SWRK 1310 before proceeding to SWRK 2110, , SWRK 2130, and SWRK 3130. In addition, SWRK 1310, SWRK 2080 and SWRK 2090 are pre- or corequisite to SWRK 3140.
5) All foundation courses (SWRK 1310, SWRK 2080, SWRK 2090 and SWRK 3140) are pre-requisite to SWRK 4200, SWRK 4300 , SWRK 4210, SWRK 4220, SWRK 3150 and SWRK 4120. In addition, SWRK 3150 Field Instruction 1 is pre-requisite to SWRK 4120 Field Instruction 2.
6) See Aurora Class Schedule for a list of SWRK 4200 and SWRK 4300 courses.
7) Students must take one section of SWRK 4200 and one section of SWRK 4300 . Each section is anchored in a different field or focus of social work practice. It is rec-ommended that students take SWRK 4200 and SWRK 4300 courses that corresponds with their field placement area of practice.
8) Students must take SWRK 4200 concurrently with SWRK 3150 and SWRK 4300 concurrently with SWRK 4120 . If a student withdraws from SWRK 4200, he/she must also withdraw from SWRK 3150 and if a student withdraws from SWRK 4300, he/she must also withdraw from SWRK 4120. As well, if a student withdraws from SWRK 3150 he/she must withdraw from SWRK 4200 and if a student withdraws from SWRK 4120 he/she must withdraw from SWRK 4300 . Students, who fail to withdraw from the corequisite course, will be withdrawn.
9) Student admitted after '97-98 must complete 3 credit hours of written English and 3 credit hours of mathematics as part of first 30 credit hours (unless completed prior to admission).
10) This plan assumes that students do not take courses in the summer.

Year $1=21$ Credit hours social work 6 Credit hours electives courses

Year $2=27$ Credit hours social work 6 Credit hours electives courses

Year 3 = 24 Credit hours social work
9 Credit hours electives courses

Planning Chart for Elective Courses for Three-Year Pro-gram

| Required Electives | Credit Hours Year |  |
| :--- | :--- | :---: |
| Admitted on basis of | 30 | 1 |
| Unallocated transfer |  |  |
| Electives to be completed |  | 1 |
| Written English (W) | 1 |  |

## B) Two-Year Plan (Concentrated Program) - Fort Garry Campus

Fort Garry Campus students who have completed 51 credit hours of general university study prior to admission to the B.S.W. program, and have maintained a minimum Adjusted Grade Point Average (A.G.P.A.) of 3.00, are eligible for the two year plan (Concentrated Program). If a student has completed the 51 credit hours of general university study which are acceptable to the University of Manitoba, but does not have the required 3.00 A.G.P.A., or prefers a more extended time period, that student can register for either the three-year plan or the part-time plan.

Students eligible to register for the concentrated program may choose to do so at point of initial registration following admission only.

## Two-Year Plan

Year 1 (September - August)

Course No. Course Name
Credit Hours
SWRK 1310Introduction to Social Welfare Policy Analysis 3
SWRK 2080Interpersonal Communication Skills
SWRK 2090Human Behaviour and Social Work Practice
SWRK 2110Emergence of the Canadian Welfare State or
SWRK 2130Comparative Social Welfare Systems 3
SWRK 3100Systematic Inquiry in Social Work
SWRK 3130Contemporary Canadian Social Welfare 3
SWRK 3140Introduction to Social Work Practice 3
SWRK 4210Feminist Perspectives on Social Work 6 Practice

If any of the required social work courses were part of 51 credit hours completed prior to admission to the BSW program, they will have to be substituted with elective courses after admission to the BSW program. Any outstanding elective courses, including written English and mathematics requirements, must be completed by the end of Winter term in the first year of the BSW Concentrated Program.

Students must maintain a Degree Grade Point Average (D.G.A.P.) and Subject Grade Point Average (S.G.P.A.) of a minimum 3.00 at the end of each term to remain in the Concentrated Program. In an instance where one or both of these requirements are not met, the student's status will be changed from Concentrated to Regular.

Students planning on completing their program in two years must follow the structure outlined below (which requires completing at least 12 credit hours, including SWRK 4210 and SWRK 4220, during the summer).

SWRK 4220Aboriginal People and Social Work Practice 6<br>Year 2 (September - May)<br>SWRK 3150Field Instruction 1 12<br>SWRK 4200Field Focus of Social Work Practice 1<br>SWRK 4120Field Instruction 2 12<br>SWRK 4300Field Focus of Social Work Practice 26<br>Total credit hours 72<br>Note: See (Section 5) for a complete list of pre/co requisties.

C) The Part-Time Plan

Please note that it is possible to pursue the Bachelor of Social Work degree through a program of part-time study. Part-time students must complete all the required social work and elective courses within nine years of their ad-mission to the faculty.

### 4.2 Field Instruction

Students are expected to register for two courses in field, SWRK 3150 and SWRK 4120. Courses are taken when students have completed the prerequisites and are in the appropriate year of their degree plan. Field courses each have a corequisite, which is SWRK 4200 Field Focus of Social Work Practice 1 for SWRK 3150 Field Instruction 1 and SWRK 4300 Field Focus of Social Work Practice 2 for SWRK 4120 Field Instruction 2. The Field Focus course selected should correspond with the field placement area of practice. Students wishing to divert from their degree plan should consult with the Coordinator of Student Services and Admissions/Advising Office before February 1. Forms requesting confirmation of student plans to take field instruction in the following year will be distributed in the winter term. Students must request a field placement by completing a field section form at least 75 calendar days prior to the term that they will commence field. Students requesting a summer field placement must request the field placement at least 40 calendar days prior to summer field start. Students who do not meet the deadline cannot be guaranteed a field placement in that term.

Field Instruction in both SWRK 3150 and SWRK 4120 consists of participation in the field placement two days per week, both terms (16 hours per week). Field Instruction in the concentrated program constitutes four days per week (32 hours) in both terms at one placement. Students contemplating switching to a concentrated field placement are required to make themselves aware of eligibility requirements for this program and contact the Coordinator of Student Services and Admissions/Advising Office for confirmation of their eligibility no later than February 1. Only when this is resolved are they eligible to select this field option.

The Field Instruction program will provide the student with opportunities to learn first hand how to provide professional practice in a variety of social service agencies. The program provides an educationally focused experience in delivering progressively more demanding and complex professional social work interventions.

Field Instruction will be provided by university-appointed field instructors who may be agency-based or university-based, and who have knowledge, skills, and expertise in generic principles that can be applied to a wide range of fields of practice. The method of instruction will include individ-ual and may include group seminars designed to assist the student to integrate theory with practice. This instruction is provided on a weekly basis. Field liaisons are available for student support, if necessary.

Active participation by the student is expected in all phases of Field Instruction including orientation conducted in their individual agency placements at the beginning of the academic year. Students absent due to illness or oth-er reasons must contact the Field Instructor or Field Coordinator.

Students may be placed in a variety of agencies or departments. These include: school, probation, child and family services, health and mental health settings, occupational social work, those with a disability focus, and ethnically specific services. These settings provide experience in using a variety of intervention skills with individuals, families, groups, communities and policy initiatives. Every effort will be made to place students registering in SWRK 4120 (the final year of their field program) in a setting related to their field of interest. Final authority for field placement location, however, rests with the Field Coordinator. Decisions may be based on availability of agency openings, as well as on the educational needs of students. Students are expected to assume responsibility for any transporta-tion expenses required for travel to and from the agency sites in which they are taking their Field Instruction course.

The Field Coordinator is the Instructor of Record for SWRK 3150 and SWRK 4120. While the Faculty is responsible for assisting in securing a reasonable placement for the student, it is important to note that a student is not guaranteed confirmation in a field placement setting on the sole basis of the completion of prerequisite courses. Students must demonstrate readiness for practice in the process of securing a placement. If concerns are raised regarding the student's behaviour, judgment or practice and/or if the student demonstrates difficulty in his or her attempts to attain confirmation as a result of his or her performance in the field interview process, the Field Coordinator and Associate Dean of Undergraduate Programs will determine what additional steps may be taken to resolve this matter, or may determine
the student is unprepared for meeting the requirements of field placement at this time.

All students registered in Field Instruction courses (SWRK 3150 and SWRK 4120) are required to attend Field Orientation on Tuesday, September 4, 2012 and Wednesday, September 5, 2012. As attendance at Field Orientation is mandatory, Field students are not required to attend classes on the 4th and 5th. Information regarding Field Orientation is mailed to each Field student in his or her confirmation of placement letter. If more information is required, contact the Field Coordinator at (204) 474-8300.

Students are allowed one voluntary withdrawal from the course SWRK 3150 Field Instruction 1 and one voluntary withdrawal from the course SWRK 4120 Field Instruction 2. If a student withdraws from SWRK 3150 he/she must withdraw from SWRK 4200 and if a student withdraws from SWRK 4120 he/she must withdraw from SWRK 4300. Students who fail to withdraw from the corequisite course(s), will be withdrawn.

In accordance with the Statement of Student and Faculty Obligations, the student is responsible for the following:

- The successful completion of prerequisite courses to field placement;
- The review of field-related written materials and participation in sessions to assist in preparation for the field placement application and referral process;
- The submission of a complete application form (including résumé) in request of field placement by the specified due date;
- Professional conduct during the interview process;
- Prompt follow-up with field placement site and/or field program staff as required in the period preceding confirmation of field placement;
- The completion of all site-specific field requirements (such as the Child Abuse Registry, Criminal Record Check, Driver's Licence, Driver's Abstract and the WRHA Immunization policy) prior to the commencement of field placement; and
- Registration in Field Instruction 1 and/or Field Instruction 2 in addition to the Field Focus of Social Work Practice corequisite course(s) prior to the commencement of field placement.

The Faculty of Social Work is responsible for providing students with the following:

- Curriculum expectations including learning objectives;
- Field Information Resource Booklet;
- Field Student Manual;
- Field Program Staff contact information and consultation;
- Materials regarding preparation for and orientation to field placement; and
- Requirements of field application, referral and confirmation process.

The Field Coordinator is the Instructor of Record for Field Instruction 1 (SWRK 3150) and Field Instruction 2 (SWRK 4120). While the Faculty is responsible for assisting in securing a reasonable placement for the student, it is important to note that a student is not guaranteed confirmation in a field placement setting on the sole basis of the completion of prerequisite courses. Students must demonstrate readiness for practice in the process of securing a placement. If concerns are raised regarding the student's behaviour, judgment or practice and/or if the student demonstrates difficulty in his or her attempts to attain confirmation as a result of his or her performance in the field interview process, the Field Coordinator and Associate Dean of Undergraduate Programs will determine what additional steps may be taken to resolve this matter, or may determine the student is unprepared for meeting the requirements of field placement at this time.

### 4.3 Requirements for Graduation

Eligibility for graduation is contingent upon:

The successful completion of 72 credit hours of required Social Work courses; successful completion means attaining a minimum grade of "C" in all Social Work courses and a minimum Subject Grade Point Average (S.G.P.A.) of 2.50 (C+).

The successful completion of 51 credit hours of electives. Students admitted after 1997/98, are required to successfully complete three credit hours of written English and three credit hours of Mathematics. The passing grades for electives taken in other faculties or schools are those required by the faculties or schools concerned. A minimum of "C" must be attained in Social Work electives. The minimum Degree Grade Point Average (D.G.P.A.) required for graduation is also $2.50(\mathrm{C}+)$.

Total credit hours required for a B.S.W. are 123 (51 credit hours of electives +72 credit hours of required Social Work courses).

## Student Responsibilities

It is the student's responsibility to be familiar with all the requirements of the B.S.W. degree, to ensure compliance with degree program requirements, including prerequisite requirements, and to understand all relevant regulations, policies and practices. The final completion of degree requirements is the student's responsibility.

### 4.2 Field Instruction

Students are expected to register for two courses in field, SWRK 3150 and SWRK 4120. Courses are taken when students have completed the prerequisites and are in the appropriate year of their degree plan. Field courses each have a corequisite, which is SWRK 4200 Field Focus of Social Work Practice 1 for SWRK 3150 Field Instruction 1 and SWRK 4300 Field Focus of Social Work Practice 2 for SWRK 4120 Field Instruction 2. The Field Focus course selected should correspond with the field placement area of
practice. Students wishing to divert from their degree plan should consult with the Coordinator of Student Services and Admissions/Advising Office be-fore February 1. Forms requesting confirmation of student plans to take field instruction in the following year will be distributed in the winter term. Students must request a field placement by completing a field section form at least 75 calendar days prior to the term that they will commence field. Students requesting a summer field placement must request the field placement at least 40 calendar days prior to summer field start. Students who do not meet the deadline cannot be guaranteed a field placement in that term.

Field Instruction in both SWRK 3150 and SWRK 4120 consists of participation in the field placement two days per week, both terms (16 hours per week). Field Instruction in the concentrated program constitutes four days per week (32 hours) in both terms at one placement. Students contemplating switching to a concentrated field placement are required to make themselves aware of eligibility requirements for this program and contact the Coordinator of Student Services and Admissions/Advising Office for confirmation of their eligibility no later than February 1. Only when this is reolved are they eligible to select this field option.

The Field Instruction program will provide the student with opportunities to learn first hand how to provide professional practice in a variety of social service agencies. The program provides an educationally focused experience in delivering progressively more demanding and complex professional social work interventions.

Field Instruction will be provided by university-appointed field instructors who may be agency-based or university-based, and who have knowledge, skills, and expertise in generic principles that can be applied to a wide range of fields of practice. The method of instruction will include individ-ual and may include group seminars designed to assist the student to integrate theory with practice. This instruction is provided on a weekly basis. Field liaisons are available for student support, if necessary.

Active participation by the student is expected in all phases of Field Instruction including orientation conducted in their individual agency placements at the beginning of the academic year. Students absent due to illness or other reasons must contact the Field Instructor or Field Coordinator.

Students may be placed in a variety of agencies or departments. These include: school, probation, child and family services, health and mental health settings, occupational social work, those with a disability focus, and ethnically specific services. These settings provide experience in using a variety of intervention skills with individuals, families, groups, communities and policy initiatives. Every effort will be made to place students registering in SWRK 4120 (the final year of their field program) in a setting related to their field of interest. Final authority for field placement location, however, rests with the Field Coordinator. Decisions may be based on availability of agency openings, as well as on the educational needs of students. Students are expected to assume responsibility for
any transportation expenses required for travel to and from the agency sites in which they are taking their Field Instruction course.

The Field Coordinator is the Instructor of Record for SWRK 3150 and SWRK 4120. While the Faculty is responsible for assisting in securing a reasonable placement for the student, it is important to note that a student is not guaranteed confirmation in a field placement setting on the sole basis of the completion of prerequisite courses. Students must demonstrate readiness for practice in the process of securing a placement. If concerns are raised regarding the student's behaviour, judgment or practice and/or if the student demonstrates difficulty in his or her attempts to attain confirmation as a result of his or her performance in the field interview process, the Field Coordinator and Associate Dean of Undergraduate Programs will determine what additional steps may be taken to resolve this matter, or may determine the student is unprepared for meeting the requirements of field placement at this time.

All students registered in Field Instruction courses (SWRK 3150 and SWRK 4120) are required to attend Field orientation on Tuesday, September 6, 2011 and Wednesday, September 7, 2011. As attendance at Field orientation is mandatory, Field students are not required to attend classes on the 6th and 7th. Information regarding Field orientation will be mailed to each Field student in late August. If more information is required, contact the Field Coordinator at (204) 474-8300.

Students are allowed one voluntary withdrawal from the course SWRK 3150 Field Instruction 1 and one voluntary withdrawal from the course SWRK 4120 Field Instruction 2. If a student withdraws from SWRK 3150 he/she must withdraw from SWRK 4200 and if a student withdraws from SWRK 4120 he/she must withdraw from SWRK 4300. Students who fail to withdraw from the corequisite course(s), will be withdrawn.

## Accelerated Field - Inner City Social Work Program and Distance Delivery Program

Accelerated Field allows eligible students to undertake Field Instruction I (SWRK 3150) and Field Instruction 2 (SWRK 4120) in one field placement between September and April. Field Instruction includes four days of placement per week for a total of 840 hours. Students who are approved to take Accelerated Field must also register for two corequisite Field/Focus of Social Work Practice (SWRK 4200 and SWRK 4300) courses.

Inner City Social Work Program students and Distance Delivery Program students who have completed 75 credit hours including the four foundation courses (SWRK 1310, SWRK 2080, SWRK 2090 and SWRK 3140) and have maintained a minimum Degree Grade Point Average (D.G.P.A.) of 3.0 and Subject Grade Point Average (S.G.P.A.) of 3.0 are eligible to apply for Accelerated Field. Inner City Social Work Program students in request of Accelerated Field must attach to their Field Placement Request Form, a written request to the Director of Inner City Social Work Program indicating an interest in an Accelerated Field Placement. Distance Delivery Program students in

University of Manitoba
request of Accelerated Field must attach to their Field Placement Request Form, a written request to the Coordinator of Distance Delivery Program indicating an interest in an Accelerated Field Placement. Requests must be handed in on time and are due at least 75 calendar days prior to the term that the student will commence.

### 4.3 Requirements for Graduation,

Eligibility for graduation is contingent upon:
The successful completion of 72 credit hours of required Social Work courses; successful completion means attaining a minimum grade of " $C$ " in all Social Work courses and a minimum Subject Grade Point Average (S.G.P.A.) of 2.50 (C+).
The successful completion of 51 credit hours of electives. Students admitted after 1997/98, are required to successfully complete three credit hours of written English and three credit hours of Mathematics. The passing grades for electives taken in other faculties or schools are those required by the faculties or schools concerned. A minimum of "C" must be attained in Social Work electives. The minimum Degree Grade Point Average (D.G.P.A.) required for graduation is also 2.50 (C+).
Total credit hours required for a B.S.W. are 123 ( 51 credit hours of electives +72 credit hours of required Social Work courses).
Student Responsibilities
It is the student's responsibility to be familiar with all the requirements of the B.S.W. degree, to ensure compliance with degree program requirements, including prerequisite requirements, and to understand all relevant regulations, policies and practices. The final completion of degree requirements is the student's responsibility.

## SECTION 5: -1000 Level

SWRK 1310 Introduction to Social Welfare Policy
Analysis Cr.Hrs. 3
(Formerly 047.131) Examination of social welfare policy as the end product of ideologies. Introduction of elements of ideology and the comparison of competing ideological systems. The relationship of economic, political and ethical views of society and their manifestations in societal responses to human need and social services. Students may not hold credit for both SWRK 1310 (or 047.131) and the former 047.130.

## SECTION 5: -2000 Level

SWRK 2050 Community and Organizational
Theory Cr.Hrs. 3
(Formerly 047.205) Deals with concepts such as conflict and power which relate social work practice to the nature of secondary human relationships. These are applied to the dynamics within and between communities and organizations.

SWRK 2070 Small Group Dynamics Cr.Hrs. 3
(Formerly 047.207) Group norms, values, and goal as they relate to decision-making and communication patterns in groups. Membership roles and leadership styles are related to group development and group functioning.

SWRK 2080 Interpersonal Communication Skills Cr.Hrs. 3 (Formerly 047.208) A basic core of interpersonal skills for communicating effectively and for establishing and maintaining relationships in one-to-one and group situations. Emphasis is on experiential learning using a variety of techniques.

SWRK 2090 Human Behaviour and Social Work
Practice Cr.Hrs. 6
(Formerly 047.209) Students are introduced to a broad range of theories and will develop an understanding of how people and environments reciprocally affect each other. Particular emphasis is placed on understanding how gender, race, ethnicity, socioeconomic factors, age, ability, and sexual orientation contribute to and influence human behaviour throughout the lifespan.

SWRK 2110 Emergence of the Canadian Social Welfare State Cr.Hrs. 3
(Formerly 047.211 ) An examination of the emergence of the Canadian welfare state from its various colonial inheritances to the Canada Assistance Plan. Social, political, economic, religious, geographical, demographic and cataclysmic factors influencing the development of the welfare state are examined and analyzed. Prerequisite: SWRK 1310 (or 047.131). Students may not hold credit for both SWRK 2110 (or 047.211) and the former 047.130.

SWRK 2130 Comparative Social Welfare Systems Cr.Hrs. 3 (Formerly 047.213) The welfare systems of three modern societies are examined and compared. Economic, political, social, religious, geographical, demographic and cataclysmic factors influencing the development of the various models of social provision are analyzed for their significance to the Canadian welfare system. Prerequisite: SWRK 1310 (or 047.131). Students may not hold credit for both SWRK 2130 (or 047.213) and the former 047.130.

SWRK 2650 The Social Aspects of Aging Cr.Hrs. 3
(Formerly 047.265) An examination of the social aspects of aging. Emphasis on understanding the aging process as a life transition involving adaptation through interaction with social and physical environments. Students may not hold credit for REC 2650 (or 123.265) and IDES 2650 (or 051.265) or HMEC 2650 (or 028.265) or SWRK 2650 (or 047.265). (A required Option in Aging course)

## SECTION 5: -3000 Level

SWRK 3100 Systematic Inquiry in Social Work Cr.Hrs. 3 (Formerly 047.310) Relates systematic methods of scientific inquiry to social work practice; theory building for practice; information collection; descriptive data for decision-making, understanding technical research material, introduction to issues of research design.

SWRK 3130 Contemporary Canadian Social
Welfare Cr.Hrs. 3
(Formerly 047.313) An examination of social welfare in Canadian society, leading to an evaluation of present approaches in the light of changing economic and social conditions and changing needs. Prerequisite: SWRK 1310 (or 047.131). Students may not hold credit for both SWRK 3130 (or 047.313) and the former 047.301.

SWRK 3140 Introduction to Social Work Practice Cr.Hrs. 3 (Formerly 047.314) Introduces students to ecological and other generalist based practice frameworks and the role of professional social workers. Course emphasizes values and knowledge in context of a rational approach to problem solving which includes problem definition, assessment, contracting, intervention and evaluation. Pre- or corequisite SWRK 1310 (or 047.131), SWRK 2080 (or 047.208) and SWRK 2090 (or 047.209).

SWRK 3150 Field Instruction 1 Cr.Hrs. 12 (Formerly 047.315) A first educationally directed field experience in which the student will have the opportunity to assume responsibility for social work engagement, assessment, planning, intervention and evaluation, integrating theory from class. While Access Programs may require additional field hours, 420 hours is the minimum required for all BSW students. This time commitment includes involvement with the agency in planning for, and engaging in, practice activity, and evaluation of performance. It also includes educational contact time with the field instructor in individual and/or group sessions. Subject to satisfactory completion and reports, students will be graded on a pass/fail basis. Prerequisites: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209), and SWRK 3140 (or 047.314), and consent by course instructor (Field Coordinator). Corequisite: 6 credit hours of SWRK 4200 (or 047.420).

## SECTION 5: -4000 Level

SWRK 4050 Selected Topics in Social Work Cr.Hrs. 3 (Formerly 047.405) Directed readings or concentrated study in some aspect of social service which is of interest to the student. Students must contract with an instructor prior to registration. Prerequisite: written consent of instructor.

SWRK 4070 Social Problem and Social Work Practice Seminar Cr.Hrs. 3
(Formerly 047.407) In-depth study of the problem area, exploration of the ways other disciplines relate to the problem, and strengthening of interventive abilities of the student. Prerequisite: SWRK 3040 (or 047.304) / SWRK 3120 (or 047.312), SWRK 4200 (or 047.420) / SWRK 3150 (or 047.315) or written consent of instructor.

SWRK 4080 Current Issues in Social Welfare Cr.Hrs. 3 (Formerly 047.408) Study of a particular area of social welfare to improve policies and practices. Students may select one seminar from several which are offered. These may vary from year to year.

SWRK 4120 Field Instruction 2 Cr.Hrs. 12
(Formerly 047.412) A second educationally directed practice experience building on SWRK 3150 (or 047.315) in which the student will have the opportunity to carry a sustained professional role in situations which require the integration of values, knowledge, and skill at the level of a beginning professional practitioner. While Access Programs may require additional field hours, 420 hours is the minimum required for all BSW students. This time commitment includes involvement with the agency in planning for, and engaging in, practice activity, and evaluation of performance. It also includes educational contact time with the field instructor in individual and/or group sessions. Subject to satisfactory completion and reports, students will be graded
on a pass/fail basis. Prerequisites: 6 credit hours of SWRK 4200 (or 047.420 ), and SWRK 3150 (or 047.315 ), and consent by course instructor (Field Coordinator).
Corequisite: 6 credit hours. of SWRK 4300.
SWRK 4130 Advanced Interpersonal Communication
Skills Cr.Hrs. 3
(Formerly 047.413) An experiential course for selfunderstanding and self-awareness to produce a disciplined and conscious use of self in professional communication and relationships. Prerequisites: SWRK 2080 (or 047.208) and written consent of instructor.

SWRK 4200 Field Focus of Social Work Practice Cr. Hrs. 6 (Formerly 047.420) A seminar for the critical examination of social work theory, values, policy and skills in the context of a field or focus of practice. The course integrates policy with practice at micro, meso and macro levels. Course seminar topics may vary from year to year and are organized to cover various fields or focus of practice. Prerequisite: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209), and SWRK 3140 (or 047.314). Prerequisites: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209 ), and SWRK 3140 (or 047.314). Corerequisite: SWRK 3150 (047.315). Students cannot hold credit for both swrk 4150 (or 047.415) and SWRK 4200 (or 047.420).

SWRK 4210 Feminist Perspectives on Social Work Practice and Social Welfare Policy Cr.Hrs. 6
(Formerly 047.421) An analysis of social work practice and welfare policy from a feminist perspective. Course emphasizes the integration of social work intervention with policy in the social welfare context and overlays concepts such as empowerment, ecological practice, oppression, and practice in context of cultural diversity. Prerequisites: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209), and SWRK 3140 (or 047.314). Students may not hold credit for both SWRK 4210 (or 047.421) and SWRK 4170 (or 047.417) or SWRK 4210 (or 047.421) and SWRK 4190 (or 047.419).

SWRK 4220 Aboriginal People and Social Work
Practice Cr.Hrs. 6
(Formerly 047.422) An analysis of social work practice and welfare policy from an aboriginal perspective. The course emphasizes the linkage between practice and policy and overlays concepts such as colonization, decolonizatino, and approaches to practices which include cross culture, structure, and anti-oppression in the context of Aboriginal world views, experience and helping practices.
Prerequisites: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209), and SWRK 3140 (or 047.314). Students may not hold credit for both SWRK 4220 (or 047.422) and SWRK 4160 (or 047.416) or SWRK 4220 (or 047.422) and SWRK 4180 (or 047.418).

SWRK 4250 Family Group Conferences Cr.Hrs. 3 This course provides an overview of the research, theory and application of Family Group Conferencing within the context of child and family services and the implications for intervention. Emphasis is on experiential learning of Family Group Conferencing process and techniques.

SWRK 4260 Addiction and CFS Practice Cr.Hrs. 3
The focus of this course is to increase the student's knowledge about addictions as well as to develop student's

##

 2012-2013University
of Manitoba
skills for intervention with families affected by addiction within the context of child and family services. Emphasis is on experiential learning of knowledge, process and techniques.

SWRK 4270 Crisis Intervention Cr.Hrs. 3
This course provides an overview of the research, theory and application of crisis intervention, methods and techniques within the context of child and family services. Emphasis will be on expanding existing knowledge through experiential learning of crisis intervention processes and techniques.

SWRK 4300 Field Focus of Social Work Practice 2 Cr.Hrs. 6 A seminar for the critical examination of social work theory, values, policy and skills in the context of a field or focus of practice. The course integrates policy with practice at micro, meso and macro levels. Course seminar topics may vary from year to year and are organized to cover various fields or focus of practice. For students admitted after 1993-1994. Prerequisite: SWRK 4200 (Or 047.420), SWRK 3150 (or 047.315). Corerquisite: SWRK 4120.

## Grad Admissions Chapter Contents, SECTION 1: Preface

## SECTION 2: Admission

2.1 Degrees and Diplomas Offered
2.2 Admission to Graduate Studies
2.3 Application
2.4 Classification of Students

SECTION 1: Preface (Grad Admissions), At the University of Manitoba, graduate study and research were conducted on a modest scale from the foundation of the university and during its early years. In 1949, a Faculty of Graduate Studies and Research was established to systematize efforts in these fields. Currently more than 3,300 graduate students are registered at the university. A substantial number of graduate students received fellowships, scholarships, or assistantships made available under such arrangements as the Natural Sciences and Engineering Research Council, and the university itself. Providing additional opportunity for graduate students, research work funded through grants from business corporations and government bodies is now conducted at the university.

Agriculture Canada and the Department of Fisheries and Oceans maintain major research establishments on the Fort Garry campus. Additional and extensive research facilities are available in the faculties of Dentistry and Medicine located in central Winnipeg and the university's Bannatyne Campus. The Faculty of Medicine operates in close conjunction with the major teaching hospitals.

Graduate work at the doctoral level is offered in the faculties of Agricultural and Food Sciences, Arts, Clayton H. Ridell Faculty of Environment, Earth and Resources, Dentistry, Education, Engineering, Human Ecology, Medicine, Science, Social Work, and the Asper School of Business/Faculty of Management.

The Faculty of Graduate Studies is governed by the Faculty Council of Graduate Studies. The Faculty Council delegates powers to the Executive Committee of Graduate Studies which in turn delegates responsibilities to standing committees of the faculty, such as the Guidelines and Policy Committee and the Awards Committee.

## SECTION 2: Admission to Graduate Studies, 2.1 Degrees and Diplomas Offered

The Faculty of Graduate Studies offers advanced courses of instruction and facilities for research leading to the following:

Master of Architecture (M.Arch.)

Master of Arts (M.A.)
Maîtrise ès Arts (Université de Saint-Boniface)

Master of Business Administration (M.B.A.)

Master of City Planning (M.C.P.)

Master of Dentistry (M.Dent.)

Master of Education (M.Ed.)

Maîtrise en Éducation (Université de Saint-Boniface)

Master of Engineering (M.Eng.)
Master of Environment (M.Env.)

Master of Fine Arts (M.F.A.)
Master of Interior Design (M.I.D.)

Master of Landscape Architecture (M.Land.Arch.)

Master of Laws (LL.M.)

Master of Mathematical, Computational and Statistical
Sciences (M.M.C.S.S.)
Master of Music (M.Mus)

Master of Natural Resources Management (M.N.R.M.)

Master of Nursing (M.N.)

Master of Occupational Therapy (M.O.T.)
Master of Physical Therapy (M.P.T.)

Master of Physician Assistant Studies (M.P.A.S.)
Master of Public Administration (M.P.A.)

Master of Public Health (M.P.H.)

Master of Science (M.Sc.)

Master of Social Work (M.S.W.)

Doctor of Philosophy (Ph.D.)
Diploma in Population Health (Dip.P.H.)

See the Graduate Studies Program index in this Calendar for listings of graduate programs by unit.

### 2.2 Admission

## General Policy on Admission

The general policy on admission to the Faculty of Graduate Studies is found in the Academic Guide section of this Calendar. Note that admission standards as well as criteria and procedures for admission may vary from program to program. Consult the specific departmental listing in this Calendar for details.

Admission to the Faculty of Graduate Studies is competitive and a combination of factors is considered in the admission decision, including:

- The past academic performance of the applicant and assessments of referees. These are used as indicators of the likelihood that the applicant can successfully complete the course of studies and research for the degree.
- The capacity of the department (unit, faculty, institute, etc.) to provide the program of study and research requested by the applicant, including adequate study and research facilities.

The availability and willingness of a faculty member competent to supervise the program of study and research of the applicant.

## Application Forms

Applications can be made online at umanitoba.ca/graduate_studies/. Paper application forms are available from the Faculty of Graduate Studies general office and from all departments. For application deadline dates, refer to the specific graduate program in this Calendar. Application to live in residence is made separately (See Housing and Student Life in the Student Affairs chapter.)

### 2.3 Application

## Departmental Deadlines

Please refer to the Department to which you wish to apply in the Graduate Programs Section of this Calendar.

## Application Fee

This fee must accompany all admission applications:

Canadian/permanent residents - \$100. (CAD)

International applicants - \$100. (CAD)

## Application Declaration

All persons seeking admission to the University of Manitoba must sign the following declaration on the Application for Admission Form: "I hereby certify that I have read and understood the instructions and information sheet attached to this application form and that all statements made in conjunction with this application are true and complete. I understand that my application will be rejected if I have not disclosed my complete academic record or have submitted false information in support of my application to the Faculty of Graduate studies. In such an event I understand that future applications from me will not be considered."

## Application Fraud or Misconduct

It should be noted that the commission of application fraud or misconduct may result in acceptance and registration being withdrawn and the applicant disqualified from consideration, not only in the year of application, but, in all subsequent sessions. If discovered in a subsequent session it may result in dismissal from the university. Application fraud or misconduct includes the following:

- Failure to declare attendance at another postsecondary institution;
- Presenting falsified academic documentation or causing or encouraging another person to falsify records through translation or data changes;
- Presenting falsified personal documentation, e.g. using a false name, date of birth, country of origin, etc.;
- Presenting falsified or fictitious reference documentation;

## ACADEMIC CALENDAR 2012-2013 •

- Cheating on or having another person write a standardized entry exam such as TOEFL, MCAT, LSAT, DAT or GMAT;
- Presenting another person's standardized test score as one's own to falsify a test result; and
- Failure to report suspensions from another postsecondary institution.

### 2.4 Classification of Students

The classification of a student at the University of Manitoba is determined on admission to a program of study.

Please refer to Section 1.4 of the Academic Guide in this Calendar for Student Status/Classification of Students.

## Academic Guide

SECTION 6: Policy of Withholding Theses Pending a Patent Application

SECTION 7: Extension of Time to Complete Program of Study

SECTION 8: Leave of Absence

## SECTION 9: Appeals

The Faculty of Graduate Studies academic guide contains all the rules and policies pertaining to the Faculty of Graduate Studies. Adherence to these rules is of utmost importance for the effective functioning/operation of programs and for guiding and monitoring the progress of students. The integrity of the process is at stake. The major goal of this guide is to prevent potential problems that may affect the completion of a student's program. It is the responsibility of students and the unit offering a graduate program to read and follow the policies contained herein.

All regulations as laid out in the Faculty of Graduate Studies Academic Guide are subject to revision by the appropriate bodies of the Faculty of Graduate Studies. This compendium is presented as the most recent set of regulations as a guideline for students and staff. Regulations may vary from one department or program to another. Individual departments may have additional regulations that supplement these general regulations. All such supplementary procedures and regulations must be approved as specified by the By-Laws of the Faculty of Graduate Studies, be published and available to students, and kept on file in the Faculty of Graduate Studies Office.

For those programs that are administered through a Faculty (as opposed to a Department) the term "Department" should be substituted by "Unit" within this document ( i.e.
Department Head becomes Unit Head.)

## SECTION 1: Application, Admission, and Registration Policies <br> 1.1 Application and Admission Procedures, <br> The application (and all required documentation) is to be submitted directly to the Faculty of Graduate Studies. Applicants should contact the department to which they are applying for the procedures, requirements and departmental application deadlines in effect.

Steps:

1. A completed official application for admission form must be submitted, together with the application fee and supporting documentation, to the Faculty of Graduate Studies. Until such time as an application is complete it will not be considered.

NOTE: International students need to pay special attention to the appropriate requirements with respect to transcripts (see application form for details).
2. Applications are subsequently reviewed by the unit offering the program who will decide whether the applicant meets the unit's criteria which include but are not limited to space, facilities, and advisors.

## 

ACADEMIC CALENDAR 2012-2013 •
3. Notification of recommended/rejected applications are sent to the Faculty of Graduate Studies who check that the applicant meets the eligibility requirements of the Faculty of

Graduate Studies. The Faculty of Graduate Studies notifies applicants of their acceptance or rejection.

## Deadlines for Recommended Applications (from Departments to the Faculty of Graduate Studies)

The following are the deadlines for receipt by the Faculty of Graduate Studies Office for recommendations from graduate departments.

| Session | Start Date | Canadian/US | International |
| :--- | :--- | :--- | :--- |
| FALL | September | July 1 | April 1 |
| WINTER | January | November 1 | August 1 |
| SUMMER <br> (May Start) | May | March 1 | December 1 |
| SUMMER | July | May 1 | February 1 |

(July start)
IMPORTANT: Applicants are required to submit the application and documentation to the Faculty of Graduate Studies for an earlier date than is listed above. Applicants are advised to confirm the deadline of the department to which the application is being made. Contact information for each department can be found at http://umanitoba.ca/faculties/graduate studies/admissions/index.html

The deadlines are meant to accommodate the needs of students in securing appropriate documentation. Late applications may be considered for the next available start date.

## Application Fee

This fee must accompany all admission applications:

Canadian/Permanent Residents - \$100.00 (CDN)

International Applicants - \$100.00 (CDN)

## Transcripts:

Applicants must arrange for official transcripts from all postsecondary institutions attended to be sent to the University of Manitoba. Applicants must ensure that the original transcripts bearing the university seal or attested copies are sent directly from their issuing university to the Faculty of Graduate Studies. In cases where the transcript does/will not clearly state that a degree has been conferred, an official degree certificate is required to accompany the transcript. It is important that the transcript(s) be sent so as to arrive as soon as possible to coincide with the arrival of the application.

## Transcripts: International

Where academic records from a country other than Canada are produced in a language other than English the applicant must arrange for the submission of official literal translations of all records. To be official, original language documents and English translations must arrive together in envelopes which have been sealed and endorsed by the issuing institution.

## Transcripts: University of Manitoba

University of Manitoba students may request student histories (unofficial academic records) to be mailed directly to the Faculty of Graduate Studies free of charge. Some departments require official transcripts which may be
obtained from the Registrar's Office, 400 University Centre (Please allow at least two weeks for delivery).

## Proficiency in English

A successfully completed English Language Proficiency Test from the approved list is required of all applicants unless they have received a high school diploma or university degree from Canada or one of the countries listed on the English Language Proficiency Test Exemption List (see next section). If applicable, this score is required as a basis for admission and applicants will NOT be accepted subject to receipt of an acceptable score. Documented proof of either of the above must be submitted with the application for admission. Please note: scores more than two years old are not acceptable.

Thresholds required for successful completion are indicated in parentheses.*

University of Michigan English Language Examination Assessment Battery MELAB (80\%)

Test of English as a Foreign Language TOEFL- Paperbased test (550); Internet based -iBT (80)

Canadian Test of English for Scholars and Teachers CanTEST (band 4.5 in listening and reading and band 4.0 in writing and oral interview)

International English Language Testing System IELTS (6.5)

Academic English Program for University and College Entrance AEPUCE (65\%)

Canadian Academic English Language Assessment (CAEL)
(60 overall and 60 on each subset)

## 

ACADEMIC CALENDAR

## Note:

1. In addition, Foreign language students may be asked by the Department to complete the CanTEST prior to or following registration in the Faculty of Graduate Studies and, if need be, the Department may recommend remedial
measures in language skills based on the results of the CanTEST.
*2. Some departments may require a specific test or test scores greater than those indicated above.

## English Language Proficiency Test Exemption List**

Applicants holding secondary school diplomas and/or university degrees from the following countries are exempt from the English Language Proficiency Test requirement:

| Australia | Nigeria |
| :--- | :--- |
| Belize | Puerto Rico |
| English Speaking West Indies | Singapore |
| Canada | South Africa |
| Guyana | United Kingdom |
| Ireland | U.S.A. |
| Kenya | Zambia |
| Lesotho | Zimbabwe |
| New Zealand |  |

${ }^{* *}$ An updated list of additional countries exempt from the English Language Proficiency Test can be found at
http://umanitoba.ca/faculties/graduate studies/admissions/english exemption list.htm

## Letters of Recommendation

Letters of Recommendation forms are available in the Faculty of Graduate Studies Office, 500 University Centre or on the web:
http://umanitoba.ca/faculties/graduate studies/media/letter of reference.pdf

Two letters of recommendation must be sent to the Faculty of Graduate Studies in individually sealed envelopes with the referee's signature across the closing flap of the envelope. Applicants should check with the department to which they are applying as some departments require more than two Letters of Recommendation on a departmentally approved form.

## Admission Tests

Some departments require admissions tests, such as the Graduate Record Examination (GRE) or the Graduate Management Aptitude Test (GMAT). These requirements are listed in the Supplementary Regulations of the par-ticular department, and if required, the scores must be submitted at the time of application.

## Entrance Requirements

The minimum standard for acceptance into any category in the Faculty of Graduate Studies is a 3.0 Grade Point Average (GPA) or equivalent in the last two previous years of full time university study ( 60 credit hours).

Note: This is the minimum requirement of the Faculty of Graduate Studies and departments may have higher standards and additional criteria.

## Eligibility of University of Manitoba Staff Members

A staff member at the University above the rank of Lecturer or Instructor II is not eligible to register for a higher degree in the department in which the appointment is held.
1.2 Registration Procedures, Undergraduate students are not allowed to register in graduate courses; that is, admission to the Faculty of Graduate Studies is a condition for registration in courses at the 6000 level and above.

All graduate students must initially register in the term specified in their letter of acceptance as specified in the Academic Schedule of the Graduate Calendar. Any student not registering within one term of acceptance will be required to re-apply for admission. In exceptional circumstances and with prior approval from the Department, a student may defer registration for up to one term following acceptance into the Faculty of Graduate Studies. In the case of International students, admission may be deferred, with prior approval from the Department, for up to one year following acceptance.

All programs must be approved by the head of the major department or designate. Approval to take courses from departments outside the major department must be obtained from the outside department.

The approval or denial of admission and registration to two programs rests solely with the faculties/units concerned. The
approval/denial must be submitted to the Faculty of Graduate Studies prior to the student's
admission/registration.
Where a student does register in two programs the student must declare themselves as part-time in at least one of the programs. Students should note that completing a graduate program as a part-time student will affect their eligibility for the University of Manitoba Graduate Fellowship and may limit other funding possibilities.

## Re-Registration

Any student whose program of study extends over more than one year must re-register in fall and winter term of each succeeding year of his/her program until a degree is obtained (or in the case of Pre-Master's students their program is completed). Failure to re-register will result in the termination of the student's graduate status. A student who has been discontinued and would like to be considered for continuation in a program must apply for readmission, which is not guaranteed. The re-registration requirement does not apply to Occasional students or students on an Exceptional or Parental Leave of Absence (please refer to the "Leave of Absence" section of this Guide).

Note: Registration is not complete until fee payment or fee payment arrangements have been made with the Comptroller in writing prior to the fee payment deadline dates. The notation 'Discontinued Graduate Program' will be placed on the academic record of any graduate student who has failed to maintain continuous registration.

## Registration Revisions

For designated periods subsequent to registration, approved revisions and transfers may be made. It is required that students adhere to dates and deadlines as published in the Academic Schedule of the Graduate Academic Calendar.

Note: Graduate students are not allowed to withdraw from courses without written permission from their Department head on recommendation from their advisor/advisory committee approving the program change. The notation "student discontinued program" will be placed on the academic record of any graduate student who has withdrawn from courses without such approval.

## Western Deans' Agreement

This agreement was established in 1974 as an expression of co-operation and mutual support among universities offering Graduate programs in western Canada. Its primary purpose is the reciprocal enrichment of graduate programs throughout western Canada. This agreement is not intended to preclude other agreements between participating institutions.

1. The Western Deans' Agreement provides an automatic tuition fee waiver for visiting students. Graduate students
paying normal required tuition fees to their home institution will not pay tuition fees to the host institution.
2. Students may be required to pay student, activity, application, or other ancillary fees to the host institution, according to general policies in effect at the host institution. Wherever possible, these fees will also be waived.
3. Students will qualify for the fee waiver if they:
a) present the "Authorization Form: Western Deans'

Agreement" signed by the Dean or designate and the Department Head or Graduate Advisor of a participating Western institution specifying the courses to be taken for credit toward a graduate degree program at their home institution;
b) are in good standing in a graduate program at the home institution;
c) have paid all current and back fees at the home institution.
4. Students must meet all requirements as prescribed by the host university's regulations, deadlines, class capacities, and course prerequisites.
5. Registration is possible in courses at both the graduate and undergraduate levels, and in credit courses offered through distance education or other means. To be eligible, courses must be an integral part of the applicants' graduate degree program. Fee waiver is not permitted for audit or non-credit courses.
6. Students must have the Authorization Form approved by the relevant Department Head and the Faculty of Graduate Studies at the host institution at least two weeks prior to the commencement of the course(s) requested. The fee waiver is not available retroactively.
7. Students are subject to regulations of the home institution governing credit for the courses to be undertaken. As a condition of registration at the host institution, students will arrange for official transcripts from the host institution to be sent to the home institution confirming successful completion of courses selected.
8. Students must send confirmation of registration and notice of any change to the graduate Records Office of the home institution at the time of registration or course change is completed.
9. Students may not claim fee waivers under the terms of this Agreement for a period of more than 12 months total.
10. Each institution has its own regulations regarding the maximum number of transfer credits permitted in a given degree program.

Participating Universities
Athabasca University
University of Alberta
Brandon University

University of British Columbia
British Columbia Institute of Technology

Concordia University College of Alberta

University of Lethbridge
University of Manitoba

University of Northern British Columbia
University of Regina
Royal Roads University
University of Saskatchewan

Simon Fraser University

University of Victoria
University of Winnipeg

### 1.3 Course Classifications, General Classifications

Students who register through Aurora Student Information System (Aurora Student) must also have prior approval of the Department Head or designate. Students registering through Aurora Student should add only those courses that are a Major course in their program. Courses with Auxiliary " X ", Audit "A", or Occasional "O" status (see below) must be added by the department.

X Auxiliary course: Course is not a major requirement of the program
but is required by the student's advisor.**

A Audit course: Course is not taken for credit. No grade is recorded.

O Occasional course: Course is not a requirement of the program.
**Extra courses which are not actually part of the Master's or Ph.D. program but which are specified and required by the
student's advisor, may be classified as X (Auxiliary) and the grade will not be included in the degree GPA which appears on the transcript. However, $X$ course grades may be used in the calculation of the GPA for continuation in the program and a minimum grade requirement may be required for $X$ coursework by the Department. (Please consult the Departmental supplemental regulations.) Additionally, X courses are used in the calculation of the GPA for the purposes of Admission and Awards. (NOTE: The University of Manitoba Graduate Fellowship (UMGF) and International Graduate Student Scholarship (IGSS) use X courses in the calculation of the GPA.) The student's advisor and head of the unit must determine if there is a valid need for the registration in courses under the $X$ classification. $A$ maximum of 12 credit hours under the $X$ course classification is permitted while registered in a given program.

Note: Changes in course classifications are regarded as course/program changes and may not be made without approval (refer to the "Registration Revision" section of this Guide) or after the deadline dates for course changes as indicated in the Academic Schedule of the Calendar.

## Continuing Courses (CO)

For those graduate level courses (6000, 7000, and 8000) which are being taken by students enrolled in the Faculty of Graduate Studies and which continue beyond the normal academic term, the instructor shall recommend that a mark classification of "CO" be used until such time as a final grade can be established. If the course is not completed by August 31, the student must re-register for the course(s).

Graduate Level Courses (6000, 7000, and 8000) which extend beyond the normal academic term must be denoted as such in this Calendar.

In the absence of an assigned mark of " CO ", the student may receive a mark of "F" in that term.

## Note:

1. A CO will normally not be permitted longer than twelve months.
2. In exceptional circumstances, where a CO grade is requested for a second twelve months, at the time the CO grade is submitted on the examination register the instructor and Department head must also submit the
"Recommendation for Continuing Status of a Course" form stating the reason for the CO and the deadline by which the course must be completed.

## Incomplete Courses

Students who are unable to complete the term work prescribed in a course may apply to the instructor prior to the end of lectures for consideration of a grade classification of "Incomplete". It is understood that the student is to write the final examination if one is scheduled for the course.

## ACADEMIC CALENDAR 2012-2013 •

Taking into account the results of the final examination, the value of the term work completed, and the extent of the incomplete term work, the instructor shall calculate the temporary grade using a zero value for incomplete work.

Normally, the following maximum extensions are allowed:

For courses terminated in April, August $1^{\text {st }}$
For courses terminated in August, December $1^{\text {st }}$

For courses terminated in December, April $1^{\text {st }}$

If a final grade is not reported within one month of the extension deadline, the letter "I" will be dropped and the grade will remain as awarded. The student will no longer have an opportunity to improve the grade. In no case will the satisfaction of the incomplete requirements result in a lower grade being awarded.

### 1.4 Student Status/Categories of Students, Full-Time And Part-Time Students

A student is considered to be full-time if the student is planning to carry the normal academic load of the department during the registration period. Graduate students who do not meet the criteria specified for full-time students should complete the form "Request for Part Time Status."

This form must be approved by the department head and advisor and submitted to the Faculty of Graduate Studies prior to registration.

## Pre-Master's or Qualifying Students

In specific cases where the academic background of the student is judged to be insufficient for the given program in a unit, the department may recommend that the student be admitted to a pre-Master's program of study. The preMaster's program is designed to bring the student's standing to approximately the level of an Honours graduate in the major department, and to provide any necessary prerequisites for courses.

## Occasional Students

A student wishing to take graduate courses with no intention of applying those toward an advanced degree at the University of Manitoba is classed as an occasional student. Occasional students must meet the same degree and grade point average entrance requirements as regular graduate students and must write final examinations in the courses taken (unless audited), but will not receive credit toward a degree. In special circumstances, an occasional student may apply for permission to proceed to a degree program and also apply for transfer, for credit, of courses taken in the occasional category.

Note:

1 Transfer of courses from the "occasional category" to a degree program is not automatic: request for advance credit may be made within the first year of a degree program.
2. Fees paid by a student while registered as an occasional student are not transferable, at a later date, to a degree program.
3. Registration in the occasional student category can be for no more than one academic year without reapplication.
4. Graduate level course work must be taken while registered as an occasional student.

## Joint Masters (With The University of Winnipeg)

The University of Manitoba and the University of Winnipeg offer four joint Master's programs in History, Religion, Public Administration, and Peace and Conflict Studies. The University of Manitoba Faculty of Graduate Studies is responsible for the administration of the joint programs and students complete the regular University of Manitoba application and registration forms. Students taking preMaster's qualifying work for these programs register at the University where the courses are being taken.

## Visiting Students

Visiting students are students who are registered at another institution who are taking one or more courses at the University of Manitoba on a Letter of Permission from their home university.

## Provisional (Admission)

A new student is allowed provisional status in a program for up to one term from the time of registration. Registration for additional terms in that program will not be permitted until the provision is cleared. Provisional registration may be for such reasons as missing or incomplete documentation, lack of complete or appropriate academic background, etc.

## SECTION 2: Academic Performance General

Students are ultimately responsible for ensuring that they meet degree and program requirements. The advisor (co-advisor), advisory committee and the department must ensure that each student follows the guidelines and meets the program requirements. The Faculty of Graduate Studies performs a final check of program requirements for each student just prior to graduation. Students are cautioned, therefore, to check all regulations with respect to the degree requirements. Failure to meet all the requirements will result in failure to graduate.

## ACADEMIC CALENDAR

Any student re-registering in the period between receiving unsatisfactory grades and a decision by the Faculty of Graduate Studies on a deficiency does so at his/her own risk.

Departments may make recommendations with regard to the regulations concerning minimum academic performance; however, enforcement of academic regulations rests with the Faculty of Graduate Studies. The following procedures apply to recommendations made by departments:

The department is responsible for informing the Faculty of Graduate Studies when a student's performance is unsatisfactory in research or course work and the department must describe any recommended remedial action(s).

The department must notify the student of the deficiency and of their recommendation.

If the student fails to satisfy any remedial action recommended, the student will be required to withdraw from the program.

## Note:

When a graduate student is required to withdraw from a program of study, the notation on the academic record will be: "Required to withdraw". Voluntary withdrawal from a program is not permitted once the grades have been declared and indicate that the student has failed to achieve the required minimum.

Departmental recommendations will supersede student requests for voluntary withdrawal.

A student who has been required to withdraw from a graduate program at The University of Manitoba may be permitted to enrol in another graduate program only if the application for admission is approved by the Dean of Graduate Studies or designate.

## Academic Performance

Student progress shall be reported at least annually to the Faculty of Graduate Studies on the "Progress Report Form". Students who fail to maintain satisfactory performance may be required to withdraw on the recommendation by the Department head to the Dean of Graduate Studies.

## Performance in Course Work

A minimum degree grade point average (GPA) of 3.0 with no grade below $\mathrm{C}+$ must be maintained for continuance in the Faculty of Graduate Studies. Departments may specify, in their supplementary regulations, standards that are higher than those of the Faculty of Graduate Studies. Students who fail to maintain the specified grades will be required to withdraw unless a departmental remedial recommendation (as outlined below) is approved by the Dean of Graduate Studies.

A student may be permitted to remove deficiencies in grades by repeating the course or taking an equivalent substitute course only once for each course to a maximum of 6 credit hours of coursework. If a course is repeated or replaced, the highest grade obtained will be used in the determination of the degree grade point average.

## Note:

In exceptional circumstances, the major department may appeal to the Faculty of Graduate Studies for approval of remedial recommendation(s) falling outside those prescribed above.

Students receiving a grade of $C$ or less in more than 6 credit hours of coursework are required to withdraw.

In general, supplemental exams are not permitted to students in the Master's or Ph.D. program.

All actions taken administratively are to be reported, in summary form to the Faculty of Graduate Studies Executive Committee.

## SECTION 3: General Regulations - PreMaster's Admission and Requirements

Graduates of bachelor degree programs with a minimum grade point average (GPA) of 3.0 in the last two full years of university study will be considered for admission to a preMaster's program. These are the minimum requirements of the Faculty of Graduate Studies. Departments may specify higher or additional criteria. Admission to a pre-Master's program does not guarantee future admission to a Master's program. As the pre-Master's program of study is intended to bring a student's background up to the equivalent of the required 4-year degree, departments should assign to students, as part of their pre-Master's program of study, an appropriate number of applicable upper level ( 3000 or 4000 ) undergraduate courses. In exceptional circumstances and upon prior approval by the Graduate Dean, 7000 level courses may be considered for inclusion in the pre-Master's program of study for those students who hold a 4 year degree. Courses taken as part of the preMaster's program may not be transferred to a Master's program at a later date.

## Academic Performance

1. The department head or designate is responsible for assigning the courses and monitoring the progress of each student.
2. A minimum degree grade point average of 3.0 with no grade below $\mathrm{C}+$ must be maintained for continuance in preMaster's study. Students who fail to maintain this standing will be required to withdraw unless a departmental remedial

## 

## ACADEMIC CALENDAR 2012-2013 •

recommendation (as below) is approved by the Dean of Graduate Studies.
3. Students deficient in 6 hours of credit or less may be permitted to write a supplemental examination (when offered) in courses in which a grade of C or less was obtained.
4. Students deficient in 6 hours of credit or less with a grade of $C, D$, or $F$ in a course or courses may be permitted, if the overall average is $C$ or better, to write one supplemental examination in each course (when offered), to repeat the courses, or to take equivalent substitute courses.

Note: In exceptional circumstances, when a student is deficient in more than 6 credit hours, the student may be permitted to repeat the pre-Master's year or to write supplemental examinations (when offered) or to substitute equivalent course work in order to make up the deficiencies.

A student may be permitted to repeat the pre-Master's year only once, and to remove deficiencies in grades by writing supplemental examination or repeating courses only once for each course to a maximum of 9 credit hours of course work.

If a course is repeated or a supplemental examination is written, the highest grade obtained in that course will be used in the determination of the degree GPA.

The degree GPA is cumulative in a pre-Master's program if more than one year is required to complete the course requirements.

All action taken administratively is to be reported in summary form to the Faculty of Graduate Studies Executive Committee.

## SECTION 4: General Regulations - Master's Diploma Programs:

The regulations for the Master's program shall also prevail for diploma programs. Students should also consult the department supplemental regulations regarding diploma programs.

Individual departments may have additional regulations that supplement these general regulations. All such supplementary procedures and regulations must be approved as specified by the By-Laws of the Faculty of Graduate Studies, be published and available to students, and kept on file in the Faculty of Graduate Studies.

## Admission

Students who are eligible to be considered for direct admission to a program of study leading to the Master's degree include:

- Graduates of four-year undergraduate degree programs (or equivalent) from
a. Canadian institutions empowered by law to grant degrees; or
b. Colleges and universities outside Canada which are officially recognized by The Faculty of Graduate Studies.
- Graduates from first-cycle Bologna compliant degrees.
- Students who have completed the pre-Master's program from the University of Manitoba or from
a. Canadian institutions empowered by law to grant degrees; or
b. Colleges and universities outside Canada which are officially recognized by The Faculty of Graduate Studies.

All students applying for a Master's degree program must have attained a minimum GPA of 3.0 in the last two full years ( 60 credit hours) of study. This includes those applying for direct admission and those entering from a pre-Master's program. Students who meet the minimum requirements for admission to the Faculty of Graduate Studies are not guaranteed admission.

The pre-Master's program is designed to bring the student's standing to the approximate level of an Honours graduate in the major department, and to provide the student with any necessary prerequisites for courses to be taken in the Master's program.

In specific cases where the academic background of the student is judged to be insufficient for the given program in a unit, the department may recommend that the student be admitted to a pre-Master's program of study.

## Student's Advisor/Co-Advisor

Each Master's student should have an advisor upon entry into the program, and must have one assigned no later than one term following registration. The advisor is approved by the Department Head, must be a member of the Faculty of Graduate Studies, be active in research, have expertise in a discipline related to the student's program, and hold at least a Master's degree or equivalent. Any exceptions or special circumstances must be recommended by the Head of the major department and approved by the Dean of the Faculty of Graduate Studies. It is the responsibility of the Department Head to determine whether faculty members meet these criteria, and also to report on equivalency as necessary. In special circumstances, an advisor and coadvisor upon approval of the Department Head may advise a student.* The advisor and co-advisor must be members of the Faculty of Graduate Studies. (Refer to Academic Membership at
http://umanitoba.ca/faculties/graduate_studies/admin/131.ht ml .)

## 

ACADEMIC CALENDAR 2012-2013 >

The advisor will advise the student on a program of study, direct research, and supervise the thesis or practicum work. In departments where the choice of thesis/practicum topic and thesis/practicum advisor are postponed for some time after a student's entry into the program, the Department Head shall appoint a faculty member to advise the student in the interim period before the regular advisor is assigned or chosen.
*Note: When an advisor and co-advisor are assigned, together they shall fulfill the role of the advisor (that is, neither shall fulfill any other advisory or examining committee membership requirements). The co-advisors will usually be identified together at the beginning of a student's program. However, in some circumstances the need for a co-advisor may arise mid-way through a student's program. In all instances the Faculty of Graduate Studies must be informed of the co-assignment. One advisor must be identified as the primary advisor; however, both co-advisors' signatures are required on all documents where the advisor's signature is required.

## Advisory Committee (Master's)

In those departments that specify that a Master's advisory committee is required, the committee must consist of at least one person who holds a primary appointment from within the major department. Additional specifications regarding the advisory committee are found in the departmental supplemental regulations.

## Program Requirements

All students must complete one of the following programs of study for the Master's degree (unless otherwise specified in the approved departmental supplemental regulations):

## Thesis/Practicum Route:

A minimum of 12 credit hours of course work plus a thesis or practicum. The minimum must include at least 6 credit hours at the 7000 level with the balance of the coursework at the 3000 level or above. A maximum of 24 credit hours of coursework is allowed toward the thesis/practicum based Master's program.*

## Comprehensive Examination Route:

A minimum of 24 credit hours of course work and comprehensive examination(s). The minimum must include at least 12 credit hours at the 7000 level or above with the balance of the coursework at the 3000 level or above, or, in exceptional circumstances, and upon approval of the Dean of the Faculty of Graduate Studies, the 2000 level. A maximum of 48 credit hours of coursework is allowed toward the comprehensive examination based Master's program.*
*Unless professional accreditation requirements or existing supplemental regulations indicate otherwise.

## Notes:

The program of study is determined by the major department and may include requirements in addition to those specified above. All departmental supplemental regulations require prior approval of the Faculty of Graduate Studies.

For historical reasons, the following thesis/practicum based programs are subject to the same min/max credit hour restrictions as for the comprehensive-based Master's: Master of Nursing, Master of Architecture, Master of City Planning, Master of Landscape Architecture, Master of Natural Resource Management.

## Language Reading Requirements

Some departments specify a language requirement for the Master's degree. Students are advised to check departmental supplemental regulations regarding this requirement.

## Advance Credit

Advance credit for courses completed prior to admission to a Master's program will be considered on an individual basis. The student's major department makes the request to the Faculty of Graduate Studies by completion of the "Recommendation for Advance Credit (Transfer of Courses)" form.

## Note:

Application for advance credit must be made within the first year of the program (see Lapse of Credit of Courses in this section).

No more than half of the required course work for the program can be given advance credit.

A course may not be used for credit toward more than one degree, diploma or certificate.

For thesis-/practicum-oriented programs the student must complete the thesis/practicum at The University of Manitoba.

For the comprehensive examination route, the student must complete the comprehensive examination(s) at The University of Manitoba.

Regardless of the extent of advance credit received, all students are required to pay the program fee.

## Transfer Credit

Courses within a program of study may be taken elsewhere and transferred for credit at The University of Manitoba. Courses must be approved for transfer to the program of study by the major department and the Faculty of Graduate Studies before the student may register for them. This permission is granted in the form of a Letter of Permission, which may be obtained by making application to the Registrar's Office.

## ACADEMIC CALENDAR

Transfer credit (courses taken at other universities while registered in a program at The University of Manitoba) is granted as follows: For Master's students, transfer credit must not exceed $50 \%$ of the minimum credit hours of coursework required for the program.

Note: Students seeking a Master's degree from The University of Manitoba must complete at least 50\% of their required program coursework at The University of Manitoba.

## Minimum Time Requirement

The minimum time for students in the Master's program is equivalent to two terms. Most departments require more than this.

## Maximum Time Limits

The maximum time allowed for the completion of the Master's degree except where indicated in specific units is as follows:

Note: Each department may have supplementary regulations for maximum time limits.

2 years: Master of Laws

3 years: Master of Occupational Therapy (accelerated program).

4 years: Master of Physician Assistant Studies

6 years: Master of Business Administration, Master of Public Administration, Master of Education, Master of Nursing, Master of Social Work and Master of Engineering.

5 years: All other Master's degree and diplomas
Recommendations for extensions of time to complete the degree will be considered on an individual basis and must be approved by the Dean of Graduate Studies at least four months prior to expiration of the respective maximum time limit.

Note: A student who has not completed the degree requirements within the time limit or within the time limit of the extension (see also sections: "Extension of Time to Complete Program of Study" and "Leave of Absence") will be required to withdraw from the Faculty of Graduate Studies and the notation on the student record will be "Required to withdraw: time to complete program expired".

## Lapse of Credit of Courses

Courses completed more than eight years prior to the date of awarding of a degree may not normally be used for credit toward that degree.

## Academic Performance

Student progress shall be reported at least annually to the Faculty of Graduate Studies on the "Progress Report Form". Students who fail to maintain satisfactory performance may be required to withdraw on the recommendation by the Department Head, to the Dean of Graduate Studies.

## Performance in Coursework

A minimum degree grade point average of 3.0 with no grade below C+ must be maintained for continuance in the Master's program. Students who fail to maintain this standing will be required to withdraw unless the Dean of Graduate Studies approves a departmental remedial recommendation (refer to the section: Academic Performance - General).

## Performance not related to Coursework

Students are required to demonstrate satisfactory academic performance in areas not related to performance in courses, such as attendance at or participation in course lectures, seminars and in laboratories and progress in research, thesis or practicum. The specific nature of satisfactory academic performance is outlined in the departmental Supplementary Regulations and must be reported to the Faculty of Graduate Studies on the "Progress Report
Form". Students who fail to maintain satisfactory performance may be required to withdraw on the recommendation of the Department Head to the Dean of the Faculty of Graduate Studies.

## Course or Program Changes

Students are not permitted to change their program of study, including withdrawal from individual courses, without the approval of their advisor and/or advisory committee and Department Head. Withdrawal from courses or changes of course category (i.e., grade mode) without such approval will result in the student being required to withdraw from the Faculty of Graduate Studies.

## Deadlines For Graduation

The final requirements of the degree, in the form of the final report on the thesis/practicum (and the corrected copies of the thesis/practicum); comprehensive examination; or M.
Eng. Project, must be submitted to the Faculty of Graduate Studies by the appropriate deadline. For those programs that do not have a culminating exercise
(thesis/practicum/comprehensive examination/M.Eng. project) the unit must forward potential graduate names to the Faculty of Graduate Studies by the deadline. The deadline for each of the graduation dates is published in the Academic Schedule of the Graduate Calendar. Extensions to these deadlines will be considered in exceptional circumstances only.

## Academic Requirement for Graduation

A cumulative degree grade point average of 3.0 or greater is required in those courses that constitute the program of study for graduation in the Faculty of Graduate Studies.

## Comprehensive Examination

The regulations governing comprehensive examinations, where required, are specified in the supplementary regulations of the major department. No student may sit for those examinations more than twice. The results of the comprehensive examinations shall be submitted to the Faculty of Graduate Studies on the appropriate form in the terms "pass" or "fail."

Note: Any student who receives a "fail" on the comprehensive examination twice will be required to withdraw from the Faculty of Graduate Studies.

## Thesis Proposal/Practicum Plan

Each student is required to develop a thesis proposal/practicum plan in his or her chosen field of study. Normally, the thesis is developed under the mentorship of the advisor/co-advisor. The advisor/advisory committee/Department Head/grad chair must formally approve the thesis proposal. (Each department may have specific guidelines regarding the thesis proposal). Research involving human or animal subjects requires ethical approval prior to initiation of research. Please refer to the appropriate ethics review committee.

### 4.1 Thesis and Practicum Regulations, General

Students must demonstrate their mastery of the field and that they are fully conversant with the relevant literature through their thesis.

## Practicum versus thesis:

While the practicum differs from the thesis in its emphasis on the application of theory, it is similar in scope, span, and rigor. The weight of work required for the practicum is equal to that required for the Master's thesis. In general, the practicum takes the form of an exercise in the practical application of knowledge and skill. It usually involves the careful definition of a problem, the application of appropriate knowledge and skills to the problem, and a report of the results in a manner suitable for evaluation by an examining committee. The requirements are specified by the departments concerned.

## Style and format:

The thesis/practicum must be written according to a standard style acknowledged by a particular field of study and recommended by the major department, be lucid and well written, and be reasonably free from typographical and other errors.

The electronic and paper copies of the thesis/practicum must be submitted in good, clear type. As long as the copies are clearly legible, the thesis/practicum may be reproduced by a method that is presented in the thesis guidelines which are
available on the Faculty of Graduate Studies website: http://umanitoba.ca/faculties/graduate_studies/. Minimum left margin is 3.8 cm ( 1.5 inches), other margins are 2.5 cm (1 inch). Wherever possible, these margins should be adhered to for illustrative materials. Minimum paper weight of the paper copy is 16 lb . Bond or equivalent.

Deadlines and Details for submissions of final copies:

The Academic Schedule in the Graduate Calendar should be consulted regarding dates by which theses/practica must be submitted.

Following the approval of the thesis/practicum by the examining committee and the completion of any revisions required by that committee, the thesis, and where applicable, the practicum, must be submitted to the Faculty of Graduate Studies as follows:

One paper copy in unbound form, enclosed in an envelope or folder; and

One digital version submitted as an e-thesis at the MSpace website:

## https://mspace.lib.umanitoba.ca/index.jsp

The e-thesis is the official copy. Students are encouraged to review the e-thesis submission requirements prior to creating a digital version. Electronic multimedia files or accompanying files that are part of an e-thesis should be posted to MSpace as separate files.

The paper copy will become a circulating copy. Where possible, the contents of the official electronic version must be replicated in the paper copy.

Both digital and paper copies of the thesis/practicum are required for the University Library and remain the property of the University of Manitoba.

### 4.2 Thesis/Practicum Examination Procedures, Examining Committee

The student's advisor will recommend a suggested thesis/practicum examining committee to the Department Head for approval, which shall then be reported to the Faculty of Graduate Studies Office on the "Master's Thesis/Practicum Title and Appointment of Examiners" form. The committee must consist of a minimum of three examiners. At least two examiners must be members of the Faculty of Graduate Studies. One examiner must hold a primary appointment from within the major department and one examiner must be external to the department. All examiners must be deemed qualified by the Department Head and willing to serve.

Note: The external member should be considered arm's length to the department. While the definition of "arm's length" is left to the discretion of the department, be advised

## 

ACADEMIC CALENDAR
that justification may be required by the Faculty of Graduate Studies for this selection.

## Distribution and Examination

The head of the major department will arrange for the distribution of the thesis/practicum to the examiners and will notify the Faculty of Graduate Studies Office at the time that the thesis/practicum has been distributed for examination. It is the duty of all examiners to read the thesis/practicum and report on its merits according to the following categories:

Acceptable without modification or with minor revision(s)

Acceptable subject to modification and/or revision(s)

## Not acceptable

## Note:

1. The examining process should be completed within one month of distribution of the thesis/practicum.
2. A student has the right to an examination of the thesis/practicum if he/she believes it is ready for examination.

## Oral Examination

Normally, students must pass an oral examination on the subject of the thesis/practicum and matters relating thereto. The form of the oral examination will be as prescribed by the Supplementary Regulations of the major department. The oral examination shall be open to all members of The University of Manitoba community except in exceptional cases. The oral examination may be closed, for example, when the results of the thesis/practicum research must be kept confidential for a period of time. In such cases, the examining committee and Department Head shall recommend such action to the Dean of Graduate Studies who shall then approve that the final examination be closed to all but the examining committee and the Dean of Graduate Studies (or designate). It is expected that all members of the examining committee be present at the defense.

## Final Approval/Rejection

Following completion of the examination of the thesis/practicum, examiners will consider the oral examination and the written thesis/practicum to determine the nature of and procedures for approval of any revisions that will be required prior to submission to the Faculty of Graduate Studies. The advisor is normally responsible for ensuring that revisions are completed according to the instructions from the examining committee. The Faculty of Graduate Studies will accept the thesis/practicum only when the required revisions have been completed.

Note: A student will be required to withdraw when the Master's thesis or practicum has been rejected twice at the stage where:
a) The examining committee reports on the merits of the written thesis;
b) The defense; or
c) A combination of both stages.

## Final Report

The judgement of the examiners shall be reported to the Faculty of Graduate Studies in the qualitative terms "approved" or "not approved". Such verdicts must be unanimous, and each examiner must indicate, by his/her signature, concurrence with the verdict. Anything less than unanimity shall be considered a failure. In the case of a failure for the thesis/practicum at the Master's level a detailed written report will be prepared by the Chair and submitted to the Faculty of Graduate Studies, who will make the report available to the candidate and advisor.

The candidate will be recommended for the Master's degree upon receipt by the Faculty of Graduate Studies of favorable results of the thesis or practicum examining committee and when the corrected copy of the electronic version of the thesis/practicum is submitted to MSpace and corrected copy of the paper version of the thesis/practicum is submitted to the Faculty of Graduate Studies, providing all other degree requirements have been satisfied.

### 4.3 Publication and Circulation of Thesis/ Practicum,

 Every graduate student registering in a thesis/practicum Master's program at The University of Manitoba shall be advised that, as a condition of being awarded the degree, he/she will be required to grant a license of partial copyright to the University and to the Library and Archives Canada for any thesis or practicum submitted as part of their degree program.Note: This license makes the thesis/practicum available for further research only. Publication for commercial purposes remains the sole right of the au-thor.

The forms and conditions pertaining to these license agreements are avail-able at the Faculty of Graduate Studies Office. Note that this and other related regulations may give rise to important questions of law, and students may need additional legal advice on the copyright laws of Canada and/or other countries. Students who wish to obtain legal advice concerning their subsequent rights are advised to do so prior to signing the agreements. Signing of the license agreements is normally done after the contents of the thesis/practicum have been delineated and the importance of copyright and/or patents fully comprehended.

Publication in the above manner does not preclude further publication of the thesis or practicum report or any part of it in a journal or in a book. In such cases, an

## ACADEMIC CALENDAR

acknowledgement that the work was originally part of a thesis or practicum at The University of Manitoba should be included.

## Notes:

Copyright - Copyright in theses and practica is protected in international copyright law. A copyright symbol © or (c) is incorporated on a page con-taining statements of permission to microfilm and to lend copies of the the-sis or practicum. After completion, this page should be inserted in the thesis/practicum immediately following the title page. Blank copies of this page are available from the Faculty of Graduate Studies Office.

Patents -Refer to the section "Policy of Withholding Theses Pending Pat-ent Applications" in this Guide.

Restriction of theses or practica for publication - In exceptional cases, not covered by the regulation concerning patents, where adequate cause can be shown to delay publication, the student may request the Dean of Graduate Studies to restrict access, for a period up to one year after submission, of the digital and unbound paper versions of a thesis or practicum submitted to The University of Manitoba. The Dean, in consultation with the student's advisor, shall determine for what period, if any, access will be so restricted.

Library and Archives Canada - A microfiche of the thesis is forwarded to the Library and Archives Canada and is listed in a monthly and annual national bibliography, 'Canadiana', which is published by the National Li-brary.

## SECTION 5: General Regulations - Ph.D. FOR FACULTY-BASED PH.D PROGRAMS, THE DEAN OR DESIGNATE IS THE DE FACTO DEPARTMENT HEAD.

The degree of Doctor of Philosophy is granted only upon evidence of general proficiency and of distinctive attainment in a special field. In particular, a recognized ability for independent investigation must be demonstrated by the candidate in a thesis which embodies original research or creative scholarship and is presented with a high degree of literary skill. It is a research degree and is never conferred solely as a result of coursework study.

These general regulations apply to all students in all departments. Individual departments may have procedures and regulations that supplement these general regulations. All such procedures and regulations must be consistent with these general regulations, approved as specified by the ByLaws of the Faculty of Graduate Studies, published and available to students, and kept on file in the Faculty of Graduate Studies.

## Admission

Normally, a Master's degree or equivalent from a recognized university and a cumulative GPA of 3.0 or equivalent in the last two previous years of full time university study ( 60 credit hours) is the minimum requirement for admission to the Ph.D. program. With special recommendation of the department concerned (please see below), applicants with an honours Bachelor's degree may be considered for entry to Ph.D. study.

## Direct Admission from the Bachelor's Honours or equivalent

Students to be considered for admission to a Ph.D. program directly from the honours Bachelor's degree or equivalent must be outstanding in their academic background (GPA well above 3.0 in the last two full years of undergraduate study). Once admitted, these students must complete at least 24 credit hours of course work and will be assessed Ph.D. fees for 3 years.

## Transfer from the Master's to the Ph.D. program

Students who have not completed a Master's program may transfer to the Ph.D. program within the same department upon recommendation to the Faculty of Graduate Studies by the student's major department. The recommendation must be made within 24 months of the student's commencement of the Master's program. The coursework completed in the Master's program would normally become a part of the Ph.D. program, and the number of years spent in the Master's program would be counted as years in the Ph.D. program. Students must complete at least 24 credit hours of coursework. If the transfer occurs within 12 months of the initial registration in the Master's program, the student will be assessed Ph.D. fees for 3 years. If the transfer occurs after 12 months, the student will be assessed Ph.D. program fees for 2 years (as they will have already paid fees for the Master's program). Students are cautioned that such transfers may impact on the University of Manitoba Graduate Fellowship duration. The request to transfer from the Master's to the Ph.D. program must be submitted to the Faculty of Graduate Studies at least one month prior to the term for which the student intends to commence the Ph.D. program. The following are required when making the request: The "Application for Admission" form (and application fee); "Ph.D. Selection Committee Report" form, and; in the case where the student does not hold a Master's degree, a memo from the Department Head.

