Winter 2018

COURSE OUTLINE

GMGT 4010 - ADMINISTRATIVE POLICY

Dr. Parshotam Dass  
408 Drake Centre  
Phone: (204) 474-6340  
Fax: (204) 474-7545  
Email: pdass@umanitoba.ca

Class times: Section A04  
A04: Tuesday 6.15-9.00 p.m. 539 Drake  
Office Hours: Tuesday 9-10 p.m. and by appointment  
Dates: January 3 to April 6, 2018

PRE-REQUISITES

Prior to being admitted to GMGT 4010, students must be in Year 4, in the final term prior to graduation in the Asper School and have successfully completed (with a minimum grade of (D) in each course) all 30 credit hours of courses specified in Year 2 of the 4-Year Program. Prerequisite or Concurrent Requirement: all remaining core courses specified in Year 3 and 4 of the 4-Year Program (with a minimum grade of (D) in each course).

If you do not meet the above-mentioned conditions, contact the Undergraduate Programs Office immediately, otherwise you may be dropped from the course at any time without further notice, even if you attend classes regularly.

If you do meet these conditions, welcome to the world of Administrative Policy!

REQUIRED MATERIALS

There are three parts to the course materials: (a) The textbook is Strategic Management Theory by Hill, Schilling, and Jones, 12th edition, Cengage Learning (softcover), available from the University of Manitoba bookstore. (b) A case package will be available at the Ivey Publishing website. Further instructions for purchasing the case package will be available at UM Learn. (c) Class Readings file available at UM Learn. All students are expected to purchase a text-book and the original course package.

Note: Be sure to print the hard copies of the following two readings, thoroughly read them, and bring them to Class 1: (a) Guidelines for Analyzing and Writing Cases (available on UM Learn in the Class Readings file): These guidelines are used for the Hand-in Assignment, Midterm Exam, and the Final Exam; (b) Case: Robin Hood (available on UM Learn in the Class Readings file). Further details regarding the class schedule are at the end of this course outline.
**THE COURSE**

This capstone course allows students to integrate the knowledge that they have acquired about the functioning of complex organizations. It was introduced for the students to view the organization as a whole and to understand how different "pieces of the (organizational) puzzle" fit together. In other words, the attempt is to see how different internal and external systems and processes work together to determine the success/failure of an organization. The course helps enhance the participants’ strategic thinking and analysis skills that can be applied at the individual (e.g., for career choice) and organizational levels. If you are interested in why some organizations succeed while others fail, this course will be valuable to you. The perspective throughout the course is that of the general manager with responsibility for all aspects of the overall organization as compared to the manager of a functional area such as marketing, finance, or human resource management.

**COURSE OBJECTIVES**

1. To understand the concepts of strategic management and to develop a general manager’s point of view and breadth of approach to policy issues in order to formulate managerial decisions in terms of organizational strategy.

2. To develop an appreciation of how concepts from a variety of disciplines, such as accounting, finance, economics, information systems, human resource management, marketing, organizational theory, production, supply chain management, quantitative methods and others, relate to strategy, and to bring knowledge from these areas gained from previous courses to bear on policy challenges.

3. To develop attitudes relevant to strategic management, including regard for the long run well-being of the organization and of society, alertness to and energetic pursuit of opportunity, and an appreciation for creativity and innovation.

4. To improve a variety of skills relevant for the practice of strategic management, including strategic thinking and analytical skills as well as oral and written communication skills.

Please refer to Bloom’s hierarchy of learning objectives in education: knowledge, comprehension, application, analysis, synthesis, and assessment. The expected learning outcomes of the course are as follows:

1. **Knowledge and comprehension.** The goal is to provide students with rigorous and relevant concepts and their relationships in order to understand the past, the present, and the future of strategic management practice in organizations. The objective is to gain insights through assessment of multiple, competing, and conflicting theories and schools of thought as well as their assumptions and boundary conditions.

2. **Skills.** Students are expected to develop their abilities to identify, analyze, synthesize, and assess critical strategic management issues. Further, they need to consider alternative
courses of actions, formulate strategies, negotiate solutions, and implement and improvise them. In addition, executives need skills for emotional intelligence, to learn from their varied experiences, and to evolve themselves and their strategic management practices over time.

