COURSE DETAILS

Course Title & Number: PLNT 2520 – Genetics

Number of Credit Hours: 3

Class Times & Days of Week: Lectures MWF 10:30 am – 11:20am; Labs T or R 2:30- 5:15pm

Location for classes/labs/tutorials: lecture will be in 138 Agriculture/ Labs will be in Agriculture 342

Pre-Requisites: PLNT 2520 is a course of study in the principles of genetics for students who have: A minimum grade of "C" in BIOL 1020 and BIOL 1030 or the former 071.125. Not to be held with BIOL 2500 or the former BOTN 2460 (or 001.246).

Instructor Contact Information

Instructor(s) Name & Preferred Form of Address: Dr. Harmeet Singh Chawla

Office Location: Office 307, Plant science department- third floor.

Office Hours or Availability: Following each class, I will stay in my office for 15 minutes to answer any course-related questions. Please feel free to come after class whenever you prefer. You can also make appointments within UM Learn via Webex with Dr. Chawla or Lauren or Caroline on an as-needed basis. Feel free to email Dr. chawla at Harmeet.chawla@umanitoba.ca. Please direct lab-related questions to **Lauren Gislason** - gislasol@myumanitoba.ca. or **Rajbir Kaur** - kaurr70@myumanitoba.ca. Feel free to talk to us about any issue relating to the course. Please start this process early in the semester. Far too often, students leave their questions and concerns until after their grade is lower than expected. I encourage you to discuss the course or course material frequently over the semester.

Office Phone No.

Email: Harmeet.chawla@umanitoba.ca
All email communication must conform to the [Communicating with Students](#) University Policy. We will normally respond to an email with in 24 hours.

Contact:

The best way to discuss the course and course material is by email or making an appointment in UM Learn via Webex. Contact your Teaching Assistant, Lauren or Caroline for lab related questions.

Course Description

PLNT 2520 is designed to give students an introduction to basic principles of genetics and their practical application in the areas of DNA structure and function, genome organization and genetic analysis. Laboratory sessions provide practical experience in solving genetic problems and conducting genetic investigations.

Course Goals

- To develop greater awareness and appreciation of classical and molecular genetics with emphasis on genetic material and its formation, transmission, function and organization
- To define the fundamental concepts and disciplines in genetics.
- To introduce the nature of genetic material and mechanisms/patterns of heredity in plants and animals.
- To introduce you to the interaction between genetic material and environment and teach you how it can affect the genotypic (genetic material) and phenotypic (appearance) expression of plant and animal populations.
- To illustrate how knowledge of genetic material, mechanisms of heredity and interactions of genes and environment can be used to increase production.
- To learn and understand the genetic material at molecular level.

Course Learning Objectives

On completion of this course, students should be able to:

- Describe a historical perspective of genetics, identifying breakthroughs of discovery and prominent scientists who were involved in these breakthroughs.
- Describe Mendelian genetics, chromosomal basis of inheritance and sex determination/linkage.
- Explain gene expression and the environment, genetic mapping in eukaryotes and chromosomal mutations.
- Demonstrate the importance of genetic structure, genetic variation, Hardy-Weinberg Law and inbreeding.
- Evaluate the nature of continuous traits and the statistical tools to analyze them, and describe polygenic inheritance, heritability and response to selection.
- Explain the composition and structure of DNA & RNA, the organization of DNA in chromosomes, DNA replication, transcription and translation.
- Apply problem-solving skills to predict genetic outcomes.

Textbook, Readings, and Course Materials

Required textbook – *Genetic Analysis: An Integrated Approach*. Sanders and Bowman (2nd or 3rd edition). This textbook uses an integrated approach that helps contextualize three core challenges of learning genetics: solving problems, understanding evolution, and understanding the connection between traditional genetics models and more modern approaches. The text is ideally suited for students who have had some background in biology and chemistry and who are interested in learning the central concepts of genetics. Hard copies or E-texts can be found through the University of Manitoba Bookstore. Required readings can be found in the Class Schedule.

Laboratories - Lab books will be supplied as a PDF in UM Learn

Using Copyrighted Material

Please respect copyright. We will use copyrighted content in this course. I have ensured that the content I use is appropriately acknowledged and is copied in accordance with copyright laws and university guidelines. Copyrighted works, including those created by me, are made available for private study and research and must not be distributed in any format without permission. Do not upload copyrighted works to a learning management system (such as UM Learn), or any website, unless an exception to the *Copyright Act* applies or written permission has been confirmed. For more information, see the University's Copyright Office website at <http://umanitoba.ca/copyright/> or contact um_copyright@umanitoba.ca.

Course Technology

– It is a requirement that you have all hardware, software and connection ability necessary to successfully operate UM Learn and WebEx. Grades and communication will occur using UM Learn. We will also be using iClicker Cloud for participation and practice. Thus, you will need to setup an iClicker Cloud account.

Please respect the copyright of all material used within the course. Please see the support section within UM Learn for questions regarding the use of UM Learn, Webex and iClicker Cloud. Please utilize the UM Learn tutorials for remote learning, UM Learn and Webex.

During Classes and Labs - It is the general University of Manitoba policy that all technology resources are to be used in a responsible, efficient, ethical and legal manner. The student can use technology during classes and labs only for educational purposes approved by instructor and/or the University of Manitoba Student Accessibility Services. Students should not participate in personal direct electronic messaging / posting activities (e-mail, texting, video or voice chat, wikis, blogs, social networking (e.g. Facebook) online and offline “gaming” during the scheduled class/lab times. If a student is on call (emergency) the student should switch his/her cell phone and/or notifications off. (@[S Kondrashov](#). Used with permission).

Expectations: I Expect You To

- Attend class regularly. lectures will be held every MWF, 10:30am- 11:20am. Attendance is expected and participation grades will be assigned based on responses to classroom poll questions.
- Attend each and every lab. labs will be held every T & R at 2:30pm.
- Keep on schedule with the required readings.
- Complete the lab tutorials and hand them in at the beginning of each lab.
- Participate regularly in class and in the lab and participate in discussions.
- Contact me if you are unclear on a topic.
- Contact me if you there is an error in grading.
- Treat me, your Teaching Assistant and all your classmates with respect. See [Respectful Work and Learning Environment Policy](#). This includes no texting or social media during class.
- Complete all lab reports, assignments, quizzes and exams individually.
 - (i) All assignments, tutorials and lab projects are subject to the rules of academic dishonesty;
 - (ii) Group members must ensure that a group project adheres to the principles of academic integrity.
 - (iii) All work is to be completed independently unless otherwise specified.
- Complete all quizzes and exams individually.
- I expect you to follow these policies around Class Communication and Academic Integrity.

Class Communication:

Please note that all communication between myself and you as a student must comply with the electronic communication with student policy:

(http://umanitoba.ca/admin/governance/governing_documents/community/electronic_communication_with_students_policy.html). You are required to obtain and use your U of M email account and UM Learn for all communication between yourself and the university.

Academic Integrity:

Each student in this course is expected to complete their coursework and programs of study with integrity by making a commitment to the six fundamental values of honesty, trust, fairness, respect, responsibility, and courage. <http://umanitoba.ca/student-supports/academic-supports/academic-integrity>

Academic integrity looks like referencing the work of others that you have used and completing your assignments independently unless otherwise specified

If you are encouraged to work in a team, ensure that your project is completed with integrity. You must also do your own work during exams. Plagiarism, duplicate submission, cheating on quizzes, tests, and exams, inappropriate collaboration, academic fraud, and personation are in violation of the Student Discipline Bylaw and will lead to the serious [disciplinary action](#). Visit the [Academic Calendar](#), [Student Advocacy](#), and [Academic Integrity](#) web pages for more information and support.

Recording Class Lectures:

Please note that this material is copyrighted by (University of Manitoba, 2023). No audio or video recording of this material, lectures, or presentations is allowed in any format, openly or surreptitiously, in whole or in part without permission of Dr. Harmeet Singh Chawla. Course materials (both paper, digital and the recorded classes and lab) are for the participant's private study and research, and must not be shared. Violation of these and other Academic Integrity principles, will lead to serious disciplinary action.

