

Instructors: Connecting your iClicker Course to UM Learn Gradebook

Connecting your iClicker Course to UM Learn Gradebook (Instructors)

The iClicker-UM Learn connection allows you to push grades from iClicker to a single column in your UM Learn course for simple grade management. It requires a one-time action on your students' parts, where they will click on the activity and log into their iClicker Reef accounts (or create them if they do not have one). This action connects their iClicker account to Um Learn.

Before you begin, you will need to adjust one setting in your iClicker Cloud course. Please navigate to iClicker Cloud settings in the online gradebook and the "Integrations" tab. From here, select "Brightspace" and the Simple LTI 1.1 Grade Sync option will appear. Copy the provided link for later.

iClicker course Settings Cancel **Save**

Course Details Devices Attendance Polling Quizzing **Integrations**

You can export your scores to a CSV file for manual upload into the system of your choice.

Grade Sync Integration **ON**

To connect your course, select one of the available platforms below.

Brightspace

Simple LTI 1.1 Grade Sync

Follow these instructions to set up the integration for this course:

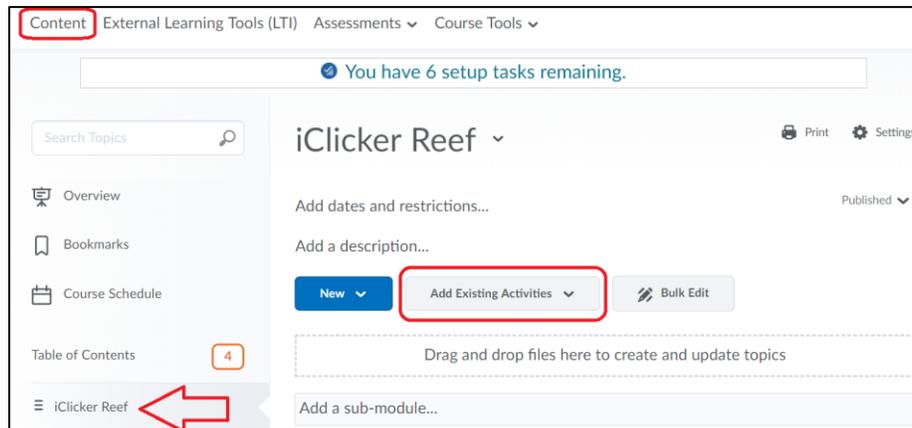

1. Sign in to the Brightspace course you would like to integrate
2. Use the course specific URL below to create an LTI tool link in your Brightspace course.
The iClicker tool needs to be set up by your campus administrator. Check with your administrator if you are having trouble creating your tool link.

Course-specific LTI link:
<https://gateway.mnv-tech.com/v1/launch/LTI11/REEF/Launch?toolId=Polling&courseId=098b5d4...> **Copy Link**

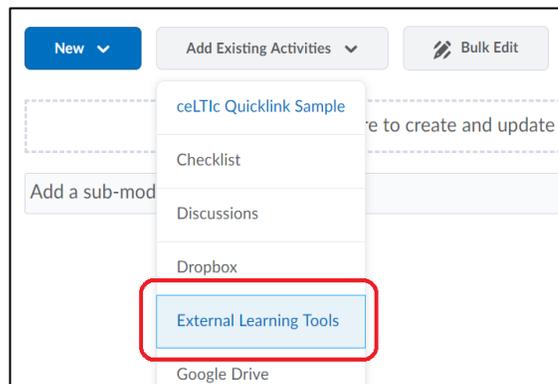

Email a reminder to unregistered students when I sync grades (recommended)

[Grade Sync Setup Help](#)

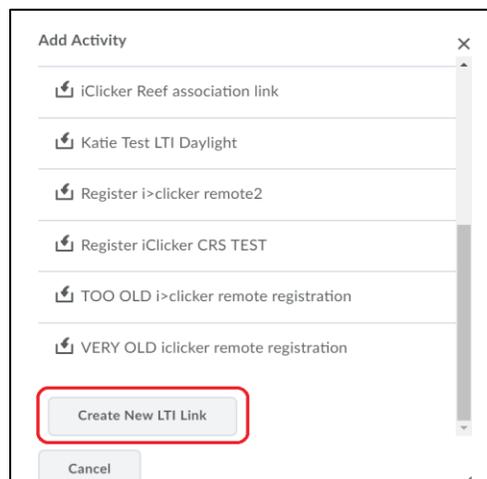

Navigate to your UM Learn course and into the Content area. From here, you will decide where you want your iClicker activity to be located. Navigate to the location or module you'd like to place the activity, or create a new module for iClicker, and select the “Add Existing Activities” option:

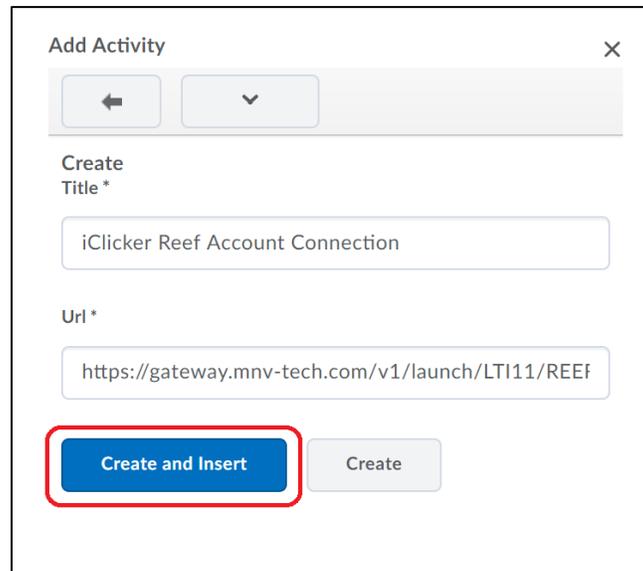

From the drop-down menu, select “External Learning Tools”:

On this list, scroll to the bottom and locate the “Create New LTI Link” button:

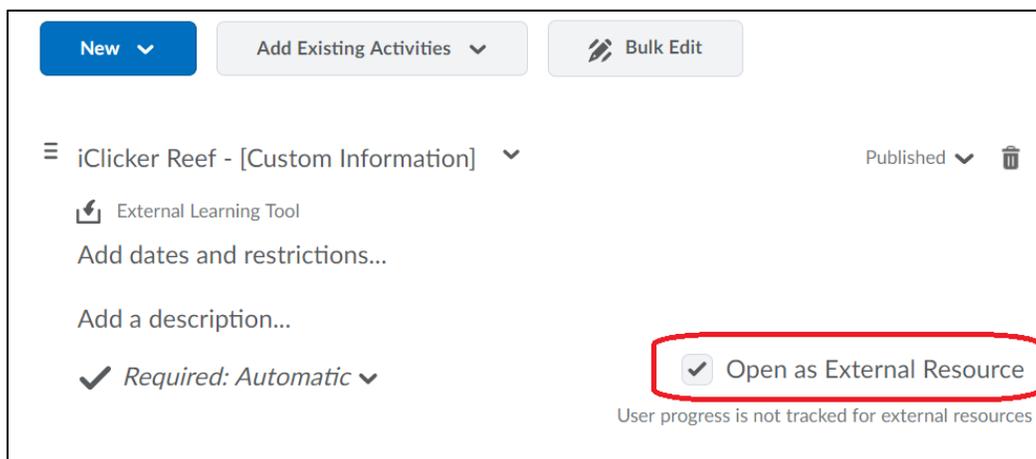

From here, you will be prompted to enter a name for your activity - we recommend “iClicker Reef Account Connection” or something similar. Then, you’ll enter your custom URL (that was copied earlier) into the URL box. Choose “Create and Insert” to place the link in your module.

The screenshot shows a dialog box titled "Add Activity" with a close button (X) in the top right corner. At the top, there are two buttons: a left-pointing arrow and a downward-pointing arrow. Below these are two input fields. The first is labeled "Create Title *" and contains the text "iClicker Reef Account Connection". The second is labeled "Url *" and contains the text "https://gateway.mnv-tech.com/v1/launch/LT111/REEF". At the bottom, there are two buttons: a blue "Create and Insert" button, which is highlighted with a red rectangular box, and a grey "Create" button.

This activity will automatically be added to your module. Be sure to click the drop-down arrow to “Edit Properties In-Place” and check the box to open as an External Resource.

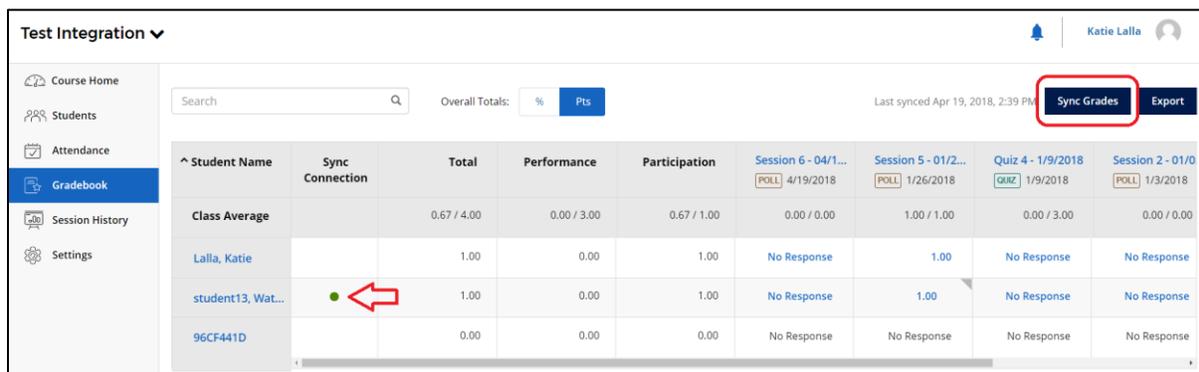

The screenshot shows a panel for editing an activity. At the top, there are three buttons: "New" (blue), "Add Existing Activities" (grey), and "Bulk Edit" (grey). Below these is a list item for "iClicker Reef - [Custom Information]" with a dropdown arrow and a "Published" status indicator. Underneath, there are several options: "External Learning Tool" (checked), "Add dates and restrictions...", "Add a description...", and "Required: Automatic" (checked). The "Open as External Resource" checkbox is checked and highlighted with a red rectangular box. Below this checkbox, the text reads "User progress is not tracked for external resources".

There is no further action required on your part for the connection, simply request your students follow these instructions to register properly.

Uploading Grades

Grades upload is a single-click feature - navigate to your iClicker Cloud gradebook (either by logging into iClicker.com and selecting your course or by logging into you iClicker Cloud software and clicking the “Launch Gradebook” link). From here, you can click “Sync Grades” to upload all grades for all connected students.

Student Name	Sync Connection	Total	Performance	Participation	Session 6 - 04/1...	Session 5 - 01/2...	Quiz 4 - 1/9/2018	Session 2 - 01/0
Class Average		0.67 / 4.00	0.00 / 3.00	0.67 / 1.00	0.00 / 0.00	1.00 / 1.00	0.00 / 3.00	0.00 / 0.00
Lalla, Katie		1.00	0.00	1.00	No Response	1.00	No Response	No Response
student13, Wat...	●	1.00	0.00	1.00	No Response	1.00	No Response	No Response
96CF441D		0.00	0.00	0.00	No Response	No Response	No Response	No Response

Students with a green dot have completed the registration process, and their grades will upload to UM Learn. **Students who have not completed the registration process will not have this dot, and their grades will not be uploaded until they have done so.**

The first time that the “Sync Grades” button is clicked, it creates a new grade item in your UM Learn course. The instructor can edit this grade item and add the grade weight that composes the final grade.
