

**Department of Soil Science  
Policy on Graduate Student Support**

Approved by Department Council  
6-Apr-2017

The revised minimum level of graduate student financial support will be in effect for all graduate students supported by research grants for which FAAF's were submitted after 7-Apr-2017

The Department of Soil Science requires a minimum level of financial support of \$19,000 per year for M.Sc. students for 2 years and \$23,000 per year for Ph.D. students for 3 years. This minimum level of financial will be considered as a combination of the student's research assistantship/stipend, scholarships, bursaries, and employer's salary (with the employer's support for the student's graduate program expressed as a letter of support).
