

SUSTAINABILITY GUIDE & WALKING TOUR

BANNATYNE CAMPUS

- 1 Bike Parking/Repair Station
- 2 Waste Prevention
- 3 Joe Doupe Recreation Centre
- 4 Medicine Garden of Indigenous Learning
- 5 Bike Cage
- 6 Green Buildings
- 7 Carpooling
- 8 Transit Connections
- 9 Jacob Penner Park
- 10 Energy Efficiency
- 11 Bike Routes
- 12 HSC Farmer's Market

UNIVERSITY
OF MANITOBA

UNIVERSITY OF MANITOBA

Explore your sustainable campus! The entire tour takes approximately 30 minutes and is accessible to all pedestrians through smooth surfaces, ramps and elevators.

Thank you for participating in the University of Manitoba Sustainability tour! Your feedback is welcomed, as are suggestions for stops to include in future editions.

For more information, contact the Office of Sustainability at:
umanitoba.ca/sustainability
(204) 474-6121

1 Bike Parking/Repair Station

The area in front of Brodie Centre is a bike lock-up area and includes a bike repair station available 24/7/365 to all. For bike repair information, scan the QR code on the station (reproduced here) or visit bikefixtation.com/help.

2 Waste Prevention

Help prevent waste by refilling a reusable coffee mug (eligible for a discount at Tim Hortons and Starbucks in Brodie Centre); reusing office furniture from the Re-Shop (149 Helen Glass, Fort Garry Campus); and recycling your batteries, print cartridges, bottles, cans, cartons, coffee cups and paper. Contact the Waste Prevention Office for more information (204-474-9608 or wpo@umanitoba.ca).

3 Joe Doupe Recreation Centre

The Joe Doupe Recreation Centre, operated by Recreation Services, is located in room 030 in the Brodie Centre and provides fitness and recreation opportunities for all University of Manitoba Bannatyne campus students, faculty and staff and to the community at large. Some of the amenities include: locker and shower facilities, a studio, a multi-use gymnasium, an indoor track and a fitness room.

4 Medicine Garden of Indigenous Learning

The Medicine Wheel Garden of Indigenous Learning is located in a calm courtyard beside the Basic Medical Sciences Building. Beyond producing traditional medicines, the garden provides a space for people to meet, share and learn about traditional Indigenous knowledge and medicines. Hyssop (H), mint (M), sweet grass (SG), and prairie sage (PS) are some of the sacred medicinal and ceremonial plants that are grown in the garden. The University is committed to supporting Indigenous achievement. More than 2,000 Indigenous students study at the University of Manitoba and the 2015 graduating class boasted the highest number of Indigenous medical graduates in the past five years.

5 Bike Cage

A bike parking enclosure next to the Dentistry Building on Bannatyne Avenue offers cyclists a secure area to store their bikes at any time of day, year-round. To gain card access, contact Physical Plant at 204-789-3649. In addition, there is a locked/heated bike room in Emily Street Parkade that is free to access apart from a refundable deposit; call 204-787-2715 for more information.

6 Green Buildings

The Dentistry Building has carbon dioxide sensors to detect variations in occupancy, optimizing classroom ventilation rates. The Brodie Centre uses temperature sensors in each room to optimize the amount of heat delivered to each space. Apotex Centre uses many green technologies including heat pumps.

7 Carpooling

The University is a member of the Carpool.ca ride matching service, which offers free carpool matching to University students and employees. Public parking is offered on McDermot Avenue, ideal for carpooling to and from the Bannatyne campus.

8 Transit Connections

The University of Manitoba Bannatyne Campus is well connected to Winnipeg's Transit system. Thirteen transit stops for ten different routes are located close to campus. The number 36 route is a Super Express bus connecting Bannatyne and Fort Garry Campuses. In fall 2016, the U-Pass will provide students unlimited access to transit services in exchange for a mandatory annual fee. Staff can use transit tickets for employee-supported business travel as an alternative to driving/paying to park.

9 Jacob Penner Park

This four-acre site on Notre Dame Avenue between Victor and McGee Streets was one of the original eight parcels of land purchased in 1893-1894 by the City's first Parks Board to establish a park system. Tens of thousands of elm trees were grown here before being transplanted to the parks and boulevards. The park is home to a skateboard park, basketball court, kiddie pool and playground and is a great place for an active coffee break, walking meeting or quiet time surrounded by nature. In partnership with the Spence Neighborhood Association, Daniel McIntyre/St. Matthews Community Association and the City of Winnipeg, a community garden was developed in 2014 that has 15 spots available to rent by community residents.

10 Energy Efficiency

Heating and cooling are produced by the HSC Energy Plant and Chilled Water Plant and then distributed throughout Campus. Heat recovery technologies in University buildings are used to capture waste heat from equipment and improve the system's efficiency.

11 Bike Routes

Sections of Sherbrook, Maryland, Bannatyne and McDermot feature bike lanes and connect the campus to Winnipeg's growing active transportation network. The Office of Sustainability has developed an interactive bike map that provides ideas for easy, lower-traffic connections between Bannatyne and Fort Garry and has links to other resources, and can offer route planning assistance.

12 HSC Farmer's Market

On Wednesdays from 10am to 3pm, local artisans and farmers offer healthy, local goods for sale at the entrance to 707 McDermot Avenue. The market runs from June to October and is open to all members of the University, HSC and broader communities. In the winter (Mid-October to mid-May) the market is located in the HSC 24-Hour Food Court which is in the Green Owl Zone, Level 2 and operates every Wednesday from 10:00 a.m. to 5:00 p.m.
