

ARE YOU AN UNDERGRADUATE STUDENT IN WATER RESEARCH?

Do you want to learn to take water samples in the field?
Do you want experience working in a science lab here on campus?
Do you have a GPA of 3.0 (grant requirements)?

The University of Manitoba hosts a program called CREATE H2O, a science and engineering research-training program that works towards clean and safe drinking water and wastewater management in First Nations communities.

We have funding for two undergraduate students for summer 2017
(May 1 to August 31)

The student will be required to complete the program's pillar unit requirements. You will also receive recognition for your CREATE H2O work through a co-curricular record.

Preference will be given to Indigenous students with a 3.0 GPA (grant requirements)

For more information or scholarship application forms, please contact:

Wendy Ross, Program Coordinator – CREATE H2O
Centre for Human Rights Research
Room 442 Robson Hall
Winnipeg, Manitoba R3T 2N2
Tel. 204-474-8822
wendy.ross@umanitoba.ca

DEADLINE FOR APPLICATIONS: MARCH 13, 2017