Student Accessibility Services:

The University of Manitoba is committed to providing an accessible academic community. [Students Accessibility Services \(SAS\)](#) offers academic accommodation supports and services such as note-taking, interpreting, assistive technology and exam accommodations. Students who have, or think they may have, a disability (e.g. mental illness, learning, medical, hearing, injury-related, visual) are invited to contact SAS to arrange a confidential consultation.

Student Accessibility Services
520 University Centre
Phone: (204) 474-7423
Email: Student_accessibility@umanitoba.ca

Expectations: You Can Expect Me To

- Arrive before class and stay after class to answer any questions you may have.
- Explain and provide examples of the topics listed below in the class schedule.
- Make sufficient time outside of class to meet with students and make sure course material is clear.
- A large part of my teaching practice includes the use of questions in class. I expect students to make an effort to respond and join in on class discussions.
- Provide an unbiased grading scheme.
- Return all graded assignments and exams within 2 weeks of the due date.
- Help you succeed in PLNT 2520 and your degree.

CLASS SCHEDULE AND COURSE EVALUATION

This schedule is subject to change at the discretion of the instructor and/or based on the learning needs of the students but such changes are subject to [Section 2.8 of ROASS](#).

Date	Class Content & Teaching Strategies	Required Readings or any Pre-class Preparation	Evaluation		
			Type of Assessment	Due Date	Value of Final Grade
6/9/23	Introduction				
9/9/23	Intro to Modern Genetics	Chapter 1			
11/9/23	Mendelian Genetics	Chapter 2			
13/9/23	Mendelian Genetics	Chapter 2			
15/9/23	Mendelian Genetics	Chapter 2			

18/9/23	Mendelian Genetics	Chapter 2			
20/9/23	Mendelian Genetics	Chapter 2			
22/9/23	No class				
25/9/23	No class				
27/9/23 (Online Guest lecture)	Chromosomal Basis of Inheritance: Cell division	Chapter 3			
29/9/23 (Online Guest lecture)	Chromosomal Theory of Inheritance	Chapter 3			
2/10/23	No class				
4/10/23	Extensions of Mendelian Analysis I	Chapter 4			
6/10/23	Extensions of Mendelian Analysis II	Chapter 4			
11/10/23	Gene Expression and the Environment	Chapter 4			
13/10/23	Gene Expression and the Environment	Chapter 4			
16/10/23	Genetic linkage and Mapping in Eukaryotes I	Chapter 5			
18/10/23	Genetic linkage and Mapping in Eukaryotes II	Chapter 5			
20/10/23	Genetic linkage and Mapping in Eukaryotes III	Chapter 5			
23/10/23	Lecture Test		Quiz		20 %
25/10/23	Genetic linkage and Mapping in Eukaryotes IV	Chapter 5			
27/10/23	DNA Structure DNA Replication	Chapter 7			
30/10/23	DNA Structure DNA Replication	Chapter 7			
1/11/23	RNA and Transcription	Chapter 8			
3/11/23	Translation	Chapter 9			
6/11/23	Mutations	Chapter 11			
8/11/23	Mutations	Chapter 11			
10/11/23	Mutations	Chapter 11 & 13			

13/11/23	Fall Term Break				
15/11/23	Fall Term Break				
17/11/23	Fall Term Break				
20/11/23	Lecture Test		Quiz		20 %
22/11/23	Population Genetics	Chapter 22			
24/11/23	Population Genetics	Chapter 22			
27/11/23	Population Genetics	Chapter 22			
29/11/23	Quantitative Genetics	Chapter 21			
1/12/23	Quantitative Genetics	Chapter 21			
4/12/23	Quantitative Genetics	Chapter 21			
6/12/23	Quantitative Genetics	Chapter 21			
8/12/23	Preparatory off				
11/12/23			Final exam		20 %
					60%

Lab Expectations

- **All labs are mandatory**
- You will receive a participation score of 0 points for the lab that is missed.
- All lab reports and lab quizzes must be written independently.
- Tutorial questions are due at the beginning of each laboratory period.
- Participation is also heavily weighted in the laboratory section.
- Maintain complete respect for your Teaching Assistants at all times.
- Students are encouraged to seek help from your Teaching assistant outside of the lab period.

