Agriculture has always played an important role in Manitoba's economy. The provincial and federal governments have identified innovation, competitiveness and market development, and adaptability and industry capacity as priorities for the agricultural sector in the Growing Forward 2 policy framework agreement. With those priorities in mind, this Policy, Pizza & a Pint will tackle the following questions: what role will agriculture play in Manitoba's economy in the future? How are innovations in the sector impacting rural communities? What environmental impacts can we expect to see in the future?

The **Manitoba Institute for Policy Research** is based in the department of Political Studies in the Faculty of Arts at the University of Manitoba. The Institute furthers debates and discussions on matters of public policy, administration, and governance both in Manitoba and across the country. By engaging Manitobans and increasing access to policy experts in our community through the *Citizen Series*, MIPR hopes to enhance the quality of public discourse in the province.