3. **Perspective.** Students are expected to practice a critical and creative view, where they have an open and sophisticated mindset to deal with complex problems with profound simplicity rather than with naïve simplicity.

4. **Values.** Finally, there is a significant role of values in strategic management theory and practice. As you know, our graduates are expected to be the best professional managers not only in terms of their competence but also in terms of values.

**COURSE FORMAT**

The format of the course is based on two core principles:

1. **Integration of theory and cases is essential because understanding both practice and theory, and acquiring the skill to apply one to the other, is fundamental to strategic management.** Hence, classes will not be used to simply review theory in detail which is in the book (this is the student’s individual responsibility so read the chapters in advance and be ready to answer questions and apply to varied situations), but will be employed for brief review, application, and case discussion. This discussion should, however, be guided by insights gained in the “theoretical” readings and should lead to conclusions about the applicability of theoretical concepts in certain practical situations. Therefore, quizzes and class discussions may include and integrate questions from the book chapters, articles, cases, or any other parts of the course.

2. **The course is not the sole contribution (or production) of the instructor. Students bring a variety of valuable, rare and inimitable resources and are explicitly recognized as co-contributors or co-producers of the experience of this course.** If you are not fully prepared at any time, it is likely to contribute to lowering the quality of the whole experience for you as well as for others.

The Administrative Policy course contributes to the goals of the Asper School’s undergraduate program. For further details, please refer to the table.

STUDENT RESPONSIBILITIES

1. Each student is expected to complete a bio-sheet in class 1. Students will be provided with blank name plates. The name plates should include the following information on both front and back sides of the name plate so others can see it clearly: the name by which the student would like to be called in class followed by the initial letter of the last name and, on a second line, the major area(s), e.g., Cindy R. Mktg; Jack D. Actg/Fin. Students are expected to display their name plates in the class at all times.

2. In class 2, each student is required to take his/her preferred seat and write the same information on the seating plan as on his/her name plate. The instructor will give a copy of class seating plan to each student. Students are expected to take their respective seats throughout the semester and sign the attendance sheet. From second or third week, we will start the formal process of assessing class contribution by student recorder(s) who will also keep track of student attendance. No student should sign the attendance sheet for anyone else.

3. Students are expected to be ready and willing to discuss both the assigned cases and related book chapter(s) / reading(s) for every class as listed on the Class Schedule. This will require three to four hours of advance preparation for each class. In preparation for class discussion, you should raise questions about the issues addressed in the readings and answer them. This may entail identifying 2-3 key strategic issues related to the case. Then, you should generate 2-3 alternative solutions and recommend management action, noting the pros and cons of the solution, its implementation, and expected outcomes. Be prepared to justify your recommended solution both from a theoretical and from a business perspective using criteria you selected. For further information regarding case preparation, please read the last chapter in the text-book on “Analyzing a Case Study and Writing a Case Study Analysis.”

4. Students are expected to attend class regularly and be responsible for any course-related announcements which may be made in class, even if not present for the particular session in which the announcement is made.

5. Students are required to form study teams for support in pre-class preparation, for the analysis, writing, and submission of the hand-in assignment, final case assignment, and for other tasks that may be assigned by the instructor throughout the semester. The list of study team members must be submitted on the form supplied (see attached Multifunctional Team Sheet) by the class meeting, as indicated on the Class Schedule. Each team must have members from different majors such as accounting, finance, information systems, human resource management, marketing, leadership (organizational behaviour), supply chain management, entrepreneurship, and international business.
PERFORMANCE EVALUATION

Final grades for Administrative Policy will be based on four components: a hand-in team assignment, mid-term individual written analysis of a case, class contribution in the discussion of readings and cases, and a final multifunctional team written analysis of a case. The weighting of these four components in the determination of the final grade may be set on an individual basis by each student through an Evaluation Contract, a sample of which is attached to this outline. *This Evaluation Contract must be signed and submitted by the class meeting as per the Class Schedule, and may not be altered once submitted.*