Note: Where a student with a Master's degree or equivalent is initially admitted and registered in a Master's program, that student may be transferred to the Ph.D. program within the same department on recommendation from the student's advisor and Department Head, provided the recommendation is made at the time of admission to the Master's Program (i.e. "Possible transfer to Ph.D. Program within 12 months") and the follow up transfer recommendation occurs within 12 months of the initial registration in the Master's program. In such a case, the application fee is waived and fees assessed towards the Master's program will be deducted from the full 2 years of Ph.D. program fees.

Provisional Admission to the Ph.D.

## ACADEMIC CALENDAR

Students nearing completion of the Master's degree may be accepted provisionally to the Ph.D. program for a 12 month period (commencing with the first registration in the Ph.D. program). Further registration in the Ph.D. program is contingent upon completion of all requirements of the Master's degree within the 12 months.

Note: Students must maintain continuous registration in their Master's program until completion. Students will require assistance from the department or the Faculty of Graduate Studies to complete dual registration in the Master's and Ph.D. program simultaneously.

## Selection Committee

Upon receipt of an application, the head of the major department will appoint a selection committee of at least three persons to evaluate the student's qualifications and report on his/her suitability for Ph.D. study. In making admission decisions, departments may also consider such things as the availability of facilities and financial assistance. If acceptance is recommended by the selection committee and approved by the head of the department and the Dean of the Faculty of Graduate Studies, the Faculty of Graduate Studies sends a letter of acceptance to the applicant.

## Student's Advisor/Co-Advisor

Every Ph.D. student must have an advisor, appointed by the Department Head, whose duties will be to advise the student on a program and courses, direct research, and supervise thesis work. The advisor must be a member of the Faculty of Graduate Studies, be active in research, have expertise in a discipline related to the student's program and hold a Ph.D. or equivalent. In special circumstances, an advisor and coadvisor, upon approval of the Department Head may advise a student.* The co-advisor must be a member of the Faculty of Graduate Studies. It is the responsibility of the Department Head to determine whether faculty members meet these criteria, and to report on equivalency as necessary.

The student's advisor also acts as a channel of communication to the student's advisory committee, the major department, and the Faculty of Graduate Studies. Usually the student and the advisor choose to work together by mutual agreement. In departments where the choice of thesis topic advisor are postponed for some time after entry into the program, the Department Head or the selection committee shall appoint a faculty member to advise the student as to the rules and regulations and on a program and course requirements in the interim period not to exceed eighteen months before a permanent advisor is chosen.
*Note: When an advisor and co-advisor are assigned, together they shall fulfill the role of the advisor (that is, neither shall fulfill any other advisory or examining committee membership requirements). The co-advisors will usually be identified together at the beginning of a student's program. However, in some circumstances the need for a co-advisor may arise mid-way through a student's program. In all instances the Faculty of Graduate Studies must be informed of the co-assignment. One advisor must be
identified as the primary advisor; however, both co-advisors' signatures are required on all documents where the advisor's signature is required.

## Program of Study

As soon as possible but no later than 24 months after a student has commenced the program, the student's program of study, which includes information about the minimum time for completion of the degree, course work to be taken, foreign language requirement, and the research area in which the thesis will be done, should be forwarded to the Faculty of Graduate Studies. The program of study and any changes thereto must be approved by the student's advisor, and the advisory committee and the head of the major department. The approval of the student's advisor and the head of the major department are sufficient for registration.

## Advisory Committee

The Head of the major department is responsible for the establishment of an advisory committee for each Ph.D. student. The advisory committee must consist of a minimum of three members of the Faculty of Graduate Studies, one of whom must hold a primary appointment from within the major department and one of whom must hold a primary appointment outside the major department. Committees may include one guest member who has expertise in a related discipline but is not a member of the Faculty of Graduate Studies. The membership of the committee, including the advisor, as well as any changes to it, must be approved by the Dean of Graduate Studies. The advisor is the Chair of the advisory committee.

Responsibilities of the committee are to approve the program of study and thesis proposal and to exercise general supervision over the student's work throughout the Ph.D. program. The committee should meet with the student periodically (and must meet with the student at least once a year) to review the student's progress and to report this progress to the Faculty of Graduate Studies (through the Head of the major department). (In the situation where a Ph.D. Advisory Committee or responsible individual(s) would not normally be established until the candidacy exam is completed then at least one responsible individual will meet with the student.) If there is evidence of unsatisfactory performance, the student may be required to withdraw.

## Program Requirements

All students must complete one of the following programs of study for the Ph.D. degree (unless otherwise specified in the approved departmental supplemental regulations): Where admission to the Ph.D. is directly from a Master's degree, a minimum of 12 credit hours at the 7000 level or higher plus a thesis is required. Any further coursework beyond the minimum 12 credit hours at the 7000 level must be at the 3000 level or above. For those students who hold a Master's degree, a maximum of 24 credit hours of course work is allowed toward the Ph.D. program.*

Where admission to the Ph.D. is directly from an Honours Bachelor degree or equivalent, a minimum of 24 credit hours

## 

## ACADEMIC CALENDAR 2012-2013 •

plus a thesis is required. The coursework must include a minimum of 18 credit hours at the 7000 level or higher with the balance of the coursework at the 3000 level or above. For those students who do not hold a Masters degree, a maximum of 48 credit hours of course work is allowed toward the Ph.D. program.*
*Unless professional accreditation requirements and supplemental regulations indicate otherwise.

NOTE: The program of study is determined by the major department and may include requirements in addition to those specified above. All departmental supplemental regulations require prior approval of the Faculty of Graduate Studies.

## Language Reading Requirements

Some departments specify a language requirement for the Ph.D. degree. Students are advised to check departmental supplemental regulations regarding this requirement.

## Advance Credit

Advance credit for courses completed prior to admission to a Ph.D. program will be considered on an individual basis. The student's major department makes the request to the Faculty of Graduate Studies by completion of the "Recommendation for Advance Credit (Transfer of Courses)" form.

## Note:

1. Application for advance credit must be made within the first year of the program (see Lapse of Credit of Courses in this section).
2. No more than half of the required course work for the program can be given advance credit.
3. A course may not be used for credit toward more than one degree, diploma or certificate.
4. The student must register at The University of Manitoba for one academic year as a full-time student and must also complete the thesis at The University of Manitoba.
5. Regardless of the extent of advanced credit received, all students are required to pay the program fee.

## Transfer Credit

Courses within a program of study may be taken elsewhere and transferred for credit at The University of Manitoba, but all such courses must be approved for transfer to the program of study by the major department and the Faculty of Graduate Studies before the student may register for them. This permission is granted in the form of a Letter of Permission which may be obtained by making application to the Registrar's Office.

Transfer credit (courses taken at other universities while registered in a program at The University of Manitoba) is to be granted as follows: For Ph.D. students transfer credit must not exceed $50 \%$ of the minimum credit hours of coursework required.

Note: Students seeking a Ph.D. degree from The University of Manitoba must complete at least $50 \%$ of their required program coursework at The University of Manitoba.

## Minimum Time Limit

The minimum time requirement for the program of study for the degree will normally be two years of study beyond the level of the Master's degree, or three years beyond the level of a Bachelor's degree. The student may be permitted to spend one of these years in an approved program of research or study elsewhere. Such permission must be approved by the Dean of Graduate Studies on the recommendation of the student's advisory committee.

## Maximum Time Limit

A student's candidature shall lapse if he/she fails to complete the degree within seven years following initial registration in the Ph.D. program. For those students who transfer from the Master's to the Ph.D., years spent in the Master's program are counted as years in the Ph.D. program. Recommendations for extensions of time to complete the degree will be considered on an individual basis and must be approved by the Dean of Graduate Studies.

Note: A student who has not completed the degree requirements within the time limit or within the time limit of the extension (see also sections "Extension of Time to Complete Program of Study" and "Leave of Absence") will be required to withdraw from the Faculty of Graduate Studies and the notation on the student record will be "Required to withdraw: Time to complete program expired".

## Residence Requirement

Two residence periods at The University of Manitoba devoted to full-time graduate study, subsequent to admission into the Ph.D. program, are required of all students. (For the purposes of the Residence Requirement one residence period is Fall Term, Winter Term or Summer Term (May August) combined.) The student shall be geographically available to visit the campus regularly during these residence periods.

Note: The purpose of the residency is to ensure that Ph.D. students have an opportunity to work within the stimulating environment provided by contact with a cohort of dedicated peers and professors in a chosen field of study, and also to enhance the breadth and depth of their graduate experience by being part of a broader university culture.

Note: Students may not retain the status of full-time while employed full-time without prior permission of the Dean of
the Faculty of Graduate Studies and recommendation from the major department.

## Lapse of Credit of Courses

Courses completed more than eight years prior to the date of awarding of a degree may not normally be used for credit toward that degree.

## Academic Performance

Student progress shall be reported at least annually to the Faculty of Graduate Studies on the "Progress Report Form". Students who fail to maintain satisfactory performance may be required to withdraw on the recommendation by the Department Head, upon receiving input from the advisory committee, to the Dean of Graduate Studies.

## Performance in course-work

A minimum degree grade point average of 3.0 with no grade below C+ must be maintained for continuance in the Ph.D. program. Students who fail to maintain this standing will be required to withdraw unless the Dean of Graduate Studies approves a departmental remedial recommendation (refer to the section: Academic Performance - General).

## Performance not related to course work

Students may also be required to withdraw from their Ph.D. program for reasons of unsatisfactory performance other than those related to failing grades. These include, but are not restricted to, such things as unsatisfactory attendance and lack of progress in research and/or thesis. The student's advisory committee will make a recommendation for required withdrawal to the Department Head. The Department Head will then recommend to the Dean of the Faculty of Graduate Studies that the student be required to withdraw for reasons of unsatisfactory academic performance.

## Course or Program Changes

Students are not permitted to change their program of study, including withdrawal from individual courses, without the approval of their advisor and/or advisory committee and Department Head. Withdrawal from courses or changes of course category without such approval will result in the student being required to withdraw from the Faculty of Graduate Studies.

## Deadlines for Graduation

The final requirements of the degree, in the form of the final report on the thesis (and the corrected copies of the thesis) must be submitted to the Faculty of Graduate Studies by the appropriate deadline. The deadline for each of the graduation dates is published in the Academic Schedule of the Graduate Calendar. Extensions to these deadlines will be considered in exceptional circumstances only.

## Academic Requirement for Graduation

A cumulative degree grade point average of 3.0 or greater is required in those courses that constitute the program of study for graduation in the Fac-ulty of Graduate Studies.

## Candidacy Examination

While the format and content of the candidacy exam will vary from unit to unit, the purposes of the candidacy exam in doctoral programs is to determine the student's competence in the discipline with respect to understanding and absorbing a broad spectrum of material, and then researching, identifying, analysing, synthesizing, and communicating ideas about that material in depth.

At the time specified by the advisory committee, normally within the first two years of the Ph.D. program but in no case later than one year prior to expected graduation, the student must successfully complete the formal candidacy examination. The format of the candidacy examination may vary with the department.

1. The examination is conducted according to a procedure established by the major department and approved by the Guidelines and Policy Committee of the Faculty of Graduate Studies.
2. This exercise is independent from the Thesis Proposal exercise.
3. The examination procedure must be made known to the students.
4. The Dean of Graduate Studies must be informed whether the candidate has passed or failed the candidacy examination (on the "Report on Ph.D. Candidacy Examination" form).
5. Students must be provided with feedback on their performance and access to the reasons for the pass/fail.
6. A pass decision of the examiners must be unanimous.
7. Any student who fails the candidacy examination twice will be required to withdraw from the Faculty of Graduate Studies.
8. On successful completion of this examination, the student will be considered a candidate for the Ph.D. degree.

## Thesis Proposal

The proposed thesis research must be approved by the advisory committee and, if appropriate, by the Research Ethics Review Committee before the work has begun on the thesis research or project.

A written thesis proposal must contain the research planned for the program and must be approved by the advisory committee. In order to approve the proposal the whole committee must meet as a committee. Approval of the completed thesis proposal must be documented on the Progress Report form and Ph.D. Thesis Proposal form and forwarded to the Faculty of Graduate Studies within 24 months of the student's initial registration in the program. Some departments may have specific procedures in place for approval of thesis proposals and students are advised to consult their departmental office. This exercise is independent from the candidacy examination exercise.

### 5.1 Thesis Regulations: Ph.D. General

An essential feature of Ph.D. study is the candidate's demonstration of competence to complete a research project and present the findings. The thesis must constitute a distinct contribution to knowledge in the major field of study and the material must be of sufficient merit to be, in the judgement of the examiners, acceptable for publication.

## Style and format:

The thesis must be written according to a standard style acknowledged by the particular field of study and recommended by the major department, be lucid and well written, and be reasonably free from typographical and other errors.

The electronic and paper copies of the thesis must be submitted in good, clear type. As long as the copies are clearly legible, the thesis may be reproduced by a method that is presented in the thesis guidelines which are available on the Faculty of Graduate Studies website:
http://umanitoba.ca/faculties/graduate_studies/. Minimum left margin is 3.8 cm ( 1.5 inches), other margins are 2.5 cm (one inch). Wherever possible, these margins should be adhered to for illustrative materials. Minimum paper weight of the paper copy is 16 lb . Bond or equivalent.

Policies and procedures for the inclusion of published papers within the doctoral theses are governed by the supplementary regulations of individual departments. The following are the general policies and procedures of the Faculty of Graduate Studies:
-The candidate's specific contribution to each paper (in case of multiple-authored papers) must be clearly indicated;
-An abstract, full introduction, and conclusions must be included;
-Where more than one manuscript is included, connecting text and common abstracts, introduction, and conclusions must be included;
-There must be adherence to all other requirements as outlined in thesis guidelines.

## Deadlines and Details for submission of final copies:

The Academic Schedule in the Graduate Calendar should be consulted regarding dates by which theses must be submitted.

Following the approval of the thesis by the examining committee and the completion of any revisions required by that committee, the thesis must be submitted to the Faculty of Graduate Studies as follows:

One paper copy in unbound form, enclosed in an envelope or folder; and

One digital version submitted as an e-thesis at the MSpace website:
https://mspace.lib.umanitoba.ca/index.jsp

The e-thesis is the official copy. Students are encouraged to review the e-thesis submission requirements prior to creating a digital version. Electronic multimedia files or accompanying files that are part of an e-thesis should be posted to MSpace as separate files.

The paper copy will become a circulating copy. Where possible, the contents of the official electronic version must be replicated in the paper copy.

Both digital and paper copies of the thesis are required for the University Library and remain the property of the University of Manitoba.

### 5.2 Thesis Examination Procedures Final Examination For The Ph.D. Degree

Once the thesis along with the "Ph.D. Thesis Title and Appointment of Examiners" form is submitted to the Faculty of Graduate Studies, the final examination for the Ph.D. degree proceeds in two stages:

1. Examination of the candidate's thesis. Prior to the examination of the thesis, the advisor shall furnish a written statement that, in his/her opinion, the thesis is (or is not) ready to be examined by completing the "Ph.D. Thesis Title and Appointment of Examiners" form.
2. Oral examination of the candidate on the subject of the thesis and any matters relating thereto.

Note: A candidate has the right to an examination of the thesis if he/she believes it is ready for examination.

## 

ACADEMIC CALENDAR

A thesis may not be formally submitted for examination more than twice.

## Formation of the Examining Committee

## University of Manitoba (Internal) Examiners:

The advisory committee chair, in consultation with committee members, will recommend to the head of the major department the names of at least three internal thesis examiners, to be forwarded to the Dean of Graduate Studies for approval. These names shall include the student's advisor and two other persons, one of whom must hold a primary appointment within the major department and one of whom must hold a primary appointment outside the major department. All internal examiners must be members of the Faculty of Graduate Studies. In normal circumstances these internal examiners will be members of the student's advisory committee.

## External examiner:

A distinguished scholar with particular experience in the field of the thesis research shall be chosen as the external examiner. The student's advisory committee shall make the selection, and the advisor should then make an informal inquiry as to the prospective external examiner's willingness to serve. If so, a nomination is then made by the head of the major department to the Dean of Graduate Studies. The external examiner must be from outside The University of Manitoba and the Dean of Graduate Studies makes the formal invitation to the external examiner.

Note: The external examiner should: hold a Ph.D.; hold an appointment with a recognized university or be a recognized scholar in their field; have no affiliation with the student or the advisor. The external must be considered at arm's length to the department and the University of Manitoba. While the definition of "arm's length" is left to the discretion of the department, be advised that justification may be required by the Faculty of Graduate Studies for this selection.

## Changes in the examining committee:

The Dean of the Faculty of Graduate Studies must also approve changes in the membership of the examining committee. No changes shall be made in the examining committee after the thesis is distributed by the Faculty of Graduate Studies to the committee for examination.

Note: Should the thesis not be submitted for examination within 12 months after the appointment of the examining committee, the committee appointment will lapse and a new appointment shall be necessary.

## Distribution of the Thesis For Examination

Sufficient copies for distribution to each member of the examining committee must be submitted to the Faculty of Graduate Studies in unbound form, with each set enclosed in a separate envelope or folder. Each copy must be
prefaced by an abstract of the thesis which includes the title, the author's name, and a brief summary of the results. It must be in a form acceptable to the student's advisor.

Note: It is the responsibility of the Faculty of Graduate Studies to distribute the thesis to all of the examiners.

## Responsibilities of the Examiners

## Internal Examiners:

Each internal examiner (except the candidate's advisor), within one month of the receipt of the thesis, shall submit to the Dean of the Faculty of Graduate Studies a written report giving an evaluation of the thesis, noting its merits, deficiencies (if any) and, if appropriate, revisions. The report shall contain a statement as to whether or not the student may now proceed to the oral examination. The thesis shall be placed into one of the following categories:

1. The thesis represents a distinct contribution to the candidate's field of research and it is acceptable as it stands (or with minor revisions to either content, structure, or writing style. (The thesis has not received final approval, but the candidate may proceed to their oral examination).
2. The thesis has merit since it makes a contribution to the candidate's field; however, there are research-related concerns that have the potential to be dispelled in the oral examination. The structure and writing are acceptable or require only minor revisions. (The thesis has not received final approval, but the candidate may proceed to their oral examination).
3. The thesis has some merit, but it is not acceptable in its current state since it requires major revisions to one or more of its core components, viz., research content, structure, and writing style. (The candidate has failed attempt and cannot proceed to the oral examination.)
4. The thesis is unacceptable with respect to its core components, viz., research content, structure, and writing style. (The candidate has failed attempt and cannot proceed to the oral examination.)

## Note:

1. The placing of the thesis into category (1) or (2) above does not mean that the thesis has received final approval.
2. The placing of the thesis into either category (3) or (4) constitutes a failure.

## External Examiners:

The Dean of the Faculty of Graduate Studies will request the external examiner to give a detailed report on the merits and deficiencies of the thesis as well as an overall evaluation. The external examiner shall be asked to report on his/her findings in the same categories as those used by the internal

## 

## ACADEMIC CALENDAR <br> 2012-2013 •

examiners. The advisor and the student must submit a declaration to the Faculty of Graduate Studies that neither party has performed collaborative research work with the external examiner within the last five years.

The external examiner is requested to present the report to the Dean of Graduate Studies within one month of the receipt of the thesis. Adequate time must be allowed for the transmission of the thesis and the receipt of the report.

The attendance of the external examiner at the candidate's oral examination is encouraged, but is not required.

Note: If the external examiner is not going to be present at the examination, the Dean of the Faculty of Graduate Studies will request him/her to submit questions and the expected answers to the questions to be posed to the candidate at the time of the examination. Normally, the Chair of the Examining Committee will pose the questions to the candidate and the candidate will not receive the questions prior to the examination.

## Approval For Advancement to the Oral Examination

The Faculty of Graduate Studies must receive all examiners' reports (internal and external) at least two weeks prior to the intended date of the oral examination.

## Guidelines For Advancement to the Oral Examination

When considering the candidate's advancement to the final oral examination, the committee of internal examiners shall use the following guidelines:

1. If all the reports place the thesis in category (1) or (2), advancement to the oral examination shall be automatic. The Dean of the Faculty of Graduate Studies shall send copies of all category (1) or (2) reports to each of the internal thesis examiners and the Department Head. Two copies of all the reports are sent to the Advisor who shall provide one copy to the student.
2. If one or more of the reports place the thesis in category (3) or (4), the Dean of Graduate Studies shall send copies of all the reports to each of the internal thesis examiners and the Department Head. Two copies of all the reports are sent to the Advisor who shall provide one copy to the student. The committee of internal examiners should strive to provide the advisor and the candidate with specific advice about the nature and scope of the revisions required and any other pertinent matters (such as the time that should elapse before the thesis will be accepted for reconsideration).
3. In the unlikely event that the internal examiners judge an unfavourable report by an external examiner to be unwarranted, they may recommend, through the head of the major department, that the Dean of Graduate Studies submit the thesis to a second external examiner.

## Requirements Prior to Oral Examination

## Scheduling

The examination will normally be held at either the University of Manitoba Fort Garry or Bannatyne Campus. Exceptions must have the unanimous agreement of all committee members. Normally, the oral examination shall be open to all members of The University of Manitoba community and shall be held at The University of Manitoba. In exceptional cases the final oral examination may be closed, for example when the results of the thesis research must be kept confidential for a period of time. In such cases, the advisory committee and Department head shall recommend such action to the Dean of Graduate Studies who may then approve that the final oral examination be closed to all but the examining committee and the Dean of Graduate Studies (or designate).

## Student Information

At least two weeks prior to the oral examination, the student must submit to the Faculty of Graduate Studies the following information:

Biographical Data - outstanding points in career, awards, etc.

List of degrees obtained - where and when

List of the student's publications

The exact title of the thesis

An abstract of the thesis (not more than 350 words)
Note: The above documentation should be submitted in electronic form.

## Notice of Examination

Except in the case of a closed examination and provided the information is received in sufficient time to meet publication deadlines, a notice of the student's oral examination will be posted on The University of Manitoba website. In addition, memoranda will be distributed by the Faculty of Graduate Studies to the department concerned. Note that students and faculty members who are not members of the examining committee are invited and encouraged to attend oral examinations but are not permitted to participate in the formal questioning.

## Oral Examination

A student must pass an oral examination on the subject of the thesis and matters relating thereto before he/she may obtain the Ph.D. degree. An oral examination committee consisting of not fewer than four persons shall conduct the examination. One of these shall be the Dean of Graduate Studies or his/her representative who shall be Chair. The other members shall normally be the thesis examiners. It is expected that all internal members of the examining committee be present at the defense.

## Format of the Examination

The first part of the oral examination shall consist of an oral presentation by the candidate to include a summary of the salient points of the research within a time span of 25 to 30 minutes. This is followed by the questioning and examination of the candidate by the examination committee, that is normally about one and one-half hours but in no case longer than two hours.

The Chair may exercise discretion in inviting questions from guests.

## Procedures For The Conduct of The Examination

Before the candidate and guests are admitted to the examination room, the Chair should discuss the examination procedures with the examiners.

The Chair will introduce the candidate and request him/her to give a concise ( 25 to 30 minutes) oral presentation of the thesis to include a summary of the problems studied, the results and the conclusions.

Following the presentation, the Chair will invite questions from each member of the examining committee, taking care to ensure that each examiner has approximately equal time for questions. Normally, the question period should not exceed one and one-half hours.

It is the responsibility of the Chair to pose questions raised by the external examiner (if not in attendance).

The Chair may exercise his/her discretion in allowing questions from guests following completion of the formal examination.

Note: Once assuming the role of Chair, s/he foregoes the right to comment on the merits of the thesis whether or not $s /$ he is an expert in the field.

## Decision of the committee:

Following completion of the formal examination, the candidate and spectators are required to withdraw from the examination room. The examiners will consider their report and will also determine the nature of and procedures for approval of any revisions that will be required prior to submission of the thesis. The committee may exercise its discretion on such matters as who must approve the required revisions, time limits for completion, the necessity for a second oral examination, and any other such matters. It shall be the responsibility of a designated member of the oral examination committee (normally the advisor) to ensure that all such revisions are completed before the copies of the thesis are submitted to the Faculty of Graduate Studies. The candidate will be recommended for the Ph.D. degree upon receipt by the Faculty of Graduate Studies of favourable results of the thesis examining committee and when the corrected copy of the electronic version pf the thesis is submitted to MSpace and corrected copy of the paper
version of the thesis is submitted to the Faculty of Graduate Studies, providing all other degree requirements have been satisfied.

## Report of the committee:

The final judgement of the examiners on the thesis and the oral examination shall be reported to the Dean of the Faculty of Graduate Studies on the "Final Oral Examination of the Ph.D. Thesis" form. An approved verdict must be unanimous, and each examiner must indicate, by his/her signature, concurrence with the verdict. In the case of a failure for the thesis at the Ph.D. level a detailed written report will be prepared by the Chair and made available to the candidate and also submitted to the Faculty of Graduate Studies.

Note: A student will be required to withdraw when the Ph.D. thesis has been rejected twice at the stage where:
a) The examining committee reports on the merits of the written thesis;
b) The defense; or
c) A combination of both stages.

### 5.3 Publication and Circulation of Thesis,

Every graduate student registering in a Ph.D. program at the University of Manitoba shall be advised that as a condition of being awarded the degree, he/she will be required:

1. To grant a license of partial copyright to the University and to the Library and Archives Canada for any thesis submitted as part of the degree program.

Note: This license makes the thesis available for further research only. Publication for commercial purposes remains the sole right of the author.
2. To provide a copy of the abstract for Dissertation Abstracts International and to authorize publication of the abstract in that publication. The forms and conditions pertaining to these license agreements are available at the Faculty of Graduate Studies Office. This and other related regulations may give rise to important questions of law and students may need additional legal advice on the copyright laws of Canada and/or other countries. Students who wish to obtain legal advice concerning their subsequent rights are advised to do so prior to signing the agreement. Signing the license agreements is normally done after the contents of the thesis have been delineated and the importance of copyright and/or patents fully comprehended. Publication in the above manner does not preclude further publication of the thesis or any part of it in a journal or in a book. In this case, acknowledgement should be made that the work was originally part of a thesis at The University of Manitoba.

## Note:

## ACADEMIC CALENDAR

Copyright - Copyright in theses and practica is protected in international copyright law. A copyright symbol © or (c) is incorporated on a page containing statements of permission to microfilm and to lend copies of the thesis or practicum. After completion, this page should be inserted in the thesis/practicum immediately following the title page. Blank copies of this page are available from the Faculty of Graduate Studies Office.

Patents - Refer to the section "Policy of Withholding Theses Pending Patent Applications" in this Guide.

Restriction of theses for publication - In exceptional cases not covered by the regulation concerning patents, where adequate cause can be shown to delay publication, the student may request the Dean of Graduate Studies to restrict access, for a period up to one year after submission, of the digital and unbound paper versions of a thesis submitted to The University of Manitoba. The Dean, in consultation with the student's advisor, shall determine for what period, if any, access will be so restricted.

Library and Archives Canada - A microfiche of the thesis is forwarded to the Library and Archives Canada and is listed in a monthly and annual national bibliography, 'Canadiana', which is published by the National Library.

## SECTION 6: Policy of Withholding Thesis

## Pending a Patent Application

In 1970 the Board of Governors and Senate approved a policy on accepting research grants from outside agencies. This policy defined the right of agencies to defer release of information and thus ensure freedom of publications for research findings of University personnel. Occasionally, the University may also wish to restrict the release of a thesis pending patent application. This policy statement parallels the previous one in that it defines the right of the University to defer the release of a thesis and thus ensures freedom of publication for the research findings of a graduate student.

This situation may arise in two circumstances which are defined below and both of which are governed by the same set of regulations.

When a research project is known to contain patentable items as defined in the research contract, then it is the responsibility of the advisor to give written information of the restrictions on publication to the student prior to the start of the thesis research. If the student agrees to carry out the research, then the regulations given below will apply.

Where a patentable item is found during the course of research, then the advisor and the student may make application for patent rights through the University Patent Committee, and the following regulations will apply concerning the release of the thesis.

Regulations Concerning Release of a Thesis During Application and Negotiation For Patents

The Dean of the Faculty of Graduate Studies will receive the approved thesis and copies of it as required by the Faculty regulations. On written joint request of the advisor and the student, the Dean will keep the thesis and copies of it in his/her office for a period up to one year.

For further information, reference should be made to the thesis copyright license.

## SECTION 7: Extension of Time to Complete Program of Study <br> All requests for extensions will normally be dealt with

 administratively and reported, in summary form, to the Executive Committee of Graduate Studies for information. Requests for an extension are reviewed by the Faculty of Graduate Studies on a case by case basis. The extension time requested must closely reflect the time required to complete the program. More than one extension period may be considered, but the total time for all extensions will not normally exceed two years. Requests for extension must be accompanied by a realistic timeline that has been agreed upon by the student and supervisor and endorsed by the Department Head. Students granted extensions may be asked to enrol full-time during the period of the extension and may also be required to meet contingencies or carry out remedial work to be associated with the extension. The student must complete the "Request for Extension" form and submit it to his/her major department for recommendation to the Faculty of Graduate Studies at least four months prior to the deadline date for completion of program requirements.
## SECTION 8: Leave of Absence Regular Leave

A regular leave is intended to allow students to meet family, travel or employment responsibilities or plans and circumstances not covered by the parental or exceptional leaves. At the request of a graduate student, the head of the student's department may recommend to the Dean of Graduate Studies that a student be granted a leave of absence for a period of time not to exceed one year. While on leave of absence, a student would not be expected to maintain study and/or thesis research work. Students on regular leave of absences will be required to maintain continuous registration and pay the appropriate continuing fee. If a student has program tuition fees (as opposed to continuing fees) owing at the time of the granting of the leave, the tuition fees will be deferred until the student returns from leave, however, the continuing fee will be levied.* A regular leave of absence status does not extend the time limits as outlined in the Faculty regulations.
*Program Fees: The continuing fee in effect at the time of the granting of the leave will be levied. However, if the student returns from leave in January, the normal tuition fee will be levied less the continuing fee already paid.

## ACADEMIC CALENDAR

## Exceptional Leave

In exceptional circumstances for medical or compassionate reasons (e.g. the need to care for an ailing relative), at the request of the graduate student, the head of the student's department may recommend to the Dean of the Faculty of Graduate Studies that a student be granted an exceptional leave of absence for a period of time not to exceed one year. While on leave of absence for exceptional reasons, a student is not permitted to maintain study and/or thesis research work, would not be required to maintain continuous registration, nor pay tuition fees. In addition, the leave period would not be included in the time period allowed for the completion of the degree. This leave is not intended to cover circumstances related to travel, employment or other financial concerns.

Fees: Students are not expected to pay fees for the term in which they have been granted an exceptional leave. Upon return from the exceptional leave students will be assessed fees as determined by the Registrar's Office.

## Parental Leave

A graduate student who is bearing a child or who has primary responsibility of the care of an infant or young child immediately following a birth or adoption of a child is eligible for parental leave. The request should be made through the student's department, normally for a leave of four to twelve months. Leaves of other duration will be considered on an individual basis. Parental leaves must correspond with (an) academic term(s). While on leave of absence for parental reasons, a student is not permitted to maintain study and/or thesis research work. The leave period is not included in the time period allowed for completion of the degree.

Fees: Students are not expected to pay fees for the term in which they have been granted a parental leave. Upon return from the parental leave students will be assessed fees as determined by the Registrar's Office.

Note: At the time of approval of an application for leave, the procedures for the return of the student to the department at the completion of the leave must be stipulated.

## Awards and Leave of Absence

Students granted exceptional or parental leave would retain the full value of a University of Manitoba Graduate Fellowship or other award whose terms and conditions are established by the Faculty of Graduate Studies. Such an award will be suspended at the onset of the leave and reinstated at the termination of the leave period ( 4 to 12 months) provided that the student returns to full time study at that time.

Note: Other awards will be paid according to the conditions established by the donor or granting agency.

Graduate Student Vacation Entitlement

Students are entitled to three weeks vacation throughout a 12-month period.

## SECTION 9: Appeals - Procedures And Guidelines <br> General

Students who disagree with a decision have access to the appeal routes as laid out by the various Faculty of Graduate Studies and University of Manitoba appeal processes.

Students may file academic, discipline, admission, grade, and fee appeals. You may refer to this section of the Faculty of Graduate Studies Academic Guide and the University of Manitoba Governing Documents
(http://umanitoba.ca/admin/governance/governing document s/index.html).

The Executive Committee of the Faculty of Graduate Studies, through its Appeal Panel by delegation from the Faculty of Graduate Studies Council, is empowered to deal with student appeals from departmental/unit recommendations or Faculty of Graduate Studies actions provided the departmental/unit appeal process (if applicable) has dealt with the matter. Student appeals must be made in writing and should be directed to the Secretary of the Appeals Committee, Faculty of Graduate Studies, 500 University Centre.

Students in a Joint Master's Program must follow the appeals process described in the document Regulations Governing the Joint Master's Programs between the University of Manitoba and the University of Winnipeg which is available at:
http://umanitoba.ca/faculties/graduate studies/admin/index.h tml

## Academic Appeals

Decisions on academic matters such as qualifying examinations, candidacy examinations, thesis examinations, etc. that have been made by a student's home unit (i.e. department, school or program) should first be appealed to the home unit. A unit's appeal procedures should be outlined in its graduate supplemental regulations which are available at:
http://umanitoba.ca/faculties/graduate studies/admin/532.ht ml . If a unit denies a student's appeal, the appeal may be made to the Faculty of Graduate Studies. Decisions made directly by the Faculty of Graduate Studies (e.g. Required to Withdraw) must be appealed to the Faculty of Graduate Studies as the first level of appeal and addressed to the Associate Dean responsible for that particular unit. The Associate Dean will consider the appeal. If the appeal is granted, the student will be notified with copies to the unit concerned. If the appeal is denied, the Dean will automatically consider the appeal. If the appeal is granted by the Dean, the student will be notified with copies to the unit concerned. If the appeal is denied by the Dean, the student will be notified with copies to the unit.

## 

ACADEMIC CALENDAR
2012-2013 •

The student can appeal the Dean's decision to the FGS Appeals Committee within fifteen (15) business days. These student appeals should be directed to the Secretary of the Faculty of Graduate Studies Appeals Committee. The disposition of the appeal by the FGS Appeals Committee will be communicated to the Dean of Graduate Studies who will communicate the decision to the student, with copies to the unit concerned.

An academic decision of the Faculty of Graduate Studies Appeal Panel is appealable only to the Senate Committee on Academic Appeals (see University of Manitoba Governing Documents: Students: Policy: Academic Appeals Procedures and Guidelines).

## Composition of the Academic Appeal Panel

See Faculty of Graduate Studies Appeals Committee Terms of Reference at
http://umanitoba.ca/faculties/graduate_studies/admin/126.ht ml

## Consideration of an Academic Appeal

A hearing panel shall consider an appeal only after it has been heard by the body responsible for appeals in the unit concerned and by the Associate Dean and Dean. The hearing panel shall not consider material submitted to them which was not submitted to the unit/Associate Dean/Dean.

The Academic Appeal Committee shall only hear academic appeals on the following grounds:
(i) Failure of the unit or the Associate Dean/Dean to follow procedures;
(ii) Failure of the unit or the Associate Dean/Dean to follow the rules of natural justice;
(iii) Failure of the unit or the Associate Dean/Dean to reasonably consider all factors relevant to the decision being appealed;
(iv) That a Faculty of Graduate Studies or unit governing document has become inapplicable through lapse of time or was unfairly applied;
(v) That there is an apparent conflict between a Faculty of Graduate Studies governing document and a unit governing document;
(vi) Failure of the Faculty of Graduate Studies or the unit to comply with applicable legislation.

## Academic Appeal Deadlines

Students must submit an academic appeal within fifteen (15) working days of the date when the student was informed in writing of the action to be appealed and include the appropriate appeal form (available at:
http://umanitoba.ca/faculties/graduate_studies/forms/index.ht ml ), a cover letter (clearly explaining the grounds for the appeal with specific reference to the ground(s) noted in the previous section) including any supporting documentation, a copy of the letter of decision from the last appeal level, and a copy of all the documentation submitted to the last appeal level. No new information may be submitted to the next higher level appeal body.

The remedy sought of the appeal body shall not differ from that requested of the last appeal level unless extraordinary circumstances are presented.

Appeals to the Senate Committee on Academic Appeals shall be filed with the University Secretary within twenty (20) working days after the mailing of the notice of decision from which the appeal is made. The Chair of the Senate Committee on Appeals shall have discretion to extend this deadline if he/she determines that there are special circumstances which justify or excuse the delay.

## Discipline Appeals

The specific jurisdiction of each of the Disciplinary Authorities is outlined in: University of Manitoba Governing Documents: Students: Bylaw: Student Discipline. See 2.3.3: Table 1: Jurisdiction of Disciplinary Authorities.

When the appeal is against a disciplinary decision made by the Faculty of Graduate Studies, the appeal routes and procedures as outlined in the following shall prevail: University of Manitoba Governing Documents: Students: Procedures: Student Discipline.

An appeal of a decision of the Associate Dean of the Faculty of Graduate Studies shall be appealed to the Dean of the Faculty of Graduate Studies. An appeal of a decision of the Dean of the Faculty of Graduate Studies shall be made to the Local Discipline Committee (LDC). The LDC will inform the Dean of Graduate Studies of its decision who will in turn inform the student. An appeal of a decision of the LDC shall be made to the University Discipline Committee which shall be delivered to the Secretary of the University Discipline Committee (UDC) with a copy to the Dean of the Faculty of Graduate Studies.

## Discipline Appeal Deadlines:

Students must submit an disciplinary appeal within ten (10) working days of the date when the student was informed in writing of the action to be appealed and include the appropriate appeal form (available at:
http://umanitoba.ca/faculties/graduate_studies/forms/index.ht $\mathrm{ml})$, a cover letter including justification for the appeal and any supporting documentation.

## Appeal of Violation/Penalty:

As per section 2.7.2 of the University of Manitoba Governing Documents: Students: Procedures: Student Discipline,

## 

ACADEMIC CALENDAR
2012-2013 >

The Student shall clearly indicate in the cover letter of appeal whether they are appealing the decision on:
(a) the finding of facts;
(b) the disposition determined by the disciplinary authority; or
(c) both (a) and (b).

The appeal shall be by way of a trial de novo unless the appeal has been made only in relation to the severity of the disciplinary action imposed.

## Limitations on Appeal Rights

Students who disagree with a decision have access to the appeal routes as laid out by the various Faculty of Graduate Studies and University of Manitoba appeal procedures. Student appeals may be limited by the scope of the inquiry available at each level and category of appeal, as well as the time limitations for submission of appeals.

A further limitation is that the Faculty of Graduate Studies rules and regulations, established to uphold the academic rigour of the University of Manitoba, are generally not subject to appeal unless an appeal route is otherwise stipulated. In situations where no appeal route is available, a student may make a written request to the Dean of the Faculty of Graduate Studies.

## Procedures

## Appeal Hearing:

All appeals shall be submitted in written form to the Secretary of the Faculty of Graduate Studies Appeals Committee. The Associate Dean and/or Dean may, on consideration, attempt first to reach an informal solution. If that is judged by the Associate Dean and/or Dean to be inappropriate or unfeasible, a hearing panel will be formed. Hearings shall be held in closed session unless at least one party requests an open hearing and all parties to the appeal agree to the request.

The Associate Dean or Dean shall inform the appropriate Unit Head of the nature of the appeal and forward a copy of the student's written submission. The Unit Head or Associate Dean will prepare a written response to the Chair of the Hearing Panel within ten working days. The Secretary of the Appeals Committee shall strike a hearing panel and set a hearing as soon as possible after receipt of the written response.

Appeal hearings shall be arranged as expeditiously as possible and all parties involved shall be given notice of the appeal hearing within a reasonable timeframe.

The student (known as the Appellant), his/her representative and the Faculty and/or Unit representative (known as the

Respondent(s)) shall receive the appeal package at least one week prior to the date set for the hearing of the appeal.

Normally, no additional materials may be presented after the distribution of the appeal package or at the time of the hearing. In the case where a request is made to submit additional materials, the Chair may postpone the hearing and allow no more than ten working days for the other party to respond to the new materials.

The Appellant and Respondent(s) shall have the right to appear before the hearing panel and suggest witnesses that he/she wishes to appear before the panel. It will be at the discretion of the Chair to determine whether any witnesses are called. It is the responsibility of the party calling witnesses to ensure that the witnesses are informed of the date and time of the hearing. The Chair of the Hearing Panel (via the Secretary of the Appeals Committee) shall be notified not less than four working days prior to the hearing of the suggested witnesses.

The Appellant has the right to appear in person or to be represented by a Student Advocate or a fellow student or other full-time member of the University community not receiving payment for appearing or working for legal aid. One member of the Appellant's immediate family and his/her lawyer may be present but only as observers who do not participate in the hearing. The Chair of the Hearing must be notified of any observers at least four working days prior to the hearing.

All members of a hearing panel shall participate in all of the deliberations essential for the determination of the matter in dispute. If, in the course of hearing an appeal, a member is not present at the commencement of the hearing or a member cannot continue, the panel may elect to proceed in the absence of that member. If more than one member is not present at the commencement or cannot continue, the hearing panel must adjourn.

As a first item of business in dealing with any academic appeal, the hearing panel shall consider (in closed session) whether there are sufficient grounds to proceed with the appeal hearing and any requests it has received to hold an open session. When a hearing panel determines that there are insufficient grounds to proceed with an appeal hearing, it shall notify the Appellant, his/her representative and the Respondent(s) immediately and report its reason(s) to the Dean of the Faculty of Graduate Studies. If a request is made to hold an open hearing, the panel shall determine what parts of the hearing shall be open.

Normally the Appellant (and representative) and the Respondent(s) will be present during the presentation of the other's case. During the hearing, the Appellant or the Respondent(s) may request a change in the open or closed nature of the hearing, at which time the hearing panel shall determine what parts of the hearing will be open.

The hearing panel may request the Appellant, Respondent(s) or any other parties to appear or provide additional information in a particular case before reaching a decision.

All parts of the meeting required to deliberate or determine resolution of the appeal shall be held in camera.

The Chair of the Hearing Panel shall inform the Dean of the Faculty of Graduate Studies in writing of the panel's decision who shall inform, in writing, the Appellant, his/her representative and the Respondent(s) of the disposition of the appeal, the reasons for the decision, and whatever further action may result.

## Disqualification:

Any member of the Appeal Panel shall be disqualified from hearing an appeal who is a faculty member or a student in the Appellant's home unit or is or was a member of a committee or board responsible for making the decision being appealed.

## Other Appeals

## Admission Appeals:

Appeals on Admission to the Faculty of Graduate Studies are appealed directly to the Senate Committee on Admission Appeals. Refer to: University of Manitoba Governing Documents: Students: Policy: Admission Appeals Procedures and Guidelines.

## Fee Appeals:

Fee appeals are administered by the Registrar's Office. Refer to: http://umanitoba.ca/student/records/fees/830.htm or visit the Registrar's Office, 400 University Centre.

## Grade Appeals:

Appeals of term work or final grades in courses are administered by the Registrar's Office. Refer to: http://umanitoba.ca/student/records/exams grades hub.html or visit the Registrar's Office, 400 University Centre.

## Assistance with Appeals

The Office of Student Advocacy, 519 University Centre, provides information and assistance to students regarding all appeals and appeals processes. It is very strongly recommended that students contact the Office of Student Advocacy for assistance prior to appealing a decision.

## Programs

## Agribusiness and Agricultural Economics

## Head: Brian T. Oleson

Campus Address/General Office: 353-66 Dafoe Road (Agricultural and Food Sciences Building)
Telephone: (204) 474-9259
Fax: (204) 261-7251
Email Address: AgBus GradStudies@Umanitoba.Ca
Website: www.umanitoba.ca/afs/agribusiness
Academic Staff: Please refer to the Faculty at www.umanitoba.ca/afs/agribusiness

The Department of Agribusiness and Agricultural Economics offers graduate instruction leading to the M.Sc. degree. The Ph.D. program is offered through the Economics Department, with students electing an Agricultural Economics field of specialization. The purpose of graduate training in Agribusiness and Agricultural Economics is to develop competence in solving real world problems relating to food production, policy, risk management, marketing, finance, international trade, resources, international development, agribusiness management, and the environment.

Students undertaking graduate studies in Agribusiness and Agricultural Economics may specialize in one of the above areas of research.

## Research Facilities

The department has excellent computer facilities, support staff and offices for graduate students.

## M.Sc. in Agribusiness and Agricultural Economics, Admission

Applicants must possess the equivalent of the B.Sc. degree in Agribusiness or a four-year degree from the University of Manitoba, or any other degree which provides an equally strong basis for a graduate program in the department. If the applicant has deficiencies of more than 12 credit hours, a requirement may be to successfully complete a pre-Master's program before being admitted to a regular graduate program. Please contact the Department for details.

The following courses, or their equivalents, are prerequisites to the graduate program and indicate the scope and level of training required for admission:

1) MATH 1310 Matrices for Management and Social Sciences (or any equivalent course in linear algebra, e.g. MATH 1300)
and

MATH 1520 Introductory Calculus for Management and Social Sciences (or any equivalent course in calculus, e.g. MATH 1500)
(or the former MATH 1680 Mathematics for Agriculture and Related Sciences)
2) Microeconomic Analysis 1 (ECON 2450 regular or ECON 2700 Honours)
3) Macroeconomic Analysis 1 (ECON 2470 regular or ECON 2800 Honours)
4) Introduction to Econometrics (e.g. ABIZ 3080)

The following courses are not a requirement, but may be recommended:

Microeconomic Analysis 2 (ECON 2460 regular or ECON 3700 Honours)

Macroeconomic Analysis 2 (ECON 2480 regular or ECON 3800 Honours)

Intermediate Econometrics (e.g. ABIZ 4120)
ECON 6040 Survey of Mathematical Topics for Economics is highly recommended, and will normally be taken in late summer/early fall at the beginning of the Graduate program.

## Application Deadlines

The Department of Agribusiness and Agricultural Economics allows students to begin their M.Sc. program on either 1 September or 1 January. For admission to either of these start dates, Canadian and U.S. students should send their applications with complete supporting documents to the Faculty of Graduate Studies by June 1 or October 1 respectively. International students should send their applications with complete supporting documents to the Faculty of Graduate Studies by March 1 or July 1 respectively.

## Program Requirements

Two programs of study are available:

## Program 1:

The thesis option entails a minimum of 18 credit hours consisting of:

| Courses | Credit <br> Hours |
| :--- | ---: |
| Microeconomics, normally ECON 7722 (or the former |  |
| ECON 7720 ), or |  |$\quad 3-6$

*With the major advisor's permission, ECON 3700 may be used in conjunction with either ABIZ 7950 (or the former ABIZ 7100) or ABIZ 7940 to meet the Microeconomics requirement. Another 12 units of electives are required if just ECON 7722 is chosen (and 9 units of electives are required if one of the other combinations is chosen).

Every candidate must complete an acceptable thesis and pass an oral examination based primarily on the thesis.
All students in the M.Sc. thesis program are required to present two graduate seminars open to the public. The first presentation shall be on the thesis proposal paper. The second presentation will be on their completed research.

## Program 2

The comprehensive option normally entails a minimum of 27 credit hours consisting of:

## Courses

Credit
Hours

## 

## ACADEMIC CALENDAR

Microeconomics, normally ECON 7722 (or the former ECON 7720), or

ABIZ 7950 (or the former ABIZ 7100) plus ABIZ 7940*
Quantitative Methods, which could include approved
courses in Econometrics, Management Science or Statistics
*Electives prescribed by major advisor in consultation
with the student, normally at 7000 leve
Total Credit Hours

3-6

3

27
*With the major advisor's permission, ECON 3700 may be used in conjunction with either ABIZ 7950 (or the former ABIZ 7100) or ABIZ 7940 to meet the Microeconomics requirement. Another 21 units of electives are required if just ECON 7722 is chosen (and 18 units of electives are required if one of the other combinations is chosen).

In addition to the coursework for the comprehensive option, one research paper will be assigned, supervised, and evaluated by a committee of three, consisting of two members from the Department of Agribusiness and Agricultural Economics and one member from outside the Department, with the student's advisor acting as chair. Upon satisfactory completion of all the coursework and the research paper, the student must pass a comprehensive oral examination. The student will be held responsible in the comprehensive oral examination for knowledge and understanding of the questions relating to the student's program of study and the research paper.

Specialization in business management in agriculture is available under the comprehensive option for a selected number of qualified students. These students are required to take at least 12 units of courses within the Asper School of Business/Faculty of Management at the 6000 or 7000 level.

Second language reading requirement: none

Expected time to graduation: two years

Ph.D. in Economics with a research specialization in Agribusiness and Agricultural Economics*,
*A Ph.D. is offered by the Department of Economics with the cooperation of the Department of Agribusiness and Agricultural Economics, with students electing an Agricultural Economics field of specialization.

## Admission

1) Except as provided in 2) below, applicants for admission to the Ph.D. program must have completed the entrance requirements and the program requirements of an M.A. degree in Economics or Agricultural Economics equivalent to that awarded by the University of Manitoba.
2) In exceptional cases, applications may be considered from students who have completed an Honours degree in Economics or Agricultural Economics equivalent to that awarded by the University of Manitoba. In such cases, the applicant will be required to fulfil, in addition to the requirements below, all course work requirements for the M.A. degree by comprehensive examination option.

## Application Deadlines

Students intending to begin a Ph.D. in Economics with a research specialization in Agricultural Economics will begin their program in the fall. Please note that the Department of Economics does not normally accept students in the January session, as the required Math and Theory courses start in the fall. Canadian and U.S. students should send their applications with complete supporting documents to the Faculty of Graduate Studies by May 1. International students should send their applications with complete supporting documents to the Faculty of Graduate Studies by January 15.

## Field in Agricultural Economics

Students electing a research specialization in Agricultural Economics are required to complete the Agricultural Economics field examination, as one of the two required fields of concentration. Other students in Economics may also take this exam.

The following courses are recommended in preparing for this exam: Advanced Agricultural Demand Analysis (ABIZ 7950) - or the former Advanced Agricultural Marketing (ABIZ 7100) - and Production Economics (ABIZ 7940). Students are also advised to complete a graduate course in econometrics. In addition a set of extra readings (on seminal applications of marketing and production theory in agriculture) will be made available by the Department Graduate Advisory Committee (DGAC) in Agribusiness and Agricultural Economics to students intending to write this field.

If either of the recommended courses has not been offered during the student's Ph.D. program, then a brief directed studies course under Agricultural Economics (AE) supervision will be arranged to assist the student in the subject area. DGAC will choose members of AE to grade the examinations (both written and oral).

Second language reading requirement: none

Expected time to graduation: four years

## 

ACADEMIC CALENDAR

Not all courses are offered every year. Please check the Aurora catalogue to find out when a course is offered.
https://aurora.umanitoba.ca/banprod/bwckctlg.p disp dyn ct Iq

ABIZ 7110 Attributes of Market Organization Cr.Hrs. 3 (Formerly 061.711) Analysis of agricultural market structure, conduct and performance of processing industries.

ABIZ 7140 Resource Efficiency and Allocation in Agriculture Cr.Hrs. 3
(Formerly 061.714) Seminar on research issues in production economics related to technological change, risk and uncertainty, management and firm growth.

ABIZ 7230 Agricultural Market Regulation Cr.Hrs. 3 (Formerly 061.723) A review of economic theories of regulation and their application in agricultural marketing. Analysis of specific regulation in agricultural markets.

ABIZ 7240 Research in Agricultural Marketing Cr.Hrs. 3 (Formerly 061.724) Advanced economic theory and quantitative techniques relevant to agricultural marketing. Topics include model building, market demand and supply, market regulation, and review of literature on marketing research.

ABIZ 7250 Econometric Models and Methods Cr.Hrs. 3 (Formerly 061.725) Logical foundation of econometrics, model building, econometric methods and problems encountered in specification, estimation, verification, and prediction.

ABIZ 7270 Research Methodology Cr.Hrs. 3 (Formerly 061.727) Critical discussion of scientific methodology and the scientific status of agricultural economics. Discussion of methodological issues as they relate to the research process in agricultural economics.

ABIZ 7300 Topics in Agricultural Economics Cr.Hrs. 3 (Formerly 061.730) Application of economic analysis to contemporary problems in agriculture.

ABIZ 7310 Agricultural Economic Development Cr.Hrs. 3 (Formerly 061.731) Theory and policy of agricultural development in underdeveloped countries: problems of stimulating growth in agriculture and evaluation of alternative approaches to economic development of agriculture. Prerequisite: consent of instructor.

ABIZ 7330 Transportation Economics and Research Cr.Hrs. 3
(Formerly 061.733) Rate determination and cost analysis for different modes of transportation; transportation issues in Canadian agriculture; and research techniques in transportation problems. Prerequisite: consent of instructor.

ABIZ 7350 Regional Development Cr.Hrs. 3 (Formerly 061.735) Review policy, goals, theories, methods and applications relevant to analyzing Canadian and developing country rural development, regional economic
growth and project evaluation.
ABIZ 7360 Current Issues in Policies Relating to Agriculture Cr.Hrs. 3
(Formerly 061.736) Seminar dealing with current issues in policies relating to agriculture.

ABIZ 7370 Concepts of Agribusiness Cr.Hrs. 3 (Formerly 061.737) Analysis of interrelationships within agricultural sector and between agricultural and nonagricultural sectors.

ABIZ 7380 Agricultural Policy Cr.Hrs. 3 (Formerly 061.738) Bearing of economic theory on agricultural policy: relevance of allocative efficiency, distributive equity and other criteria, and economic evaluation of alternative policies.

ABIZ 7390 Applied Optimization Cr.Hrs. 3 (Formerly 061.739) Application of linear and non-linear programming techniques to Agricultural Economics research. Emphasis on interpretation of conditions which ensure optimality for programming techniques. Prerequisites: ABIZ 2520 (or 061.252 ) or SCM 2150 (or 164.2150) or 027.215.

ABIZ 7400 Forecasting and Simulation Models Cr.Hrs. 3 (Formerly 061.740) Application of simulation modelling to characterizing and predicting the behaviour of complex systems (ecological, engineering and economic). Foundations of simulation and statistical approaches to analysis are emphasized.

ABIZ 7410 Agricultural Finance Cr.Hrs. 3 (Formerly 061.741) Analysis of financial structure and goal criteria of agricultural firms, analysis of financial markets and institutions, evaluation and application of techniques in risk analysis, investment analysis, financial analysis, and growth and evaluation models.

## ABIZ 7430 Advanced Theory of Resource

Economics Cr.Hrs. 3
(Formerly 061.743) Economic theory of the development and management of natural resources. Application of capital theory, investment theory, the theory of externalities and decision-making theories to resource utilization and management. A strong background in microeconomics is required. Also offered as ECON 7430 by the Department of Economics.

ABIZ 7460 Research Management Cr.Hrs. 3 (Formerly 061.746) Application of research management concepts in agriculture and the resource sectors. Research definitions and methodology; the macro environment in relation to research (social and grantor priorities, economic and institutional constraints, institution and project (micro) level (priorities, objectives, budgeting, time and personnel management, performance assessment): proposal and report writing; project evaluation.

ABIZ 7630 Theory of International Trade Cr.Hrs. 3
(Formerly 061.763) Theories of trade flow; trade and income distribution; economic growth and changes in trade flows; instruments of trade intervention; international labour and capital movements; and economic integration. Also offered as ECON 7630 by the Department of Economics. Students

## 

ACADEMIC CALENDAR
2012-2013 •
may not hold with the former 061.728
ABIZ 7940 Production Economics Cr.Hrs. 3 (Formerly 061.794) Development of static microeconomic theories of the firm, functional forms, aggregation issues, productivity analysis, risk and uncertainty, and an introduction to dynamics. The following are emphasized; a rigorous treatment of the models using duality; a critical understanding of the limitations and possibilities for generalizing the models; and relevance of the models for empirical research, especially in agriculture. Also offered as ECON 7940 by the Department of Economics. Students may not hold credit with the former 018.793 or 061.713.

## ABIZ 7950 Advanced Agricultural Demand

## Analysis Cr.Hrs. 3

Critical evaluation of economic theory as applied to agricultural demand. Topics include demand systems; equilibrium; product transformation over time, place and form; and price analysis. Also offered as ECON 7950 by the Department of Economics. Not to be held with ECON 7950 or the former ABIZ 7100 or the former ECON 7900.

## Animal Science

Head: M.L. Connor
Campus Address/General Office: 201 Animal Science Building
Telephone: (204) 4749383
Fax: (204) 4747628
Email Address: animal science@umanitoba.ca
Website: www.umanitoba.ca/afs/animal science
Academic Staff: Please refer to the Faculty
at www.umanitoba.ca/afs/animal science

The department offers graduate programs leading to the M.Sc. and Ph.D. degrees in behaviour, genetics, nutrition or physiology of farm animals. Research programs serve the animal industries by the application of basic sciences to current problems in the industry. Advanced training in the Department of Animal Science prepares M.Sc. and Ph.D. graduates for positions in animal industry organizations, government and academic institutions.

Graduate programs in the Department of Animal Science may encompass a range of activities, and students should expect to receive experience in laboratory analysis, experimental design and analysis, and work with animals, depending on the research project. Research programs will frequently involve collaborative work with other Departments at the University of Manitoba, or with industry or government partners. The Department also participates in the Interdepartmental Ph.D. program in Food and Nutritional Sciences. There is a strong international orientation to graduate studies in the Department of Animal Science since many students are from outside Canada.

## Fields of Research

Research conducted in the Department of Animal Science includes: basic and applied nutrition, including functional
feeds; gut microbiology; molecular biology; physiology, behaviour and health; functional foods; animal production systems; and genetics. Experimental species include cattle (beef and dairy), poultry (chickens, turkeys, duck, geese), sheep, swine, laboratory animals (mice, rats, rabbits) and wildlife animals. Studies may involve feed and food safety and toxicology. Research activities in the Department of Animal Science are supported with funds from a variety of government organizations including the National Sciences and Engineering Research Council (NSERC), national and international industry bodies, as well as Provincial commodity groups.

## Research Facilities

Extensive facilities for all animal and poultry research are available. The Animal Science Building contains spacious and well-equipped laboratories, classrooms and graduate student offices. New animal research facilities are available on campus for all species. Research programs in dairy cattle, beef cattle and swine also utilize facilities at the 525 hectare Glenlea Research station, located 23 km from campus which includes the National Centre for Livestock and the Environment.

## M.Sc. in Animal Science, Admission

Applicants normally require a Bachelor of Science in Agriculture degree with a major in Animal Science: however students with other degrees (e.g., B.Sc. Honours or General) may be accepted. In these latter instances students, depending on their academic background, may be required to complete a pre-Master's program or to register for courses additional to those normally required in the Master's program. Please contact the Department for details.

## Application Deadlines

Students may begin their program on either September 1, January 1, May 1 or July 1. For admission on each of these start dates, Canadian and U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than four (4) months before the intended start date. International students should send their applications with complete supporting documentation to the Faculty of Graduate Studies for screening so that the department may receive the application no less than seven (7) months before the intended start date.

## Program Requirements

Program A:

Coursework and Thesis Requirements

- A minimum of 12 credit hours of coursework in addition to ANSC 7140.
- A minimum of 6 credit hours at 7000 level in the major subject.

## ACADEMIC CALENDAR

- A minimum of 3 credit hours in an ancillary subject.
- Thesis and oral examination.

## Program B:

Coursework and Comprehensive Examination Requirements

- A minimum of 30 credit hours in coursework, in addition to ANSC 7140.
- $\quad 12-18$ credit hours in the major subject at the 7000 level.
- $\quad 6-12$ credit hours in an ancillary subject(s).
- Comprehensive examination.

Second language requirement: none

Expected time to graduation: two years

Ph.D. in Animal Science, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

Students may begin their program on either September 1, January 1, May 1 or July 1. For admission on each of these start dates, Canadian and U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than four (4) months before the intended start date. International students should send their applications with complete supporting documentation to the Faculty of Graduate Studies for screening so that the department may receive the application no less than seven (7) months before the intended start date.

## Program Requirements

Minimum Program requirements are outlined in the Graduate Studies Regulations Section of this Calendar.

In addition, Ph.D. students must take ANSC 7390 "Advanced Animal Science Seminar".

## Interdepartmental Ph.D. Program

Requirements for the Interdepartmental Ph.D. program in Food and Nutritional Sciences are given in the section entitled "Interdisciplinary Programs and Courses" (Section 34.2).

Second language reading requirement: none

Expected time to graduation: three years if continuing from an M.Sc. program

ANSC 7140 Animal Science Seminar Cr.Hrs. 3 (Formerly 035.714) Reports and discussions on current problems and investigational work with mammals and poultry. This course is graded pass/fail.

ANSC 7220 Genetic Principles of Animal
Improvement Cr.Hrs. 3
(Formerly 035.722) Designed for the development of a framework of theory for the study of the genetics of populations. Changing gene frequency. Genetic and environmental subdivision of the phenotypic variance. Principles of selection. Prerequisite: ANSC 3500 (or 035.350 ) or the former 035.310 or equivalent.

ANSC 7360 Advanced Reproductive Physiology, Male Cr.Hrs. 3
(Formerly 035.736) A lecture-seminar course on sexual function and testicular physiology in males of livestock species; environmental factors influencing reproductive efficiency: recent developments in semen preservation and artificial insemination. Offered in 2005-2006 and alternate years thereafter.

ANSC 7370 Advanced Reproductive Physiology,
Female Cr.Hrs. 3
(Formerly 035.737) A lecture-seminar on current topics related to female reproduction in the livestock species. Offered in 2006-2007 and alternate years thereafter.

ANSC 7380 Endocrine Control of Animal
Metabolism Cr.Hrs. 3
(Formerly 035.738) A lecture-seminar course on current topics concerning the control of physiological processes of importance in domestic animal species. Offered in 20052006 and alternate years thereafter.

ANSC 7390 Advanced Animal Science Seminar Cr.Hrs. 3 (Formerly 035.739) Ph.D. Candidates are expected to complete a grant application form, review and critique current literature, and present a seminar on current research topics. This course is graded pass/fail.

## ANSC 7400 Quantitative Genetics in Animal

Science Cr.Hrs. 3
(Formerly 035.740) A study of advanced techniques used in animal breeding research, their theoretical basis, analysis and interpretation. Case studies in the student's area of interest will be examined. Prerequisite ANSC 7220 (or 035.722) or its equivalent.

ANSC 7440 Protein Nutrition and Metabolism Cr.Hrs.1.5 (Formerly 035.744) Lectures and critical reviews will be used to discuss recent/significant research advances in the fields of protein nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7440 by the Department of Human Nutritional Sciences. Not to be held with the former 035.735. Offered in 2007-2008 and alternate years thereafter.

## ACADEMIC CALENDAR

ANSC 7450 Energy and Carbohydrate Nutrition and Metabolism Cr.Hrs.1.5
(Formerly 035.745) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of energy/carbohydrate nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7450 by the Department of Human Nutritional Sciences. Not to be held with the former 035.717. Offered in 2007-2008 and alternate years thereafter.

ANSC 7460 Lipid Nutrition and Metabolism Cr.Hrs.1.5 (Formerly 035.746) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of lipid nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7460 by the Department of Human Nutritional Sciences. Offered in 2006-2007 and alternate years thereafter.

ANSC 7470 Vitamin Nutrition and Metabolism Cr.Hrs.1.5 (Formerly 035.747) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of vitamin nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7470 by the Department of Human Nutritional Sciences. Not to be held with the former 035.734. Offered in 2006-2007 and alternate years thereafter.

ANSC 7480 Mineral and Trace Element Nutrition and Metabolism Cr.Hrs.1.5
(Formerly 035.748 ) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of mineral nutrition and metabolism, pertinent to mammalian physiology Also offered as HNSC 7480 by the Department of Human Nutritional Sciences. Not to be held with the former 035.734. Offered in 2006-2007 and alternate years thereafter.

ANSC 7490 Phytochemical Nutrition and
Metabolism Cr.Hrs.1.5
(Formerly 035.749) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of phytochemical nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7490 by the Department of Human Nutritional Sciences. Offered in 20072008 and alternate years thereafter.

ANSC 7500 Methodology in Agricultural and Food Sciences Cr.Hrs. 3
(Formerly 035.750) The application of experimental techniques and procedures to agricultural and food sciences research. Recording, processing, interpretation, and critical appraisal of experimental data.

ANSC 7510 Special Topics in Animal Nutrition Cr.Hrs. 3 (Formerly 035.751) Students will be required to investigate and report on a nutrition problem in a species other than that of their thesis research. Projects may be avian, bovine, ovine, swine or laboratory animal species.

ANSC 7520 Special Topics in Animal Improvement Cr.Hrs. 3 (Formerly 035.752) Assigned readings, papers and discussions specific problems in animal genetics. Analysis of original data may be required.

ANSC 7530 Special Topics in Animal Physiology Cr.Hrs. 3 (Formerly 035.753) Students will investigate a minor research problem in an area of physiology other than that in
which the major is being taken. Problems areas may include: digestion, environment, renal function or reproduction.

ANSC 7540 Advanced Applied Animal Nutrition Cr.Hrs. 3 (Formerly 035.754) An advanced study of the theoretical and applied aspects of monogastric and ruminant nutrition. A laboratory component will provide training in current techniques in feed analyses and computer modeling. Offered in 2005-2006 and alternate years thereafter.

ANSC 7550 Special Topics in Animal Behaviour and

## Welfare Cr.Hrs. 3

(Formerly 035.755) Assigned readings, papers and discussions on specific issues in animal behaviour. A short behavioural experiment may be required.

## ANSC 7560 Mathematical Modeling of Agricultural

## Systems Cr.Hrs. 3

Lectures and computer based laboratory exercises will be used to discuss various aspects of model development focusing on mechanistic (compartmental analysis), growth functions and an introduction to linear programming. Construction of a simulation model may be required. Not to be held with ANSC. 4240 Mathematical Modeling of Biological Systems. Prerequisite: MATH 1500 or MATH 1520

## Anthropology

Head: Susan E. Frohlick
Campus Address/General Office: 435 Fletcher Argue Bldg.
Telephone: (204) 4749361
Fax: (204) 4747600
Email Address: um-anthro@cc.umanitoba.ca
Website: www.umanitoba.ca/faculties/arts/departments/anth ropology/

The department offers programs leading to the Master of Arts and the Doctor of Philosophy degrees. There are 40-50 graduate students in the department.

Graduates work in universities and colleges as professors or specialists, in the Foreign Service, in health related institutions, in museums, in education, in government heritage positions, for the International Development Research Centre, and in counselling for Native municipal boards. Others have chosen to be free-lance anthropologists; some have incorporated their own successful companies.

## Fields of Research

The department's research focus, and consequent graduate training and undergraduate teaching emphasis, lies in the following:

Sociocultural Anthropology: Culture and political economy, cultural production, ecology, migration, global political economy, gender and development, symbolic anthropology, media, tourism, kinship, nationalism, education, youth culture, conflict, sexuality, and applied

## 

## ACADEMIC CALENDAR

anthropology. Aboriginal Canada, Canada, India, South America, West Africa, China, Eastern Europe and the former Soviet Union.

Archaeology: Theory, analytic methods, environmental archaeology, zooarchaeology, lithics, settlement patterns, domestication, hunter/fisher/gatherers, historic and fur trade archaeology. Western and Northern Canada, Eastern Europe, South Africa, Near East.

Biological Anthropology: Skeletal biology, medical anthropology, demography, palaeodemography, historical epidemiology, palaeopathology, growth and development, infectious disease, reproductive behaviour, 3D imaging, gender and health, colonialism and health.

## Research Facilities

The Department of Anthropology is located in the Arts Faculty Complex. Laboratory facilities for archaeology and physical anthropology, the C. Thomas Shay Archaeobotanical Collection and the Bioanthropology Digital Image Analysis Laboratory, housed in the Duff Roblin Building, permit advanced study and research. Computer facilities are housed in the department and the Anthropology Laboratory. The University Library system has a collection of anthropological material, including the Human Relations Area Files. The department has a specialized publication series (UMAP). Faculty and students also use the Provincial Archives, the Hudson's Bay Company Archives, and the Manitoba Museum.

## M.A. in Anthropology , <br> Admission

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, an advanced (four year) degree in Anthropology is the normal preparation for the M.A. program. Students with a different background will normally take a year of pre-M.A. studies consisting of up to 18 hours of courses from the undergraduate, and especially the Advanced, curriculum.

## Admission Deadlines

Canadian/U.S. and international students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

## Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students must complete a minimum number of 18 credit hours of graduate coursework, including at least 12 credit hours of Anthropology courses at the 700/7000 level. Finally students must submit an acceptable thesis and pass a thesis oral examination.

Second Language Reading Requirement: None

Expected Time to Graduate: 2 Years

## Ph.D. in Anthropology,

 AdmissionAll requirements for the M.A. degree must be completed. Preference will be given to applicants who have demonstrated independent research competence at the Master of Arts level.

## Admission Deadlines

Canadian/U.S. and international students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

## Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must complete 18 credit hours above the M.A. level, including at least 15 credit hours of Anthropology courses at the 700/7000 level.

Second language requirement: yes

Expected time to graduation: 4 years

ANTH 7040 Seminar in Ethnography of Power Systems Cr.Hrs. 3
(Formerly 076.704) Comparative study of a particular theme or problem in political anthropology.

ANTH 7050 Seminar in the Anthropology of Religion Cr.Hrs. 3
(Formerly 076.705) An intensive analysis of religion as a cultural subsystem, dealing comparatively with ideologies, rituals, and ceremonies and the various anthropological theories put forward to explain religious behaviour.

ANTH 7070 Seminar in the Anthropology of Illness Cr.Hrs. 3 (Formerly 076.707) Selected topics in the study of cultural factors involved in health/illness, with emphasis upon a particular cultural system. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7130 Cultural Ecology Cr.Hrs. 3
(Formerly 076.713) An examination of the systematic nature of culture and its interrelationships with natural environmental factors.

ANTH 7140 Ethnographic Research Methods Cr.Hrs. 3 (Formerly 076.714) Approaches and techniques in field research.

## ACADEMIC CALENDAR <br> 2012-2013 •

ANTH 7350 Prehistoric Human Ecology Cr.Hrs. 3 (Formerly 076.735) Data and techniques involved in the reconstruction of past environments, with special emphasis on the influences of environment on prehistoric cultural development.

ANTH 7380 Archaeological Laboratory Techniques Cr.Hrs. 3 (Formerly 076.738) Laboratory techniques for analysis and presentation of archaeological data.

ANTH 7400 Seminar in the Archaeology of a Selected Area Cr.Hrs. 3
(Formerly 076.740) An intensive survey of the archaeology of a major region or culture area of the world. Content will vary according to the interests of the instructor. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7410 Seminar in Selected Topics in
Archaeology Cr.Hrs. 3
(Formerly 076.741) The seminars will consist of an intensive examination of major methodological, analytical and interpretive issues in current archaeological research. Content will vary according to the interests of the instructor. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7430 Archaeological Interpretive Methods Cr.Hrs. 3 (Formerly 076.743) This course is an intensive seminar on major methodological issues in archaeological analysis and interpretation.

ANTH 7440 Archaeological Theory Cr.Hrs. 3 (Formerly 076.744) Archaeological theory as seen from historical and contemporary perspectives.

ANTH 7450 Cultural Resource Management Cr.Hrs. 3 (Formerly 076.745) An intensive examination of archaeological cultural resource management. Emphasis will be placed on current Canadian CRM issues and on practical applications of concepts and methods.

ANTH 7460 Advanced Faunal Analysis in
Archaeology Cr.Hrs. 3
(Formerly 076.746) The course will cover the major theoretical, methodological, and practical issues in the analysis of archaeological faunal remains. Topics are addressed through lectures, demonstrations, and laboratory exercises. Prerequisite: ANTH 3990 (or 076.399 ) or written consent of instructor.

ANTH 7630 History of Anthropological Theory Cr.Hrs. 3 (Formerly 076.763) A broad overview of the history of anthropological theory and method from the 18th century to World War II. Focus on British and American developments in the context of the rise of industrialization and imperialism.

ANTH 7640 Contemporary Anthropological Theory Cr.Hrs. 3 (Formerly 076.764) Investigation, comparison and evaluation of contemporary approaches to culture theory in the areas of symbolism, social organization and ecology.

ANTH 7650 Applied Anthropology Cr.Hrs. 3
(Formerly 076.765) Investigation of major case studies, research methodologies, intervention strategies, and substantive areas of application in applied anthropology. Topical emphases such as economic development, health
care delivery, resettlement schemes, will reflect the interests of the instructor.

ANTH 7720 Seminar in Human Adaptability Cr.Hrs. 3 (Formerly 076.772) An intensive study of human population biology in diverse environments inhabited by human populations. Emphasis on selected examples of cultural adaptability as a specifically human mechanism for dissipating stress on the biological system.

ANTH 7790 Advanced Topics in Human Skeletal
Biology Cr.Hrs. 3
(Formerly 076.779) Analysis of metric and nonmetric morphological skeletal variation in human populations, with emphasis on the cultural and physical environment. Exemplary problems are drawn from the literature as well as from current research.

ANTH 7830 Social Organization Cr.Hrs. 3
(Formerly 076.783) Selected theories of social organization in cross cultural perspective. Subject matter may include kinship, age grading, territorial groupings, social stratification or ethnicity.

ANTH 7900 Problems in Ethnological Research Cr.Hrs. 3 (Formerly 076.790) Problems in ethnological research. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7930 Special Problems in Human Biology Cr.Hrs. 3 (Formerly 076.793) Special problems in Human Biology. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7940 Graduate Reading and Research 1 Cr.Hrs. 3 (Formerly 076.794) Reading and research. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7950 Graduate Reading and Research 2 Cr.Hrs. 3 (Formerly 076.795) Reading and research. As the course content will vary from year to year, students may take this course more than once for credit.

## Applied Health Sciences

Program Director: Dr. A. Elizabeth Ready
Campus Address/General Office: Health, Leisure and Human Performance Research Institute, 307 Max Bell
Telephone: (204) 474-7493
Fax: (204) 261-4802

umanitoba.ca/graduate studies/programs/phd/app hlth sci/

## Academic Staff: Please refer to Faculty

at umanitoba.ca/graduate studies/programs/phd/app hlth s ci/

This program is a multi-unit, research-based PhD in Applied Health Sciences. The four participating academic units are: Human Ecology, Kinesiology and Recreation Management, Nursing, and Medical Rehabilitation. The program offered is a unique and timely PhD program, which includes the

## 

ACADEMIC CALENDAR 2012-2013 >
treatment and discussion at a graduate level of applied health science as a multi-dimensional entity, while at the same time allows for individualized high-quality health science research with an individual researcher, or small group of researchers. The program combines the strengths of the in-depth discipline specific learning needed to prepare PhD graduates, with the benefits of collaborative learning with students and faculty in other disciplines. In particular, knowledge commonly used by several disciplines can be explored and critiqued as sources of theoretical and practical knowledge. The participation of faculty and students from several disciplines in the exploration and use of knowledge will enhance students' capacity for critical appraisal of the sources and uses of knowledge.

## Admission

Applicants must meet the University of Manitoba Graduate Studies general regulations for admission.

