Climate Change in Manitoba: Impacts and Adaptations Tuesday, April 29, 2014 – 6:00 PM

LOCATION: Winnipeg Free Press News Café, 237 McDermot Ave **SPEAKERS:** Dr. Danny Blair (Department of Geography, University of Winnipeg) and Jo-Ellen Parry (Deputy Director, Climate Change and Energy, International Institute for Sustainable Development)

Climate change is a global issue with localized effects that can alter the environmental, economic and social landscapes of a region. What are the current and future impacts of climate change in Manitoba? How will these changes affect the general population? Finally, how can we mitigate and adapt to climate change? Join us as Dr. Danny Blair and Jo-Ellen Parry discuss the environmental transformations we can expect and the potential solutions going forward.

The **Manitoba Institute for Policy Research** is based in the department of Political Studies in the Faculty of Arts at the University of Manitoba. The Institute furthers debates and discussions on matters of public policy, administration, and governance both in Manitoba and across the country. By engaging Manitobans and increasing access to policy experts in our community through the *Citizen Series*, MIPR hopes to enhance the quality of public discourse in the province.

\$10 buys you Pizza and a Pint. The Policy is free.
