**Description of Research**

Yifan.Wei@umanitoba.ca

Dr. Yifan Wei is a member of the Business Administration department. His research focuses on the impact of intangibles, such as corporate culture, innovation and ethics, on corporate outcomes. Yifan's research shows that a business is much more than the sum of its debt and equity.

Current projects Yifan is working on include:

- Measuring the impact of sexual harassment and racism on firm value
- Estimating whether patent litigation impacts partner firm outcomes
- Identifying effects from disclosing risk on real firm actions
- Determining whether employee empowerment can positively affect firm value

Dr. Mingzhi Liu

Dr. Mingzhi Liu is a member of the Accounting & Finance department. His research focuses on the impact of intangibles, such as corporate culture, innovation and ethics, on corporate outcomes. Mingzhi's research shows that a business is much more than the sum of its debt and equity.

His current projects include:

- Determining whether employee empowerment can positively affect firm value
- Estimating whether patent litigation impacts partner firm outcomes
- Identifying effects from disclosing risk on real firm actions
- Determining whether employee empowerment can positively affect firm value

Dr. Yuvraj Gajpal

Dr. Yuvraj Gajpal is a member of the Supply Chain Management department. His research focuses on the impact of intangibles, such as corporate culture, innovation and ethics, on corporate outcomes. Yuvraj's research shows that a business is much more than the sum of its debt and equity.

His current projects include:

- Determining whether employee empowerment can positively affect firm value
- Estimating whether patent litigation impacts partner firm outcomes
- Identifying effects from disclosing risk on real firm actions
- Determining whether employee empowerment can positively affect firm value

Dr. Bruno Dyck

Dr. Bruno Dyck is a member of the Business Administration department. His research focuses on the impact of intangibles, such as corporate culture, innovation and ethics, on corporate outcomes. Bruno's research shows that a business is much more than the sum of its debt and equity.

His current projects include:

- Determining whether employee empowerment can positively affect firm value
- Estimating whether patent litigation impacts partner firm outcomes
- Identifying effects from disclosing risk on real firm actions
- Determining whether employee empowerment can positively affect firm value
