

OMEX Agriculture Inc.

Omex Agriculture is the Canadian division of an international fertilizer company with corporate offices based in England. Omex is a leader in the development of new fertilizer products for the agriculture and horticulture markets, and has a proprietary formulating plant located in Oak Bluff, MB. The company's R&D department manages an extensive field programs across West and Eastern Canada.

We are currently looking for energetic and organized Research Trial Assistants (RTA) for the 2012 field season. The RTAs will take part of the field research activities that support the development and registration of new plant nutrition products.

Title: Summer Research Trial Assistant (4 month term positions with possible extension)

Duties/Responsibilities:

- Assist with field research activities including, but not limited to; site preparation, seeding, maintenance and in-crop spraying, data collection, entry and analysis, trial maintenance and harvesting
- Rating the agronomic performance of crops as well as diseases
- Conducting plant tissue sampling
- Operate and maintain field equipments

These positions will require working outdoors, occasional travel and extended hours during seasonal peaks.

Qualifications

- Enrolment in an agriculture-related discipline or justify of an agricultural experience
- Previous research experience is an asset but not required
- Experience in operating farm equipment is an asset although training will be provided
- Must have a valid Class 5 driver's license, a Class 3 license will be an asset with the possibility of getting one upon hiring

Deadline: February 10th, 2012
