PROGRAM NAME
Multiple Sclerosis Fellowship

DURATION OF TRAINING
1 – 2 years

NUMBER OF POSITIONS AVAILABLE
1

DESCRIPTION/OVERVIEW OF PROGRAM (maximum 250 words)
The University of Manitoba already has a well-established five year residency training program in Neurology. The Multiple Sclerosis Clinic at the Health Sciences Centre is the only MS clinic serving Manitoba; it also serves Northwestern Ontario. Patients with demyelinating disorders including multiple sclerosis, neuromyelitis optica, recurrent transverse myelitis, and other CNS demyelinating disorders are evaluated and managed in the clinic. The MS Clinic team is composed of physicians, nurses and allied health professionals from several disciplines. Over 200 new patients are evaluated annually. During this fellowship trainees will become expert at diagnosing and managing multiple sclerosis (MS) in the adult and pediatric populations, learn how to participate in and run clinical trials; conduct a research project geared to MS; and participate in educational activities specific to MS.

TRAINING LOCATION(S)
Winnipeg Health Sciences Centre