The objective of the Evaluation Contract is to give each student the opportunity to demonstrate understanding of the course material in the manner in which he or she feels most capable to do so. *For students who fail to submit their signed evaluation contract by the due date or those who make errors in their contracts, the following weights will apply.*

<table>

A Word to the Wise

As you know, organizational performance does not just depend on how smart executives are. Similarly, the final grade in the course is not just the result of how smart a student is. It is the result of many factors and processes, which may include your knowledge, skills, and attitudes, study and writing habits, the number of courses you are taking, the availability of time, work situation, personal and family matters (just to name a few), and how each of these things interact with one another. Our advice to you is to design your system and process (including strategy) for this semester so you are not taking too many courses, are not working too many hours on your (part-time) job, etc. so you can pay full attention to the readings and assignments. This is an investment you will never regret!

HAND-IN TEAM ASSIGNMENT

The hand-in assignment is a team assignment. Students are expected to discuss this group assignment only with their team members. This assignment is primarily intended to give you an opportunity to practice the skills needed for your mid-term exam. Use this opportunity to brush up on your financial analysis skills if this is not a strong area for you. In addition, you may review the article "Financial Tools for Strategy Evaluation" on your own. This article is available on UM Learn.
**INDIVIDUAL MIDTERM CASE**

**Availability**
The name and number of the case for the mid-term individual written case analysis assignment will be available in the class and/or UM Learn on the date indicated in the Class Schedule. Students are expected to purchase a copy of the case from Ivey Publishing.

**Deadline**
The Mid-term written case analysis will be due at the beginning of the class on the due date. If you want to submit earlier, you may do so to the instructor. Any late reports should be submitted via Room 428 or 430 Drake Centre. The departmental secretary will record the time at which she receives them. Papers are *not* to be submitted by sliding them under the door to your instructor’s offices.

*Late submissions, including those delayed by computer-related difficulties, will be penalized ten percentage points for every 24 hour period, or portion thereof late. For example, a student who earns a score of 80% on his/her paper will receive a score of 70% if the paper was submitted one day late. Exceptional circumstances which might jeopardize your ability to meet this deadline must be brought to your instructor’s attention prior to the due date, or else they cannot be considered as grounds for exemption from this late penalty. If you are involved in any co-curricular activities (e.g., case competitions at another university), you are expected to complete and submit the paper prior to the deadline.*

The department does not accept any responsibility for potential loss of papers during handling (although this has almost never happened). Nevertheless, to protect against this theoretical possibility, all students are *required* to keep a hard and soft copies of the paper which they submit. Also, students will be expected to submit an identical electronic copy of the paper on UM Learn. Further instructions for the midterm will be available on UM Learn on the date indicated in the Class Schedule.

**Strictly Individual Basis for the Mid-term Individual Written Case Analysis**

Unlike the preparation for the in-class case discussions, this assignment is a strictly individual exercise, intended to assess your personal abilities in the subject, not the collective abilities of your study team. No discussion of the exam is permitted with anyone else, and each student must submit a signed declaration in specified format to that effect with his or her completed exam report. Each student’s written case report, including all attachments and exhibits, must be strictly the work of the individual student, in both content and form. Any instance in which a student’s written analysis contains sections of text or attachments essentially identical in content and/or form to that of another student’s report, will be considered a breach of academic integrity on the part of both students.

We understand that strategic management in practice, and learning in the study of Administrative Policy, is enhanced by group discussion. But, it is important for individuals to prepare themselves before the group can be effective. Therefore, the written analysis of the Final Case
will be conducted in the multifunctional team, where individuals from different functional areas can bring together knowledge from their majors, formulate different alternatives, and recommend one solution by going through the process of negotiation, bargaining, and compromise.

**TEAM PROJECTS**

Working with other people is fundamental to business, and to the practice of Administrative Policy. Therefore, as mentioned above, all students in this section will be required to form study teams, comprising people from a variety of major areas and backgrounds (but all from the same section). The membership of the team is not final until approved by the instructor. Close family members are discouraged from being members of the same team. Each team shall:

1. Meet prior to class to review individual preparation and discuss the case informally. This will be a tremendous benefit to the subsequent learning experience in class. Each member should make himself/herself available to meet with the team prior to class. Each team will decide on the rules and incentives for participation of their members. (Obviously, this does not apply to the midterm exam)

2. Hand-in Team Assignment. Further instructions for the Hand-in Team Assignment will be available on UM Learn on the date indicated in the Class Schedule.