Applicants must possess a research-based Master's degree in a discipline or profession consistent with Applied Health Sciences. Applications from other disciplines will be considered on a case-by-case basis.

Prior to admission to the PhD program, the applicant will be required to specify his/her area of research interest, and to have corresponded with an eligible PhD advisor(s) (member of the Faculty of Graduate Studies), who is (are) a faculty member (primary appointment) in one of the four participating units, and who is (are) willing to accept them into the program.

Elements taken into consideration in determining the acceptance of the applicant into the program: grade-point average in Master's courses, previous courses taken, specific research interest of the applicant, student's rationale for choosing to apply to this program as opposed to a unidiscipline degree, current profile of students in the program, research funding and facilities availability through the proposed advisor(s) for the proposed research, and financial support for the applicant.

No admission tests are required for this program.

## Application Procedures

Applications (and all required documentation) must be submitted directly to the Faculty of Graduate Studies, University of Manitoba, 500 University Centre, Winnipeg, MB R3T $2 N 2$.

A completed application will include:
(a) a completed Faculty of Graduate Studies official application for admission form, together with the application fee and supporting documentation.
(b) a list of academic awards, publications and/or any research or other relevant experience.
(c) at least two letters of recommendation, including one from the student's intended PhD advisor, attesting to the suitability of the candidate for PhD studies in this program, and agreeing to accept them should they be admitted into the program; and one from the student's Master's degree advisor. One additional letter of recommendation may also be appended.
(d) a statement explaining the student's rationale for choosing to apply to this program.

In addition: a Supervisor Data form is to be completed by the intended PhD advisor providing information such as grant support, supervisory record, publication record, etc. This form should be submitted directly to the AHS PhD Program. To obtain a copy of the form, please contact the AHS program at ahs phd@umanitoba.ca.

It is the applicant's responsibility to ensure that all required documentation is received by the department in advance of the deadline.

Incomplete applications will not be considered.

## Application Deadlines

Applications (Canadian/US/International) will be accepted up to and including February 1 of each year. Applications will normally be accepted for the regular session only (September start-date). Applications for a January start-date will be considered on a case-by-case basis.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

The course-work requirement will consist of a minimum of twelve credits of 7000-level course-work consisting of at least three credits from any two of the four partners (6 credits).

Students will also be required to take the course "AHS 7000: Research and Practice in Applied Health Sciences", a lecture/seminar course in which faculty members from the four academic partners will participate (3 credits). Regular attendance is expected of all students.

The remaining three credit hours can be chosen from a combination of graduate courses from the four partners or from other faculties outside the four participating Faculties/Schools that offer graduate courses related to applied health sciences ( 3 credits).

Students in the program will also be required to take part in a monthly seminar in Applied Health Sciences with mandatory attendance for two years (Year 1: AHS 7002 Seminar I in Applied Health Sciences; Year 2: AHS 7004 Seminar II in Applied Health Sciences), a requirement for graduation. Students will also be required to take part in yearly research-

## 

## ACADEMIC CALENDAR

2012-2013 •
related activities (poster day, oral presentation day, etc.) involving student presentations. The monthly seminars will consist of an admixture of presenters from the University of Manitoba and from outside, with the focus on applied health science issues. Poster and oral presentations will involve directed research projects, research proposals, and applied health sciences issues.

An Advisory Committee will be established for each student within three months of registration into the PhD program. The Advisory Committee will consist of a minimum of three professors (members of the Faculty of Graduate Studies) and will include the thesis advisor(s), at least one professor from one of the four partner units other than the unit of the principal advisor, and one professor external to the four partner units. The principal advisor's primary appointment must be in one of the four partner units.

Students will be expected to complete a candidacy exam, consisting of an oral and written component, normally before the end of the second year of their program. The student must pass the written and oral phases of the exam to be considered a candidate for the PhD degree. Students must have completed all coursework prior to taking the candidacy exam.

The student's thesis research proposal must be approved by the Advisory Committee normally before the end of the second year after admission to the program. The research proposal, in the form of a document outlining the rationale and background for the study, specific objectives, and methods and procedures will be presented by the candidate in an oral format. Following the oral presentation, the candidate will defend their proposal.

The research program, culminating in the preparation and defense of a doctoral thesis, will be conducted according to the regulations of the Faculty of Graduate Studies of the University of Manitoba.

Second language reading requirement: None

Expected time to graduation: Four years

AHS 7000 Research and Practice in Applied Health Sciences Cr.Hrs. 3
The objective is to promote in students advanced knowledge, skills, and abilities needed to evaluate and conduct multidisciplinary, applied health research. This course is theoretical in nature and will require a high level of independence and participation by students.

AHS 7002 Seminar I Applied Health Sciences Cr.Hrs. 0 A monthly interdisciplinary seminar on current issues in applied health sciences, involving presentation by students, faculty, and invited speakers from inside and outside the University of Manitoba. Attendance and participation are required for AHS students during the first year of their doctoral program.

AHS 7004 Seminar II Applied Health Sciences Cr.Hrs. 0 A monthly interdisciplinary seminar on current issues in
applied health sciences, involving presentation by students, faculty, and invited speakers from inside and outside the University of Manitoba. Attendance and participation are required for AHS students during the second year of their doctoral program.

Architecture Graduate Program Information (M.Arch)

## Application Deadline

January 15 for all Canadian/US and International applicants.

September admissions only.

## Introduction

Architecture deals with a complex intertwining of artistic, social, cultural and practical concerns. The M.Arch. program provides students with the opportunity to learn the tools to synthesize these issues and develop the conceptual, practical and formal skills to take command of the subject. Much of the study is research based with an emphasis on structured learning through finding out, rather than prescriptive instruction. The program offers a diverse range of research areas and offers a choice of studios and seminars for M.Arch. students. All of our highly motivated professors are engaged in active research and/or practice.

## 

## ACADEMIC CALENDAR 2012-2013 •

Rather than having an emphasis on either the conceptual or practical side of architecture, our program concentrates on the relationship between the two, with many studios undertaking various forms of critical making as part of their teaching. Many of the studios run study trips abroad.

The department offers a lively environment to study the subject with diverse studios, history and theory seminars as well as innovative and engaging technology courses. An international array of lecturers augments the internal lecture program. The series combines world famous architects, artists and designers with emerging young talents. The Faculty of Architecture also runs an exceptional exhibition program.

## Program Information

There are different ways to become eligible to apply for the M.Arch Program.

## 1. Direct Entry

All applicants must meet the general admission and entrance requirements of the Faculty of Graduate Studies. The entry level into the program will be determined by the Department of Architecture Admission Committee's evaluation of the individual's application and supporting documents. Direct admissions to the M.Arch program requires that applicants have a minimum of an honours fouryear undergraduate degree in one of the following: Architecture, Architectural Design, Architectural Science, Environmental Design/Architecture option, or the equivalent, from a recognized college or university, with minimum GPA of 3.0 or equivalent $B$ in the last two full years ( 60 credit hours) of study.

For those applying with a University of Manitoba Bachelor of Environmental Design degree a minimum of " $\mathrm{C}+$ " in courses EVAR 4002, EVAR 4004, EVAR 4008, EVAR 4010 with a minimum GPA of 3.0 in the last two full years ( 60 credit hours) of study is required.

Please refer to the following web page for more information:
http://www.umanitoba.ca/faculties/architecture/media/AR 20
10sep27 MastersAdmissionGuidelines.pdfhttp://umanitoba.c a/faculties/architecture/programs/architecture/admissions pa ckage.html

## 2.Architecture Master's Preparation (AMP 1 \& AMP 2) Undergraduate Program

For applicants who have a recognized three or four year undergraduate degree in either a non-design discipline (such as Fine Art, Engineering, Science, Philosophy, Theatre, Psychology, Music, Film, English, History, Art History, Urban Studies, Geography, Commerce, etc)

OR
a design-related discipline (such as Interior Design, Landscape Architecture, Industrial Design, etc.) and wish to eventually apply to the M.Arch Program.

General Eligibility: All applicants must meet the general admission and entrance requirements set by Environmental Design:Architecture. The entry level into the program will be determined by the Department of Architecture Admissions Committee's evaluation of the individual's application and supporting documents.

NOTE: Upon successful completion of the AMP Program students wishing to continue into the M.Arch Program must officially apply for graduate admission. Evaluation is based on the student's progress in the AMP Program, as evidenced in a portfolio submission, GPA and a Faculty of Graduate Studies application.

Please refer to the following for AMP Information and Application Package:
http://www.umanitoba.ca/faculties/architecture/media/AR_20 10sep27_AMP_AppPkgInfoBulletin.pdf

## Research Facility

The Centre for Architectural Structures and Technology is an architectural research laboratory that embraces both the poetic and technical dimensions of architectural design. The work of C.A.S.T. seeks new boundaries for creative thought, design, and building technology. We do this work through physical explorations of materials, tools and building methods, the study of natural law, and the free play of imagination.

## http://umanitoba.ca/faculties/architecture/cast/

Ph.D.

A Ph.D. in Design and Planning is offered.
http://umanitoba.ca/faculties/architecture/programs/Phd/inde x.html

## Accreditation

Our graduate program received a full six-year accreditation in 2009.

In Canada, all provincial associations recommend a degree from an accredited professional degree program as a prerequisite for licensure. The Canadian Architectural Certification Board (CACB), the sole agency authorized to accredit Canadian professional degree programs in architecture, recognizes two types of accredited degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards. Master degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree,

## ACADEMIC CALENDAR

which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

ARCH 7000 Advanced Technology Topics I Cr.Hrs.1.5 One five-week seminar and/or project-based topics offering in-depth study of advanced building systems, technology, and methods. Options are grounded in faculty research and build upon foundation technology courses. Some topics may be deemed mandatory at the department's discretion. Topics may be taken in the fall and/or winter terms.

ARCH 7010 Advanced Technology Topics 2 Cr.Hrs.1.5 One five-week seminar and/or project-based topics offering in-depth study of advanced building systems, technology, and methods. Options are grounded in faculty research and build upon foundation technology courses. Some topics may be deemed mandatory at the department's discretion. Topics may be taken in the fall and/or winter terms.

ARCH 7020 Research Topics: History and Theory 1 Cr.Hrs. 1.5
One five-week lecture, seminar and/or project-based topics offering an in-depth study of an historical and/or theoretical subject. Options are grounded in faculty research and build upon foundation history/theory courses. Some topics may be deemed mandatory at the department's discretion. Topics may be taken in the fall and/or winter terms.

ARCH 7030 Research Topics: History and Theor y 2 Cr.Hrs.1.5
One five-week lecture, seminar and/or project-based topics offering an in-depth study of an historical and/or theorectical subject. Options are grounded in faculty research and build upon foundation history/theory courses. Some topics may be deemed mandatory at the department's discretion. Topics may be taken in the fall and/or winter terms.

ARCH 7040 Professional Practice Cr.Hrs. 3
Is concerned with the duties and responsibilities of an architectural practice; its divisions, office organization and administration, in Manitoba and Canada. The lectures relate in scope and standard to current models of practice and their requirements, including issues of building economics and contruction cost control.

ARCH 7050 Arch Studio 5 and Comprehensive Program Report Cr.Hrs. 9
Develop design explorations and seek to clarify relations between architectural criteria and the urban/natural environments in national or international contexts. Conceptual, programmatic, material, technological, economic, and political principles and systems employed are to be evident in the Comp. Prog Report.

## ARCH 7060 Arch Studio 6 Cr.Hrs. 9

The previous term's investigations are further developed into a comprehensive architectural design proposal. The thorough integration of design and programming criteria, with building and environmental systems and assemblies are examined.

ARCH 7070 Design Research Studio Cr.Hrs. 9
This final design studio involves concerted research and design explorations of an individually defined subject of
inquiry, within a selected studio thematic focus. These investigations are intended to prepare students for their final Design Thesis.

ARCH 7080 Technology Thesis Report Cr.Hrs. 3 Technology Thesis Report is an advanced project-based course done in conjunction with the Design Thesis project. The report is related to an individual student's design thesis topic, focusing on specific aspects of technology and applied tech. research. Advisor supervision and external engineering consultancy or agreed equivalent are required.

ARCH $\mathbf{7 3 5 0}$ Legal Aspects of Architectural
Practice Cr.Hrs. 3
(Formerly 050.735) discusses the importance of the knowledge of law as it relates to professional practice of architecture, including a discussion of the historical development of legal responsibilities of a practicing professional generally and of architects specifically. There is also discussion of trends in the development of professional responsibility and liability.

## Biochemistry and Medical Genetics

Head: Dr. L. Simard
Campus Address/General Office: 336 Basic Medical Sciences Building, 745 Bannatyne, Winnipeg, MB, R3E 0J9
Telephone: (204) 7893593
Fax: (204) 7893900
Email Address: bmg@umanitoba.ca
Website: http://umanitoba.ca/medicine/biochem/
Graduate Student Assistant: Mrs. T. Sarkar

Academic Staff: Please refer to the department website for Faculty
info:http://umanitoba.ca/faculties/medicine/units/biochem/fac ulty/facultylists.html3amara

The Department of Biochemistry and Medical Genetics is the result of a merger of the Department of Human Genetics and the Department of Biochemistry and Molecular Biology in June 1999.

## Fields of Research

Work undertaken by faculty members and their trainees is frequently multidisciplinary and crosses many pillars of health research including basic and clinical sciences and population health. Various aspects of the molecular and biochemical basis of Alzheimer's disease, breast cancer, cancer biology, lysosomal storage diseases, cystic fibrosis, diabetes, neuromuscular and cardiovascular diseases are being investigated. Model systems are being created in mouse, C. elegans, and S. cerevisiae. Areas of research include development, signal transduction, steroid hormone receptor action, chromatin structure, transcription and gene regulation, biosynthesis and transport of membrane proteins, membrane lipid metabolism, arachidonate metabolism.

## 

ACADEMIC CALENDAR 2012-2013 •

Other areas of research include dysmorphology, the molecular basis of genetic disease, prenatal diagnosis and screening, as well as community genetics. For specifics, please click on our Faculty info page.

## Research facilities

The administrative office and some faculty are housed on the 3rd floor ( 24,000 square feet) of the Basic Medical Sciences Building located at the Bannatyne Campus of the University. Research resources include preparative and ultracentrifuges, visible and ultraviolet spectrophotometers, spectrofluorometers, luminometers, liquid and gamma scintillation spectrophotometers, high pressure liquid chromatography, radiochromatogram scanners, instruments for gas, liquid, paper and thin-layer chromatography and electrophoresis, phosphoimagers and a variety of modern instruments for molecular biology. The department is wellequipped with bacteria/cell/tissue culture facilities and coldrooms and has access to state-of-the-art transgenic mouse modeling facilities.

## Biochemistry \& Medical Genetics

Pre-M.Sc. in Biochemistry and Medical Genetics
Admission Requirements: A minimum three-year bachelor's degree with a 3.5 GPA ( 4.5 scale), or equivalent, in the previous 60 credit hours of university study, or equivalent (normally 2 years). In addition, during this period there should be no grade less than C+ in any biochemistry, genetics, or life science course deemed relevant to the proposed course of study.

Program Structure: The Pre-Master's program is designed to bring the standing of the student to the level of that of an Honours B.Sc., with an adequate background in biochemistry and/or genetics. Pre-Master's students are required to take up to 30 credit hours of course work, depending on the type of degree previously obtained and their prior courses. . The course work to be undertaken ( 3000 and 4000 level courses) will be determined by a provisional advisory committee, headed by the Chair of the Graduate Student Affairs Committee.

Pre-Master's students are not required to do a graduate research project and will not receive a stipend.

Qualification for Admission to the Master's Program: A Pre-Master's student must attain a grade point average of 3.5 or better, with no grades below a C+. Upon completion of the course work, the student may then apply for admission to the Master's program in the Department of Biochemistry and Medical Genetics.

## M.Sc. in Biochemistry and Medical Genetics Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Entrance Requirements

The applicant must have an appropriate background in biochemistry, genetics, or a closely related subject area, with a minimum 3.5 GPA ( 4.5 scale), or equivalent, in the previous 60 credit hours of university study, or equivalent (normally 2 years). In addition, during this period there should be no grade less than $\mathrm{C}+$ in any biochemistry, genetics, or life science course deemed relevant to the proposed course of study.

Admission will depend upon the availability of a Faculty Member to supervise the student and resources to support the student's research.

In rare cases, applicants with GPA's lower than 3.5 may be admitted to this department, based upon individual circumstances and the support of their prospective advisors. Students in this situation should consult with their prospective advisor and the Chair of the Graduate Student Admissions Committee.

## Program Requirements

Program Requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language reading requirement: none

Expected time to graduate: $2-3$ years

## Ph.D. in Biochemistry and Medical Genetics Admission

A thesis-based Master's degree (of at least 2 years in duration), or equivalent, in biochemistry, genetics, or a closely related field, from a Canadian university is required for direct admission to the Ph.D. program. In addition, a cumulative GPA of 3.5 ( 4.5 scale), or equivalent, no grade less than $\mathrm{C}+$ in the courses taken during the Master's program is required.

Generally, there is no direct entry into the Ph.D. program for students with Master's degrees from non-Canadian universities. Applications will be assessed by the admissions committee on an individual basis; in most cases students with Master's degrees from international universities are admitted into the Master's program in this department. They may subsequently request for a transfer into the Ph.D. program, if eligible.

Admission will also depend upon the availability and willingness of a Faculty Member to supervise the student and resources to support the student's research

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language requirement: none

Expected time to graduation: $4-5$ years

Direct entry from the Bachelor's degree to the Ph.D. degree in this department would only occur in exceptional circumstances. Prospective students would be expected to have extensive research experience, in addition to an outstanding academic background, to be considered for this route. Once admitted, these students must complete at least 18 credit hours of course work in addition to their thesis research.

## Transfer to a Ph.D. program:

Students registered for a Master's degree who has made excellent progress over the first $\sim 20$ months in their program may be considered for transfer to the Ph.D. program. The transfer process, as outlined in the BMG Graduate Student Academic Guide, must be completed within 24 months of the student's commencement in the Master's program.

Such transfer will be considered only when:

1. Both the student and the advisor request, in writing, that the student transfers to the Ph.D. program. This request should be made to the Chair of the Graduate Student Affairs Committee.
2. At least 12 credit hours of course work, exclusive of the mandatory 'Research Seminar' course, have been successfully completed (GPA >3.5).
3. The student is able to demonstrate a high potential for success in the Ph.D. program. This will be shown by their research and course work accomplishments to date, as well as their ability to communicate and defend their findings and future plans in both a written and an oral format, as outlined in the BMG Graduate Student Academic Guide.

The Transfer to Ph.D. examining committee will consist of the student's advisory committee and the Chair of the Graduate Student Affairs Committee, or his/her designate, as Chair.

A student can request transfer from the Master's to the Ph.D. program only once. Students who do not transfer may apply to the Ph.D. program after completing their Master's program.

NOTE: Admissions are considered on a case-by-case basis by the Graduate Student Admissions Committee and are based upon transcripts, English proficiency (if required), letters of recommendation, and evidence that the applicant's Master's program was thesis based. Prospective students must have a thesis advisor before they will be considered for admission to the department.

## Biochemistry and Medical Genetics -7000 Level <br> BGEN 7000 Research Seminar M.Sc. Cr.Hrs. 1

Consists of presentations of the student's current research. For Masters students only.

BGEN 7020 Proteins Cr. Hrs. 3
(Formerly 137.702) Three hours per week, one term. Purification, bioinformatics, characterization, expression, structure, folding and engineering of proteins.

BGEN 7030 Enzymology Cr.Hrs. 3
(Formerly 137.703) Two hours per week, one term. Kinetics and mechanisms of action of enzymes.

BGEN 7040 Seminars in Human Genetics Cr.Hrs. 3 (Formerly 137.704) Current research topics in human genetics. A term paper and oral presentation will be required of each student.

BGEN 7070 Special Topics in Human Genetics Cr.Hrs. 3 (Formerly 137.707) An assignment, tutorial and discussions course taken only through consultation with the head of the department. The topics will vary depending upon students' needs and interests, and may include specialized topics not available in regular course offerings.

BGEN 7090 Principles and Practice of Human
Genetics Cr.Hrs. 3
(Formerly 137.709) Lectures, tutorials and assignments designed to review major topics in human genetics and give practical experience in the analysis and interpretation of human genetics data and critical review of published work.

BGEN 7120 Laboratory Methods in Human and Medical Genetics Cr.Hrs. 3
(Formerly 137.712) A seminar and assignment course covering an outline of the methods currently in use in human and medical genetic diagnostic and research laboratories. The principles of cell culture, cytogenetic, molecular and biochemical genetic techniques that are usedin the diagnosis of human genetic disease and the study of human variation will be reviewed. Students will undertake a practical assignment and write a report. Prerequisite: 125.709 or consent of instructor.

## BGEN 7130 Genetic Epidemiology of Human

Populations Cr.Hrs. 3
(Formerly 137.713) Lectures, tutorials and assignments to evaluate the etiology, distribution and control of disease in groups of relatives and inherited causes of disease in population. Prerequisite: 125.709 or consent of instructor.

BGEN 7140 Clinical Genetics Cr.Hrs. 3
(Formerly 137.714) Focus is on clinical application and principles of single gene, multifactorial and teratogenic causes of disease. Students will learn by use of reading assignments, tutorials, computer-assisted diagnostic tools and first hand experience in genetics clinics. Major term paper required. One term. Prerequisite: 125.709 or consent of instructor.

## ACADEMIC CALENDAR

BGEN 7160 Theory and Practice of Genetic
Counselling Cr.Hrs. 3
(Formerly 137.716) Review of general theore-tical and practical aspects of genetic counselling. Students will be instructed in interviewing techniques. Case presentations will be reviewed and opportunities to observe and partake in genetic counselling will be provided. Term paper. Prerequisite: 125.709 or consent of instructor.

BGEN 7180 Clinical and Molecular Cytogenetics Cr.Hrs. 3 (Formerly 137.718) Cytogenetic methodology; chromosome architecture; karyotype interpretation; indications for referral; chromosome syndromes and anomalies; prenatal diagnosis; chromosomal basis of oncogenesis; flow cytometry; immunogenetics; fluorescent in situ hybridization; the application of molecular technology to chromosome analysis. Prerequisite: 125.709 or consent of instructor.

BGEN 7200 Topics in Biochemistry 1 Cr.Hrs. 3 (Formerly 137.720) Advanced study and reading on two topics chosen by the course director in consultation with the student's supervisor. Topics include but are not limited to Neurochemistry, Lipids, Carbohydrates, Biomembranes, Inborn Errors, Cystoskeleton Proteins.

BGEN 7210 Topics in Biochemistry 2 Cr.Hrs. 3 (Formerly 137.721) Advanced study and reading on two topics chosen by the course director in consultation with the student's supervisor. Topics include but are not limited to Neurochemistry, Lipids, Carbohydrates, Biomembranes, Inborn Errors, Cystoskeleton Proteins.

BGEN 7250 Gene Expression Cr.Hrs. 3 (Formerly 137.725) Three hours per week, one termChromatin structure. Structure and function of sequence-specified DNA-binding proteins. Control of transcription.

BGEN 7260 Cellular and Molecular Biochemistry Cr.Hrs. 3 (Formerly 137.726) Three hours per week, one term. Recent research advances on the study of cellular components, assembly and organization of plasma membrane components, cell signalling, and cell cycle.

## Biochemistry and Medical Genetics -8000 Level

BGEN 8000 Research Seminar Ph.D. Cr.Hrs. 1
Consists of presentations of the student's current research. For Ph.D. students only.

## Biological Sciences

Head: J.E. Anderson
Campus Address/General Office: 212 Biological Sciences Building
Telephone: (204) 4749245
Fax: (204) 4747604
Email Address: janders@cc.umanitoba.ca
Website: Biological Sciences

The department offers graduate training leading to Master of Science (M.Sc.) and Doctor of Philosophy (Ph.D.) degrees in a broad range of biological disciplines in both field and laboratory research. Programs in the biological sciences represent a unique concentration of expertise in wholeorganisms, and a wide range of research in ecological, environmental, evolutionary, physiological, cellular and molecular sciences.

Expertise in the major plant, animal, and fungal groups in grassland and boreal forest ecosystems are represented in the department: cell and developmental biology, biotechnology, molecular biology and genetics, ecology and conservation biology, vascular and nonvascular plants, fungal and algal biology, physiology, systematics, evolutionary and coevolutionary biology, animal modelling, aquatic biology and aquatic organisms, fisheries, behavioural ecology, parasitology, and muscle biology.

Graduates are equipped to embark on a career in botany, zoology and related fields, including environmental science, natural resource management, agriculture and forestry, fisheries and wildlife management, and biomedical sciences. Former students are successfully employed in research, teaching or administrative positions in academic, industrial or governmental settings, as biological consultants and in biomedical agencies in Canada and around the world.

The department is able to foster an informal atmosphere with good interaction between faculty and graduate students. Students are often successful in Commonwealth, NSERC, CIHR, Faculty of Science, and University of Manitoba Graduate Fellowship and Scholarship competitions.

## Fields of Research

## Ecology, Evolution and Fisheries:

Fleet dynamics, fisheries management, fish population dynamics, interaction between behaviour and population processes; emphasis on quantitative analysis, mathematical and simulation modelling based upon historical data and field work when appropriate.

Wetland foodweb structure and dynamics, invertebrate grazer-algal interactions; Cladocera ecology, palaeoecology of communities in the littoral zone of lakes, systematics and evolution.

Collaborative multi-species, multi-scale ecosystem examination of search strategies of seabirds for fish; spawning habitat selection by a keystone forage fish.

Molecular systematics, biogeography, and conservation genetics of fish (particularly lampreys and salmonids) and other aquatic organisms (microsporean parasites and dreissenid mussels).

Circumpolar Aboriginal peoples and their domestic economies, hunting and trapping, land use, land claims, and impacts of northern development on their lifestyles.

Evolution of hemoglobin oxygen affinity in mammals in relation to exploitation of aquatic, northern, and subterranean habitats; molecular evolution of beta-globin gene cluster in eutherian mammals; mammalian molecular phylogenetics.

Ecosystem structure and function in freshwater wetlands: ecophysiology and ecotoxicology of benthic and planktonic algae, and aquatic macrophytes; paleolimnology.

Fungal ecology in aquatic and terrestrial ecosystems: saprotrophs and nutrient release, fungi in forest ecosystems.

Economic botany: native plant products and special (nontimber) forest products, and the role of fungal secondary compounds in nature.

Conservation ecology: habitat fragmentation, plant dispersal, effects of disturbance on biodiversity, ecological knowledge and ecosystem management, restoration of plant communities.

Evolutionary biology of plants and fungi: pollination biology, plant-plant interactions and plant-fungal interactions, coevolution, phylogeny and molecular evolution.

Systematics: molecular, morphological, and phytogeographic studies of flowering plants, conifers, ferns and allies, bryophytes, algae, and fungi.

Applied and theoretical population and community ecology of forest and grassland ecosystems: mathematical and statistical ecology, ecological modelling.

## Behavioural Ecology:

Comparative and experimental studies addressing factors that contribute to the evolution and maintenance of sociality, and the roles that communication and cognitive abilities play in social species (particularly ground-dwelling squirrels and slave-making ants).

Behavioural and evolutionary interactions between the parasitic cowbirds and their passerine hosts. Cowbird selection of host nests; host quality; nest defencedefense; host tolerance of parasitism; nest placement; consequences of parasitism.

## Physiology:

Metabolic, thermal and respiratory physiology of moles and shrews.

Thermal biology, diving physiology and bioenergetics of northern semiaquatic mammals, mainly muskrat and beaver; physiological problems encountered during swimming and diving in cold water; seasonal bioenergetics and nutritional studies of these species.

Endocrine regulation of salt and water balance in fish, particularly the physiological actions of the renninangiotensin system, natriuretic peptides and neurohypophysial peptides on cardiovascular, renal and extra-renal function.

Stress physiology in forest ecosystems: plant adaptation to salts, pollutants and anthropogenic disturbance (mining, forestry).

Neurophysiology; regulation of ion channel proteins and electrical activity in neurons of the mammalian central nervous system; neurobiological control of food intake.

Transport physiology; mechanisms of osmoregulatory NaCl transports (salt and water balance) and nitrogen excretion in invertebrates and lower vertebrates; physiologic and molecular responses to ammonia stress.

## Parasitology:

Comparative immunology of fish and mammals, particularly mucosal immunity. Host-parasite interactions, including transmission of fish parasites and the role of host immune responses in protection and regulation of parasite populations.

Host-parasite relationships of metazoan parasites of invertebrates. Life history strategies of free-living triclad flatworms. Zoogeography and community ecology of Unionidae.

## Cell and Developmental Biology:

Oogenesis, early development and cell differentiation in invertebrates. Origin and fate of germ cells. Cellular mechanisms that regulate oogenesis and the establishment of polarity.

The roles of the cytoskeleton, bioelectrical properties and ions in oogenesis and development using an array of microscopical and electrophysiological techniques.

Early development in zebrafish, specifically the genes and gene interactions involved in early developmental decisionmaking processes. Genetic control of vertebrate (mainly zebrafish) embryonic development. Gap junction mediated intercellular communication: structure and post-translational modifications of the constituent connexin proteins, the role of specific connexins in the embryonic development of zebrafish, control of connexin gene expression.

Cellular mechanisms directing the formation of tissues and organs, using molecular, cellular, morphological and physiological techniques.

Molecular genetic control of reproduction in insects, with emphasis on mosquitoes; molecular basis of sex determination and sexual differentiation in invertebrates.

## 

ACADEMIC CALENDAR

Role of RNA interference and microRNAs in regulating gene expression and development. Role of transposable elements as sources of genetic variation and mutation.

Cellular mechanisms directing the normal and pathological physiology of muscular dystrophy and age-related atrophy, muscle satellite cell activation, and impact of disease and regeneration on tissue and animal structure and function including testing of potential treatment modalities, using molecular, cellular, biochemical, morphological, and functional assays.

Plant biotechnology: applied bioremediation, genetic signaling and development, molecular techniques and ecology, plant structural imaging and analysis, proteomics, systematics and genomics, ultrastructural microscopy and microtechniques.

Developmental anatomy and cytology of plant reproductive systems: cytochemistry and ultrastructure

## Research facilities

The Department has facilities in the Buller Building, the Duff Roblin Building, and a new "Biological Sciences Building" which was the former Pharmacy Building, on the Fort Garry Campus including an extensive, modern, nationally and internationally recognized herbarium collection (WIN) consisting of a vascular plant collection and a cryptogamic collection. The Department also has special facilities for animal sciences research including a large animal colony for small terrestrial and aquatic animals. Both animal housing and plant growth facilities are operated by trained technical staff with experience and expertise to support research and teaching.

Facilities include greenhouses and growth chambers; a scanning-transmission electron microscope; plant tissue, fungal and algal culturing facilities; research areas fully equipped for study of plant development, ecophysiology and plant interactions; modern instrumentation for molecular, genetics and evolutionary biology studies; interference, fluorescence and transmission electron microscopes; tissue culture; cellular biology investigations; patch-clamping facilities; digital image analysis equipment; quantitative biology; and ecological analysis computerized facilities.

Field station facilities are provided at the Delta Marsh Field Station which provides year-round research facilities and accommodation for biological research in the 17,000 hectare Delta Marsh on the southern shore of Lake Manitoba. Other field station facilities are available to faculty members and their graduate students at Star Lake (Whiteshell Provincial Park), the Experimental Lakes Area (NW Ontario) and the Churchill Northern Studies Centre. The location of the facilities permits work on a variety of prairie, marsh and woodland habitats and on a wide spectrum of inland lakes and rivers, as well as Arctic tundra and marine habitat along the coast of Hudson Bay. The University Field Station, fully equipped with living accommodations and laboratory space, is 80 km away at Delta Marsh on the south shore of Lake Manitoba. Additional field studies are conducted from the Experimental Lakes Area near Kenora, Ontario, in
conjunction with the Freshwater Institute, Winnipeg. Broad collaborations with other scientists within and external to the University of Manitoba further enrich the access to training facilities for faculty and graduate students.

## M.Sc. Biological Sciences, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. If a student applies with a threeyear general B.Sc. degree or equivalent, a pre-Master's program must be taken which will be individually prescribed. Students with a four-year major or honours degree apply for direct entry into the M.Sc. program. If a student applies with a three-year general B.Sc. degree or equivalent, additional courses and/or a pre-Master's program must be taken to be equivalent to the required four-year degree. Application Deadlines: Applications must be received in the Faculty of Graduate Studies by the following dates.

Session Start Date Canadian/US International Regular September June 1 March 1Winter January October 1 July 1Spring May February 1 November 1Summer July April 1 January 1

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The program requires completion of a research thesis and course work consisting of a minimum of one core course and one additional BIOL 7000 course. Study and research will extend to a minimum of twelve months. All students must submit a research-based thesis and defend it orally. Please see the department website for supplementary regulations for each of the former departments and for those of the new department the Department of Biological Sciences.

Second language reading requirement: none

Expected time to graduate: two years

## Ph.D. Biological Sciences,

 AdmissionAdmission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Candidates normally have completed a M.Sc. degree before entering the Ph.D. program; however under certain circumstances transfer from a M.Sc. to Ph.D. program and entry into the Ph.D. without a M.Sc. is possible. Individual qualifications other than these will be considered.

Applications must be received in the Faculty of Graduate Studies by the following dates:

Session Start Date Canadian/US International Regular September June 1 March 1Winter January October 1 July 1Spring May February 1 November 1Summer July April 1 January 1

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Please see the department website for supplementary regulations for each of the former departments and for those of the new departmentDepartment of Biological Sciences.

Second language requirement: none

Expected time to graduation: three four years

BIOL 7100 Core Skills in Biological Sciences Research Cr.Hrs. 3
Learning skills for a career in scientific research in Biological Sciences including: using the scientific method, applying for NSERC funding, maintaining a CV, abstract writing, ethics in research, research protocols and biosafety and biohazards, statistical designs and their assumptions, literature searching, critical thinking, critiquing the scientific literature, making teaching and research presentations. Not to be held with Methodology of Research ANAT 7090.

BIOL 7140 Advanced Physiology Cr.Hrs. 6 (Formerly ZOOL 7140, 022.714) A in-depth study of topics related to how changing internal and external environments influence life sustaining physiological processes. Topics include plant and animal stress, endocrine \& electrophysiology, metabolism and molecular biology of solute transport.

BIOL 7142 Advanced Physiology Cr.Hrs. 3 An in-depth study of topics selected from physiological research of the department including plant, animal, stress physiology, ecophysiology, electrophysiology, endocrine or neurophysiology and others. Topics will be focused on the research area of each student to acquire specialized knowledge in a particular topic.

BIOL 7202 Evolutionary Biology Cr.Hrs. 3
An in-depth study of topics selected from research interests within the department that may cover an evolutionary theme. This course will allow students to acquire or expand on specialized knowledge in a particular evolutionary topic through a series of readings or a combinationof readings and lectures.

BIOL 7220 Critical Thinking in Biological Sciences Cr.Hrs. 3 A core graduate level course within the Ph.D. program designed to stimulate discussion and thought in key areas applicable to the student's research discipline.

BIOL 7240 Wetland Ecology Cr.Hrs. 6 (Formerly BOTN 7240, 001.724) A study of marsh, bog, and fen communities, with emphasis on their history, soil-plant relationships, and species distribution. Field work at the University Field Station (Delta Marsh) and nearby bog and
fen sites will be an integral part of the course.
BIOL 7250 Advanced Evolution and Systematics Cr.Hrs. 3 This course will first consider theoretical and practical aspects of systematics, and then consider how systematic and population-level studies have illuminated our understanding of evolutionary processes.

BIOL 7302 Environmental Biology and Ecology Cr.Hrs. 3 An in-depth study of topics selected from environment and ecology interests of the department, including population ecology, fisheries biology, plant/animal interactions, animal behaviour, ecosystem dynamics and restoration. Topics will be chosen to acquire specialized knowledge in a particular topic.

BIOL 7352 Aquatic Biology Cr.Hrs. 3
An in-depth study of topics covering all aspects of aquatic biological interests in the department including wetland ecology, limnology, oceanography, toxicology, conservation, and others. Topics will focus on the research interests of students so they may acquire specialized knowledge in particular areas.

BIOL 7360 Problems in Biological Statistics Cr.Hrs. 3 (Formerly ZOOL 7360, 022.736) The course discusses statistical problems and techniques which specifically apply to biological research. Laboratory exercises will be based primarily on examples from field research. Prerequisite: STAT 3130 (or 005.313 or 005.333 ) or the consent of the instructor.

BIOL 7370 Special Topics in Algal Ecology Cr.Hrs. 6 (Formerly BOTN 7370, 001.737) Directed study and project(s) in selected aspects of the ecology of freshwater phytoplankton, periphyton and metaphyton.

BIOL 7440 Methods and Approaches to the Analysis of Biological Data Part 1 Cr.Hrs. 3
(Formerly BOTN 7440, 001.744) Methods for handling biological data arising from field surveys; planning and undertaking biological studies. Theory of experimental design, vegetation sampling, multivariate analysis, techniques of remote sensing, spatial analysis and modeling. Offered in alternate years.

BIOL 7450 Methods and Approaches to the Analysis of Biological Data Part 2 Cr.Hrs. 3
(Formerly BOTN 7450, 001.745) Analysis of complex biological data sets arising from field surveys, vegetation sampling and remote sensing using techniques from Part 1 (BIOL 7440 or BOTN 7440). Offered in alternate years.

BIOL 7502 Cell and Developmental Biology Cr.Hrs. 3
An advanced topics course which will be an in-depth study of current research topics in cellular and developmental biology. An undergraduate background in cell and developmental biology or related areas is required.

BIOL 7530 Molecular Biology Techniques for Eukaryotes Cr.Hrs. 3
A techniques-intensive course focusing on the understanding of molecular biology techniques, troubleshooting problems, writing reproducible Materials and Methods for publications, accurate recording of procedures in lab journals, and bioinformatics excersises. Not to be held
with the former 001.742 or 001.746 or BOTN 7460 .
BIOL 7540 Methods for Analysing Biological Data Cr.Hrs. 3 A survey of methods and approaches for analysing biological data containing many variables, suitable for graduate students. Offered in alternate years. Not to be held with BIOL 4312 or the former BOTN 7440 or BOTN 4650.

BIOL 7580 Topics in Plant Pathology Cr.Hrs. 3 (Formerly BOTN 7380, 001.738) Current and specialized aspects of plant pathology studied through lectures, seminars, prescribed readings and laboratory projects. Offered in alternate years. Prerequisite: BIOL 4250 or the former BOTN 4210 or 001.421 or equivalent, or consent of department head.

BIOL 7590 Pathology of Trees and Shrubs Cr.Hrs. 3 (Formerly BOTN 7390, 001.739) Lectures, seminars and readings focussing on special problems relating to the pathology of woody plants. Emphasis on ornamental shrub, shade tree, and forest tree species of local importance. Offered in alternate years. Prerequisite: BIOL 4250 or the former BOTN 4210 or 001.421 or equivalent, or consent of department head.

BIOL 7600 Topics in Biological Sciences Cr.Hrs. 3 A general topics course to reflectan in-depth study of current interest topics to extend or acquire specialized knowledge in a particular area of biological interest. A subtitle may be added to the current title to reflect specialized interests.

BIOL 7602 Directed Studies in Biological Sciences Cr.Hrs. 3 A course to provide a broad knowledge of different topics within Biological Sciences peripheral to the specific topic of the student's thesis and will not become the introductory chapter of the thesis. Students will complete assignments by themselves but will participate and be evaluated as a group.

BIOL 7880 Ecology Project Course Cr.Hrs. 3
(Formerly BOTN 7880, 001.788, ZOOL 7880, 022.788) This course provides experience in the organization and execution of team research into current ecological issues. Teams consist of a graduate student team leader, 3-6 undergraduates, and a faculty advisor. Each project team identifies a specific research question, creates a proposal for answering it, and presents their results in a public forum.

## Biosystems Engineering

Head: D. (Danny) Mann
Campus Address/General Office: E2-376 EITC
(Engineering Building)
Telephone: (204) 474-6033
Fax: (204) 474-7512
Email Address: headbio@ms.umanitoba.ca
Website:
umanitoba.ca/faculties/engineering/departments/biosystems/
Academic Staff: Please refer to Faculty
website:umanitoba.ca/faculties/engineering/departments/bio systems/

The Department of Biosystems Engineering offers graduate programs leading to M.Sc., M.Eng., and Ph.D. degrees. The
graduate programs in the department focus on applications of engineering in biological systems. Strong emphasis is placed on assisting graduate students to gain a broad range of skills and experience in conducting interdisciplinary research, in understanding the interrelationships among physical and biological factors, and in written and oral communication.

## Fields of Research

Environmental Engineering: Environmental impact assessments of agricultural and food production; biological reduction of wastewater; membrane bioreactor technology; management and utilization of agricultural and food processing wastes; management of livestock manure; biofiltration; environmental odours; protection and remediation of contaminated soil and groundwater; site preparation and selection.

Bio-Processing: Infrared processing of food; superheated steam drying; extraction technologies for complex oil/juice crops; modified atmosphere storage of meat, fruits, and vegetables; fast freezing of fruits; mathematical modelling of food systems; physical, thermal, and rheological properties of foods; water activities of foods; shelf-life, flow of bulk solids; bulk properties of grains and powders.

Biofuels: bioengineering for biofuels; bioreactors; anaerobic digestion of waste for biogas.

Biosensors: bioengineering of methods to detect and monitor biological materials (nucleic acids, proteins, lipids) and/or microorganisms (viruses, bacteria).

Post-Harvest Preservation of Grains: Grain storing and drying systems; computer simulation of stored-grain ecosystems; physical methods of controlling insects and micro-organisms; machine vision for automated handling and classification of grain; properties of grains and oilseeds; expert systems for managing stored products.

Bio-Imaging: Computer analysis of images for grading, orientation, and automation; near-infrared (NIR) spectroscopy; development and application of neural networks.

Power and Machinery: Harvesting and processing of new crops such as hemp; precision agriculture; guidance systems for agricultural machinery; ergonomics of agricultural machinery; assistive technologies for farmers with disabilities; tillage and seeding; soil-machine interaction; equipment for manure handling.

Soil and Water Engineering: Irrigation and drainage systems; flow and contaminant transport in porous media; soil-plantwater relations.

Light-Frame Structures: Structural aspects of light-frame buildings; use of wood and other structural materials; bulk solids storage structures (bins and silos).

## 

ACADEMIC CALENDAR
2012-2013 •

Bio-Environment: Animal production environment; plant growth environment; energy conservation in animal and plant production; environments in buildings designed for biological processes.

## Research Facilities

Alternative Village: The Alternative Village is an outdoor laboratory that is dedicated to research, testing, and training related to alternative energy technologies and building envelope systems. The centerpiece of the Alternative Village is the Straw-Bale Building, however, there are numerous other small structures including a greenhouse with a heat storage wall. Other equipment includes: universal testing machines; loading frames for structural testing of wood beams, columns, and trusses.

Agricultural Ergonomics Lab: The Agricultural Ergonomics Lab has been developed to research the ergonomic and safety issues associated with agricultural machines. The lab includes: faceLAB eye-tracking system; tractor-driving simulator; pto entanglement test apparatus; sound level meter.

Biofuels, Biotechnology and Fermentation Lab: The research activity within this lab is dedicated to the production of biofuels (ethanol, biodiesel, hydrogen) using various sources of biomass. Current research focuses on understanding genetics of bacteria in order to develop strategies to increase biofuel production. Research equipment includes: bioreactors; ion chromatography system; gas chromatograph, gel electrophoresis apparati; quantitative PCR system; centrifuges; electroporation equipment.

Bioprocessing Engineering Lab: Processing and drying of food using superheated steam has several advantages over conventional hot-air drying. Mathematical modeling and computer simulation are used to predict and compare the performance of various systems. The lab includes: superheated steam processing drier; texture analyzer; supercritical fluid extraction system; instron machine; satake milling unit; colorimeter, scanning differential calorimeter; aspirator.

Computational Optimization and Geometric Modeling Lab: Computational methods are used to research topics related to biomedical/biological imaging, pattern recognition, spectroscopy, and hyperspectral imaging. The lab includes: Fourier transformed infrared (mid IR) microscope with ATR imaging; chemometric analysis software; finite element modeling (ABACUS).

Grain Storage Research Lab: The Canadian Wheat Board Centre for Grain Storage Research is a $1400 \mathrm{~m}^{2}$ state-of-theart laboratory dedicated to research on grain storage and handling. The facility includes: machine vision equipment; a soft x-ray unit; near-ambient, high temperature, infrared and microwave driers; a fan-testing unit; instrumentation for measuring loads in grain storage structures; equipment to measure physical, thermal, biological, and quality characteristics of grain and oilseeds; thermal disinfestation
systems; environmental chambers; grain handling and cleaning equipment; and several grain bins.

Imaging and Food Quality Assessment Lab: Research conducted in this lab focuses on providing safe and healthy food to humans and livestock. The lab includes: Raman microscope; near-mid infrared hyperspectral imaging system; IR microscope; soxtec fat extractor.

Odour Research Lab: The Odour Research Lab is used to quantify and analyze odour samples, and to evaluate various odour-reduction technologies. Equipment available in the lab includes: olfactometer; electronic nose; Jerome meter; air sampling devices.

Soil Dynamics \& Machinery Lab: The Soil Dynamics \& Machinery Lab is used to research soil-tool-material interactions associated with tillage machines and processing of agricultural fibres. The lab includes: soil bin; particle flow software.

Soil \& Water Engineering Lab: The Soil and Water Engineering Lab is dedicated to the areas of irrigation, drainage, remediation of contaminated soils and groundwater, and instrumentation for soil and water monitoring. The lab includes: Rhizotron for measuring water and nutrient status within the root zone; permeameters; suction cup lysimeters; electrical conductivity meters; electromagnetic field survey instruments; water flow and level sensors; TDR and miniprobes.

Waste Management Lab: The Waste Management Lab is dedicated to research involving livestock waste and municipal wastewater, including movement of nutrients within the environment. The lab includes: pilot-scale portable membrane bioreactor; three complete fermentation systems; water waste sample analysis capacity. A pilotscale anaerobic digestion facility is located at the Glenlea Research Station.

## M.Sc. in Biosystems Engineering Admission

For admission into the M.Sc. program, applicants are normally required to hold a Bachelor's degree in Biosystems Engineering or equivalent from a recognized university. Applicants with degrees in related areas may be recommended for admission by the Department Head.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date.
International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

## 

ACADEMIC CALENDAR
2012-2013 •

The M.Sc. is a research degree consisting of coursework and a thesis based on original research conducted by the student. A minimum of 18 credit hours of coursework is required, which must include BIOE 7290. At least an additional 3 credit hours must be taken from the Department of Biosystems Engineering at the 7000 level with the balance at the 3000 level or above from any department.

Master of Science students are required to spend at least one academic session in full-time resident graduate study. On recommendation of the department head, the residence requirement may be waived in special cases.

Second language reading requirement: none

Expected time to graduate: 18-24 months

## M.Eng. in Biosystems Engineering Admission

For admission into the M.Eng. program, applicants must have a minimum of a Bachelor's degree in engineering. In exceptional cases, based on the candidate's professional experience, this requirement may be waived on the recommendation of the Department Head.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

The M.Eng. is a course-based degree consisting of coursework and an engineering project. A minimum of 24 credit hours of coursework is required, which must include BIOE 7290, and at least 12 credit hours of 7000 -level courses offered by the Faculty of Engineering. An additional 6 credit hours are assigned to completion of GRAD 7050 M.Eng. project and report.

Second language requirement: none
Expected time to graduate: 12-18 months

## Ph.D. in Biosystems Engineering Admission

Admission to the Ph.D. program normally requires a M.Sc. degree in any area of Engineering, although applicants with degrees in related areas may be recommended for admission by the Department Head. Ultimately, acceptance must be approved by the Faculty of Graduate Studies. Students making exceptional progress while enrolled in the
M.Sc. program may request to transfer to the Ph.D. program upon the consent of the department head and based on a recommendation from the student's advisory committee and the Biosystems Engineering Graduate Studies Committee which investigates the student's qualifications and suitability for Ph.D. study. In such cases, the program credit hour requirements shall be recommended at the time of transfer by the student's advisory committee.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

Students are normally required to take a seminar course (BIOE 7270) and expected to meet a requirement in teaching and learning in post-secondary education. The remaining 9 credit hours at the 7000 level can be taken from any Department. The teaching and learning requirement may be met by: completing the CHET program; or completing the teaching workshops in Teaching Techniques, and Course Construction and Organization (15 h each) plus other teaching workshops of at least 15 h duration; or completing teaching workshops of 45 h duration. The advisory committee must approve the process which will be followed by the student to meet the teaching and learning requirement.

Second language requirement: none

Expected time to graduate: 3-4 years

BIOE 7040 Fluid Mechanics of Unsaturated Porous Solids Cr.Hrs. 3
(Formerly 034.704 ) Statics and dynamics of two immiscible fluid phases occupying the voids of porous solids. Concepts include capillary pressure, bubbling pressure, saturation, intrinsic and relative permeability, pore-size distribution indices. Prerequisite: consent of instructor.

BIOE 7110 Grain Storage Cr.Hrs. 3
(Formerly 034.711) A synthesis of major aspects of the storage of grain including: abiotic and biotic characteristics of stored grain bulks, regional variables, grain pressure theories, methods of controlling deterioration, and health hazards. Prerequisite: consent of instructor.

BIOE 7140 Advanced Irrigation and Drainage Cr.Hrs. 3 (Formerly 034.714) Selected advanced problems and new developments in irrigation and drainage. Interrelationships between irrigation and drainage and the environment. Prerequisite: consent of instructor.

BIOE 7160 Instrumentation and Controls Cr.Hrs. 3
(Formerly 034.716) For the non-engineering student.
Transducers, circuits and instruments for measuring and

## 

## ACADEMIC CALENDAR 2012-2013 •

recording physical quantities such as temperature, humidity, force, pressure, strain, sound, flow and nuclear radiation. Presentation and interpretation of data. Prerequisite: consent of instructor.

BIOE 7180 Bioprocessing Cr.Hrs. 3
This course allows students with a background in either biological sciences or engineering to gain an understanding of biochemical engineering processes. Topics include production of biofuels, bioplastics, biophamaceuticals, and processing technologies. This course is also offered in the Department of Microbiology as MBIO 7180. BIOE 7180 is not to be held with MBIO 7180.

BIOE 7200 Bulk Solids Storage and Handling Cr.Hrs. 3 (Formerly 034.720) Fundamental characteristics of bulk solids, bulk solids flow during storage and handling, loads in bulk solids storage and handling systems, mechanical, pneumatic and hydraulic conveying of bulk solids, safety in storage and handling of bulk solids. Prerequisite: consent of instructor.

BIOE 7210 Numerical Modelling of Biosystems Cr.Hrs. 3 (Formerly 034.721) Applications of numerical methods to the solution of problems dealing with biological systems: structure analysis, mechanical behaviour of biological materials, moisture sorption and desorption, cooling and heating of biological materials, and flow through saturated and unsaturated porous media. Solution of transient and non-linear problems. Use of commercial finite element packages for problem solving. Prerequisite: consent of instructor.

BIOE 7220 Advanced Machine Design Analysis for Biosystems Cr.Hrs. 3
(Formerly 034.722) Analysis of machines for use in biosystems with respect to design and functional performance, in-field traction, operator safety and comfort, and energy source, transmission and application. Engineering analyses will be used to study biosystems machinery problems of current and future interest. Prerequisite: consent of instructor.

BIOE 7230 Advanced Topics on Light-Frame
Buildings Cr.Hrs. 3
(Formerly 034.723) Structural and environmental design and analysis of light-frame buildings. Topics include: loads in light-frame buildings; frame design; construction management; environmental control in light-frame buildings; and structure-environment interactions. Prerequisite: consent of instructor.

BIOE 7240 Special Problems in Biosystems
Engineering Cr.Hrs. 3
(Formerly 034.724) Advanced work in a specialized field involving engineering applications to biological systems. Prerequisite: consent of instructor.

BIOE 7250 Mechanical Behavior of Biological
Materials Cr.Hrs. 3
(Formerly 034.725) Elastic and inelastic behavior of biological materials under applied load. Emphasis on unprocessed and semi-processed food products. Use of mechanical behavior properties in the design of handling, storage, processing and sensing systems for food products. Prerequisite: consent of instructor.

BIOE 7260 Research Methods for Biosystems

## Engineers Cr.Hrs. 3

(Formerly 034.726) Introduction to various research methods, including data acquisition and transmission, control systems, dimensional analysis, random signal analysis, experimental design, error analysis, stochastic modelling, fuzzy mathematics and expert systems. Prerequisite: consent of instructor.

BIOE 7270 Advanced Seminar in Biosystems Engineering Cr.Hrs. 3
(Formerly 034.727) A series of seminars to be given by Ph.D. candidates on research topics of current interest in Biosystems Engineering. Prerequisite: consent of instructor.

BIOE 7280 Advanced Topics in Biosystems
Engineering Cr.Hrs. 3
(Formerly 034.728) An opportunity to extend, update or acquire specialized knowledge in particular area of interest. Prerequisite: consent of instructor.

BIOE 7290 Biosystems Engineering Seminar 1 Cr.Hrs. 3 (Formerly 034.729) Oral and written presentation of engineering research is discussed. Students are expected to actively participate in weekly seminars and to present two seminars both orally and written.

BIOE 7300 Food Process Engineering Cr.Hrs. 3 (Formerly 034.730) Food engineering concepts are presented using quantitative relationships that define the process. Various advanced methods of heating and processing foods are discussed and their mathematical and physical relationships described. Descriptive information of typical equipment assists students in utilizing engineering principles in design. Prerequisite: consent of instructor.

BIOE 7310 Materials Incorporation into Soil Cr.Hrs. 3 (Formerly 034.731) Types and characteristics of agricultural materials; solid and liquid waste (including manure) incorporation; crop residue incorporations, seed placement; chemical incorporation; methods and equipment; performance evaluation; measurement technique.

BIOE 7320 Membrane Processes for Water and Waste Treatment Cr.Hrs. 3
(Formerly 034.732) Principles of membrane filtration, classification, design and manufacture. Principle mechanisms of mass transport to the membrane surface and particle/solute rejection. Investigation of membrane biofouling and bio-film control strategies. Fundamentals of reverse osmosis, nano-, ultra-, and micro-filtration process design and operation. Practical applications of membranes in the area of water and wastewater treatment. Innovative and novel bio-reactor designs utilizing membrane filtration for environmental reclamation.

## Cancer Control

Head: (and Graduate Chair) Judith Scanlan
Campus Address/General Office: 280 Helen Glass Centre for Nursing
Telephone: (204) 4746216
Fax: (204) 4747682

## 

ACADEMIC CALENDAR

Email Address: nursing grad@umanitoba.ca
Website: http://umanitoba.ca/nursing
Academic Staff: Please refer to website for Faculty information:http://umanitoba.ca/nursing

The Ph.D. in Cancer Control is offered by the Faculty of Nursing and the Department of Community Health Sciences, Faculty of Medicine. The goal of cancer control is to prevent cancer, cure cancer, and increase survival and quality of life for those who develop cancer, by converting the knowledge gained through research and evaluation into clinical and community interventions. This program addresses the pressing need in Canada for clinical and community health scientists in cancer control.

## Fields of Research

Cancer care of individuals and families is an area of research excellence in the Faculty of Nursing. Current areas of research include: patient-health professional communication, clinical decision making, symptom management, family care giving, sleep and cancer, and several dimensions of palliative care and cancer prevention. Methodological expertise includes scaling of psychosocial variables and conducting randomized clinical trials of nursing and psychosocial interventions. Previous work has focused on breast, prostate, and lung cancer patients as well as children with cancer.

The cancer control focus in the Faculty of Nursing is complemented by the strong methodological expertise (biostatistics, clinical trials, meta-analysis) of faculty members in the Department of Community Health Sciences, as well as their substantive expertise in the fields of cancer epidemiology, palliative care, aboriginal health, child health and aging. Knowledge translation is a strong emphasis of the program. Significant community partners in delivering this Ph.D. program are the Winnipeg Regional Health Authority, CancerCare Manitoba, and the St. Boniface Hospital Research Foundation. International research partnerships exist with the Mayo Clinic in Rochester, Minnesota; the Karolinska Institute in Stockholm, Sweden; and the University of Manchester, England.

## Student Funding

A stipend is available on application and acceptance from a multidisciplinary training program in which the Faculty of Nursing is participating: Psychosocial Oncology Research Training (PORT) Program (McGill University) (www.port.mcgill.ca/indextext.htm). Students are encouraged to obtain the PORT program details well in advance of application to the Ph.D. in Cancer Control to facilitate funding of their first year of studies. Students are expected to apply for national funding in the form of doctoral studentships/fellowships from the National Cancer Institute of Canada and the Canadian Institutes of Health Research.

Ph.D. in Cancer Control
Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar and can be obtained from the Faculty of Nursing.

## Applicants must possess:

- High academic standing in previous university work;
- A Master's degree in nursing or a health-related discipline. The degree must be thesis-based, although evidence of an extensive publication and research background as an alternative to a thesis is acceptable; and
- An area of research interest in palliative care, cancer care, or cancer prevention which is supported by a Faculty of Nursing or a Department of Community Health Sciences advisor.

## Application Deadlines

Students in the Faculty of Nursing normally begin their program on 1 September. Applications with complete supporting documentation are due in the Faculty of Graduate Studies by January 15th.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The program normally consists of twenty-one credit hours of coursework (fifteen from required courses, six credit hours from electives), a candidacy examination and a thesis. (In addition, fifteen credit hours of pre- or co-required courses or equivalent must have been completed before entering the program or in the first year).

Second language reading requirement: none

Maximum time to graduate: six years

NURS 7030 Foundations, Issues and Trends in Nursing Cr.Hrs. 3
(Formerly 049.703) Explores how social forces have influenced the evolution of nursing, its place in society, and the health care system today. Examines issues and trends affecting present and future development of nursing.

NURS 7040 Curriculum Development in Nursing Cr.Hrs. 3 (Formerly 049.704) The course is designed to explore the developmental phases of curriculum design in a variety of educational settings and types of programs. Students will have the opportunity to engage in the planning and the structuring of educational programs. Course in abeyance.

NURS 7050 Restorative Nursing Cr.Hrs. 6
(Formerly 049.705) Advanced study of the scientific foundations of human functioning as it applies to individuals and families in the context of altered health status. Nursing theories and therapeutic interventions will be applied to the

## 

ACADEMIC CALENDAR
restoration of the health status ofindividuals and families. Practice is an integral part of the course. Offered on a rotating basis.

NURS 7080 Special Topics in Nursing Research II Cr.Hrs. 3 (Formerly 049.708) Seminar discussion of topics related to current issues and problems in the development, implementation, and evaluation of knowledge utilization programs in nursing practice. Required of all practicum students. Offered when student demand warrants andon a rotating basis.

NURS 7082 Evidence Informed Practice Cr.Hrs. 3 This course will provide a foundation for students to evaluate the theory of evidence informed practice and its relationship to health care delivery. Students will be exposed to the principles of evidenced informed practice, basic epidemiological statistics, systematic reviews, critical appraisal techniques, application of implementation science, and health care intervention evaluation in order to acquire the analytical and questioning kills necessary to review their own work and other literature relevant to health care practices. Asking the right clinical question, searching the literature, critically appraising primary studies, making recommendations(s) for changing clinical practice, and evaluation the effects of a practice innovation or newly developed program are essential components of evidenced informed practice.

NURS 7084 Role development in Advanced Nursing Practice Cr.Hrs. 3
The purpose of this course is to understand the role of advanced nursing practice. The context, complexity, and scope of the roles within professional nursing practice will be explored. Particular emphasis will be placed on the knowledge base and skill set required to be an effective leader in a variety of advanced practice nursing roles. In this course, nursing graduate students for all streams will come together to discuss and debate issues related to advanced nursing practice on a local, regional, national and international level.

NURS 7086 Integrative Focus Cr.Hrs. 3
The purpose of this course is to allow the student to focus indepth in a substantive area of nursing practice: clinical practice, education or administration. Students will engage in practice in the area of focus, and be guided by the faculty adviser with respect to the goals and direction of the practicum and associated readings. Students will participate in seminars facilitate by the faculty at designated times throughout the practicum.

NURS 7090 Science and Theory in Nursing Cr.Hrs. 3 The course includes an exploration of nursing's theoretical evolution. Issues related to the development and application of theory in a practice discipline will be discussed with a focus on the role of research. Particular emphasis will be placed upon analysis and evaluation of nursing's conceptual and theoretical systems.

NURS 7100 Administration in Nursing Cr.Hrs. 6 (Formerly 049.710) Exploration and analysis of the roles and responsibilities of the nursing administrator in today's health care system. Examination of the organizational structure and culture of nursing services in relation to conflict resolution, interdisciplinary relationships and union negotiation. Includes preceptorship experience. Offered on a rotating basis and
currently under review.
NURS 7110 Readings in Selected Topics Cr.Hrs. 3 (Formerly 049.711) An intensive readings course for graduate students in nursing. Topics may be selected within the general field of nursing to suit the special needs and research interests of students, for example, transcultural nursing, women's health, or palliative care. Students must have a faculty member agree to advise them before registering.

NURS 7140 The Older Adult: Advanced Nursing
Assessment Cr.Hrs. 3
(Formerly 049.714) Advanced study and practice integrating theory, concepts, research and skills related to nursing assessment of the strengths and vulnerabilities of older adults and their families. Emphasis is on health promotion for the elderly. Clinical practice in thecommunity and/or the institution is a component of the course. Offered on a rotating basis.

NURS 7150 The Older Adult: Clinical Decision-Making and Intervention in Nursing Cr.Hrs. 3
(Formerly 049.715) Emphasis is on advanced study and practice in evaluation of clinical data and subsequent selection of appropriate nursing interventions to promote health of older adults and their families. Development of skills related to consultation and supervision isintegral to the course. Clinical practice settings include the community and institutions. Offered on a rotating basis.

NURS 7160 Cancer Nursing Research Cr.Hrs. 3 (Formerly 049.716) Focuses on recent advances in cancer nursing research with an emphasis on research methodologies, ethical concerns, and design issues pertinent to research with cancer populations. Approaches to utilization of research findings in clinical practice will be addressed. Offered on a rotating basis.

NURS 7170 Community Health Nursing: Assessment of Aggregate Needs Cr.Hrs. 3
(Formerly 049.717) Furthers theoretical and practical knowledge of key components of community health nursing within the primary health care model. Focus is on community health nursing systems and their relationship to the total health care system. Factors influencing past, current, and future community health nursing practice are examined. Emphasis is on assessing aggregate needs and developing advanced skills in working with a target group in the community. Practice in the community is an integral part of the course. Offered on a rotating basis.

NURS 7180 Community Health Nursing: Community Level Interventions Cr.Hrs. 3
(Formerly 049.718) Furthers theoretical and practical knowledge in community wide interventions that promote health. Focus is on the community health nurse's role in program development and evaluation for targeted groups in the community, and the role of influencing health policy through lobby efforts. Practice in the community is an integral part of the course. Prerequisite: NURS 7170 (or 049.717 ) or permission of instructor. Offered on a rotating basis.

NURS $\mathbf{7 2 0 0}$ Human Responses to Illness Cr.Hrs. 6
(Formerly 049.720) Consists of a series of seminars, case studies and clinical practica on human responses common

## ACADEMIC CALENDAR

to ill individuals across the lifespan. The emphasis of the course is on synthesis and application of relevant principles of the Human Response to Illness Model, on the development of proficiency in advanced assessment and decision-making, and on initiating, planning and evaluation of nursing interventions. Clinical practice is a course component. Offered on a rotating basis.

## NURS 7210 Qualitative Research Methods in

 Nursing Cr.Hrs. 3The purpose of this course is to advance knowledge of qualitative methodology and understanding of the ways in which qualitative methodology can be used to understand phenomena of interest in nursing and health care. This course is designed to provide opportunities for developing specific qualitative research skills, while gaining familiarity with theories, issues, and challenges in qualitative research. Students are exposed to the philosophical assumptions of the qualitative paradigm, ethical issues specific to qualitative research, qualitative sampling strategies, qualitative data collection techniques, and processes associated with the analysis, interpretation, and knowledge translation and utilization of qualitative data.

NURS 7220 Quantitative Research Methods in Nursing Cr.Hrs. 3
The purpose of this course is to advance understanding of the ways in which quantitative approaches can be applied to solve nursing problems. The quantitative research process will be described including literature review, conceptual frameworks in nursing sampling, data collection strategies, analysis of research data, and communication of results. Included are exploration of the status and development on nursing knowledge through quantitative research methods.

NURS 7250 Foundations of Advanced Practice Nursing Cr.Hrs. 3
(Formerly 049.725) A study of the theoretical underpinnings surrounding the development of a variety of advanced practice nursing roles. The focus will be on the issues shaping role development in Manitoba and Canada including economic, political and sociologic factors determining health care policy and delivery will be examined.

NURS 7260 Health Care in Advanced Practice Nursing 1 Cr.Hrs. 6
An examination of the assessment and intervention strategies for individuals from birth to adolescence, including sexuality and reproductive health. Designed to provide the necessary knowledge and experience to assist individuals and their families with the most common health problems. Concepts of health promotion and health maintenance are integrated throughout the course. Integrated clinical practicum (12 hrs/week). Prerequisites: NURS 7250 (or 049.725), NURS 7370, NURS 7380 and NURS 7390.

NURS 7270 Health Care in Advanced Practice Nursing 2 Cr.Hrs. 6
(Formerly 049.727) A study of assessment and intervention strategies for individuals from young adult through older adult. The course is designed to provide the necessary knowledge and experience to assist individuals and their families with the most common health problems. Concepts of health promotion and health maintenance are integrated throughout the course. Integrated clinical practicum (12 hrs/week). Prerequisites: PHAC 2100 (or 089.210), PHGY 7240 (or 090.724), 036.725, NURS 7230 (or 049.723),

NURS 7250 (or 049.725).
NURS 7280 Applied Physiology and Pathophysiology for Nurses Cr.Hrs. 6
(Formerly 049.728) This is a clinically-applicable systems approach to normal and altered physiological regulation, and is of specific application to advanced nursing practice. Lectures in physiology and pathophysiology as well as student-led case studies will be used to provide synthesis and application of concepts to common health care problems seen in clinical practice.

NURS 7290 Woman, Child and Family Health: Nursing Perspectives Cr.Hrs. 6
(Formerly 049.729) Detailed study of the theory, concepts, current research and nursing care related to the health needs of women, children and their families. Students will focus their theoretical learning and clinical practice within selected areas of woman, child or family health. Clinical management of selected clients is an integral part of the course. Offered in 2003 and alternate years thereafter.

NURS 7300 Advanced Health Assessment and Diagnostic Reasoning Cr.Hrs. 6
Designed to develop health assessment and critical thinking skills appropriate for clinical practice at an advanced level. The collection and in-depth analysis of subjective and objective health information and the use of diagnostic reasoning are emphasized. All students engage in practice with fellow students, clinical teaching associates and consenting patients. Required for students in the APN major.

NURS 7310 Health Care Policy: Implications for Nursing Practice Cr.Hrs. 3
(Formerly 049.731) Examines the inter-relationships of knowledge development, research utilization, policy formation, health services decision-making, and nursing systems. The selected topics are based on current nursing practice issues in community and institutional settings and their impact in individuals, families and aggregates. A major focus is the analysis of the process of knowledge development and application to health care and nursing systems. Not to be held with the former 049.719 and or NURS 7240 (or 049.724).

NURS 7320 Philosophy of Nursing Science Cr.Hrs. 3
(Formerly 049.732) Advanced seminar to explore philosophies of science which have influenced the development of nursing knowledge. Nursing epistemological traditions are analysed and criticized as they relate to nursing theory development and research. The relationship between nursing science and practice is emphasized.

NURS 7330 Clinical Consolidation Cr.Hrs. 0
Provides an opportunity to consolidate clinical skills, apply theoretical knowledge and research, and synthesize theory and practice in the final year of the Nurse Practitioner stream ( 10 weeks of 400 clinical hours). Preparation of a final paper that illustrates scholarly endeavour suitable for publication is required.

NURS 7340 Evidence Informed Practice Cr.Hrs. 3 (Formerly NURS 7080) This course will provide a foundation for students to evaluate the theory of evidence informed practice and its relationship to health care delivery. Students will be exposed to the principles of evidenced informed practice, basic epidemiological statistics, systematic reviews;
critical appraisal techniques, application of implementation science, and health care intervention evaluation in order to acquire the analytical and questioning skills necessary to review their own work and other literature relevant to health care practices.

## NURS 7350 Role Development in Advanced Nursing

 Practice Cr.Hrs. 3The purpose of this course is to understand the role of advanced nursing practice. The context, complexity, and scope of the roles within professional nursing practice will be explored. Particular emphasis will be placed on the knowledge base and skill set required to be an effective leader in a variety of advanced practice nursing roles. In this course, nursing graduate students from all streams will come together to discuss and debate issues related to advanced nursing practice on a local, regional, national, and international level.

NURS 7360 Integrative Focus Cr.Hrs. 6
The purpose of this course is to allow the student to focus indepth in a substantive area of nursing practice: clinical practice, education or administration. Students will engage in practice in the area of focus, and be guided by the faculty adviser with respect to the goals and direction of the practicum and associated readings. Students will participate in seminars facilitated by the faculty at designated times throughout the practicum. Prerequisite: NURS 7090, NURS 7210, NURS 7220, and NURS 7340.

## NURS 7370 Pathophysiologic Concepts \& Therapeutics

 I Cr.Hrs. 3Introducing principles of cell signaling, physiological feedback systems, adaptive and non-adaptive cellular responses, receptor-ligand interactions, drug kinetics, dynamics and therapeutics. Pathophysiology and treatment of disorders of immunity and inflammation, including hypersensitivity reactions, will also be covered in this course.

NURS 7380 Pathophysiologic Concepts \& Therapeutics II Cr.Hrs. 3
This course entails a systems-based analysis of disease states commonly seen in primary care, including cardiovascular, hematological, respiratory, neurologic and renal disorders and their treatment. Problem- and casebased scenarios will be used to encourage critical thinking and integration of pathophysiologic and management principles.

NURS 7390 Pathophysiologic Concepts \& Therapeutics III Cr.Hrs. 3
This covers pathophysiology and management of disorders of the musculoskeletal, gastrointestinal, dermatologic, reproductive and urogenital systems. One module will focus on disorders of the head, eyes, ears, nose and throat. A case study approach to instruction will be used almost exclusively in this course, which culminates in a mock 'grand rounds' presentation.

## Community Health Sciences

CHSC 7130 Methods in Health Services Research and Evaluation Cr.Hrs. 3
(Formerly 093.713) Examines the process of planning and conducting research and evalution to assess health services with an emphasis on the methods by which a question may
be translated into a testable hypothesis, and the specification of a research plan that will produce results of maximum internal and external validity.

CHSC 7200 Health and Health Care in Developing
Countries Cr.Hrs. 3
(Formerly 093.720) The course will focus on the patterns of mortality and morbidity in developing countries and the organization of health care services. Social, cultural, and economic development will be related to health and health services.

CHSC 7210 Epidemiology of Women's Health Cr.Hrs. 3 (Formerly 093.721) This course will deal with problems and concerns particular to women's health. The topics will be approached from an epidemiological perspective but use will be made of materials from health economics, evaluation research, medical sociology and anthropology.

CHSC 7220 Health and Health Services of Native
People Cr.Hrs. 3
(Formerly 093.722) This course provides a detailed review of the health status and the determinants of health of Canada's native people.

CHSC 7270 Epidemiology of Chronic (Non-Cancer) Diseases Cr.Hrs. 3
(Formerly 093.727) The objective is to study the natural history of chronic diseases including the distribution of diseases, risk and prognostic factors, rationale and strategies for prevention. The methodological issues concerning the investigation of severe disease are also discussed. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752).

CHSC 7290 Economic Evaluation of Health Care Cr.Hrs. 3 (Formerly 093.729) The objectives of this course are to enable students to understand economic evaluation methodologies (cost-effectiveness, cost-benefit, cost-utility analysis) as applied to health care and to familiarize them with the applied literature on economic evaluation of health care. Prerequisite: permission of instructor.

CHSC 7300 Health Policy and Planning Cr.Hrs. 3 (Formerly 093.730) This course defines health policy and describes the planning and decision-making process. Case studies will be used to illustrate and critique the substance, process and outcome of policy papers that address contemporary policy issues. Prerequisite: permission of instructor.

CHSC 7310 Epidemiology of Health Care Cr.Hrs. 3 (Formerly 093.731) This course will discuss the advantages and disadvantages of using large administrative data bases for research purposes. Substantive topics dealt with include: regional variations in provision and utilization of health care, short- and long-term outcomestudies, individual physician behaviour, and technology assessment. Policy implications are considered. Prerequisite: a minimum grade of " B " in CHSC 7520 (or 093.752) or equivalent and permission of instructor.

CHSC 7320 Organization and Financing of the Canadian Health Care System Cr.Hrs. 3
(Formerly 093.732) Students will study the historical development and current structure of the Canadian health care system and relate its development to changes in social

## ACADEMIC CALENDAR

and political factors. The course provides an economic perspective on current policy issues in the organization, financing, and delivery of health care in Canada.

CHSC 7330 Cultural Perspectives on Illness and Medical Practice Cr.Hrs. 3
(Formerly 093.733) The objective of this course is to make students aware of the ways in which disease, illness, and medical practice are socially and culturally mediated. The course will examine cultural influences on the experience and expression of illness and consider the medical practitioner's role in the development and provision of culturally responsive health care. Prerequisite: permission of instructor.

CHSC 7360 Clinical Trials Cr.Hrs. 3 (Formerly 093.736) The Randomized Clinical Trial is the only true experiment in clinical research. This course is intended to give students a detailed knowledge of the design and implementation of RCTs. Students will participate in a qualitative review of RCTs. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752) , CHSC 7470 (or 093.747), CHSC 7480 (or 093.748) or equivalents.

CHSC 7380 Prevention and Health Cr.Hrs. 3
(Formerly 093.738) The course will cover frameworks used in -formulating preventive strategies. Topics will include risk factor assessment, screening, health education, legislation, litigation, lifestyle and prevention. Actual case studies will be used. Prerequisite: CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753).

CHSC 7390 Health Promotion Cr.Hrs. 3
(Formerly 093.739) An examination of theories, principles, practices and settings for health promotion. Prerequisite: permission of instructor.
CHSC 7400 Directed Readings I: In Epidemiologic

## Methods Cr.Hrs. 3

(Formerly 093.740) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisites: permission of instructor and Graduate Program Director.

CHSC 7410 Directed Readings: II - In
Epidemiology Cr.Hrs. 3
(Formerly 093.741) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisite: permission of instructor and Graduate Program Director.

CHSC 7430 Seminars on Advanced Topics: II - In Methods of Health Care Cr.Hrs. 3
(Formerly 093.743) Sem-inars dealing with current research issues, emerging methodologies and analytical techniques will be offered for advanced students. Prerequisite: permission of instructor.

## CHSC 7450 Epidemiology of Communicable

Diseases Cr.Hrs. 3
(Formerly 093.745) Overview of epidemiological principles in communicable disease investigation and prevention and specific issues in controls of certain specific communicable diseases of public health importance in Canada will be introduced. Prerequisite: permission of instructor. Prerequisite: a minimum grade of "B" om CHSC 7520 (or
093.752).

