

Winter 2021

ECE 8300 – Computer Vision

COURSE DESCRIPTION:

A study of the computational geometry, topology and physics of computer vision such as triangulated visual scenes, image object shapes and the structure of light underlying the digitization of optical sensor arrays that give rise to a computerized rendition of reflected and refracted light, radiation and dopper effect of changing physical surfaces. Topics will include a topology of data approach to image object shapes, persistence of shapes in video frame sequences, space-time character of visual scene shapes, cellular complexes, connectedness of visual scene pieces.

COURSE OBJECTIVE:

The focus of this course is on various forms of computational methods in detecting structures in computer vision. The goal of this course is to introduce computational geometry, topology and physics as a basis for the detection, analysis, measurement, comparison, single-shot recognition and classification of physical surface shapes as well as cell complexes in visual scenes found in single images and video frame sequences.

PRE-REQUISITES:

Undergraduate background in numerical methods in engineering.

CONTACT HOURS:

3-hours per week

COURSE CONTENT:

The following topics will be discussed:

- Computational geometry of surface shapes visual scenes;
- Computational topology in detecting image nerve structures;
- Visible part of the electromagnetic spectrum;
- Visual shape energy;
- Voronoï tessellation and Delaunay triangulation;
- Image Cell complexes;
- Geodesics and vortexes in visual scene shapes;
- Computer Vision applications using Matlab;

Additional advanced research topics as determined by the instructor.

HOMEWORK:

Homework will consist of assignments that include a research notebook.

TEXTBOOK:

J.F. Peters, Computer Vision Lecture Notes, 2020-2021.

GRADE ANNOUNCEMENTS:

TBA – Due to COVID-19, this date to be announced by the Registrar’s Office

EVALUATION:

The final course grade is determined by student performance in the components listed below in the Evaluation Table (seminar, assignments, term tests, and a final examination). **Students must receive a minimum of 50% on the final examination and must complete and pass all components in the course in order to be eligible to receive a passing grade.**

Each component is weighted as follows:

COMPONENT	NO	VALUE %	TOTAL VALUE	DETAILS / ADDITIONAL INFO
Seminars	1	10%	10	
Assignments	3	20%	15	
Term Tests	2	20%	25	
Final Examination	1	50%	50	
TOTAL			100	

GRADE SCALE:

LETTER	MARK	LETTER	MARK	LETTER	MARK	LETTER	MARK
A+	95-100	B+	80-84	C+	65-69	D	45-54
A	85-94	B	70-79	C	55-64	F	<45

INSTRUCTOR INFO:

Name: James F. Peters
Office: E1-330 EITC
Tel: (204) 474-9603
Email: james.peters3@umanitoba.ca

Office Hours:..... By appointment

VOLUNTARY WITHDRAW:

TBA – Due to COVID-19, this date to be announced by the Registrar’s Office

REQUIREMENTS/REGULATIONS

Student Responsibilities: It is the responsibility of each student to contact the instructor if he/she is uncertain about his/her standing in the course and his/her potential for receiving a failing grade. Students should also familiarize themselves with Sections 4 and 6 of the Regulations dealing with, among others, incomplete term work, deferred examinations, attendance and withdrawal, etc..

Lectures: Attendance at lectures is essential for successful completion of this course. Students must satisfy each evaluation component in the course.

ACADEMIC INTEGRITY

Students are expected to conduct themselves in accordance with the highest ethical standards of the Profession of Engineering and evince academic integrity in all their pursuits and activities at the university. As such, in accordance with the General Academic Regulations and Requirements of the University of Manitoba, Section 7.1, students are reminded that plagiarism* or any other form of cheating is subject to serious academic penalty (e.g. suspension or expulsion from the faculty or university) regardless of media

- examinations
- assignments
- laboratory reports
- term exams

A student found guilty of contributing to cheating in examinations or term assignments is also subject to serious academic penalty

Please refer any questions regarding Academic Integrity to your course instructor.

***Plagiarism:** to steal and pass off (the ideas or words of another) as one's own; use (another's production) without crediting the source
