1. PURPOSE

The pre-qualification application process is the method by which licensed contractors can be pre-qualified to bid on construction projects that are tendered by the University of Manitoba (hereinafter referred to as “University”).

Upon receipt of a complete and accurate application form, the University shall undertake a process of due diligence to confirm the accuracy of the information submitted, and evaluate each contractor’s past performance (both with the University and with other clients), to determine if the applicant should be added to the University’s list of pre-qualified contractors.

For the duration of the pre-qualification term, only contractors that have successfully completed the pre-qualification process shall be eligible to submit tenders for any University construction projects.

For projects with an estimated total cost of more than \$1,000,000, the University may require contractors to complete a project-specific pre-qualification, if it is deemed to be in the University’s best interest to do so.

Contractors will only be permitted to participate in the tendering process for those categories of work – and project values – for which they have been pre-qualified.

In the event that subcontractors are required on a specific project, and that category of work is one for which the University carries out a pre-qualification process, the primary contractor may only use subcontractors which are on the University’s pre-qualified contractor list.

The University maintains a public listing of all pre-qualified contractors on its website: http://umanitoba.ca/admin/financial_services/purch/suppliers.html
