How does anxiety affect the brain and spinal cord?

Seeking people with Generalized Anxiety Disorder for an MRI research study

Study participation involves:
• One 2.5 hour visit
• Filling out questionnaires
• Viewing images while we take MRI pictures of your brain/spinal cord

If you are over 18 with Generalized Anxiety Disorder, and are interested in participating, please contact Tiffany.Kolesar@umanitoba.ca or 204-787-5658

Reimbursement will be provided

This study has been approved by the University of Manitoba Bannatyne Campus Biomedical Research Board.