CHSC 7460 Environmental and Occupational

## Health Cr.Hrs. 3

(Formerly 093.746) The aim of the course is to acquaint the student with the role of the environment (general and specifically working) as the determinant of health. The content of the course will be presented in the form of lectures, seminars, and field visits. Prerequisite: permission of instructor.

## CHSC 7490 Empirical Perspectives on Social Organization

 and Health Cr.Hrs. 3(Formerly 093.749) This course will focus on a selected review of the epidemiological literature which has integrated social factors in the investigation of the distribution of health and illness in society. The course will review a selection of important empirical studiesinvestigating the roles played by social, psychological and economic status factors in determining health and illness. Emphasis will be placed on identifying the central theoretical and methodological approaches to defining and measuring socioeconomic status in this literature. Prerequisite: permission of instructor.

CHSC 7510 Current Topics in Community Health Cr.Hrs. 3 (Formerly 093.751) Focus on current issues and topics in community health, particularly as they relate to Manitoba and to Canada. Emphasis will be placed on current literature and ongoing research to examine emerging policies and programs within health care and social development. Prerequisite: basic courses in Epidemiology and Statistics. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7470 (or 093.747) and CHSC 7320 (or 093.732).

CHSC 7520 Principles of Epidemiology 1 Cr.Hrs. 3 (Formerly 093.752) This course will introduce the basic concepts and methods of epidemiology, including the definition and measurement of health status and health determinants in populations, assessing health risks and inferring causation, and issues in the design and analysis of population health studies.

CHSC 7530 Principles in Epidemiology II Cr.Hrs. 3 (Formerly 093.753) This course follows the Principles of Epidemiology I and discusses the applications of epidemiologic principles in public health practice, including the investigations of epidemics, disease surveillance, clinical applications, evaluation of health programs, and the planning of preventive programs. Students will also receive instruction in microcomputer applications and use of EPI-INFO software for data entry, analysis and presentation. Corequisite: CHSC 7480. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and in CHSC 7470 (or 093.747)..

CHSC 7540 Advanced Epidemiology Cr.Hrs. 3 (Formerly 093.754) Advanced epidemiologic research methods focusing on selected epidemiological issues (bias, confounding, matching, etc.). Discussion will be directed to both epidemiological and statistical considerations to find the optimal solution to a research problem. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752), CHSC 7530 (or 093.753), CHSC 7280 (or 093.728).

CHSC 7550 Observational Epidemiology Cr.Hrs. 3 (Formerly 093.755) Intermediate epidemiologic research methods focusing on case-control and cohort studies, with
discussion on issues relating to planning and design, implementation, and data analysis. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753 ) and CHSC 7470 (or 093.747) and CHSC 7480 (or (093.748)..

CHSC 7560 Epidemiology of Cancer Cr.Hrs. 3 (Formerly 093.756) This course introduces the magnitudes, risk factors and prevention strategies of cancer. It focuses on current knowledge related to the etiology of cancer, medical interventions and potential for prevention. Prerequisite: a minimum grade of " B " in CHSC 7520 (or 093.752).

CHSC 7610 Advanced Topics in Community Health 1 Cr.Hrs.1.5
Special advanced research topics in Community Health Sciences.

CHSC 7620 Advanced Topics in Community Health 2 Cr.Hrs.1.5
Special advanced research topics in Community Health Sciences.

CHSC 7710 Social Aspects of Aging Cr.Hrs. 3 This course is an advanced seminar designed to examine current social issues in aging. The course is organized around selected topics related to aging. Where possible, the Canadian experience will be compared to international trends and diversity will be highlighted. The first section is a review of the field of gerontology, ageism, demographic trends, theoretical perspectives and methods and the second section explores contemporary social issues. This course is a required course for the Graduate Specialization in Aging Certificate.

CHSC 7720 Health and Aging Cr.Hrs. 3
This course is an advanced seminar designed to examine health and health care issues in aging. Where possible, the Canadian (or Manitoban) experience will be highlighted. Key topics in the health domain will be covered, such as frailty, mental health, and dementia. The provision of care for older adults will also be covered, focusing on both the formal care system, as well as informal care providers. This course is a reuqirement for the Graduate Specialization in Aging.

CHSC 7730 Topics in Health Services Research Cr.Hrs. 3 This course will expose students to select health services research topics that are particularly relevant in Manitoba and Canada. Students are expected to actively engage in seminars led by health services researchers and decisionmakers, and also provide informative presentations in their own area of research. Students will also gain knowledge about various communication and knowledge translation strategies.

CHSC 7740 Advanced Qualitative Methods Cr.Hrs. 3
The purpose of this course is to provide students with fundamental aspects related to qualitative research methods and analysis. By the end of the course, students should have an understanding of the principles and practices involved in: the application of different social theories to qualitative methods; designing a qualitative research study; various ways of collecting qualitative data and analyzing written texts; ways of integrating qualitative methods in a mixed methods design; developing different products for knowledge exchange activities; and 'hands-on' experience in doing
qualitative analysis using qualitative software.
CHSC 7810 Biostatistics for the Health and Human Sciences 1 Cr.Hrs. 3
An introduction to statistical ideas and techniques for health sciences and human research. Describing data, patterns in data, the Normal distribution. Principles of estimation and principles of hypothesis testing. Principles and practice of the major statistical tests ( t tests, analysis of variance, Chi squared tests, correlation and regression). Nonparametric statistical techniques. The use of statistical software to carry out statistical analyses. Analytic decision strategies.

CHSC 7820 Biostatistics for Community Health Sciences 1 Cr.Hrs. 3
The course will cover techniques of research design and analysis for community health researchers. Topics include: principles of experimental design, study size determination, statistical software as an analytical tool, techniques for the analysis of continuous outcomes, analysis of variance for multi-way, factorial and split-unit experiments, and multiple regression and general linear models. Introduction to more advanced statistical methods including logistic regression and survival models. Prerequisite: Undergraduate course in statistics.

CHSC 7830 Biostatistics for Community Health Sciences 2 Cr.Hrs. 3
This course will cover techniques for the analysis of complex data sets involving continuous, categorical and time-related outcome variables. Principles of statistical modeling. The behaviour of non-continuous variables. Categorical outcome variables and logistic regression. Poisson outcome variables and Poisson regression. Time-dependent outcomes, survival analysis and proportional hazards regression. Prerequisite: CHSC 7820 with a grade of $\mathrm{B}+$ or better.

CHSC 7860 Methods and Concepts for Community Health Sciences Cr.Hrs. 3
This course is designed to provide both a practical and theoretical introduction to qualitative, quantitative, and multimethod approaches used in health research. The emphasis in the course will be on applied research, consistent with the characteristics of the Department of Community Health Sciences as a whole.

CHSC 7870 Health Survey Research Methods Cr.Hrs. 3 Students critically examine the use of health survey methodology within epidemiology. They also learn to apply survey methodology, as a means to gain a strong appreciation of the reflective, theoretical and analytical thinking required to successfully design and implement epidemiological health surveys. Prerequisites: CHSC 7820 and CHSC 7520.

## General Management

GMGT 7010 Business Policy Seminar Cr.Hrs. 3
This course entails the study of general management. Students shall integrate the concepts from the various functional areas of the organization covered in the program with the different environments: social, political, economic and technological. Students will analyze general management problems, shall formulate policies, and display ability to implement policies. Must be taken in final term in

## ACADEMIC CALENDAR

the program.
GMGT 7060 Readings in Business Administration Cr.Hrs. 3 (Formerly 027.706) Supervised readings in one of the areas of business administration including human resource management, industrial relations, organizational behaviour, policy and environment.

## GMGT 7070 Administrative Studies Research

Project Cr.Hrs. 6
(Formerly 027.707) Research in any one of the areas of administrative studies.

GMGT 7080 Research Methods Cr.Hrs. 3
(Formerly 027.708) Principles of research design and data collection with examples drawn across the areas of marketing management, industrial relations, policy analysis, etc. Both cases and computer-based exercises are used. Prerequisite: MSCI 5010 (or 164.501 or 027.501).

GMGT 7090 Organizational Decision-Making Cr.Hrs. 3 (Formerly 027.709) A study of the goal-setting and decisionmaking processes in organizations and the implications for the growth and survival of such organizations.

GMGT 7100 Interpersonal Processes Cr.Hrs. 3 (Formerly 027.710) An examination of theories of interpersonal behaviour and processes as they apply to managerial situations. Emphasis upon individual behaviour and change, group dynamics, leadership behaviour, and communications.

GMGT 7110 Business and Its Environment Cr.Hrs. 3 (Formerly 027.711) Analysis of the environmental factors within which a business operates.

GMGT 7120 Organizational Power and Politics Cr.Hrs. 3 (Formerly 027.712) An examination of personal, interpersonal and organizational power in the context of organizational politics. Topics covered include rational versus political models of organizations, the accumulation and management of personal power, the politics of decisionmaking, the politics of managerial succession, the politics of budgets, authority, intergroup conflict, and bargaining and negotiation processes.

GMGT 7350 Administration: Selected Topics Cr.Hrs. 3 (Formerly 027.735) Topics in one of the areas of business administration including human resource management, industrial relations, organizational theory and behaviour, and business policy and strategic management.

GMGT 7360 Organizational Behaviour and Self Development Cr.Hrs. 3
(Formerly 027.736) This course will operate in a seminar format with two goals. The first goal is to provide an environment in which the student can develop and manage to successful conclusion a project in which they have significant intrinsic interest. The second goal is to improve the student's understanding of the inner life of an organization by increasing his/her ability to discriminate between the organizational "ropes to skip and the ropes to know."

GMGT 7370 Managing Innovation Cr.Hrs. 3
(Formerly 027.737) An examination of organizational design characteristics in the context of a competitive international
perspective. Emphasis is on organizational and technological innovation to facilitate the development of new products or processes or to implement change in existing products or processes. Topics covered include Canadian experience and policy, facilitators and inhibitors in the creative process, diffusion of innovations, and the aims of the patent process.

## GMGT 7400 Readings in Organizational Behaviour

 (Ph.D.) Cr.Hrs. 3(Formerly 027.740) An examination of theory and research from the social and administrative sciences that focuses on the interaction between organizations and their environments. The evaluation and synthesis of theoretical and empirical work in this area will be emphasized. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

## GMGT 7410 Doctoral Seminar in Organizational Behaviour

 (Ph.D.) Cr.Hrs. 3(Formerly 027.741) An examination of theory and research from the social and administrative sciences that is relevant to the behaviour of individuals and groups within organizations. Emphasis will be placed on evaluation and synthesis of theoretical and empirical work in this area. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

## GMGT 7440 Doctoral Seminar in Organizational Theory

## (Ph.D.) Cr.Hrs. 3

(Formerly 027.744) The major goal of this course is to familiarize students with central schools of thought within organization theory. As with other theories in the social sciences, these schools of thought tend to be based on differing assumptions about the nature of theorganizational world, the operation of causality, epistemology, and the role of human actors. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

## GMGT 7510 Strategic Leadership and Managing

Change Cr.Hrs.1.5
(Formerly 027.751) An examination of the role of the manager as a change agent and processes associated with strategic vision and change. Analysis of factors affecting strategic decisions and how organizations adapt to their environment. Emphasis is upon the role of leaders: transformational leadership, charisma, organizational design and managing organizational culture change.

GMGT 7520 Issues in Managerial Communication Cr.Hrs. 3 (Formerly 027.752) An examination of strategies and development of skills for effective oral, written, non-verbal, interpersonal, group, cross-cultural, and ethical communication in management.

GMGT 7530 Selected Topics Cr.Hrs. 3
(Formerly 027.753) An examination of current issues in areas which could, for example, include: organizational behaviour, organizational theory, strategy, human resource management, and industrial relations. Prerequisite: consent of instructor.

GMGT 7540 Doctoral Seminar in Research Methods

## (Ph.D.) Cr.Hrs. 3

(Formerly 027.754) Principles of research design and data

## ACADEMIC CALENDAR

collection appropriate for the areas of marketing, management, industrial relations, policy analysis, finance, management science, etc. Research problems and issues will be discussed from a number of perspectives. Conceptual material, statistical analyses, theoretical material and the utilization of statistical application software are used as the bases for seminar discussion. Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

GMGT 7710 Managerial Communication Cr.Hrs.1.5 (Formerly 027.771) Focus is on the interpersonal, intergroup, and intraorganizational communication skills required for effective leadership, and the objectives are to assist the participants in the following: increasing the clarity, correctness, and effectiveness of written and oral communication; recognizing and analysing communication dynamics at work in personal, group, and organizational interactions; increasing combination flexibility and proficiency in times of corporate challenge, change, and crisis.

GMGT 7720 Business Conditions Analysis Cr.Hrs.1.5 (Formerly 027.772) To provide an awareness of key components of the economic/business environment. Identifies critical indicators that affect decision-making and suggests strategies for forecasting future conditions. Topics covered include critical demographic trends, the change technological frontier, international trade, finance, and investment trends, and trends in interest rates and exchange rates. A theoretical overview will precede the discussion of business conditions indicators.

GMGT 7740 Business/Government Relations Cr.Hrs.1.5 (Formerly 027.774) Focuses on the logic of political-economic-business relations. The point of view is that of the manager. Specific tools of analysis are discussed that assist managers in understanding and working with aspects of public policy which interface with their private sector decisions.

## Chemistry

Head: (Acting Head) P.H.M. Budzelaar
Campus Address/General Office: 360 Parker Building
Telephone: (204) 4749321
Fax: (204) 4747608
Email Address: Chemistry Dept@umanitoba.ca
Website: http://umanitoba.ca/chemistry
Academic Staff: Please refer to webiste for Faculty information:http://umanitoba.ca/chemistry

A M.Sc. or Ph.D. in the chemical sciences provides a gateway to an exciting, challenging and frequently highpaying career. M.Sc. and Ph.D. chemists work in areas such as industrial research and development (particularly the pharmaceutical, energy, advanced materials and biotechnology sectors), medical research, environmental and pollution monitoring, and technical consulting. Ph.D. chemists and biochemists in academia have the opportunity both to teach and to pursue independent basic and applied research.

Graduate students work in close cooperation with faculty as they pursue their own thesis research projects. There are fascinating project opportunities available in the research groups within the department. Graduate courses are typically informal, and encourage small groups of students to discuss topics of current interest, in a supportive environment. The Department of Chemistry also hosts seminars throughout the year, bringing researchers from university and industrial laboratories in Winnipeg, across Canada, and abroad, to share their latest discoveries with students and faculty. The Armes Lectureship and Betts Lectureship programs provide for extended lecture series by world-renowned chemists, who are able to interact with faculty and graduate students during their visit to the department.

Graduates of the Chemistry M.Sc. and Ph.D. programs are currently employed in chemical companies, research institutes, government laboratories and agencies, and tenured academic positions. Some have even founded their own chemical companies! Alumni of the department's graduate program now work for companies such as Apotex Fermentation, Medicure, Novopharm Biotech, Philips Paints and Border Chemicals in Winnipeg, Biovail (Steinbach), Anormed (Richmond, BC), Allelix (Mississauga), Uniroyal (Guelph), and Genzyme (Cambridge MA). Several have undertaken additional training with prominent scientists at such places as the Scripps Institute, MIT, the Howard Hughes Medical Institute, and the universities of Alberta, British Columbia, Calgary, Montréal, Sherbrooke, and Toronto. Some have gone on to academic careers, at such universities as Alberta, Calgary, Cornell, Dalhousie, Guelph, Northern British Columbia, Queen's, Toronto, York, as well as Manitoba.

## Fields of Research

Analytical Chemistry, Asymmetric Organic Synthesis, Biochemistry, Cell Biology, Chromatography, Environmental Chemistry, Inorganic Chemistry, Mass Spectrometry, Macromolecular Chemistry, Materials Science, Medicinal Chemistry, Natural Products Chemistry, NMR Spectroscopy, Organometallic Chemistry, Protein Structure and Dynamics, Synthetic Carbohydrate Chemistry, Theoretical Chemistry, Solid State Chemistry.

## Research Facilities

The department has modern instrumentation and technical support for research and teaching. There is a full-time glassblower in the department who can produce specialized glassware as required. The University Libraries provide excellent on-line connections to scientific and medical databases and full-text access to major journals.

Computer facilities: campus-wide UNIX and NOVELL servers; Sunfire 6800 20-CPU high-performance computing installation; access to the Westgrid high-performance computing facilities; PC, Mac, UNIX and LINUX workstations in the department; a 14 -node and 24 -node Beowulf cluster constructed from 12 dual processor 2.8 GHz Xeon computers have been installed in the department.

NMR facilities: Bruker Avance300 and AMX 500 instruments, and a Varian INOVA 600 system; all are multinuclear and have pulsed field gradient capabilities; the AMX 500 and INOVA 600 are equipped for both liquid and solidstate work.

Mass Spectrometry: a two-sector high-resolution spectrometer with EI, CI and FAB sources, operational in positive and negative ion modes; a Quattro-LC triple quadrupole instrument equipped for electrospray ionization (ESI); a Bruker Biflex IV MALDI-TOF instrument for the analysis of large biomolecules; through the Physics department, Chemistry researchers have access to advanced experimental time-of-flight instruments.

Advanced Synthesis: A high throughput HPLC-MS-UV autopurification system (Waters) and a parallel organic synthesizer (quest).

The Ultra-Clean Trace Elements Laboratory (UCTEL): a metal-free class-1000 to Class 100 environment equipped with a PE Elan DRC II ICP-MS, a Waters non-metallic HPLC a CEM Mars V Microwave Digestion System, and a Tekran 2600 Mercury Analyzer.

Crystallography facilities: a high-resolution powder X-ray diffractometer with a high-temperature furnace. In addition the Department has access to single crystal diffractometers and cameras.

Thermal Analysis: a high-temperature thermal gravimetric/differential thermal analyzer (TGA/DTA) is available.

Spectroscopy facilities: a 15W argon laser with a 14018 double monochromator for Raman spectroscopy; a Fourier transform microwave spectrometer equipped with ion sources, Helmholtz coils and Stark plates.; an UV-Vis-NIR spectrophotometer (Varian Cary 5000), a coherent dye laser for intracavity photoacoustic spectroscopy; a Nicolet FT-IR system; a second Nicolet interferometer is equipped for solid-state FT-IR studies, and is also set up for Raman spectroscopy; a UV-vis diode array spectrophotometer; routine FT-IR and stopped flow equipment is also available.

Circular Dichroism Spectropolarimeter-Fluorometer: Our Jasco J-810 instrument is equipped with a computercontrolled Peltier device and circulating water bath for temperature control using both cylindrical and rectangular cells. The fluorescence accessory permits concurrent circular dichroism and fluorescence measurements between 163 and 900 nm .

Electrochemical facilities: a BAS 100A electrochemical workstation with rotating disk and controlled growth mercury drop electrode attachments; a CH Instruments 660 electrochemical workstation with a picoamp booster attachment for ultramicroelectrode measurements; a CH Instruments 400 electrochemical workstation with quartz crystal microbalance (QCM); a Solartron 1287 electrochemical interface and a 1255B frequency response analyzer for impedance measurements; and a Lecroy 9310A 400 MHz dual channel oscilloscope, a Stanford Research

Systems SR560 amplifier and a Wavetek 182A function generator for fast scan cyclic voltammetry.

Surface and interfacial science facilities: a Kratos Axis
Ultra high performance imaging x-ray photoelectron spectroscopy (XPS) instrument; a JEOL JAMP-9500F field emission Auger microprobe/scanning electron microscope (SEM); a JOEL JEM-2100F advanced field emission transmission electron microscope (TEM); a CAMECA IMS 7f magnetic sector secondary ion mass spectrometer (SIMS); a Digital Instruments Nanoscope IV with a Dimension 3100 SPM, a closed-loop SPM, a MultiMode SPM with multiple heads, a universal bipotentiostat, and an EnviroScope AFM; a ThermoNicolet Nexus 870 FT-IR with a polarization modulated infrared reflectance absorbance spectroscopy (PM-IRRAS) and attenuated total reflectance spectroscopy (ATR) modules; a Sentech SE400 ellipsometer; and a Ramè-Hart computerized contact angle goniometer.

Chromatography facilities: numerous HPLC systems; a preparative HPLC/ MS system; a GPC system with lightscattering, refractive index, diode-array and electrochemical detectors.

Other equipment: A Differential Scanning Calorimeter with Intracooler and Ultramicrobalance (Perkin-Elmer DSC Diamond); a Spin Coater (Laurell Technologies); a Polarized Light Optical Microscope System with Heating/Cooling stage (Olympus/Linkam); a Dynamic Light Scattering Instrument for Particle Sizing (Microtrac Inc.); a Liquid Crystal Test-bed for testing electro-optical properties of LC-mixtures (LC Vision); a Pure-Water System; a Laminar Flow Clean-air workbench and an Ultrasonic Processor (Sonics).

Manitoba Chemical Analysis Lab (MCAL) A "state of art" chemical analysis facility (MCAL) is available in the Department of Chemistry. The laboratory offers a wide range of instrumentation for the analysis of biological, environmental and industrial samples. The facility is used for undergraduate used for undergraduate teaching laboratories and can be accessed by University researchers, graduate students and industry.
M.Sc. in Chemistry, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

Potential M.Sc. students should explore the Chemistry Department website, prior to making formal application to the department of Chemistry. They are encouraged to submit the on-line information form found on the website. The following deadlines for receipt of complete application materials apply to potential students holding bachelors' degrees from Canadian and Non-Canadian universities.

Start Date Canadian/U.S. Non-Canadian

| Regular | (September) | June 1 | March 1 |
| :--- | :--- | :--- | :--- |
| Winter | (January) | October 1 | July 1 |
| Spring | (May) | February 1 | November 1 |
| Summer | (July) | April 1 | January 1 |
| Program Requirements |  |  |  |

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Colloquium: A weekly colloquium is given by members of staff, post-doctoral fellows, or invited lecturers. All graduate students and fourth-year Honours students are expected to attend the colloquia.

Second language reading requirement: none

Expected time to graduate: 2 years

Ph.D. in Chemistry,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Only students holding M.Sc. degrees from Canadian universities will be admitted directly into the Ph.D. program. Other students will be admitted as M.Sc. candidates, with the option to transfer into the Ph.D. program after 1 year of satisfactory studies.

## Application Deadlines

Potential Ph.D. students should explore the Chemistry Department website, prior to making formal application to the department of Chemistry. They are encouraged to submit the on-line information form found on the website. The following deadlines for receipt of complete application materials apply to potential students holding bachelors' degrees from Canadian and Non-Canadian universities.

| Start Date | Canadian | Non-Canadian |  |
| :--- | :--- | :--- | :--- |
| Regular | (September) | June 1 | March 1 |
| Winter | (January) | October 1 | July 1 |
| Spring | (May) | February 1 | November 1 |
| Summer | (July) | April 1 | January 1 |
| Program Requirements |  |  |  |

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, a minimum of three years (including the year spent in M.Sc. work) is required for the Ph.D. degree. Actual time spent is usually somewhat longer.

Colloquium: A weekly colloquium is given by members of staff, post-doctoral fellows, or invited lecturers. All graduate students and fourth-year Honours students are expected to attend the colloquia.

Second language requirement: none

Expected time to graduation: 4-5 years (from 4 year B.Sc.); 3 years (from M.Sc.)

CHEM 7400 Topics in Biochemistry Cr.Hrs. 3 (Formerly 002.740) A lecture and seminar course dealing with selected topics of current interest in biochemistry and molecular biology.

CHEM 7410 Spectroscopy and Molecular Structure Cr. Hrs. 3 (Formerly 002.741) Applications of spectroscopic methods to chemical problems with emphasis on mass spectrometry and related techniques.

CHEM 7450 Topics in Organic Chemistry Cr.Hrs. 3 (Formerly 002.745) A discussion of current and general topics related to novel and interesting areas of organic chemistry appearing in the current literature.

CHEM 7460 Topics in Synthetic Organic Chemistry Cr.Hrs. 3 (Formerly 002.746) A course designed to acquaint students with specific methods of synthesis.

CHEM 7520 Topics in Physical Chemistry Cr.Hrs. 3 (Formerly 002.752) The topics will vary, depending on student needs and interests; they may include, but will not be limited to the following: electrochemistry, surface chemistry, electrochemical kinetics, or other specialized topics not available in regular course offerings.

CHEM 7550 Design of Organic Synthesis Cr.Hrs. 3 (Formerly 002.755) Conceptual methodology in the design of synthesis will be discussed with inclusion of computer-aided approaches. Examples from the current literature will be used to emphasize the conceptual aspects.

CHEM 7560 Organometallic Chemistry Cr.Hrs. 3 (Formerly 002.756) Recent advances in synthetic and structural organometallic chemistry.

CHEM 7580 Chemical Crystallography Cr.Hrs. 3 (Formerly 002.758) Theory and practice of crystal structure analysis with emphasis on single crystal x-ray diffractometry; structure-activity relationships in small organic and inorganic compounds; introduction to protein and nucleic acid crystal structure analysis.

CHEM 7600 Topics in Inorganic Chemistry Cr.Hrs. 3 (Formerly 002.760) Topics of current research interest in the area of inorganic chemistry including, but not limited to synthesis, structures, catalysis and reaction mechanisms.

CHEM 7700 Topics in Analytical Chemistry Cr.Hrs. 3 (Formerly 002.770) Topics of current research interest in analytical chemistry including, but not limited to, mass spectrometry of large molecules, separation techniques, analysis of metals, surface analytical techniques, analysis of environmental samples, analysis of 'real' samples, and sampling techniques. Prerequisites: CHEM 4590 (or 002.347) or permission of instructor.

CHEM 7800 Topics in Theoretical Chemistry Cr.Hrs. 3 (Formerly 002.780) Topics of current research interest in theoretical and computational chemistry from such areas as ab initio quantum chemistry, molecular simulations, nonlinear reaction dynamics, spectroscopy and statictical

## 

ACADEMIC CALENDAR
mechanics.
CHEM 7900 Seminar in Current Research Issues in Chemistry Cr.Hrs. 3
Student-led seminars covering areas of interest to the faculty and students in the graduate Chemistry program, and current research issues in the field of Chemistry (including biochemistry, spectroscopy, organic chemistry, physical chemistry, organic synthesis, organometallic chemistry, inorganic chemistry, analytical chemistry and theoretical chemistry).

## City Planning

Head: (and Graduate Chair) Milgrom, Richard
Campus Address/General Office: 201 Russell Building
Telephone: (204) 4749458
Fax: (204) 4747532
Email Address: cityplanning@umanitoba.ca
Website: http://umanitoba.ca/cityplanning
Academic Staff: Please refer to website for Faculty information:http://umanitoba.ca/cityplanning

The Department of City Planning is the oldest continuing planning school in Canada offering a program of studies leading to the Master of City Planning degree. The program provides opportunities to develop and enhance skills, often in service learning situations involving local clients. Students come from varied academic backgrounds and the curriculum is structured to satisfy the requirements of professional accreditation and to foster expertise in selected fields of study. In collaboration with the Manitoba Professional Planners Institute (MPPI), the program includes an internship of planning work. An optional mentoring program links the student with a volunteer from MPPI for discussions on career strategies or other matters.

The program is directed by four principles. The first, and the focus of the program, is the enhancement of the built and natural environments of cities and regions. The second principle, professionalism, is based on the understanding that students enter the program with the expectation of finding professional employment and of making their careers in planning or closely related fields. It leads to a focus on professional practice and responsibilities, and on the skills necessary to translate knowledge into effective action. The third principle is that planning is a multidimensional and multidisciplinary activity requiring highly transactive and collaborative outlooks and practices to advance strategies that are socially just and environmentally sustainable. The fourth principle is that scholarship constitutes a fundamental and lasting value for a planning career, and consequently there is emphasis on historical and theoretical aspects of development, research methods, clarity of critical thought and expression, and the relationships between planning thought and practice.

## Fields of Research

- Community development; community design and participatory methods
- Gender issues in planning and design
- Housing studies; homelessness; low-cost housing strategies
- Planning practice; planning methods; integral praxis; placemaking
- Planning with Aboriginal communities
- Regional planning; city-regions; bioregionalism
- Transportation planning
- Urban ecology; sustainable planning; case studies of ecological innovation

## Research Facilities

The Computer Aided Design Laboratory (CADLAB) is a major centre of research and hands on training offering cutting edge digital resources and an experienced complement of teaching and support staff. Extensive data bases provided by governmental and non-governmental sources are linked to GIS applications. The Architecture and Fine Arts Library, housed in the Russell Building, holds some 61,000 volumes dedicated to the planning, art and design disciplines represented in the University, including over 400 current periodicals. Over 100,000 35mm slides are available and electronic resources include networked bibliographic and full text resources. Studio space is provided in the Russell Building and Architecture 2, as well as occasionally on or near a study site.

## Master of City Planning (M.C.P.), Admission

Applicants must meet the entrance requirementsof the Faculty of Graduate Studies as well as the City Planning admission requirements found on the City Planning website.

The department of City Planning allows students to begin their MCP program on either September 1st or, at the Department's discretion, January 1st.

For admission on these start dates, applications - with complete supporting documentation, should be sent to the Faculty of Graduate Studies by the following deadlines:

| Start Date | Canadian/US | International <br> Regular - |
| :--- | :--- | :--- |
| January 15th | December 1st |  |
| September |  |  |
| Winter - January | September 15th | n/a |

Winter-January September 15th n/a
Late applications may be considered if spaces become available after the main allocations.

## Program Requirements

Applicants must meet the minimum program requirements of the Faculty of Graduate Studies. Additional detailed program requirements for City Planning are found on the City Planning website.

## Degree Requirements:

Degree requirements: 45 credit hours total

Second language reading requirement: none

Expected time to graduation: two years

CITY 7020 Planning Methods and Techniques II Cr.Hrs. 3 (Formerly 073.702) A survey of quantitative and qualitative methods and techniques used in planning analysis and decision making including sampling survey, case study, contingency and spatial analysis as well as phenomenological and simulation techniques and methodologies.

CITY 7030 Planning Theory 1 Cr. Hrs. 3
(Formerly 073.703) The principal ideas and ideals influencing planning thought and practice, ranging from rational comprehensive planning to theories of societal guidance, ethics and the human-environment interface.

CITY 7070 Housing and Urban Revitalization Cr.Hrs. 3 (Formerly 073.707) Housing and urban revitalization in the Canadian context. Housing demand and supply, structure of the housing market, Canadian housing policy, affordability and other selected housing issues; processes and strategies related to urban decline and revitalization.

CITY 7160 Land Development Cr.Hrs. 3
(Formerly 073.716) Application of theories and techniques of urban land development, formulation of industrial policies and financial and political implications of land development.

## CITY 7170 Transportation Cr.Hrs. 3

(Formerly 073.717) Transportation modes and systems: land, water, air. Traffic studies, planning principles, public issues and governmental policies.

CITY 7200 Urban Analysis Cr.Hrs. 3
(Formerly 073.720) Theoretical framework for the dominant theories of urban structure, property and land-use relevant to city planning.

CITY 7270 Seminar in Regional Planning Cr.Hrs. 3 (Formerly 073.727) An exploration of eco-regional planning drawing on concepts of citi-states (or city-regions) and bioregionalism; including contemporary theme research, and a region-specific analysis to inform an understanding of regional planning's past, present and future.

CITY 7300 Urban Society Cr.Hrs. 3
(Formerly 073.730) An interdisciplinary seminar on social policy and social planning in the contemporary urban setting. National, provincial and local contexts shaping the provision of welfare and well-being. Demonstration of selected social planning techniques. Application to current issues.

CITY 7310 Law and Local Government Cr.Hrs. 3 (Formerly 073.731) Topics of common law, torts, real property, land use planning and control, expropriation, and local government, including some recent cases.

CITY 7340 Urban Development Cr.Hrs. 3
(Formerly 073.734) The mechanics of urban development and its socio-economic implications and underlying political forces. Practical field experience is involved in the form of an internship.

CITY 7350 Thesis/Practicum Preparation Cr. Hrs. 0
(Formerly 073.735) A preparatory course for students registered in thesis or practicum. Methods of constructing problems, formulating hypotheses, methods of investigation, sources of information, and appropriate form and content of thesis and/or practicum. This course is graded pass/fail.

CITY 7360 Development Process for Design
Professions Cr.Hrs. 3
(Formerly 073.736) Introduction to the development process and method. Site selection and planning. Feasibility and case studies. The dynamics of development teams, including marketing strategies and management of completed projects. Joint public and private enterprises.

CITY 7370 Urban Design Cr.Hrs. 3
(Formerly 073.737) Theory and concepts of urban design from historical and contemporary perspectives. Urban design seen as (a) a multidisciplinary activity, (b) conscious threedimensional design, and (c) process and public policy. Implementation and control techniques of urban design. Case studies.

CITY 7410 Planning Design 1 Cr.Hrs. 6
(Formerly 073.741) Studio/workshop developing problemsolving techniques and design skills in an area subject to environmental, social and economic change. Preparation of a planning report comprising of research and analysis, evaluation of feasible alternative strategies and designs, synthesis and recommendations for implementation. Case studies from planning journals and planning practice in cities and regions.

CITY 7420 Planning Design 2 Cr.Hrs. 6
(Formerly 073.742) Studio/workshop building upon CITY 7410 (or 073.741) as applied to an area of greater complexity, requiring the evaluation and integration of contributions from several planning-related disciplines. Selected projects emphasize both the multidisciplinary and interdisciplinary nature of planning, and in the resolutions of the problems posed. Case studies from planning journals and planning practice in cities and regions.

CITY 7430 Planning Design 3 (Urban Design) Cr.Hrs. 6 (Formerly 073.743) The application of urban design theories and techniques to a large scale urban area of complex land uses and community development issues. The studio is also open to advanced students in architecture, landscape architecture and interior design and develops a broad approach to multi-disciplinary problemsolving design solutions.

CITY 7440 Planning Design 4 Cr.Hrs. 6
(Formerly 073.744) Advanced planning design studio/workshop, experimental and innovative in approach and content, involving special techniques and skills. Studio may also be off-campus and/or focussed on a special topic centred around a distinguished guest expert.

CITY 7450 Concepts in Sustainable Planning and Design Cr.Hrs. 3
(Formerly 073.745 ) Examination of the concepts and theories involved in the development of sustainability as a force in socio-economic and environmental decision-making. Explores the implications of sustainability for contemporary design and planning thought and practice.

## CITY 7460 Urban Ecology and Environmental

 Management Cr.Hrs. 3(Formerly 073.746) Theoretical frameworks and theories in urban ecology and environmental management as they apply to municipal institutional frameworks and the role of environmental planning in urban and regional government.

CITY 7470 Professional Planning Practice Cr.Hrs. 3 (Formerly 073.747) An examination of the professional practice and praxis of planning, presented in collaboration with the Manitoba Association of the Canadian Institute of Planners, emphasizing the practice aspects of planning processes, and the political, institutional and legal systems that direct and/or inform planning.

## Civil Engineering

Head: Dr. Ahmed Shalaby, P.Eng. (204) 474-6818
Campus Address/General Office: E1-386 Engineering
Telephone: (204) 474-8596
Fax: (204) 474-7513
Email Address: wenzoski@cc.umanitoba.ca
Website: http://umanitoba.ca/civil
Assoc. Head: Dr. James Blatz, P.Eng. (204) 474-9816
Academic Staff: Please refer to website for Faculty information:http://umanitoba.ca/civil

The Department of Civil Engineering offers programs of coursework and research leading to the Master of Science, Master of Engineering and Doctor of Philosophy in: environmental engineering; geotechnical engineering; structural engineering; transportation engineering and water resources engineering.

## Research Facilities

Environmental Engineering Equipment and Facilities: The environmental engineering program and laboratory offer the latest in instruction and facilities for studying the physicochemical and biological transformation of pollutants in water, wastewater and solid waste. In particular, the program aims at developing the principles of reactor and process engineering for the treatment of water, industrial and municipal wastewater and solid waste. State-of-the-art analytical equipment includes high performance liquid chromatographs with a variety of detectors, gas chromatographs, automated ion analyzers, atomic absorption spectrophotometer, carbon analyzer, microbial toxicity analyzer and others. Spacious laboratories allow for bench scale testing of various process conditions in four controlled temperature environmental chambers. Present research interests include biological nutrient removal, volatile acids fermentation, solid stream processing through aerobic and anaerobic digestion, co-digestion and co-composting of municipal and industrial solid waste, biodegradation of
hazardous pollutants, treatment in cold climates, pesticide waste treatment; surface and groundwater treatment processes, and upgrading of municipal and industrial treatment plants.

Geotechnical, Hydrogeology and Geoenvironmental Engineering Equipment and Facilities: Equipment in the geotechnical laboratories reflects the research interests of the department's staff in the engineering behaviour of a wide range of naturally occurring materials. In addition to the normal range of consolidation, direct shear and triaxial shear test facilities, specialized facilities have been provided for studies on swelling clays, at high pressures and temperatures, granular soils, and hard crystalline rocks.

The clay testing program involves stress-controlled tests to investigate the distinction between yielding and rupture in carefully sampled natural clays, and the effects of load duration and temperature on soil behaviour. Applications include estimating settlements of foundations, embankments, and tanks and the stability of slopes and excavation. Additional work involves the development of appropriate constitutive models for soil behaviour, and the measurement of hydraulic conductivities for retention structures.

An environmental chamber permits testing of soil samples under freezing conditions. A well-equipped geotechnical computing laboratory provides support for numerical analysis in soil mechanics, rock mechanics and hydrogeology. It also supports data presentation and report preparation in experimental programs. In rock mechanics, equipment is available for performing tests for Brazilian tension, flexure, uniaxial compression, triaxial compression, static fatigue, creep in both tension and compression, and the double torsion test used in fracture mechanics. Present research interests concentrate on the relationship between crack growth, stress level and time, with special emphasis on microstructural processes in the rock.

The geoenvironmental engineering laboratory has the equipment to characterize landfill construction materials, leachates, and hazardous wastes. Current research focuses on hazardous waste containment, soil bioremediation, and aerobic composting.

The focus of the hydrogeology research efforts is directed towards modelling and simulation of groundwater and contaminant transport. Resources are also directed at sustainable aquifer development within the Manitoba environs.

With current developments in computer technology and its associated impacts on geotechnical engineering, the University of Manitoba has kept up by providing graduate students in geotechnical engineering with state-of-the-art computer facilities. The geotechnology computer facility at the University of Manitoba has 8 personal computers, 3 SPARC workstations, all connected on a local area network with T1 Internet access 24 hours a day.

Structural Engineering Equipment and Facilities: The research facilities include concrete, structural, and materials

## 

ACADEMIC CALENDAR
laboratories covering approximately 7500 sq. ft. A Structura Engineering and Construction Research and Development Facility adds 2500 sq. ft. and includes a 23-ton overhead crane, as well as a $1,200,000-\mathrm{lb}$.-capacity MTS servocontrolled loading system. The new facilities enable the testing of full-scale specimens. Also in the structural laboratory are a $600,000-\mathrm{lb}$. Baldwin testing machine, a $60,000-\mathrm{lb}$. Riehle testing machine and a 30,000-lb. Baldwin testing machine. A number of jacks and loading frames are also available which can be attached to two strong floors and allow a wide range of loading assemblages to be set up easily. The laboratory also houses an MTS servo-controlled loading system, with a $220,000-\mathrm{lb}$. test frame and one fixed and one portable actuator, which can be used for programmed cyclic and fatigue testing. The materials laboratory contains an environmental cabinet and a freeze/thaw cabinet which are used to study the behaviour of materials under a wide range of temperatures and humidity. Three high-speed computer-controlled data acquisition systems are available for both laboratory and field testing.

Theoretical and Applied Mechanics Equipment and Facilities: Research Facilities in Theoretical and Applied Mechanics include several workstations and a variety of engineering analysis software. Current research is directed toward investigation of non-destructive evaluation of flaws in plate and shell structures, dynamics of electrical transmission lines and communication towers; finite and boundary element analysis, and mechanics of piezo ceramics, shape memory alloys and smart structures.

Water Resources Engineering Equipment and Facilities: The Hydraulics Research and Testing Facility (HRTF) has an area of 780 sq m and supports both physical and numerical modelling in hydraulics. The physical modelling laboratory houses a constant-head tank ( $500 \mathrm{l} / \mathrm{s}$ capacity), a 15 m variable slope flume, a 14 m hydraulic model flume, and a 34 m random wave flume. Floor space is available for the study of hydraulic structures and river models. The facility is also equipped with a range of modern instrumentation including acoustic Doppler velocimeters (3 component), hot-wire probes, servo-motor positioning systems, electronic discharge monitoring with inline volumetric tanks for calibration, and high speed data acquisition equipment. All of the computers in the physical modelling laboratory are networked to the facility's computer lab. A counter-rotating flume and cold room (to -30 C) are used to study hydraulics of frazil and anchor ice. A digital image acquisition and processing system complement the facility's ice research equipment. The HRTF computer laboratory has a number of high-end Pentium based PCs for numerical modelling. Software is available for 2D finite-element modelling of rivers and lakes, sediment transport modelling, and 2D modelling of wind generated wave fields.

The Hydrologic Processes Laboratory (HPL) supports research dealing with the management and analysis of spatially distributed in situ and remotely sensed data, for solving complex, large-scale problems of hydrology. The facility has several PC machines linked to a main UNIX workstation. A wide variety of software is available within HPL, including ARC/INFO, Arcview and other GIS, as well as ENVI software for processing remotely sensed data. The emphasis of research carried out in the facility is in
distributed hydrological modelling, operational hydrology, and environmental monitoring using remotely sensed data.

## M.Sc. in Civil Engineering Admission

For admission into the Master of Science program, applicants are required to hold a bachelor's degree in Civil Engineering from a recognized university. Applicants with other engineering degrees or with honours degrees in related areas may also be accepted at the discretion of the department head and the dean of the Faculty of Graduate Studies. In certain cases acceptance may initially be limited to pre-Master's study. Please contact the Department for details.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Department of Civil Engineering at least 7 months prior to their intended start date.

## Program Requirements

The Master of Science degree is attainable only through coursework and thesis. Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. M.Sc. students are required to spend at least one academic session in fulltime resident graduate study. On recommendation of the department and the Faculty Graduate Committee, the residence requirement may be waived in special cases.

A minimum of 18 credit hours of coursework is required with at least 12 credit hours at the 7000 level. The coursework program would normally include 6 credit hours of ancillary courses from other than the candidate's discipline. These ancillary courses could include courses from the department or courses from another department, normally at the 4000 level. Depending upon the student's background, the student's advisor may require the student to take 3000 level or additional 4000 level (and in exceptional circumstances, 2000 level) courses in major or ancillary fields of study which would not count towards the minimum 18-credit hour requirement. The candidate is required to make an oral presentation on the completed M.Sc. thesis to the Examining Committee, and to pass an oral examination.

The maximum time allowed for the completion of the Master's degree is 5 years.

Second language reading requirement: none

Expected time to graduate: two years
M.Eng. in Civil Engineering

## 

ACADEMIC CALENDAR
2012-2013 •

The Master of Engineering (M.Eng.) program provides an industrially oriented program for practicing engineers who wish to continue their studies on a broad base. The program also facilitates continuing education for credit.

## Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department of Civil Engineering at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Department of Civil Engineering at least 7 months prior to their intended start date.

## Program Requirements

It is desirable that full-time students have one or two years of engineering experience. The minimum requirement for the award of the Master of Engineering degree is 30 credit hours. The degree can be obtained through two different options:

## Option 1

## Coursework Alone/Comprehensive Examination

The minimum requirement of 30 credit hours can be met by coursework alone with at least 18 credit hours at the 7000 level. The program should include 6 credit hours of ancillary coursework from other than the candidate's discipline. These ancillary courses could include courses from the department or courses from another department, normally at the 4000 level. Depending upon the student's background, the student's advisor may require the student to take 3000 level or additional 4000 level (and in exceptional circumstances, 2000 level) courses in his/her major or ancillary field of study which would not count towards the minimum 30-credit-hour requirement.

Students must pass a Comprehensive Examination (GRAD 7010).

Option 2

## Coursework and Project and Report

The minimum requirement of 30 credit hours can be met by a combination of coursework and an engineering report, with at least 12 credit hours at the 7000 level. Of the 30 credit hours, 6 credit hours will be assigned to an approved project and report. The program should include 6 credit hours of ancillary coursework from other than the candidate's discipline.

These ancillary courses could include courses at the 4000 level from the Department of Civil Engineering or from another department, normally at the 4000 level. Depending upon the student's background, the student's advisor may require the student to take 3000-level or additional 4000 level (and in exceptional circumstances, 2000 level) courses in the major or ancillary field of study which would not count towards the minimum 30-credit-hour course requirement.

The candidate is required to give an oral presentation on the project at about the time the report is submitted.

Second language requirement: none
Expected time to graduation: Two years

## Ph.D. in Civil Engineering <br> <br> Admission

 <br> <br> Admission}Admission to the Ph.D. program is normally from the Master's degree level, i.e., M.Eng. or M.Sc. Students making exceptional progress while enrolled in either the M.Eng. or M.Sc. program may be transferred to the Ph.D. program by the dean of the Faculty of Graduate Studies upon the recommendation of the department head based on recommendations from the student's advisor and an appointed Selection Committee. In such cases, the program credit-hour requirements shall be decided in conjunction with the transfer.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. The Ph.D. program consists of coursework, original research and thesis. Normally, 12 credit hours of coursework (all at the 700/7000 level) are required beyond the Master's degree or its equivalent. The minimum time requirement is two calendar years of full-time study and research, of which at least one academic year must be spent on campus. For research projects conducted off-campus, the student must be geographically proximate to the campus and visit it regularly.

Second language requirement: none

Expected time to graduation: Four years

CIVL 7010 Modern Railway Engineering Cr.Hrs. 3 (Formerly 023.701) A course in aspects of the design,

## 

## ACADEMIC CALENDAR 2012-2013 •

construction, and operation of modern railways, examining main lines, branch lines, and terminals.

CIVL 7040 Analysis and Design of Freight Transport Systems Cr.Hrs. 3
(Formerly 023.704) Overview of the structure and organization of Canada's freight transport system; measurement, analysis and forecasting of freight movements; transportation system performance; operating, service and cost characteristics of freight transport systems; design considerations for freight handling facilities; case studies in analysis and design of freight transport systems. Prerequisite: CIVL 4840 (or 023.484) or permission of the instructor for non-engineering students specializing in transport studies.

## CIVL 7050 Transportation Engineering in Developing

 Regions Cr.Hrs. 3(Formerly 023.705) Aspects of transportation in developing regions that differ significantly from those of conventional North American practice. Factors and assumptions in developing region context; analysis and design of surface transportation systems and components in developing regions; special aspects of professional practice; case studies from Third World and northern Canada.

CIVL 7060 Analysis and Design of Passenger Transport Systems Cr.Hrs. 3
(Formerly 023.706) Passenger travel forecasting principles and techniques; demand models; passenger transportation system performance; vehicle cycles; cost functions; congestion; evaluation; examination of case studies.

CIVL 7090 Water Resources Systems Cr.Hrs. 3 (Formerly 023.709) The application of operations research/systems analysis techniques to water resources and urban and environmental systems. Prerequisite: permission of instructor.

CIVL 7100 Prestressed Concrete Cr.Hrs. 3 (Formerly 023.710) A study of the analysis and design of prestressed concrete structures; pre-tensioning; posttensioning; importance of material properties; modern design specifications.

CIVL 7140 Structural Masonry Cr.Hrs. 3
(Formerly 023.714) Masonry materials, properties and behaviour. Plain and reinforced masonry, axial load, flexure, combined loading. Design methods, building code developments, building design.

CIVL 7190 Solid Mechanics Cr.Hrs. 3
(Formerly 023.719) Cartesian Tensors, analysis of stress and strain, constitutive relations, formulation and solution of problems in 2-D and 3-D elasticity, Hankel integral transforms, plasticity; yield surface and criteria, flow rule, plastic potential, hardening, viscoelasticity; creep, relaxation, basic viscoelastic models, stress-strain relations, correspondence principle.

CIVL 7200 Topics in Environmental Engineering Cr.Hrs. 3 (Formerly 023.720) Includes topics such as energy and the environment, solid waste management, and environmental problems in transport. Topics are studied through case histories of contemporary issues.

CIVL 7210 Solid Waste Composting and Disposal Cr.Hrs. 3 (Formerly 023.721) Advanced engineering principles related to resource recovery and solid waste disposal. Biological conversion technologies and the disposal of solid wastes are discussed in detail.

## CIVL 7260 Behaviour of Reinforced Concrete

Members Cr.Hrs. 3
(Formerly 023.726) Study of the actual behaviour and strength of reinforced concrete members; examination of recent significant publications, correlation to research with current design specifications and codes.

CIVL 7300 Use of Fibre-Reinforced Polymers (FRP) in Structural Design Cr.Hrs. 3
Fibre-reinforced polymers (FRP) constituents and properties; design of concrete structures internally reinforced with FRP, concrete members prestressed with FRP, externally bonded FRP liminates for strengthening and rehabilitation of structures; construction details and case studies of projects using FRP reinforcement.

CIVL 7350 Topics in Advanced Structural
Engineering Cr.Hrs. 3
(Formerly 023.735) Lectures and seminars on selected advanced topics in structural engineering; current problems; implications on current research.

CIVL 7360 Landslides and Slope Failures: Identification, Causes, and Control Cr.Hrs. 3
(Formerly 023.736) Slope movement types and processes in soil and rock masses; recognition and identification: factors influencing stability; field investigation and instrumentation; strength properties and their measurement; stability analysis; assessment of hazard and risk analysis; stability in open pit mining; remedial measures including stabilization, protection, and warning.

## CIVL 7400 Finite Element Method in Engineering

Mechanics Cr.Hrs. 3
(Formerly 023.740 ) Review of flexibility and stiffness methods; concept of finite elements and energy formulations; various shape functions; solutions of planar and three-dimensional elasticity problems; beams, plates and shells; special problems, e.g., seepage, non-linear material.

## CIVL 7430 Special Topics in Geotechnical

Engineering Cr.Hrs. 3
(Formerly 023.743) A tutorial approach to the study of topics in soil, rock and ice engineering not covered in the formal coursework.

CIVL 7450 Soil Properties and Behaviour Cr.Hrs. 3 (Formerly 023.745) Testing methods for strength, compressibility and hydraulic conductivity of engineering soils; traditional models for soil characterization; introduction to hypoelastic and elastic plastic modelling; extension of models to account for strain-rate, temperature, and unsaturation; influence of soil chemistry; relationship between laboratory results and computational needs.

CIVL 7460 Geotechnical Design with
Geosynthetics Cr.Hrs. 3
(Formerly 023.746) Properties and test methods of geosynthetics (i.e., geotextiles, geogrids, geomembranes, geonets and geocomposites); functions of geosynthetics

## ACADEMIC CALENDAR

(separation, reinforcement, filtration, drainage and containment); design of reinforced soil structures (retaining walls, slopes, embankments and unpaved roads); design of filtration and drainage works; design of lined waste containment facilities; case histories.

CIVL 7480 Soils Engineering Cr.Hrs. 3
(Formerly 023.748) Analysis and design for construction in engineering soils: review of soil strength and compressibility, site characterization, stability and settlements of shallow foundations, deep foundations, earth retaining structures, slope design and remediation, earth dams. Emphasis will be placed on published records comparing predictions with field performance.

CIVL 7610 Special Topics in Theoretical and Applied Mechanics Cr.Hrs. 3
(Formerly 023.761) Lectures and seminar on selected advanced topics in the field of mechanics; current problems and research.

CIVL 7650 Selected Topics in Water-Resources Development Cr.Hrs. 3
(Formerly 023.765) Lectures and seminars on selected advanced topics in water-resources engineering.

CIVL 7660 River Engineering Cr.Hrs. 3
(Formerly 023.766) Classification of rivers; regime of river channels; channel patterns, sediment transport; design of stable channels; engineering interference (diversions, dams, dredging); river training works; hydraulic-model studies of rivers.

CIVL 7680 Soil/Ground Improvement Techniques Cr.Hrs. 3 (Formerly 023.768) Analysis and design of mechanical and chemical treatment techniques commonly applied to problem foundation soils for civil engineering structures. Mechanical modification; hydraulic modification; modification by admixtures; modification by reinforcement and confinement; in-situ evaluation of soil improvement and monitoring.

CIVL 7700 Water Resources Planning Cr.Hrs. 3 (Formerly 023.770) Principles and methodologies of planning water resources development projects. An evaluation of a major multi-purpose project from interdisciplinary viewpoints, incorporating those of designers, planners, critics and political decision makers. Offered in alternate years.

CIVL 7710 Coastal Hydraulics Cr.Hrs. 3
(Formerly 023.771) Mechanics of wave motion; wave and water level predictions; types and design of coastal protection; littoral processes.

## CIVL 7720 Groundwater and Solute Transport

 Modelling Cr.Hrs. 3(Formerly 023.772) The physics and numerical solution of mathematical models of steady-state and transient groundwater flow and mass transport in the saturated and unsaturated zones; introduction to the finite difference and finite element methods; popular software; other modelling techniques, including random-walk particle methods; modelling groundwater contamination; non-linear problems; applications to regional groundwater flow and groundwater recharge, aquifer resource evaluations, contamination prediction.

CIVL 7730 Groundwater Engineering Cr.Hrs. 3 (Formerly 023.773) The role of geology and hydrogeology in the siting, design of engineering structures; synthesis of groundwater mechanics in various geologic environments; case studies in construction dewatering, groundwater resource evaluation, subsidence, seepage in dams and foundations and slope stability; basic review of analytic solutions and numerical methods.

CIVL 7740 Special Topics in Hydrology Cr.Hrs. 3 (Formerly 023.774) Selected topics examining the statistical aspects of hydrology. Time series analysis; disaggregation processes; flood frequency analysis; analysis of extremes.

CIVL 7750 Advanced Civil Engineering Systems Cr.Hrs. 3 (Formerly 023.775) Optimization of Civil Engineering Systems. Use of linear and dynamic programming and network theory in all aspects of civil engineering. Introduction to the use of stochastic processes in operations research. Particular emphasis is given to water resources and environmental and transportation engineering.

CIVL 7760 Recent Developments in Bridge Engineering and Structural Health Monitoring Cr. Hrs. 3 Introduction to Intelligent Sensing for Innovative Structures (ISIS); Introduction to Civionics and Structural Health Monitoring; Sensors and Data Acquisition Systems; Theoretical Evaluation of Bridge Decks; Theoretical Evaluation of Cantilever Slabs; Theoretical Evaluation of Girders; Theoretical Evaluation of Columns; Bridge Inspections and Maintenance; Conceptual Design and Aesthetic Design of Bridges.

CIVL 7770 Hydrological Processes Cr.Hrs. 3 (Formerly 023.777) Runoff generation and runoff modelling; scale effects in hydrology; ramifications of distributed and lumped approaches; computer models of watershed modelling; optimization schemes and minimization functions; special concerns dealing with digital elevation models.

## CIVL 7780 Advanced Behaviour and Design of Steel

## Structures Cr.Hrs. 3

(Formerly 023.778) Behaviour and design of welded thinwalled members; plate girders, composite construction, beam-columns, and connections. Special topics such as stability of metal structures and bracing requirements are also covered.

CIVL 7790 Pavement Evaluation and Performance Cr.Hrs. 3 (Formerly 023.779) Pavement classification, pavement management, performance measures, condition surveys, sensor technology, material sampling, test methods on asphalt binders and unbound layers, non-destruc-tive testing, sources of variability, pavement maintenance, rehabilitation, long-term performance.

CIVL 7800 Design of Light Industrial Steel

## Buildings Cr.Hrs. 3

(Formerly 023.780) Design criteria for metal building systems; behaviour and design of tapered and prismatic built-up columns and girders; design of gable frames; behaviour and design of cold-formed members; bracing requirements for metal buildings and design of connections.

CIVL 7820 Operational Hydrology Cr.Hrs. 3
(Formerly 023.782) Hydrographic analysis; relation between the physical processes and the hydrograph; estimation and

## 

ACADEMIC CALENDAR
prediction. Floods; statistical analysis; maximum probable floods. Water supply; estimates of dependable flow, simulation, synthetic flow series, statistical analysis.

CIVL 7840 Traffic Systems Analysis Cr.Hrs. 3 (Formerly 023.784) Mathematical theories of traffic flow, introductory queueing theory with application to traffic performance at intersections; travel forecasting principles and techniques; the use of simulation in traffic engineering design.

CIVL 7850 Advanced Structural Dynamics Cr.Hrs. 3 Responses of single-degree-of-freedom and multi-degree-offreedom systems, damped and undamped systems, linear and inelastic systems to dynamic excitations; free vibration, forced vibrations. Special emphasis on responses of civil structures to seismic and blast loadings.

CIVL 7870 Advanced Engineering Analysis Cr.Hrs. 3 (Formerly 023.787) Analytical techniques used in engineering, including such topics as the application of complex variables, partial differential equations, generated Fourier series, integral transforms, and special functions, to advanced problems in civil engineering.

CIVL 7920 Theory of Water Treatment Cr.Hrs. 3 (Formerly 023.792) Physical and chemical characteristics of water; water treatment processes including coagulation/flocculation, sedimentation, filtration, softening, adsorption, ion exchange, disinfection, and membrane processes.

CIVL 7930 Theory of Waste Treatment Cr.Hrs. 3 (Formerly 023.793) Characteristics of waste-specific and generic determinations; unit operations and unit process for physical, chemical and biological treatment and transformation of particulate and dissolved contaminants. Biochemical transformations and degradation of hazardous pollutants; unit processes for enhanced nutrient removal and hazardous waste treatment. Full treatment trains for industrial and municipal waste treatment, including solids handling. Prerequisite: CIVL 3700 (or 023.370 ) and CIVL 3690 (or 023.369) or permission of instructor.

CIVL 7950 Environmental Engineering Laboratory Cr.Hrs. 3 (Formerly 023.795) Laboratory work in water and wastewater analysis and treatment processes related to water quality management. Prerequisites: CIVL 7930 (or 023.793) and CIVL 7920 (or 023.792).

CIVL 7960 Environmental Engineering Design Cr.Hrs. 3 (Formerly 023.796) Design of unit operations. Planning, cost effectiveness analysis, and conceptual design of a whole wastewater treatment plant. Prerequisites: CIVL 7930 (or 023.793).

CIVL 7990 Special Topics in Transportation Cr.Hrs. 3 (Formerly 023.799) Lectures and seminars on selected topics in transportation not covered in the formal coursework.

## Classics

Head: (and Graduate Chair) Mark Joyal
Campus Address/General Office: 364 University College

Telephone: (204) 474-9502
Fax: (204) 474-7684
Email Address: classics@umanitoba.ca
Website: http://umanitoba.ca/classics/
Academic Staff: http://umanitoba.ca/classics/staff/

The department provides programs of study leading to the degree of Master of Arts in several areas of classical studies that include Greek and Roman art and archaeology, Greek and Roman history and historiography, and Greek and Latin languages and literatures. The department attempts, within the range of expertise of its personnel, to tailor the M.A. program to the particular interests and needs of the individual student. In many instances the M.A. is planned as a preparation for admission to a Ph.D. program in another university. In the past students have had good success in proceeding to doctoral programs in leading North American and British universities.

## Fields of Research

- Greek and Roman art history and archaeology, with particular strengths in Roman North Africa, Greek ceramics and Late Antique sculpture
- Greek literature, especially lyric and dramatic poetry, philosophical literature and Hellenistic poetry and prose
- Greek language: history and lexicology
- Latin literature, especially epic and dramatic poetry
- Greek and Roman historiography
- Greek and Roman economic history
- Greek thought and intellectual history

## Research Facilities

The university library's holdings are supplemented locally by those of the University of Winnipeg. Both institutions have collected classical monographs and periodicals for over a century. Together they maintain subscriptions to a respectable number of current periodicals representing all fields of classical studies. Through the library, students have electronic access to an ever-increasing list of materials such as the Patrologia Latina. The department holds licenses for the Thesaurus Linguae Graecae data-base and the Packard Humanities Institute's data-bases for Latin literature and for documentary papyri and inscriptions.

The department holds an institutional membership in the American School of Classical Studies in Athens and the Canadian Institute in Greece. The American School makes course and field-work opportunities available to students and also gives them access to various research resources including its excellent library. Field archaeologists in the department occasionally offers credit courses and opportunities for field-experience at their overseas excavations or surveys in such places as Greece, Ukraine and North Africa.
M.A. in Classics

## Admission

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, demonstrated proficiency in ancient Greek and Latin and an honours B.A. or its equivalent in Greek, Latin or Classics is a prerequisite for admission to the M.A. Program.

## Application Deadlines

The deadline for students to submit their application and supporting documentation to the Faculty of Graduate Studies is March 1 prior to the intended start date. However, students who wish to be considered for financial assistance from the University of Manitoba must submit their application and supporting documentation no later than January 15 prior to the intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Course work will normally include 12 credit hours at the 7000 level, but students may be required to complete further courses. Students are required to pass one Greek reading exam and one Latin reading exam on prescribed texts, normally at the end of the first year of their programs. A knowledge of French and/or German is not required but is desirable.

Language Reading Requirements: Latin and Greek

Expected Time to Graduate: Two years.

## Ph.D. in Classics

There is no Ph.D. program in the Department of Classics.

## Classics--Greek

GRK 7100 Greek Literature 1 Cr.Hrs. 3
A reading course involving a selected Greek author or authors, or a set of related works.

GRK 7102 Greek Literature 2 Cr.Hrs. 3
A reading course involving a selected Greek author or authors, or a set of related works.

GRK 7110 Greek History Cr.Hrs. 3
This course will investigate aspects of Greek history, emphasizing different topics, sources, and theoretical approaches. Possible focuses for the course include a period of Greek history, or a particular region of the Greek world.

## Classics -Latin

LATN 7200 Latin Literature 1 Cr.Hrs. 3
A reading course involving a selected Latin author or authors, or a set of related works.

LATN 7202 Latin Literature 2 Cr.Hrs. 3
A reading course involving a selected Latin author or authors, or a set of related works.

LATN 7210 Roman History Cr.Hrs. 3
This course will investigate aspects of Roman history, emphasizing different topics, sources, and theoretical approaches. Possible focuses for the course include a period of Roman history, or a particular region or province of the Roman Empire.

## Classics -Classics

CLAS 7300 Topics in Greek Art and Archaeology Cr.Hrs. 3 This course will investigate aspects of Greek art, archaeology, and material culture, emphasizing different topics, methods, genres, or theoretical approaches. Possible focuses for the course include vase painting and other ceramic artifacts, sculpture, architecture, the archaeology of particular regions, and archaeological approaches to the economy and other issues in social history.

CLAS 7302 Topics in Roman Art and Archaeology Cr.Hrs. 3 This course will investigate aspects of Roman art, archaeology, and material culture, emphasizing different topics, methods, genres, or theoretical approaches. Possible focuses for the course include sculpture, architecture, mosaics, wall painting, the archaeology of particular regions, and archaeological approaches to the economy and other issues in social history.

CLAS 7310 Readings in Selected Topics 1 Cr.Hrs. 3 Intensive study of one or more authors in Greek or Latin literature or of a special topic in ancient history.

CLAS 7320 Readings in Selected Topics 2 Cr.Hrs. 3 Intensive study of one or more authors in Greek or Latin literature or of a special topic in ancient history.

## 

ACADEMIC CALENDAR
2012-2013 •

CHS offers broad, multidisciplinary, graduate training at the Diploma, Master and Doctoral levels in the concepts and methods of the population-based health sciences and their application in the practice of public health and preventive medicine. In addition to training in the core areas of epidemiology, biostatistics and the social sciences as applied to health (anthropology, economics, sociology and political science), students have an opportunity to obtain advanced training in internationally recognized research programs conducted by specialized units within the department such as the Manitoba Centre for Health Policy, the Centre on Aging, the Section of First Nations, Metis and Inuit Health and the Centre for Global Public Health. As a result graduate students have the opportunity to access both internationally regarded researchers and award winning teachers.

The Doctoral (Ph.D.) program is designed to produce individuals who will teach in the community health sciences; train other researchers, design and execute major research projects; and serve as senior advisors and consultants in the area of health care policy and planning.

In contrast, our two Master's programs, the Master of Science (M.Sc.) and Master of Public Health (M.P.H.) degrees, are intended to satisfy the demand of local, regional, provincial and federal health departments for trained community health professionals. Both Master's level programs provide core training in epidemiology, public health, health policy planning, and health administration. The M.Sc. program has a research focus requiring completion of a thesis while the M.P.H. program has a field-placement / practicum integrating applied public health concepts.

The Diploma in Population Health (Dip.P.H.) is a coursebased program intended to provide senior clinicians in teaching hospitals and managers in provincial and regional health authorities with core knowledge and skills in the population health sciences which will allow them to become more effective consumers and utilizers of health research data.

Program graduates currently occupy faculty positions in medical, dental, nursing and medical rehabilitation schools in Canada, the United States and overseas. Others work in government at the provincial and federal levels as medical officers of health, and as directors of research and planning programs. Some graduates have returned to primarily clinical positions in a variety of health disciplines while others have become independent consultants in health services planning and evaluation.

## Fields of Research

Researchers in the department are involved in a wide range of research activities in community health. Many have achieved national, and in some cases, international reputation in their fields. Particular areas of strength are health services research, health policy planning, northern and First Nations, Inuit and Metis health, occupational and environmental health, women's health, disability issues, aging and health, the epidemiology of infectious diseases and the epidemiology of chronic diseases.

Researchers are also actively working in areas such as health promotion, HIV/AIDS prevention, medical anthropology, health education and social determinants of health. In addition, several researchers in the department have active interests in Global Health with projects currently running in India and Kenya.

The department has researchers with high levels of expertise in both qualitative and quantitative research methodologies. The opportunity for graduate students to work with researchers in mixed methods research paradigms represents a major strength of the program.

## Research Facilities

The ability to seamlessly interact with internationally regarded research groups within the department creates an extremely rich graduate research environment. Through the Manitoba Centre for Health Policy graduate students have potential access to administrative health databases which are unique in Canada.

The department maintains a graduate student computer resource centre supporting a broad range of statistical, graphical and information processing software. The department also maintains a suite of carrels that provide a dedicated study centre for its graduate students.

## Ph.D. in Community Health Sciences, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The Ph.D. program is open to individuals with thesis-based M.A. and M.Sc. degrees. A thesis advisor must be identified at the time of application.

The deadline for receipt of the application form and supporting documents is early January.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Eighteen credit hours of coursework from 7000-level courses (nine from required courses, nine from electives), candidacy examination and thesis. (In addition, fifteen credit hours of prerequisite courses, or their equivalents, must have been completed before entering the program or in the first year).

Second language requirement: none

Expected time to graduation: three years full-time, five years part-time
M.Sc. in Community Health Sciences Admission

## 

ACADEMIC CALENDAR 2012-2013 •

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The M.Sc. program is open to individuals with four year degrees in the health sciences or professions or with honours degrees in the biological or social sciences.

The deadline for receipt of the departmental application form and supporting documents is early January.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Twenty-four credit hours of course work from 7000-level courses (twelve from required courses, three from methods and nine from electives) and thesis.

Second language reading requirement: none

Expected time to graduate: two years full-time, four years part-time

## M.P.H. in Community Health Sciences Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The M.P.H. program is open to individuals with four-year degrees in the health sciences or allied health professions or with honours degrees in the biological or social sciences, and a minimum of three years experience working in a field of health.

The deadline for receipt of the departmental application form and supporting documents is early January.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. The M.P.H. program consists of completion of core courses, elective courses and a supervised field placement component. Thirty credit-hours from 7000 -level courses will be required for completion of the degree: twelve credit hours from core courses and eighteen credit hours from elective courses. The field placement is a zero credit hour component.

Second language reading requirement: none
Expected time to graduate: two years full-time, four years part-time

## Diploma in Population Health, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The Dip.P.H. program is open to individuals with four year degrees in the health sciences or professions or with honours degrees in the biological or social sciences.

The deadline for receipt of the departmental application form and supporting documents is early January.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Eighteen credit hours of course work from 7000-level courses (nine from required courses, nine from electives),

Second language requirement: none

Expected time to graduation: one year full-time

CHSC 7130 Methods in Health Services Research and

## Evaluation Cr.Hrs. 3

(Formerly 093.713) Examines the process of planning and conducting research and evalution to assess health services with an emphasis on the methods by which a question may be translated into a testable hypothesis, and the specification of a research plan that will produce results of maximum internal and external validity.

CHSC 7200 Health and Health Care in Developing
Countries Cr.Hrs. 3
(Formerly 093.720) The course will focus on the patterns of mortality and morbidity in developing countries and the organization of health care services. Social, cultural, and economic development will be related to health and health services.

CHSC 7210 Epidemiology of Women's Health Cr.Hrs. 3 (Formerly 093.721) This course will deal with problems and concerns particular to women's health. The topics will be approached from an epidemiological perspective but use will be made of materials from health economics, evaluation research, medical sociology and anthropology.

CHSC $\mathbf{7 2 2 0}$ Health and Health Services of Native

## People Cr.Hrs. 3

(Formerly 093.722) This course provides a detailed review of the health status and the determinants of health of Canada's native people.
CHSC 7270 Epidemiology of Chronic (Non-Cancer) Diseases Cr.Hrs. 3
(Formerly 093.727) The objective is to study the natural history of chronic diseases including the distribution of diseases, risk and prognostic factors, rationale and strategies for prevention. The methodological issues concerning the investigation of severe disease are also discussed. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752).

## ACADEMIC CALENDAR

CHSC 7290 Economic Evaluation of Health Care Cr.Hrs. 3 (Formerly 093.729) The objectives of this course are to enable students to understand economic evaluation methodologies (cost-effectiveness, cost-benefit, cost-utility analysis) as applied to health care and to familiarize them with the applied literature on economic evaluation of health care. Prerequisite: permission of instructor.

CHSC 7300 Health Policy and Planning Cr.Hrs. 3 (Formerly 093.730) This course defines health policy and describes the planning and decision-making process. Case studies will be used to illustrate and critique the substance, process and outcome of policy papers that address contemporary policy issues. Prerequisite: permission of instructor.

CHSC 7310 Epidemiology of Health Care Cr.Hrs. 3 (Formerly 093.731) This course will discuss the advantages and disadvantages of using large administrative data bases for research purposes. Substantive topics dealt with include: regional variations in provision and utilization of health care, short- and long-term outcomestudies, individual physician behaviour, and technology assessment. Policy implications are considered. Prerequisite: a minimum grade of " B " in CHSC 7520 (or 093.752) or equivalent and permission of instructor.

CHSC 7320 Organization and Financing of the Canadian Health Care System Cr.Hrs. 3
(Formerly 093.732) Students will study the historical development and current structure of the Canadian health care system and relate its development to changes in social and political factors. The course provides an economic perspective on current policy issues in the organization, financing, and delivery of health care in Canada.

CHSC 7330 Cultural Perspectives on Illness and Medical Practice Cr.Hrs. 3
(Formerly 093.733) The objective of this course is to make students aware of the ways in which disease, illness, and medical practice are socially and culturally mediated. The course will examine cultural influences on the experience and expression of illness and consider the medical practitioner's role in the development and provision of culturally responsive health care. Prerequisite: permission of instructor.

CHSC 7360 Clinical Trials Cr.Hrs. 3
(Formerly 093.736) The Randomized Clinical Trial is the only true experiment in clinical research. This course is intended to give students a detailed knowledge of the design and implementation of RCTs. Students will participate in a qualitative review of RCTs. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752), CHSC 7470 (or 093.747), CHSC 7480 (or 093.748) or equivalents.

CHSC 7380 Prevention and Health Cr.Hrs. 3
(Formerly 093.738) The course will cover frameworks used in -formulating preventive strategies. Topics will include risk factor assessment, screening, health education, legislation, litigation, lifestyle and prevention. Actual case studies will be used. Prerequisite: CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753).

CHSC 7390 Health Promotion Cr.Hrs. 3
(Formerly 093.739) An examination of theories, principles, practices and settings for health promotion. Prerequisite:
permission of instructor.
CHSC 7400 Directed Readings I: In Epidemiologic
Methods Cr.Hrs. 3
(Formerly 093.740) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisites: permission of instructor and Graduate Program Director.

CHSC 7410 Directed Readings: II - In Epidemiology Cr.Hrs. 3
(Formerly 093.741) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisite: permission of instructor and Graduate Program Director.

CHSC 7430 Seminars on Advanced Topics: II - In Methods of Health Care Cr.Hrs. 3
(Formerly 093.743) Sem-inars dealing with current research issues, emerging methodologies and analytical techniques will be offered for advanced students. Prerequisite: permission of instructor.

## CHSC 7450 Epidemiology of Communicable

Diseases Cr.Hrs. 3
(Formerly 093.745) Overview of epidemiological principles in communicable disease investigation and prevention and specific issues in controls of certain specific communicable diseases of public health importance in Canada will be introduced. Prerequisite: permission of instructor. Prerequisite: a minimum grade of "B" om CHSC 7520 (or 093.752).

## CHSC 7460 Environmental and Occupational

Health Cr.Hrs. 3
(Formerly 093.746) The aim of the course is to acquaint the student with the role of the environment (general and specifically working) as the determinant of health. The content of the course will be presented in the form of lectures, seminars, and field visits. Prerequisite: permission of instructor.

CHSC 7490 Empirical Perspectives on Social Organization and Health Cr.Hrs. 3
(Formerly 093.749) This course will focus on a selected review of the epidemiological literature which has integrated social factors in the investigation of the distribution of health and illness in society. The course will review a selection of important empirical studiesinvestigating the roles played by social, psychological and economic status factors in determining health and illness. Emphasis will be placed on identifying the central theoretical and methodological approaches to defining and measuring socioeconomic status in this literature. Prerequisite: permission of instructor.

CHSC 7510 Current Topics in Community Health Cr.Hrs. 3 (Formerly 093.751) Focus on current issues and topics in community health, particularly as they relate to Manitoba and to Canada. Emphasis will be placed on current literature and ongoing research to examine emerging policies and programs within health care and social development. Prerequisite: basic courses in Epidemiology and Statistics. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7470 (or 093.747) and CHSC 7320 (or 093.732).

CHSC 7520 Principles of Epidemiology 1 Cr.Hrs. 3 (Formerly 093.752) This course will introduce the basic concepts and methods of epidemiology, including the definition and measurement of health status and health determinants in populations, assessing health risks and inferring causation, and issues in the design and analysis of population health studies.

CHSC 7530 Principles in Epidemiology II Cr.Hrs. 3 (Formerly 093.753) This course follows the Principles of Epidemiology I and discusses the applications of epidemiologic principles in public health practice, including the investigations of epidemics, disease surveillance, clinical applications, evaluation of health programs, and the planning of preventive programs. Students will also receive instruction in microcomputer applications and use of EPI-INFO software for data entry, analysis and presentation. Corequisite: CHSC 7480. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and in CHSC 7470 (or 093.747)..

CHSC 7540 Advanced Epidemiology Cr.Hrs. 3 (Formerly 093.754) Advanced epidemiologic research methods focusing on selected epidemiological issues (bias, confounding, matching, etc.). Discussion will be directed to both epidemiological and statistical considerations to find the optimal solution to a research problem. Prerequisites: a minimum grade of " B " in CHSC 7520 (or 093.752), CHSC 7530 (or 093.753), CHSC 7280 (or 093.728).

CHSC 7550 Observational Epidemiology Cr.Hrs. 3 (Formerly 093.755) Intermediate epidemiologic research methods focusing on case-control and cohort studies, with discussion on issues relating to planning and design, implementation, and data analysis. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753) and CHSC 7470 (or 093.747) and CHSC 7480 (or (093.748)..

