Local Area Safety and Health Committee Training Sessions

EHS has created a series of training courses for LASH Committee Members to participate in. The training is broken down into short 1 hour sessions instead of the full day course offered by Safe Work Manitoba.

The goal of these training sessions is to educate committee members on a variety of topics that they will face while participating in a safety committee.

The training sessions offered are:

- Roles and Responsibilities of Safety Committees (Employer, Supervisor, Worker in Safety Planning)
- Writing Recommendations to the Employer
- Effective Minute and Agenda Creation
- Carrying Out Inspections (Navigation of the iAuditor Program)
- Report Generation
- Safe Work Procedures and Job Hazard Analyses

These training sessions can be conducted as an additional part of a committee meeting or prearranged with several committees at a time. Although all sessions are recommended by EHS, established committees may forego certain sessions if they feel they are not required.

To book a session or to have EHS attend your LASH Committee Meeting please contact:
