University Indigenous Research Program (UIRP)
General Guidelines

Purpose

The purpose of the University Indigenous Research Program (UIRP) is to foster the inclusion of Indigenous perspectives in research and/or to seed community-based research in partnership with First Nations, Métis and Inuit communities, including community-based opportunities with global Indigenous communities. This program supports building partnerships and supporting communities, as well as sharing Indigenous knowledge and research which are strategic priorities of the University’s Strategic Plan 2015-2020 and the Strategic Research Plan 2015-2020.

Funding Priorities and Principles

The UIRP provides funding for original, high quality research projects across all disciplines that are pre-requisite to long-term Tri-Agency support. Research for, with, and by Indigenous peoples is an important cross-cutting dimension of scholarship at the University of Manitoba.

The UIRP does not provide continuing support of ongoing research projects, nor is it a substitute for Tri-Agency funding. Recipients of support from the UIRP are expected to use the funds awarded to develop their research to the point where applications for Tri-Agency funding can be made.

Applicants proposing research projects which are intended to extend over a longer term period should consider developing a multi-year funding proposal in support of a full program of research and submitting such proposals directly to Tri-Agency funding opportunities for consideration.

Eligibility

All full-time academic faculty members with professorial or academic librarian rank, holding tenure or tenure-track appointments; and geographical full-time (GFT) academic faculty members, who have a minimum 40% protected time for research are eligible to apply to the UIRP for support.

*Contingent, nil-salary and adjunct professors are not eligible to apply for internal grants.*

Applicants may submit one UIRP application per competition. There is no limit on the number of applications on which a faculty member may be a co-investigator. Applicants who receive support from the UIRP may receive additional support from the program in future competitions for a separate project.

Applicants who are eligible to apply to the UCRP, the UIRP and to other internal grant programs (the URGP or the UM/SSHRC Grants Programs) may apply to several of these programs in a given competition period, i.e., November 15. However, applicants may not submit identical or similar applications to these programs in the same competition or in future competitions. Applications must be for separate projects. Research grants from these competitions may not be pooled with the intention of funding a larger project. Please note that existing guidelines pertaining to the submission of applications to the UM/SSHRC Explore (formerly known as UM/SSHRC RGP) and the URGP in the same competition remain unchanged.

Type, Nature, and Extent of Support

The UIRP is a flexible program designed to provide support for a wide range of activities¹, provided these activities support the stated purpose of the UIRP, that is, to foster the inclusion of Indigenous perspectives in research

¹ The UIRP does not support research leading to a degree for the applicants. Similarly, this program does not provide support for research conducted by graduate students in partial fulfillment of degree requirements unless such research is part of the faculty member’s ongoing research program.
University of Manitoba and/or to seed community-based research in partnership with First Nations, Métis and Inuit communities. Such support includes but is not limited to the following:

- Seed grants for high quality, original and innovative projects of a short-term nature that are pre-requisite to long-term Tri-Agency support;
- development grants to defray the costs associated with the preparation of large-scale research initiatives for which research support from the Tri-Agencies is being sought;
- funding for the partial support of post-doctoral fellows where the fellow has an integral role in the project;
- funding for minor pieces of research equipment to support the project; and
- funding for community members as research assistants.

The program, however, does not provide funding for:

- conference travel;
- equipment servicing;
- publication or page charges;
- visiting professorships/lectureships;
- start-up and bridge/emergency support; or
- travel costs for leaves, including research and study leaves

In terms of visiting professorships/lectureships, support may be sought from the Samuel Weiner Distinguished Visitor Fund, the Distinguished Visiting Lectureship Fund, or the Knight Lectureship Fund. Information on the first of these funds is available from the Office of the Vice-President (Research and International); the latter two funds are administered by the President’s Office. Requests for start-up or bridge/emergency support should be referred to the appropriate Dean/Director.

Support is provided for the direct costs of research, including research assistance, support for technical, professional and secretarial services, equipment (purchase or rental), research-related travel and supplies. All items must be essential to the conduct of the proposed research and must be carefully justified. Expenses will not be eligible for support if these are incurred prior to the grant start date.

The maximum level of support per application is $25,000 which may be used over a two-year term. Applicants must develop their proposed budgets with this figure in mind.

Evaluation Process and Criteria

Applications for research support are reviewed and adjudicated by members of the Indigenous Research Grants Committee (IRGC), who are appointed by the Vice-President (Research and International).