CHSC 7560 Epidemiology of Cancer Cr.Hrs. 3 (Formerly 093.756) This course introduces the magnitudes, risk factors and prevention strategies of cancer. It focuses on current knowledge related to the etiology of cancer, medical interventions and potential for prevention. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752).

CHSC 7610 Advanced Topics in Community Health
1 Cr.Hrs. 1.5
Special advanced research topics in Community Health Sciences.

## CHSC 7620 Advanced Topics in Community Health

## 2 Cr.Hrs.1.5

Special advanced research topics in Community Health Sciences.

CHSC 7710 Social Aspects of Aging Cr.Hrs. 3
This course is an advanced seminar designed to examine current social issues in aging. The course is organized around selected topics related to aging. Where possible, the Canadian experience will be compared to international trends and diversity will be highlighted. The first section is a review of the field of gerontology, ageism, demographic trends, theoretical perspectives and methods and the second section explores contemporary social issues. This course is a required course for the Graduate Specialization in Aging Certificate.

CHSC 7720 Health and Aging Cr.Hrs. 3
This course is an advanced seminar designed to examine health and health care issues in aging. Where possible, the Canadian (or Manitoban) experience will be highlighted. Key topics in the health domain will be covered, such as frailty, mental health, and dementia. The provision of care for older adults will also be covered, focusing on both the formal care system, as well as informal care providers. This course is a reuqirement for the Graduate Specialization in Aging.

CHSC 7730 Topics in Health Services Research Cr.Hrs. 3 This course will expose students to select health services research topics that are particularly relevant in Manitoba and Canada. Students are expected to actively engage in seminars led by health services researchers and decisionmakers, and also provide informative presentations in their own area of research. Students will also gain knowledge about various communication and knowledge translation strategies.

CHSC 7740 Advanced Qualitative Methods Cr.Hrs. 3
The purpose of this course is to provide students with fundamental aspects related to qualitative research methods and analysis. By the end of the course, students should have an understanding of the principles and practices involved in: the application of different social theories to qualitative methods; designing a qualitative research study; various ways of collecting qualitative data and analyzing written texts; ways of integrating qualitative methods in a mixed methods design; developing different products for knowledge exchange activities; and 'hands-on' experience in doing qualitative analysis using qualitative software.

## CHSC 7810 Biostatistics for the Health and Human Sciences

 1 Cr.Hrs. 3An introduction to statistical ideas and techniques for health sciences and human research. Describing data, patterns in data, the Normal distribution. Principles of estimation and principles of hypothesis testing. Principles and practice of the major statistical tests ( $t$ tests, analysis of variance, Chi squared tests, correlation and regression). Nonparametric statistical techniques. The use of statistical software to carry out statistical analyses. Analytic decision strategies.

CHSC 7820 Biostatistics for Community Health Sciences 1 Cr.Hrs. 3
The course will cover techniques of research design and analysis for community health researchers. Topics include: principles of experimental design, study size determination, statistical software as an analytical tool, techniques for the analysis of continuous outcomes, analysis of variance for multi-way, factorial and split-unit experiments, and multiple regression and general linear models. Introduction to more advanced statistical methods including logistic regression and survival models. Prerequisite: Undergraduate course in statistics.

CHSC 7830 Biostatistics for Community Health Sciences

## 2 Cr.Hrs. 3

This course will cover techniques for the analysis of complex data sets involving continuous, categorical and time-related outcome variables. Principles of statistical modeling. The behaviour of non-continuous variables. Categorical outcome variables and logistic regression. Poisson outcome variables and Poisson regression. Time-dependent outcomes, survival analysis and proportional hazards regression. Prerequisite:

CHSC 7820 with a grade of $\mathrm{B}+$ or better.
CHSC 7860 Methods and Concepts for Community Health Sciences Cr.Hrs. 3
This course is designed to provide both a practical and theoretical introduction to qualitative, quantitative, and multimethod approaches used in health research. The emphasis in the course will be on applied research, consistent with the characteristics of the Department of Community Health Sciences as a whole.

CHSC 7870 Health Survey Research Methods Cr.Hrs. 3 Students critically examine the use of health survey methodology within epidemiology. They also learn to apply survey methodology, as a means to gain a strong appreciation of the reflective, theoretical and analytical thinking required to successfully design and implement epidemiological health surveys. Prerequisites: CHSC 7820 and CHSC 7520.

## Computer Science

Head: John Bate
Campus Address/General Office: E2-445 EITC
Telephone: (204) 4748313
Fax: (204) 4747609
Email Address: hermisto@cs.umanitoba.ca
Website: www.cs.umanitoba.ca
Academic Staff: Please refer to website for Faculty information:http://www.cs.umanitoba.ca/

The department offers Master's and Ph.D. programs at the graduate level, which cover many areas of computer science. The department also participates in the Master's of Mathematical, Computational and Statistical Sciences program offered through the Institute of Industrial Mathematical Sciences. Graduates find employment in industry and academia.

## Fields of Research

The department has people working in the areas of robotics, computer vision, intelligent agents, multi-agent systems, multimedia and hypermedia, bioinformatics, biomedical and health informatics, self-organizing systems, medical information systems, software engineering and integration, human-computer interaction, networks, parallel and distributed systems, databases, data mining, networks, multiplayer online games, data structures, algorithms, combinatorics and combinatorial designs, graph theory, artificial intelligence, computer graphics and curve design, computer-aided geometric design, computational finance, grid computing, wireless sensor networks, and pervasive computing. More information about specific individuals and their current research work can be found on the department's web site.

## Research Facilities

Each graduate student will have a personal study space in an appropriate departmental research laboratory, and access to laser printers, mail, photocopying, a fax machine, and a graduate student lounge.

Computing facilities for research include a large variety of desktop computers as well as access to large clusters within the department, at the University of Manitoba, and across Western Canada via the WestGrid II network.
M.Sc. in Computer Science, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students may be admitted to the Master's program if they hold an Honours Bachelor's degree in Computer Science and if they present a suitable selection of courses. Admission is not guaranteed and each application will be individually considered by the department's Graduate Studies Committee.

Students can also be admitted to the Master's program upon successful completion of their pre-Master's program.

## Application Deadlines

The Department of Computer Science allows students to begin their program in September or January. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Department of Computer Science no less than three (3) months before the intended start date. All other students should have their applications with complete supporting documentation received by the Department of Computer Science no later than eight (8) months before the intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students must complete 12 credit hours of coursework and a thesis. All credit hours must be at the 7000 level and must include the 0 -credit-hour Research Methodologies course. See the departmental Graduate Supplemental Regulations (available on the department's web site). Students must consult with their departmental advisor prior to deciding on courses. The courses listed below will not all be offered in any one particular year.

Second language reading requirement: none

Expected time to graduate: two years

Ph.D. in Computer Science, Admission

## ACADEMIC CALENDAR

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. A candidate must normally complete an M.Sc. degree before entering the Ph.D. program. Individual qualifications other than this will be considered.

## Application Deadlines

The Department of Computer Science allows students to begin their program in September or January. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three (3) months before the intended start date. All other students should have their applications with complete supporting documentation received by the Faculty of Graduate Studies no later than eight (8) months before the intended start date.

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students must complete a minimum of 12 credit hours of coursework and a thesis. All credit hours must be at the 7000 level. See the departmental Graduate Supplemental Regulations (available on the department's web site). Students must consult with their departmental advisor prior to deciding on courses. The courses listed below will not all be offered in any one particular year.

Second language reading requirement: none

Expected time to graduate: four years

COMP 7210 Research Methodologies Cr.Hrs. 3 This course explores the research process in general and the resources for research in computer science. Traditional research approaches and use of emerging technology will be discussed. Attendance at department seminars and classes is required.

COMP 7570 Advanced Topics in Computer Science
1 Cr.Hrs. 3
(Formerly 074.757) Topics of current research interest in areas of computer science, available on an occasional basis, subject to the interests and availability of faculty. Prerequisite: written consent of instructor.

COMP 7600 Graduate Workterm I Cr.Hrs. 0 Work assignment in business, industry, or government for students registered in the Computer Science Graduate Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. Graded Pass/Fail.

COMP 7700 Advanced Design and Analysis of Algorithms Cr. Hrs. 3
COMP 7700 Advanced Design and Analysis of Algorithms Cr.Hrs. 3 (Formerly 074.770) An advanced course covering models of computation, advanced analysis techniques, lower
bounds, NP-completeness (from an algorithmic viewpoint), with applications of these techniques to various areas. Prerequisites: COMP 3170 (or 074.317) or equivalent or written consent of instructor.

COMP 7720 Advanced Topics in Algorithms Cr.Hrs. 3 (Formerly 074.772) Topics of current research interest in advanced algorithms. Possible topics include string matching, data compression, computational geometry, probabilistic algorithms; subject to the interests and availability of faculty. Prerequisites: COMP 3170 (or 074.317) or equivalent or written consent of instructor.

## COMP 7750 Advanced Topics in Computation

Theory Cr.Hrs. 3
(Formerly 074.775) Topics of current research interest in computation and complexity theory. Possible topics include decidability and complexity theoretic issues in parallel computation, cryptography, graph theory, or number theory, subject to the interests and availability of faculty. Prerequisite: written consent of instructor.

COMP 7760 Algorithmic Methods in Number Theory and Combinatorics Cr.Hrs. 3
(Formerly 074.776) Large scale problems arising in combinatorics and number theory; practicable algorithms for solution of such problems. Computer implementation of these algorithms. Prerequisite: written consent of instructor.

COMP 7770 Coding Theory Cr.Hrs. 3
(Formerly 074.777) Algebraic background of coding theory. Theory of linear codes. Hamming, Golay, Reed-Mller, Macdonald, and Hadamard codes. Structure of finite fields. Application to cyclic and Bose Chaudhuri codes. Decoding algorithms and error-correcting bounds. Specialized topics. Prerequisite: written consent of instructor. COMP 7780 Queuing Theory and Performance Evaluation Cr.Hrs. 3 (Formerly 074.778 ) Theory and application of queuing systems applied to problems of computer systems performance. Investigation of deterministic and stochastic models of single and multiple queuing systems using analytical, numerical, and simulation techniques. Performanceevaluation methods for computer systems and communications networks. Prerequisites: STAT 1000 (or 005.100 ) or equivalent or written consent of instructor.

## COMP 7780 Queuing Theory and Performance

Evaluation Cr.Hrs. 3
(Formerly 074.778) Theory and application of queuing systems applied to problems of computer systems performance. Investigation of deterministic and stochastic models of single and multiple queuing systems using analytical, numerical, and simulation techniques. Performanceevaluation methods for computer systems and communications networks. Prerequisites: STAT 1000 (or 005.100 ) or equivalent or written consent of instructor.

COMP 7800 Graduate Workterm II Cr.Hrs. 0
Work assignment in business, industry, or government for students registered in the Computer Science Graduate Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. Graded Pass/Fail. Prerequisite: COMP 7600.

COMP 7810 Computer Networks Cr.Hrs. 3 (Formerly 074.781) A selection of current research topics

## ACADEMIC CALENDAR

from such areas as network modeling and analysis, packet switching, circuit switching, non-switched nets, frame relay, cell relay, ATM, integrated voice/video/data networks, BISDN, and emerging technologies. Prerequisites: STAT 1000 (or 005.100) and COMP 4300 (or 074.430) or equivalents or written consent of instructor.

COMP 7820 Advanced Topics in Computer
Architecture Cr.Hrs. 3
(Formerly 074.782) Topics of current research interest from such areas as computer design and architecture, distributed systems, multiprocessor and parallel systems, computer networks, specialized architectures, and VLSI; subject to the interests and availability of faculty. Prerequisites: written consent of instructor.

COMP 7840 Operating Systems Design and Implementation Cr.Hrs. 3
(Formerly 074.784) A discussion of the current research issues in operating systems including, but not limited to: distributed operating systems, multiprocessor operating systems, and other application-specific operating systems such as those for mobile computing. Prerequisites: COMP 3430 (or 074.343) or equivalent or written consent of instructor.

COMP 7850 Advances in Parallel Computing Cr.Hrs. 3 (Formerly 074.785) This course introduces advanced research topics in parallel architectures, parallel programing, parallelizing compilers, runtime systems, and parallel I/O. Prerequisite: written consent of instructor.

## COMP 7860 Advanced Topics in Computer

Systems Cr.Hrs. 3
(Formerly 074.786) Topics of current research interest in database and operating systems. Possible topics include: operating systems, parallel systems, real-time systems, networks, and database systems; subject to the interests and availability of faculty. Prerequisite: written consent of instructor.

## COMP 7890 Advanced Topics in Languages and

Software Cr.Hrs. 3
(Formerly 074.789) Topics of current research interest in the areas of programing languages or software engineering. Possible topics include program language design and implementation, visual programing languages, formal specification techniques, and software verification and validation; subject to the interests and availability of faculty. Prerequisite: written consent of instructor.

COMP 7900 Graduate Workterm III Cr.Hrs. 0 Work assignment in business, industry, or government for students registered in the Computer Science Graduate Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. Graded Pass/ Fail. Prerequisite: COMP 7800.

COMP 7910 Advanced Graphics Cr.Hrs. 3 (Formerly 074.791) This course will focus on two major advanced topics in computer graphics: the principles and properties of lighting models such as Phong shading, ray tracing and radiosity; and a selection of visualization and modelling techniques. Prerequisites: COMP 4490 (or 074.449 ) or equivalent or written consent of instructor.

COMP 7920 Advanced Topics in Graphics and Human Interfaces Cr.Hrs. 3
(Formerly 074.792) Topics of current research interest in advanced graphics and human interfaces, chosen from such areas as intelligent user interfaces, user modelling, user interface design, visualization, computer animation, advanced multimedia, and computer-based training; subject to the interests and availability of faculty. Prerequisite: written consent of instructor.

COMP 7940 Machine Learning Cr.Hrs. 3
(Formerly 074.794) This course examines topics in machine learning. Topics will be chosen from: statistical learning, symbolic learning, neural networks, and genetic algorithms. Prerequisites: COMP 3190 (or 074.319 ) or equivalent or written consent of instructor.

COMP 7950 Advanced Topics in Artificial
Intelligence Cr.Hrs. 3
(Formerly 074.795) Topics of current research interest in artificial intelligence chosen from such areas as: expert systems, knowledge representation, intelligent systems, planning systems, multi-agent systems, symbolic logic, knowledge engineering, and automated reasoning; subject to the interests and availability of faculty. Prerequisites: COMP 3190 (or 074.319) or equivalent or written consent of instructor.

COMP 7960 Image Processing Cr.Hrs. 3
(Formerly 074.796) A detailed study of the methods used for image processing including: image quantization, transformations, enhancement, and analysis. Prerequisites: COMP 4490 (or 074.449) or equivalent or written consent of instructor.

COMP 7970 Curves and Surfaces in Computer Graphics Cr.Hrs. 3
(Formerly 074.797) Algorithms and techniques for curve and surface generation, representation, and display in an interactive computer graphics environment. Discussion of applications to computer-aided design and computer-aided geometric design. Prerequisites: COMP 4490 (or 074.449) or equivalent or written consent of instructor.

COMP 7980 Advanced Topics in Scientific and Numerical Computing Cr.Hrs. 3
(Formerly 074.798) Topics of current research interest in scientific and numerical computing chosen from areas such as geometric modelling, special splines, problems related to medical imaging, or other topics subject to the interests and availability of faculty. Prerequisites: COMP 7910 (or 074.791 ) or COMP 7920 (or 074.792) or written consent of instructor.

## Curriculum, Teaching and Learning

For information about graduate programs in the following units: Université de Saint-Boniface, Education (Doctoral), or Educational Administration, Foundations and Psychology contact the Uiversité de Saint-Boniface directly.

## ACADEMIC CALENDAR

## Curriculum, Teaching and

Learning ,
Head: (and Graduate Chair) F. Morin
Campus Address/General Office: 227 Education Building
Telephone: (204) 4747886
Fax: (204) 4747550
Email Address: edgradpr@umanitoba.ca
Website: http://umanitoba.ca/education
Academic Staff: Please see our website for academic staff listing:www.umanitoba.ca/education

The Department of Curriculum, Teaching and Learning offers the Master of Education Program with specializations in language and literacy; second language education; and studies in curriculum, teaching and learning (an area that includes art, drama and music; curriculum studies; early years curriculum; educational technology; language and literacy curriculum; mathematics education; physical education/health; science education; social studies education; second language education; and technology education).

## Fields of Research

Department members provide leadership in a variety of areas including curriculum development, curriculum reform and curriculum theorizing; teacher inquiry, professional development and teacher practice; teaching and learning within and across individual curriculum areas and streams (Early, Middle and Senior Years); language and literacy development; and second language education.

## M.Ed. in Curriculum, Teaching and Learning, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, the Department of Curriculum, Teaching and Learning has the following admission application deadline dates and admission requirements:

| For sessions <br> starting | Canadian <br> applicants | International <br> applicants including |
| :--- | :--- | :--- |
| January | October 1 | US |

Applicants must possess:

- For specializations: Language \& Literacy and Studies in Curriculum Teaching and Learning, a four-year Bachelor of Education degree, or a twoyear After Degree Bachelor of Education, or a three-year undergraduate degree which includes teacher training, plus a Post Baccalaureate Diploma in Education (PBDE) with 24-30 credit
hours which includes at least 18 credit hours at the 5000 level or if taken outside of Education, 24-30 credit hours of upper level coursework which includes at least 12 credit hours but preferably 18 credit hours at the 4000 level. The total number of credit hours completed including the degree should be 120 credit hours, or an equivalent degree from an academic institution recognized by the Faculty of Graduate Studies; For Second Language Education specialization, an acceptable four-year equivalent undergraduate degree from an academic institution recognized by the Faculty of Graduate Studies, or a three-year undergraduate degree, plus a PBDE with 24-30 credit hours which includes at least 18 credit hours at the 5000 level or if taken outside of Education, 24-30 credit hours of upper level coursework which includes at least 12 credit hours but preferably 18 credit hours at the 4000 level. The total number of credit hours completed including the degree should be 120 credit hours, or an equivalent degree from an academic institution recognized by the Faculty of Graduate Studies.
- a grade point average of 3.0 or better in the last 60 credit hours of university coursework;
- normally, two years of relevant work experience; and
- appropriate academic and/or professional background for the program area and concentration. Consult with Department Head for further information.

For individuals who graduate from the Certificate in Adult and Continuing Education (CACE), University of Manitoba complete the following courses:

EDUA 1560 Adult Learning and Development (3)
EDUA 1570 Foundations of Adult Education (3)

EDUA 1580 Program Planning in Adult Education (3)

EDUA 1590 Facilitating Adult Education (3)
and an additional 100 hours of elective credit through courses, seminars, and workshops. The Faculty of Graduate Studies recognizes a complete CACE program as 15 credit hours towards the admission requirements for the M.Ed.; that is, giving 12 credit hours for the four core courses completed with a grade of ' B ' or better and 3 credit hours (non assessable) for the 100 hours of elective study.

Individuals with a three year undergraduate degree and the four CACE courses listed above must complete an additional 12 credit hours of senior level courses (i.e., 5000 level (PostBaccalaureate Diploma in Education (PBDE) courses, 1000 or 2000 level B.Ed. courses, or courses at the 3000 level or above in other faculties) to have the 24 credit hours that are the minimal requirements for satisfying the "honours degree or equivalent" admission requirement. Those with the completed CACE would require an additional 9 credit hours of senior level courses.

## ACADEMIC CALENDAR

Applicants should note that admission to the M.Ed. program is competitive. A number of factors are taken into account in arriving at an admission decision: (1) the capacity of the department to provide the program of study requested by the applicant; (2) the applicant's previous academic background and achievement; (3) the referees' assessment of the applicant; (4) the capacity of the department to provide the applicant with an advisor in the program area; and (5) the applicant's Statement in Support of their application, including relevant professional experience.

## Transfer of Credit

The granting of advanced credit is subject to the regulations of the Faculty of Graduate Studies and subject to approval of the advisor and department head.

## Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The M.Ed. in Curriculum, Teaching and Learning has a thesis-based route and a course-based route with an oral defense. The M.Ed. comprehensive route at the University of Manitoba is typically a terminal degree. That is, it is insufficient, in number and of itself, as evidence of research capacity for admission into the Ph.D. program in Education at the University of Manitoba.

The following program requirements apply to all specializations in the Department of Curriculum, Teaching and Learning. Specific specialization requirements are listed under each specialization below.
M.Ed. programs have a maximum completion time of six years from the date of first registration. Not all courses are offered every year. The graduate course offering schedule is posted on the Faculty's website:
http://umanitoba.ca/faculties/education/media/graduate-future-courses.pdf. Although we offer many courses yearly, most of our courses are offered in the evening and those wishing to study full-time should consult with the Department Head.

Second Language Reading Requirement: None

Expected Time to Graduate: full-time: 2 to 3 years; part-time: 4 to 5 years

## Program by Coursework and Thesis

- A minimum of 18 credit hours of coursework. At least 12 credit hours must be at the 7000 level or equivalent. The remaining 6 credit hours may be at the 5000 level or above, in the Faculty of Education and/or at the 3000 level or above in other faculties.
- Students must take 3 credit hours of research methodology at the 7000 level in Education or 3000 level or above in other faculties.
- Upon entry into the program, a student will be assigned a program advisor who is not necessarily
the thesis advisor. Students who have chosen to follow the thesis-based route should contact the head of department to identify a faculty member with expertise in the proposed specialization and who is available to supervise their thesis.

Program by Coursework and Comprehensive Option (either Examination or Project) (Course-based)

- A minimum of 30 credit hours of coursework. At least 18 credit hours must be at the 7000 level, which may include EDUB 7540, or equivalent. The remaining 12 credit hours may be at the 5000 level or above in the Faculty of Education and/or at the 3000 level or above in other faculties.
- All coursework plus comprehensive option programs require a culminating activity and an oral defense. This culminating requirement may be met through taking a comprehensive examination or carrying out a research project. The research project may take a variety of forms including a research review, a small-scale study, or a curriculum/instruction application project. In some cases, the research project may include the student taking EDUB 7540 Final Seminar in Curriculum, Teaching and Learning to facilitate the development of the project. Students should contact and discuss with their advisors the specific requirements of both the examination and the research project activities.

## Studies in Curriculum, Teaching and Learning

Specialization,
The Master of Education in Studies in Curriculum, Teaching and Learning includes a range of potential concentrations: art, drama, music; curriculum studies; early years curriculum; educational technology; language and literacy curriculum; mathematics education; physical education/health; science education; social studies education; second language education; and technology education. In consultation with their faculty advisors, students will be encouraged to create a program of study that addresses their own interests in a particular curricular field and which enhances the students' understanding of curriculum and its intents and effects. The aim of the program is to develop individuals who are informed, critical, and reflective about curriculum theory and practice in their particular area of concentration. In order to support this aim, courses are designed to provide graduate students with the requisite skills to conduct and to understand research in a variety of formats and paradigms.

Admission and Program requirements are those listed above. Specific course requirements are as follows:

- Required courses: EDUA 5800, EDUB 7550
- Thesis-based students select 3 credit hours from: EDUB 7560, EDUB 7420. Course-based students are required to take both courses.

## Language and Literacy Specialization

## ACADEMIC CALENDAR

Language and Literacy is a broad field encompassing a number of major sub-fields from pre-school to postsecondary levels. The sub-fields include developmental reading, clinical reading, composition studies, rhetoric, oral language development, children's and adolescent literature, response to literature, the language arts associated with listening, representing, viewing, spelling, and handwriting instruction, along with instruction in comprehension. The purpose of the program is to strengthen practitioners' theoretical understanding of one or more of these sub-fields, and to develop skills that will enable them to conduct independent research into language and literacy practices in their chosen area of concentration. Students in the program can anticipate experiences that range from general courses in curriculum development and implementation to specialized courses specific to their own needs and interests.

Admission and Program requirements are listed above. Specific course requirements are as follows:

- Required courses: EDUB 7530 and EDUA 5800
- Thesis-based students will select 3 credit hours and course-based students will select 6 credit hours from: EDUB 7070, EDUB 7100, EDUB 7180
- In addition, thesis-based students will select 6 credit hours and course-based students will select 18 credit hours from: EDUB 7060, EDUB 7070, EDUB 7090, EDUB 7100, EDUB 7110, EDUB 7120, EDUB 7150, EDUB 7180, EDUB 7190, EDUB 7290, EDUB 7420, EDUB 7550, EDUB 7560. Course-based students may also select from: EDUB 7330, EDUB 7540.

## Second Language Education Specialization

The purpose of the Master's in Second Language Education (SLE) Program is to further the knowledge of experienced ESL teachers. Courses are designed to enable teachers to reflect on their teaching practices in light of influential and relevant research in second language acquisition/learning, curriculum theory and development, and SLE pedagogy. Students accepted into the program will be introduced to the research methodologies employed in educational research and in SLE, and will have the opportunity to develop expertise in one or more research methodologies.

Admission and Program requirements are those listed above. Specific course requirements are as follows:

Required courses: EDUB 7210, EDUB 7220, EDUB 7580, EDUA 5800.

In addition, thesis-based students will select 3 credit hours at the 7000 level from e.g., EDUB 7550, EDUB 7420, EDUB 7270, EDUA 7270, EDUA 7280; EDUA 7420, and coursebased students will select 18 credit hours with a minimum of 9 credit hours at the 7000 level from e.g.: EDUB 5510, EDUB 5520, EDUB 5530, EDUB 5540, EDUB 5580, EDUB 7070, EDUB 7180, EDUB 7330, EDUB 7420, EDUB 7540, EDUB 7550, EDUB 7560, EDUA 7270/7280, EDUA 7420, or courses from the Faculties of Education or Arts of the University of Manitoba or other universities, in particular
those within the Western Deans Agreement, and approved by the program advisor and the department head.

## Curriculum, Teaching and Learning- <br> Research and Evaluation

EDUA 7010 Educational Administration as a Field of Study and Practice Cr.Hrs. 3
(Formerly 129.701) An overview of educational administration, focusing on a review of some of the main intellectual traditions in the study of educational administration and on an analysis of some of the forces which shape administrative practice. Not to be held with EDUA 7011 (or 129.701) or the former 116.731.

EDUA 7020 Politics of Education Cr.Hrs. 3
(Formerly 129.702) A review of the political features of educational organizations, with emphasis on value systems, community power structures, local government, and political change. Not to be held with EDUA 7021 (or 129.702) or the former 116.702.

EDUA 7030 Educational Finance Cr.Hrs. 3
(Formerly 129.703) Study of economic and financial aspects of education, with emphasis on costs and analysis of expenditures; sources and types of revenue; productivity and efficiency, planning and budgeting. Not to be held with EDUA 7031 (or 129.703) or the former 116.703.

EDUA 7040 Legal Aspects of Education Cr.Hrs. 3
(Formerly 129.704) Studies of legal issues in education. Not to be held with EDUA 7041 (or 129.704) or the former 116.704.

EDUA 7050 Theoretical Perspectives on Educational Administration Cr.Hrs. 3
(Formerly 129.705) A study of the main currents of organization theory and administrative thought and their implications for the study and administration of educational organizations. Not to be held with EDUA 7051 (or 129.705) or the former 116.705.

EDUA 7060 Organizational Planning and Development in Education Cr.Hrs. 3
(Formerly 129.706) A review of approaches to planning and development in education. Major emphasis is placed on the systematic development of educational organizations. Not to be held with EDUA 7061 (or 129.706) or the former 116.709.

EDUA 7070 The Analysis of Educational
Organizations Cr.Hrs. 3
(Formerly 129.707) The application of methods of organizational analysis to educational institutions. Not to be held with EDUA 7071 (or 129.707) or the former 116.710.

EDUA 7090 Seminar in Administrative Problems in Education Cr.Hrs. 3
(Formerly 129.709) Application of theoretical concepts in field situations. Not to be held with EDUA 7091 (or 129.709 ) or the former 116.706.

EDUA 7100 Topics in Educational Administration (Readings) 1 Cr.Hrs. 3
(Formerly 129.710) A readings course in topics of

## ACADEMIC CALENDAR

significance to educational administration.
EDUA 7110 Topics in Educational Administration (Field) 2 Cr.Hrs. 3
(Formerly 129.711) A projects and field study course in topics of significance to educational administration.

EDUA 7200 Philosophy of Education Cr. Hrs. 3
(Formerly 129.720) A study of the philosophic foundations of education. Emphasis will be given to various schools of philosophic inquiry as they relate to education and to contemporary philosophy of education issues. Not to be held with EDUA 7200 (or 129.720) and the former 116.735.

EDUA 7210 Educational Sociology Cr.Hrs. 3
(Formerly 129.721) An examination of the relationship between education and society, with particular attention to ethnicity, family, and socio-economic status and to the role of the school in the socialization process in the Canadian context. Not to be held with EDUA 7211 (or 129.721) or the former 116.736.

EDUA 7230 Social Criticism in Education Cr.Hrs. 3 (Formerly 129.723) A critical examination of education, giving special attention to various perspectives which challenge conventional interpretation of education and schooling. Not to be held with EDUA 7230 (or 129.723) and the former 116.738 .

EDUA 7240 Values in Education Cr.Hrs. 3
(Formerly 129.724) Examines the place of values in education. It explores the notion of values, its pervasiveness in education, the approaches to values in education, and the trends and issues related to values in education. Not to be held with EDUA 7241 (or 129.724) or the former 116.732.

EDUA 7250 Comparative Education Cr.Hrs. 3 (Formerly 129.725) An analysis of educational systems and problems in selected environments in terms of social, political, economic, cultural and other contexts. Students may not hold credit for both EDUA 7250 (or 129.725) and the former 116.714.

EDUA 7270 Seminar in Cross-Cultural Education 1 Cr.Hrs. 3 (Formerly 129.727) A critical analysis of the social theories and research which form the basis of cross-cultural education. Not to be held with EDUA 7271 (or 129.727) or the former 116.724.

EDUA 7280 Seminar in Cross-Cultural Education 2 Cr.Hrs. 3 (Formerly 129.728) A critical analysis of the approaches and research in cross-cultural education. Not to be held with EDUA 7281 (or 129.728) orthe former 116.725.

EDUA 7300 History of Canadian Education from
1867 Cr.Hrs. 3
(Formerly 129.730) A study of the historical development of education in Canada from 1867 to the present. Students may not hold credit for both EDUA 7300 (or 129.730) and the former 116.723.

EDUA 7330 Topics in Educational Foundations (Readings) 1 Cr.Hrs. 3
(Formerly 129.733) A reading and research course in topics of significance to educational foundations.

EDUA 7340 Seminar in Educational Thought Cr.Hrs. 3 (Formerly 129.734) Intensive studies of the works of selected educational theorists. Students may not hold credit for both EDUA 7340 (or 129.734) and the former 116.719.

EDUA 7402 Development of Adult Education and PostSecondary Education Cr.Hrs. 3
A survey structures, theory, philosophies, and curricula of educational systems for adults, as affected by cultural, political, religious, theological and institutional contexts both national and internationally. Not to be held with the former EDUA 7400 (29.740) or or the former EDUA 5400 (129.540).

## EDUA 7404 Lifelong Learning in Educational

Settings Cr.Hrs. 3
Explores recent issues, research, and theories about learning across the lifespan, with emphasis on adulthood, as learning is affected by cultural, political, and interpersonal contexts.

EDUA 7406 Topics in Adult and Post-Secondary

## Education Cr.Hrs. 3

This course provides an opportunity for students to investigate methodologically, in depth, significant trends and topics from both the scholarly literature of adult and postsecondary education and internet resources.

## EDUA 7408 Seminar in Adult and Post-Secondary

## Education Cr.Hrs. 3

This course entails an examination of topical issues in adult education and post-secondary education with particular focus on scholarly developments in Canada and Manitoba, based on student interests and thesis or comprehensive examination foci, with learning process instructor facilitated.

## EDUA 7412 Governance of Post-Secondary

## Education Cr.Hrs. 3

This course examines the history of the governance of postsecondary institutions, the roles of stakeholders in governance, and factors influencing governance in postsecondary institutions today.

EDUA 7414 Seminar in the Administration of PostSecondary Education Cr.Hrs. 3 This course has as its focus the application of theoretical concepts of field situations. It will explore administrative skills and their application to selected issues of post-secondary education.

EDUA 7420 Program Planning in Adult Education Cr.Hrs. 3 (Formerly 129.742) Introduction to factors affecting the planning of programs for adults. Examination of various planning models in relation to principles of adult education. A consideration of theory with major emphasis on directions for planning a program for adults. Local examples will be used. Students may not hold credit for both EDUA 7420 (or 129.742) and the former 116.733.

EDUA 7510 Seminar in Current Issues in
Counselling Cr.Hrs. 3
(Formerly 129.751) Focus on research, theoretical and professional developments; critical contemporary issues; and specific social problems in counselling. Not to be held with EDUA 7511 (or 129.751) or the former 043.703.

EDUA 7520 Practicum Seminar in Counselling Cr. Hrs. 6 (Formerly 129.752) Supervised experience in both individual

## ACADEMIC CALENDAR

and group counselling. Attention is given to analysis of case studies using audio- and video-tapes. A minimum of 180 hours of counselling experience in placement situations is required. This course is graded pass/fail. Not to be held with EDUA 7521 (129.752) or the former 043.704. Prerequisite: EDUA 5480 or EDUA 5481 (129.548) (P) and permission of the instructor. Pre- or Corequisite: EDUA 7550 or EDUA 7551 or the former 129.755 (C+)

EDUA 7530 Group Counselling: Theory and Practice Cr.Hrs. 6
(Formerly 129.753) Study of theories, rationale, objectives, and research. Acquisition of an experiential understanding of group work through participation in class activities. Development of leadership skills in group counselling by conducting counselling groups under supervision. Not to be held with EDUA 7531 (or 129.753) or the former 043.718. Prerequisite: EDUA 5540 or EDUA 5541(or 129.554) or 043.512 and EDUA 5480 or EDUA 5481 (or 129.548) (P).

EDUA 7540 Programs in Career Development Cr.Hrs. 3 (Formerly 129.754) A practical course designed for helpers wishing a wider knowledge of career development programs. Participants will investigate and evaluate a wide variety of career counselling techniques and programs and will develop specific, innovative programs to meet the needs of their future counsellees. Not to be held with EDUA 7541 (or 129.754) or the former 043.719.

EDUA 7550 Theories of Counselling Cr.Hrs. 3 (Formerly 129.755) The objectives of counselling, assessment of counselling outcomes, theories of personality and counselling. Not to be held with EDUA 7551 (or 129.755 ) or the former 043.701 or 129.750 .

EDUA 7600 Seminar in Inclusive Special
Education Cr.Hrs. 6
(Formerly 129.760) A forum for the discussion of topics related to disability issues. Opportunity will be provided for students to examine issues related to their particular professional and scholarly needs. Not to be held with EDUA 7601 (or 129.760) or the former 043.705. Pre- or corequisite: 18 credit hours in Special Education at 5000 level or equivalent (C+).

EDUA 7610 Behavioural Issues in Educational Settings Cr.Hrs. 3
(Formerly 129.761) A study designed to give teachers and school counsellors the necessary theoretical background as well as the practical tools to implement programs for children in conflict. Not to be held with EDUA 7611 (or 129.761) or the former 043.707. Pre- or corequisite: EDUA 5600 or EDUA 5601 (or 129.560 or 043.518 ) or EDUA 5680 or EDUA 5681 (or 129.568 or 043.542 ) (C+).

EDUA 7630 Advanced Assessment and Instruction in Inclusive Special Education Cr.Hrs. 3
(Formerly 129.763) An advanced study of diagnostic/prescriptive techniques used to ameliorate learning and behavioural problems in special education. Emphasis is on the development and analysis of related instructional delivery systems. Students may not hold credit for both EDUA 7630 (or 129.763) and the former 043.722. Pre- or corequisite: EDUA 5630 or EDUA 5631 (or 129.563) (C+).

EDUA 7650 Field Experience in Inclusive Special
Education Cr.Hrs. 6
(Formerly 129.765) A minimum of 200 hours of supervised placement in an inclusive special education setting.
Scheduled seminars facilitate directed study and discussion. This course is graded pass/fail. Prerequisite: 18 credit hours at the 5000-level in Inclusive Special Education or its equivalent (C+). Not to be held with EDUA 7651 (or 129.765) or the former 129.764 or 043.706.

EDUA 7710 Development in Learning
Environments Cr.Hrs. 3
(Formerly 129.771) Explores recent advances in developmental psychology as they apply to learning in classrooms and other education-related settings. Emphasis will be given to cognitive change, but motivation and social skill development will also be considered as they relate to cognitive development. Students may not hold credit for both EDUA 7710 (or 129.771) and the former 043.724 or 043.708.

EDUA 7740 Topics in Educational Psychology 1 Cr.Hrs. 3 (Formerly 129.774) A reading and research course in topics of significance to educational psychology.

EDUA 7750 Topics in Educational Psychology 2 Cr.Hrs. 3 (Formerly 129.775) A reading and research course in topics of significance to educational psychology.

EDUA 7760 Interview Techniques with Children and
Adolescents Cr.Hrs. 3
(Formerly 129.776) Focuses on the principles, processes and methods of interviewing and counselling individual children, adolescents, parents, school personnel and others. The course aims at integrating theory and practice involving diagnostic and therapeutic communication and observation of behaviour in natural situations with individual children. Not to be held with EDUA 7761 (or 129.776) or the former 043.717. Prerequisite: EDUA 5820 or EDUA 5821 (or 129.582 or 043.505 ) (C+), EDUA 5550 or EDUA 5551 (or 129.555 or 043.515 ) (C+), or EDUA 5480 or EDUA 5481 (or 129.548) (P) and EDUA 5490 or EDUA 5491 (or 129.549 or 129.556 or 043.516$)(P)$.

EDUA 7800 Methods of Educational Research Cr.Hrs. 3 (Formerly 129.780) A study of design and data collection techniques for educational research in field settings. Topics covered include quasi-experimentation, survey and observational techniques, simulation, content analysis, and sociometry. Not to be held with EDUA 7801 (or 129.780) or the former 043.709. Prerequisite: EDUA 5800 or EDUA 5801 (or 129.580) or one of the former courses 129.680, 043.610 or consent of instructor.

EDUA 7810 Evaluating Educational Programs Cr.Hrs. 3 (Formerly 129.781) An introduction to current approaches to evaluating educational programs. A review of various evaluation methods/approaches, along with consideration of specific design, ethical, consulting and political issues will be the main focus of this course. Specific skills to be developed are the implementation of educational evaluations, data collection and analysis, and final report writing. Students may not hold credit both EDUA 7810 (or 129.781) and the former 043.726.

EDUA 7840 Qualitative Research Methods in Education Cr.Hrs. 3

## ACADEMIC CALENDAR

(Formerly 129.784) An introduction to qualitative research methods. While the theoretical underpinnings of qualitative research will be discussed, emphasis is placed on learning to conduct a study including design, collecting and analyzing data, and research ethics. Not to be held with EDUA 7841. Prerequisite: EDUA 5800 or EDUA 5801 (or 129.580) or 043.503 or equivalent (C+) and permission of the instructor.

EDUA 7850 Design and Analysis of Educational Research (Quantitative) Cr.Hrs. 3
(Formerly 129.785) A study of the use of quantitative methods of analyzing educational research data. Descriptive and inferential procedures commonly used in educational research will be discussed and students will learn to use statistical packages. The course will also address when it is appropriate to employ quantitative designs and present common designs and their associated analyses. Prerequisite: EDUA 5800 (or 129.580) (C+). Students may not hold credit for both EDUA 7850 (or 129.785) and the former 129.681 or the former 43.535 or 43.611 .

EDUA 7860 Advanced Topics in Educational
Research Cr.Hrs. 3
(Formerly 129.786) An advanced study of special topics in educational research with an in-depth study of specific topics which will change from year to year. Prerequisite: EDUA 5800 (or 129.580) (C+) and permission of the instructor. Students may not hold credit for both EDUA 7860 (or 129.786) and the former courses 129.783 or 043.711

## EDUA 7870 Measurement and Evaluation in

Schools Cr.Hrs. 3
(Formerly 129.787) An advanced study of the principles of measurement and evaluation and their application to teaching and learning in schools. Current issues in measurement and evaluation, including alternative forms of classroom assessment and standard setting, will be discussed. Prerequisite: EDUA 5810 or EDUA 5811 (or 129.581) or the former 043.301 (C+) or equivalent, or consent of instructor.

## Curriculum,Teaching and Learning:

EDUB 7010 Seminar in Art Education 1 Cr.Hrs. 3
(Formerly 132.701) An examination of the major historical, philosophical, psychological and socio-cultural foundations of art education. The study of major developments in each of these areas will form a basis for understanding current theory and practice. Students may not hold credit for both EDUB 7010 (or 132.701) and the former 063.725.

EDUB 7020 Seminar in Art Education 2 Cr.Hrs. 3 (Formerly 132.702) The study of the methodology, content and problems of art education research, curriculum development and practice. Students will explore research methodology and curriculum design through individualized projects related to classroom practice. May not be held with EDUB 7020 (or 132.702) and the former 063.726.

EDUB 7030 The Arts in Education Cr.Hrs. 3
(Formerly 132.703) An examination of the role of the arts in general education. Emphasis will be placed on knowledge of the role of perception, aesthetic valuing and cognition in arts education, and application of this understanding and knowledge to educational practice. Students may not hold credit for both EDUB 7030 (or 132.703) and the former
063.750.

EDUB 7040 Seminar in Educational Drama Cr.Hrs. 3 (Formerly 132.704) A critical examination of the literature and current research in educational drama. Consideration will be given to the philosophy, theory, and practice of drama in the classroom, and the evaluation of programs. May not be held with EDUB 7040 (or 132.704) and the former 063.743.

EDUB 7050 Seminar in Educational Theatre Cr.Hrs. 3 (Formerly 132.705) A critical examination of the literature and current research in educational theatre. Consideration will be given to the philosophy, theory, and practice of theatre in the school setting, and to the evaluation of programs. May not be held with EDUB 7050 (or 132.705) and the former 063.744.

EDUB 7060 Seminar and Practicum in Clinical Diagnosis and Remediation Cr.Hrs. 6
(Formerly 132.706) A thorough study of the etiology, diagnosis, and treatment of complex reading disabilities; practical experience under supervision in diagnosing reading problems and in prescribing, treating, interpreting, and reporting findings. Students may not hold credit for both EDUB 7060 (or 132.706) and the former 063.705.
Prerequisite: EDUB 5400 (or 132.540) or 063.599 (C+).
EDUB 7070 Classical Research in Reading Cr.Hrs. 3 (Formerly 132.707) A critical review, analysis, and synthesis of classical research studies in the psychology, psycholinguistics, sociology, and pedagogy of reading. Students may not hold credit for both EDUB 7070 or EDUB 7071 (or 132.707) and the former 063.713.

EDUB 7090 Seminar in Reading Processes Cr.Hrs. 3 (Formerly 132.709) A critical examination of theories and models of reading; a thorough study of the reading processes in relation to language, vision, hearing, neurological development, cognition and motivation. May not be held with EDUB 7090 (or 132.709) and the former 063.739.

EDUB 7100 Language and Literacy Curriculum Inquiry in the Early Years Cr.Hrs. 3
(Formerly 132.710) A study of language and literacy curriculum in the early years of schooling. Participants will identify and examine issues and problems arising out of theory, research, and curriculum practices in early years classrooms. Participants will have the opportunity to develop and pursue a curriculum project in accordance with their professional research interests. May not be held with EDUB 7100 (or 132.710) and the former 063.755.

EDUB 7110 Research in Language and Literacy
Development Cr.Hrs. 3
(Formerly 132.711) An exploration of language and literacy development issues of professional interest to teachers. Participants will critically analyze language/literacy development theories, published research, and classroom observations. Opportunities will be created for participants to conduct their own language/literacy development inquiry in an educational setting. Students may not hold credit for both EDUB 7110, EDUB 7111 (or 132.711) and the former 063.756.

## ACADEMIC CALENDAR <br> 2012-2013 .

## University of Manitoba

EDUB 7150 Seminar in Reading and Response to Literature Cr.Hrs. 3
(Formerly 132.715) This course is designed to familiarize students with the historical and philosophical trends in reading and response to literature; it will survey major developmental reading and literary response trends, examine the epistemological assumptions associated with those developments and explore the developing thought in how students process written texts, in particular, literary tests. The course will also examine curricular implications in reading and literary response. Students may not hold credit for both EDUB 7150 (or 132.715) and the former 063.760.

EDUB 7160 Language Teacher as Researcher Cr.Hrs. 3 (Formerly 132.716) The purpose of this course is to investigate the characteristic parameters of teachers as researchers in the context of their own classroom. Three fundamental principles provide a curricular perspective to guide the participants: voice, conversation, and community. With this perspective, the language teacher engages in classroom inquiry with the goal of understanding language and teaching through the learners as curricular informants. Students may not hold credit for EDUB 7160 and EDUB 7161 (or 132.716) or the former 063.761.

EDUB 7180 Research in Written Composition Cr.Hrs. 3 (Formerly 132.718) A critical analysis of research and research methods in written composition process and pedagogy. Consideration will be given to classic studies, historical development, current trends and research, and evaluation procedures as they apply to the study and teaching of writing. Students may not hold credit for EDUB 7180 and EDUB 7181 (or 132.718 or 063.763).

EDUB 7190 Research in Language for Learning Cr.Hrs. 3 (Formerly 132.719) A critical study of the research literature in how language can support learning in all areas of schooling. The course will focus on the role of language in supporting learning in all subject areas and will specifically investigate the research about the role of talking, reading, and writing as tools for learning. Students may not hold credit for EDUB 7190 and EDUB 7191 (or 132.719 or 063.764).

EDUB 7210 Seminar in E.S.L. Theory and Practice Cr.Hrs. 3 (Formerly 132.721) Opportunity will be given to examine critically the major theories and methodologies used in E.S.L. instruction and research. Students may not hold credit for both EDUB 7210 (or 132.721) and the former 063.727.

EDUB 7212 Critical Applied Linguistics in a Global Context Cr.Hrs. 3
We will examine the role of English comparatively and internationally in a variety of educational systems and regimes, relating the micro-relations of applied linguistcs to the macro relations of society, exploring the roles of critical theory in language teaching and learning, and developing self-reflexivity as scholars in second language education.

EDUB 7220 Research Issues and Application in TESL (Teaching English as a Second Language) Cr.Hrs. 3 (Formerly 132.722) This course focuses on a survey of ESL and language development research issues, procedures, and findings. This research review will serve as the basis for students to plan individual research and conduct a pilot study. Students may not hold credit for both EDUB 7220 (or
132.722) and the former 063.753 .

EDUB 7250 Theoretical Foundations of the Social
Studies Cr.Hrs. 3
(Formerly 132.725) An examination of the development of social studies education, including the theories, research, ideas and ideologies that have and continue to shape social studies curriculum and pedagogy. Students may not hold credit for both EDUB 7250 (or 132.725) and the former 063.737.

EDUB 7260 Seminar in Social Science Education Cr.Hrs. 3 (Formerly 132.726) An examination of current trends and developments in social science education as they affect the school curriculum at all grade levels, K-12. Particular attention will be paid to questions of curriculum contents, teaching strategies and student evaluation. Students may not hold credit for both EDUB 7260 (or 132.726) and the former 063.738.

EDUB 7270 Culture, Citizenship and Curriculum Cr.Hrs. 3 (Formerly 132.727) An examination of the role of school curricula in preserving, transmitting and transforming conceptions and practices of culture and citizenship, with particular reference to social and political education in schools. Students may not hold credit for both EDUB 7270 (or 132.727) and the former 063.749.

EDUB 7280 Early Years Curriculum: Philosophical
Traditions and Future Directions Cr.Hrs. 3
(Formerly 132.728) An exploration and evaluation of models, issues, and priorities in Early Years curriculum (K-4).
Participants will design curriculum which realizes and particularizes the theories, models, concepts and engagements being examined in the course. Students may not hold credit for EDUB 7280 and EDUB 7281 (or 132.728 or 063.747).

EDUB 7290 Curriculum Research in Early Years: Young Children and Social Semiotics Cr.Hrs. 3
(Formerly 132.729) An investigation of the social nature of learning and children's use of semiotic systems (language, art, music, dance, drama, and mathematics) as ways of knowing in the Early Years (K-4) classroom. Participants will conceive, organize, and conduct a research project that allows them to develop an understanding of children's use of one or more semiotic systems within a curriculum context. Students may not hold credit for both EDUB 7290 and 132.729 or 063.748 .

EDUB 7330 Inquiry in Curriculum and Instruction Cr.Hrs. 3 An examination of the issues involved in critiquing and synthesizing inquiry in curriculum and instruction studies in the humanities and social sciences. The course will also introduce students to the variety of ways in which inquiry may be conducted in instructional settings and will focus on how the research on curriculum and instruction can be validly synthesized across studies. Students may not hold credit for both EDUB 7330 (or 132.733) and the former 063.754 .

EDUB 7340 Topics in Curriculum: Humanities and Social Sciences Cr.Hrs. 3
(Formerly 132.734) The study of selected topics in curriculum and instruction in the humanities and social sciences.

## ACADEMIC CALENDAR <br> 2012-2013 •

EDUB 7350 Independent Studies in Curriculum: Humanities and Social Sciences Cr.Hrs. 3
(Formerly 132.735) Independent study of selected issues related to curriculum and instruction in the humanities and social sciences. This course may be used for field studies.

EDUB 7360 Topics in Curriculum: Mathematics and Natural Sciences 1 Cr.Hrs. 3
(Formerly 132.736) A reading and research course in topics of significance to curriculum development in the areas of specialization offered by the Department.

EDUB 7370 Topics in Curriculum: Mathematics and Natural Sciences 2 Cr.Hrs. 3
(Formerly 132.737) A continuation of EDUB 7360 for students engaging in readings and research too great in scope to be included within a three-credit program.

EDUB 7390 Curriculum in Vocational Education Cr.Hrs. 3 (Formerly 132.739) A review of the major curriculum changes in vocational education with reference to the public school, the community college and post-compulsory institutions. Emphasis will be on models, supportive research and curricular design strategies. Students may not hold credit for both EDUB 7390 (or 132.739) and the former 081.714.

EDUB 7416 Teaching and Learning in Post -Secondary Education Cr. Hrs 3
An in-depth study of teaching and learning in postsecondary education contexts grounded in current theoretical, research and pedagogical literatures.

EDUB 7420 Study of Teaching Cr.Hrs. 3
(Formerly 132.742) Views of teaching, paradigms, and methodologies for studying teaching and carrying out inquiries into teaching. Students may not hold credit for EDUB 7420 and EDUB 7421 (or 132.742 or 081.722).

EDUB 7430 Trends in Vocational Education Cr.Hrs. 3 (Formerly 132.743) An examination of the historical trends in vocational education as influenced by a changing society. Special emphasis will be placed on the contributions of individuals on the impact of federal and provincial legislation as it affects vocational education. Students may not hold credit for both EDUB 7430 (or 132.743) and the former 081.713.

## EDUB 7440 Seminar in Home Economics

Education Cr.Hrs. 3
(Formerly 132.744) An application of current research to the design, implementation and evaluation of programs in home economics education. Students may not hold credit for both EDUB 7440 (or 132.744) and the former 081.716.

EDUB 7450 Seminar in Educational Technology Cr.Hrs. 3 (Formerly 132.745) A review of current research in educational technology and a critical appraisal of recent technology in instructional development. Students may not hold credit for both EDUB 7450 (or 132.745) and the former 081.721 .

EDUB 7460 Information Technology and

## Education Cr.Hrs. 3

(Formerly 132.746) A theoretic study of information media and environments, their educational and societal impact, and their educational application. Students may not hold credit
for both EDUB 7460 (or 132.746) and the former 081.723.
EDUB 7470 Seminar in Mathematics Education Cr.Hrs. 3 (Formerly 132.747) An analysis of methods and materials in mathematics education, a review of research, and a critical appraisal of current curriculum development. Students may not hold credit for both EDUB 7470 (or 132.747) and the former 081.720.

EDUB 7480 Advanced Seminar in Mathematical Diagnosis and Remedy Cr.Hrs. 3
(Formerly 132.748) A close examination of the theory and practice of mathematical diagnosis and remedy across the school curriculum. Students may not hold credit for both EDUB 7480 (or 132.748) and the former 081.724.
Prerequisite: permission of instructor.
EDUB 7490 Theories of Teaching Mathematics
(Secondary) Cr.Hrs. 3
(Formerly 132.749) An examination of the objectives of secondary school mathematics, mathematics curriculum organization and development, theories of learning and teaching secondary school mathematics, and mathematics assessment programs. Students may not hold credit for both EDUB 7490 (or 132.749) and the former 081.725.

EDUB 7500 Seminar in Science Education Cr.Hrs. 3 (Formerly 132.750) A review of current research in science education, and a critical appraisal of current curriculum development in science. Students may not hold credit for both EDUB 7500 (or 132.750) and the former 081.719. Prerequisite: [STAT 1000 (or 005.100) (C+) and STAT 2000 (or 005.200) (C+)] or [EDUA 5800 or EDUA 5801(or 129.580] (C+) or equivalent.

EDUB 7510 Educational Problems and Advanced Methods in Health and/or Physical Education Cr.Hrs. 3 (Formerly 132.751) An examination of the relationship of research to educational practice in the teaching of health and/or physical education. Students may not hold credit for both EDUB 7510 (or 132.751) and the former 081.711.

EDUB 7520 Contemporary Curricula in Health and/or Physical Education Cr.Hrs. 3
(Formerly 132.752) An examination of principles and content of health and/or physical education curricula and programs. Logistical and social-political factors associated with implementation will be examined. Students may not hold credit for both EDUB 7520 (or 132.752) and the former 081.712.

EDUB 7530 Curriculum Development and Implementation in Language and Literacy Cr.Hrs. 3
(Formerly 132.753) A study of historical antecedents issues, theory and research - in relation to both the reading and writing curriculum contrasted with current structuralist, poststructuralist and deconstructivist views of knowledge construction with emphasis on discourse synthesis, individual cognitive processes and social influences on literacy learning. Not to be held with EDUB 7531. Prerequisite: A minimum of 3 credit hours of reading courses (c+).

EDUB 7540 Final Seminar in Curriculum, Teaching and Learning Cr.Hrs. 3
(Formerly 132.754) Seminar and workshop on processes and products in writing and defending an M.Ed. final inquiry
paper. Both qualitative and quantitative research models will be acknowledged. Not to be held with EDUB 7541. Prerequisite: Minimum 24 credit hours completed in a comprehensive M.Ed. Program (C+).

EDUB 7550 Historical and Contemporary Approaches to Curriculum Cr.Hrs. 3
(Formerly 132.755) Historical Developments of curriculum as a field of study and inquiry, including the philosophical, social, political, and cultural contexts of curriculum. Students may not hold credit for both EDUB 7550 (or 132.755) and either former 132.730 and 063.734.

EDUB 7560 Theory and Practice of Curriculum Design and Development Cr.Hrs. 3
(Formerly 132.756) An examination of the theory and practice of the design, development, implementation and evaluation of curricula for K-12 and adult/post-secondary levels. Students may not hold credit for both EDUB 7560 and 132.756 or 132.731 or 063.735 .

EDUB 7570 Contemporary Perspectives and Practices in Music Education Cr.Hrs. 3
(Formerly 132.757) A study of current and emerging perspectives and practices in music education with emphasis on recent theory and research as it relates to music teaching and learning at all levels.

EDUB 7580 Theory and Research in a Second Language Acquisition Cr.Hrs. 3
(Formerly 132.758) Examination of the development of the field of second language acquisition study, including historical views, issues, theories and models in relation to language universals, cognitive development, language mastery, and second language acquisition and learning.

EDUB 7590 Internationalization of Technical and Vocational Education and Training Cr.Hrs. 3
(Formerly 132.759) An exploration and critical evaluation of basic assumptions underlying the theories and values of globalization and the internationalization of technical and vocational education and training (TVET). Emphasis will be placed on the examination of how these theories and values influence institutions, programs, policies and practices in TVET.

EDUB 7600 Action Research in Education Cr.Hrs. 3 The study of the theory and practice of action and participatory action research in education including models, principles and practices, criteria for assessing quality, ethics, and modes of representation. Prerequisite: EDUA 5800 or EDUA 5801(129.580) ( $\mathrm{C}+$ ).

EDUB 7990 Seminar in Environmental Education Cr.Hrs. 3 (Formerly 132.799) Designed for students wishing to concentrate on science teaching and learning within the context of environmental education. Existing and projected programs and approaches to environmental education will be subjected to critical analysis. Students may not hold credit for both EDUB 7990 (or 132.799) and the former 081.710 .

## Dental Diagnostic and Surgical Sciences

For information about graduate programs in the following units: Oral Biology or Preventative Dental Science please refer to the table of contents for page numbers.

Oral and Maxillofacial Surgery
Head: A. Shah
Campus Address/General Office: D343-790 Bannatyne Avenue
Telephone: 2047893633
Fax: 204 272-3077
Email Address: oral surgery@umanitoba.ca
Website: oral surgery@umanitoba.ca
Academic Staff: Please refer to the website for Faculty information:umanitoba.ca/faculties/detistry/gradPrograms/gr ad OMS

## Master of Dentistry (Oral and Maxillofacial Surgery), Program Information

The Master of Dentistry (Oral and Maxillofacial Surgery) which is four years in length includes a four-year hospital residency for which a Post-Graduate Training Certificate is awarded. Usually one student is accepted per year. The program has full accreditation from the Commission on Dental Accreditation of Canada. The primary objective of the program is to train dentists to become competent, ethical Oral and Maxillofacial surgeons for practice in Canada, and to provide them with a scientifically based curriculum which will prepare them for the challenges they will face in the development of their speciality, throughout their professional careers.

The clinical program provides comprehensive training in all the major areas generally included within the scope of practice of an Oral and Maxillofacial Surgeon. Students are provided with opportunities to attend and present papers at National and International conferences related to aspects of their speciality and an external elective rotation is permitted subject to approval of the Program Director.

## Fields of Research

Faculty supervises every student in at least one research project during the training period and their interests provide for a wide spectrum of clinically related topics. Dental implants, maxillofacial trauma, temporomandibular disorders, cleft lip and palate,tissue regeneration and wound healing, cranio-facial deformity, surgical pathology, including head and neck oncology, oral medicine and therapeutics are examples of areas in which faculty have published and have a continuing interest. Collaborative research with other departments is encouraged and does occur.

## ACADEMIC CALENDAR

## Research Facilities

The research facilities in the Faculties of Dentistry and Medicine, the Health Sciences Centre and related institutions in the Winnipeg Regional Health Authority are extensive, accessible, and provide opportunities for a wide range of research endeavours by graduate students in Oral and Maxillofacial Surgery.

## Admission Requirements

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, applicants must be Canadian citizens or permanent residents of Canada and be in possession of a National Dental Examining Board of Canada Certificate. They must comply with provincial requirements for licensing of interns and residents. Some additional postgraduate experience is desirable.

## Application Deadlines

Students must submit their application and supporting documentation to the Faculty of Graduate Studies by September 1st, prior to the year of admittance. The normal starting date is July 1st.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students must complete: all clinical rotations and assignments as set out in the four years of hospital residency training; courses DDSS 7230, DDSS 7240, DDSS 7250, DDSS 7260, DDSS 7270, DDSS 7280 and DDSS 7290; ancillary course ANAT 7060, CHSC 7470 and other basic science courses as selected by the department. An essay/research project DDSS 7220 in a specified area selected in consultation with the department is required.

Second Language Reading Requirement: None

Expected Time to Graduate: Four years

Ph.D. in Dental Diagnostics,
There is no Ph.D. Program in Dental Diagnostic and Surgical Sciences.

## Periodontics

Head: A. Shah
Campus Address/General Office: D343-790 Bannatyne Avenue
Telephone: 2047893633
Fax: 204 272-3077

Email Address: periodontics@umanitoba.ca
Website:

eriodontics
Head, Periodontics: Shirley Gelskey (Acting)

## Master of Dentistry (Periodontics), Program Information

The three-year Master of Dentistry (Periodontics) Program is one of only four graduate periodontics programs in Canada. The program accepts two students every two of three years. At any given time there are four students in the program. The program entails clinical training, lectures, seminars in the clinical and related basic sciences and research. The program is certified and fully accredited by the Commission on Dental Accreditation of Canada and, as such, is also recognized by the American Dental Association.

The mission of the program is to educate dentists to be scientifically-based, clinically-competent, and communityconcerned, ethical periodontists. The program provides periodontal consultation and treatment services, including dental implants, to patients attending the dental school and patients referred by dentists in Winnipeg and throughout Manitoba. Students are provided the opportunity to treat a full range of periodontal problems and to participate in ongoing clinical and basic periodontal research. The Graduate Periodontics Clinic simulates a private periodontics practice and provides dental hygienist and dental assistant support to students. In addition, a clinic is held at the adjacent Health Sciences Centre where periodontal consultative and treatment procedures are provided for patients who have serious medical conditions.

## Fields of Research

Research interests of faculty involved with the program include (a) clinical trials of therapeutic interventions in the treatment of periodontitis and peri-implantitis, (b) diagnosis of periodontal diseases, and (c) the effect of tobacco on periodontal tissues and smoking cessation initiatives in Periodontics and (d) oral systemic relationships. In addition, collaborative research opportunities are available in such areas as saliva, calculus and plaque formation, the microbiology of periodontitits and cell signaling mechanisms, through the Department of Oral Biology.

## Research Facilities

In addition to the clinical facilities, general laboratories, radiographic and darkroom facilities of the Faculty of Dentistry, there is access to equipment belonging to the Department of Oral Biology. Clinical facilities are also available at the adjacent Health Sciences Centre Hospital. The Grad Perio Clinic has high-tech instruments for research like Periotron and Florida Probe.

## Admission Requirements

## 

## ACADEMIC CALENDAR 2012-2013 •

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, applicants must have a D.M.D. degree or its equivalent from an approved college or university.

## Application Deadlines

Students must submit their application and supporting documentation to the Faculty of Graduate Studies by September 1, prior to the year of admittance. The normal starting date is August 1.

## Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students must complete: courses DDSS 7010, DDSS 7050, DDSS 7120, DDSS 7130, DDSS 7150, DDSS 7210, DDSS 7230 and DDSS 7300; ancillary courses ANAT 7060, CHSC 7470, ORLB 7090, ORBL 7110 and other basic sciences as selected by the department; An essay/ research project (DDSS 7220) in a specified area selected in consultation with the department.

Second Language Reading Requirement: None

Expected Time to Graduate: Three years

Ph.D. Periodontics,
There is no Ph.D. Program in Dental Diagnostic and Surgical Sciences.

## Dental Diagnostic and Surgical SciencesDDSS 7010 Biology and Pathology of the <br> Periodontium Cr.Hrs. 6

(Formerly 103.701) Selected topics in cell biology precedes a comprehensive and detailed survey of the periodontium, its constituent tissues and its function; the cell dynamics of inflammation and wound healing and the histopathology of the early and advanced periodontal lesion.

DDSS 7050 Oral Medicine and Oral Diagnosis Cr.Hrs. 3 (Formerly 103.705) This course provides the student, through clinical rotations, with the opportunity to enhance diagnostic and non-surgical management of oral pathologic conditions including mucosal and intrabony lesions, temporomandibular joint disorders, and oral manifestations of systemic disease in both otherwise healthy and medically compromised patients.

DDSS 7120 Advanced Clinical Periodontics Cr.Hrs. 4 (Formerly 103.712) This seminar course will review contemporary clinical periodontics by considering assigned readings in current texts and review articles. This course is intended to assure that students have a comprehensive overview of conventional periodontal therapy early in their
education.
DDSS 7130 Occlusion Cr.Hrs. 3
(Formerly 103.713) A seminar series devoted to the diagnosis, treatment planning and management of patients with craniomandibular disorders.

DDSS 7150 Review of Periodontal Literature Cr.Hrs. 6 (Formerly 103.715) This course will consider the concepts underlying the current practice of periodontics by reviewing assigned readings from the scientific literature. Students will be expected to apply principles of critical evaluation in order to identify and appreciatethe limitations of these studies and thus the limitations of the current concepts derived from them.

DDSS 7210 Clinical Practice in Periodontics Cr.Hrs. 18 (Formerly 103.721) Designed to provide the clinical experience which is essential for specialty practice in Periodontics (circa 1600 hours).

DDSS 7220 Essay/Research Project Cr.Hrs. 3
(Formerly 103.722) An essay/research project is required for each student. It is selected in consultation with, and approved by the department head. This course is graded pass/fail.

DDSS 7230 Advanced Oral Pathology Cr.Hrs. 6 (Formerly 103.723) The four major etiopathogenic categories of diseases affecting the oral and paraoral structures are discussed with emphasis on common conditions and entities significant to various dental specialties. Lectures cover epidemiology, clinical and laboratory features and management principles with supplementation by seminars or laboratories.

DDSS 7240 Advanced Oral and Maxillofacial Surgery Seminar 1 Cr.Hrs. 3
(Formerly 103.724) This course includes a thorough review of the applied scientific basis for the practice of oral and maxillofacial surgery and emphasizes surgical anatomy and pathology, diagnosis and technique. Instruction will be given by means of lectures, seminars, case presentations and a critical review of current literature. Year I.

DDSS 7250 Clinical Advanced Oral and Maxillofacial Surgery 1 Cr.Hrs. 6
(Formerly 103.725) The first year of hospital residency includes training in history taking and physical diagnosis; hospital protocols and ward procedure; minor oral surgery procedures and pain control techniques; operating room procedures and general in-patient care. Yearl.

DDSS 7260 Advanced Oral and Maxillofacial Surgery Seminar 2 Cr.Hrs. 3
(Formerly 103.726) Lectures, seminars, case presentations and reviews of current literature will emphasize the state of current knowledge regarding the clinical practice of advanced oral and maxillofacial surgery. Year 2.

DDSS 7270 Clinical Advanced Oral and Maxillofacial Surgery 2 Cr.Hrs. 6
(Formerly 103.727) The second year of the hospital residency training program includes training in minor oral surgery, including dento-alveolar, pre-prosthetic surgery and implantology. It also provides an introduction to advanced oral and maxillofacial surgery and maxillofacial imaging. A
rotation to Internal Medicine is included. Year II.
DDSS 7280 Clinical Advanced Oral and Maxillofacial Surgery 3 Cr.Hrs. 6
(Formerly 103.728) The third year of the hospital residency training program includes rotations in Anaesthesia, Internal Medicine, General and Plastic Surgery, Surgical Intensive Care and Emergency Room. It also includes training in advanced oral and maxillofacial surgery. An elective rotation may also be arranged. Year III.

DDSS 7290 Clinical Advanced Oral and Maxillofacial Surgery 4 Cr.Hrs. 6
(Formerly 103.729) The fourth year of the hospital residency training program is devoted to advanced oral and maxillofacial surgery. The student is designated chief resident and assumes a greater degree of responsibility in patient care and administrative activities. Year IV.

DDSS 7300 Dental Implantology Cr.Hrs. 3
(Formerly 103.730) A seminar course devoted to providing an in-depth understanding of the basic and applied aspects of the placement of dental root form implants in humans. This course is a prerequisite to the actual surgical placement of implants undertaken in DDSS 7210 (or 103.721).

## Design and Planning

Head: (and Graduate Chair) M. A. Beecher
Campus Address/General Office: 201 Russell Building
Telephone: (204) 4749458
Fax: (204) 4747532
Email Address: architecture@Umanitoba.ca

## Website:

umanitoba.ca/faculties/architecture/programs/Phd/index.html
Academic Staff: Please refer to website for Faculty information:umanitoba.ca/faculties/architecture/programs/Ph d/index.html

The Ph.D. in Design and Planning in the Faculty of Architecture is a Faculty based program that provides candidates with the opportunity to conduct advanced and focused research in any of the disciplines represented in the Faculty. Specifically, the Ph.D. program areas in the Faculty of Architecture: Design and Planning Technologies; Design and Planning Education; Design and Planning Practice; Design and Planning Theory; Sustainable Design and Planning.

Under the general supervision of the Doctoral Studies Committee. The Doctoral Studies Committee is responsible for the general administration of the Program, in accordance with the policy guidelines approved by the Faculty of Architecture Council and, where applicable, the Faculty of Graduate Studies. In essence, the Doctoral Studies Committee exercises the responsibilities assigned to a Department Head by the Faculty of Graduate Studies in the case of department-based graduate programs. The Doctoral Studies Committee is composed of five members and is chaired by the Associate Dean (Research). The remaining members of the Doctoral Studies Committee, all of whom
hold a doctorate or equivalent, are appointed by the Departmental Councils of the Faculty of Architecture.

In addition to the regulations, policies and procedures of the Faculty of Graduate Studies which govern Ph.D. programs (see the Graduate Calendar of the University of Manitoba), the Faculty of Architecture has adopted these supplemental regulations to govern the Faculty-based Ph.D. Program.

## Admission

Admission to Ph.D. in Design and Planning program is competitive. A number of factors are taken into account in arriving at an admission decision: (1) the applicant's previous academic background, (2) the practice-based and/or academic experience of the applicant, (3) the referees' assessments of the applicant, (4) the ability of the Faculty to provide the program of studies and research requested by the applicant, (5) the funding support that the applicant has obtained and/or confirmed, and (6) the availability of a faculty member that has expertise in the research area and is willing to supervise the program of studies and research of the applicant.

Students who have a Master degree in a planning or design discipline (architecture, planning, interior design or landscape architecture or equivalent related degree [e.g., industrial design, urban design]) from a recognized institution and who have met the requirements of the Faculty of Graduate Studies will be eligible for consideration to the program.

Students who possess a Master degree in another field outside of the design and planning disciplines from a recognized institution may be considered if they have an undergraduate degree in planning or a design discipline from a recognized institution and have an accumulated grade point average of 3.75 in their Master degree.

Candidates must demonstrate that they have an established record in professional practice and/or professional education, and have demonstrated interdisciplinary experience and/or knowledge. It is recommended that candidates have a minimum of five years of professional practice experience and/or have taught at a recognized institution for a minimum of five years.

Candidates will declare a specialization in one of five following areas: Design and Planning Technologies; Design and Planning Education; Design and Planning Practice; Design and Planning Theory; Sustainable Design and Planning. Candidates to the program will provide: (a) a Problem Statement and Study/Research Rationale (i.e., a description of proposed study [minimum of 5 pages and maximum of 10 pages]); (b) a dossier of their work; (c) evidence of financial support; and (d) three letters of reference (at least one of whom will be an academic) from distinguished members of the planning and/or design profession(s) or equivalent institutions. Candidates to the program may be interviewed by at least three faculty members, two of whom will be from the Faculty of Architecture.

## Application Deadlines

Due to funding opportunities, all completed applications must be received by the Faculty of Graduate Studies by the second Friday of October of the year preceding September registration. For updated information please visit the Faculty of Architecture website.

## Program Requirements

Each student will be required to take a minimum of 12 credit hours of 700 level courses of which 6 credit hours must include Advanced Theory of Design and Planning (3) and Advanced Research Methods in Design and Planning (3). Students should complete their course work by the end of their first year.

All students will complete a Comprehensive Research Paper and a Comprehensive Design and Planning Theory Project by the end of their second year.

## IMPORTANT NOTE:

Each student is responsible for ensuring that they have approval for and have registered in the courses appropriate for their area of study, as determined in consultation with their Advisor and their Advisory Committee.

## Coursework:

Coursework is subject to the following regulations:

Each student will be required to take a minimum of 12 credit hours of 700 level courses of which 6 credit hours must include Advanced Theory of Design and Planning (3) and Advanced Research Methods in Design and Planning (3).

All candidates will complete a Comprehensive Research Paper, and a Comprehensive Design and Planning Theory Project.

A minimum of 6 credit hours of coursework at the 700 level must be in the student's program area and must include the program core coursework appropriate to the student's program area. The program area coursework is specific to the individual student and is defined by the Advisory Committee;

Where necessary, the student may be required to complete additional background coursework as identified by the Advisory Committee.

On the recommendation of the Advisory Committee and with the approval of the Doctoral Studies Committee, a maximum of 3 credit hours may be transferred into the program from other approved institutions.

Comprehensive Research Paper and Comprehensive Design and Planning Project:

The Comprehensive Research Paper is a literature review that examines potential research methods appropriate for the student's doctoral studies program. The student's advisor will be responsible for reviewing the Comprehensive Research Paper and determining if it is acceptable or not acceptable. If a Comprehensive Research Paper is deemed by the advisor to be unacceptable, the student will re-submit the paper to the advisor. If the advisor deems that the resubmitted Comprehensive Research Paper is still not acceptable, the advisor will submit the Comprehensive Research Paper to the Associate Dean: Research who will make the final determination of acceptability. The Associate Dean: Research's opinion will be final. Should a student fail to have their re-submitted Comprehensive Research Paper accepted, they will be asked to withdraw from the Ph.D. Program.

The Comprehensive Design and Planning Project is a project that will explore the student's area of research interest and identify preliminary considerations that will be explored in detail in the doctoral thesis. The Comprehensive Design and Planning Project will be a written and/or design based submission that is reviewed by the student's Advisory Committee. The Advisory Committee will determine by majority if the Comprehensive Design and Planning Project is acceptable or unacceptable. If the Comprehensive Design and Planning Project is deemed to be unacceptable, the student will be required to re-submit their work until the Advisory Committee deems the Comprehensive Design and Planning Project acceptable. The Advisory Committee may ask the student to withdraw from the Ph.D. program if the resubmitted Comprehensive Design and Planning Project is deemed unacceptable.

## IMPORTANT NOTE:

As soon as the student and advisor agree upon the program of studies, the program forms must be completed and submitted by the advisor to the Chair of the Doctoral Studies Committee for approval. These forms are available online:
http://umanitoba.ca/faculties/graduate studies and http://umanitoba.ca/architecture

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section. The Ph.D. program consists of coursework, original research and thesis. Normally, 12 credit hours of coursework (all at the 700 level) are required beyond the Master degree or its equivalent. The minimum time requirement is two calendar years of full-time study and research, of which at least one academic year must be spent on campus.

Second language requirement: none

Expected time to graduation: two to four years

ARCG 7100 Cr.Hrs. 3
This course is intended to promote critical thinking and provide opportunities to explore in detail key issues, ideas and theories about design and planning. Considerations may include: The relationship of design and planning theories to

## 

## ACADEMIC CALENDAR 2012-2013 •

the evolution of design and planning practice; Ways in which design and planning theories have been understood to shape built form; Factors that have shaped design and planning theories, their commonalities and disjuncture; Theory discourse as a means of discovering design and planning meaning; The role of theory in practice, research and discovery; The relationship of design and planning theories to other discipline theories as a means of identifying commonalities of interest.

ARCG 7102 Studio Topics in Environmental
Processes Cr.Hrs. 6
A detailed studio study of some special topics in architecture, city planning, landscape architecture or interior design.

## ARCG 7120 ADV RES DES PLN Cr.Hrs. 3

This course is intended to explore research methods pertinent to the study of design and planning. The considerations to be examined may include: Potential research tools and techniques that are pertinent to the exploration of design and planning theory, practice and development; Exploration of emerging research processes and methodologies that inform minority and feminist discourse; Review of the evolution of design and planning methods; Analysis of the relationships between research methods in aligned disciplines as those research methods may inform design and planning understanding.

