

This newsletter describes new and recently updated resources available to users of the MCHP data repository. Previous updates are available [here](#).

## AT A GLANCE

[Data Update](#)  
[Deliverable Concepts and Glossary Terms](#)  
[New Concepts](#)  
[Revised Concepts](#)  
[Concepts In Progress](#)

### Data List

MCHP's data list identifies the years of availability and source agencies of all repository data.

Clicking the data name produces a detailed description including a summary, list of studies that have used the data, a link to related concepts, and a number of additional fields that describe the data.

Most data in our Repository are updated to 2014/15.

## Data Update

### DIAGNOSTIC SERVICES MANITOBA - WESTMAN LAB DATA

Diagnostic Services Manitoba Westman Lab data include Chemistry, Hematology, and Microbiology test information and results, as well as basic patient demography for testing completed in the Brandon Regional Health Centre's Westman Laboratory from 2010 to 2014. [> Learn More](#)

### MANITOBA CANCER REGISTRY - SCREENING DATA

Screening data from the Manitoba Cancer Registry contains information on breast, cervix, and colon screens. Information includes basic patient demography and test result. [> Learn More](#)

## New Deliverable Concepts & Glossary Terms

[Care of Manitobans Living with Chronic Kidney Disease](#)

[Long-Term Outcomes of Manitoba's Insight Mentoring Program: A Comparative Statistical Analysis](#)

## New Concepts

**Atrial Fibrillation** - Defines how atrial fibrillation is identified in the MCHP Data Repository and how it was investigated in the Care of Manitobans Living with Chronic Kidney Disease deliverable. [> Learn More](#)

**Capture-Recapture Method of Estimating Population Size** - Describes the capture-recapture statistical methodology used to estimate the prevalence of chronic kidney disease in the Care of Manitobans Living with Chronic Kidney Disease deliverable. [> Learn More](#)

**Chronic Kidney Disease (CKD)** - Contains information on how CKD is defined using administrative health and laboratory data in the MCHP Data Repository. [> Learn More](#)

**Dialysis Treatment Start and Dialysis Treatment End** - Provides information on how to identify dialysis treatment start and end dates in the MCHP Data Repository. [> Learn More](#)

**End Stage Kidney Disease (ESKD)** - Describes how ESKD is defined using administrative data in the MCHP Data Repository. [> Learn More](#)

**Fractures: Case Definitions Using Administrative Data** - This concept identifies and describes fracture case definitions developed in research using administrative data. [> Learn More](#)

**Matching Cases to Controls Using a Direct Matching Method** - Describes a study design method for matching cases to controls using a direct matching method. [> Learn More](#)

**Risk of Chronic Kidney Disease (CKD) Progression to End Stage Kidney Disease (ESKD) - Heat Map** - Discusses the methodology of assessing the risk of CKD progressing to ESKD using a heat map. [> Learn More](#)

## Revised Concepts

**Calculating Hospital Costs Using Cost Per Weighted Case (CPWC) Values** - Contains information on data sources, methods, the use of CPWC in research at MCHP with relevant links, and CPWC methods available from CIHI. [> Learn More](#)

**External Cause of Injury Codes and Injury Categories** - Data sources that contain external cause of injury codes are identified as well as links to related MCHP research that analyzes injury mortality and hospitalizations. [> Learn More](#)

## Tasks in Progress

Keep up to date on future concepts and those currently under development. [> Learn More](#)