3. Prepare the end-of-term written analysis of the Final Case by the multifunctional team. The name of the case for the final exam will be available in the class and the instructions for completing it will be available on UM Learn on the date indicated in the Class Schedule. Any questions of the instructor about this assignment should be raised in one of the last class meetings so that any information provided is available to all students. The instructor will not normally take questions about the case outside of those classes.

**Deadline**

This assignment must be submitted on or before the due date and time specified in the Class Schedule to the instructor. Late submissions, including those delayed by computer-related difficulties, will be penalized ten percentage points for every 24 hours or portion thereof. For example, a student who earns a score of 80% on his/her paper will receive a score of 70% if the paper was submitted one day late.

Exceptional circumstances which might jeopardize your ability to meet this deadline must be brought to your instructor’s attention prior to the due date, or else they cannot be considered as grounds for exemption from this late penalty. If you are involved in any co-curricular activities (e.g., case competitions at another university), you will need to negotiate your contribution with your team members. The team may complete and submit the paper prior to the deadline.

Individual grades for the team projects (hand-in assignment and end-of-the-term multifunctional team case) will be determined as follows: Each team will be given a “team grade pool” - for instance, a team of four students will have a team grade pool of
This team grade pool will then be allocated among the members of the team as specified in the Team Grading Contract, which will be provided with the assignment specifications, and which must be executed and submitted coincident with the project’s completion. (If the members of the team cannot come to a unanimous consensus on the allocation, the issue may be submitted to “arbitration” by the instructor, at a “cost” of one tenth of the team grade pool.)

A well-functioning study team can add a great deal to the learning experience and enjoyment of this course. All students must be part of a team, the list of which must be submitted by the class meeting, as per the attached Class Schedule. (Please note that members of the team will not change for different team projects during the term.)
CLASS PREPARATION, LEARNING AND CONTRIBUTION

Class contribution is integral to a case method course. Every student brings a different combination of expertise and experience to bear on each case, so students are expected not only to learn from the experience of taking the course, but to contribute to the learning experience of others in it as well. Therefore class contribution must be at minimum a 20% factor in each student’s overall performance evaluation.

The grade for class contribution will be a composite of the instructor’s evaluation of contribution as well as classmates’ collective opinion on the contributions of each individual, derived from student reporters and assessors. The instructor may give surprise quizzes to examine your preparation and learning for the class. These may be given at any time of the class. The instructor may give more than one quiz in a class as well. These may be multiple choice, short answer, or essay-type. These may address questions from the chapters, readings, and cases or may combine them in any way. The instructor may also require students to complete exercises and worksheets in (or outside of) class, individually and in groups, and these will be included in your class participation grade. The instructor may discount a student’s contribution grade because of missed classes, coming late or leaving early, or other such reasons. **Any instance of a student who is involved in coordination with anybody else to unfairly increase his/her class contribution grade will be considered an extremely serious breach of academic integrity and will be forwarded to the Dean’s office.**

Further details of the class contribution aspect of performance evaluation are provided on pages 13-14. However, **students should be aware from the outset that although regular and punctual attendance is expected, there is no contribution credit given for simply being present in class.** Even with perfect attendance, individuals who do not participate at all during class will receive a contribution grade of zero!

In addition, as part of class contribution, each student is required to take the Core Business Knowledge test. This test is part of the AACSB Assurance of Learning for the purpose of accreditation of the B.Comm. (Hons.) degree program at the Asper School of Business. The test will be arranged by the Dean’s office outside of class time. Students will be informed of the times for the test. Students will be awarded 5 points based on their performance in the test, with a minimum of 2 points (out of 5 points) awarded to each student for completing the test. For example, if a student received 80% score on the Core Business Knowledge test, 4 points (= 0.80 × 5) will be added to her class contribution points. Other class contribution points will come from activities such as class participation, surprise quizzes, and individual and group work.