## Disability Studies

Program Director: Director: Dr. Nancy E. Hansen Campus Address/General Office: 128 Education Building
Telephone: (204) 474-7017
Fax: (204) 474-6676
Email Address: disability studies@umanitoba.ca
Website: http://umanitoba.ca/disability studies
Academic Staff: Please refer to the website for faculty information:http://umanitoba.ca/disability studies

The focus of the program allows students to examine the policies and practices of all societies in order to understand the social, rather than the physical or psychological determinants, of the experience of disability. This focus shifts the emphasis from a prevention, treatment, remediation paradigm to a social, cultural, political one.

We offer an interdisciplinary Master's Degree Program in Disability Studies. We also offer a graduate level Option in Disability Studies that is available to both Master's and Doctoral students.

Students in the Master's Program will have the opportunity to apply their undergraduate degrees and work experience to pursue advanced interdisciplinary research and scholarship. Students taking the Option in Disability Studies will complement their major program area of study with course work which analyses the social construction of disability.
M.A./M.Sc. in Disability Studies,

## Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Graduates of honours or equivalent programs at the University of Manitoba (or equivalent from other recognized universities) with a minimum Grade Point Average (GPA) of 3.0 in the last 60 credit hours, are eligible for direct admission to a course of study leading to the Master's degree. Students who have completed a University of Manitoba Pre-Master's program with a minimum GPA of 3.0 are also eligible for admission. Pre-Master's programs taken at other universities may be accepted.

Students who wish to pursue the M.Sc. are required to have an undergraduate degree in Science.

Students with undergraduate degrees from a wide range of disciplines - such as Architecture, Arts, Education, Human Ecology, Engineering, Law, Management, Medical Rehabilitation, Medicine, Nursing, Physical Education and Recreation Studies, Science, Social Work and Women's Studies - will be considered eligible to apply if they meet the above requirements.

Students who do not meet current admission requirements may contact Disability Studies for advice on appropriate options.

## Application Deadlines

The deadline for receipt of the program application form and supporting documents in the department for a September admission is March 1 for International students and June 1 for Canadians and Americans as well as permanent residents. For January admission, the deadlines are July 2 for International applicants and October 1 for Canadian applicants. Students who wish to apply for scholarships and fellowships need to have their applications in by February 1 (for a September admission) or one month prior to the University's deadline for the scholarship application.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar.

The Master's Degree in Disability Studies requirements are twenty-four credit hours; eighteen credit hours of required course work, six credit hours of elective course credit, plus a thesis. The six credit hours of elective courses can be taken from a list of approved courses at the 3000, 4000, 5000 or 7000 level.
M.Sc. students will be required to take at least six hours of elective credit hours at the 7000 level in science subjects in those Faculties participating in the M.Sc. The student's Advisory Committee or the Disability Studies Graduate Program Committee may require other additional science courses at the 3000 or 4000 level. It should be noted that
students will normally be required to fulfil 7000 level course prerequisites before enrolling in 7000 level courses.

All academic programs must be approved by the Disability Studies Graduate Program Committee. This is normally done on the recommendation from the student's advisor and/or Advisory Committee following consultation with the student.

## Option in Disability Studies, Admission

The Option in Disability Studies is offered to students in faculties and departments that currently have a graduate program. Upon completion of the requirements, a concentration in Disability Studies will be recorded on the student's transcript. For information concerning the option, interested students are directed to their student advisor or to the Director of Disability Studies.

## Program Requirements

The Option in Disability Studies requirements are DS 7010 (6) Disability Studies and either DS 7020 (3) The History of Disability or DS 7030 (3) Evaluation and Application of Research Methods in Disability Studies.

## DS 7010 Disability Studies Cr.Hrs. 6

(Formerly 162.701) Explores the key concepts and issues in disability studies. Includes a critical examination of models and theories of disability, Canadian and other national laws and international standards, social and economic policy, and professional and service responses.

DS 7020 History of Disability Cr.Hrs. 3
(Formerly 162.702) Traces the historical development of responses to disability, by the medical/rehabilitation community, the governments, advocacy organizations and others. Canadian history will be the initial framework and the historical developments in other countries (including the UK, France, the USA, the Caribbean) will be used as a comparison. Pre- or co-requisite: DS 7010 (or 162.701)

DS 7030 Evaluation and Application of Research Methods in Disability Studies Cr.Hrs. 3
(Formerly 162.703) Provides a critical evaluation of quantitative and qualitative research methodologies used in disability studies. Methods to address disability used in different disciplines as well as transformative and empowerment methodologies such as participatory action and feminist disability research will be examined. Pre- or corequisite: DS 7010 (or 162.701)

DS 7040 Selected Topics in Disability Studies Cr.Hrs. 3 (Formerly 162.704) One key theme will be chosen for each year from the interests and availability of faculty. Topics could include women with disabilities, international dimensions of disability, disability policy and practice, disability organizing and other topics developed over time. Pre- or co-requisite: DS 7010 (or 162.701)

## Economics

Head: Pinaki Bose
Campus Address/General Office: 504 Fletcher Argue
Telephone: (204) 4746240
Fax: (204) 4747681
Email Address: Economics@umanitoba.ca

## Website:

http://umanitoba.ca/faculties/arts/departments/economics/

The Department of Economics offers graduate instruction leading to MA and PhD degrees, as well as a Pre-MA program. Enrolment is limited in order to sustain the flexibility and other advantages of a small graduate program and to tailor the program to individual needs. Students in the program come from Canada and around the world. Departmental funding policies are geared to the maintenance of a broad, international student base.

The Department of Economics at the University of Manitoba is both heterodox and policy-oriented. Faculty are heavily involved in shaping policy locally as well as at the national and international levels. Faculty have strong ties to economic research and forecasting organizations, international aid agencies and institutes for social policy research. Faculty members include neoclassicists, Keynesians, post-Keynesians, Marxists, institutionalists, empiricists, and econometricians. In addition to the standard economics curriculum, graduate students can choose from a variety of approaches and research areas, as well as take advantage of the department's openness to research topics that extend beyond the bounds of the department itself.

## Fields of Research

Faculty interests span the areas of labour economics, macro and micro economics, public finance, development, international trade, econometrics, environmental and resource economics, sustainable development, institutional economics, economic history, history of economic thought, health economics, alternative economic theory, and agricultural economics. See below for PhD fields.

## Research Facilities

The university has a Research Data Centre providing close access to Statistics Canada confidential data files. The department also maintains close links to other departments on campus in order to facilitate student learning in a wide range of areas. Graduate students are encouraged to do interdisciplinary research associated with the Transport Institute, the Natural Resources Institute, the Centre on Aging, and the Labour and Workplace Studies program. These centres offer academic expertise, facilities, grass roots connections, and, occasionally, funding opportunities. PhD fields in the department are classified as: agricultural economics, applied econometrics, applied microeconomics, development economics, and heterodox economics.

## M.A. in Economics, Admission

Applicants with a B.A. (Hons.) degree in Economics from the University of Manitoba, or its equivalent, may be admitted to the M.A. degree program. All M.A. students must successfully complete ECON 6040 as the first course of their program, which will be taken during a two-week period immediately preceding the first term of each academic year. However, applicants lacking the level of education normally required, i.e. B.A. (Hons.) in Economics or equivalent, for entry into the M.A. program or to the M.A. year of a Ph.D. program will be expected to acquire these qualifications in one or more pre-M.A. years.

## Application Deadline Dates

## September Admission

January 15 (International Students) May 1
(Canadian/Canadian permanent residents/US Students)

Please send application and all supporting documentation directly to the Faculty of Graduate Studies. Please note that students applying to the Department of Economics must submit 3 letters of reference with their application.

Please note that the Department of Economics does not normally accept students in the January session as the required Math and Theory courses start in the fall.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Department requirements can be found in the Departmental Supplementary Regulations available from the department.

MA including thesis: Master's in Economics students must complete ECON 6040 and 15 credit hours of coursework. Courses will be at the 7000 level, with the following exceptions. If deemed necessary by the Graduate Studies committee, a maximum of six credit hours may be permitted at the 4000 level if the field is not offered at the 7000 level in Economics or at the 3000 level or above in an ancillary field. Students must also complete a suitable thesis.

MA, without a thesis: Alternatively, candidates may complete the M.A. degree by coursework and research paper. A minimum of 27 credit hours of coursework is required, including ECON 6040 and ECON 7000. Courses will normally be at the 7000 level. If deemed necessary by the Graduate Studies committee, a maximum of six credit hours may be permitted at the 4000 in Economics if the field is not offered at the 7000 level or at the 3000 level or above in an ancillary field.

A minimum of six credit hours of coursework in economic theory at the graduate level is normally required. The theory requirement consists of ECON 7650 and ECON 7722. On
the recommendation of the student's advisor and with the approval of the Graduate Studies Committee, a student completing a thesis may be allowed to substitute an ancillary course for part of the theory requirement.

Ancillary courses are normally selected from disciplines related to Economics and to a candidate's thesis (e.g., political studies, sociology, history, statistics, mathematics).

Second Language Reading Requirement: none

Expected Time to Graduate: one year

## Ph.D. in Economics,

 Admission1) Except as provided in 2) below, applicants for admission to the Ph.D. program must have completed the entrance requirements and the program requirements of an M.A. degree in Economics or in Agricultural Economics equivalent to that awarded by the University of Manitoba.
2) In exceptional cases, applications may be considered from students who have completed an Honours degree in Economics equivalent to that awarded by the University of Manitoba. In such cases, the applicant will be required to fulfill, in addition to the requirements below, all coursework requirements for the M.A. degree by comprehensive examination option.

## Application Deadline Dates

## September Admission

January 15 (International Students) May 1
(Canadian/Canadian permanent residents/US Students)

Please send application and all supporting documentation to the Faculty of Graduate Studies. Please note that students applying to the Department of Economics must submit 3 letters of reference with their application.

Please note that the Department of Economics does not normally accept students in the January session as the required Theory courses start in September.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Ph.D. students in Economics must complete:

- A minimum of 24 credit hours of course work at the 7000 level. No more than 6 credit hours may be taken in a department other than Economics as part of this minimum course work requirement, if deemed necessary by the Graduate Studies
committee in consultation with the student's supervisor.
- A minimum of 36 credit hours of 7000 level courses in their M.A. and Ph.D. programs. These 36 credit hours must include:
- A minimum of 12 credit hours in economic theory. The theory requirement will normally be ECON 7650, ECON 7660, ECON 7722, and ECON 7732. Upon the recommendation of a student's advisory committee, the Graduate Studies Committee may permit a student to substitute two of the following for ECON 7660 and ECON 7732: ECON 7670 and ECON 7740.
- 3 credit hours of Econometrics at the 7000 level, 3 credit hours of heterodox economics at the 7000 level and either 3 credit hours of History of Economic Thought or Economic History.

## Fields of Concentration and Candidacy Examinations

Students must present themselves for one set of theory candidacy examinations. The theory examination consists of microeconomic and macroeconomic theory, which are assessed separately. Students must choose two fields of concentration and complete a research paper in one of the fields: Fields from which a student may select are:

Agricultural Economics
Applied Econometrics
Applied Microeconomics
The Ph.D. in Agricultural Economics is offered with the cooperation with the Department of Agribusiness and Agricultural Economics. For information on faculty, course offerings and specialization, contact the department of Agribusiness and Agricultural Economics.

Second language requirement: none

Expected time to graduation: four years

## Economics -6000 Level

ECON 6040 Survey of Mathematical Topics for Economists Cr.Hrs. 3
(Formerly 018.604) A review of mathematical concepts used in economics, particularly at the graduate level. Topics include linear economic systems and matrix algebra, differentiation and optimisation, integration, economic dynamics and optimisation through time, and difference and differential equations. This course cannot be counted toward the minimum degree requirements for M.A. and Ph.D. degrees. This course is graded pass/fail.

## Economics - $\mathbf{7 0 0 0}$ Level

ECON 7000 M.A. Research Workshop Cr.Hrs. 3 An examination of research methodology to assist students in understanding the process of research in Economics. Students will complete a research project under direct supervision. This is a required course for students in the M.A. by course work. This course is graded pass/fail.

Prerequisite: permission of department head.
ECON 7010 Econometrics I Cr.Hrs. 3
An advanced course in estimation and hypothesis testing in various regression models. Topics may include: asymptotic distribution theory; ordinary least squares estimation; maximum likelihood estimation; generalized least squares estimation; generalized method of moment estimation; and seemingly unrelated regressions estimation.

ECON 7020 Econometrics II Cr.Hrs. 3
An advanced applied course in cross-section and panel data econometrics. Topics may include logit, probit, heckman selection, and poisson; instrumental variables, difference-indifferences, regression discontinuity; fixed and random effects; dynamic panel models; quantile regression, nonparametric estimation; boostrapping. Prerequisite: ECON 7010.

## ECON 7032 Econometrics III Cr.Hrs. 3

Theory and applications of time-series analysis. Topics may include stationary univariate process; maximum likelihood estimation; Markov-switching models; state-space models; unit root process; vector autoregressive models; spurious regression; cointegration; and vector error correction models. Prerequisite ECON 7010.

ECON 7040 Topics in Applied Microeconomics I Cr.Hrs. 3 Advanced study in a selected topic in applied microeconomics. Topics covered in rotation include, but are not limited to labour economics, health economics, public finance, industrial organization, international trade, environmental economics, evaluation of public policy, production economics and applied game theory.
Prerequisite: A grade of C+ or better in ECON 7722 or former ECON 7720 (018.772).

ECON 7050 Topics in Applied Microeconomics II Cr.Hrs. 3 Advanced study in a selected topic in applied microeconomics. Topics to be covered in rotation include, but are not limited to labour economics, health economics, public finance, industrial organization, international trade, environmental economics, evaluation of public policy, production economics and applied game theory. Prerequisite: ECON 7722 or former ECON 7720 (018.772).

ECON 7060 Advanced Heterodox Theory Cr.Hrs. 3
This course is a review and examination of heterodox economic theory. Core topics include the theory of capitalist production, effective demand and economic fluctuations, growth and accumulation, crisis theory, and the state and economic policy.

ECON 7130 Advanced Development Economics Cr.Hrs. 3 Introduction to development economics at the graduate level. A core objective is to provide breath in terms of the coverage of salient topics in economic development and rigor in terms of the level of analysis. The course presumes a substantive background in the basic tools of economic analysis. This is a required course for doctoral students who intend to make development economics one of their field specializations.

ECON 7140 Topics in Development Economics Cr.Hrs. 3 A generic course title intended to accommodate various topics in development economics. The specific topic will be

## ACADEMIC CALENDAR

chosen by the instructor.
ECON 7170 Topics in Heterodox Economics I Cr.Hrs. 3 Selected study of advanced work in a selected field of heterodox economics.

ECON 7180 Topics in Heterodox Economics II Cr.Hrs. 3 Selected study of advanced work in a selected field of heterodox economics.

ECON 7202 Industrial Organization Cr.Hrs. 3
The emphasis will be on market structures and strategic interaction among firms. Topics such as oligopoly pricing, price discrimination, strategic entry deterrence, product differentiation, advertisement, research and development, auction design, regulation, and anti-competitive behavior will be covered. Students may not hold credit for both ECOBN 7202 and the former ECON 7200 (018.720).

ECON 7230 Directed Special Studies in Economics Cr.Hrs. 6 (Formerly 018.723) Intensive study of advanced work in a selected field of economics. As the course content will vary from year to year, students may take this course more than once for credit.

ECON 7300 Directed Special Studies in

## Economics Cr.Hrs. 3

(Formerly 018.730) First term of ECON 7230 (or 018.723). As the course content will vary from year to year, students may take this course more than once for credit.

ECON 7350 Public Finance: Public Expenditures Cr.Hrs. 3 (Formerly 018.735) The role of government expenditures and criteria for their evaluation. Public goods theory. Externality problems. Public choice. Benefit-cost analysis. Public enterprising pricing.

ECON 7360 Public Finance: Taxation Cr.Hrs. 3 (Formerly 018.736) Examination of income, profits, sales, property and other taxes, their allocational and distributional effects. Canadian tax policy. Tax incentives. Resource taxation. Intergovernmental fiscal relations in Canada and elsewhere. Public debt.

## ECON 7430 Advanced Theory of Resource

Economics Cr.Hrs. 3
(Formerly 018.743) Economic theory of the development and management of natural resources. Application of capital theory, investment theory, the theory of externalities and decision-making theory to resource utilization and management. A strong background in microeconomics is required. Also offered as ABIZ 7430 by the Department of Agribusiness and Agricultural Economics.

ECON 7500 Monetary and Financial Theory Cr.Hrs. 3 (Formerly 018.750) The microeconomics of money and other financial assets, in partial and general equilibrium frameworks. Explanation of financial market structure and behaviour with and without costless information. Students may not hold credit for both ECON 7500 (or 018.750) and the former 018.704.

ECON 7510 Advanced Monetary Macroeconomics Cr.Hrs. 3 (Formerly 018.751) Mainstream and other theories of how money matters to macroeconomics, theory and practice of policy rules for both monetary and other stabilization policy tools. Students may not hold credit for both ECON 7510 (or
018.751 ) and the former 018.704 .

ECON 7540 Advanced History of Economic
Thought Cr.Hrs. 3
(Formerly 018.754) Not currently offered.
ECON 7610 Approaches, Methodologies and Techniques in Economic History Cr.Hrs. 3
(Formerly 018.761) A review of methodologies, approaches, techniques, and contemporary controversies in economic history.

ECON 7620 Selected Studies in Economic History Cr.Hrs. 3 (Formerly 018.762) Not currently offered.

ECON 7630 Theory of International Trade Cr.Hrs. 3 (Formerly 018.763) Theories of trade flow; trade and income distribution; economic growth and changes in trade flows; instruments of trade intervention; international labour and capital movements; and economic integration.

ECON 7640 International Money and Finance Cr.Hrs. 3 (Formerly 018.764) Analysis of the theory of international money and finance. Assessment of existing international institutions dealing with money and finance. Theory, rationale and evaluation of structural adjustment policies. Prerequisite: ECON 7630 (or 018.763), or both ECON 7500 (or 018.750) and ECON 7510 (or 018.752) (or the former 018.704), or permission of instructor.

ECON 7650 Advanced Macroeconomic Theory 1 Cr.Hrs. 3 (Formerly 018.765) A review of contemporary macroeconomic theories and their applications; analysis of static equilibrium and disequilibrium models; exploration of such models' implications for cyclical behaviour and for policymaking. Prerequisite: ECON 6040 (or 018.604) which may be waived on demonstration of equivalent mathematical competence.

ECON 7660 Advanced Macroeconomic Theory 2 Cr. Hrs. 3 (Formerly 018.766) Analysis of cyclical models and of equilibrium growth models, and a review of contemporary theories of stabilization policy. Prerequisite: ECON 7650 (or 018.765).

ECON 7670 Advanced Macroeconomic Topics Cr.Hrs. 3 (Formerly 018.767) Not currently offered.

ECON 7690 Structuralist Theories of Development Cr.Hrs. 3 (Formerly 018.769) Study of structuralist classical Marxist and Neo-Marxist theories of development and underdevelopment. Appraisal of the development strategies which follow from the various theories.

ECON 7722 Advanced Microeconomic Theory I Cr.Hrs. 3 This course will cover topics in theories of consumer demand, production and cost, distribution, market equilibrium, market organization, general equilibrium and welfare. Students may not hold credit for both ECON 7722 and the former ECON 7720 (018.772). Prerequisite: ECON 6040 (018.604) which may be waived on demonstration of equivalent mathematical competence.

ECON 7732 Advanced Microeconomic Theory II Cr.Hrs. 3 This course will cover topics in game theory. Static and dynamic games with complete or incomplete information will be studied. Topics such as market failure arising from

## 

## ACADEMIC CALENDAR 2012-2013 •

asymmetric information, firm behavior in oligopolistic markets, auctions, signaling, free riding, externalities, and public goods will be discussed. Students may not hold credit for both ECON 7732 and the former ECON 7730 (018.773). Prerequisite: ECON 7722.

ECON 7770 Economics of Marx Cr.Hrs. 3 (Formerly 018.777) An intensive study of Marx's mature theory and especially of 'Capital'. 'Theories of Surplus Value', and 'the Grundrisse'.

ECON 7780 Debates in Marxian Economics Cr.Hrs. 3 (Formerly 018.778) An analysis of the major theoretical debates within the Marxian paradigm.

ECON 7790 Advanced Labour Economics Cr.Hrs. 3 (Formerly 018.779) A review of the theoretical and empirical foundations of modern labour economics.

ECON 7800 Labour Problems and Policies Cr.Hrs. 3 (Formerly 018.780) A course dealing with various contemporary problems and controversies in labour economics. Prerequisite: ECON 7790 (or 018.779).

ECON 7940 Production Economics Cr.Hrs. 3 (Formerly 018.794) Development of static microeconomic theories of the firm, functional forms, aggregation issues, productivity analysis, risk and uncertainty and in introduction to dynamics. The following are emphasized: a rigorous treatment of the models using duality; a critical understanding of the limitations and possibilities for generalizing the models; and relevance of the models for empirical research, especially in agriculture. Also offered as ABIZ 7940 by the Department of Agribusiness and Agricultural Economics. May not be held with ABIZ 7940 (or 061.794 ) or 018.793 or ABIZ 7130 (or 061.713).

ECON 7950 Advanced Agricultural Demand Analysis Cr.Hrs. 3
Critical evaluation of economic theory as applied to agricultural demand. Topics include demand systems; equilibrium; product transformation over time, place and form; and price analysis. Also offered as ABIZ 7950 in the Department of Agribusiness and Agricultural Economics. Students may not hold credit for ECON 7950 and any of: ABIZ 7950 or the former ECON 7900 (018.790) or the former ABIZ 7100 (061.710).

## Education - Ph.D.

Head: Z.M. Lutfiyya
Campus Address/General Office: 227 Education Building
Telephone: (204) 4747886
Fax: (204) 4747550
Email Address: edgradpr@umanitoba.ca
Website: umanitoba.ca/education
Academic Staff: Please refer to our website for Academic staff listing:umanitoba.ca/education

For information about graduate programs in the following units: Université de Saint-Boniface, Curriculum, Teaching and Learning, or Educational Administration, Foundations
and Psychology please refer to the table of contents for page numbers.

Education PhD Program Offerings,
Each year, the Faculty offers a cohort in a specified area of study. The Faculty also considers applications through an individualized, or "ad hoc" route. For more information, see our website http://umanitoba.ca/education/

## Ph.D. in Education,

 AdmissionIn addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, successful applicants must possess:

- an earned Master's degree from a recognized institution (The M.Ed. comprehensive route at the University of Manitoba is typically a terminal degree. That is, it is insufficient, in number and of itself, as evidence of research capacity for admission into the Ph.D. program in Education at the University of Manitoba);
- a minimum Grade Point Average of 3.0 in the last 60 credit hours;
- an appropriate academic background as defined by the program area to which admission is being sought; and
- appropriate research capability as evidenced by: a thesis from a recognized institution; a major research paper equivalent to a thesis from a recognized institution; an independently completed research article published in a refereed journal; or a research product equivalent to one of the categories above; and appropriate occupational experience such as: teaching in schools or nonschool settings; post-secondary teaching; practice in school counselling; psychology, or a similar helping profession; educational administration; administrative experience in a government department; or experience equivalent to one of the five categories above.

Admission to the Ph.D. in Education program is competitive. A combination of factors are taken into account in arriving at an admission decision: the applicant's previous academic background; the referees' assessments of the applicant; the ability of the faculty to provide the program of studies and research requested by the applicant; and the availability of a faculty member competent and willing to supervise the program of studies and research of the applicant.

The application deadline date for the Ph.D. in Education program is December 1, for admission in the following September.

## Program Requirements

## ACADEMIC CALENDAR

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students must complete a minimum of 24 credit hours of coursework. The minimum coursework is comprised of a minimum of 12 credit hours in the program area; a minimum of six credit hours in a cognate area; and a minimum of six credit hours of research methods/analysis. A minimum of 18 credit hours must be at the 7000 level. All courses taken in the Faculty of Education must be at the 7000 level or above. Courses taken outside the Faculty of Education must be at the 3000 level or above. A minimum of 12 credit hours of coursework must be taken in the Faculty of Education. Where relevant to the student's area of research and study, students are encouraged to take courses outside of the Faculty of Education of the University of Manitoba.

Residence Requirement: Ph.D. students must devote two terms at the University of Manitoba to full-time study. One term is Fall (September to December), Winter (January to April), or Summer (May to August). Students may not be employed full-time during their residency.

Second Language Reading Requirement: None
Expected Time to Graduate: 3 to 4 years for full-time studies

EDUC 7030 Doctoral Tutorial in Education Cr.Hrs. 3 (Formerly 124.703) A course of directed independent study relevant to a student's area of doctoral specialization. Prerequisite: GRAD 8010 (or 069.801) Candidacy Examination ( P ).

EDUC 7040 Current Issues in Mathematics Education Cr.Hrs. 6
(Formerly 124.704) An investigation of topics of current theoretical and practical significance in mathematics education. Students will be required to complete a series of explorations, typically involving observation or experimentation in the field, which will be the focus of discussion.

EDUC 7050 Doctoral Study in Education Cr.Hrs. 3 (Formerly 124.705) Directed study of contemporary research and theory in selected areas within the field of education. The content of this course will vary from year to year and will depend upon students' research interests.

EDUC 7060 Advanced Seminar in Educational Administration 1 Cr.Hrs. 3
(Formerly 124.706) A study of alternative conceptions of educational administration, from its origins as a field to the present. Attention will be given both to historical and contemporary theories of administration. Limited to Ph.D. students and compulsory for Ph.D. students with a focus in educational administration.

EDUC 7070 Advanced Seminar in Educational
Administration $2 \mathrm{Cr} . \mathrm{Hrs} .3$
(Formerly 124.707) A consideration of some of the central problems of contemporary social theory and their relationship to the study and practice of educational administration. The course is limited to Ph.D. students and is compulsory for Ph.D. students with a focus in educational
administration. Pre- or corequisite: EDUC 7060 (or 124.706) (C+).

EDUC 7080 Language and Rhetoric Education Cr.Hrs. 3 (Formerly 124.708) Current theories of language with a particular emphasis on concepts of education as discourse and instruction as a rhetorical activity. Prerequisite: admission into the Ph.D. program in Language and Literacy Education.

EDUC 7090 Language Arts Curriculum Cr.Hrs. 3 (Formerly 124.709) How current research, scholarship and theorizing in the areas of language, literature and curriculum studies can assist in developing fresh approaches to reconceiving the nature and purpose of the language arts curriculum as a linguistic, political and cultural enterprise. Prerequisite: admission into the Ph.D. program in Language and Literacy Education.

EDUC 7100 Reading Education Cr.Hrs. 3
(Formerly 124.710) Current trends, curricular issues and new concerns in reading education including the continuing tension between traditional and progressive ideologies. Identifies, from a historical perspective, what has changed, what has not and why; reflects on what is known and what to study; and sets a research agenda for the study of literacy. Prerequisite: admission into the Ph.D. program in Language and Literacy Education.

## EDUC 7110 Doctoral Seminar in Science

Education Cr.Hrs. 3
(Formerly 124.711) An exploration of current research, scholarship and thinking in science education as exemplified by key themes and current issues related to science and science education. Prerequisite: admission into the Ph.D. program in Science Education.

EDUC 7120 Current Issues in Science Education Cr.Hrs. 3 (Formerly 124.712) An examination of current issues in science education by way of selected topics tailored to individual students' programs and interests. Prerequisite: admission into the Ph.D. program in Science Education.

EDUC 7130 Language and Identity in Second Language Contexts Cr.Hrs. 3
(Formerly 124.713) An exploration of linguistic and cultural issues arising from the internationalization of English as a second language (ESL) teaching and learning, including current research of linguistic imperialism, linguistic human rights, cultural hybridization, sexual politics, and the feminization of speech. Prerequisite: EDUB 7210 (or 132.721) ( $\mathrm{C}+$ ) or permission of instructor.

## Educational Administration, Foundations and Psychology

## Educational Administration,

Email Address: edgradpr@umanitoba.ca
Website: http://umanitoba.ca/education
Please see our website for Academic
staff:http://umanitoba.ca/education
Academic Staff: Please see our website for Academic staff:http://umanitoba.ca/education

The Department of Educational Administration, Foundations, and Psychology offers specializations in the areas of adult and post-secondary education, educational administration, guidance and counselling, inclusive special education, and the social foundations of education.

## Fields of Research

The department is a leader in research in a variety of areas including: Equity and Education (race, gender, disabilities); school reform and school improvement; citizenship education; counselling; cross-cultural education; disability studies; and adult \& post-secondary/vocational education.
M.Ed. in Educational Administration, Foundations and Psychology,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, the Department of Educational Administration, Foundations and Psychology has the following admission application deadline dates (see below for the Guidance and Counselling specialization) and admission requirements:

| For sessions <br> starting | Canadian <br> applicants | International <br> applicants including |
| :--- | :--- | :--- |
| January | October 1 | US |

Guidance and Counselling has only one set of admission dates:
July/September February $1 \quad$ November 1
Applicants must possess:
a four-year Bachelor of Education degree, or two-year After Degree Bachelor of Education, or a four-year bachelor's degree (or academically equivalent degree/program) from an academic institution recognized by the Faculty of Graduate Studies, or a three-year undergraduate degree, plus a Post Baccalaureate Diploma in Education (PBDE) with 24-30 credit hours which includes at least 18 credit hours at the 5000 level or if taken outside of Education, 24-30 credit hours of upper level coursework which includes at least 12 credit hours but preferably 18 credit hours at the 4000 level. The total number of credit hours completed including the degree should be 120 credit hours;

- a grade point average of 3.0 or better in the last 60 credit hours of university coursework;
- normally, two years of relevant work experience; and
- appropriate academic and/or professional background for the program area and concentration.

The Guidance and Counselling and Inclusive Special
Education specializations require specific prerequisite coursework that must be completed prior to admission.

For individuals who graduate from the Certificate in Adult and Continuing Education (CACE), University of Manitoba complete the following courses:

- EDUA 1560 Adult Learning and Development (3)
- EDUA 1570 Foundations of Adult Education (3)
- EDUA 1580 Program Planning in Adult Education (3)
- EDUA 1590 Facilitating Adult Education (3)
- and an additional 100 hours of elective credit through courses, seminars, and workshops. The Faculty of Graduate Studies recognizes a complete CACE program as 15 credit hours towards the admission requirements for the M.Ed.; that is, giving 12 credit hours for the four core courses completed with a grade of 'B' or better and 3 credit hours (non assessable) for the 100 hours of elective study.

Individuals with a three year undergraduate degree and the four courses listed above must complete an additional 12 credit hours of senior level courses (i.e., 5000 level PBDE courses, 1000 or 2000 level B.Ed. courses, or courses at the 3000 level or above in other faculties) to have the 24 credit hours that are the minimal requirements for satisfying the "honours degree or equivalent" admission requirement. Those with the completed CACE would require an additional 9 credit hours of senior level courses.

Applicants should note that admission to the M.Ed. program is competitive. A number of factors are taken into account in arriving at an admission decision: (1) the capacity of the department to provide the program of study requested by the applicant; (2) the applicant's previous academic background and achievement; (3) the referees' assessment of the applicant; (4) the capacity of the department to provide the applicant with an advisor in the program area; and (5) the applicant's Statement in Support of their application, including relevant professional experience.

## Transfer of Credit

The granting of advanced credit is subject to the regulations of the Faculty of Graduate Studies and subject to approval of the advisor and department head.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations

## 

ACADEMIC CALENDAR 2012-2013 •

Section of this Calendar. The M.Ed. in Educational Administration, Foundations and Psychology has a thesisbased route and a course-based route. The M.Ed. comprehensive route at the University of Manitoba is typically a terminal degree. That is, it is insufficient, in number and of itself, as evidence of research capacity for admission into the Ph.D. program in Education at the University of Manitoba.

The following program requirements apply to all specializations in the Department of Educational Administration, Foundations and Psychology. Specific specialization requirements are listed under each specialization below.
M.Ed. programs have a maximum completion time of six years from the date of first registration. Not all courses are offered every year. The graduate course offering schedule is posted on the Faculty's website:
http://umanitoba.ca/faculties/education/media/graduate-future-courses.pdf. Although we offer many courses yearly, most of our courses are offered in the evening and those wishing to study full-time should consult with the Department Head.

Second Language Reading Requirement: None

Expected Time to Graduate: full-time: 2-3 years; part time: 4-5 years

## Program by Coursework and Thesis

- A minimum of 18 credit hours of coursework. At least 12 credit hours must be at the 7000 level or equivalent. The remaining 6 credit hours may be at the 5000 level or above, in the Faculty of Education and/or at the 3000 level or above in other faculties.
- As part of their coursework, students must take 3 credit hours of research methodology at the 7000 level in Education or 3000 level or above in other faculties.

Program by Coursework and Comprehensive Examination (Course-based)

- A minimum of 30 credit hours of coursework. At least 18 credit hours must be at the 7000 level or equivalent. The remaining 12 credit hours may be at the 5000 level, or above, in the Faculty of Education and/or at the 3000 level or above in other faculties.

## Adult and Post-Secondary Education Specialization

The specialization is designed to serve the professional needs of a diverse group of students in continuing, workplace and professional education development; college teaching, administration and student services; university teaching, student services, and administrative management; local and international community development, program delivery, and administration.

Admission and Program Requirements are listed above. Specific course requirements are as follows:

- Required courses: EDUA 7402, EDUA 7404 and EDUA 5800. Course-based students must also take EDUA 7408.

Thesis-based students will select 6 credit hours and coursebased students will select 9 credit hours from: EDUA 7406, EDUA 7412, EDUA 7414, EDUB 7416, EDUA 7420, EDUA 7810, EDUB 7390, EDUB 7420, EDUB 7430, EDUB 7450, EDUB 7460, EDUB 7560 or other courses approved by the advisor and department head.

Course-based students will also require 9 credit hours of electives to pursue their specific interests such as TESL, Nursing Education, Medical Education, etc.

## Educational Administration Specialization

The Master's Program in Educational Administration is designed to develop leadership for the province's school systems and to provide students with an in-depth and theoretical understanding of educational administration as both a moral and a technical endeavour.

Students in this program will benefit from their prior experiences as teachers or administrators in an educational organization. This experience need not be restricted to public schools. Experience is important because the program takes seriously the relationship between theory and practice in education.

## Provincial Certification

It is expected that all candidates in the Master's Program with a specialization in Educational Administration will attain provincial certification in Educational Administration (Level 2) by the time they complete their Master's degree. In some instances, this may require additional coursework. Certification is granted by Manitoba Education and not by the Faculty of Education or the University of Manitoba.

Admission and Program requirements are listed above. Specific course requirements are as follows:

- Required courses: EDUA 7010, EDUA 7050 and EDUA 5800. Course-based students must also take 3 credit hours from: EDUA 7200, EDUA 7210, EDUA 7270.
- Thesis-based students will select 6 credit hours, course-based students will select 12 credit hours from: EDUA 5040, EDUA 5100, EDUA 7020, EDUA 7030, EDUA 7040, EDUA 7060, or other courses approved by the program advisor and department head.

## Guidance and Counselling Specialization

The purpose of the Master's Program in Guidance and Counselling is to prepare counselling graduates who are able to integrate critical knowledge and understanding of the

## 

## ACADEMIC CALENDAR

2012-2013 •

## University of Manitoba

theoretical bases of counselling, the counselling process and outcome research, and current professional issues in counselling, with competent ongoing development of counselling skills. The model of training is scientistpractitioner with an emphasis on reflective practice.

Specifically, the graduate program is designed to help students with the development of generic skills of individual and group counselling; the capacity to conduct research and to interpret current research; a knowledge of the latest developments in counselling and literature in the field; education/training in group leadership and communication skills; a knowledge of career development, career information and job search skills; the principles, processes and methods of interviewing children, adolescents and adults; and the skills of measurement and evaluation.

The program provides an array of supervised practicum placements that support a more specialized experience to meet individual needs and interests. Graduates find employment in a wide range of settings, including schools, community agencies, clinics, hospitals, business and industry, rehabilitation centres, government service and private practice.

In addition to the admission and program requirements listed above, admission to the Guidance and Counselling specialization requires the following prerequisite coursework, which must be completed prior to beginning the M.Ed. program:

- A minimum of 9 credit hours of university coursework at the 5000 level or equivalent consisting of:
- EDUA 5480 Counselling Skills (3)
- EDUA 5500 Theories and Issues in School Counselling (3)
- EDUA 5540 Groups in Guidance (3)

For applicants who have attended the University of Manitoba, the prerequisite coursework can be fulfilled by taking the above courses. Applicants who have attended other universities can fulfil the prerequisite requirements by taking courses equivalent to the ones listed above; the alternate courses, however, will need to be approved by the Guidance and Counselling Area Group.

Specific course requirements for the Master's are as follows:

- Required courses: EDUA 7520*, EDUA 7550 and EDUA 5800.

Thesis-based students will select 3 credit hours and coursebased students will select 18 credit hours from: EDUA 7510, EDUA 7530, EDUA 7540, EDUA 7750, EDUA 7760. Coursebased students may also select approved electives at the 5000 level. (NOTE: EDUA 7750 requires advisor approval.)
*A three hour weekly seminar offered over fall and winter terms taken concurrently with a minimum of 180 hours of supervised practicum experience in a selected placement. Students are required to be available September to April
during the day for a minimum of one to one-and-a-half days per week for the practicum component.

## Inclusive Special Education Specialization

The Master's Program in Inclusive Special Education (ISE) is designed not only to develop skills needed to serve students with special needs directly, but also to develop leadership and research skills for assisting educators and other professionals working on behalf of persons with disabilities. To this end, the graduate courses are designed to enable graduate students to conduct research in a variety of formats and paradigms, to lead in the professional development of their colleagues, to foster program development at their workplaces, and to provide clinical or consultant services to classroom teachers. Courses in the program are focused on topics in inclusive special education as a profession, on applied learning theories and assessment of learning, on critical thinking, and on research methods and findings in this field. Graduates from the program work in a variety of callings: as administrators, clinicians, consultants, program leaders, resource and special education teachers. Many graduates also are active in research, educational program development, advocacy groups, teacher education and professional development.

In addition to the admission and program requirements listed above, admission to the Inclusive Special Education Specialization requires the following prerequisite coursework, which must be completed prior to beginning the M.Ed. program:

A minimum of 18 credit hours of university level coursework at the 5000 level or equivalent with a Grade Point Average of 3.0 (B) consisting of:

- EDUA 5600 Introduction to Inclusive Special Education (6)
- EDUA 5630 Assessment and Instruction in Inclusive Special Education (6); and

6 credit hours from:

- EDUA 5610 Field Experience in Inclusive Special Education (6)
- EDUA 5620 Teaching Children through Alternative and Augmented Communication (3)
- EDUA 5640 Inclusive Special Education: Early and Middle Years (3)
- EDUA 5650 Inclusive Special Education: High School and Transition to Adult Life (3)
- EDUA 5660 Organization and Delivery of Resource Program and Support Services (3)
- EDUA 5670 Strategies for Organizing Inclusive Classrooms and Schools (3)
- EDUA 5680 Promoting Responsible Behaviour in Educational Settings (3)

Specific course requirements for the Master's are as follows:

- Required courses: EDUA 7600 and EDUA 5800

## ACADEMIC CALENDAR 2012-2013 •

- Thesis-based students will select a minimum of 3 credit hours and course-based students will select a minimum of 6 credit hours from: EDUA 7610, EDUA 7630, EDUA 7650, EDUA 7740, EDUA 7750. (NOTE: EDUA 7740 and EDUA 7750 require advisor approval)
- In addition, thesis-based students will select a maximum of 3 credit hours and course based students will select a maximum of 15 credit hours from: EDUA 5610, EDUA 5620, EDUA 5640, EDUA 5650, EDUA 5660, EDUA 5670, EDUA 5680.
- Students may also choose from a variety of courses not directly related to special education, depending on their interests and career goals. Students should consult the Undergraduate and Graduate Calendars for course titles and brief descriptions: EDUA 5070, EDUA 5500, EDUA 5550, EDUA 5570, EDUA 5590, EDUA 5730, EDUA 5740, EDUA 5810, EDUA 5930, EDUA 7710, EDUA 7720, EDUB 5400, EDUB 5770, EDUB 7060, EDUB 7480

## Certification in Special Education

This provision may not apply to applicants with certification requirements in an allied non-teaching field or who are pursuing a M.Ed. in Inclusive Special Education after undergraduate work in an allied non-teaching field. It is expected that most students in the M.Ed. Program with specialization in Inclusive Special Education will attain provincial certification in special education by the time they complete their Master's degree. Students who already have provincial certification at the time of entry into the program will therefore not need to take any prerequisite coursework for this purpose. Those who do not already have provincial certification, however, should expect to take additional credit hours of coursework to fulfil this requirement. The precise number and nature of the additional work will depend on the prior academic background of the student, as well as on the specific courses taken to complete the M.Ed. degree. To assess the additional work needed informally, it is recommended that students consult with their Faculty Advisor early in their program, and also obtain and read a copy of the special education certification guidelines published by Manitoba Education. Official assessment of required coursework, however, can only be done by providing Manitoba Education with a complete set of academic transcripts and requesting a formal assessment from them. Certification is granted by Manitoba Education not by the Faculty of Education or the University of Manitoba.

## Social Foundations of Education Specialization

The aim of Social Foundations of Education is to develop educational researchers who are critical and reflective about educational theory and practice. Theories from the humanities and the social sciences will guide students as they examine, criticize, and explain the meanings, intents and the effects of education in both its institutional and noninstitutional forms.

The Master's Program in Social Foundations is designed to promote the understanding of normative educational thought and practice and to probe assumptions about education and schooling. The analysis is multi-dimensional and interdisciplinary.

Admission and Program requirements are those listed above. Specific course requirements are as follows:

- Required course: EDUA 5800
- Thesis-based students will select 6 credit hours and course-based students will select 9 credit hours from: EDUA 7200, EDUA 7210, EDUA 7270.
- Thesis-based students will also select 6 credit hours and course-based students will also select 18 credit hours from: EDUA 7230, EDUA 7240, EDUA 7250, EDUA 7270/7280, EDUA 7300, EDUA 7340; or
- All students may select courses chosen from the Faculty of Arts of the University of Manitoba or from other universities, in particular those within the Western Dean's agreement approved by the program advisor and department head.

EDUA 7010 Educational Administration as a Field of Study and Practice Cr.Hrs. 3
(Formerly 129.701) An overview of educational administration, focusing on a review of some of the main intellectual traditions in the study of educational administration and on an analysis of some of the forces which shape administrative practice. Not to be held with EDUA 7011 (or 129.701) or the former 116.731.

EDUA 7020 Politics of Education Cr.Hrs. 3
(Formerly 129.702) A review of the political features of educational organizations, with emphasis on value systems, community power structures, local government, and political change. Not to be held with EDUA 7021 (or 129.702) or the former 116.702.

EDUA 7030 Educational Finance Cr.Hrs. 3
(Formerly 129.703) Study of economic and financial aspects of education, with emphasis on costs and analysis of expenditures; sources and types of revenue; productivity and efficiency, planning and budgeting. Not to be held with EDUA 7031 (or 129.703) or the former 116.703.

EDUA 7040 Legal Aspects of Education Cr.Hrs. 3
(Formerly 129.704) Studies of legal issues in education. Not to be held with EDUA 7041 (or 129.704) or the former 116.704.

EDUA 7050 Theoretical Perspectives on Educational Administration Cr.Hrs. 3
(Formerly 129.705) A study of the main currents of organization theory and administrative thought and their implications for the study and administration of educational organizations. Not to be held with EDUA 7051 (or 129.705) or the former 116.705.

EDUA 7060 Organizational Planning and Development in
Education Cr.Hrs. 3
(Formerly 129.706) A review of approaches to planning and

## ACADEMIC CALENDAR

development in education. Major emphasis is placed on the systematic development of educational organizations. Not to be held with EDUA 7061 (or 129.706) or the former 116.709.

## EDUA 7070 The Analysis of Educational

Organizations Cr.Hrs. 3
(Formerly 129.707) The application of methods of organizational analysis to educational institutions. Not to be held with EDUA 7071 (or 129.707) or the former 116.710.

EDUA 7090 Seminar in Administrative Problems in Education Cr.Hrs. 3
(Formerly 129.709) Application of theoretical concepts in field situations. Not to be held with EDUA 7091 (or 129.709) or the former 116.706.

EDUA 7100 Topics in Educational Administration (Readings) 1 Cr.Hrs. 3
(Formerly 129.710) A readings course in topics of significance to educational administration.

EDUA 7110 Topics in Educational Administration (Field) 2 Cr.Hrs. 3
(Formerly 129.711) A projects and field study course in topics of significance to educational administration.

EDUA 7200 Philosophy of Education Cr.Hrs. 3 (Formerly 129.720) A study of the philosophic foundations of education. Emphasis will be given to various schools of philosophic inquiry as they relate to education and to contemporary philosophy of education issues. Not to be held with EDUA 7200 (or 129.720) and the former 116.735.

EDUA 7210 Educational Sociology Cr.Hrs. 3 (Formerly 129.721) An examination of the relationship between education and society, with particular attention to ethnicity, family, and socio-economic status and to the role of the school in the socialization process in the Canadian context. Not to be held with EDUA 7211 (or 129.721) or the former 116.736.

EDUA 7230 Social Criticism in Education Cr.Hrs. 3 (Formerly 129.723) A critical examination of education, giving special attention to various perspectives which challenge conventional interpretation of education and schooling. Students may not hold credit for both EDUA 7230 (or 129.723) and the former 116.738.

EDUA 7240 Values in Education Cr.Hrs. 3 (Formerly 129.724) Examines the place of values in education. It explores the notion of values, its pervasiveness in education, the approaches to values in education, and the trends and issues related to values in education. Not to be held with EDUA 7241 (or 129.724) or the former 116.732.

EDUA 7250 Comparative Education Cr.Hrs. 3 (Formerly 129.725) An analysis of educational systems and problems in selected environments in terms of social, political, economic, cultural and other contexts. Students may not hold credit for both EDUA 7250 (or 129.725) and the former 116.714.

EDUA 7270 Seminar in Cross-Cultural Education 1 Cr.Hrs. 3 (Formerly 129.727) A critical analysis of the social theories and research which form the basis of cross-cultural education. Not to be held with EDUA 7271 (or 129.727) or
the former 116.724.
EDUA 7280 Seminar in Cross-Cultural Education 2 Cr.Hrs. 3 (Formerly 129.728) A critical analysis of the approaches and research in cross-cultural education. Not to be held with EDUA 7281 (or 129.728) orthe former 116.725.

EDUA 7300 History of Canadian Education from
1867 Cr.Hrs. 3
(Formerly 129.730) A study of the historical development of education in Canada from 1867 to the present. Students may not hold credit for both EDUA 7300 (or 129.730) and the former 116.723.

EDUA 7330 Topics in Educational Foundations (Readings) 1 Cr.Hrs. 3
(Formerly 129.733) A reading and research course in topics of significance to educational foundations.

EDUA 7340 Seminar in Educational Thought Cr.Hrs. 3 (Formerly 129.734) Intensive studies of the works of selected educational theorists. Not to be held with EDUA 7340 (or 129.734) and the former 116.719.

EDUA 7402 Development of Adult Education and PostSecondary Education Cr.Hrs. 3
A survey structures, theory, philosophies, and curricula of educational systems for adults, as affected by cultural, political, religious, theological and institutional contexts both national and internationally. Not to be held with the former EDUA 7400 (29.740) or or the former EDUA 5400 (129.540).

## EDUA 7404 Lifelong Learning in Educational

Settings Cr.Hrs. 3
Explores recent issues, research, and theories about learning across the lifespan, with emphasis on adulthood, as learning is affected by cultural, political, and interpersonal contexts.

## EDUA 7412 Governance of Post-Secondary

Education Cr.Hrs. 3
This course examines the history of the governance of postsecondary institutions, the roles of stakeholders in governance, and factors influencing governance in postsecondary institutions today.

EDUA 7414 Seminar in the Administration of Post-
Secondary Education Cr.Hrs. 3
This course has as its focus the application of theoretical concepts of field situations. It will explore administrative skills and their application to selected issues of post-secondary education.

EDUA 7420 Program Planning in Adult Education Cr.Hrs. 3 (Formerly 129.742) Introduction to factors affecting the planning of programs for adults. Examination of various planning models in relation to principles of adult education. A consideration of theory with major emphasis on directions for planning a program for adults. Local examples will be used. Students may not hold credit for both EDUA 7420 (or 129.742 ) and the former 116.733.

EDUA 7510 Seminar in Current Issues in
Counselling Cr.Hrs. 3
(Formerly 129.751) Focus on research, theoretical and professional developments; critical contemporary issues;

## ACADEMIC CALENDAR

and specific social problems in counselling. Not to be held with EDUA 7511 (or 129.751) or the former 043.703.

EDUA 7520 Practicum Seminar in Counselling Cr.Hrs. 6 (Formerly 129.752) Supervised experience in both individual and group counselling. Attention is given to analysis of case studies using audio- and video-tapes. A minimum of 180 hours of counselling experience in placement situations is required. This course is graded pass/fail. Not to be held with EDUA 7521 (129.752) or the former 043.704. Prerequisite: EDUA 5480 or EDUA 5481 (129.548) (P) and permission of the instructor. Pre- or Corequisite: EDUA 7550 or EDUA 7551 or the former 129.755 (C+)

EDUA 7530 Group Counselling: Theory and Practice Cr.Hrs. 6
(Formerly 129.753) Study of theories, rationale, objectives, and research. Acquisition of an experiential understanding of group work through participation in class activities. Development of leadership skills in group counselling by conducting counselling groups under supervision. Not to be held with EDUA 7531 (or 129.753) or the former 043.718. Prerequisite: EDUA 5540 or EDUA 5541(or 129.554) or 043.512 and EDUA 5480 or EDUA 5481 (or 129.548) (P).

EDUA 7540 Programs in Career Development Cr.Hrs. 3 (Formerly 129.754) A practical course designed for helpers wishing a wider knowledge of career development programs. Participants will investigate and evaluate a wide variety of career counselling techniques and programs and will develop specific, innovative programs to meet the needs of their future counsellees. Not to be held with EDUA 7541 (or 129.754) or the former 043.719.

EDUA 7550 Theories of Counselling Cr.Hrs. 3 (Formerly 129.755) The objectives of counselling, assessment of counselling outcomes, theories of personality and counselling. Not to be held with EDUA 7551 (or 129.755 ) or the former 043.701 or 129.750.

EDUA 7600 Seminar in Inclusive Special Education Cr.Hrs. 6 (Formerly 129.760) A forum for the discussion of topics related to disability issues. Opportunity will be provided for students to examine issues related to their particular professional and scholarly needs. Not to be held with EDUA 7601 (or 129.760) or the former 043.705. Pre- or corequisite: 18 credit hours in Special Education at 5000 level or equivalent (C+).

EDUA 7610 Behavioural Issues in Educational
Settings Cr.Hrs. 3
(Formerly 129.761) A study designed to give teachers and school counsellors the necessary theoretical background as well as the practical tools to implement programs for children in conflict. Not to be held with EDUA 7611 (or 129.761) or the former 043.707. Pre- or corequisite: EDUA 5600 or EDUA 5601 (or 129.560 or 043.518 ) or EDUA 5680 or EDUA 5681 (or 129.568 or 043.542 ) (C+).

EDUA 7630 Advanced Assessment and Instruction in Inclusive Special Education Cr.Hrs. 3
(Formerly 129.763) An advanced study of diagnostic/prescriptive techniques used to ameliorate learning and behavioural problems in special education. Emphasis is on the development and analysis of related instructional delivery systems. Students may not hold credit for both EDUA 7630 (or 129.763) and the former 043.722.

Pre- or corequisite: EDUA 5630 or EDUA 5631 (or 129.563) (C+).

EDUA 7650 Field Experience in Inclusive Special Education Cr.Hrs. 6
(Formerly 129.765) A minimum of 200 hours of supervised placement in an inclusive special education setting.
Scheduled seminars facilitate directed study and discussion. This course is graded pass/fail. Prerequisite: 18 credit hours at the 5000-level in Inclusive Special Education or its equivalent (C+). Not to be held with EDUA 7651 (or 129.765) or the former 129.764 or 043.706 .

EDUA 7710 Development in Learning
Environments Cr.Hrs. 3
(Formerly 129.771) Explores recent advances in developmental psychology as they apply to learning in classrooms and other education-related settings. Emphasis will be given to cognitive change, but motivation and social skill development will also be considered as they relate to cognitive development. Students may not hold credit for both EDUA 7710 (or 129.771) and the former 043.724 or 043.708.

EDUA 7740 Topics in Educational Psychology 1 Cr.Hrs. 3 (Formerly 129.774) A reading and research course in topics of significance to educational psychology.

EDUA 7750 Topics in Educational Psychology 2 Cr.Hrs. 3 (Formerly 129.775) A reading and research course in topics of significance to educational psychology.

EDUA 7760 Interview Techniques with Children and Adolescents Cr.Hrs. 3
(Formerly 129.776) Focuses on the principles, processes and methods of interviewing and counselling individual children, adolescents, parents, school personnel and others. The course aims at integrating theory and practice involving diagnostic and therapeutic communication and observation of behaviour in natural situations with individual children. Not to be held with EDUA 7761 (or 129.776) or the former 043.717. Prerequisite: EDUA 5820 or EDUA 5821 (or 129.582 or 043.505 ) (C+), EDUA 5550 or EDUA 5551 (or 129.555 or 043.515 ) (C+), or EDUA 5480 or EDUA 5481 (or 129.548) (P) and EDUA 5490 or EDUA 5491 (or 129.549 or 129.556 or 043.516 ) ( P ).

EDUA 7800 Methods of Educational Research Cr.Hrs. 3 (Formerly 129.780) A study of design and data collection techniques for educational research in field settings. Topics covered include quasi-experimentation, survey and observational techniques, simulation, content analysis, and sociometry. Not to be held with EDUA 7801 (or 129.780) or the former 043.709. Prerequisite: EDUA 5800 or EDUA 5801 (or 129.580) or one of the former courses 129.680, 043.610 or consent of instructor.

EDUA 7810 Evaluating Educational Programs Cr.Hrs. 3 (Formerly 129.781) An introduction to current approaches to evaluating educational programs. A review of various evaluation methods/approaches, along with consideration of specific design, ethical, consulting and political issues will be the main focus of this course. Specific skills to be developed are the implementation of educational evaluations, data collection and analysis, and final report writing. Not to be held with EDUA 7810 (or 129.781) and the former 043.726.

## ACADEMIC CALENDAR

EDUA 7840 Qualitative Research Methods in
Education Cr.Hrs. 3
(Formerly 129.784) An introduction to qualitative research methods. While the theoretical underpinnings of qualitative research will be discussed, emphasis is placed on learning to conduct a study including design, collecting and analyzing data, and research ethics. Not to be held with EDUA 7841. Prerequisite: EDUA 5800 or EDUA 5801 (or 129.580) or 043.503 or equivalent (C+) and permission of the instructor.

EDUA 7850 Design and Analysis of Educational Research (Quantitative) Cr.Hrs. 3
(Formerly 129.785) A study of the use of quantitative methods of analyzing educational research data. Descriptive and inferential procedures commonly used in educational research will be discussed and students will learn to use statistical packages. The course will also address when it is appropriate to employ quantitative designs and present common designs and their associated analyses.
Prerequisite: EDUA 5800 (or 129.580) (C+). Students may not hold credit for both EDUA 7850 (or 129.785) and the former 129.681 or the former 43.535 or 43.611 .

EDUA 7860 Advanced Topics in Educational Research Cr.Hrs. 3
(Formerly 129.786) An advanced study of special topics in educational research with an in-depth study of specific topics which will change from year to year. Prerequisite: EDUA 5800 (or 129.580) (C+) and permission of the instructor. Students may not hold credit for both EDUA 7860 (or 129.786) and the former courses 129.783 or 043.711

EDUA 7870 Measurement and Evaluation in Schools Cr.Hrs. 3
(Formerly 129.787) An advanced study of the principles of measurement and evaluation and their application to teaching and learning in schools. Current issues in measurement and evaluation, including alternative forms of classroom assessment and standard setting, will be discussed. Prerequisite: EDUA 5810 or EDUA 5811 (or 129.581) or the former 043.301 ( $C+$ ) or equivalent, or consent of instructor.

## Website:

http://umanitoba.ca/faculties/engineering/departments/ece/a dmissions.html
Academic Staff:
http://www.ece.umanitoba.ca/people/academics

Please do not contact professors, instead fill-in the Student Information Form found at
http://www.ece.umanitoba.ca/node/add/gs-preapplication to find an advisor. Information you included in this form is sent to faculty members weekly -- it is recommended that you
have a supervisor before formally applying to the ECE Graduate Program.

- You MUST list at least one(1) faculty member with whom you wish to study otherwise your paperwork will not reach a faculty member
- You MUST describe your research interest
- DO NOT put TBD or TBA (et.al.) in either the faculty member or research interest area -- no one will read your information
- Also please do list every faculty member on your Information Form. Please select a research area and one or two professors which best fit your research.
- Please fill-in the Student Information Form as if you were filling in a Statement of Intent and/or CV -- this is the only chance you will have to present yourself to a faculty member. Please refrain from extraneous information
- If a faculty member is interested in what you have written then he/she will contact you and ask you to formally apply with the Faculty of Graduate Studies -- this may take up to 6 weeks.

The department offers programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy. The department has well equipped research and teaching laboratories. Students may select either a specialized research-oriented activity, an interdisciplinary program, or collaboration with industry or research centres in Canada.

Fields of Research

The areas of research in the department which are internationally recognized include: applied electromagnetics; atmospheric optics; biomedical engineering; communications engineering; computer architecture and software systems; microelectronics; power apparatus and systems engineering; signal and image processing.

## Research Facilities

The Applied Electromagnetics Laboratories are far the most comprehensive and modern antenna measurement facility of any university nationally and internationally. It consists or eight different test systems housed in three different anechoic chambers. The unique feature of this facility is in its ability to test small and very large antennas in a controlled indoor environment, from 500 MHz to 110 GHz , using conventional Far-Field system, the Compact-Test Range and Near-Field to Far-Field transformation. The test systems include: A large 16ft Compact-Range for testing antennas as large as 6 ft and up to 50 GHz , A high precision millimetre wave Compact-Range up to 110 GHz, A conventional FarField Range up to 50 GHz , A triple linear-cylindricalspherical Near-Field Range, A 16-probe Starlab Range for rapid measurements, A 110 GHz Network Analyzer for network characterization, and a small Far-Field range for educational tests.

## ACADEMICCALENDAR

The merger of biology with engineering sciences and the creation of biomedical engineering has brought innovation to the practice of medicine that could only be dreamed about a decade ago. By many accounts, we are now at the outset of the Biomedical Century and the need for engineers trained in biomedicine is greater than ever. Biomedical Engineering research is interdisciplinary by nature and therefore involves close collaboration with other departments and faculties in the University of Manitoba and associated hospitals. The centre of our activity, however, is the Biomedical Acoustic and Motor Control Laboratory and Biomedical Photonics Laboratory within the Electrical and Computer Engineering department. The Acoustic and Motor Control Laboratory is equipped with biological instrumentation amplifiers/filter, different sensors, acoustic chamber as well as a 2DOF robotic arm, an EEG recording system, and a large network of computers. The Biomedical Photonics Laboratory houses optical test and measurement equipment, various laser sources as well as advanced setups for high-resolution nonlinear microscopy, spectroscopy and optical coherence tomography of biological samples.

Software Systems is an area that represents a strong research program in the Department. The VLSI laboratory is an important component of the research program in Computer Engineering, as well as supporting research areas in Electrical Engineering such as electronics, signal processing and communications. The laboratory includes a network of Sparc workstations for research and education. The laboratory has access to the fabrication of chip designs, via the Canadian Microelectronics Corporation. The current implementation technologies are full-custom CMOS, FPGAs, and integrated sensors. Software CAD packages available include CADENCE, simulators for Neural Networks and many standard university programs such as circuit and logic simulators. There are also facilities for experimental work with mobile robots.

The Computational Intelligence (CI) Laboratory has a collection of robots (a number of individual hexapod, crawling and tractor robots). In addition, the CI Laboratory has seven Intel core 2 PCs, 9 large LCD displays, 7 UPS surge protection power supplies, Wii game controller, two Bamboo tablets, one MacPro laptop, one Lenovo X200 tablet, one HP non-colour printer and one HP 3-way printer. This equipment is used in the design of intelligent systems (both hardware and software) using a number of technologies associated with computational intelligence, namely, Cantor sets, fuzzy sets, near sets, rough sets, neural networks, and evolutionary computing. This research laboratory has its own web page at http://wren.ee.umanitoba.ca, that includes access to various research registries and downloadable reports,publications as well as software systems designed in this Laboratory.

The Power Systems and Machine Laboratories are well equipped with several workstations, a real time digital power system simulator (developed at the HVDC Research Centre), a large variable frequency supply, and several well instrumented machine sets. Facilities for developing DSPbased controllers and protection devices are available. The McMath High Voltage Power Transmission Research Laboratory is the largest of its kind amongst Canadian universities and is equipped with generating and measuring
apparatus, including digital data acquisition systems for research on insulation, HV phenomena and diagnostics.

The Data and Signal Compression Laboratory has dedicated and network computers, a high resolution scanner, a video capture facility, a digital camera, a CD-ROM mastering system, and an FPGA development facility. It also has access to a large ATM facility for research.

The Microprobe and Microfabrication Laboratory is a wellequipped laboratory with three faculty members. Topics of interest include scanning probe microscopy, micromachining and microfabrication, semiconductor manufacturing, and high frequency microelectronics and microwave circuit testing. Probe microscopy systems include tunnelling (STM), ultra high vacuum STM, atomic force (AFM), resistive (SRM), capacitive (SCM), and dynamic electrostatic force microscopes used for in situ IC testing. CAD platforms include a number of workstations. CAD tools used are Cadence, L-EDIT and MEMSPro for IC design, and Libra, Spice, Ensemble and HFSS for high frequency modelling RF test equipment includes 50 GHz sampling scopes, a 6 GHz Network Analyser and on-wafer probing facilities. Microfabrication capabilities include a cleanroom, thermal evaporation, 3 inch mask aligner, wet etching, oxidation furnaces, electroplating, UHV system, and an inspection microscope. A 1000 sq. foot cleanroom, 6 inch two-sided mask aligner, ICP plasma etching, XeF2 etching, RF sputtering, E-beam evaporation, Alpha-Step surface profiler, 50 GHz millimetre wave probe station, and a wafer saw.

## M.Sc. in Electrical and Computer Engineering, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, a student must normally hold a B.Sc. degree in Electrical or Computer Engineering (or its equivalent) from a recognized university or related fields of study approved by the Department and prospective advsior, from a recognized university. The University minimum GPA requirement for entrance is 3.0 ; the Department minimum GPA requirement for entrance is 3.5 .

## Application Deadlines

Potential M.Sc. students should complete the online Student Information Form for Potential Graduate Students (http://www.ece.umanitoba.ca/node/add/gs-preapplication) prior to making a formal application to the department.

- Canadian/U.S. students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least four(4) months prior to their intended start date.
- International students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least eight(8) months prior to their intended start date.

## 

ACADEMIC CALENDAR

## Program Requirements

In keeping with the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, the M.Sc. program in Electrical and Computer Engineering requires a minimum of 18 credit hours of advisor-approved course work as follows:

- REQUIREMENT: 12-credit hours at, or above the 7000 level
- At least 12 of the 18 credit hours must be from the ECE Department
- ELECTIVES: 6-credit hours (your elective) must be at or above the
- 300/3000 Level -- if taken from a Department Other then ECE (computer science, physics, math, mechanical engineering, etc.)
- 400/4000 Level -- if taken in ECE Department
- THESIS: An M.Sc. thesis, which is based on research work normally carried out at this university, is required.
- GRADCON: All full-time M.Sc. students are also required to present a paper, at least once during their program, at the Department's annual graduate student conference, as outlined at the website
http://www.ee.umanitoba.ca/~gradcon/.

For complete supplemental regulations on the M.Sc. program in Electrical and Computer Engineering, see website: http://www.ece.umanitoba.ca/msc.

Graduate Record Examiniation: Not Required

Second language reading requirement: NONE

Expected time to graduation: Two Years
M.Eng. in Electrical and Computer Engineering, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, a student must normally hold a B.Sc. degree in Electrical or Computer Engineering (or its equivalent) or related fields of study approved by the Department and prospective advsior, from a recognized university. The University minimum GPA requirement for entrance is 3.0; the Department minimum GPA requirement for entrance is 3.5 .

## Application Deadlines

Potential M.Eng. students should complete the online Student Information Form for Potential Graduate Students (http://www.ece.umanitoba.ca/node/add/gs-preapplication) prior to making a formal application to the department.

- Canadian/U.S. students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least four(4) months prior to their intended start date.
- International students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least eight(8) months prior to their intended start date.

## Program Requirements

This program is meant to satisfy the particular needs of students and practicing engineers wishing to extend their studies on a broad basis of coursework and an engineering project.

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The M.Eng. program in Electrical and Computer Engineering requires a minimum of 24 credit hours of advisor-approved course work as follows:

- MINIMUM: Nine(9) credit hours at or above the 700/7000 level from the ECE department
- MAXIMUM: Nime(9) credit hours of elective courses from
- the ECE department at or above the 400/4000 level AND a maximum of 12 credit hours from other departments at or above the 300/3000 level
- In exceptional cases, the student may be allowed to take 200/2000 level courses from other departments if preapproved by the student's advisor
- PROJECT: In addition, the student is required to complete an advisor-approved engineering project and proposal. The effort involved in this project should be at least the equivalent of $\operatorname{six}(6)$ credit hours of coursework.

For complete supplemental regulations on the M.Eng. program in Electrical and Computer Engineering, refer to the website http://www.ece.umanitoba.ca/meng

Graduate Record Exam (GRE): Not Required

Second language reading requirement: NONE

Expected time to graduation: Two Years

Ph.D. in Electrical and Computer Engineering,

## 

## ACADEMIC CALENDAR

## Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, a student must normally hold a Master of Science degree in Electrical or Computer Engineering, or related fields of study approved by the Department and prospective advsior, from a recognized university. The University minimum GPA requirement for entrance is 3.0 ; the Department minimum GPA requirement for entrance is 3.5 .

Provisional acceptance of students nearing completion of the M.Sc. degree in Electrical or Computer Engineering may be considered with a minimum University of Manitoba equivalent GPA of 3.0.

## Application Deadlines

Potential Ph.D. students should complete the online Student Information Form for Potential Graduate Students (http://www.ece.umanitoba.ca/node/add/gs-preapplication) prior to making a formal application to the department.

- Canadian/U.S. students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least four(4) months prior to their intended start date.
- International students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least eight(8) months prior to their intended start date.

In exceptional cases, a transfer into the Ph.D. program from the M.Sc. program may be recommended for students holding a B.Sc. degree in Electrical or Computer Engineering or related field approved by the advisor and department, provided the following conditions are met:
http://www.ece.umanitoba.ca/phd transfer

- If preliminary admission into a Master's program is being recommended by the advisor with the intention of reviewing the student's status for possible upgrading to a Ph.D. admission; transfer must be indicated on the student's application form at the time of admission otherwise, the student will be required to pay both M.Sc. and Ph.D. program fees.

## Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. The Ph.D. program in Electrical and Computer Engineering depends on student classification as follows:

- M.Sc. degree in Electrical or Computer engineering and who have been admitted directly into the Ph.D. program
- minimum of 12 credit hours of Advisory Committee-approved course work is required
- 700/7000 level or higher
- at least 9 of the 12 credit hours must be from the ECE Department
- B.Sc. degree in Electrical or Computer Engineering and who are
- recommended for transfer into the Ph.D. program from the ECE M.Sc. program at this university
- minimum of 24 credit hours of Advisory Committee-approved course work is required
- 8 credit hours MUST be at or above the 7000 level
- 6 credit hours may be
- Other Dept: at or above the 3000 level from OR
- ECE Dept: 4000 level elective courses from the ECE department
- $\quad 15$ of the 24 credit hours MUST be from the ECE Dept.
- Credit may be given for approved course work completed at the M.Sc. level
- Transfered from the M.Sc program
- Please see info at
http://www.ece.umanitoba.ca/phd transfer -- This method offers 3 additonal methods of entrance and record keeping
- With an M.Sc. degree and declared on Admissions form
- With an M.Sc. degree, but not decclared on Admissions form
- Without an M.Sc. -- transferring to the ECE Ph.D. program from the ECE M.Sc. program

## For all other categories of students

- a minimum of 18 credit hours of advisory committee-approved course work is required
- of which 12 credit hours must be at or above the 700/7000 level
- the balance of 6 credit hours must be at or above the 300/3000 level from other

## ACADEMIC CALENDAR

departments or 400/4000 level elective courses from the ECE department

- at least 12 of the 18 credit hours must be from this Department.
OTHER REQUIREMENT OF THE PH.D. PROGRAM INCLUDE:
- A Ph.D. thesis, which is based on research work normally carried out at this university, is required.
- All full-time Ph.D. students are also required to present a paper AND poster every year at the department's annual graduate student conference, as outlined at the website:
http://www.ece.umanitoba.ca/gradcon

For complete supplemental regulations on the Ph.D. program in Electrical and Computer Engineering, refer to the website http://www.ece.umanitoba.ca/phd

Graduate Record Exam (GRE): Not Required

Second language reading requirement: NONE

Expected time to graduation: 3.5 Years

## Electrical and Computer Engineering -7000 Level

ECE 7010 High Voltage Techniques and Insulation Design Criteria Cr.Hrs. 3
(Formerly 024.701) Laboratory generation and measurement techniques related to ac and dc high voltages, conventional and steep front high voltage pulses, composite voltages and pulsed currents. Charge measurements. Test techniques for assessing insulation quality and life.

ECE 7020 Power Transmission Lines: Phenomenon and Insulation Design Cr.Hrs. 3
(Formerly 024.702) High voltage dc, ac and hybrid transmission line corona modes, electrostatic and ionized field calculations, field effects of overhead transmission lines. Surge propogation including corona effect.
Transmission line insulation design to withstand normal/abnormal voltages and conditions. Modern and conventional arrestors. Principles and practice of insulation coordination.

ECE 7030 Advanced Electrical Machines Cr.Hrs. 3 Magnetically-coupled circuits, energy conversion principles, field generation in ac machines, windings and inductances, reference frame theory, dc machine and dc drives, scalar control of induction machines, vector control of induction machines, drives for special machines.

ECE 7040 Signal and Data Compression Cr.Hrs. 3 (Formerly 024.704) The course presents the theory of signal and data compression with their applications in engineering, including lossless compression (Shannon-Fano, Huffman, arithmetic and dictionary) and lossy compression, including
scalar and vector quantization. References to sub-band and transform coding (wavelets and fractal) and analysissynthesis coding will be made.

ECE 7050 Switching and Automata Theory Cr.Hrs. 3 (Formerly 024.705) The course presents basic material in discrete mathematics and the theory of switching circuits. It provides electrical and computer engineering students with a firm basis in the modern theory of logic design, and illustrates some applications through formal characterization of combinational functions and sequential machines, using contemporary techniques for the automatic synthesis and diagnosis of digital systems.

ECE 7060 Power system Protection Cr.Hrs. 3 (Formerly 024.706) History and philosophy of power system protection; typical protection schemes; instrument transformers; protection hardware and application; hardware testing techniques; software models and their use in simulation studies.

ECE 7070 Power System Analysis Cr.Hrs. 3
(Formerly 024.707) Power system operation; load flow analysis; transient stability modeling and simulation using the classical model; detailed machine models for transient stability analysis, modeling of exciters, governors, and FACTS devices for transient stability analysis; methods of transient stability analysis; voltage stability concepts and assessment.

ECE 7072 Advanced Power Electronics Cr.Hrs. 30
AC/DC and DC/DC converters, switching functions, voltage source converters, advanced PWM techniques, analytical modeling and simulation, control system design, applications of power electronics in motor drives and power systems, additional topics of current interest.

ECE 7076 Advanced Electric Machines and Drives Cr.Hrs. 3 Magnetically-coupled circuits, energy conversion principles, field generation in ac machines, windings and inductances, reference frame theory, dc machine and dc drives, scalar control of induction machines, vector control of induction machines, drives for special machines.

ECE 7170 Queueing Systems for
Telecommunications Cr.Hrs. 3
Applied stochastic models for queuing systems; analysis of queueing models using matrix-analytic methods and also traditional transform based approaches. Course will focus on applications; how to develop models that represent real communication network problems and how to analyze them.

ECE 7180 Embedded Systems Engineering Cr.Hrs. 3 (Formerly 024.718) A Structured approach to the design of modern digital systems is presented with specific emphasis on embedding computer applications. Topics will include the formal methodology of digital design together with selected topics from the current research literature

ECE 7190 Micromachining and MEMS Technology Cr.Hrs. 3 (Formerly 024.719) The course focuses on micromachining and micro-electro-mechanical systems (MEMS). Topics include microfabrication technologies, microactuators, and microsensors. Applications to optical, electrical, mechanical, chemical, and biological systems are discussed.

ECE 7200 Advanced Wireless Communication Cr.Hrs. 3 (Formerly 024.720) The course covers several advanced issues in wireless communication networks. Topics of study will include trends and future of mobile computing, advanced wireless technologies, multimedia wireless LANs, wireless ad hoc networks, energy mgmt, channel coding, privacy issues in wireless networking. Prerequisite: Either ECE 4250 (or 024.425) or ECE 4700 (or 024.470)

ECE 7202 Cognitive Wireless Networks Cr.Hrs. 3 The course will address both the theoretical concepts and system-level implementation issues for cognitive wireless networks. The topics covered will include informationtheoretic analysis of cognitive radio systems, challenges and issues in designing cognitive radio systems, architectures and protocols for cognitive wireless networks, distributed adaptation and optimization methods, channel allocation cognitive machine learning techniques, interoperability issues, cross-layer optimization of cognitive radio systems, and applications of cognitive radio networks.

ECE 7204 Queueing Systems for
Telecommunications Cr.Hrs. 3
Applied stochastic models for queueing systems; analysis of queueing models using matrix-analytic methods and also traditional transform-based approaches. Course will focus on applications; how to develop models that represent real communication network problems and how to analyze them.

ECE 7210 Fractal and Chaos Engineering Cr.Hrs. 3 (Formerly 024.721) This course presents the general theory of fractals and their applications in engineering, including fractal modelling of complex phenomena, such as dielectric discharges, and fractal image compression. It also relates fractals to chaos and dynamics.

ECE 7220 Topics in VLSI Test and Fault Tolerance Cr.Hrs. 3 (Formerly 024.722) Faults and fault models for VLSI. Test generation algorithms. Design for testability: scan design for sequential circuits; built-in test; testable PLA design. Totally self-checking logic. Fault tolerance in VLSI: yield and performance enhancement throughredundancy. System level diagnosis: applications to VLSI processor arrays.

ECE 7230 Artificial Neural Circuits and Networks Cr.Hrs. 3 (Formerly 024.723) Examination of electronic neural networks and related computational systems, both from a circuit theory and from a system-theory perspective. Digital and analog VLSI implementations of neural systems are presented and compared. Connections with other systems from physics, biology and computer science are made.

ECE 7240 Signal Theory Cr.Hrs. 3
(Formerly 024.724) Representation and analysis of deterministic signals: Continuous and Discrete; Random processes and spectral analysis; Bandlimited signals and systems.

