

# BASF Canada

Agricultural Products – Research & Commercial Development

**Position:** Field Biologist (Contract)  
**Location(s):** Winkler, Manitoba, Canada

**Term:** This position is a 2 year contract employment opportunity.

**Job Description:** As a valued member of our Research and Commercial Development team you will be involved in all aspects of new product screening, product development and commercial field support. This includes data analysis, planning, and the generation of local performance data. This will be accomplished through a BASF research program and testing by third parties (universities and private researchers).

**Your Qualifications:** A B.Sc. or M.Sc. (preferred) in Agriculture/Biology with emphasis on crop science, environmental biology and/or chemistry or equivalent experience. Specialization in Crop Physiology, Agronomy, Weed Science, Plant Pathology, or Entomology preferred. A good knowledge of practical crop production in Canada including knowledge of weeds, plant diseases and insects; as well as an ability to identify specific pest organisms. Experience in the Agricultural Chemicals business preferably with research or product development experience is required.

Good knowledge of computer systems and windows bases; word processing, database, spreadsheet and presentations/graphics programs. Strong Communication skills, both written and orally, together with good organizational time management abilities are essential. The incumbent needs to be a good team player and have good interpersonal leadership qualifications.

**Our Company:** BASF is a major manufacturer and retailer of agricultural crop protection products in Canada and around the world. We supply farmers with top quality weed, insect, and plant disease control products in a wide range of crops. BASF has a strong commitment to research and development. A team of dedicated employees is a key to our success. BASF has a strong commitment to Canadian agriculture.

**How to Apply:** Please submit a résumé and covering letter by **February 15, 2012**.

Only qualified candidates selected for interviews will be contacted.
