# AGE-FRIENDLY REGIONS— PLANNING BEYOND COMMUNITIES

WEDNESDAY, MARCH 21, 2018—12:00 PM  
MILLENNIUM LIBRARY (BUCHWALD ROOM) | 251 DONALD ST.

Richard Milgrom, PhD

Associate Professor, Department Head, City Planning, Faculty of  
Architecture

Many Manitoba communities have been studied to determine how well they support quality of life for older adults. However, demographic changes in Manitoba are not equally distributed—both in terms of growth and aging. In some areas, communities declining in populations most rapidly, are also aging disproportionately. The loss of population and tax base undermines services and amenities that older adults use. This suggests that, while it is important to make towns and villages as age-friendly as possible, a regional approach to the provision of services may be necessary in some regions of the province.

**Limited seating available. Come early to avoid disappointment.**
