

grow with us

.....
Bayer CropScience is a world leader providing growers with innovative products and solutions for agriculture and environmental health. Growers depend on Bayer CropScience's comprehensive selection of insecticides, fungicides, herbicides and seed systems. At Bayer CropScience, our team's commitment and dedication to Canadian agriculture is second to none.

Each year, we hire over 120 university students from campuses across the country to work in BioScience, Development and Licensing, Sales and Market Development. We were named one of Canada's Top Employers for Young People and our goal is to provide interesting and challenging work while at the same time have fun and celebrate successes.

Our Breeding team is looking for:

Breeding Associates

(6-month term)

The BioScience Division within Bayer CropScience, a leading canola hybrid seed business under the InVigor® brand led globally from Canada, is looking for Breeding Associates to join its team for the 2012 summer season in Winnipeg, Manitoba.

As a Breeding Associate, you will join our Breeding team where you will be involved in field trials for local and global breeding programs with the goal of developing hybrids that provide the highest return to growers. You will be responsible for field activities relating to variety development and registration from seeding to harvest including seed set up, land preparation, seeding, pest control, pollination management, plot maintenance, parental development, harvesting, and supervision of casual employees as required. You will also be involved in crop health diagnosis through daily monitoring of field and research plots, data collection and analysis.

As the successful candidate, you will possess strong agronomic competence attained through pursuing your degree in Agriculture or another college along with experience in the Agriculture Industry. You have demonstrated problem solving skills, and the ability to be flexible and modify plans as situations arise, minimizing impact on results. Your interest in canola development and ability to deliver results in pursuit of both individual and team goals will be vital to your success in this role.

We offer an orientation program, on-the-job training, competitive compensation, and an opportunity to further your knowledge and experience in hybrid canola development and production.

Grow with us at Bayer CropScience as we continue to expand and focus on bringing innovative products to market. To learn more or to apply for this position, go to **www.bayercropscience.ca**. Deadline for applications is February 28, 2012. Applications will be considered as they are received, and candidates may be hired prior to the deadline date.
