UNDERSTANDING ENERGY IN MANITOBA

Tuesday, November 25th, 2014 – 7:00 PM

LOCATION: McNally Robinson Atrium, Grant Park Mall, 1120 Grant Ave.

WITH: Dr. George Chuchman (Economics, University of Manitoba), Dr. Jeffery

Cottes (Manager, Transportation Energy - Energy Division, Department of

Municipal Government), Mr. Phil Gass (Senior Researcher, International Institute

for Sustainable Development), and Dr. Peter Kulchyski (Native Studies, University of

Manitoba)

What does Manitoba's current energy infrastructure look like? Who do we sell our energy to? What are the plans for future development? How does the globalized environment affect energy economics, production and delivery to users? What's in store for the future given current economic and social trends? Join our panel of experts as they discuss these important questions.

The Manitoba Institute for Policy Research is based in the Political Studies Department, in the Faculty of Arts at the University of Manitoba. The Institute seeks to improve public policy deliberations and capacity in Manitoba by initiating conversations and debate on current and emerging issues facing our province, by publishing original research, and by engaging with the post-secondary sector, citizens, governments and non-governmental organizations to support public policy dialogue in the broadest sense.

Free event. All are welcome!