ECE 7250 Information Theory and Applications Cr.Hrs. 3 (Formerly 024.725) Development of information theory and the engineering implications for the design of communication systems and other information handling systems.

ECE 7260 Broadband Communication Networks Cr.Hrs. 3 This course provides fundamentals for designing and analyzing broadband communication networks. The major content includes: structure and organization of broadband
communication networks, typical protocols and technologies applied in broadband communication networks mathematical network modeling, and performance analysis. Prerequisite: Undergraduate level Probability Theory \& Random Processes.

ECE 7270 Scattering and Diffraction of Electromagnetic Waves Cr.Hrs. 6
(Formerly 024.727) Formulation and analysis of scattering problems by classical methods. Radar cross section of smooth bodies by geometrical and physical optics. Diffraction by edges. Impedance and Leontovitch boundary conditions.

ECE 7280 Static Compensation in Power Systems Cr.Hrs. 3 (Formerly 024.728) Requirements for Static Compensation in Power Systems. The thyristor controlled reactor (TCR) and thyristor switched capacitor (TSC). Advanced GTO thyristor compensators. Operation and control of compensators. Load Compensation, filter design and specifications.

ECE 7310 Power System Transient Simulation Cr.Hrs. 3 (Formerly 024.731) Methods of Network Equation Formulation; Modeling of network nonlinearities and transmission lines; Modeling of electrical machines and controls.

ECE 7320 Sampled-Data Control Systems Cr.Hrs. 3 (Formerly 024.732) Analysis and design of discrete-time systems, compensation to improve stability and performance, introduction to digital logic control.

ECE 7330 Experimental Methods for Electronic Materials Cr.Hrs. 3
(Formerly 024.733) Methods for growing and analyzing electronic materials. Growth will include chemical vapour deposition, diffusion, and plasma processing. Analysis will include capacitance, voltage and current voltage techniques.

ECE 7370 Memory Devices and Systems Cr.Hrs. 3 (Formerly 024.737) Review of computing system architectures. Memory structures and implementations: static, dynamic, synchronous, asynchronous, single and multiport. Testability of memories. Smart memories. Memories for VLSI: configurable and reconfigurable. Case studyof a CMOS self-synchronizing RAM.

ECE 7400 Neural Nets and Neurocomputing Cr.Hrs. 3 (Formerly 024.740) Foundations of neural networks. Basic architecture and different structures. Associative networks. Mapping networks. Spatio-temporal networks. Learning and adaptability. Supervised and unsupervised learning. Stability. Adaptive resonance networks. Self-organization. Examples of existing systems. Applications.

ECE 7410 Phased Array Antennas Cr.Hrs. 3 (Formerly 024.741) Linear and Planar Arrays Theory; Pattern Synthesis Techniques, Analysis and Design of Radiating elements, Phase Shifters and Beam-Forming Network; Scanning Techniques; Effect of phase, amplitude and mechanical errors on Array Performance.

ECE 7430 Experimental Methods of Microwave
Engineering Cr.Hrs. 3
(Formerly 024.743) Methods for determining: scattering parameters; insertion, mismatch and return loss; cavity

## ACADEMIC CALENDAR

parameters. Detector and mixer performance characteristics. Power measurement. System noise determination. Antenna radiation pattern and gain measurements.

ECE 7440 Current Research Issues in Electrical
Engineering Cr.Hrs. 3
(Formerly 024.744) Presentation of important research developments in the area of Electrical Engineering, selected to complement other established graduate courses. Approval of the head of the department is required to register for this course.

ECE 7450 High Frequency Integrated Circuit Design and Analysis Cr.Hrs. 3
(Formerly 024.745) Monolithic microwave integrated circuit fabrication and circuit design techniques. Analysis and modeling of microwave passive components and GaAs active devices. High frequency circuit simulation techniques. Basic circuit examples.

ECE 7460 Real time Process Engineering Cr.Hrs. 3 (Formerly 024.746) Identification, description, and analysis of the behaviour of systems of real-time communicating processes, and the application of real-time process algebras in the design of hardware and software systems.
Prerequisite: COMP 3430 (or 074.343).
ECE 7540 Selected Topics of Solid State
Electronics Cr.Hrs. 3
(Formerly 024.754) Homojunction and heterojunction phenomena; Gunn effect, organic semiconductors, properties of thin films, quantum electronic devices, space charge limited current devices, and newly developed solid state electronic devices.

## ECE 7560 Topics in Signal Compression and

 Coding Cr.Hrs. 3This course covers selected topics in signal compression with emphasis on recent advances: theory and practice of quantization, introduction to rate distortion theory, principles of predictive coding, transform coding and trellis coding, applications, emerging topics including joint souirce-channel coding, multiple description coding and distributed source coding.

ECE 7590 Telecommunication Networking Cr.Hrs. 3 (Formerly 024.759) This course will cover issues in the design and analysis of telecommunication networks and systems in terms of physical implementation, protocols, routing algorithms, management, software interfaces, and applications. Focus will be on high speed LAN, WAN and Telecommunication networks using a systems engineering perspective. Prerequisites: although no prerequisites are required, either course ECE 4250 (or 024.425) or COMP 4300 (or 074.430) would be recommended.

ECE 7650 Current Research in Computer
Engineering Cr.Hrs. 3
(Formerly 024.765) Presentation of important research developments in the area of Computer Engineering, selected to complement other established graduate courses in this area.

ECE 7660 Logic Problem Solving Cr.Hrs. 3 (Formerly 024.766) Introduction to declarative techniques in symbolic problem solving with emphasis on relational representations, query construction, and recursive
formulations of knowledge structures in engineering.
ECE 7670 Optimization Methods for Computer-aided Design Cr.Hrs. 3
(Formerly 024.767) Constrained optimization of functions of several variables. Optimization methods suitable for the solution of engineering problems by modern digital computers. Both gradient and direct search methods are included.

ECE 7680 Dielectric Properties and Phenomena Cr.Hrs. 3 (Formerly 024.768) Elementary structure of matter, polarization, response of dielectrics to static and periodic fields, ionization and decay processes, electrical breakdown of gases, liquids, and solids.

ECE 7700 Nonlinear Systems Analysis 1 Cr.Hrs. 3 (Formerly 024.770) Introduction to nonlinear phenomena; linearization; state-space methods - quantitative and qualitative; introduction to the principal methods of determining stability.

## ECE 7720 Optimal Control 1 Cr.Hrs. 3

(Formerly 024.772) Introduction to optimal control systems; topics will include statement of the control problem, controllability, calculus of variations, Pontryagin's Maximum Principle, and design of optimal controls.

ECE 7740 Physical Electronics 1 Cr.Hrs. 3
(Formerly 024.774) Fundamental principles. Wave mechanics, statistical mechanics, structure of matter, free electron theory and electron emission, band theory of solids, electrical conduction, and transport phenomena.
Prerequisite: ECE 3600 (or 024.360) or equivalent.
ECE 7750 Physical Electronics 2 Cr.Hrs. 3
(Formerly 024.775) Properties of materials. Semiconductors, junction phenomena; ferroelectrics, magnetic materials, superconductivity, optical processes, effects of radiation. Prerequisite: ECE 3600 (or 024.360) and ECE 4190 (or 024.419 ) or equivalent.

ECE 7780 Microwave Circuits Cr.Hrs. 3
(Formerly 024.778) Circuit properties of microwave transmission systems. Matrix representation and analysis of microwave networks, microwave junctions, resonators, and impedance matching networks.

## ECE 7810 Solution of Fields by Numerical Methods

 1 Cr.Hrs. 3(Formerly 024.781) Numerical integration, differentiation. Finite-difference solutions of the Poisson, Laplace and Helmholtz equations. Initial-value problems. The eigen problem. Examples chosen from electromagnetic, thermal, fluid-flow, stress, and other fields.

ECE 7880 Distributed Energy Generation Cr.Hrs. 3
Rationale for distributed generations (DG); Distributed electricity generation technologies (Thermal and Renewable); Availability of renewable energy resources; Technical and economic evaluation of DG projects; DG grid integration and protection issues; Interconnection standards Microgrids. Prerequisite: Energy Systems I or equivalent course.

ECE 7890 Power System Control Cr.Hrs. 3 (Formerly 024.789) The application of modern systems

## ACADEMIC CALENDAR

engineering methods to power system problems.
ECE 7920 Human Physiology for Engineers Cr.Hrs. 3 (Formerly 024.792) The analysis and measurements of human physiological systems. Anatomical descriptions are limited to those required to support the functional analysis. Mathematical modeling is reinforced by analog and digital computer models.

ECE 7990 HVDC Transmission 1 Cr.Hrs. 3 (Formerly 024.799) Rectifier-inverter fundamentals. Compounding and regulation. Grid firing control systems. Reactive power requirements. Ground return and electrode design. Transmission lines. Economics and efficiency.

## Electrical and Computer Engineering -8000 Level <br> ECE 8000 HVDC Transmission 2 Cr.Hrs. 3

(Formerly 024.800) Protection. Harmonics: telephone interference. Corona: radio and television interference. Analytical methods. Conversion equipment, the use of solid devices. Selected topics from current literature. Prerequisite: ECE 7990 (or 024.799).

ECE 8010 Advanced Network Synthesis Cr.Hrs. 3 (Formerly 024.801) Mathematical treatment of various approximation techniques, matrix transformation methods applied to equivalent networks of minimum sensitivity or other criteria, theory of multivariable functions, lumpeddistributed network synthesis.

ECE 8050 Topics in Microelectronics Cr.Hrs. 3 (Formerly 024.805) Equilibrium and non-equilibrium processes in semiconductors, properties of junctions and thin films, carrier transport phenomena, effects of traps, and selected topics pertinent to recent literature in microelectronics.

ECE 8110 Digital Systems Design Cr.Hrs. 3 (Formerly 024.811) Fixed-instruction-set microprocessor design; microprogramming, bit-slice based design; parallel processing and multiprocessing; applications to data acquisition, data logging, and data communications.

ECE 8130 Statistical Communication Theory Cr.Hrs. 3 (Formerly 024.813) Representations of random pro--cesses; signal detection and estimation techniques.

ECE 8140 Digital Communications and Coding Cr.Hrs. 3 (Formerly 024.814) Fundamentals of information theory; source and channel coding; digital modulation techniques.

ECE 8150 Digital Signal Processing Cr.Hrs. 3 (Formerly 024.815) Discrete-time linear system theory, digital filter design techniques, discrete Fourier transforms including FFT, discrete Hilbert transform, Walsh-Hadamard transforms high-speed convolution and correlation techniques.

ECE 8160 Digital Filters Cr.Hrs. 3
(Formerly 024.816) Theories, techniques and procedures used to analyze, design and implement digital filters in both software and hardware.

ECE 8190 Topics in Antenna Theory and Design Cr.Hrs. 3 (Formerly 024.819) Antennas as a boundary value problem, antenna parameters, analysis and synthesis methods, antenna measurements.

ECE 8200 Advanced Engineering
Electromagnetics Cr.Hrs. 3
(Formerly 024.820) Solution of wave equation; special theorems and concepts, computer aided analysis.

ECE 8210 Power Electronic Circuits Cr.Hrs. 3
(Formerly 024.821) Thyristor properties, ac controllers, controlled rectifiers, dc to dc converters (choppers), and inverters. Permission of instructor required. Credit not to be held with ECE 4370 (or 024.437).

ECE 8220 Digital Image Processing Cr.Hrs. 3
(Formerly 024.822) Digital representation of images. Twodimensional operations and transforms. Image enhancement, restoration, and coding. Reconstruction from projections. Prerequisite: ECE 3580 (or 024.358 ) or equivalent desirable.

ECE 8230 Pattern Recognition and Scene Analysis Cr.Hrs. 3 (Formerly 024.823) Supervised and unsupervised learning techniques. Linear discriminant analysis. Scene analysis methods.

ECE 8270 Computer Communication Networks Cr.Hrs. 3 (Formerly 024.827) Overview of existing computer networks. Elements of queueing theory. Error, delay, cost and capacity analysis. Fixed assignment schemes. Packet and switched networks. Random access. Satellite networks. Hybrid protocols.

ECE 8280 Electromagnetic Field Modelling Cr.Hrs. 3 (Formerly 024.828) Coulombian and amperian models for polarized media and magnetized media; uniqueness theorems, formulation and classical methods of analysis of static, stationary and quasistationary field problems; modelling of electromagnetic fields in the presence of moving solid conductors; elements of relativistic electrodynamics.

ECE 8300 Computer Vision Cr.Hrs. 3
(Formerly 024.830) This course is an extension of ECE 8220 (or 024.822) "Digital Image Processing." Techniques of image modelling, segmentation, texture analysis, matching and inference will be studied.

ECE 8310 Computer-Aided Design in Biomedical Engineering Cr.Hrs. 3
(Formerly 024.831) Representation of surfaces in space. 3D display methods and hardware. 3D boundary tracing and texture. Biosterometry and stereophotogrammetry in biomedicine. Some aspects of computer-aided manufacturing of prostheses and other topics. Prerequisites: an introductory course in computing or equivalent experience and one year of any physical, engineering or biological science.

ECE 8320 Advanced Topics in Power Systems Cr.Hrs. 3 (Formerly 024.832) Study of selected topics of recent advances in electrical power systems.

ECE 8360 VLSI Design Methodology Cr.Hrs. 3 (Formerly 024.836) Design of custom and semi custom Very

## 

ACADEMIC CALENDAR

Large Scale Integrated (VLSI) circuits and systems including design for testability. Static and dynamic VLSI circuits; software design tools, layout, logic and timing simulation. Prerequisites: ECE 2220 (or 024.222 ), ECE 4240 (or 024.424), or equivalent.

ECE 8370 Topics in Biomedical Engineering Cr.Hrs. 3 (Formerly 024.837) A discussion of current topics in biomedical engineering. The latest in instrumentation, procedures and practices relevant both to clinical engineering and ongoing research are covered. Prerequisite: ECE 4400 (or 024.440) or consent of instructor.

ECE 8380 Reflector Antennas Cr.Hrs. 3
(Formerly 024.838) Mathematical analysis of common reflector antennas including effects of various types of feed structures.

ECE 8400 Intelligent Systems Cr.Hrs. 3
(Formerly 024.840) Continuation of ECE 7660 (or 024.766)
"Resolution Problem Solving," plan formation, default and temporal reasoning as applicable to engineering.

## English, Film, and Theatre

Head: Judith Owens
Campus Address/General Office: 623 Fletcher Argue Building
Telephone: (204) 4747365
Fax: (204) 4747669
Email Address: english@umanitoba.ca
Website: http://umanitoba.ca/englishfilmandtheatre
Academic Staff: Please refer to the website for Faculty information:http://umanitoba.ca/englishfilmandtheatre

As a moderate-sized department, English is able to offer M.A. and Ph.D. programs covering a wide range of periods, genres, media, and theoretical approaches. Both scholarly and creative thesis options are offered for the M.A. In addition to teaching (at all levels), publishing, writing, editing, advertising, arts management, acting and entertainment, English graduates have worked in small businesses, corporations, government, the foreign service, research and development, public relations, fund-raising, filmmaking, the National Film Board, and many other areas.

One of the major strengths of the faculty is its commitment to teaching excellence, with three of its current members having been honoured with the University's highest teaching award, and several others having been honoured with Merit Awards, Graduate Teaching Awards, and UMSU Certificates of Teaching Excellence. In keeping with this record, graduate student teachers have also won a number of the Teaching Excellence Awards offered by the Faculty of Arts since 1994.

## Fields of Research

Students are welcome to consider all areas of literary specialization: Canadian literature, American literature, prairie literature, 20th-century literature, 19th-century
literature, 18th-century literature, Milton, medieval literature, film, drama, theatre, post-colonial literature and theory, modern and post-modern literature, literary and critical theory, cultural and media studies, women's writing, and creative writing.

## Research Facilities

University of Manitoba Libraries have extensive holdings in literature, film studies, and theatre. The Libraries provide access to both local and remote databases. Of note are the University of Manitoba Department of Archives and Special Collections and St. John's College Library. The Department of Archives and Special Collections has an extensive holding in Canadian literature. It is particularly good in Canadian prairie literature, the Archives' holdings including a large and growing collection of prairie literary manuscripts.

Our department benefits from close affiliations with the University of Manitoba Institute for the Humanities, the Centre for Globalization and Cultural Studies, and the Centre for Creative Writing and Oral Culture.

The Canadian Literature Archive, a project of the Department of English, Film, and Theatre, is an internet site which serves as a repository for information about Canadian writers, novelists, poets, playwrights, essayists, Canadian literary organizations, magazines, publications, texts, and library archives. The Archive has been online since 1994.

Students are invited to join the Association of Graduate English Students (AGES). The association, which has recently been dramatically reanimated, organizes student publications, graduate colloquia, and other events. The department also operates a media lab and provides a reading room for student and faculty use.

## M.A. in English, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact the English, Film, and Theatre Department for further information.

## Application Deadlines

Applications of Canadian/U.S. students are to be received in the Faculty of Graduate Studies, complete with all supporting documentation, by January 5th. International students should submit their applications to the Faculty of Graduate Studies, complete with all supporting documentation, by November 1st.

## Program Requirements

## ACADEMIC CALENDAR

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Requirements for the M.A. degree in English can be met in one of two ways; either a thesis (critical or creative) and 18 credit hours of course work, of which 12 credit hours will normally be graduate English seminars; or a major paper and 30 credit hours of course work.

Second language reading requirement: Yes

Expected time to graduate: 2 years

## Ph.D. in English, Admission

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, applicants must normally hold an M.A. degree in English with a GPA of at least 3.5 in their work at the M.A. level.

## Application Deadlines

Applications of Canadian/U.S. students are to be received in the Faculty of Graduate Studies, complete with all supporting documentation, by January 5th. International students should submit their applications to the Faculty of Graduate Studies, complete with all supporting documentation, by November 1st.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. The first year of full-time Ph.D. study will normally include 18 credit hours, at least 12 credit hours of which should be graduate seminars in English literature. This program of studies will be arranged in consultation with the student's advisory committee at a meeting that will take place no later than one week before the start of classes.

Candidacy examinations, consisting of a paper on the student's period of specialization and a paper on the research area, will normally be written in the second year of Ph.D. study. Each paper will be followed by a one-hour oral examination.

Second language requirement: yes

Expected time to graduation: 4 years

## English,Film, and Theatre- 7000 Level

ENGL 7030 Studies in American Literature Cr.Hrs. 3
(Formerly 004.703) A detailed study of an aspect of American Literature. Topics will vary from year to year. Not
to be held with the former ENGL 7020 (004.702). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7050 Studies in Canadian Literature Cr.Hrs. 3 (Formerly 004.705) A detailed study of an aspect of Canadian Literature. Topics will vary from year to year. Not to be held with the former ENGL 7040 (004.704) or the former 004.746. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7070 Studies in British Literature since 1900 Cr.Hrs. 3 (Formerly 004.707) A detailed study of an aspect of post1900 British Literature. Topics will vary from year to year. Not to be held with the former ENGL 7060 (004.706). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7090 Studies in Contemporary Literature Cr.Hrs. 3 (Formerly 004.709) A detailed study of an aspect of contemporary literature in English. Topics will vary from year to year. Not to be held with the former ENGL 7080 (004.708). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7140 Studies in International Literature Cr.Hrs. 3 (Formerly 004.714) A detailed study of an aspect of international literature in English. Topics will vary from year to year. Not to be held with the former ENGL 7100 (004.710). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7160 Studies in Modernism Cr.Hrs. 3
(Formerly 004.716) A detailed study of an aspect of Modernism. Topics will vary from year to year. Not to be held with the former ENGL 7150 (004.715). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7170 Studies in Media Cr.Hrs. 3
(Formerly 004.717) A detailed study of an aspect of media and literature. Topics will vary from year to year. Not to be held with the former ENGL 7250 (004.725). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7180 Studies in Old English Poetry Cr.Hrs. 6 (Formerly 004.718) Studies in Old English poetry. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7190 Special Topics in Literary Figures Cr.Hrs. 3 (Formerly 004.719) Focuses on the works of an individual author. Subjects will vary from year to year. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7300 Creative Writing Cr.Hrs. 3
This seminar will foster advanced craft in a variety of literary genres and will include an analytic and a workshop component. Admission will be at the instructor's discretion, based on the submission of a creative portfolio.

ENGL 7590 Teaching Literature at University Cr.Hrs. 0 (Formerly 004.759) Description not available for this course.

## ACADEMIC CALENDAR

ENGL 7600 Bibliography Cr.Hrs. 3
(Formerly 004.760) Description not available for this course.
ENGL 7690 Special Topics in Literary Periods 1 Cr.Hrs. 3 (Formerly 004.769) Description not available for this course. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7710 Special Topics in Literary Genres 1 Cr.Hrs. 3 (Formerly 004.771) No description available. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7750 Directed Reading 1 Cr.Hrs. 3
(Formerly 004.775) Directed Reading 1. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7800 Studies in Drama/Theatre Cr.Hrs. 3
(Formerly 004.780) Focuses on drama possibly using some consideration of theatrical practice and performance. Topics will vary from year to year. Not to be held with the former ENGL 7790 (004.779). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7840 Studies in Critical Theory Cr. Hrs. 3 (Formerly 004.784) Explores literary theory. Topics will vary from year to year. Not to be held with the former ENGL 7830 (004.783). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7860 Topics in Cultural Studies Cr.Hrs. 3
(Formerly 004.786) Provides an overview of the theory and practice of cultural studies. Topics will vary from year to year. Not to be held with the former ENGL 7850 (004.785). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7880 Studies in Literature and Film Cr.Hrs. 3 (Formerly 004.788) Brings together literature and film. Topics will vary from year to year. Not to be held with the former ENGL 7870 (004.787). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7900 Studies in Medieval Literature Cr.Hrs. 3 (Formerly 004.790) A detailed study of an aspect of Middle English literature. Topics will vary from year to year. Not to be held with the former ENGL 7890 (004.789). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7920 Studies in Early Modern Literature Cr.Hrs. 3 (Formerly 004.792) A detailed study of an aspect of Early Modern literature. Topics will vary from year to year. Not to be held with the former ENGL 7910 (004.791) or the former 004.723. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7940 Studies in Eighteenth-Century
Literature Cr.Hrs. 3
(Formerly 004.794) A detailed study of an aspect of eighteenth-century literature. Topics will vary from year to year. Not to be held with the former ENGL 7930 (004.793). As the course content will vary from year to year, students
may take this course more than once for credit.
ENGL 7960 Studies in Romanticism Cr.Hrs. 3
(Formerly 004.796) A detailed study of an aspect of romanticism. Topics will vary from year to year. Not to be held with the former ENGL 7950 (004.795). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7980 Studies in Nineteenth-Century British Literature Cr.Hrs. 3
(Formerly 004.798) A detailed study of an aspect of Nineteenth-Century British Literature. Topics will vary from year to year. Not to be held with the former ENGL 7970 (004.797). As the course content will vary from year to year, students may take this course more than once for credit.

## Entomology

Head: R.W. Currie
Campus Address/General Office: 214 Animal Science Building
Telephone: 2044748077
Fax: 2044747628
Email Address: head entomo@umanitoba.ca
Website: http://umanitoba.ca/afs/entomology
Academic Staff: Please refer to the website for Faculty information:http://umanitoba.ca/afs/entomology

The Department of Entomology is the only such in Canada. The Department has strong links with agricultural and environmental research organizations in Winnipeg and across Canada, and is uniquely positioned to provide comprehensive graduate training in entomological research. The Department offers M.Sc. and Ph.D. degrees. In both M.Sc. and Ph.D. programs, students must achieve a high standard in a research project and in a thesis reporting their results. Students must also take some course work, including a course intended to develop written and oral communication skills, to promote critical thinking and to provide exposure to diverse fields of entomology and related sciences.

Graduates of the Ph.D. program from the Department of Entomology occupy academic positions in a number of universities in Canada and elsewhere; others occupy senior scientist positions with Agriculture and Agri-Food Canada, Environment Canada, or other government research and regulatory agencies. Graduates of the M.Sc. program have proceeded to Ph.D. programs elsewhere, while others have entered the workforce following their M.Sc. degree. A high proportion of insect extension specialists in provincial governments in western Canada are graduates of the department's M.Sc. program. Other recent graduates have positions as forest and prairie management ecologists, careers in agribusiness, producer organizations or pesticide companies, or technical positions in research organizations.

Fields of Research

## 

ACADEMIC CALENDAR 2012-2013 •

University of Manitoba

The research of the Department strikes a balance between basic and applied studies. The Department has faculty in the areas of apiculture and pollination biology; physiological, population and community ecology of insects; insect systematics and evolution; insect-vertebrate interactions; aquatic entomology; landscape ecology of insects; biological control and integrated pest management. Particular areas of focus include honey bee parasite management, insects as agents of biological control, crop and livestock entomology, arthropod ectoparasites of mammals and birds, taxonomy and evolution of parasitoid wasps, and molecular phylogenetics. Adjunct professors associated with the department provide additional depth and breadth in the areas of forest entomology, pheromone chemistry, crop protection entomology, stored product entomology, medical entomology, and the role of insects in aquatic ecosystems.

## Research Facilities

Departmental research facilities include the Wallis-Roughley Museum of Entomology, controlled environment chambers and an apiary. Other accessible facilities include a scanning electron microscope, pesticide analysis laboratories, livestock, field plots and commercial scale fields, and greenhouse space.

## M.Sc. in Entomology, <br> Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

The Department of Entomology allows students to begin their program on either1 September, 1 January or 1 May. For admission for each of these start dates, Canadian and U.S. students should send their applications with complete supporting documentation to arrive in the Faculty of Graduate Studies at least three (3) months before the intended start date. International students should send their applications with complete supporting documentation to arrive in the Faculty of Graduate Studies at least seven (7) months before the intended start date. Before making a formal application, students should contact the Department of Entomology to determine what documentation should accompany their application.

## Program Requirements

The minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. As part of their academic program, students are required to take ENTM 7150 Advanced Entomology 1.

Second language reading requirement: none

Expected time to graduation: 2-3 years

Ph.D. in Entomology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

The Department of Entomology allows students to begin their program on either 1 September, 1 January or 1 May. For admission for each of these start dates, Canadian and U.S. students should send their applications with complete supporting documentation to arrive in the Faculty of Graduate Studies at least three (3) months before the intended start date. International students should send their applications with complete supporting documentation to arrive in the Faculty of Graduate Studies at least seven (7) months before the intended start date. Before making a formal application, students should contact the Department of Entomology to determine what documentation should accompany their application.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. As part of their academic program, students are required to take ENTM 7220 Advanced Entomology.

Second language reading requirement: yes, although this may be waived.

Expected time to graduation: approximately 3 - 5 years

## Entomology

ENTM 7120 Insect Population Management Cr.Hrs. 3 (Formerly 038.712) Term papers, tutorials and workshops to study systems of managing populations of injurious and useful insects based upon models of the processes of insect population dynamics. Prerequisite: consent of instructor. Not all courses are offered every year. Please contact the department regarding course availability.

ENTM 7150 Advanced Entomology 1 Cr.Hrs. 3
(Formerly 038.715) A required course for M.Sc. students in Entomology. Students must submit essays and seminars in areas chosen to fit the requirements of their program. They are required to prepare for and participate actively in discusssion sessions and other class meetings. Not available for credit in a Ph.D. program.

ENTM 7200 Advanced Insect Taxonomy Cr.Hrs. 3 (Formerly 038.720) Tutorials, laboratory periods and discussion of classification and evolution of insects. Offered 2005-2006. Not all courses are offered every year. Please contact the department regarding course availability.

## ACADEMIC CALENDAR

ENTM 7210 Special Topics in Entomology Cr.Hrs. 3 (Formerly 038.721) The content of this course will deal with specific topics of entomology at the advanced level.

ENTM 7220 Advanced Entomology Cr.Hrs. 3 (Formerly 038.722) A required course for Ph.D. students in Entomology. Students must submit essays and present seminars in areas chosen to fit the requirements of their program. They are required to prepare for and participate actively in discusssion sessions and other class meetings. Not available for credit in a M.Sc. program.

ENTM 7230 Advanced Pollination Biology Cr.Hrs. 3 (Formerly 038.723) Tutorials, assignments and discussion periods of current topics relating to the physiology and life history of insect pollinators and their ecological interactions with entomophilous plants. Subjects studied may be selected to fit the interests of individual students. Prereqisite: Consent of instructor.

ENTM 7240 Advances in Physiological Ecology of Insects Cr.Hrs. 3
(Formerly 038.724) The effect of environmental factors such as temperature, moisture, light and other organisms on the physiology and ecology of insects. Prerequisite: ENTM 2050 (or 038.205) or consent of instructor. Not to be held for credit with ENTM 4520 (or 038.452 ). Not all courses are offered every year. Please contact the department regarding course availability.

## Environment and Geography

Head: Dr. R. Stewart
Campus Address/General Office: 220 Sinnott Building
Telephone: 2044749667
Fax: 2044747699
Email Address: environment geography@umanitoba.ca Website:
umanitoba.ca/faculties/environment/departments/geography
Academic Staff: Please refer to the website for Faculty information:umanitoba.ca/faculties/environment/departments /geography

The Department of Environment and Geography is one of the most dynamic and eclectic research units at the University of Manitoba. The focus of the graduate program is innovative scholarship that contributes meaningfully to our understanding of how we interact with and can influence the world around us. As a department, we strive to be recognized regionally, nationally, and internationally as a centre for excellence in teaching, research and outreach and in integrating physical, biological and human environmental knowledge. This is reflected in our commitment to graduate students and the successes they continue to achieve.

## Fields of Research

Department research activities span a wide range of disciplinary and interdisciplinary activities, including: the evolution of the cultural landscape; aging; maritime shipbuilding and seaports; homelessness; global (and China's) energy supplies; global food and agriculture;
alternative energy sources; replacement of petroleum feedstock in petrochemical industry; speciation, cycling, and bioavailability of trace elements across environmental interfaces; stress ecology and risk assessment in aquatic systems from chemical contaminants, ecosystem functioning and biodiversity impacts of nutrients in riparian and aquatic systems and the ecophysiology of invasive species, animal geographies; applied meteorology; severe weather including precipitation and drought analyses; microclimatology, greenhouse gas source-sink analysis; geographies of health, caregiving and care work in urban and rural settings; humananimal relations; the changing role of zoos and zoo maps; prairie and forest restoration; traditional Aboriginal knowledge; sustainable rural and urban agriculture; risk analysis of GM crops and disease; plant, wildlife and landscape ecology; environmental conservation and ecological restoration; gender and development; environmental health; arctic climate change and systemscience studies in polar marine ecosystems.

Researchers in the Department collaborate with a wide variety of other academic, governmental and private institutions, non-governmental and grassroots organizations, and community groups. These include: Networks of Centres of Excellence (NCE - ArcticNet, PrioNET), IPY, NSERC and CFCAS national research networks (e.g. BIOCAP, CASES, IPY-CFL, MITE-RN, COMERN, DRI, ArcticStorms); national climate-related research centres (e.g. HAL, PSPC, MRB and CRB) within the Meteorological Services of Canada (MSC); Department of Fisheries and Oceans facilities (including the Canadian Ocean Climate Chemistry Centre, IOS, FWI); numerous zoos both in Canada, and abroad; Clearwater and Erikson rural communities, Hollow Water and Grassy Narrows First Nations; Spence and Furby urban community gardens; NGOs that include Boreal Forest Network and Council of Canadians, Manitoba Conservation; Parks Canada; Manitoba Hydro; Ducks Unlimited and many others. In addition, the department is a forerunner in research outreach activities, including Schools on Board, a national initiative to engage schools and communities in Arctic science research by interacting with international CASES research teams on board the Canadian Research Icebreaker. Other important collaborations include action research and education with rural communities, farm groups and First Nations across the country, especially the Harvest Moon Society, and environmental NGOs including Council of Canadians, Boreal Forest Network, Saskatchewan Organic Directorate, Status of Women Canada, Manitoba Centre for Health Policy and the Delta Waterfowl Foundation.

Meteorological and marine research involves collaboration with international research networks and agencies (e.g. Universities of Miami (RSMAS), Wisconsin, the Radiometrics Corp., Quebec Oceans, International Polynya Program, IPY-Pan-Arctic Ecosystem Cluster). Other international research involves major ion chemistry with scientists in China; trace element behaviour research in the Himalaya, Nepal and India; energy and food supply in China; agriculture for the Eastern Caribbean; grasslands conservation strategy in North America; international zoo visitor views of conservation; ports and regional development in East Asia; and community-located environmental conservation in Ecuador, Peru, as well as India and Bangladesh.

## Research Facilities

## 

## ACADEMIC CALENDAR <br> 2012-2013 •

## University of Manitoba

The Department enjoys close collaboration with the Centre for Earth Observation Science (CEOS). CEOS is structured as an interdisciplinary centre through the partnering arrangements with the Departments of Statistics, Botany, Biological Sciences, Soil Science, Civil Engineering, Physics and Applied Mathematics. External partners include Manitoba Natural Resources, the Canadian Wheat Board, Parks Canada, Fisheries and Oceans Canada, MB Hydro as well as those with national and international affiliations such as the Canadian Ice Services, Environment Canada, Canada Centre for Remote Sensing, Canadian Space Agency, National Air and Space Administration, and the Canadian International Development Agency. Because of this extensive network, it is possible to access facilities and equipment far beyond the holdings of the University. Three fully equipped computer laboratories and data-sharing agreements with CEOS partners provide the infrastructure support for research and teaching programs. Students have access to a research laboratory with fully integrated PC and UNIX (IBM RS/6000 and DEC Alpha) work stations, with two calcomp digitizers, slide-output device and plotter. Another laboratory is Pentium based with 15 workstations and a server. Available software includes Arc/lnfo, PCI Ease/Pace, ER Mapper, Idrisi, ArcView, IDL, Adobe Illustrator and Photoshop.

Faculty within the Department have acquired a vast array of field and laboratory research equipment. A partial list includes a GPS base station, handheld units and a satellite receiving station; radiometers, spectrometers, scatterometers for monitoring of electromagnetic radiation in the solar, terrestrial and microwave wavelengths, atmospheric boundary layer profiling equipment, surface meteorological and energy and CO2 flux monitoring facilities, infrastructure for gas chromatography (DMS, CO2, CH4), state of the art calibration facilities, research moorings and buoys, and support craft for sampling on water (jet boats, air boats, zodiaks, etc., ) and land (snowmobiles, trucks, ATV's). Laboratory facilities include a cold laboratory for snow and sea ice microstructure analysis.

A CFI award has enabled the acquisition and operation of (i) the Ultra-Clean Trace Element Laboratory (UCTEL; home.cc.umanitoba.ca/~wangf/uctel), which is one the most advanced ultra-trace analytical facilities in the world. NSERC grants have led to the purchase of atmospheric boundary layer profiling equipment and surface heat and mass flux facilities for energy budget and greenhouse gas studies, (ii) the Riparian and Littoral Process Laboratory, which is equipped with stand alone growth facilities and ecotoxicity and field bioassay instrumentation to support research into stress ecology, ecology and ecophysiology, and (iii) the SeaIce Environmental Facility (SERF), which is Canada's only experimental sea - ice facility that houses interdisciplinary studies on sea ice in a laboratory setting..

The Environmental Conservation Lab (http://umanitoba.ca/environment/ecl) focuses on the interface between biological and social sciences, and conducts community-entered research, education, and outreach across North America and in the Global South. Research incorporates extensive fieldwork, spatial analyses at multiple scales of organization, and participatory video making. Several researchers in the Department use the field stations of Delta Marsh, Clearwater, the Experimental Lakes

Area (ELA), Oak Hammock Marsh, and the Manitoba Zero Till Research Association (MZTRA).

## Master of Environment (M.Env.), Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must have a minimum GPA of 3.25 in the last 60 CH of course work and should be accepted for study by an academic advisor prior to being accepted into the program.

## Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 1/2 months prior to their intended start date. International students should submit their application and supporting documentation at least 7 months prior to their intended start date. Please see the application deadline chart below.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Master of Environment students are required to complete at least 12 credit hours as follows: 6 credit hours from the 7000 level, including GEOG 7360 (53.736) and 6 credit hours of any other course at the 3000level or higher. Students must attend and present their original research at a department seminar. Students are also encouraged to attend and present at an academic or professional conference or seminar as approved by their advisory committee. In addition, a thesis is required. An oral defence of the thesis is an integral part of the M.Env. examination. Complete supplementary regulations of the program can be found and should be consulted on the Faculty of Graduate Studies website:
(http://umanitoba.ca/faculties/graduate studies/admin/532.ht $\underline{\mathrm{ml}})$. It is the students' responsibility to read and follow these regulations.

Second Language Reading Requirement: none

Expected Time to Graduate: two years

## M.Sc. in Environment and Geography,

 AdmissionStudents with an honours degree or equivalent (including a 4-year advanced degree) in Geography (physical geography specialization) or from a program in the Earth or environmental sciences will be considered. The requirement for admission is a minimum GPA of 3.25 in the last 60 CH of course work. Students must be accepted for study by an academic advisor prior to being accepted into the program.

## 

ACADEMIC CALENDAR

## Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least $31 / 2$ months prior to their intended start date. International students should submit their application and supporting documentation at least 7 months prior to their intended start date. Please see the application deadline chart below.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. M.Sc. students are required to complete a minimum of 12 CH of approved course work plus a thesis. Courses typically include 6 CH of 7000 -level Departmental courses and 6CH selected from graduate or upper level undergraduate courses from either within the Department or from other departments. Students must attend and present their original research at a department seminar. Students are also encouraged to attend and present at an academic or professional conference or seminar as approved by their advisory committee. All students must complete and defend a thesis that makes a distinctive contribution to the fields of environment and/or geography. Complete supplementary regulations of the program can be found and should be consulted on the Faculty of Graduate Studies website: (http://umanitoba.ca/faulties/graduate studies/admin//532.ht $\underline{\mathrm{ml}})$. It is the students' responsibility to read and follow the regulations.

Second Language Reading Requirement: none
Expected Time to Graduate: two years

## M.A. in Geography, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must have a minimum GPA of 3.25 in the last 60 CH and be accepted for study by an academic advisor prior to being accepted into the program.

## Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least $31 / 2$ months prior to their intended start date. International students should submit their application and supporting documentation at least 7 months prior to their intended start date. Please see the application deadline chart below.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. M.A. students are required to complete at least 12 credit hours as follows: 6 credit hours from the 7000 level and 6 credit hours of any other course at the 3000-level or higher. Students must attend and present their original research at a seminar offered and advertised at the department level prior to their defence. Students are also encouraged to attend and present at an academic or professional conference or seminar as approved by their advisory committee. In addition, a thesis is required. An oral defence of the thesis is an integral part of the M.A. examination. Complete supplementary regulations of the program can be found and should be consulted on the Faculty of Graduate Studies website:
(http://umanitoba.ca/faculties/graduate studies/admin/532.ht $\underline{\mathrm{ml}})$. It is the students' responsibility to read and follow these regulations.

Second Language Reading Requirement: none

Expected Time to Graduate: two years

## Ph.D. in Geography,

## Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students must be accepted by an advisor prior to submitting an application to enter the program. A 3.5 GPA (or equivalent) in their previous 60 credit hours of course work is normally required.

## Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 1/2 months prior to their intended start date. International students should submit their application and supporting documentation at least 7 months prior to their intended start date. Please see the application deadline chart below.

## Program Requirements

In addition to the minimum 12 credit hour course requirement of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students are required to attend and present their original research at two department seminars. Students are also encouraged to attend and present at an academic and/or professional conference or seminar as approved by their supervisor. These minimum course requirements may be increased on the recommendation of the student's advisory committee or the departmental Graduate Studies Committee. Students are also required to pass a candidacy exam, and complete and successfully defend a dissertation. The dissertation is to be a distinctive contribution to the field of geography and must be of publishable quality.

Second language requirement: none

Expected time to graduation: four years

Application Deadline Dates

Session Start Date Canadian/US International
Regular (September) May 15 February 1
Winter (January) September 15 June 1
Spring
$\begin{array}{ll}\text { September } 15 & \text { June 1 } \\ \text { January } 15 & \text { October } 1\end{array}$

## Environment \& Geography-

GEOG 7010 Selected Topics in Geography Cr.Hrs. 3 Advanced study of a selected topic from any one of the department's fields of specialization.

GEOG 7030 Regional Analysis Cr.Hrs. 3 A seminar course reviewing theories of regional development which have planning applications. Further, it assesses government policy aimed at regional intervention and notes procedures of evaluation.

GEOG 7040 Seminar in Population Geography Cr.Hrs. 3 Examination of the spatial and temporal character of demographic controls. Special emphasis will be placed upon the problems faced by developing areas in their attempts to deal with population growth.

GEOG 7080 Quantitative Methods Cr.Hrs. 3 A discussion of analysis and model construction in the study of urban and rural systems; analysis of socioeconomic and demographic data, construction of measures, and testing of models.

GEOG 7140 Historical Geography Cr.Hrs. 3
The course is designed to provide a critical understanding of the development, philosophy, and methodology of historical geography.

## GEOG 7180 Methodology of Agricultural

Geography Cr.Hrs. 3
The course first provides an understanding of social and economic concepts in agricultural geography, and then examines methods of data collection, sampling techniques, and analysis with relevance to specific research topics.

GEOG 7200 Environment, Resources, and
Population Cr.Hrs. 3
This course discusses the contemporary imbalance between population and resources. The consequences of resource exploitation upon the natural environment are also examined.

GEOG 7260 Selected Regional Issues in
Geography Cr.Hrs. 3
Advanced study of specific issues and problems in selected world regions.

GEOG 7270 Physical and Synoptic Climatology Cr.Hrs. 6 A survey of advances in climatology providing a foundation for climatic research. An examination is made of principles and problems in physical and synoptic climatology. Two hour lectures and three hour laboratory per week both terms.
GEOG 7290 Energy Analysis Cr.Hrs. 3
A survey of origins, methods and applications of energy
analysis, a new technique of system energetics designed to provide information for a more efficient use of scarce natural resources.

GEOG 7310 Geographic Theory and Methodology Cr.Hrs. 3 A discussion of the meaning of explanation in human geography, the status of geography as a science and the construction of theory.

GEOG 7332 Concepts in Atmospheric Modelling Cr.Hrs. 3 This course will primarily focus on numerical modelling applications and techniques of the Earth's atmosphere with an emphasis on weather prediction. This includes understanding basic modelling terminology, numerical schemes, structure of models, types of models, what is required to run a model, and an introduction to data assimilation and ensemble techniques to weather prediction. Prerequisite: Permission of instructor.

GEOG 7360 Interdisciplinary Perspectives on Issues in the Environment Cr.Hrs. 3
An intensive examination of research relating to various issues in the environment, this course will challenge students to consider crosscutting themes found in the literature and from their own learning experiences, and apply them to environmental problems.

GEOG 7380 Advanced Ecotoxicology: Understanding Stress Ecology Cr.Hrs. 3
Ecotoxicology characterizes how organisms interact with anthropogenic and natural stressors in an ecological context. This course is an examination of the fundamental science, approaches and issues being addressed in the field. Students should have a four-year science-based undergraduate degree and be registered in a graduate program. Prerequisite: Permission of instructor.

GEOG 7400 Field Topics in Arctic Systems Cr.Hrs. 3 Field and practical experience in selected topics of multidisciplinary research in Arctic System Science from science theory to field sampling, to modeling and remote measurements. Focuses on the ocean-sea ice-atmosphere interface and its relationship with the biological and geochemical processes operating in the cryosphere.

GEOG 7410 Spatial Analysis in Geography Cr.Hrs. 3 The theory and techniques of spatial statistical data exploration, inference and hypothesis testing as they pertain to geographic analysis is explored. The role of spatial analytical techniques in field investigations, GIS and remote sensing applications are discussed. Prerequisites: (GEOG 3680 or 053.368 ) (C), and (MATH 1300 or MATH 1301 (136.130) (C), or MATH 1500 or MATH 1501 (136.150) (C)), or permission of instructor.

## GEOG 7420 Synoptic Meterology and Weather

Analysis Cr.Hrs. 3
The course covers applied aspects of meteorology in terms of weather analysis and forecasting techniques for synopticscales and meso-scales using various meteorological tools. An introduction to severe weather forecasting techniques will also be described. Familiarity with computers is essential. Prerequisite: Permission of instructor.

GEOG 7440 Climate Change Cr.Hrs. 3
The course will provide an overview of General Circulation Models (GCMs) and how these models are used to study

## 

ACADEMIC CALENDAR
various aspects of global climate change. More specifically the course will deal with the coupling between the atmosphere, hydrosphere, lithosphere and biosphere from the perspective of Earth System Science.

GEOG 7450 Boundary-Layer Climatology and
Micrometeorology Cr.Hrs. 3
A seminar-based course devoted to the study of advanced topics in microclimatology and micrometeorology. Prerequisite: Permission of instructor.

GEOG 7460 Advanced Methods in Geographic Information Systems Cr.Hrs. 3
Weekly two-hour lab. This course focuses on practical application of techniques used in Geographic Information Systems (GIS) and the development of GIS models. The development, testing and presentation of GIS data, models and results are studied. Prerequisite: GEOG 3730 (053.373) (C), or permission of instructor.

GEOG 7470 Techniques in Climatology Cr.Hrs. 3 This course overviews the theoretical basis that underpins the measurement and application of climate elements in micrometeorological and microclimatological research. Prerequisite: Permission of instructor.

GEOG 7480 Advanced Methods in Remote
Sensing Cr.Hrs. 3
This course provides instruction in the current theory and application of remote sensing technology to Earth System Science. Emphasis will be placed on the processing and interpretation of remote sensing imagery and the integration of remote sensing data with other spatial data. Prerequisite: GEOG 3200 (053.320) (C), or permission of instructor .

GEOG 7500 Biogeography Cr.Hrs. 3
The course will emphasize principles and approaches to understanding biogeography on a worldwide scale with specific examples from Canadian and Manitoban research. Topics discussed include the physical environment and biological interactions, effects of disturbance and climate change, the geography of biological diversity, evolution and extinction.

GEOG 7580 Gender and the Human Environment Cr.Hrs. 3 From criticalsocial science theoretical positions, this course asks student to examine what we can learn about how humans live on the earth if we see them as gendered. Just as we may also understand humans and their interactions in and with spaces, places and environments through the lenses of race, ethnicity, class, age and /or combinations of these categories with gender. Cannot be held for credit with GEOG 4280. Prerequisite: permission of instructor.

## Family Social Sciences

Focusing on issues that influence health, well being and family relations, the Master of Science (M.Sc.) in Family Social Sciences provides a strong research foundation in family psychosocial health. We study family issues from a multidisciplinary perspective that integrates psychological, sociological and economic theory and research.

A Master's degree in Family Social Sciences prepares graduates for positions in fields such as health promotion, policy analysis, community development, health research, human services administration, program development, and victim services.

## Areas of Study

The graduate program is organized around four major areas of study. Each student selects one area in which to focus both course work and a research thesis.

Developmental Health is concerned with the determinants of healthy development throughout life and the implications for prevention and health promotion. Health is broadly defined as social, psychological and physical. The determinants of health are considered in the context of families as they interact with communities and societies.

Family Resource Management is focused on the interface between families and their resources - time, energy and money. The interaction of families with societal systems in the economy is emphasized, as are issues that affect family well-being, such as managing stress, making decisions and resolving problems.

Family Violence and Conflict Resolution surveys the prevalence, incidence, etiology, and consequences of conflict and violence in family relationships across the life span. Risk and protective factors at the individual, family, community, and societal levels are studied, with an emphasis on violence prevention and conflict mediation.

Inner City Families and Communities is designed to increase student knowledge of issues, perspectives and dynamics of individuals and their interactions in families and communities within the inner city.

## Fields of Research

Faculty in the Department of Family Social Sciences use a variety of research methodologies, both quantitative and qualitative. We support observational, interview and survey research, as well as analysis of large data sets and case studies. Through our network of community partnerships, we support community-based research. We have well-equipped observational and computer facilities.

Research interests of the faculty reflect the four major areas of study in Family Social Sciences.

- Developmental Health: parent-child relations, parenting and public policy, social and emotional development, developmental psychopathology, sibling relations, aging, death and dying
- Family Resource Management: work and family, bankruptcy, gambling, home-based business, consumer economics, financial counselling, time use, economic value of household production, family problem solving, managerial decision making
- Family Violence and Conflict Resolution: domestic violence, child maltreatment and exploitation, abuse and neglect of the elderly, children's exposure to conflict and violence, conflict management
- Inner City Families and Communities: healthy communities, housing policy, homelessness, street-involved youth, community development, neighbourhoods

Ph.D. in Family Social Sciences,
The Department of Family Social Sciences does not offer a Ph.D. program.

## Family Social Sciences

FMLY 7002 Family Social Sciences Seminar I Cr.Hrs. 0 A monthly interdisciplinary seminar on current issues in Family Social Sciences, involving presentatrions by faculty and invited speakers from inside and outside the Univresity of Manitoba. Attendance and participation is required for Family Social Sciences students during their first year of their master's program. Course graded Pass/Fail.

FMLY 7004 Family Social Sciences Seminar II Cr.Hrs. 0 A monthly interdisciplinary seminar on current issues in Family Social Sciences, involving presentatrions by faculty and invited speakers from inside and outside the Univresity of Manitoba. Attendance and participation is required for Family Social Sciences students during their first year of their master's program. Course graded Pass/Fail.

FMLY 7010 Seminar in Family Finance Cr.Hrs. 3 (Formerly 062.701) Advanced study on topics related to family financial management. As well as a review of theory and literature in the field, contemporary family issues such as financial abuse, financial addictions, and financial literacy are discussed. A micro-economic perspective and Canadian data sources are used where possible.

FMLY 7220 Management of Family Stress Cr.Hrs. 3 (Formerly 062.722) Investigates specific stressor events of contemporary families and suggests ways in which families can meet and manage their responses to these events. Applies theories of amily stress and of family resource management to frame and evaluate current research and professional practice.

FMLY 7230 Work and Family Interrelationships Cr.Hrs. 3 (Formerly 062.723) Advanced study of the earning and caring activities of families and how these activities interrelate at the community, provincial, national, and global levels. Emphasis on relating current research to relevant theoretical perspectives and professional practice.

FMLY 7500 Evaluation of Family, Health and Social Development Programs Cr.Hrs. 3
This course teaches the theory and practice of program evaluation with a focus on family, health, and social development programs. It will emphasize a utilizationfocused evaluation approach from a "real world" perspective, including the political and ethical issues related to evaluation. The course will provide a strong theoretical and
practical foundation to evaluation common to family, health, and social development programs. Students will choose a particular field on which to develop an actual evaluation plan with an existing agency, and will produce an evaluation report related to a particular program in their field of interest.

FMLY 7510 Research Data Centre Research Methods Part A Cr.Hrs.1.5
This course will introduce theprocesses and methods involved in using Statistics Canada's confidential master data files at the Research Data Centre (RDC). Students will gain skills in conducting secondary analyses in order to address important health and social policy research questions. Pre- or Co-requisite: Graduate level biostatistics course or equivalent.

## FMLY 7520 Research Data Centre Research Methods Part

 B Cr.Hrs.1.5A continuation of the introduction to the processes and methods involved in using Statistics Canada's confidential master data files at the Research Data Centre (RDC). Students will gain skills in conducting secondary analyses in order to address important health and social policy research questions. Pre-requisite: Successful completion of Part A (FMLY 7510).

FMLY 7600 Parent-Child Relationships Cr.Hrs. 3 (Formerly 062.760) Advanced study of the nature of parenting and its influence on developmental health. Focus is on theory and research concerned with parenting and parent-child relationships, changes across time, the influence of the context in which parenting occurs, and the effect of the parent-child relationship on developmental health.

FMLY 7610 Aging and Families Cr.Hrs. 3
(Formerly 062.761) An examination of contemporary issues confronting families with aging family members. Emphasis is on a review of selected empirical studies in specific topic areas. Relevant theoretical perspectives are reviewed and related to the empirical studies.

FMLY 7620 Children and Violence Cr.Hrs. 3
(Formerly 062.762) An examination of children's experiences of violence at the levels of families, communities and societies. Relevant theoretical and measurement issues are addressed, as well as the developmental outcomes of various forms of violence. The incidence and prevalence of violence in children's lives is examined. Models of prevention, intervention and policy are explored.

FMLY 7700 Independent Study Cr.Hrs. 3 (Formerly 062.770) Opportunity to pursue a topic independently. Student works with an individual professor on a topic of mutual choice. May include written, oral and field work. See Family Social Sciences Graduate Handbook for regulations.

## FMLY 7710 Special Topics in Family Social

Sciences Cr.Hrs. 3
(Formerly 062.771) Opportunity to investigate an area of family social sciences not usually covered in the curriculum. May be repeated by a student if the topic changes.

FMLY 7800 Family Violence Cr.Hrs. 3
(Formerly 062.780) Advanced study of current topics in family violence over the life course. Topics may include child

## 

ACADEMIC CALENDAR
abuse, sibling abuse, parent abuse, courtship violence, partner violence, and elder abuse. Emphasis is on understanding and critiquing current theory and research.

FMLY 7810 Conflict and Mediation in Families Cr.Hrs. 3 (Formerly 062.781) Examination of conflict origin and manifestation in family relationships throughout the lifespan. Includes a review of spouse/partner, parent-child and sibling interaction patterns and current family mediation models.

FMLY 7920 Globalization, Families and
Communities Cr.Hrs. 3
This course examines the effects of globalization on families and communities from an interdisciplinary perspective. It has been implicated as one cause of inequality, indebtedness, marginalization, unemployment and homelessness. This course examines how responses to the challenges and opportunities of globalization affect the well-being of families and communities.

## FMLY 7930 Social Development in Theory and

Practice Cr.Hrs. 3
This advanced seminar examines the concepts and practices of social development in the real world. Specifically, it examines the interplay between theory and practice and the epistemological underpinnings of social development research, programs, and policies as applied to families and communities. Case studies are assessed and critiqued.

## Fine Arts

School of Art
Program Director: Paul Hess
Campus Address/General Office: Room 313 ARTlab
Telephone: (204) 474-9367
Fax: (204) 474-7605
Email Address: mfa_info@umanitoba.ca
Website: http://umanitoba.ca/schools/art
Academic Staff: Please refer to the website for Faculty information:http://umanitoba.ca/schools/art

The School of Art, established in 1913, is Western Canada's oldest art institution. Originally known as the Winnipeg School of Art, it has occupied a key role in the development of Canadian artists during the twentieth century. In 1950 it affiliated with the University of Manitoba and since has been known simply as the School of Art.

Its location in the city of Winnipeg, at the geographical centre of Canada, provides a culturally diverse environment that encourages an outward looking engagement with the global community. The School emphasizes traditional grounding in skills-based visualization and art historical knowledge connected to contemporary research in creative practices in art, design and scholarly activities. Undergraduate programs include Bachelor of Fine Arts, Bachelor of Fine Arts Honours, Bachelor of Fine Arts, Art History, Bachelor of Fine Arts Honours, Art History, and Diploma of Art.

The School of Art graduates energetic artists, scholars and designers who travel beyond the region to establish successful careers and make significant contributions to local, national and international cultural communities. The School of Art is committed to advancing excellence in creativity, research, critical thinking and knowledge in the service of the Winnipeg community and, through its alumni, the local and national contexts and the global cultural community.

## Fields of Creative Work and Research

The School of Art offers a newly established Master of Fine Art (M.F.A.) in studio practice, a two-year, fulltime program. The M.F.A. program provides facilities, instruction and time for concentrated work in diverse studio practices. Within traditional and emergent materials, modes of technology and expression, our studio culture promotes and supports individual research and imagination. Additionally, students may find opportunities to collaborate with researchers in other faculties at the University.

## Research Facilities

The studios and lab spaces at the School of Art are equipped with specialized equipment for the various disciplines of the school. Our new principal facility, ARTlab, also offers students and faculty access to digital technologies and upgraded space for collaboration, experimentation and research, including animation and advanced computer-aided expression. Additional studios located at the Art Barn, FitzGerald Building and the Ceramics/Sculpture building augment those in ARTlab.

The School of Art funds and houses The School of Art Gallery, a professional exhibition space which presents work of historical and contemporary importance. The exhibition facilities also include vaults to house the School's collection of artworks and the FitzGerald Study Collection.

Master of Fine Art Program, Admission:

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

Persons with a minimum of a Bachelor of Fine Arts Honours degree (or equivalent) or a Bachelor of Arts Honours with studio major from a recognized university, with a minimum G.P.A. of 3.0 (B) in the last 60 credit hours of study may apply for admission to the M.F.A. program. Graduates of the University of Manitoba Bachelor of Fine Arts Honours program are encouraged to have at least three years of postdegree professional studio experience. Admission decisions are based on the qualifications of the applicant as well as the ability of the School of Art and the University of Manitoba to serve the applicant's intended program of study and area of specialization.

## Application Deadlines:

## 

ACADEMIC CALENDAR 2012-2013 •

Applications should be sent to the Faculty of Graduate Studies. Applications for admission are considered only for a September program start.

The deadline by which all required materials must be submitted is January 15 for all applicants. The Graduate Admissions Sub-Committee will consider only those applications that are complete and properly documented by the deadline. Late applications may be considered from Canadian/US applicants if space permits. Due to the time required to obtain requisite visas and permits, this opportunity cannot be extended to international applicants.

In addition to the admission requirements of the Faculty of Graduate Studies, the following materials are required: an artist's portfolio, a curriculum vitae, a statement of purpose, three letters of recommendation and, if necessary, an interview.

## Program Requirements

The program is designed to be completed in two years of full-time study and students are expected to continue their research through the spring and summer. Part time students are not accepted into the program.

Graduate students must complete 21 credit hours of required coursework and 6 credit hours of electives as well as the Master of Fine Arts Thesis/Studio Exhibition, which is the thesis.

STDO 7010 Studio Concentration 1 Cr. Hrs. 3

STDO 7020 Studio Concentration 2 Cr. Hrs. 3
STDO 7030 Studio Concentration 3 Cr. Hrs. 3

STDO 7040 Studio Concentration 4 Cr. Hrs. 3
STDO 7110 Graduate Seminar 1 Cr. Hrs. 3

STDO 7120 Graduate Seminar 2 Cr. Hrs. 3

STDO 7130 Graduate Seminar 3 Cr. Hrs. 3

GRAD 7200 M.F.A. Thesis/Studio Exhibition

Elective Course offerings: 6 credit hours required

Approved graduate level elective courses may be taken in the School of Art, or with written permission, in another faculty at the University of Manitoba.

## Fine Arts

STDO 7010 Studio Concentration 1 Cr.Hrs. 3
Advanced individual instruction and critique in the student's
chosen studio area by faculty and visiting artists.
STDO 7020 Studio Concentration 2 Cr.Hrs. 3
A continuation of Studio Concentration 1. Advanced individual instruction and critique in the student's chosen studio area by faculty and visiting artists.

STDO 7030 Studio Concentration 3 Cr.Hrs. 3
A continuation of Studio Concentration 2. Advanced individual instruction and critique in the student's chosen studio area by faculty and visiting artists.

STDO 7040 Studio Concentration 4 Cr.Hrs. 3 A continuation of Studio Concentration 3. Advanced individual instruction in the student's chosen studio area, culminating in the thesis exhibition.

STDO 7110 Graduate Seminar 1 Cr.Hrs. 3 An investigation of contemporary art concepts in the context of the studio program of work.

STDO 7120 Graduate Seminar 2 Cr.Hrs. 3
A continuation of Graduate Seminar 1. An investigation of contemporary art concepts in the context of the studio program of work.

STDO 7130 Graduate Seminar 3 Cr.Hrs. 3
A continuation of Graduate Seminar 2. A further investigation of contemporary art concepts in the context of the studio program of work.

STDO 7210 Themes in Contemporary Art Studio Cr.Hrs. 3 Individual pursuit of studio investigations under a specific theme.

STDO 7230 Contemporary Art Theory Cr.Hrs. 3
An examination of art theory from structuralism, poststructuralism, semiotic, sociological and psychoanalytic methods.

STDO 7300 Special Topics in Fine Art Cr.Hrs. 3 Varying from offering to offering, this course will cover significant topics in Fine Art.

## Fine Arts -Graduate Studies

## GRAD 7000 Master's Thesis Cr.Hrs. 0

(Formerly 069.700) Should show in general, that the student has mastery of the field and is fully conversant with relevant literature. The process, schedule, format, and style must meet the requirements of the Faculty of Graduate Studies. After approval of the thesis by the thesis examining committee and the completion of any revisions required by that committee, two copies of the thesis must be submitted to the Graduate Studies general office. Thesis students must pass an oral examination on the subject of the thesis and matters relating thereto as prescribed by the department. This course is graded pass/fail.

GRAD 7010 Comprehensive Examination Cr.Hrs. 0 (Formerly 069.701) Takes the form of an exercise in the practical application of knowledge and skills, involving the careful definition of a problem and a report on the results in a manner suitable for evaluation by an examining committee. The comprehensive examination is an independent work, for an architectural project selected to demonstrate professional

## 

ACADEMIC CALENDAR
knowledge and skills, culminating in a public presentation. A faculty member serves as an advisor. Consultation, advice, and criticism will be provided by other members of the Faculty and specialized professionals in the various technical and related fields. This course is graded pass/fail.

## GRAD 7020 Master's Re-registration Cr.Hrs. 0

 (Formerly 069.702)GRAD 7022 Master's Re-registration Cr.Hrs. 0 MBA and MPA students who are not registering for any courses in Fall and/or Winter terms must register for GRAD 7022 in order to retain status.

GRAD 7030 Master's Practicum Cr.Hrs. 0 (Formerly 069.703) Takes the form of an exercise in the practical application of knowledge and skills, involving the careful definition of a problem and a report on the results in a manner suitable for evaluation by an examining committee. This course is graded pass/fail.

GRAD 7050 M.Eng. Project and Report Cr.Hrs. 6 (Formerly 069.705)

GRAD 7060 Diploma Re-registration Cr.Hrs. 0 (Formerly 069.706)

GRAD 7090 Design Thesis Cr.Hrs. 0
The Design Thesis is an independently driven creative work developed within a focused subj\&t.of inquiry and directed by architectural questions. It is carried out through intensive research, study, and design explorations that culminate in a thoroughly developed architectural proposition. It is to be fully recorded in a final document.

GRAD 7200 MFA Thesis/Studio Exhibition Cr.Hrs. 0 The MFA Thesis is comprised of a written statement and visual thesis that must show that the student has developed an original contribution to knowledge in visual art. The process, schedule, format, and style must meet the requirements of the Faculty of Graduate Studies. Thesis students must pass an oral examination on the subject of the written statement and visual thesis. This course is graded pass/fail.

GRAD 7300 Ethics Tutorial (online) - Human Research Protection Program (CHRPP) Cr.Hrs. 0
Applicable to all disciplines of research involving humans. Offers a review of the principles of human research participant protection. Online tutorial with no pre- or corequisites. Certificate available to print upon completion. Course graded pass/fail.

## Food Science

Head: R.G. Fulcher
Campus Address/General Office: 250 Ellis Building
Telephone: (204) 4749621
Fax: (204) 4747630
Email Address: foodcas@ms.umanitoba.ca
Website: http://umanitoba.ca/food science/
Academic Staff: Please refer to the website for Faculty
information:http://umanitoba.ca/food science/

Food is a universal necessity and the study of its various properties will continue to flourish. The Department of Food Science offers graduate degrees at the masters and doctorate levels. The general program in Food Science involves studies of the physical, chemical or biological characteristics of food during all phases of manufacturing and processing - starting with the raw materials and ending in consumer products. Uniquely positioned in the Faculty of Agricultural and Food Sciences, the Department of Food Science develops and evaluates value-added opportunities for agricultural food products. New product development and food process improvement are important national and international priorities and the Department will continue its commitment to the training of highly qualified personnel in these areas.

Students graduating with an M.Sc. or Ph.D. in Food Science are readily employable in industry, government or in academic positions. Most students have acquired jobs prior to completion of their graduate degree requirements. Recent graduates have gone on to key research positions in major corporations or taken administrative or management positions (e.g., quality assurance and product development technologists).

## Fields of Research

Expertise in the Department of Food Science is established in four major areas of study: cereal and pulse chemistry (including chemistry of proteins, carbohydrates and antioxidants), food processing, and food microbiology/safety. Chemistry projects investigate the functional roles played by major food constituents, how these properties translate into final food characteristics, including quality and potential new uses. Key projects examine proteins in cereal and pulse fractions as well as carbohydrates and antioxidants in a variety of crops. Considerable emphasis is placed on the functional relationships among components in raw and processed foods, including the structure and organization of air cells ("bubbles"), hydration mechanisms, and distribution of soluble and insoluble fibres, among other properties. Many projects in the Department are multidisciplinary and interdepartmental, involving partners in the Richardson Centre for Functional Foods and Nutraceuticals,
Departments of Physics \& Astronomy, Animal Science, Human Nutritional Sciences, and Soil Science, to name only a few. Processes have also been developed to assist local producers and manufacturers of dairy, cereal, and pulse products as well as a number of emerging prairie products. Microbiological studies examine food safety issues (survival of bacterial pathogens like Listeria, E.coli 0157:H7, Salmonella) as well as food preservation technology to inhibit spoilage organisms in fresh and cured meat products.

## Research Facilities

The Food Science Department houses up-to-date laboratory facilities for chemical, textural and microbiological analyses of raw foods (agricultural materials) and/or food products (e.g., dairy, bakery, extruded or meat products). In addition, the Department has two pilot plants, one being used primarily for vegetable, fruit, cereal, pulse and meat studies,

## 

## ACADEMIC CALENDAR

while the other is dedicated to dairy product development and research.

## M.Sc. in Food Science, Admission

In addition to the admission requirements of the Faculty of Graduate Studies (found in the Academic Guide section of this Calendar), entrance into the M.Sc. programs requires a bachelor's degree from a recognized food science department or the equivalent. Applicants with a four-year bachelor's degree from a non-food science department or the equivalent may be required to complete a pre-M.Sc. program in the Food Science Department (usually of one academic year) or take additional food science courses in the M.Sc. program in order to develop suitable knowledge in food science.

## Admission Deadlines

The Department recommends that Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

There are two types of Master's programs in the Department of Food Science:

## Thesis

Thesis projects may be of a basic research type or of an applied or practical nature relating to the chemistry, physics and/or microbiology of food raw materials, processes and/or products.

The thesis program requires a minimum of 12 credit hours of coursework, this to include at least 6 credit hours in Food Science 7000 level courses, an additional 3 credit hours at the 7000 level, and at least three credit hours in ancillary courses at the 7000, 6000, 4000 or 3000 levels. The thesis research topic shall be assigned within an area of interest to the student and pertinent to departmental research objectives. All M.Sc. students are required to take FOOD 7130 Food Science Seminar.

## Non-thesis

Additional coursework plus practical work terms and a comprehensive examination are substituted for a research project and written thesis.

The non-thesis program requires a minimum of 30 credit hours of coursework. Of this total, a minimum of 15 credit hours must be at the 7000 level in Food Science with the remaining courses to be approved by the student's advisory committee.

Second language reading requirement: none
Expected time to graduation: two years

## Ph.D. in Food Science , Admission

In addition to the admission requirements of the Faculty of Graduate Studies (found in the Graduate Studies Regulations Section of this Calendar), the student must normally hold a research-based Master of Science degree in the general areas of food or nutritional sciences from a recognized university. The student must attain a minimum University of Manitoba equivalent GPA of 3.5 in Masters' coursework. Students with a Master of Science in a different scientific discipline will be considered by the Food Science Graduate Studies Committee on a case by case basis. Students with an honours degree from the University of Manitoba or equivalent may be accepted directly into the PhD program.

## Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

## Program Requirements

All students are required to take 12 credit hours of courses at the 7000 level. Of these
12 credit hours, 6 credit hours are expected to be selected from the 7000 level courses offered by the Department of Food Science.

Second language reading requirement: none
Expected time to graduation: 3.5 years

## Food Science

FOOD 7090 Unit Process Operations Cr.Hrs. 3
(Formerly 078.709) A study of unit operations which are commonly utilized in the food industry with emphasis on separation processes, particle size reduction and heat transfers. Prerequisite or co-requisite: BIOE 3530 (or 034.353 or 034.329 ) or equivalent. Offered in 2005-2006 and alternate years.

FOOD 7130 Food Science Seminar Cr.Hrs. 3 (Formerly 078.713) Verbal and written presentation of selected topics in Food Science. This is a required course for all M.Sc. candidates in the Food Science Department.

FOOD 7150 Food Proteins Cr.Hrs. 3
(Formerly 078.715) An examination of the structural and functional properties of proteins in foods. Laboratory sessions will emphasize experimental approaches to study proteins in foods, including topics such as surface characterization, thermal properties, rheological behaviour, and chemical modification. Offered in 2005-2006 and

## 

ACADEMIC CALENDAR
alternate years.
FOOD 7160 Food Carbohydrates Cr.Hrs. 3 (Formerly 078.716) A study of the physico-chemical properties and functionality of food carbohydrates. Laboratory sessions will focus on quantitation, structural characterization, thermal properties and rheological behaviour of carbohydrates. Offered in 2006-2007 and alternate years.

FOOD 7180 Food Science of Cereal Grains Cr.Hrs. 3 (Formerly 078.718) The course deals with cereal grains used for human food, the structure of constituents, and the relationship of constituent structure to functionality in the processing of the grains into food products. Emphasis will be on constituents and properties that contribute to optimum processing of wheat. Prerequisites: CHEM 2360 (or 002.236 ) or CHEM 2770 (or 002.277) or MBIO 2360 (or 060.236) or MBIO 2770 (or 060.277), or permission of instructor. Offered in 2006-2007 and alternate years.

FOOD 7200 Advanced Food Microbiology Cr.Hrs. 3 (Formerly 078.720) Detection and quantitation of foodborne microorganisms and related toxins using developing methodology, including rapid microbiological assays with a comprehensive account of basic principles and advanced techniques. Prerequisites: MBIO 2100 (or 060.210), FOOD 4150 (or 078.415) or consent of instructor. Offered in 20062007 and alternate years.

FOOD 7240 Topics in Food Science Cr.Hrs. 3 (Formerly 078.724) An in-depth study of selected topics of current relevance in Food Science. Available to students in the M.Sc. programs and in the Interdepartmental Ph.D. in Food and Nutritional Sciences. Prerequisite: written consent of Department Head.

FOOD 7260 Advanced Meat Science Cr.Hrs. 3 (Formerly 078.726) Builds on fundamental aspects of muscle biochemistry and function to explain how pre- and postharvest technology affect meat quality and safety. Issues of current concern, their resolution as well as recent advances will be discussed. Prerequisite: Consent of instructor. Offered in 2005-2006 and alternate years thereafter.

FOOD 7270 Food Rheology Cr.Hrs. 3
(Formerly 078.727) Evaluation of the textural properties of foods provides critical information in the development of quality food products. This course deals with the principles and methodologies in food rheology and includes and examination of the rheological properties of selected food systems.

## French, Spanish and Italian

Head: E. Fernandez
Campus Address/General Office: 430 Fletcher Argue Building
Telephone: (204) 4749313
Fax: (204) 4747578
Email Address: fsi@umanitoba.ca
Website: http://umanitoba.ca/fsi
Academic Staff: Please refer to the website for Faculty

## information:http://umanitoba.ca/fsi

For over 50 years the Department of French, Spanish and Italian has offered M.A. and Ph.D. programs in French. Graduates have become department heads and professors in Canadian and American universities. They have also become entrepreneurs, administrators, teachers, and translators. Their success in post-graduate endeavours is a testimony to the quality of the programs.

## Fields of Research

Research interests of faculty members include African francophone literature, Canadian francophone literature, French literature (17th -21st centuries), critical and feminist theory, French and Québécois cinema, computer assisted research and second-language acquisition.

## Research Facilities

The University of Manitoba subscribes to the ARTFL database (Project for American and French Research on the Treasury of the French Language, University of Chicago).
The Faculty of Arts boasts a multi-media language
laboratory, one of the most modern in the country.

## Research

The department also regularly organizes information and/or skill development sessions with the Electronic Media Department, and the Elizabeth Dafoe Library.

## M.A. in French, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact Department for further information.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date (normally by May 1 for a start date of September 1). International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date (normally by February 1 for a start date of September 1).

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students are required to complete 12 credit hours of coursework at the 700/ 7000 level and a

## ACADEMIC CALENDAR 2012-2013 •

University of Manitoba
thesis. Part of the required coursework includes three credit hours of literary theory.

Second language reading requirement: No

Expected time to graduation: One to two years

Ph.D. in French, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, applicants to the Ph.D. program must normally hold an M.A. degree in French with a GPA of at least 3.5 in their M.A. courses.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 4 months prior to their intended start date (normally by May 1 for a start date of September 1). International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date (normally by February 1 for a start date of September 1).

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Candidates must complete 12 credit hours of coursework at the 700/7000 level, including a compulsory component of three credit hours of literary theory.

Candidacy examinations consist of two research papers in two distinct areas related to the thesis topic, followed by an oral examination. These examinations will normally be completed in the second year of study.

Second language requirement: No

Expected time to graduation: Four Years

## French,Spanish and Italian -6000 Level <br> FREN 6000 French Reading Knowledge Cr.Hrs. 0

With the expertise of faculty members and technical staff and instrumental facilities capable of producing seminal research on the physical, chemical and biological

## 

## ACADEMIC CALENDAR

characteristics of Earth materials, the Department of Geological Sciences is contributing to the understanding of Earth history, current and past Earth processes, and environmental change. Our research is proving to have important applications in resource extraction and mineral processing and in addressing environmental issues.

Research programs have a significant component of international collaboration and a substantial partnership with industry. To support these research efforts, the department maintains well-equipped state-of-the-art analytical facilities and has ready access to other regional and national facilities outside the department.

The department offers a wide variety of research programs leading to degrees of Master of Science (M.Sc.) and Doctor of Philosophy (Ph.D.). Support for research projects is typically received from NSERC, the Geological Survey of Canada, the Province of Manitoba, the University of Manitoba, and a wide variety of industry sources such as energy resources exploration and production companies, and mining companies.

## Fields of Research

Research areas are broadly defined as: Mineralogy and Crystallography; Environmental Mineralogy and Geochemistry; Sedimentary and Quaternary Studies; Invertebrate Paleontology; Crustal and Mantle Geophysics; Applied/Environmental Geophysics; Petrology and Tectonics; Mineral Deposits; Marine and Freshwater Systems.

## Research Facilities

The department is equipped for a wide variety of field and lab-based research projects. For detailed information on the scope of the department's research facilities and activities, see the Geological Sciences Graduate Brochure, available as a link from
http://www.umanitoba.ca/geoscience/program/gradstudies/gr adstudies.html

The following is a summary listing of research labs. Access to these facilities is coordinated through the student's thesis advisor:

- X-Ray Diffraction Laboratories
- Spectroscopy Laboratories
- Geochemistry Laboratory
- Stable Isotope Mass Spectrometry Facilities
- Microbeam and Image Analysis Laboratory
- Sedimentological, Petroleum Geology, and Quaternary Studies Laboratories
- Invertebrate Paleontology Laboratory
- Geophysical Laboratories

## Other Equipment and Facilities

- Star Lake Field Station, southeast Manitoba
- R.B. Ferguson Museum of Mineralogy
- Ed Leith Cretaceous Menagerie

## M.Sc. in Geological Sciences, Admission

The normal entry requirement is the equivalent of an Honours B.Sc. degree in Geological Sciences from the University of Manitoba. Students with honours degrees in related disciplines (such as Geography, Soil Science, Biology, Chemistry, Environmental Science, Physics, Mathematics, Engineering Physics, and Geological, Civil and Electrical Engineering) may be accepted by the Graduate Admissions Committee providing their planned degree program involves studies in the geological sciences. The majority of the required courses taken by the student should normally be from the Department of Geological Sciences. The research should also be in the geological sciences.