Applications are assessed on the basis of the following criteria:

- the quality and originality of the proposal and the extent to which it is consistent with the purpose of the UIRP;
- the involvement of Indigenous persons and communities/organizations;
- the plans for engaging with the community as applicable, including reciprocity, respect, and contributions to the community;
• the research/scholarly/creative achievements of the applicant(s), measured against the stage(s) of their career(s);

• the plans of the applicant(s) to apply for Tri-Agency funding;

• any special circumstance or other factor deemed appropriate in a particular instance (e.g., research career interruptions/delays, career patterns and responsibilities).

**Competition Deadline Dates and Program Administration**

One competition will be held annually with a deadline date of **November 15**. If this date falls on a weekend or statutory holiday, the deadline moves to the next business day. The UIRP is administered by the Office of Research Services.

**Conditions of the Award**

Successful applicants will be expected to apply to the next appropriate Tri-Agency (CIHR, NSERC or SSHRC) program competition normally **within one year** of the expiration of their UIRP grant. UIRP grant-holders who do not submit an application to a Tri-Agency competition within this timeframe may be ineligible from applying for future University Internal Grant programs.

Research supported by the UIRP must comply with the University policies on the conduct of research, specifically the University policy on research ethics and, where applicable, the University policies on research involving the use of animals, human subjects, or biohazards. It is the responsibility of the applicant(s) to secure the appropriate approvals for the proposed research from the University and from the relevant Indigenous communities/organizations; funds will not be released until all such approvals have been obtained. Applicants are strongly encouraged to consult the OCAP principles (Ownership, Control, Access, Possession) and recent documents from the Tri-Agencies regarding Aboriginal Research ([http://www.sshrc-crsh.gc.ca/funding-financement/merit_review-evaluation_du_merite/guidelines_research-lignes_directrices_recherche-eng.aspx](http://www.sshrc-crsh.gc.ca/funding-financement/merit_review-evaluation_du_merite/guidelines_research-lignes_directrices_recherche-eng.aspx); [http://www.pre.ethics.gc.ca/eng/policy-politique/initiatives/tcps2-epc2/chapter9-chapitre9/](http://www.pre.ethics.gc.ca/eng/policy-politique/initiatives/tcps2-epc2/chapter9-chapitre9/)). If appropriate approvals have not been obtained and forwarded to the Office of Research Services within six (6) months following the award notice, funds will automatically be returned to the UIRP. Grant-holders may request to extend the period within which approvals must be obtained by writing to the Office of Research Services, to the attention of the appropriate contact person, prior to the return of funds as noted above. Such requests must include a justification.

Research grants must be used for the project and purposes described in the application. Grant-holders wanting to transfer funds from one budget category to another in response to changing research needs or to use funds for a new budget item must secure the prior written approval of the Office of Research Services.

The award recipient is responsible for the use of the funds and for any over-expenditure of research accounts. Expenditures must comply with University regulations concerning the use of special project funds and must be made in accordance with standard University financial procedures. Grants involving the purchase of equipment are made on the understanding that any costs associated with the installation, operation, and maintenance of any equipment purchased will be the responsibility of the researcher and his/her department.

UIRP awards normally terminate on the date specified in the award notification letter and any unspent funds are automatically returned to the UIRP. Grant-holders may request to have the period of the award extended by writing to the appropriate contact person in the Office of Research Services not later than one month prior to the end date of the award. Such requests must include a justification for the extension.

**Within three months of the completion or termination of the grant, a final report must be submitted to the Office of Research Services.** This report should not exceed two pages and should describe: what was accomplished, including a summary of the major research outcomes; the plans for research and knowledge dissemination, including an indication of any publications/paper presentations resulting from the grant or in press/in preparation and community meetings/presentations/reports; the engagement of Indigenous persons, organizations
and communities; research personnel trained; Tri-Agency and other external funding that has been obtained or applied for as a result of the project; and future funding prospects. **Subsequent applications for research support will not be considered unless all final reports pertaining to previous awards have been submitted to the Office of Research Services.**

If an award recipient receives an award for the same work from an external agency as a result of a concurrent or previous application, the UIRP award or balance remaining will be recalled.

If an award recipient loses his/her eligibility to hold internal grant funding during the term of award, all unused funds must be returned to the program’s funding pool.

Grant-holders are requested to acknowledge the assistance of the University of Manitoba Indigenous Research Program in all publications, presentations and media coverage resulting from this support.
Guidelines for Preparing a UIRP Application

General Presentation

- Font must be 12 pts (where unrestricted by the form itself).
- Margins should be set at a minimum of 3/4” on free-form attachments.

