

**TEMPLATE: Fellowship Program Information**

**PROGRAM NAME**

Adult Hip and Knee Reconstruction

**DURATION OF TRAINING**

6-12 months

**NUMBER OF POSITIONS AVAILABLE**

2

**DESCRIPTION/OVERVIEW OF PROGRAM** (*maximum 250 words*)

The Concordia Joint Replacement Group (CJRG) consists of four fellowship trained arthroplasty surgeons who perform approximately 1,400 primary and revision hip and knee replacements per year at the Concordia Hospital in Winnipeg, Manitoba, Canada.

The group employs the most current techniques for primary hip and knee replacement surgery including cemented and uncemented implants, computer navigation, resurfacing and unicondylar arthroplasty from a variety of implant manufacturers. Revision hip and knee surgical techniques utilized include modular revision stems, long stem porous coated implants, impaction grafting, and extended trochanteric osteotomies both from a posterior and direct lateral approach.

We have a strong research team consisting of staff capable of research design and support. Our facility hosts an extensive clinical data repository as well as an implant retrieval laboratory, an RSA laboratory, a surgical training suite and through collaboration with the Orthopedic Innovation Centre has access to several state of the art implant wear simulation and prototyping facilities.

We are connected with the Department of Community Health Sciences, the Department of Engineering and the Manitoba Center for Health Policy at the University of Manitoba. Having several ongoing studies we welcome those with an interest in research.

Along with our outstanding clinical and research infrastructure we also offer a friendly work environment with an excellent working relationship amongst all staff and surgeons.

**TRAINING LOCATION(S)**

Concordia Hip and Knee Institute  
1155 Concordia Ave.  
Winnipeg, Manitoba

**MATCH PROGRAM**

YES       NO

**IF YES, INDICATE APPLICATION PROCESS**

**APPLICATION DEADLINE**

March 1- the year prior to the fellowship year you are requesting
