

DEPARTMENT OF SOIL SCIENCE

Seminar Series

Winter 2021

Seminars begin at 12:30 pm on the dates indicated and will be held online. Please contact Lynda Whitlam (lynda.whitlam@umanitoba.ca) for information on how to connect.

Wednesday, January 6 – Dr. Clay Robinson, Illinois State University. “Soils around the world.”

Wednesday, January 20 – Dr. Helen Jarvie, University of Waterloo. “A clearer view through murky waters? Eutrophication risk, resilience and recovery.”

Wednesday, January 27 – Dr. Jian Liu, University of Saskatchewan. “Agricultural water quality in cold climate regions: Drivers and potential solutions.”

Wednesday, February 10 – Dr. Martin Entz, Department of Plant Science, University of Manitoba. “The world’s long-term agronomic field studies: What can they teach us?”

Wednesday, February 24 – Dr. Amana Kedir, School of Science and the Environment, Memorial University of Newfoundland. “Phosphorus dynamics in the boreal Podzols converted to agriculture.”

Wednesday, March 3 – Jess Nicksy and Joanne Thiessen Martens, Department of Soil Science, University of Manitoba. “What goes around comes around: The agronomy of closing the human nutrient cycle.”

Wednesday, March 10 – Takudzwa Nawu, Department of Soil Science, University of Manitoba. “Organic amendment effects on productivity of well sites reclaimed with suboptimal topsoil replacement depth.”

Wednesday, March 24 – Dr. Don Flaten, Department of Soil Science, University of Manitoba. “45 years of soil fertility lessons: some learned and some forgotten.”

Wednesday, March 31 – Dr. Linda Jewell, St. John’s Research and Development Centre, Agriculture and Agri-Food Canada. Title TBA.

Wednesday, April 7 – Dr. Manasah Mkhabela, Department of Soil Science, University of Manitoba. “Robbing Peter to pay Sam: Nitrogen trade-offs in conventional and no-tillage systems.”
