BACHELOR OF HEALTH STUDIES

The Bachelor of Health Studies combines knowledge from science and social science disciplines in their content and programming. The degree provides a foundation for careers in health care teams and community health management.

• The program supports the promotion of health by creating a new understanding among students of the determinants of health and how these determinants influence the health of individuals, families, and communities as well as health services.
• The program offers new approaches to planning, administration and delivery of health services.
• This program can provide a foundation for students who wish to enter professional programs and also offer another route for students to gain access to specialized programs for both health and social science fields. Those who complete this degree could work in a large variety of agencies and businesses that plan or deliver health related services and products.

The Bachelor of Health Studies program prepares students to:
• Support the promotion of health.
• Prevent disease and promote health in local, national and global contexts.
• Deliver health services and/or supports in community health centres, government agencies, health organizations and hospitals.

INTERDISCIPLINARY HEALTH PROGRAM

The Interdisciplinary Health Program (IHP) is a joint program offered by the Rady Faculty of Health Sciences and the Faculties of Arts and Science. The IHP is two separate, four year, 120 credit hour degrees:
• Bachelor of Health Studies
• Bachelor of Health Sciences
(Not covered in this brochure.)

General entrance requirements for IHP: 24 credit hours (6 credit hours from Arts and 6 from Science) with a 2.0 GPA.

Students can also apply direct from high school to the IHP. Please see the application bulletin for requirements:
http://umanitoba.ca/student/admissions/application/programs/4272.html
