QUESTION: The correlation between student midterm scores and final exam scores is 0.55. The midterm scores for all students has a mean of 85 and a standard deviation of 6, while the final exam has a mean of 70 and standard deviation of 9. Gloria scored 93 on the midterm. **What mark can we predict for her final exam score?**

The correlation between student midterm scores and final exam scores is 0.55. The midterm scores for all students has a mean of 85 and a standard deviation of 6, while the final exam scores has a mean of 70 and standard deviation of 9. Gloria scored 93 on the midterm. **What can we predict her final exam score to be?**

G iven:	Correlation (r) = 0.55 Midterm mean (\bar{x}) = 85 Midterm Standard deviation (S_x) = 6 Final exam mean (\bar{y}) = 70 Final exam Standard deviation (S_y) = 9 Gloria's Midterm score (x) = 93
