1. The cost per FTE student is, by definition, sensitive to the number of FTE students within a given faculty in any given year. Much of the variation in the costs between years can be attributed to the normal fluctuation in student counts. As such, programs of study with smaller numbers of graduate students may record higher degrees of volatility in costs between years as compared to programs with larger populations. Also, graduate programs of study that do not have graduate students will show the entire allocated cost.
2. Graduate FTE students in the Faculty of Medicine do not include Post Graduate Medical Education (PGME) students.
