RUNCHEY MIYAZAWA ABBOTT

AUDITORS' REPORT

To the Board of Directors of
MANITOBA MEDICAL COLLEGE FOUNDATION INC.

We have audited the statement of financial position of **MANITOBA MEDICAL COLLEGE FOUNDATION INC.** as at March 31, 2010 and the statements of operations and changes in fund balances for the year then ended. These financial statements are the responsibility of the Foundation's management. Our responsibility is to express an opinion on these financial statements based on our audit.

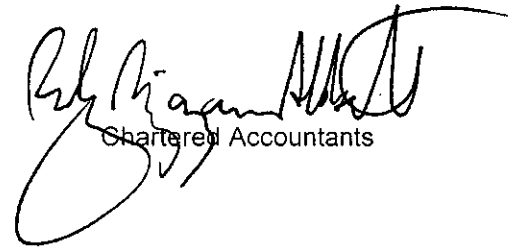

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In common with many non-profit organizations, the Foundation derives revenue from donations, the completeness of which is not susceptible of satisfactory audit verification. Accordingly, our verification of this revenue was limited to the amounts recorded in the records of the Foundation and we were not able to determine whether any adjustments might be necessary to donation revenue, assets and fund balances.

In our opinion, except for the effect of adjustments, if any, which we might have determined to be necessary had we been able to satisfy ourselves concerning the completeness of the donations referred to in the preceding paragraph, these financial statements present fairly, in all material respects, the financial position of the Foundation as at March 31, 2010 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The prior year figures were reported on by other auditors.

MANITOBA MEDICAL COLLEGE FOUNDATION INC.

NOTES TO FINANCIAL STATEMENTS

March 31, 2010

1. ENTITY DEFINITION

The Manitoba Medical College Foundation Inc. (MMCF) is a non-profit organization established to promote medical education and research, and administer Foundation funds established for the support of scholarships, research projects and visiting professorships. It was incorporated on November 16, 1977 under the Corporations Act of Manitoba and is registered with Canada Revenue Agency as a charitable organization.

2. ACCOUNTING POLICIES

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results may differ from those estimates. The significant accounting policies used in these financial statements are as follows:

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting.

Fund Accounting

The Foundation follows the restricted fund method of accounting for donations and other receipts.

(a) General/Discretionary Fund

The General Fund has no restrictions as to the nature of the expenditures which may be made. The General Funds's revenue includes membership fees, investment income and miscellaneous donations. These funds may be used for various purposes, including administration costs, medical research, education and other medical related missions.

(c) Non-Discretionary Fund

Non-Discretionary Funds are gifts from donors held in perpetuity and administered under various designated and undesignated criteria.

Revenue Recognition

Donations and other revenue related to the General/Discretionary Fund and Non-Discretionary Funds are recognized as revenue in the year of receipt.

Investment income is recognized when earned.

Gains and losses on sales of investments are recognized when realized.

MANITOBA MEDICAL COLLEGE FOUNDATION INC.

NOTES TO FINANCIAL STATEMENTS

March 31, 2010

Financial Instruments

All financial assets and liabilities are required to be initially recognized at fair value. In addition, all financial assets are to be classified as either "Held for trading", "Available for sale", "Held to maturity" or "Loans and receivables". Financial liabilities are to be classified as either "Held for trading" or "Other". After initial recognition, measurement of financial assets or liabilities is dependant on their classification. Financial assets or liabilities classified as "Held to maturity", "Loans and receivables" or "Other" are measured at amortized cost. Financial assets or liabilities classified as "Held for trading" are measured at fair value with gains or losses recognized in net income. Financial assets classified as "Available for sale" are measured at fair value with gains or losses recognized in net assets.

The Foundation's financial instruments consist of cash, accounts receivable, investments, accounts payable and accrued liabilities and distributions pending. The Foundation has classified cash and accounts receivable as "Held for trading", investments as "Available for sale", and accounts payable and accrued liabilities and distributions pending as "Other". The fair value of cash, accounts receivable, accounts payable and accrued liabilities and distributions pending approximate their carrying value. The fair value of investments was determined by using quoted market prices. The change in fair value of \$640,886 (2009 - \$(787,251)) has been recognized in net assets.

At March 31 of each year the Foundation assesses whether a financial asset is permanently impaired. If there is an objective evidence that an impairment loss exists, the amount of the loss is measured as the difference between the carrying amount of the asset and its fair value. The carrying amount of the asset is reduced and the amount of the loss is recognized in investment income.

Transaction costs for financial instruments are expensed in the period incurred and recognized in net income.

The Foundation's financial risks are as follows:

Market risk

Investments consist of a pooled balanced fund managed professionally by an independent fund manager appointed by the Board of Directors. The Board of Directors places certain parameters on investments. The performance of the fund manager is routinely monitored by the Board.

The value of the pooled funds varies with the business, financial condition, management and other relevant factors affecting the underlying companies and entities that the pooled fund has invested in. In addition, general economic conditions of the markets in which such funds operate change, thereby exposing the Foundation to fluctuations in value of its investments.

Credit Risk

The Foundation is exposed to credit risk to the extent that its donors may experience financial difficulty and would be unable to meet their obligations. The Foundation has a large number of diverse donors which minimizes this risk.

3. INVESTMENTS

	2010	2009
Pooled funds		
AMI Balanced Fund, at book value	\$ 4,055,280	3,910,344
Market value	\$ 3,986,433	3,200,611

The accompanying notes are an integral part of these financial statements.

NOTES TO FINANCIAL STATEMENTS

March 31, 2010

4. INVESTMENT INCOME ALLOCATION

Each year the Board of Directors determines the amount of income earned by the fund that is to be allocated to the individual General/Discretionary and Non-Discretionary Funds. For the current year the allocation is 4.5% (2009 - 4.5%) of the average book value balance of each fund at December 31, 2007, 2008, 2009.

5. STATEMENT OF CASH FLOWS

Since the sources and uses of cash are apparent from a review of the financial statements, a statement of cash flows has not been prepared.

6. CAPITAL DISCLOSURE

The Foundation defines its capital as the amounts included in its Fund balances. Its objective when managing capital is to safeguard its ability to sustain itself as a going concern so that it can continue to provide benefits and services to its stakeholders.

Management and the Board of Directors considers fundraising campaigns, government grants and investment income to ensure that sufficient funds will be available to meet the Foundation's short and long-term objectives.

The Foundation monitors its financial performance against an annual budget. Surpluses from operational activities are accumulated in the General/Discretionary Fund and may be used to provide additional capital to the Non-Discretionary Fund.

The Foundation's overall strategy with respect to capital risk management remains unchanged from the year ended December 31, 2009.

7. COMPARATIVE FIGURES

Certain of the comparative figures for the year ended March 31, 2009 have been restated to conform to the current year's presentation. Excess of revenue over expenditures for the year remain as previously reported.