## Application Deadlines

The Department of Geological Sciences allows students to begin the program on September 1, January 1, or May 1. Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three (3) months before the intended start date. International students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than seven (7) months before the intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. GEOL 7760 plus a minimum of 12 credit hours must be selected to fulfil the course requirements of the M.Sc. thesis in Geological Sciences.

Students who have completed GEOL 7760 Graduate Seminar must give a departmental seminar annually and attend the majority of departmental seminars during the sessions in which they are either full- or part-time resident students.

The M.Sc. thesis proposal must normally be submitted within 8 months of the student's commencement in the program. It must demonstrate the student's understanding of the research area and define the research objective including demonstrating that it is a distinct contribution to the field of study. Further information on the format of the proposal and the method of evaluation is available from the Department of Geological Sciences.

Students must submit progress reports (proposals, results and timetable of thesis work) to the Head on or before February 1 annually. The progress report is generally 1 to 2 pages in length.

An oral examination is required as part of the M.Sc. thesis examination. Further information on the format is available from the Department of Geological Sciences.

Second language reading requirement: none

Expected time to graduate: two years

## Ph.D. in Geological Sciences, Admission

The normal entry requirement is the equivalent of a M.Sc. in Geological Sciences. Students with M.Sc. degrees in related fields may be accepted by the Graduate Admissions Committee providing their planned degree program involves studies in the Geological Sciences. The majority of the required courses taken by the student should normally be in the Department of Geological Sciences. The research should also be in the geological sciences.

## Application Deadlines

The Department of Geological Sciences allows students to begin the program on September 1, January 1, or May 1. Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three (3) months before the intended start date. International students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than seven (7) months before the intended start date.

## Program Requirements

For students admitted to the Ph.D. after a M.Sc. program, a minimum of 12 credit hours (minimum 9 at the 7000 -level, maximum 3 at the 3000- or 4000-level), plus GEOL 7760 Graduate Seminar, plus a thesis is required. For students admitted directly to the Ph.D. without a M.Sc. degree, a minimum of 24 credit hours (minimum 21 at the 7000 -level, maximum 3 at the 3000- or 4000- level), plus GEOL 7760 Graduate Seminar plus a thesis is required.

Students who have completed GEOL 7760 Graduate Seminar must give a departmental seminar annually and attend the majority of departmental seminars during the session in which they are either full- or part-time resident students.

Student progress reports (proposals, results and timetable of thesis work) must be submitted to the Head on or before February 1 annually. Progress reports are generally 1 to 2 pages in length.

Second language requirement: none

Expected time to graduation: four years

## Geological Sciences

GEOL 7230 Geophysics of the Earth's Crust and
Mantle Cr.Hrs. 3

Processes in crust-mantle evolution and geophysical methods used to study this region of the earth. Prerequisites: (GEOL 4320 (007.432)), and (GEOL 4330 (007.433)).

GEOL 7260 Geophysical Information Cr.Hrs. 3 The application of the Fourier approach in geophysics and information theory to geophysical interpretation.
Prerequisites: (GEOL 4320 (007.432)), and (GEOL 4330
(007.433)), and (third-year standing in Mathematics).

GEOL 7310 Quaternary Geology Cr.Hrs. 3
Seminars and lectures on sedimentary aspects of the Quaternary Epoch with emphasis on glaciation. The glacial and interglacial stratigraphic record on the continents and in the ocean basins. Three-day field trip in mid-September. Prerequisites: (GEOL 3490 (007.349)), and (GEOL 3900 (007.390)).

GEOL 7350 Remote Sensing in the Earth and Planetary Sciences Cr.Hrs. 3
Selected topics in remote sensing with emphasis on geophysical and geologic problems. Prerequisite: B.Sc. (Honours Geology, Geophysics, or Geological Engineering), or permission of instructor for graduates of other disciplines.

GEOL 7440 Principles of Paleoclimatic
Reconstruction Cr.Hrs. 3
An interdisciplinary course which examines the sedimentological, biological, and human response to climatic change; the history of Quaternary climate and its stratigraphic expression. Prerequisite: Permission of instructor.

GEOL 7470 Advanced Petroleum Geology and Geochemistry Cr.Hrs. 3
Lectures and seminars examining the four major components of petroleum geology: source and migration, reservoir, trap, and economics. Major emphasis on the origin and generation of petroleum and source rock geology. Field trip and core logging required.

GEOL 7480 Advanced Seismology 1 Cr.Hrs. 3
Theory of wave propagation; source mechanisms; other selected topics. Prerequisite: GEOL 7260.

GEOL 7490 Advanced Seismology 2 Cr.Hrs. 3 Seismic surface waves and normal modes of Earth, Earth tides and dynamic evolution. Prerequisite: GEOL 7480 or equivalent.

GEOL 7520 Advanced X-Ray Crystallography Cr.Hrs. 3 Seminar and laboratory course covering symmetry theory, point groups and space groups, x-ray diffraction theory, the powder method, single-crystal precession photography, derivation of unit cell dimensions and space group. Prerequisite: GEOL 4280 (007.428).

GEOL 7530 Structural Crystallography Cr.Hrs. 3
Seminar and laboratory course covering course data collection and reduction methods, crystal structure solution by Patterson and Fournier synthesis, and by direct methods, crystal structure refinement, analysis of errors, and crystalchemical topics of interest to the participants. Prerequisite: GEOL 7520.

GEOL 7540 Isotope Geology and Geochronology Cr.Hrs. 3 The principles and methods of isotopic age determination
and the measurement of geological rate processes using certain radioactive nuclides and the variations of the isotopic compositions of their daughter products. The evolution of the earth's mantle, continental and oceanic crust. The application of light, stable isotope fractionation to understanding geological processes.

GEOL 7550 Hydrothermal Petrochemistry Cr.Hrs. 3 The chemistry, mineralogy, and petrology of mineral deposits and alteration zones of the hydrothermal type, and their association with igneous and tectonic events. Theory and experimental data on metasomatic processes.

GEOL 7570 Advanced Mineralogy 1 Cr.Hrs. 3 Detailed seminar study of important rock-forming and ore minerals based on current research publications, covering crystal structure and chemistry, origin and paragenesis. Lab introduction to principal chemical and physical methods of analyzing minerals.

GEOL 7580 Advanced Mineralogy 2 Cr.Hrs. 3 Detailed seminar study of selected minerals related to students' interests based on current research publications, covering crystal structure and chemistry, origin and paragenesis. Lab assignments to examine diverse properties of the discussed species.

GEOL 7590 Advanced Paleontology 1 Cr.Hrs. 3 Topics in paleobiology of the invertebrates, and principles of paleontology. Upon request, course may be adapted to individual requirements of students in other disciplines (for example, specific groups of invertebrates, paleoecology, trace fossils, etc.). Prerequisites: (GEOL 3310 (007.331)), and (GEOL $4310(007.431)$ ), or permission of instructor.

GEOL 7600 Advanced Paleontology 2 Cr.Hrs. 3
Topics in paleobiology of the invertebrates, and principles of paleontology. Upon request, course may be adapted to individual requirements of students in other disciplines (for example, specific groups of invertebrates, paleoecology, trace fossils, etc.). Prerequisite: GEOL 3310 (007.331), or GEOL 4310 (007.431), or permission of instructor.

GEOL 7610 Advanced Igneous Petrology Cr.Hrs. 3 The origin of magmas, and their association with tectonic regimes, and earth structure. Crystallization and differentiation of magmas, and the distribution of elements and isotopes.

GEOL 7620 Advanced Metamorphic Petrology Cr.Hrs. 3 Natural mineral assemblages and their association with igneous and tectonic events. Theory of variable physchem regimes, heterogeneous equilibrium, and reaction processes.

GEOL 7630 Ductile Strain in Geologic Minerals Cr.Hrs. 3 The theory, mechanics and interpretation of naturally occurring ductile strain in consolidated and semiconsolidated rocks. Applications of analysis to engineering geology and structural geology.

GEOL 7640 Folding of Rocks Cr.Hrs. 3 Ideal fold theory and mechanisms; experimental folding; fold geometry and styles; fold families; interference folding; interpretation of areas that have undergone folding.

GEOL 7650 Fracturing of Rocks Cr.Hrs. 3
Experiments on, theory and properties of, fractures ranging in scale from micro-rocks to large scale fault zones; mechanisms of fracturing; interpretation of stress conditions leading to fracturing.

GEOL 7680 Physical Volcanology Cr.Hrs. 3
Forms and environments of lava extrusion and flow; mechanics of pyroclastic eruptions and transport; nature of pyroclastic deposits; magma chambers; volcano development and destruction.

GEOL 7690 Precambrian Geology Cr.Hrs. 3
Examination of the major lithologic components of the Precambrian Shields of Canada, Australia, and South Africa. Emphasis will be on the origin of these components, discussion of early crustal development, and similarities and differences of Precambrian and younger processes.

GEOL 7700 Advanced Clastic Sedimentology Cr.Hrs. 3 Lectures and seminars on clastic depositional environments. Critical evaluation of accepted facies models followed in each case by examination of the ancient record. One week field trip and core logging required. Prerequisite: GEOL 3900 (007.390), or permission of instructor.

GEOL 7720 Geophysical Imaging and Data
Processing Cr.Hrs. 3
Advanced frequency filter design; deconvolution methods for seismogram; velocity and wavefield stacking; various digital methods for potential field data; principles of tomography and geophysical imaging techniques. Prerequisites: (GEOL 3740 (007.374)), and GEOL 7260, or permission of instructor.

GEOL 7740 Workshop in the Geological Sciences 1 Cr.Hrs. 3
Critical, in-depth group study of problems and new concepts in the geological sciences; discussion of current research by staff and visiting scientists; students will pursue individual research interests and will work with staff on specific topics.

## GEOL 7750 Workshop in the Geological Sciences

 2 Cr.Hrs. 3Critical, in-depth group study of problems and new concepts in the geological sciences; discussion of current research by staff and visiting scientists; students will pursue individual research interests and will work with staff on specific topics.

GEOL 7760 Seminar in Geological Sciences Cr.Hrs. 3 A discussion of topics of current interest from the whole spectrum of geological sciences to inform students on research work outside their specialty. Required of all graduate students. For ancillary credit only. Geological Sciences Colloquium. Weekly discussion of topics of current interest. Presentation of recent research from geological literature, the department, and visitors. Required of all graduate students who have received credit for GEOL 7760.

GEOL 7770 Distribution of Ores: Metallogeny Cr.Hrs. 3 Distribution of geological metal accumulations in space and time. Brief introduction to existing organizational frameworks, followed by a systematic review of metalliferous environments and associations. Prerequisite: GEOL 4300 (007.430), or permission of instructor.

## 

ACADEMIC CALENDAR 2012-2013 •

GEOL 7780 Advanced Carbonate Sedimentology Cr.Hrs. 3 Lectures and seminars on selected topics of carbonate sedimentology, including depositional environments, lithofacies sequences and diagenesis. Prerequisite: GEOL 3900 (007.390), or permission of instructor.

GEOL 7790 Advanced Instrumental Techniques in Geology Cr.Hrs. 3
Lectures and laboratory course covering the application of microbeam, mass spectrometer, diffraction and wet geochemical analytical techniques in mineralogy and geochemistry. Includes coverage of ICP, PIXE, powder and single crystal diffraction and electron microprobe analysis.

GEOL 7800 Evaporite Sedimentology Cr.Hrs. 3
Lectures and seminars on evaporite sedimentology, including depositional environments, diagenesis and stratigraphy of evaporitic sequences. One week field trip immediately before or during fall term required.

GEOL 7810 Electromagnetic Methods in
Geophysics Cr.Hrs. 3
Examination of the theory and application of electromagnetic methods in geophysics. Topics include: electrical properties of earth materials, review of EM methods, EM theory for layered media, EM responses of simple structures and case studies.

GEOL 7820 Environmental Geophysics Cr.Hrs. 3 Examination of the application of geophysics to environmental targets. Topics will vary according to student interest and may include aspects of new-surface geophysics, engineering geophysics, geophysics of global climate change and geophysical risk assessment.

## German and Slavic Studies

Head: Cheryl Dueck
Campus Address/General Office: 328 Fletcher Argue Building
Telephone: (204) 474-9370
Fax: (204) 474-7601
Email Address: german slavic@umanitoba.ca

## Website:

umanitoba.ca/arts/departments/german and slavic
Academic Staff: Please refer to the website for Faculty
information:umanitoba.ca/arts/departments/german and sla vic

The department offers programs of study leading to the Master of Arts degree in the fields of German Language and Literature and Slavic Languages and Literatures. Programs must be arranged in consultation with the Graduate Chair of the department.

## Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulation Section of this Calendar. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's
program to the satisfaction of the department. Please contact the department for further information.

## Pre-Master's Year

Students without a four-year degree or without an undergraduate major in the discipline to be studied must complete a pre-Master's year as approved by the chair of the appropriate graduate studies committee or his/her delegate before they can enter the Master's program. This year is intended to bring the student's standing to approximately the level of a four-year degree with a major in the appropriate discipline. It will normally consist of 24 credit hours of coursework, of which at least 12 are in the major discipline. At most, one grade of "C+" in a course of six credit hours, or two grades of "C+" in courses of three credit hours, will be permitted.

## Master of Arts

Students fulfil the requirements for the Master's degree by doing a combination of coursework and thesis. A minimum of 15 credit hours of course-work is required, including GRMN 7200 / SLAV 7200, GRMN 7210 / SLAV 7210, and 3 other credit hours at the 7000 level in the student's major discipline. The remaining 6 credit hours, designated as ancillary credit, may be taken at the $7000,4000,3000$ (or in exceptional circumstances the 2000) level and may be in courses in the student's major discipline, or in another program or department, at the discretion of the chair of the Graduate Studies Committee. A thesis prospectus must be submitted to the candidate's M.A. advisor a minimum of two months before the thesis is submitted to the M.A. Committee.

Students for the M.A. in German who received credit for the course GRMN 4200 have already fulfilled the requirement for GRMN 7200; they replace GRMN 7200 with 3 other credit hours on the 7000 level. Students for the M.A. in German who received credit for the course GRMN 4210 have already fulfilled the requirement for GRMN 7210; they replace GRMN 7210 with 3 other credit hours on the 7000 level.

Expected time to graduation: Two Years; all requirements for the Degree of M.A. must be fulfilled within five years of the original date of entry into the program. Time extensions for completion of the program may be permitted on an individual basis.

## Application Deadlines

The Department of German and Slavic Studies allows students to begin their program on either 1 September or 1 January. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to Faculty of Graduate Studies no less than four (4) months prior to their intended start date. International students should send their applications with complete supporting documentation to arrive no later than seven (7) months prior to their intended start date.

## ACADEMIC CALENDAR

German and Slavic Studies -6000 Level
GRMN 6000 Reading Language Test Cr.Hrs. 0
(Formerly 008.600)

## German and Slavic Studies - $\mathbf{7 0 0 0}$ Level <br> GRMN 7200 Literary and Cultural Theory Cr. Hrs. 3

 A survey of the major theoretical approaches to German and Slavic literature and cultures. Discusses the aesthetics of Enlightenment and Idealism, Nietzsche, Freud, Russian Formalism, Prague Structralism, hermeneutics, semiotics, dialogism (Bakhtin), the Frankfurt School, collective memory, gender studies, post-colonialism, and multi-culturalism.GRMN 7210 Introduction to Second Language Acquisition and Methods of Language Teaching Cr.Hrs. 3 This course provides a general introduction to theories and approaches in second language acquisition (SLA) and methods of language teaching specifically designed for MA students of German and Slavic languages.

GRMN 7240 Colloquium in German Studies 1 Cr.Hrs. 3 A detailed study of theoretical and methodological questions in German literature and culture. Course contents will vary from year to year depending on the needs and interests of students and staff.

GRMN 7242 Colloquium in German Studies 2 Cr.Hrs. 3 A detailed study of German stylistics, German as a Second Language, or the structure of the German language. Course contents will vary from year to year depending on the needs and interests of students and staff.

GRMN 7300 Special Topics in German Literature and Culture 1750-1945 1 Cr. Hrs. 3
Topics dealing with German literature and culture focusing on an author, a systematic topic or period between 1750 and 1945. Contents will vary from year to year depending on the needs of students and staff. As the course content will vary from year to year, students may take this course more than once for credit.

GRMN 7330 Seminar in Contemporary German Literature and Culture Cr.Hrs. 3
Topics dealing with German literature and culture in the second half of the 20th and in the 21 st century. Contents will vary from year to year depending on the needs of students and staff.

GRMN 7340 Seminar in German Film and Media
Studies Cr.Hrs. 3
Studies a variety of German media theories and sources, including newspaper, television and film in the 20th and in the 21 st centuries.

GRMN 7350 Seminar in German and European Literature and Culture Cr.Hrs. 3
Topics dealing with German literature and culture within a European comparative context. Contents will vary from year to year depending on the needs of students and staff.

GRMN 7360 Independent Studies in German Cr.Hrs. 3 Each student will work with an instructor to prepare a
reading program in an appropriate area, depending on the needs of students and staff. The student will present written assignments as required. As the course content will vary from year to year, students may take this course more than once for credit.

## German and Slavic Studies -Slavic Studies <br> SLAV 7200 Literary and Cultural Theory Cr.Hrs. 3

A survey of major theoretical approaches to German and Slavic literatures and cultures. Discusses the aesthetics of Enlightenment and Idealism, Nietzsche, Freud, Russian Formalism, Prague Structuralism, hermeneutics, semiotics, dialogism (Bakhtin), the Frankfurt School, collective memory, gender studies, post-colonialism, and mult-culturalism.

SLAV 7210 Introduction to Second Language Acquisition and Methods of Language Teaching Cr.Hrs. 3 This course provides a general introduction to theories and approaches in second language acquisition (SLA) and methods of language teaching specifically designed for MA students of German and Slavic languages.

SLAV 7400 Selected Topics in Slavic Literatures Cr.Hrs. 3 Seminar discussions of various problems in Slavic literatures as related to the students' field of research. As the course content will vary from year to year, students may take this course more than once for credit.

SLAV 7410 Seminar in Contemporary Slavic
Literatures Cr.Hrs. 3
Selected problems in contemporary Slavic literatures as related to the students' field of research.

SLAV 7420 Studies in Modernism Cr.Hrs. 3
A study of the representative works of modernism in Slavic countries with a focus on the years 1890-1930. The styles and movements that characterized the period will be examined. References will be made to the art of the period.

SLAV 7430 Special Topics in Slavic Studies Cr.Hrs. 3 An independent study course in Slavic literatures, cultures, or folklore. Topics will be selected to meet students' research or study interests. As the course content will vary from year to year, students may take this course more than once for credit.

## History

Head: M. Gabbert
Campus Address/General Office: 403 Fletcher Argue Building
Telephone: 2044748401
Fax: 2044747579
Email Address: history@umanitoba.ca
Website: umanitoba.ca/faculties/arts/departments/history
Academic Staff: Please refer to the website for Faculty information:umanitoba.ca/faculties/arts/departments/history

The department offers programs leading to both the Master of Arts and Doctor of Philosophy Degrees. The MA program (referred to as the Joint Master's Program or JMP) is a joint

## 

ACADEMIC CALENDAR
2012-2013 •
degree program offered by the History departments of the University of Manitoba and the University of Winnipeg. Students have available the educational and financial resources of both institutions.

## Fields of Research

Research interests of faculty are reflected in the fields offered for graduate study in the department. These include: The Americas, Britain including the Commonwealth and Empire, Canada, Medieval Europe, Modern Europe, Asia, Africa, as well as in Social History, Modern World, History of Science and Archival Studies.

## Research Facilities

There are excellent archival and library facilities in Winnipeg. The most important research libraries are located at The University of Manitoba and the Manitoba Legislative Library, both of which are official repositories for Canadian publications and which support original research in most areas of Canadian history. The Hudson Bay Company Archives is a world-renowned institution for the study of imperialism, first nations and western and northern North America. Other major archival facilities include: The Provincial Archives of Manitoba, The University of Manitoba Archives and Special Collections, The Manitoba Office of the National Archives, United Church Archives, Western Canada Pictorial Index, the Centre du Patrimoine and the City of Winnipeg Archives.

## M.A. in History , Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

The application deadline is January 15. Please refer to the History Department website for application requirements.

## Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students may choose among three versions of the program: first, a course-based M.A.; second, a thesis-based M.A; and third, an M.A. in Archival Studies. The course-based M.A. requires four courses, three of which should be 7000 -level History courses. In addition, the student is required to select a major field, and must pass both a written and oral comprehensive examination in that field. The thesis-based M.A. requires two 7000 -level courses and the presentation of a thesis. The Archival Studies M.A. requires three graduate courses, an Internship and a thesis.

Second Language Reading Requirement: All graduate students in History are required to demonstrate a reading
knowledge of a second language. Candidates who specialize in Canadian History must display a reading knowledge of French and English. Texts for translations are chosen by the History department. Examinations are conducted by faculty in the language departments at the University of Manitoba.

Expected Time to Graduate: All requirements for the degree of M.A. in History must be fulfilled within five years of the original date of entry to the Program.

## Ph.D. in History,

 AdmissionAdmission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

The application deadline is January 15. Please refer to the History Department website for application requirements.

## Program Requirements

The minimum course requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Doctoral candidates are required to complete at least three 7000-level courses, take candidacy exams in three fields of historical inquiry, and present an original dissertation which makes a distinct contribution to historical knowledge, based on primary sources.

Second Language Requirement: All graduate students in History are required to demonstrate a reading knowledge of a second language. Candidates who specialize in Canadian History must display a reading knowledge of French and English. Texts for translations are chosen by the History department. Examinations are conducted by faculty in the language departments at the University of Manitoba.

Expected time to graduation: All requirements for the degree of Ph.D. in History must be completed within seven years of the original date of entry to the program.

## History

HIST 7190 Studies in American History since 1877 Cr. Hrs. 6 (Formerly 011.719) An examination of selected topics in American history from Reconstruction to the present. Particular topics will be announced each year. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7220 Selected Topics in British History Cr.Hrs. 6 A detailed examination of selected topics and problems in British history. Topics and content will vary from year to year. As the course content will vary from year to year, students

## ACADEMIC CALENDAR

may take this course more than once for credit.
HIST 7230 Nineteenth-Century Britain Cr.Hrs. 6 (Formerly 011.723 ) A study of British culture, politics, and diplomacy, 1830-1900.

## HIST $\mathbf{7 2 4 0}$ State and Society in Latin American

 History Cr.Hrs. 6Readings focused on state/society relations in the history of Latin America since colonial times. After considering different theoretical approaches, the course will analyze recent works that cover different historical periods, countries, issues, and social factors.

HIST 7270 Special Studies in Social History Cr. Hrs. 6 (Formerly 011.727) A seminar course, the content of which will vary from year to year. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7290 Reading Seminar in Canadian History, 1860 to the Present Cr.Hrs. 6
(Formerly 011.729 ) While the specific content may vary from year to year, the general approach shall be to ensure a broad sampling of the secondary literature in Canadian history. Political, social and economic themes will be emphasized and particular concern shall be taken with historiographical controversy. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7330 History of Western Canada Cr.Hrs. 6 (Formerly 011.733) A research course in western Canadian history. The range of subjects will vary from year to year depending on the interests of the students. The subjects range from the fur trade to modern political, social, and economic issues.

HIST 7370 History of Recorded Communication Cr.Hrs. 6 (Formerly 011.737) An examination of aspects of the history of recorded communication from antiquity to the present. The aim of the course is better understanding of the nature of archival records. Emphasis is placed on Canadian examples from the 19th and 20th centuries.

HIST 7380 Selected Problems in Archival Studies Cr.Hrs. 6 (Formerly 011.738) An examination of selected problems in archival theory and administration. The aim of the course is better understanding of the administration of records in archival institutes. Archival theory and administration are studied in relation to the history of recorded communication and records keeping. Emphasis is placed on Canadian examples from the 19th and 20th centuries.

HIST 7390 Internship in Archival Studies Cr.Hrs. 3 (Formerly 011.739) The internship provides an introductory work experience in a Canadian archives to students who have successfully completed the first year of archival studies. The internship will be no less than three months in duration. It is done in the summer after the first year of study.

HIST 7470 The Later Middle Ages Cr.Hrs. 6
(Formerly 011.747) Selected topics in economics, social, cultural, art and religious history of the later medieval world. Students may not hold credit for both HIST 7470 (or 011.747 ) and the former 011.743 .

HIST 7500 Jewish and European History and Historiography Cr.Hrs. 6
This seminar examines issues relating to Jewish history and historiography in the context of European history and historiography.

HIST 7510 Early Modern European History Cr.Hrs. 6 (Formerly 011.751) A seminar which studies early modern Europe from the perspective of new approaches to historiography.

HIST 7520 The Age of Enlightenment Cr.Hrs. 6 (Formerly 011.752) Emphasis on 18th century French intellectual history and its relationship to the origins and course of the French Revolution. Some reading knowledge of French is almost essential.

HIST 7560 The Russian Revolution Cr.Hrs. 6 (Formerly 011.756) The events constituting the Revolution proper (1917-21) will be studied in relation to their historical background and in the light of their subsequent impact both nationally and globally.

HIST 7600 Northern Historical Studies Cr.Hrs. 6 (Formerly 011.760) This course is based upon a number of studies of various aspects of the North. Particular emphasis is given to the North in relation to the fur trade, exploration, and Canadian development.

HIST 7630 History of Health and Disease Cr.Hrs. 6 An introduction to principal issues and approaches in the history of health and disease. It is not meant to be a strictly chronological survey. Topics and themes may include the development of nursing and medical professions; the transformation of the hospital; mental health; alternative therapies; colonization, infectious disease and aboriginal health; and health and the state.

HIST 7640 Social History of Health and Disease in Modern Canada Cr.Hrs. 6
This course explores the history of health and health care in Canada, with a focus on the late 19th and 20th century. Topics will include colonization, infectious disease, and Aboriginal health; the evolution of medical and nursing professions and the modern hospital; mental health; cancer; alternative therapies; childbirth; and old age. Analytical categories of gender, race, ethnicity, class, and sexuality will run throughout the material.

HIST 7670 Studies in Canadian History, 1870-1919 Cr.Hrs. 6 (Formerly 011.767) This seminar will focus on social, intellectual, political, and economic themes, with particular emphasis on the western experience. Specific topics will vary from year to year depending upon the interests of students and instructors. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7700 Historical Method Cr.Hrs. 6
(Formerly 011.770 ) A seminar and workshop in historical method. The topics covered will encompass conventional research, analysis and writing, as well as the application of social science techniques to the analysis of historical problems, the fundamentals of data processing, and computer applications.

## ACADEMIC CALENDAR

HIST 7710 History and Cultural Studies Cr.Hrs. 6 (Formerly 011.771) A working guide to interdisciplinary approaches of the new field of Cultural Studies, examining its principal theoretical bases and existing and potential applications for the historian.

HIST 7730 Modern Latin America Cr.Hrs. 6
(Formerly 011.773 ) An examination of selected themes such as economic and social change, political modernization, and external influences and intervention in Latin America during the 19th and 20th centuries.

HIST 7740 England in the Long Eighteenth
Century Cr.Hrs. 6
(Formerly 011.774) Selected themes in the history of England's long eighteenth century from 1660-1840. Specific topics will vary from year to year but will generally include the transformation of political culture, the consequences of war, the question of national identities, the emergence of commercial society and the changes to social structure.

HIST 7750 Gender History in Canada Cr.Hrs. 6 (Formerly 011.775 ) Explores the roles, images and experiences of masculinity and femininity in the past. Will familiarize students with the changing theoretical and historiographical terrain of gender history. It will draw on the international literature but focus on the history of gender in Canada, examining how historians analyse masculinity, femininity, the family, sexuality, politics, race/ethnicity, moral regulation, class, nation, and colonialism.

HIST 7760 History of Aboriginal Rights Cr.Hrs. 6 (Formerly 011.776) A study of Aboriginal rights from early contact to the present with a particular emphasis on treaties, the courts, and Aboriginal efforts to enforce specific forms of rights.

HIST 7770 Selected Topics Cr.Hrs. 6 (Formerly 011.777) A program of independent reading and/or research on selected topics, undertaken and arranged by a student in consultation with his prospective instructor, upon the approval of the Graduate Chair. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7772 Selected Topics Cr.Hrs. 3
The content of this course varies. Courses offered under this number will be advanced graduate seminars investigating topics that are not part of an existing seminar course. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7774 Independent Study/Reading Cr.Hrs. 3
The content of this course will vary. It will be an advanced, independent reading/study course for graduate students, on a topic of particular interest to the student. Normally the topic will be one that the student cannot study in an existing seminar course. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7820 Issues in Modern Asian History: Selected Topics Cr.Hrs. 3
(Formerly 011.782) Content will vary. Emphasis will be on the analyses of important issues and recent developments in the history and historiography of modern Asia. Consult the History Department for particulars. As the course content will
vary from year to year, students may take this course more than once for credit.

HIST 7910 Studies in Modern World History Cr.Hrs. 6 (Formerly 011.791) A seminar emphasizing the period since 1945. With the agreement of the instructor and depending on the needs of their degree programs, students may select a reading or research option.

HIST 7920 Popular Radicalism in the Modern

## World Cr.Hrs. 6

(Formerly 011.792) Selected topics in the history of popular movements of social and political protest in the modern world. The course considers problems such as the conditions and motivations that give rise to social movements, the development of radical theory and political practice, and the culture of dissent. Students may not hold credit for both HIST 7920 (or 011.792) and the former 011.726 .

HIST 7930 Imperialism, Decolonization and Neo-Colonialism 1700-Present Cr.Hrs. 6
An exploration of theoretically informed literature that has attempted to engage with and understand Imperialism and Colonialism, Anti-colonial nationalism, National liberation movements and Neo-Colonialism. Prerequisite: permission of instructor.

## Human Anatomy and Cell Science

Head: T. Klonisch
Campus Address/General Office: 130 Basic Medical Sciences Building, 745 Bannatyne Avenue
Telephone: (204) 7893652
Fax: (204) 7893920
Email Address: anatomycellsci@umanitoba.ca
Website: http://umanitoba.ca/medicine/anatomy
Academic Staff: Please refer to the website for Faculty information:http://umanitoba.ca/medicine/anatomy

The Department of Human Anatomy and Cell Science offers graduate training at both the M.Sc. and Ph.D. levels. The purpose is to prepare students for careers in biomedical research, for teaching in selective areas of anatomy and admission to clinical programs. It is the only department to offer basic and advanced courses in gross, microscopic and developmental anatomy. It also offers courses in neuroscience, cell biology, electron microscopy and cardiac lipids. These have now become particularly important tools in assessing outcomes associated with use of transgenic and gene knockout animals as models of human disease. Graduate students are also provided with opportunities to teach in various sub-disciplines of anatomy. In addition to transmitting knowledge, they must also generate new knowledge by undertaking meaningful research. The department also provides a fine milieu for cross-fertilization of ideas, and more personalized attention; benefits of a smaller department. The department offers a multidisciplinary program in biomedical applications of imaging and spectroscopy in conjunction with Institute for Biodiagnostics - National Research Council. Various members of the department are affiliated with the Faculty of Dentistry, School of Medical Rehabilitation, and St. Boniface

## 

ACADEMIC CALENDAR
2012-2013 >

General Hospital Research Centre. The department also provides continuing medical education to the allied health science community.

## Fields of Research

The Department consists of a number of faculty, each of which are experts in one or more sub-disciplines of anatomy. Quality teaching programs are enriched by scholarly pursuits of department members who are engaged in research of the highest quality in the following areas: muscle repair, developmental anatomy and biology, cardiology, neuroendocrinology, cell and molecular biology and neuroscience. Graduate students are provided with the opportunity to use a variety of contemporary techniques such as autoradiography, light and electron microscopy, morphometrics, tissue culture and transplantation, high performance liquid chromatography, immunocytochemistry, in situ hybridization, radioimmunoassay, electrophoresis, transgenics, molecular biology, magnetic resonance imaging and spectroscopy.

## Research Facilities

The department is spacious, has excellent facilities and is well equipped for research. The department houses an electron microscopy suite equipped with scanning and electron microscopes, a communal tissue culture, histology, and autoradiography facility, and a satellite animal facility. Individual research laboratories are equipped with microscopes (fluorescence, transmitted light, dissecting), photomicrography apparati, high performance liquid chromatography, and radioimmunoassay capabilities, polymerase chain reaction (PCR), DNA sequencing, genomic cloning and other molecular biology facilities. Personnel also have access to magnetic resonance imaging and MR spectroscopy facilities.

## M.Sc. in Human Anatomy and Cell Science, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The following categories of students may be accepted for graduate study in this department:

- 4-year undergraduate Science degree with a minimum GPA of 3.0.
- Students who have completed a 3-year general undergraduate degree may be admitted following completion of the required pre-Master's courses. Contact the Department for details.
- Graduates in medicine or dentistry holding M.D., D.M.D. (D.D.S.), or equivalent degrees.
- Other suitable graduates will be considered.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies
at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students are required to take Methodology of Research (ANAT 7090) and one of Cell Biology (IMED 7090), Human Microscopic (Histology) Anatomy (ANAT 7360); Human Macroscopic (Gross) Anatomy (ANAT 7370); Neuroscience 1 (ANAT 7270) or Human Developmental (Embryology) Anatomy (ANAT 7380) plus an appropriate course in statistics (Biostatistics 1, CHSC 7470) or equivalent. Students must then complete a thesis.

For supplementary regulations and other information please contact the Department of Human Anatomy and Cell Science.

Second language reading requirement: none

Expected time to graduate: three years

Ph.D. in Human Anatomy and Cell Science, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students are required to take Readings in Anatomy (ANAT 7330) and one of Cell Biology (IMED 7090), Human Microscopic (Histology) Anatomy (ANAT 7360); Human Macroscopic (Gross) Anatomy (ANAT 7370); Neuroscience 1 (ANAT 7270) or Human Developmental (Embryology) Anatomy (ANAT 7380) not already completed at the Master's level. Before receiving the Ph.D. degree, students must have taken an appropriate statistics course (Biostatistics 1 CHSC 7470 or equivalent) if not already completed.

For supplementary regulations and other information please contact the Department of Human Anatomy and Cell Science.

Second language requirement: none

Expected time to graduation: five years

## Human Anatomy and Cell Science <br> ANAT 7060 Advanced Human Macroscopic (Gross)

 Anatomy Cr.Hrs. 6(Formerly 080.706) Dissection, with special emphasis on regions relative to the research projects and interests of students concerned. Both terms. Prerequisite: ANAT 7370 or equivalent; consent of instructor.

ANAT 7090 Methodology of Research Cr.Hrs. 3 (Formerly 080.709) Theoretical and practical instruction in scientific investigation, research design, data analysis and presentation, and writing research proposals.

ANAT 7250 Experimental Teratology Cr.Hrs. 3 (Formerly 080.725) Basic principles of experimental teratology in lectures, seminars, and practical work. The causes, embryological basis, and mechanisms of developmental defects will be covered.

ANAT 7262 Human Neuroscience Cr.Hrs. 3
A comprehensive neuroanatomical study of the human brain and spinal cord. The structure and function of the nervous system will be covered through lectures complemented by laboratory sessions with dissection of the brain and examination of models.

ANAT 7280 Neuroscience II Cr.Hrs. 6 (Formerly 080.728) Application of basic neurological sciences to the -general practice of medicine. Lectures, seminars, clinics. Prerequisite: ANAT 7270 (or 080.727).

ANAT 7320 Introduction to Scanning and Transmission Electron Microscopy Cr.Hrs. 3
(Formerly 080.732) Designed to provide general theoretical aspects of electron microscopy and practical knowledge of electron microscopic laboratory procedures. 3 hours lecture/lab per week, one term. Minimum enrollment: 5 students. Prerequisite: written consent of instructors.

ANAT 7330 Readings in Anatomy Cr.Hrs. 3
(Formerly 080.733) Regular tutorials on selected topics in Anatomy and research related to student's research work. The tutorials will be incorporated into the Department's seminar program.

ANAT 7350 Cardiac Lipids and Membrane Function Cr.Hrs. 3
(Formerly 080.735) Provides detailed account of the role of cardiac bioactive lipids on membrane properties and functions. Two hour tutorials per week, one term. Prerequisite: written consent of instructor.

ANAT 7360 Human Microscopic Anatomy
(Histology) Cr.Hrs. 6
(Formerly 080.736) Microscopic structure correlated to function, of tissues and organs of the human body. Lecture and laboratory course.

ANAT $\mathbf{7 3 8 0}$ Human Developmental Anatomy
(Embryology) Cr.Hrs. 3
(Formerly 080.738) Human development as it is of practical application to medical subjects.

ANAT 7390 Structural Organization in Human

## Anatomy Cr.Hrs. 3

(Formerly 080.739) A course for students participating in physics, chemistry, computer science, engineering, architecture, and mathematics (non-biological areas). A conceptual approach to Human Anatomy, for direct application to information obtained with current and developing techniques for detection, diagnosis, treatment and management of human lifestyle and disease. Prerequisite: consent of instructor(s). Minimum enrollment: 3

ANAT 7392 Human Neuroanatomy Cr.Hrs. 3
(Laborary required). The objective of this course is to provide an introduction to the structure and function of the nervouis system from an anatomical perspective. It is intended primarily for graduate students registered in the Department of Human Anatomy and Cell Science. The course consists of a combination of lectures and laboratory sessions. The lectures will provide an introduction to the basic structure and function of the nervouis system. Disorders of the nervouis system will be discussed to highlight the function of different components of the nervouise system. Laboratory sessions will be scheduled at regular intervals to provide students the opportunity to examine the three-dimensional structure of the nervous system.

ANAT 7400 Morphological Techniques Cr.Hrs. 3 (Formerly 080.740) Designed to develop advanced morphological techniques such as immunohistochemistry, in situ hybridization, immunogold, in situ PCR, cell culture, autoradiography, antero- and retro-grade tracing techniques.

ANAT 7470 GRADUATE GROSS ANATOMY Cr.Hrs. 6 A comprehensive Human Gross Anatomy study of the structures of the whole human body. The structure and function of the body systems will be covered through lectures (such as anatomical, clinical, radiological, cross sectional) and complemented by laboratory sessions with cadaver dissection of whole cadavers, including review and reading sessions.

## Human Nutritional Sciences

Head: J.D. House
Campus Address/General Office: Rm 407 Human Ecology Building
Telephone: (204) 4749901
Fax: (204) 4747593
Email Address: FNGrad@umanitoba.ca
Website:
umanitoba.ca/faculties/human ecology/departments/hns/pro grams/88.html
Academic Staff: Please refer to the website for Faculty
information:umanitoba.ca/faculties/human ecology/program

## ACADEMIC CALENDAR

## s/hns/88.htm

The Department of Human Nutritional Sciences is one of the largest in Canada and the University of Manitoba is the only university in the province to offer graduate programs leading to the MSc. and Ph.D. degrees in the area of nutrition and food sciences. Graduate programs in Human Nutritional Sciences integrate concepts in metabolism, food and community nutrition. Research in experimental nutrition explores the role of nutrients and food components in basic biological processes from the whole organism to the molecular level. Community and clinical nutrition research focuses on policy development, food choice behaviour and novel approaches to disease management. Research related to foods includes investigations of the quality and stability of ingredients, development of functional and nutraceutical components from grains, oilseeds and legumes, and consumer preference and sensory characteristics of foods.

A multidisciplinary approach to research is common, with linkages to university departments such as medicine, agricultural and food sciences, management, dentistry, nursing and physical education and recreation studies, as well as with the Richardson Centre for Functional Foods and Nutraceuticals and the Canadian Centre for Agri-food Research in Health and Medicine. Collaborations outside the University also exist with organizations such as the Canadian International Grains Institute, the Grain Research Laboratory, Agriculture and Agri-Food Canada, Manitoba Health, the Winnipeg Regional Health Authority and the Manitoba Institute of Child Health.

Courses offered in nutrition and metabolism address topics in phytochemicals, proteins, energy and carbohydrates, lipids, vitamins, minerals and trace elements. Community nutrition courses include topics in qualitative research, epidemiology, public policy, nutrition education and theoretical approaches to dietary change interventions. Topics related to food research include nutraceuticals, functional foods, lipids, flavour chemistry and sensory properties of foods.

An informal atmosphere exists with free interaction between faculty and graduate students. The department attracts local, national and international students, many of them holders of prestigious scholarships. Graduate student training in the Department of Human Nutritional Sciences has led to careers as: research scientists in academic, public and private sectors, technical specialists and research supervisors in food and pharmaceutical industries, food and nutrition policy analysts, food service managers, health and wellness specialists and educators, nutrition consultants, university and government employees, food quality assessment and research supervisors in government and agricultural laboratories.

Graduates of the M.Sc. program are qualified to meet the demands of the public, industry and government for food and nutrition specialists skilled in planning, administering and evaluating programs. The program also includes training in biochemical and analytical methods.

Training at the doctoral level is offered as a PhD in Human Nutritional Sciences or as a Ph.D. in Applied Health Sciences. It is designed for individuals who design and execute major research projects, train other researchers, serve as senior advisors consultants in health, social or economic policy and planning, and teach in nutrition or foods areas.

## Fields of Research

Specific areas of research interests include the following: role of diet in health and disease, community nutrition, including nutritional assessment, the study of consumer perceptions and food choices, and evaluation of nutrition education and programs; identification and development of functional foods and nutraceuticals, and evaluation of their health benefits; effect of nutrients on body defence and immune systems including those involved in cell damage and repair and detoxification of environmental pollutants; nutritional biochemistry and nutrient-gene interactions; functional and health aspects of nutrients and foods in pediatric and geriatric populations; application of the knowledge of functional foods and nutraceuticals in the design of food products for the general population and specific groups of individuals; effects of modification and processing of oilseeds and oils on quality, stability and performance of foods; relationship of sensory and chemical flavour properties of foods; food security and policy development, cultural and social aspects of food choice behaviours.

## Research Facilities

Human Nutritional Sciences houses laboratories for basic as well as applied research. Laboratories such as the Canada Foundation for Innovation Nutritional Sciences Research Facility and the Richardson Centre for Functional Foods and Nutraceuticals are equipped with the tools to carry out research at the level of the whole human, animal, cell, and molecule. Facilities for diet preparation for human and animal dietary intervention studies are available as well as modern analytical instrumentation and cell culture facilities. The George Weston Ltd. Sensory and Food Research Laboratory, with controlled ventilation and lighting and a computerized sensory analysis system, provides a controlled setting for testing of food products. This facility is used to evaluate the effects of food ingredients and nutraceuticals, storage conditions and preservation on food quality and consumer acceptance as well as on the commercial viability of a food or food products.
M.Sc. in Human Nutritional Sciences, Admission

To be admitted to the M.Sc. program, a candidate must have a GPA of at least 3.0/4.5. A 4-year undergraduate degree from the Department OR another undergraduate degree with three credits of Physiology, three credits of Biochemistry and six credits in upper level foods or nutrition courses are required for unconditional admittance.

## 

ACADEMIC CALENDAR

Students with a 3-year undergraduate degree enter at the Pre-Master's level, in which at least 18 credit hours of course work are required. Pre-Master's students are not eligible for graduate student stipends and do not carry out a research project.

Students applying to a Ph.D. program should hold a thesisbased Master's degree in nutrition or a related field. Alternatively, evidence of an extensive publication and research background also may be considered.

## Application Deadlines

Canadian and U.S. students should send their application and all supporting documentation to the Faculty of Graduate Studies, at least three months prior to their intended start date. International students should send their application and all supporting documentation to the Faculty of Graduate Studies, at least six months prior to their intended start date.

## Program Requirements

As part of the minimum 12 credit hrs required in the program, all students are required to take HNSC 7200 as well as 6 credit hours in Human Nutritional Sciences at the 700/7000 level. These 6 credit hours must comprise courses from at least two of the following three general subject areas: Foods (Flavour Chemistry and Sensory Properties of Food, Chemistry and Function of Food Lipids, Nutraceuticals in Human Health, Advanced Problems in Foods), Community Nutrition (Qualitative Research in Nutrition, Nutrition in Public Policy, Theoretical Approaches to Dietary Change Interventions, Nutritional Epidemiology, Advanced Problems in Nutrition) and Metabolic Nutrition (Vitamin Nutrition and Metabolism, Mineral and Trace Element Nutrition and Metabolism, Lipid Nutrition and Metabolism, Protein Nutrition and Metabolism, Phytochemical Nutrition and Metabolism, Energy and Carbohydrate Nutrition and Metabolism).

Note that in addition to the required courses in the M.Sc. program, if a student's background is weak in specific areas related to his/her area of research, additional courses may be required. Any additional course requirements beyond the minimum stated above and subject to the Faculty of Graduate Studies' maximum of 24 credit hrs will be determined by the student's thesis advisory committee and may include courses in statistics, communications, research methods or specialized courses in foods or nutrition. Students must also complete a thesis project in food and/or nutrition research.

Second language reading requirement: none, unless specified in program of study.

Expected time to graduate: two years.

## PhD in Human Nutritional Sciences

## Admission

Applicants must meet the University of Manitoba Graduate Studies general regulations. A complete application will include at least one letter of recommendation from the student's intended advisor(s), attesting to the suitability of the candidate for Ph.D. studies in this program and when applicable another letter from the student's Master's degree advisor or equivalent.

The candidate will also provide a reference letter from someone who can provide general information on the ability of the candidate's ability to complete a graduate program.

## Application Deadlines

Canadian and U.S. students should send their application and all supporting documentation to the Faculty of Graduate Studies, at least three months prior to their intended start date. International students should send their application and all supporting documentation to the Faculty of Graduate Studies, at least six months prior to their intended start date.

## Program Requirements

For students entering the program with an MSc in another discipline or from another university, the course-work requirement will be determined by the Human Nutritional Sciences Graduate Studies Committee (HNSGSC). In considering the course-work requirement, the HNSGSC will be guided by the principle that the total number of courses taken in both the MSc and PhD will be the equivalent of 18 credit hours, of which 15 credit hours must be in nutrition at the 7000 level. A second guiding principle will be that at least three credit hours of the nutrition courses taken (not including HNSC 7200.) will be from areas not directly related to the research area of the student and supervisor. All PhD students will be required to take HNSC 7200.

For students entering the program with an MSc in HNS from The University of Manitoba, the course-work requirement will consist of a minimum of 6 credit hours in HNS courses, all at the 7000 level. Of these 6 credit hours, three will consist of the seminar course: HNSC 7200. This will result in a total of 18 credit hours being taken in the MSc and PhD programs, if both degrees are taken at The University of Manitoba. Of these 18 credit hours, 15 will be HNS courses.

## Human Nutritional Sciences

HNSC 7070 Advanced Problems in Foods Cr.Hrs. 3 (Formerly 030.707) Selected topics related to consumer acceptability of foods.

HNSC 7110 Advanced Problems in Nutrition Cr.Hrs. 3 (Formerly 030.711) Studies of selected problems and programs in community nutrition emphasizing program planning and evaluation. Offered 1999-2000 and alternate years.

HNSC 7200 Seminar in Food and Nutrition
Research Cr.Hrs. 3

## ACADEMIC CALENDAR

(Formerly 030.720) A critical study of selected topics in food and nutition research involving oral presentations and discussions. This is a required course for all M.Sc. students in the department of Foods and Nutrition.

HNSC 7440 Protein Nutrition and Metabolism Cr.Hrs.1.5 (Formerly 030.744) Lectures and critical reviews will be used to discuss recent/significant research advances in the fields of protein nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7440 by the Department of Animal Science. Offered in 2007-08 and alternate years thereafter.

HNSC 7450 Energy and Carbohydrate Nutrition and Metabolism Cr.Hrs.1.5
(Formerly 030.745) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of energy/carbohydrate nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7450 by the Department of Animal Science. Offered in 2007-08 and alternate years thereafter.

HNSC 7460 Lipid Nutrition and Metabolism Cr.Hrs.1.5 (Formerly 030.746) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of lipid nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7460 by the De-partment of Animal Science. Offered in 2006-07 and alternate years thereafter.

HNSC 7470 Vitamin Nutrition and Metabolism Cr.Hrs.1.5 (Formerly 030.747) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of vitamin nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7470 by the Department of Animal Science. Offered in 2006-07 and alternate years thereafter.

HNSC 7480 Mineral and Trace Element Nutrition and Metabolism Cr.Hrs.1.5
(Formerly 030.748 ) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of mineral nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7480 by the Department of Animal Science. Offered in 2006-07 and alternate years there-after.

HNSC 7490 Phytochemical Nutrition and
Metabolism Cr.Hrs.1.5
(Formerly 030.749) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of phytochemical nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7490 by the Department of Animal Science. Offered in 2007-08 and alternate years there-after.

HNSC 7500 Chemistry and Function of Food
Lipids Cr.Hrs.1.53
(Formerly 030.750 ) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of food lipid development, processing, analysis and function. Offered in 2002-03 and alternate years thereafter.

HNSC 7510 Flavour Chemistry and Sensory Properties of Foods Cr.Hrs.1.5
(Formerly 030.751 ) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of
food flavour and off-flavour chemistry and in the mechanics of sensory assessment. Offered in 2002-03 and alternate years thereafter.

HNSC 7520 Nutraceuticals in Human Health Cr.Hrs.1.5 (Formerly 030.752) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of nutraceuticals and the impact of food and raw materials on nutrition and human health. Offered in 2003-04 and alternate years thereafter.

HNSC 7530 Nutrition in Public Policy Cr.Hrs.1.5 (Formerly 030.753) Focus on public policy related to the nutrition and health status of Canadians, including food and nutrition policies, health public policy, influence of trade regulations, context of health systems, social and economic environments. Offered in 2002-03 and alternate years thereafter. Prerequisite: permission of instructor

HNSC 7540 Nutritional Epidemiology Cr.Hrs.1.5 (Formerly 030.754) Focus on epidemiology principles and survey techniques for assessing and predicting individual nutritional status, assessing relevant community resources and reporting results to granting agencies and decision makers. Offered in 2003-04 and alternate years thereafter. Prerequisite: permission of instructor

HNSC 7550 Qualitative Research in Nutrition Cr.Hrs.1.5 (Formerly 030.755) A critical examination of methodological, analytical and interpretive issues in qualitative research as applied to nutrition and food-related issues. Offered in 200304 and alternate years thereafter. Prerequisite: permission of instructor

HNSC 7560 Current Topics in Human Nutrition Cr.Hrs.1.5 (Formerly 030.756) Lectures and critical reviews will be used to discuss recent/significant research advances in nutrition and foods research.

HNSC 7570 Theoretical Approaches to Dietary Change Intervention Cr.Hrs.1.5
(Formerly 030.757) Theoretical approaches to dietary behaviour change and critical analysis of their application in nutrition intervention programs for individuals and populations. Offered in 2003-04 and alternate years therafter. Prerequisite: permission of instructor

HNSC 7580 Applied Nutrition Cr.Hrs. 6 (Formerly 030.758) Experience in the application of nutrition theory to the management of nutrition related disease in a clinical setting supervised by registered dietitians. Prerequisites: Undergraduate coursework which meets the requirements for admission to Dietitians of Canada. An application is required for limited enrolment. Not to be used toward the fulfillment of the minimum 12 credit hours required in the program. Not to be held with the former 030.719.

## Icelandic

Head: (Acting) Birna Bjarnadóttir
Campus Address/General Office: 357 University College
Telephone: (204) 4748487

Fax: (204) 4747591
Email Address: um icelandic@umanitoba.ca
Website: http://umanitoba.ca/icelandic
Academic Staff: Please refer to the website for Faculty information:http://umanitoba.ca/icelandic

The Department of Icelandic offers innovative and challenging programs of study leading up to the M.A. degree. The aim of the program is to develop student knowledge of Icelandic language, literature and culture and to train students in the methods of scholarship. Graduate courses are offered on demand and can often be tailored to particular interests. Courses in the Icelandic language and literature allow students access to the fascinating world of medieval Icelandic culture, and constitute an important addition to the study of medieval, religious, literary and linguistic history of Western Europe. Iceland's size, geographical isolation, relatively homogeneous population, and history of documentation has made it a popular area for comparative research in a wide range of disciplines. Modern Icelandic provides access to the wealth of sources recorded in Iceland and North America relating to the realms of religion, law and politics, geology and culture, that allow for such comparative studies. Courses which focus on North American-Icelandic history, culture, literature, film and translation provide unique insights into Canadian culture and history, and allow access to sources which enable students to do comparative research in the context of Trans-Atlantic culture.

## Fields of Research

The department actively pursues and promotes the study of the Icelandic language and literature as well as North American-Icelandic culture. Research activities in the department have served to examine the role of North American Icelanders as a cultural group in Canada and to highlight the contribution of Icelandic Canadians to Canadian and Icelandic culture and literature through publications, translations and conferences. Scholarship in the department has also focused on the history of aesthetics in Icelandic writings, the challenge of the saga heritage and the poetics of immigration. The department supports a strong program of scholarly publications, of which the Icelandic Studies Series of the University of Manitoba Press is an example. Publications include: The Book of
Settlements: Landnámabók (1972); A History of the Old Icelandic Commonwealth (1974); Edda: A Collection of Essays (1983); and Laws of Early Iceland: Grágás I \& II (1980, 2000).

## Research Facilities

The Department of Icelandic is complemented by the Libraries Icelandic Collection, founded in 1936. It has been designated a selective depository by the Government of Iceland, receiving a limited number of the more important publications to come out in Iceland each year. This collection is the largest of its kind in North America excepting the Fiske collection at Cornell University, and includes books, periodicals, newspapers, manuscripts, microfilms and audiovisual materials. It is the main research facility for research on Icelanders in North America.

## M.A. in Icelandic ,

 AdmissionAdmission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact the Icelandic Department for further information.

## Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date.
International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

## Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, requirements for the M.A. degree include a thesis and three courses (18 credit hours) at the 700/7000 level in the Icelandic Department.

Second Language Reading Requirement: Yes

Expected Time to Graduate: Two years

Ph.D. in Icelandic,
There is no Ph.D. Program in Icelandic.

## Icelandic

ICEL 7040 Advanced Icelandic Cr.Hrs. 6
(Formerly 012.704) Advanced modern Icelandic usage through translation (English-Icelandic/Icelandic-English), practical exercises, and free composition. Study of fictional and non-fictional texts.

ICEL 7050 Individual Modern Authors Cr.Hrs. 6
(Formerly 012.705) Icelandic literature in the 20th century. Study of modern and contemporary Icelandic literature focusing on a major author.

ICEL 7060 Old Icelandic Prose: Seminar Cr.Hrs. 6 (Formerly 012.706) Study of Old Norse-Icelandic sagas focusing on a specific genre or theme.

ICEL 7070 Old Icelandic Poetry: Seminar Cr.Hrs. 6 (Formerly 012.707) Study of Old Norse-Icelandic poetry focusing on a specific genre or theme.

## ACADEMIC CALENDAR

## Immunology

The Department was established at the University of Manitoba in 1969 as the first Department of Immunology in Canada. Today it is known and respected internationally as a centre for Immunology research and teaching. A major strength of the program is the excellent research environment, reflected in the strong research faculty, awardwinning students, high levels of external research funding and availability of leading-edge research equipment. The Department offers a diverse program of graduate studies and research in Immunology, leading to M.Sc. and Ph.D. degrees. The main objectives of the Program are to: 1) facilitate development of a solid academic base and critical thinking skills in the field of immunology; 2) develop expertise in modern techniques of immunologic research, through a strong laboratory research training component; 3) provide students with exposure to a wide range of biomedical research areas to foster development of a broad scientific perspective and multi-disciplinary outlook; 4) provide opportunities for students to develop essential professional skills, such as oral and written scientific communications, grant-writing, mentorship, communicating science to the media and public, job searches, interpersonal skills and intellectual property. Traditional coursework is kept to a minimum, and alternative assessment approaches are used to reduce in-class exams, such as student debates, student-led "mini-teaching" sessions or take-home exams based on experimental design and problem-solving. Our weekly seminar series brings in an excellent array of local, national and international speakers to provide students with exposure to a wide range of research topics and foster multidisciplinary thinking. Our Department hosts a number of activities in which our students participate in teaching what they do to undergraduates or high school students. In addition to the academic program components, the laboratory research component of the program features an excellent range of unique technical resources and expertise. A culture of collaborative sharing of resources and expertise further facilitates development of students' research. Unique funding opportunities available to Immunology students include the Mindel and Tom Olenick Research Award in Immunology Entrance Scholarship (administered by the University of Manitoba). For more information consult our webpage:
http://umanitoba.ca/faculties/medicine/units/immunology/.

## Fields of Research

The research program of the over 30 Faculty members who participate in the Program in Immunology is strongly supported by peer-reviewed external funding from international, national and local sources. Immunology researchers at the University of Manitoba have as their main research interests: Allergy and asthma, antibody production, autoimmunity, including arthritis and colitis, cancers of the immune system, including leukemia and lymphoma, cancer stem cells, immune responses to vaccination, gene therapy of immune cells, immune regulation and immune memory, immune response to viral, bacterial and parasitic diseases, leukocyte cell biology and signal transduction, leukocyte receptors and adhesion molecules, molecular genetics of the immune system, proteomics and systems biology, and
transplantation immunology. Numerous collaborations between those interested in fundamental and clinical immunology are in place, providing opportunities for translational research.

## Research Facilities

The Department is Icoated in new state of the art, openconcept laboratories in the Apotex Centre on the University's Bannatyne Campus. The Program offers extensive instrumentation for research in contemporary immunology. These include basic and clinical immunology research laboratories, core equipment for a broad range of molecular and cellular immunology techniques, housing for small animals (both conventional SPF and for creation of transgenic mice), instrumentation for flow cytometry analysis and high speed sorting, confocal microscopy, a proteomics centre, a student computer laboratory and access to departmental and University wide libraries. Strong scientific links exist with the Manitoba Institute of Child Health, Manitoba Institute of Cell Biology, Manitoba Centre for Proteomics, National Microbiology Laboratory, Health Sciences Centre, Children's Hospital and Canadian Blood Services, all in Winnipeg.

## M.Sc. in Immunology,

 AdmissionAdmission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

For International applications, please note that although the Faculty of Graduate Studies requires a minimum cumulative grade point average of 3.0 (B) for admission, and a TOEFL score of 213 (computer based test), or 550 (paper based test) or 80 (internet based test), many Departments have higher minimum standards.

The Department of Immunology requires a minimum TOEFL score of 250 (computer based) or 600 (paper based) or 88 (internet based, with a minimum of 20 points from each section of the test.). In most cases a grade point average (GPA) above 3.5 is needed to be competitive for available positions in the program.

## ACADEMIC CALENDAR

## Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. IMMU 7020 is the required core course.

Students whose first language is not English must contact the University of Manitoba English Language Centre to register for the Canadian Test of English for Scholars and Trainees (CanTEST). This test must be taken while the student is in the first year of his/her graduate program.

Second language reading requirement: none

Expected time to graduate: typically 2-3 years.

The Department of Immunology Supplemental Regulations may be printed from their website.

Ph.D. in Immunology,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

For International applications, please note that although the Faculty of Graduate Studies requires a minimum cumulative grade point average of $3.0(B)$ for admission, and a TOEFL score of 213 (computer based test), or 550 (paper based test) or 80 (internet based test), many Departments have higher minimum standards.

The Department of Immunology requires a minimum TOEFL score of 250 (computer based) or 600 (paper based) or 88 (internet based, with a minimum of 20 points from each section of the test.). In most cases a grade point average (GPA) above 3.5 is needed to be competitive for available positions in the program.

February 1
August 1
December 1
February 1

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Candidates admitted directly into the Ph.D. program or wishing to transfer from the M.Sc. to the Ph.D. program must pass a thesis proposal defence taken within the first 18 months of their admission into the Department Details of this defence is available on the Department of Immunology website. In addition, the candidacy examination required of all students in the Ph.D. program will be in the
form of a research proposal. Details on this examination can be obtained from the department web site.

Students whose first language is not English must contact the University of Manitoba English Language Centre to register for the Canadian Test of English for Scholars and Trainees (CanTEST). This test must be taken while the student is in the first year of his/her graduate program.

Second language requirement: none
Expected time to graduation: 4-5 years

The Department of Immunology Supplemental Regulations may be printed from the website.

## Immunology

IMMU 7020 Immunobiology Cr.Hrs. 6
(Formerly 072.702) This course provides a broad perspective of the evolving concepts of the mechanisms underlying the regulation of the immune response. Students admitted to this course will be expected to have sufficient background knowledge of general biology. Prerequisites: IMMU 7070 (or 072.707) plus cognate courses in molecular biology, or by consent of instructors.

IMMU 7030 Seminars in Immunology Cr.Hrs. 3 (Formerly 072.703) Presented by senior graduate students on advanced research topics not directly related to the student's thesis subject. The purpose of this course is to test the student's ability to evaluate critically a specialized topic both orally and in an essay form. This course is graded pass/fail. Prerequisites: IMMU 7110 (or 072.711) or IMMU 7020 (or 072.702 ), or by consent of instructors.

IMMU 7040 Immunological Methodology Cr.Hrs. 3 (Formerly 072.704) This lecture course is designed to provide an understanding of modern methods used for basic research in Immunology or other biomedical disciplines utilizing immunological techniques. Prerequisite: IMMU 7070 (or 072.707), or by consent of instructors.

CandMMU 7070 Introductory Immunology Cr.Hrs. 3 Formerly 072.707) This course provides a broad survey of July dodern immunology, covering such topics as molecular Novernpts of antigenic specificity, chemistry of antibodies and Marcheir interactions with antigens and cells, regulation of the Marcmmune response, transplantation and tumor immunology.
May frerequisites: general courses in chemistry, biochemistry and biology, or by consent of instructors.

IMMU 7090 Selected Topics in Immunology Cr.Hrs. 3 (Formerly 072.709) Lectures, tutorials and assigned reading on topics not normally covered in other courses such as IMMU 7110 (or 072.711 ) and IMMU 7020 (or 072.702) or 036.719 . Course content will vary depending on the advances in the field and research interests of the Department. Prerequisites: Consent of instructors.

IMMU 7100 Advanced Topics in Immunology Cr.Hrs. 3 (Formerly 072.710) Lectures, tutorials and assigned reading

## 

ACADEMIC CALENDAR 2012-2013 •
at an advanced level on topics which may have been covered in other courses offered by the Department and which require treatment at a higher level either due to advances in the field or changes in the research interests of the Department. Prerequisites: IMMU 7110 (or 072.711) and/or IMMU 7020 (or 072.702), or by consent of instructors. This course is graded on a pass/fail basis.

IMMU 7110 Molecular Immunology Cr.Hrs. 6
(Formerly 072.711) This course covers in depth the structure, molecular biology and function of immunoglobulins, histocompatibility antigens, regulatory factors receptors and adhesion molecules on cells of the immune system; mechanisms of immunochemical reactions and the immunogenicity of antigens. Prerequisites: IMMU 7070 (or 072.707) plus undergraduate courses in organic chemistry, physical chemistry and biochemistry, or by consent of instructors. Not to be held with the former 072.701.

Academic Staff

See the academic staff lists in departments of Animal Science, Food Science and Human Nutritional Sciences.

## Program Information

Programs at the doctorate level are administered through the Interdepartmental Ph.D. program in Food and Nutritional Sciences involving the departments of Human Nutritional Sciences, Food Science, and Animal Science. Admission usually requires a research Master's degree in an
appropriate discipline (food science, human nutrition, biochemistry, microbiology, etc.)

## Fields of Research and Research Facilities

See information in this Calendar under the three participating departments

## Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, a research Master's degree in the general areas of food or nutritional sciences is required.

## Application Deadlines

Students may begin their program on either September 1, January 1, May 1 or July 1. For admission on each of these start dates, Canadian/U.S. students should send their application forms with complete supporting documentation to Faculty of Graduate Studies no less than six (6) months before the intended start date. Non-Canadian/US students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than 7 months before the intended start date.

## Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. All students are required to take a minimum of 15 credit hours of courses at the 700/7000 level which will include FDNT 7120 Advanced Seminar in Food and Nutritional Sciences and at least one 700/7000 level course from each of the two participating food departments and complete a thesis research program. For additional information, candidates should contact the head of any of the three participating departments.

Second language reading requirement: none

Expected time to graduate: four years.

Further are available in the Calendar under Animal Science, Human Nutritional Science and Food Science. For additional information, candidates should contact the head of any of these participating departments.

## 

ACADEMIC CALENDAR

## Academic Staff

See academic staff lists in the departments of: Anima Science, Plant Science, Biochemistry and Medical Genetics, Microbiology and Zoology.

## Program Information

A broad knowledge in the field of genetics requires a study program of an interdisciplinary nature. Courses in genetics and directly related fields are currently offered in many different departments, and although the term "genetics" may not always appear as such in the course title, the subject matter is largely genetic in content.

To accommodate students wishing to do graduate work in genetics and in recognition of the multidisciplinary nature of genetics, an interfaculty graduate program in genetics has been established which is organized by the Genetics Program Committee comprising representatives from the faculties of Agricultural and Food Sciences, Medicine, and Science. The broad base of the Genetics Program Committee will provide the student with the best possible advice on program selection for a career in genetics. The Department of Biochemistry and Medical Genetics is administratively responsible for students registered in the human genetics component of the Genetics Graduate Program. Students wishing to undertake graduate studies in human genetics should seek advice directly from the chair of the graduate studies committee of the Department of Biochemistry and Medical Genetics.

## Admission

The first step in the application process is for the applicant to contact directly the professor with whom he or she wishes to study. If a professor can be identified who is willing to supervise the student's research, and if funding for the student is available, a formal application should be submitted. Students wishing to undertake studies in human genetics should apply directly to the Department of Biochemistry and Medical Genetics. Students wishing to enter the Graduate Genetics Program in areas other than human genetics should apply to the chair of the Genetics Program Committee. Admission will be competitive and acceptance will be based on academic credentials and subject to availability of space and resources. The normal entrance requirements will be an Honours B.Sc. with emphasis on genetics. Students not fulfilling the entrance requirements will be required to undertake a pre-Master's program designed specifically to fulfil deficiencies in their background.

## Application Deadlines

The Genetics Graduate Program allows students to begin their program on either 1 September, 1 January or 1 May. For admission for each of these start dates, Canadian students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than four (4) months before the intended start date. Non-Canadian students should send their applications with
complete supporting documentation to arrive no later than seven months (7) before the intended start date.

Interdepartmental M.Sc. in Genetics,
Program Requirements Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of 12 credit hours exclusive to IMED 7130 Graduate Seminar in Genetics 1, will be required. A minimum of six credit hours must be obtained in courses listed in the Genetics course list. A thesis demonstrating proficiency in the field of study chosen by the student will be required.

## Interdepartmental Ph.D. in Genetics, Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of 12 credit hours of coursework at the 700/7000 level, exclusive of IMED 7140 Graduate Seminar in Genetics 2, beyond the Master's level will be required. At least six of the 12 credit hours must be obtained for courses in the Genetics course list.

A qualifying examination may be held upon the recommendation of the selection committee and/or supervisor and the advisory committee. The format of the examination will be determined by the examining committee and the student notified no less than three months before the date of the examination.

A candidacy examination will be required of all students registered for a Ph.D. examination as specified by the Faculty of Graduate Studies. The majority of members of the examination committee will be members of the Genetics Program Committee.

## Interdepartmental Interdiscipline Grad,

 IMED 7090 Cell BiologyIMED 7240 Nucleic Acids: Manipulation, Structure and Function

Individual Interdisciplinary Programs,
The Faculty of Graduate Studies provides the special opportunity to students, with a proven track record, of registering in an Individual Interdisciplinary Program ${ }^{1}$. Such a program combines substantial aspects of the existing programs of at least two departments into a unique syllabus which lies outside of established department boundaries. Since the Individual Interdisciplinary Program places additional demands and responsibilities upon the student to assemble a committee, to formulate a research proposal in advance of admission and, to negotiate a program of studies with his/ her committee, the eligibility requirements are more stringent than those for discipline based graduate programs. The regulations presented below and all general regulations of the Faculty of Graduate Studies (e.g., admission requirements, registration procedures, thesis regulations, minimum course requirements, advance and transfer credit, time limits, requirements for graduation, oral examinations, academic performance and the like) apply to Individual Interdisciplinary Programs. These regulations can be accessed from the Faculty of Graduate Studies web site: http://http://umanitoba.ca/graduate studies/programs/master
$\mathrm{s} / \mathrm{iip} /$ regulations.htm. Each department currently offering a discipline-based graduate level program is eligible to offer an individual interdisciplinary stream ${ }^{2}$ in which the subject area of that department is the major focus ${ }^{3}$ of the Individual Interdisciplinary Program ${ }^{4}$. The department is thus considered the "home" department of the IIP student ${ }^{5}$. (Note: the department should be contacted ahead of time to ensure their participation in the IIP) Because of the individuality of each program and the need for special guidance, an Advisory Committee is required for all IIP students.

The "home" Department Head (or designate) will ensure that the student and the advisor receive information regarding scholarship and relevant Faculty procedures and the like (i.e., information that would normally be distributed to Department heads and/or Chairs of graduate programs).

Eligibility for Admission Interdiscipline Grad, In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, applicants for an Individual Interdisciplinary Program are required to have a superior academic record (3.5 GPA or equivalent) with a substantial grounding in at least one of the disciplines ${ }^{6}$ of the proposed Individual Interdisciplinary Program. The application procedures and regulations, as determined by the Faculty of Graduate Studies, can be found on the Faculty of Graduate Studies web site:
http://umanitoba.ca/graduate studies/programs/masters/iip/r egulations.htm Please be aware that the home department may have additional application requirements and procedures and should be contacted directly for further information.

Application Deadlines Interdiscipline Grad, Contact the home department for applicable deadlines for submission of application materials.

## Master's Individual Interdisciplinary Programs, Admission

Students should normally have an Honours Bachelor degree or equivalent in one of the disciplines of the proposed IIP.

## Program Requirements

In addition to the minimum program requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, please consult the Faculty of Graduate Studies web site: http://umanitoba.ca/graduate studies/programs/masters/iip/d egree req.htm

Ph.D. Individual Interdisciplinary Programs, Admission

## ACADEMIC CALENDAR <br> 2012-2013 •

Students should normally ${ }^{7}$ have a Master degree or equivalent in one of the disciplines of the proposed IIP.

## Program Requirements

In addition to the minimum program requirements of the Faculty of Graduate Studies that are found in the Graduate Studies Regulations Section of this Calendar, please consult the web:
http://umanitoba.ca/graduate studies/programs/phd/iip/degr ee req.htm
${ }^{1}$ Where the word department appears, the word Faculty or Institute is to be assumed where appropriate.
${ }^{2}$ A department's eligibility to offer an Individual Interdisciplinary Program is limited to the level of the degree currently being offered by the department. For example, if only a Master's level program is offered by the department, then that department is eligible to be the home department for students in a Master's level Individual Interdisciplinary Program, only. Although this particular department may participate as a minor department in a Ph.D. IIP, it is not eligible to be the home department of a Ph.D. IIP student. A Faculty member in a department without a graduate program at the level he/she wishes to supervise an IIP student may do so providing that the Faculty member is a member of the Faculty of Graduate Studies and has the approval to supervise from the "Home" department. Note: the supervisor may or may not need to be appointed as an adjunct to the home department.
${ }^{3}$ "Major Focus" refers to the subject area/discipline of a department in which the credit hours of instruction to be taken are more than or equal to those to be taken in any other participating department. In a two-department combination, assuming a 15 credit hour program, 9 credit hours of course work would be taken in the major focus area, with a minimum of 6 to be at the 700/7000 level.
${ }^{4}$ The intent of an IIP is to bring together existing disciplinebased programs in such a way as to form a unique program tailored to an individual research project and/or study aim that cannot otherwise be accommodated by existing programs. Masters programs are used to construct a Masters level IIP and Ph.D. programs are the building blocks for a Ph.D. level IIP. While there is some flexibility in the actual programs used to construct an IIP, it is imperative that a Masters level IIP contain mostly existing Masters level programs, and Ph.D. programs must make up the majority if not all the component programs in a Ph.D. IIP.
${ }^{5}$ The "home" department counts this student as part of their complement for statistics purposes and would indicate them as "IIP Stream" students.
${ }^{6}$ It is anticipated that substantial grounding will be in the major focus area; if not, then justification must be given for consideration.
${ }^{7}$ Students who have completed an IIP Masters, may be
considered for entry into an IIP PhD, provided that their
proposed course work and research in the PhD program is a clear extension or follow up of the Masters program. The determination of the appropriateness of the masters work as a prerequisite to the proposed PhD study will be made by the PhD Selection (Admission) Committee. The Dean of Graduate Studies (or delegate) must be present at such meetings.

## Ph.D. Studies for Aboriginal Scholars,

Contact: Dr. Deo H. Poonwassie
General Office: 500 University Centre
Telephone: (204) 4747070
Fax: (204) 4747553
E-mail: poonwass@ms.umanitoba.ca
The University of Manitoba takes pride in providing worldclass education to many of Canada's best and brightest students. By recognizing the potential in all who have a desire to learn and by offering students an exceptional education in a supportive environment, the university is proud to open its doors to a cohort of Aboriginal students at the Ph.D. level. The University of Manitoba is committed to recruiting and graduating Aboriginal students at all levels and areas of studies.

The University recognizes that the province has a large Aboriginal population. While strides are being made at the undergraduate level with a significant number of teachers, social workers, lawyers and medical doctors as evidence, there is an urgent need for expertise at the graduate level. This opportunity for those holding Masters degrees or honours Bachelor's degrees will fill a major void that currently exists in areas including university and college leadership positions in an environment of perpetual change. This is the university's contribution to growing our own expertise.

## Who Is Eligible

The University of Manitoba invites applications for Ph.D. studies from First Nations, Inuit and Metis scholars. Priority will be given to Manitobans.

## The Cohort

The Faculty of Graduate Studies is committed to facilitating the admission of a cohort of 15 Aboriginal students for doctoral studies. The cohort model of delivery will serve Aboriginal Ph.D. students to focus on common critical issues that deserve in-depth research and investigation. Though not a homogeneous group, students will have enough common experiences and goals to meld into a viable learning community. The Aboriginal context is important as a glue that will allow for peer cooperation and support. It will be possible to offer students common courses (if needed) such as indigenous research methodologies, critical paper writing and analysis; and spiritual guidance. The intent is to create a firm foundation that will work for success. With this heightened confidence and awareness, Aboriginal students will be able to contribute to the education of other persons in academia as well. Interdisciplinary and interpersonal

## ACADEMIC CALENDAR

communications will promote cohort cohesion for Aboriginal Leadership in a changing globalized community.

## Admission Requirements

The minimum requirement for admission to the Ph.D. program is normally a Master's degree or equivalent from a recognized university and a cumulative GPA of 3.0 or equivalent in the last two years of full time study ( 60 credit hours). With special recommendation of the department concerned, applicants with an honours Bachelor's degree may be considered for entry to Ph.D. studies. Applicants must meet the specified requirements of a department or faculty. Some departments may require admission tests such as the Graduate Record Examination (GRE), the Graduate Management Aptitude Test (GMAT) or a qualifying research paper.

For further information applicants may contact the faculty or department in which they wish to study. Students may apply to any department or faculty that offers a Ph.D. program of studies.
***There will be no admissions for the Fall 2011 term.

## Program Requirements
