* This list represents all ongoing, long-term databases housed in the MCHP Data Repository from data agencies with which MCHP has completed data sharing agreements. Databases for which a data sharing agreement has not been completed are not included. Permission to access any database must

always be sought from the Health Information Privacy Committee and typically from the data provider as well. Data providers are indicated in [brackets] and a fiscal year (xx/xx) refers to the period April 1 to March 31. Databases available for research but no longer updated are shown in italics. Links are included to descriptions, where developed, of the databases.

¹ Is noted as *Medical Claims (Physician Billings)* in the HIPC application form.

² Augmented version of the *Physician Resource File* referred to in the HIPC application form. Generally required for obtaining information about provider characteristics other than specialty (which is available in the Medical Services data).

There are 63 groups of data files in this list which can be conceptualized as follows:

- 1) **Domains** - broad categories reflecting the internal organization of data files into libraries.
- 2) **Databases (bolded)** (N=63) - groupings of data into conceptual analytical entities meaningful to researchers and typically used for carrying out studies.
- 3) **Sub-categories** (another N=32) - groupings that further distinguish significant differences in content and/or data sources within database groupings.
