

Figure A.3.91: Percent of Families with Newborns Where Parents Experienced Relationship Distress by District

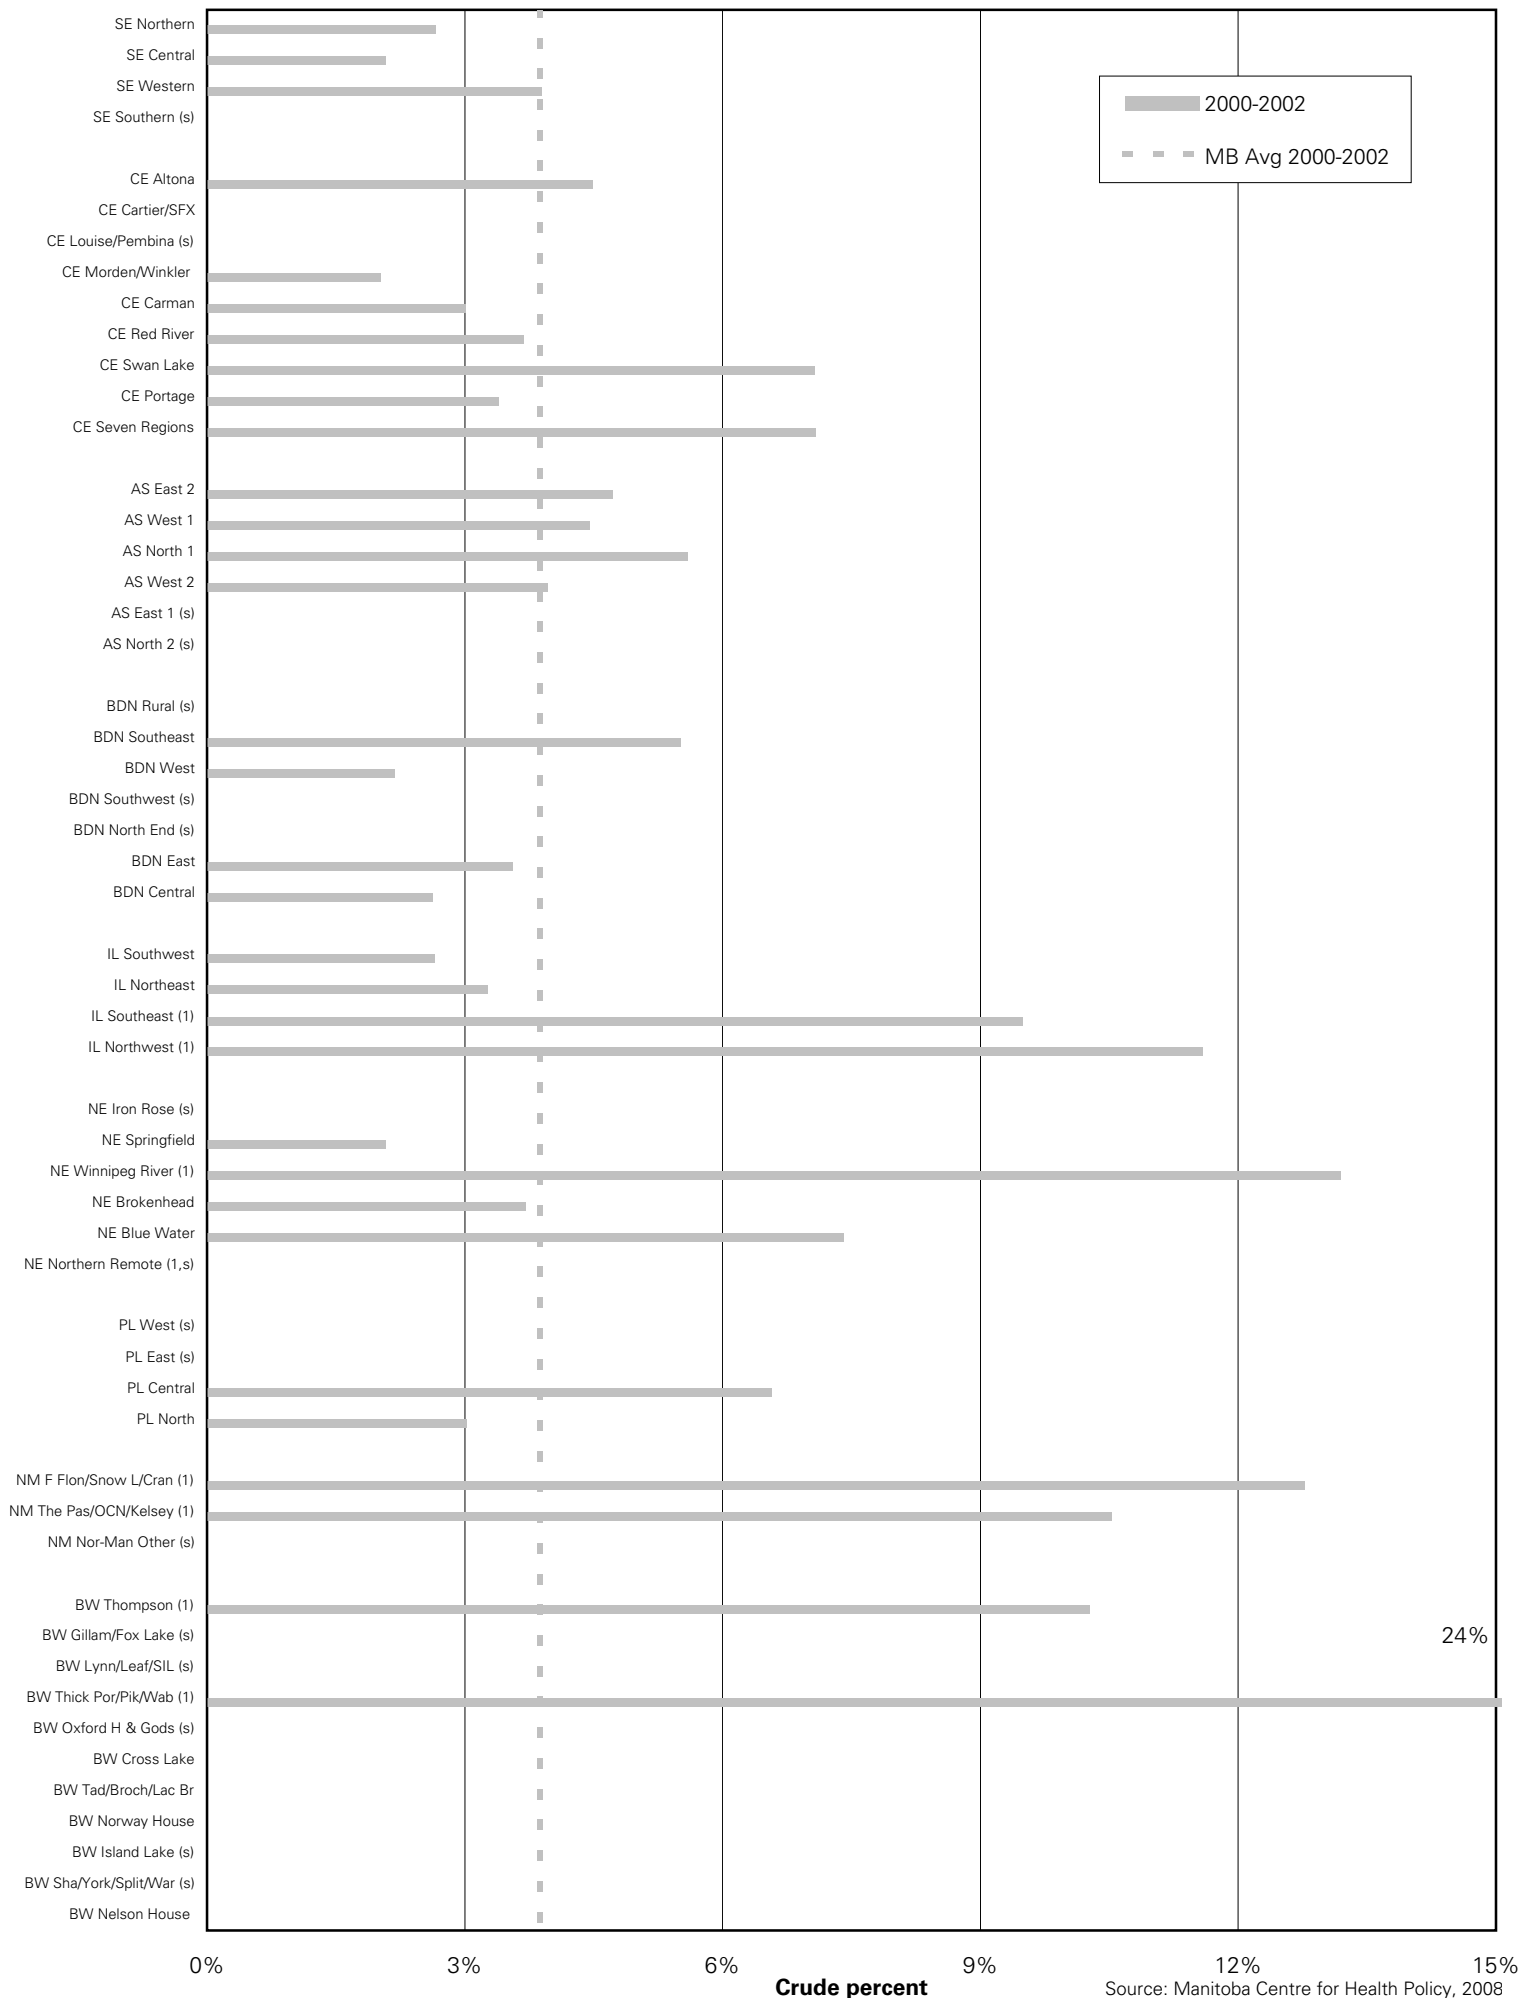

