UM SAFE APP

UM Safe is an essential tool that sends safety alerts and provides instant access to campus safety resources. The app includes features such as “Work Alone” and “FriendWalk”, as well as a Mobile BlueLight feature similar to the stationary blue lights on our campuses.

Some of the app features involve interaction with Security Services, and some will be optional — while other features have no interaction with Security Services.

Used by hundreds of higher education institutions and millions of people around the globe, the app was developed by App Armor and is custom branded for the U of M.

The free mobile safety app for students, staff, and faculty is available for iPhone (App Store) and Android (Play Store) devices.

The Mobile BlueLight button will only contact Security Services when the person is within the campus Safe Walk boundaries. If outside of the Safe Walk boundaries, the Mobile BlueLight notification will go to 911.

SPRING FLOODING HAZARDS – SAFETY TIPS

The threat of spring flooding brings many potential hazards. Please take all necessary precautions, including Staying off water and ice. At this time of year, the ice covering Manitoba's lakes, rivers, ditches, culverts, and large drains is melting. Stay off all waterways and never attempt to enter the water. Currents are powerful at this time of year and can easily pull you in and carry you away. If you live near water, you should be especially careful to prevent children and pets from wandering onto the ice or into the water.