LABORATORY PROJECTS: The series of projects outlined in the laboratory manual are designed to acquaint the student with the physical basis of inheritance and the basic principles (laws) of genetics. The projects are designed to give actual experience in observing, tabulating, and interpreting genetic research. Emphasis is placed on the use of statistics as a means of evaluating results, since this is necessary in genetic experiments.

Students will be expected to have carefully read the exercise of the day before coming to the laboratory so that they will understand the objectives, terminology and methods of each exercise.

Students are to hand in individual and unique reports even though the data will be provided to the class.

TUTORIAL QUESTIONS: The laboratory exercises include problem solving. Each problem is chosen to represent a particular genetic principle presented in the lectures. Students are advised to be sure to complete all problems and to understand the principles involved. This work will compose a portion of your participation grade and will improve your overall lab experience. Participation in the tutorial will be assessed by the instructor as part of the laboratory marks. **Answers to all tutorial questions need to be handed in at the beginning of the respective lab.**

LABORATORY QUIZZES: The set of three quizzes is based on questions typical of the practice questions. The quizzes are set by each instructor and are typically of 40 minutes duration at the start of the laboratory period.

Lab Schedule

Lab Content & Teaching Strategies	Required Readings or Pre-Class Preparations	Type of Assessment	Value of Final Grade
I. Detailed discussion of Cell Division (Mitosis and Meiosis)	Lab manual: Mitosis and Meiosis	Tutorial 1 - Mitosis and Meiosis questions	30%
II. Introduction to Chi-Square Test. III. Introduction to Drosophila – Practice Cross	Lab manual	Tutorial 2 - Mendelian Inheritance questions	
Prepare cultures of Drosophila Cross 1 (Sex Linkage)	Lab manual	Tutorial 3 - Sex Linkage questions	
-Euthanize parents of Cross #1 -Prepare cultures of Drosophila Cross #2 (3-Point Linkage)	Lab manual	- Quiz on Labs 1, 2 and 3 - Tutorial 4 - Gene Interaction questions	
- Transfer 2-3 pairs of F1's from Cross #1 -Euthanize parents of Cross #2 -Rapid cycling Brassica (RCB) experiment	Lab manual	Tutorials 5 + 6 - Genetic Linkage and Mapping questions	
- Euthanize F1's of Cross #1 -Transfer 2-3 pairs of F1 from Cross #2 to fresh cultures	Lab manual	Hand in RCB report - DUE	
- Euthanize F1 parental testcross flies from Cross #2. - Tabulate and analyze F2 data from Cross #1.	Lab manual	Quiz on Labs 4, 5 and 6. Tutorial 7 – DNA and RNA questions	
- PTR (Tan Spot) Experiment - Tabulate and analyse testcross data from Cross #2.	Lab manual	Tutorial 8 – Chromosomal Mutations questions	
Hand in PTR report - DUE	Lab manual	Report	
Tutorials 9 & 10 – Population and Quantitative Genetics - DUE	Lab manual		
Quiz on Labs 8, 9, 10	Lab manual	Quiz	

Grading

All of your assignments and evaluations will be calculated as a percentage and converted into a grade point. Your final grade point will be determined by where your calculated grade point fits into the grade point range.

Letter Grade	Percentage out of 100	Grade Point Range	Final Grade Point
A+	95-100	4.25-4.5	4.5
A	86-94	3.75-4.24	4.0

B+	80-85	3.25-3.74	3.5
B	72-79	2.75-3.24	3.0
C+	65-71	2.25-2.74	2.5
C	60-64	2.0-2.24	2.0
D	50-59	Less than 2.0	1.0
F	Less than 50		0

Voluntary Withdrawal

Please note that the last day to DROP Fall 2023 Term courses without penalty is Sep. 19, 2023. The voluntary Withdrawal date is November 21, 2023. Students who do not drop the course by the deadline will be assigned a final grade. Withdrawal courses will be recorded on an official transcript. Refer to the [Registrar's Office](#) web page for more information. I am happy to discuss your progress and aid in your decision throughout the entire term.

ASSIGNMENT DESCRIPTIONS

COURSE ASSESSMENT

A variety of methods will be used to give all types of learners an opportunity to excel.

