

**Ambulatory Infectious Diseases Rotation
(as of October 2009)**

**John M. Embil
Consultant Infectious Diseases
Director, Infection Prevention and Control Unit
Coordinator, Diabetic Foot and Complicated Wound Clinic
Associate Professor, Internal Medicine, Infectious Diseases and
Medical Microbiology**

The objectives for this rotation are as follows:

1. Learn basic concepts in clinical medicine as they pertain to ambulatory care infectious diseases.
2. Read both the Canadian Immunization Guide and the Canadian Guideline for Management of Sexually Transmitted Infections.
3. Become familiar with the management of the following conditions:
 - Diabetic foot ulcerations/infections
 - Pressure ulcerations/infections
 - Bone and joint infections
 - Urinary tract infections
 - Skin and soft tissue infections
4. Rational management of antimicrobial therapy
