January 2015

To: Physical Plant Staff

From: Rod Berscheid, Assistant Director, Physical Plant 

Subject: Personal Protective Equipment (PPE) Directive

Physical Plant is committed to provide all employees with approved PPE, conforming to occupational safety and health regulations.

Supervisors in each Work Unit must maintain an inventory of all PPE. The inventory must include preventative maintenance and repairs. They must also ensure that employees are trained in inspecting and using the PPE before it is used.

Employees must wear PPE as required. The requirements are determined in each Work Unit depending on the job performed. They must inspect the PPE ensuring it is in proper condition, and that it fits properly. Any deficiency must be reported to the supervisor immediately.