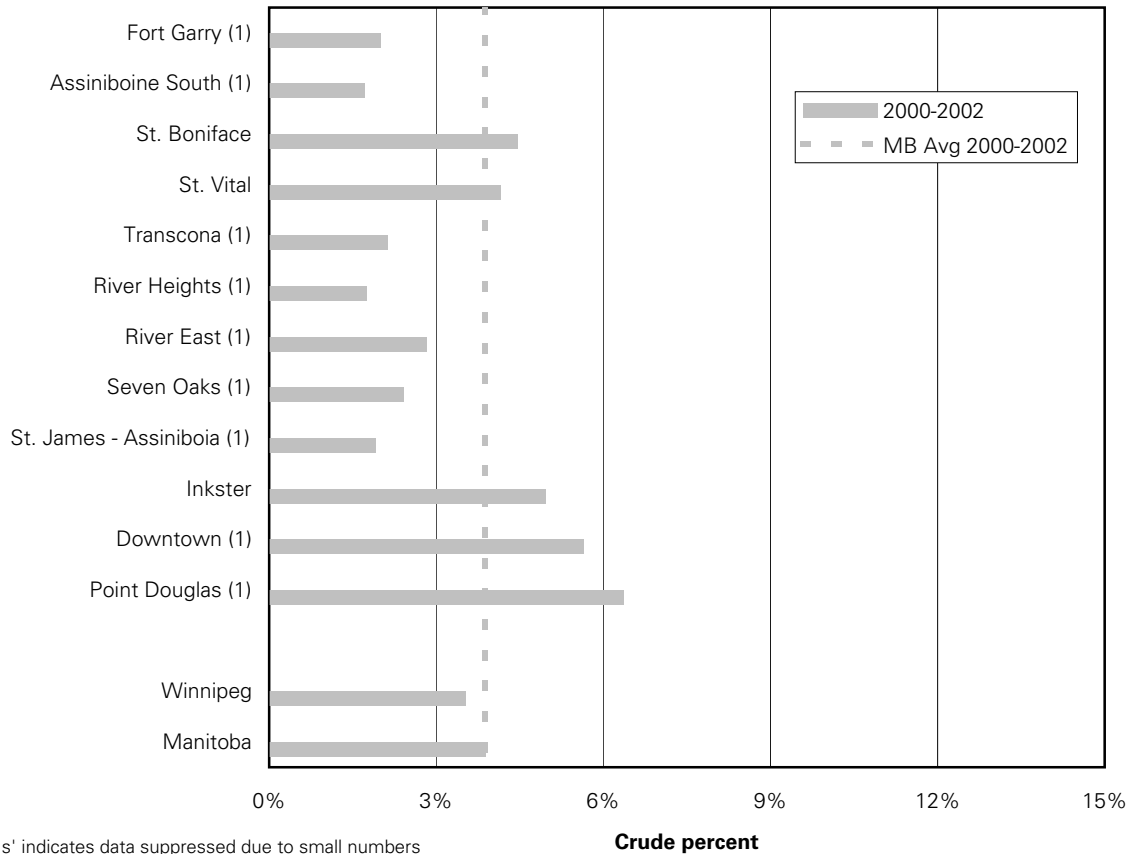

Figure A.3.92: Percent of Families with Newborns Where Parents Experienced Relationship Distress* by Winnipeg Community Areas