GRADING SYSTEM:		SCHEDULE:
Laboratory	30%	Page 10 and see lab manual
Lecture Tests	60%	Each worth 20% (Oct 23, Nov 20, Dec 11)
Participation	10%	See rubric below

***A passing grade in the lab must be achieved to pass the entire course.**

Class Participation Rubric

Class participation will be evaluated using iClicker Cloud. For each question asked students will receive one point for answering the question and one point for answering correctly. The iclicker grade will be determined as the sum of all questions asked during lectures and weighted according to the points earned for each question. Students that receive at least 80% of the iclicker points will receive 10/10, those with 70-79% of the points will receive 9/10, those with 60-69% of the points will receive 8/10, those with 50-59% of the points will receive 7/10, those with 40-49% of the points will receive 6/10, and those with less than 40% of the iclicker points will get 0/10.

Referencing Style

All references cited in your report should be in alphabetical order according to the senior (first) author's surname. The following is the standard method for citing references to the appropriate journal or book referred to in the body of your Discussion.

Example 1 - citation of a multi-authored book in which each chapter is written by a different author but the complete publication is edited by one or two persons. The author(s) and page numbers of the specific chapter are cited.

Baker, L.M. and E. Green. 1984. The inheritance of eye colour. p. 187-241, In: Human genetics. A. Brown (ed.), Plenum Press, New York.

Example 2 - citation of a book as in Example 1 except that only one person has authored and edited the entire book (e.g. a textbook).

Russell, P.J. 1986. Translation of the genetic message. p. 437-466, In: Genetics. Little, Brown and Co., Boston.

Example 3 - citation of a paper from a scientific journal.

Kerby, K. and J. Kuspira. 1987. The phylogeny of the polyploid wheats. Genome, 29:722-737.

Assignment Feedback

All assignments and evaluations will be returned within a maximum of two weeks following the due date or evaluation date. **The voluntary withdrawal date is November 21, 2023. By this time point you will have over 40% of your grade to base your withdrawal decision on.**

Assignment Extension and Late Submission Policy

- All assignments should be submitted by the due date listed in the course schedule. If an extension is required the student must inform the instructor in writing.
- Students who fail to submit work on time and do not ask for an extension are subject to the late assignment penalty. The penalty is an 10% per day reduction in the value of the student's grade for up to five days. After that point, the work is worth zero percent. Students who are not able to submit assignments on time due to health or other compassionate reasons must submit a written explanation **ahead of time** or, if that is not possible, after the missed due date, but no later than one week after the missed assignment due date. If an extension is granted, the penalty will be 4% for each working day of the extension to a maximum 50%. Only in extreme circumstances will an extension be granted with no late deductions.
- Students are expected to make every effort possible to submit required work by the due date.

The following factors are considered not to be contributing to or constituting extenuating circumstances:

- Computer failure will not be considered a valid reason for the late submission of assignments, and extensions of more than “two life happens days” (see course outline for more details) will not be granted as a result of computer failure. Software crashes, disk failures and printing difficulties are an unavoidable aspect of using a computer and should be anticipated and planned for.
- Assessment tasks in other subjects: Students are given fair notice of assessment due dates and are expected to manage their time in order to meet the set deadlines. This specifically includes assessment resulting from an approved overload.
- Employment responsibilities and routine financial support needs: Only in very exceptional circumstances would students be eligible for extensions for work commitments (for example, an unplanned, urgent and unavoidable overseas work task for a professional full-time worker studying part-time).
- Social activities and commitments: Social activities (for example, recreational travel (domestic or international), planned events such as weddings, or participation in a University play) are expected

to be undertaken and managed by students without interfering with their ability to fulfil assessment tasks.

- Stress or “normal” anxiety: the stress or anxiety normally associated with the completion of required assessment tasks or any aspect of course work is not considered. A medically diagnosed anxiety disorder, however, may be grounds for an extension or other accommodation under the policy for students experiencing academic disadvantage.

