International Health Data Linkage Network

- Inaugurated in London in December 2008
- Facilitates communication between linkage centres and users committed to the systematic application of data linkage to produce community benefit in the health and health-related domains.
- Over 120 members from Australia, Canada, England, New Zealand, Singapore, Scotland and the United States of America. Meets every two years.
- Membership is open to any group or individual that supports the purpose of the network;
Website: www.ihdln.org E: victoria.gray@uwa.edu.au

IHDLN: Statement of Purpose

To provide a clearing house for scientific outputs and community impacts arising from data linkage activities supported by the members;

To share information and resources concerning common challenges and solutions;

To build workforce capacity and other supports for data linkage;

To foster collaborative projects that show the value of data linkage applications or improve the quality of data and linkage methods;

To observe and promote high standards of governance and ethical practice in the conduct of data linkage activities.

International Health Data Linkage Network

Thank you