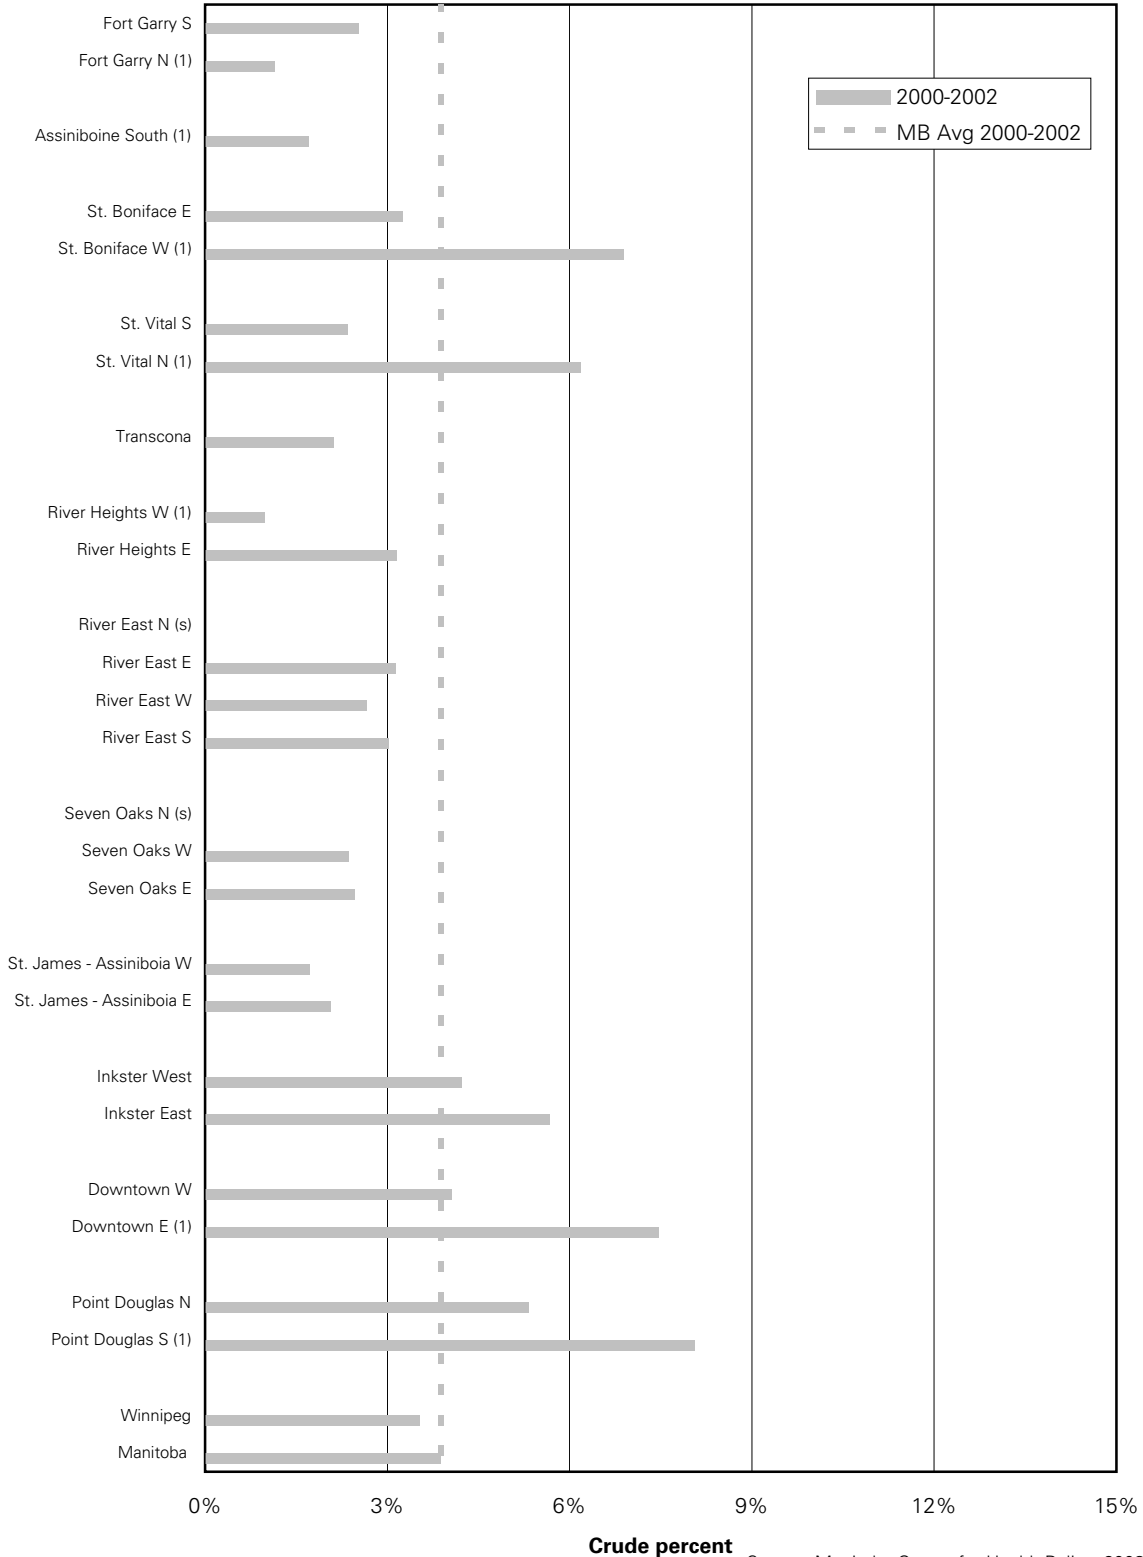

's' indicates data suppressed due to small numbers

'1' indicates rate was statistically different from Manitoba average

* information for this graph was taken from newborn screening forms. Because not all newborns and their families were screened, and screening levels varied markedly across RHAs, these results may not provide a true picture of risk levels, particularly for those RHAs where screening levels were low. Please see discussion in this chapter.