Attachments:

The description of your proposed research must not exceed five pages. You may include an additional two pages for references, but no further attachments will be accepted with the exception of quotations (e.g., for equipment costing >$500, or a fee for a specific service).

Preparing the Research Proposal

Through the research proposal, applicants demonstrate their competence to conduct the proposed research. Accordingly, applicants are expected to provide a systematic, logical narrative which demonstrates familiarity with the subject matter, and a carefully formulated plan of the research. Applicants are reminded that the members of the IRGC must make their judgments on the basis of what is presented. Other things being equal, applications are more likely to be funded if they are concise, lucid, and complete.

A narrative style should be used, with headings included for the sake of clarity. As the IRGC might not include a member from an applicant’s discipline, applicants are advised to avoid highly specialized technical language and/or disciplinary jargon, where possible. Avoid using acronyms and abbreviations or explain them fully.

In general, the proposal describes the plan for carrying out the work, proceeding from theoretical and/or conceptual considerations to a description of the specific project to be conducted, and culminating in a budget that describes the resources required to complete the project. While the content and organization of the proposal may vary according to the nature of the project and in the interests of clarity, certain essentials must be covered in the proposal. These include:

- the objectives of the research, including its relationship to existing research and literature;
- the potential theoretical and practical significance of the proposed research;
- the theoretical/conceptual framework guiding the research and, where applicable, the research hypotheses;
- the involvement of Indigenous persons and communities/organizations and plans for engaging with the community, as applicable;
- the methods and procedures to be used and the resources that are required, with particular emphasis on those for which funding is sought/are included in the budget; and
- a timetable for the completion of the proposed research.

References to previous work should be included as appropriate. Curriculum vitae or article reprints should not be included and will not be circulated to members of the IRGC.

Preparing and Justifying the Budget

The budget quantifies the research plan in terms of personnel, materials, supplies and other requirements. Accordingly, it is essential that the link between the research proposal and the budget be clear (e.g., what duties assistants will perform, how materials and equipment will be used, etc.). All budget items must be essential to the
conduct of the research and a brief, clear justification for each budget item must be provided. The following general guidelines are provided for each of the major budget categories.

**Personnel (student, technical, secretarial, professional):** The details regarding the nature of the tasks to be carried out, the level of responsibility, the period of employment and the proposed rate of pay (hourly, monthly) must be specified. Fringe benefits and payroll levy must be included in the calculation of salaries for research personnel.

When requesting secretarial support, a case must be made as to why departmental secretarial services are insufficient or unavailable.

**Materials and Supplies:** It is assumed that standard office and laboratory supplies (including photocopying) are provided by the department. When this is not the case or when unusual items or large quantities are requested, a complete justification must be provided.

**Equipment:** When requesting essential research equipment costing over $500 per item, the applicant must confirm that he/she has made efforts to determine if the needed equipment is owned by the University and, if so, whether it is available for use. Applicants must also comment on the extent to which the requested equipment will be made available for use by other university researchers and on the likely extent of this use. For items over $500, quotations must be provided.

**Travel:** The specific details regarding the purpose of the trip, destination and length, mode and cost of travel, must be provided. When travel is proposed for the purpose of research collaboration, the need for such collaboration in lieu of mail, telephone, FAX, and electronic mail must be clearly demonstrated. Similarly, when proposing travel to consult library or archival materials, a justification for this travel in lieu of reviewing or purchasing materials through inter-library loan, document delivery, etc. must be provided.

**Post-doctoral support:** As this fund provides only partial support for the salary of a post-doctoral fellow, the applicant must provide details on the other funding source(s). Applicants are reminded that the salary of any individual supported under this program must meet the University minimum (please consult the Office of the Vice-President (Research and International) at 474-9488 for the current support levels).

**Application Procedures**

Application forms are available on the web at: [http://umanitoba.ca/research/ors/internalfunding_deadlines_forms.html](http://umanitoba.ca/research/ors/internalfunding_deadlines_forms.html). If you have any questions, please contact the appropriate contact person. **The application must be filled out in the format provided.**

The complete original signed application with all supporting documentation should be forwarded to the Office of Research Services, researchgrants@umanitoba.ca. Late and incomplete applications will not be considered.

The application deadline date is **November 15.** If this date falls on a weekend or statutory holiday, the deadline moves to the next business day.

Results of the competitions will normally be announced approximately eight weeks after the application deadline. There is no provision for appeal of funding decisions.
