

## Preparing for the Workshop – Holos model v.4 Training

1. Install the Holos software on your Microsoft Windows computer
  - a. Go to <https://aafc-holos.s3.amazonaws.com/setup.exe>
  - b. Open the downloaded setup.exe file. Note that you must have administrative privileges on your computer to install the software.
  - c. *Please note that this software is a pre-release version and development is still ongoing*

***Important: Holos is currently only available for Microsoft Windows PCs (Max OS X will be supported in a future version)***

2. (Optional) View the short tutorial videos on how to use the Holos application. This step is optional since we will be demonstrating how to use the software during the workshop.
  - a. Go to [https://www.youtube.com/channel/UCHDORmZ73VICHzgm\\_yVpM\\_Q](https://www.youtube.com/channel/UCHDORmZ73VICHzgm_yVpM_Q)
  - b. The tutorial videos are titled according to the suggested viewing order (Tutorial #1, Tutorial #2, etc.)
3. (Optional) Review the training guide that will be used during the workshop. We will be going over the same document during the workshop so this step is also optional.
  - a. Go to [https://aafc-holos.s3.amazonaws.com/Guides/Holos\\_V4\\_Training\\_U\\_of\\_M\\_2021.pdf](https://aafc-holos.s3.amazonaws.com/Guides/Holos_V4_Training_U_of_M_2021.pdf)

If you have any questions or issues related to installing the software on your Microsoft Windows PC you may contact [aaron.mcpherson@canada.ca](mailto:aaron.mcpherson@canada.ca)