As you know, attending classes is necessary but not sufficient to succeed in school. Since you are a Management student, think of the class as (y)our business meeting. It is important to prepare in advance and show up but you don’t get the contract just by being prepared and showing up! You need to make a good presentation too!
ACADEMIC INTEGRITY

Please refer to the University of Manitoba Policy on Academic Integrity given in University publications and attached with this outline. It applies to all work being conducted in the course, from individual assignments to class citations. A word to the wise: The Faculty of Management takes its policy extremely seriously and enforces it extremely strictly.

UNIVERSITY EMAIL POLICY

Effective September 1, 2013, the U of M will only use your university email account for official communications, including messages from your instructors, department or faculty, academic advisors, and other administrative offices. If you have not already been doing so, please send all emails from your UofM email account. Remember to include your full name and student number in all correspondence. For more information visit: http://umanitoba.ca/registrar/e-mail_policy

DEFERRED EXAMINATION POLICY—IMPORTANT NOTICE TO ALL STUDENTS:

Effective September 2005, the Department of Business Administration has instituted a policy which provides ONE DATE ONLY for students who have deferred their final exams. This does not apply to take home exams.

LEARNING STYLES AND METHODS

Learning Styles: Different students have varying learning styles. Some students learn better by explaining ideas to others (expression) while others learn better by concentrating within themselves (reflection). I am very interested in knowing what your learning styles and methods are. If you don't know yet, it is a good time to find out. We will try to use multiple learning methods that help different students learn better. For example, we will use question-answer format, discussions, debates, critical-incidents, case studies, video cases, small group interactions, short presentations, audio-visual aids, etc. with the short lectures to improve learning in the class. In addition, as already mentioned several times, it is a good idea to get together in a study group, particularly if you learn by expressing yourself. If you are shy or would prefer to speak after you have thoroughly thought about a topic, please let me know how I can facilitate your class contribution. I am interested in helping your learning and interaction with other participants in this class (or in other classes on campus). If you are interested to pursue the ideas discussed in this class in a graduate program such as M.Sc., M.B.A., or Ph.D. at this university or outside, please do not hesitate to talk to me. Our commitment is to challenge to do your best and help you to succeed in your life and career.

Here is one method that can be helpful to you in developing meaningful and integrated learning, and improve your critical thinking that will be needed in this course:

Split Page Method: Draw a line down the middle of a page in your notebook. Take notes during class on the left hand side of the page. After class, review your notes line by line and do the following on the right hand side of the page:

- translate ideas into your own words, and try to understand with logic and examples
Administrative Policy is a challenging course to take, and also a challenging course to deliver. Here are some administrative matters in which your conscientious cooperation will facilitate me to deliver the course effectively to you.

“The Administration of Administrative Policy”

If you have any question at any time, please feel free to contact me by E-mail at pdass@umanitoba.ca, making sure that you start with GMGT4010 in the subject line. This will flag the message for priority reading on my part. I check my email frequently and will be glad to answer your question(s) at any time. You can also call me at my office number. If I am not there, leave a brief message, and I will call you back at my first opportunity. However, please leave me the number at which you would like me to call you back, so I don’t have to look it up. I might also be picking up these calls from a remote location where I wouldn’t have access to my files with your number. Further, specify when and/or how late I can call you back, without disturbing you or anyone else at that number. You are also expected to regularly visit the UM Learn to see if there are any announcements.

Meeting protocol

If you would like to see me, try to come during my office hours when I will give you my undivided attention. As you may have already noticed, my office hours are mentioned in the beginning of this course outline. If you can’t come during that time, please send me an email and let me know of 2-3 times when it is convenient for you to come and see me. I will try to reply at the earliest and arrange time that is convenient for both of us. Please feel free to talk to me after the class if you have any questions.

Attending classes: Think of (y)our class as (y)our business meeting!

