

DR. AMY AMOS
EXECUTIVE DIRECTOR, GWICH'IN RENEWABLE RESOURCES
BOARD, NT

Seminar and Discussion
Research Priority Process in the Gwich'in Settlement Area
Wednesday, November 29, 5–6 pm, Buller 315 University of Manitoba

Dr. Amos is interested in meeting with faculty and students at U of M to discuss the GRRB's research and management needs with respect to **fisheries, forestry, and wildlife biology**. The purpose of Amy's visit is to try and attract researchers who might like to work in the region, and let them know what the GRRB needs and can offer.

Amy's presentation will focus on how the Gwich'in Renewable Resources Board (GRRB) works with communities and its co-management partners to establish research priorities in the Gwich'in Settlement Area, which is located in the Northwest Territories. Amy will:

1. Discuss what type(s) of support GRRB can offer researchers who have projects related to GRRB research priorities
2. Provide advice on best practices, including how to engage meaningfully with northern Indigenous communities such as the Gwich'in, and how to develop and establish projects that align with community research interests

The session is meant to be informal, and **all are welcome to attend**. Amy will give a 15–20-minute presentation, allowing plenty of time for Q&A and discussion. Refreshments will be served.
