Engineering & Information Technology Centre, E3 - Room 270

The Residence Life Office is thrilled that your son/daughter will soon be a member of the University of Manitoba community. Over the next year, your student is going to experience many changes, everything from a new roommate and a new culturally diverse environment, to an increased work schedule, and more personal freedom.

The transition from high school to university is where students experience greater social and academic independence, which can be a challenging adjustment. It is a time of both excitement and nervousness; we want to ensure that you and your student are informed about our program and the supports available to them at the University of Manitoba.

The parents session is designed to be a straightforward reality check for parents, regarding the issues students face. This presentation will allow parents to be engaged by Residence Life professionals who are aware of the challenges, triumphs, and supports available to residence students at the University of Manitoba.

We will talk about real-life situations and topics relevant to this demographic, including: alcohol consumption, drugs, diversity, sex/sexuality, identity, and the new freedom. We will talk about the long-lasting friendships, personal development, and the amazing memories that will be the best time of your son or daughter’s life.
