Instructors Note:

This is a course about awareness. Approach this course as if it were a “Firearms Safety” class. You may not intend to “use the law” but you need to be aware that it is there and potentially dangerous if misused or ignored. The law is expansive and persuasive throughout human activity – business and personal. The law follows you from cradle to grave. This is not a course that will train you to be a lawyer. This is best approached with an open mind. Students will be rewarded for thought and consideration of what applies to them in their current or future endeavours. High achievement will result from a personalized approach to answering questions, demonstrating thought, and assessing risk/opportunity from the legal parameters that surround daily business/family activity.

Disclaimer:

The content of this course should not be considered legal advice. The instructor is providing generalities and is in no way, shape, or form providing legal guidance to individual situations. If you have a specific legal issue, consult with a lawyer.
