

Sample When Dry

Wendy Kostur, Senior Agronomist, 360 Ag Consulting

I've been telling my dreams to 360 Ag Consulting
About the yields I'd like to grow
I said friend do you think
I'll ever get there
Then listened to their wisdom back to me
So we discussed my goals for the future
'bout the potential I'm pushing to find
Is there a high yielding crop in my future, yeah?
So many things on my mind
We discuss best options for my equipment
And when is the right time
And how do you put your nutrients in the ground
Because we know
Soil sampling is important when its dry.....dry, dry, dry
Especially when prices are high.....high, high, high
