

Career Fair Employer Research Form

Employer research is one of the most productive things you can do before attending a career fair. It saves your time and the employer's time as you will increase your knowledge of their industry and how your skills & interests relate. Start by knowing which employers will be attending the Career Fair and select the employers you are most interested in learning more about. Taking time to research will help you make a great first impression.

"What is it that this company does?" Questions to consider:

- Can you tell me about the positions that exist within your organization for new graduates?
- Do you have a written job description I can take with me?
- What is the employment outlook for someone entering this field?
- What key skills do you look for in new hires?
- What advice do you have for new graduates wanting to enter this field?
- What are some typical career paths for new grads?
