Course Overview
This course traces the emergence of a modern “human rights” culture/regime as a product of the formation and expansion of the system of nation-states and the concurrent rise of value-driven social mobilizations. It juxtaposes these Western and imperial origins of human rights with competing non-Western systems of thought and practices on rights and political practice. The course will give specific attention to rights such as protection of the body and personhood and modern Western notions of individualism entailed therein. In our understanding, these rights include social and economic rights. Second, it inquires into rights as they affect groups (such as refugees, ethnicities, “first nations,” but also, potentially, transnational corporations). Such group rights have been a persistent feature of human rights and humanitarian concerns. Third, we will explore the question of (national) sovereignty, the right to self-determination, and its relationship to universal or, respectively, global rights and will discuss in this context, whether a global rights regime is feasible.

Participation Mark (5%): There will be five short participation assignments that students will complete live during assigned class period. Each assignment is approximately 250 words in length.
