How Do I....?

How do I access the full-text of online articles?
- Look for the “Get It@UML” button in One Stop Search or databases. This will link you to the full-text of the resource.

How do I access library resources from off-campus?
- When accessing online resources from off-campus you will be prompted to sign in with your Library Account, which is the same as your UMNet ID and password. Check your Library Account on the Libraries’ website.

How do I know what databases to use for my literature search?
- Start with the Nursing subject guide. Look for the Books/Articles/Databases page for a list of the best databases, such as CINAHL or PubMed. For your non-nursing courses, use the Subject Guides link on the Libraries’ website.

How do I find the articles from my course reading list?
- First try searching on the article title in One Stop Search on the Libraries’ website. If that doesn’t work, use the Article Linker found in One Stop Search Advanced and enter the details from the article citation. See the guide Finding Course Readings Online for more information.