Attending classes is an essential part of the course. If you have other activities scheduled at the same time that may impede your ability to attend classes for the entire class period, it is not a good idea to take this course this semester. The first point we tell the first year students entering the Faculty of Management is: Come on time and stay for the entire period of class. Normally, in the beginning or end of each class, I cover some very important points. These points are the ones that give you significant feedback about class activities. Ordinarily, these points are not covered in the book because these are part of tacit knowledge (i.e., they are not written anywhere). These
points are in fact the crucial difference between learning from a regular course as compared to a correspondence course or book. My advice to you is to arrive in the class room at least 5 minutes before the class time so you get set, collect your thoughts, and are ready to participate. In my experience, any student who comes even 1 minute late is not able to catch up with his/her classmates throughout the class. A student who misses a class or part of it suffers in many obvious and not-so-obvious ways. Loss of opportunity to earn points on class participation is obvious. We may have individual and group activities during the class, which can help you earn class contribution points. A subtle way in which the student suffers is that he/she does not even know what he/she is missing! Therefore, the quality of the learning and assignments goes down without the student being able to understand what he/she is missing and how it could have been better.

As you know, this class is not a correspondence course. Therefore, students are expected to attend classes regularly throughout the semester. Every Tuesday, we have two classes, each for one hour and 15 minutes. Any student missing more than four of the 24 classes (or more than two classes out of the 12 classes, each of 2 hour and 30 minute duration) during the semester is likely to receive a failing grade (F) in class contribution and cannot expect to obtain a passing grade in the course. Any student missing more than 10 of the 24 classes of one hour and 15 minutes duration (or more than five classes out of the 12 classes, each of 2 hour and 30 minute duration) during the semester will receive a failing grade (F) in the course. Please keep in mind that simply being in class for a short time or signing an attendance sheet does not satisfy the requirements of attending a class. Attending a class requires a student to be present and involved in the class activities for the entire duration of the class.

A student who misses a class is solely responsible for getting notes from other students and making him/herself aware of announcements made, handouts delivered, or any other activities conducted in the class. If you are absent and would like the instructor to know about it, send an e-mail message for the instructor’s record. However, in order to obtain an excused absence, the student must provide the documentary proof for absence. Keep in mind that rush periods at your workplace or exams in this or another course are not valid reasons for absences. Further, class dependent activities such as class contribution cannot be made up outside of class or at a later date. Since this class is in the evening, it is possible that you may have exams in other courses at the same time. In such cases in the past, I have sent verification emails to other instructors when they were willing to allow a deferred exam.

It is equally important to pay full attention to the instructor’s directions and class discussions at hand rather than occupying oneself with other things relating to this or another class. Please make sure that you switch off electronic gadgets such as cellular phones, laptops, tablets, video-games, etc. before entering the classroom. The instructor may ask the students to use their computers at some time. However, when you are using them, your focus still should be on the relevant activities as directed by the instructor. It should be clear to all from the outset that working on emails, texting, or other activities relating to this or other classes (such as preparing for an exam or writing a paper) is not acceptable behaviour in the classroom. A student involved in such activities may not intend to disturb others and may often presume that s/he is multitasking to save his/her valuable
time. However, such behaviours are highly distracting to the instructor as well as other students; it interferes with the teaching and learning activity and undermines the value of others’ time. On some occasions when we encountered such situations in the past, we had to ask the student to leave the classroom, which results in memorable but awkward experiences for the instructor as well as other students. Thus, here is a little hint: Let’s try to avoid such situations. A student who cannot meet these expectations may be asked to leave the classroom, withdraw from the course, or may be dropped from the course.

As you may already be aware, use of tobacco, alcohol, or other such substances is not allowed in the class rooms in the Drake Centre.

**Pick up of handouts, and graded assignments/papers**

I will only bring handout materials and graded assignments down to the classroom once, on the day they are being given out. If you have to miss a class, ask one of your study team members to pick up copies of the handouts for you. Otherwise, it is your responsibility to collect it from me during my office hours, as I will not be bringing them down to the next class.

Please make sure that any materials you submit for this course have the correct section designation on them, (e.g., A01, A02, A03). Most such materials are sorted and filed by section.
EVALUATION CONTRACT

The University of Manitoba
I. H. ASPER SCHOOL OF BUSINESS

Final grades for Administrative Policy will be based on four components: a hand-in team assignment, mid-term individual written analysis of case, class contribution in the discussion of readings and cases, and an end-of-the-term multifunctional team written analysis of case.

