

Funding Change – The Prairie Watersheds Climate Program

Dan Cox, Project Manager, Manitoba Association of Watersheds
dan@manitobawatersheds.org

The Prairie Watersheds Climate Program (PWCP) provides up to \$40 million in financial support, through the On-Farm Climate Action Fund (OFCAF), to producers in Manitoba and Saskatchewan to accelerate their adoption and implementation of on-farm beneficial management practices (BMPs) to reduce Greenhouse Gas (GHG) emissions, support production efficiency, sustainability, and resiliency on their farm operations. To assist producers with their adoption of new BMPs, the program offers producers resources to support BMP implementation and provide BMP design recommendations. The three streams of PWCP are improving nitrogen management, increasing adoption of cover cropping, and expanding the adoption of rotational grazing.
