Course Outline

Instructor
• Prof. Faouzi Bellili
  (204) 474–8241
  Faouzi.Bellili@umanitoba.ca

Office Hours
• By appointment

Teaching Assistant
• Chathura Illangakoon
  umillang@myumanitoba.ca

Contact Hours
• 4 credit hours
• Lectures:
  3 hours x 13 weeks = 39 hours
• Laboratories:
  3 hours x 5 weeks = 15 hours

Prerequisites:
• ECE 3780 Signal Processing 1
• ECE 4260 Communication Systems

Course Website:
http://umanitoba.ca/umlearn

ECE 4250 – Digital Communications

Course Objectives
To introduce the principles of digital communication, methods and tools for analysis and design of digital communication systems, including simulation in Simulink.

Course Content
The following topics will be covered:
• A/D conversion and source coding
• Digital modulation and geometric representations
• Digital receiver design
• Inter-symbol interference
• Error control coding
• Synchronization (time-permitting)

Textbook

Other Resources
(https://www.cambridge.org/core/books/principles-of-digital-communication/8EC09E974B567D5A045A4438759DE077)

Learning Outcomes
1. Design and analyze quantizers using numerical software
2. Analyze digital modulation techniques using signal processing tools
3. Design optimum digital receivers
4. Understand and apply basic error control coding methods
5. Simulation and implementation of digital communication systems using Simulink and software-defined radio.

CEAB Graduate Attributes Assessed
PA.3 – Analyzes and solves complex engineering problems.
IN.3 – Interprets results and reaches appropriate conclusions.
Evaluation

The final course grade is determined by the student’s performance on assignments, in laboratories, and on examinations. Students must complete all the laboratories in order to be eligible to receive a passing grade.

* Method of Feedback: F - Formative (written comments and/or oral discussion), S - summative (numerical grade)

Academic Integrity

Students are expected to conduct themselves in accordance with the highest ethical standards of the Profession of Engineering and evince academic integrity in all their pursuits and activities at the university. As such, in accordance with the General Academic Regulations on Academic Integrity, students are reminded that plagiarism or any other form of cheating in examinations, term tests, assignments, projects, or laboratory reports is subject to serious academic penalty (e.g. suspension or expulsion from the faculty or university). A student found guilty of contributing to cheating by another student is also subject to serious academic penalty.

Requirements and Regulations

- Attendance at lectures and laboratories is essential for successful completion of this course. Students must satisfy each evaluation component in the course to receive a final grade.
- It is the responsibility of each student to contact the instructor in a timely manner if he or she is uncertain about his or her standing in the course and about his or her potential for receiving a failing grade. Students should also familiarize themselves with the University’s General Academic Regulations, as well as Section 3 of the Faculty of Engineering Academic Regulations dealing with incomplete term work, deferred examinations, attendance and withdrawal.
- No programmable devices or systems (such as calculators, PDAs, iPods, iPads, cell phones, smart watches, wireless communication or data storage devices) are allowed in examinations unless approved by the course instructor.
- Students should be aware that they have access to an extensive range of resources and support organizations. These include Academic Resources, Counselling, Advocacy and Accessibility Offices as well as documentation of key University policies e.g. Academic Integrity, Respectful Behaviour, Examinations and related matters.

Retention of Student Work

Students are advised that copies of their work submitted in completing course requirements (i.e. assignments, laboratory reports, project reports, test papers, examination papers, etc.) may be retained by the instructor and/or the department for the purpose of student assessment and grading, and to support the ongoing accreditation of each Engineering program. This material shall be handled in accordance with the University’s Intellectual Property Policy and the protection of privacy provisions of The Freedom of Information and Protection of Privacy Act (Manitoba). Students who do not wish to have their work retained must inform the Head of Department, in writing, at their earliest opportunity.
