Sapienza University of Rome

dalfonso@dis.uniroma1.it

Tiziana D'Alfonso is Research Assistant in Economics and Engineering Management at Sapienza University of Rome (Department of Computer, Control, and Management Engineering).

Her research interests are on industrial organization, economics and regulation of network industries, transport economics and policy with a particular focus on air transport, rail transport and local public transport. She has published several papers in relevant international journals. Research results have been presented annually in several national and international conferences, including those of International Transport Economic Association (ITEA) and Air Transport Research Society (ATRS).

She has worked mainly as a local unit member, and sometimes as principal investigator in several research projects funded by grants from firms and institutions such as: European Union, Ministry of Higher Education, Ministry of Infrastructure and Transport, National Association for Road Transport and Travelers, National Association for Civil Aviation.
