### Notes:

Deadline to submit course changes not related to new programs or major program changes to be included in the 2019/20 calendar: October 31, 2018

Deadline to submit course changes not related to new programs or major program changes to be effective September 2019: October 31, 2018

*\*\*These deadlines assume a smooth process meaning that units' proposals for change are approved the first time a committee vets them and they do not have to be revetted by a given committee. It is always best to submit proposals as early in the year as possible to account for potential delays in the process. Final approval of course implementation rests with Senate.*