The weighting of these four components in the determination of the final grade may be set on an individual basis by each student through an Evaluation Contract. The objective of the Evaluation Contract is to give you the opportunity to demonstrate your understanding of the course material in the manner which you feel most capable to do so. For students who fail to submit their signed evaluation contract by the due date or those who make errors in their contracts, the following weights will apply: Hand-in team assignment: 10%; Mid-term case: 40%; Class contribution: 20%; and Final case: 30%.

This Evaluation Contract must be submitted by January 16, 2018 at UM Learn and may not be altered later. An electronic template of this contract will be available in Excel format at UM Learn. Please complete and submit it there. As you know, you will get a receipt when you submit it at UM Learn. There is no need to submit a hard copy.

* Please see the next page for important information about the determination of the class contribution grade, which forms part of this contract.
Determination of the Class Contribution grade

The grade for class contribution must be earned incrementally throughout the course through consistent, conscientious performance over the class discussions, surprise quizzes, the Core Business Knowledge test, and individual and team exercises. The primary basis for evaluation of your performance in this respect will be your instructor’s evaluation of your contribution. The instructor may also require students to complete exercises and worksheets in (or outside of) class, individually and in groups, and these will be included in your class participation grade. All students are expected to prepare and use their name plates and take their assigned seats throughout the semester. After 1-2 weeks of the semester, the instructor may ask, on a rotating basis, students in each class session to keep a record and assess student participation and may use this input in evaluating class contribution grades.

A student’s class contribution grade will depend on his/her ranking as compared to other students in the section. Students should bear in mind that the class contribution grade depends on their instructor’s judgment and discretion. The instructor may discount a student’s contribution grade because of missed classes, coming late, or leaving early. A student may lose contribution credit for instances in which h/she proves to be insufficiently prepared for class, either by making material errors of fact, or by being unable to respond to a request to begin or continue the case discussion. Contribution marks may also be deducted for comments that are obviously flippant, or otherwise clearly out of keeping with a business discussion. It is important to pay full attention to the contributions of the class members and respond to them in a clear and constructive manner.

For each class, you may earn credit towards your contracted allocation for class contribution. To earn such credit, your contributions must demonstrate that you have a thorough grasp of the case information, and have considered at least the issues raised in the accompanying readings. Participation in small group discussion, electronic contribution, writing on the board, etc. will earn lower marks as compared to expressing your ideas to all students in the class where they have a chance to consider your comments and respond to them. Factual contributions that help to organize basic information into useful format for analysis will earn low mark. To earn higher credit for discussion, you must provide some synthesis beyond the basic facts such as relating two or more pieces of information, or performing some quantitative analysis, to draw a relevant conclusion. To earn highest credit for discussion, your contribution must demonstrate real insight into the key issues and/or recommend detailed, well-supported actions to address the strategic challenges involved.

Caveat. Please note that except for the student chosen to begin each discussion, who may be selected by the instructor, the onus for contribution rests entirely with the student, who must indicate his or her desire to speak by raising a hand. However, I reserve the right to call on students at any time during the discussion, and I expect you to be prepared to participate.

Remember, your class is (y)our business meeting! Do all that you would normally do for (y)our business meeting: Be prepared, show up and make a good presentation!
Academic Integrity

It is critical to the reputation of the Faculty of Management and of our degrees that everyone associated with our faculty behave with the highest academic integrity. As the faculty that helps create business and government leaders, we have a special obligation to ensure that our ethical standards are beyond reproach. Any dishonesty in our academic transactions violates this trust. The University of Manitoba’s rules can be found in the General Calendar, under "General Academic Regulations and Policy." The University of Manitoba General Calendar addresses the issue of academic dishonesty under the heading "Plagiarism and Cheating." Specifically, acts of academic dishonesty include, but are not limited to:

