

## **Battling Soybean Cyst Nematode in North America: Past, Present, and Future**

*Dr. Greg Tylka, Professor, Director of the Iowa Soybean Research Center, Iowa State University*

The soybean cyst nematode (SCN) is the most damaging pathogen of soybean in North America. This presentation will include an update on the known distribution of SCN in the US and Canada and a review of current management strategies and will conclude with some conjecture about what the future may hold with SCN in the US and Canada.
