

Agronomic Advice Amid Turmoil in Crop Input Pricing and Supply

Trish Meyers, Director Ag Solutions, Federated Co-operatives Limited

Stewart Boyd, Regional Grow Team Advisor, Federated Co-operatives Limited

Never before have we heard the phrase “supply chain constraints” in agriculture like we did in 2021. And we can expect this phrase to be used again in 2022. Why? It was a perfect storm...a global pandemic; influential policy; factory closures; a hurricane, a fire, and freezing temperatures where we don't normally expect. So if we anticipate issues into the 2022 growing season, how can agronomists prepare? This talk will cover the what, where, when, and why of supply chain disruption in the crop inputs industry and the “how” agronomists should prepare for the agronomic uncertainties in the year ahead.