- using the exact words of a published or unpublished author without quotation marks and without referencing the source of these words
- duplicating a table, graph or diagram, in whole or in part, without referencing the source
- paraphrasing the conceptual framework, research design, interpretation, or any other ideas of another person, whether written or verbal (e.g., personal communications, ideas from a verbal presentation) without referencing the source
- copying the answers of another student in any test, examination, or take-home assignment
- providing answers to another student in any test, examination, or take-home assignment
- taking any unauthorized materials into an examination or term test (crib notes)
- impersonating another student or allowing another person to impersonate oneself for the purpose of submitting academic work or writing any test or examination
- stealing or mutilating library materials
- accessing test prior to the time and date of the sitting
- changing name or answer(s) on a test after that test has been graded and returned
- submitting the same paper or portions thereof for more than one assignment, without discussions with the instructors involved

Group Projects and Group Work

Many courses in the Faculty of Management require group projects. Students should be aware that group projects are subject to the same rules regarding academic dishonesty. Because of the unique nature of group projects, all group members should exercise special care to ensure that the group project does not violate the policy on Academic Integrity. Should a violation occur, group members are jointly accountable unless the violation can be attributed to a specific individual(s).
Some courses, while not requiring group projects, encourage students to work together in
groups (or at least do not prohibit it) before submitting individual assignments. Students are
couraged to discuss this issue as it relates to academic integrity with their instructor to avoid
violating this policy.

In the Faculty of Management, all suspected cases of academic dishonesty are passed to the
Dean's office in order to ensure consistency of treatment.
Working with other people is fundamental to business, and to the practice of Administrative Policy. Therefore, all students in this section will be required to form study teams. Team members must comprise of people from a variety of major areas and backgrounds for the following purposes:

1. Meetings prior to class to review individual preparation and discuss the case informally. This will be a tremendous benefit to the subsequent learning experience in class.

2. End-of-term written analysis of the Final Case by the multifunctional team. The case for the final exam will be available in the class and the instructions for completing it will be available on UM Learn on the date indicated in the Class Schedule. Any questions of the instructor about this assignment should be raised in one of the last class meetings so that any information provided is available to all students. The instructor will not normally take questions about the case outside of those classes.

Individual grades for the team projects (hand-in assignment and the final case) will be determined as follows: Each team will be assigned a mark out of 100%; that grade will then be multiplied by the number of members of that team to create a “team grade pool” - for instance, a team of four students will have a team grade pool out of 400%. This team grade pool will then be allocated among the members of the team as specified in the Team Grading Contract which will be provided with the assignment specifications, and which must be executed and submitted coincident with the project’s completion. (If the members of the team cannot come to a unanimous consensus on an allocation, the issue may be submitted to “arbitration” by the instructor, at a “cost” of one tenth of the team grade pool.)

A well-functioning study team can add a great deal to the learning experience and enjoyment of this course. All students must be part of a team, the list of which must be submitted by the class meeting, as per the attached Class Schedule. (Please note that members of the team will not change for different team projects during the term.)
TEAM NAME (OPTIONAL)
(The instructor will assign a team number to be used on team assignment/exam.)

Please write your
NAME       MAJOR       EMAIL ADDRESS       PHONE NUMBER

1. ________________________________________________

2. ________________________________________________

3. ________________________________________________

4. ________________________________________________

* Contact person for this team

Please note that for administrative reasons, all members of a study group must be in the same section. We’ll decide the number of students per team close to the add/drop date. In addition, the membership of the team is not final until approved by the instructor. Members of a family are discouraged to be members of the same team.

In the interest of achieving an effective and enjoyable multifunctional team for this course, please be sure to discuss the following issues with your colleagues before finalizing your team:

1. What is your motivation for taking this course, and how hard do you want to work at it? Are you striving to do as well as possible, or simply taking this course as a program requirement, or for personal enrichment?
2. When is it convenient for you to meet, and how flexible is your schedule in that respect?
3. How serious are you about completing this course? If there is a possibility that you might withdraw at some point, it is important to be frank with your potential group members on this point, so that a team does not suddenly find itself short-staffed later in the term.
4. What are your strengths and weaknesses? What are your distinctive competencies? In other words, what do you bring to the team that will add value to the team’s work such as case analysis and writing?
