**PROGRAM NAME**
Advanced Training in Pediatric Hematology/Oncology

**DURATION OF TRAINING**
1 year

**NUMBER OF POSITIONS AVAILABLE**
1 per year

**DESCRIPTION/OVERVIEW OF PROGRAM** (maximum 250 words)
Pediatric Hematology/Oncology encompasses a wide variety of diagnoses, and the management of these patients is becoming increasingly specialized. Specialists treat children with both non-malignant and malignant hematologic disorders and solid tumours, and treatment now includes advanced modalities such as stem cell therapy, immunotherapy, and targeted inhibitors of cellular pathways. While the current three-year Royal College training program in Pediatric Hematology/Oncology provides a comprehensive exposure to the field, this program provides an opportunity for further focused experience in a particular area of interest, in order to have adequate expertise in the management of these evolving areas of subspecialty.

The specific scope of the fellowship will be highly dependent on your unique interests and intent. You should already have a strong knowledge of the pathophysiology, diagnosis, and management of common conditions in Pediatric Hematology/Oncology, and a solid approach to the evaluation of new clinical questions. You should also have a good understanding of the laboratory and diagnostic methods.

As a member of the care team, you will participate in inpatient ward rounds, consultative activities within Children’s Hospital, and outpatient clinics at CancerCare Manitoba. There will also be laboratory based rotations to advance understanding and knowledge of diagnostic modalities. Specific clinical activities will be tailored to your specific needs and interests, but you will be expected to take on a senior supervisory role and exercise appropriate independence, under graduated supervision.

**TRAINING LOCATION(S)**
- CancerCare Manitoba
- Health Sciences Centre, Children’s Hospital
- Canadian Blood Services
- Diagnostic Services of Manitoba

**MATCH PROGRAM**
☐ YES  ☒ NO

**IF YES, INDICATE APPLICATION PROCESS**
APPLICATION DEADLINE

Applications will be accepted on an ongoing basis, with a flexible start date.

PROGRAM INQUIRIES

Program Director Name: Dr. Jayson Stoffman
Program Address: ON 2017 – 675 McDermot Avenue, Winnipeg
Telephone: 204 787 4372
Fax: 204 786 0195
Email: jstoffman@cancercare.mb.ca

APPLICATION PROCESS

Candidates must apply to:

Pediatric Subspecialty Coordinator
AE 405-840 Sherbrook Street
Winnipeg, MB R3A 1S1
T 204.787.1676
F 204.787.1938
E: PGME_PedsSubspecialty@exchange.hsc.mb.ca

Applicants must have completed at least two years of training in Pediatric Hematology/Oncology, at a recognized training program. The application must include a personal letter, describing the desire to pursue advanced training as well as the specific area of interest, and a full Curriculum Vita. At least three letters of reference must be provided, including one from their Program Director in Pediatric Hematology/Oncology. If the fellowship training will include a research component, then a brief description of the proposed project and a letter of support from the proposed supervisor is also required.

All applications will be reviewed by the Residency Program Committee in Pediatric Hematology/Oncology. Suitable candidates will be invited for an in-person interview prior to final decision.