Contingency teaching plan for Fall 2023

The Department of Plant Science in consultation with the Faculty of Agricultural and Food Sciences has devised a plan so that there is minimal impact on the delivery and content of the course, should the instructor fall sick and is unable to continue lectures in-person. Please be assured that the alternative plan outlining any deviation from the normal mode of instruction will be communicated to you as quickly as possible if/when the need arises.

UNIVERSITY SUPPORT OFFICES & POLICIES

Writing and Learning Support

The Academic Learning Centre (ALC) offers services that may be helpful to you throughout your academic program. Through the ALC, you can meet with a learning specialist to discuss concerns such as time management, learning strategies, and test-taking strategies. The ALC also offers peer supported study groups called Supplemental Instruction (SI) for certain courses that students have typically found difficult. In these study groups, students have opportunities to ask questions, compare notes, discuss content, solve practice problems, and develop new study strategies in a group-learning format.

You can also meet one-to-one with a writing tutor who can give you feedback at any stage of the writing process, whether you are just beginning to work on a written assignment or already have a draft. If you are interested in meeting with a writing tutor, reserve your appointment two to three days in advance of the time you would like to meet. Also, plan to meet with a writing tutor a few days before your paper is due so that you have time to work with the tutor's feedback.

These Academic Learning Centre services are free for U of M students. For more information, please visit the Academic Learning Centre website at: <http://umanitoba.ca/student/academiclearning/>

You can also contact the Academic Learning Centre by calling 204-480-1481 or by visiting 205 Tier Building.

University of Manitoba Libraries (UML)

As the primary contact for all research needs, your liaison librarian can play a vital role when completing academic papers and assignments. Liaisons can answer questions about managing citations, or locating appropriate resources, and will address any other concerns you may have, regarding the research process. Liaisons can be contacted by email or phone, and are also available to meet with you in-person. A complete list of liaison librarians can be found by subject: <http://bit.ly/WcEbA1> or [name](#). In addition, general library assistance is provided in person

at 19 University Libraries, located on both the Fort Garry and Bannatyne campuses, as well as in many Winnipeg hospitals. For a listing of all libraries, please consult the following: <http://bit.ly/1sXe6RA>. When working remotely, students can also receive help online, via the Ask-a-Librarian chat found on the Libraries' homepage: www.umanitoba.ca/libraries.

Section (b) sample: re: A statement regarding mental health that includes referral information:

For 24/7 mental health support, contact the Mobile Crisis Service at 204-940-1781.

Student Counselling Centre

Contact SCC if you are concerned about any aspect of your mental health, including anxiety, stress, or depression, or for help with relationships or other life concerns. SCC offers crisis services as well as individual, couple, and group counselling. *Student Counselling Centre:* <http://umanitoba.ca/student/counselling/index.html>

474 University Centre or S207 Medical Services
(204) 474-8592

Student Support Case Management

Contact the Student Support Case Management team if you are concerned about yourself or another student and don't know where to turn. SSCM helps connect students with on and off campus resources, provides safety planning, and offers other supports, including consultation, educational workshops, and referral to the STATIS threat assessment team.

Student Support Intake Assistant <http://umanitoba.ca/student/case-manager/index.html>

520 University Centre
(204) 474-7423

University Health Service

Contact UHS for any medical concerns, including mental health problems. UHS offers a full range of medical services to students, including psychiatric consultation.

University Health Service <http://umanitoba.ca/student/health/>

104 University Centre, Fort Garry Campus
(204) 474-8411 (Business hours or after hours/urgent calls)

Health and Wellness

Contact our Health and Wellness Educator if you are interested in [peer support from Healthy U](#) or information on a broad range of health topics, including physical and mental health concerns, alcohol and substance use harms, and sexual assault.

Health and Wellness Educator <https://umanitoba.ca/student/health-wellness/welcome-about.html>

britt.harvey@umanitoba.ca

Live Well @ UofM

For comprehensive information about the full range of health and wellness resources available on campus, visit the Live Well @ UofM site:

<http://umanitoba.ca/student/livewell/index.html>

Section (c) sample: re: A notice with respect to copyright:

All students are required to respect copyright as per Canada's *Copyright Act*. Staff and students play a key role in the University's copyright compliance as we balance user rights for educational purposes with the rights of content creators from around the world. The Copyright Office provides copyright resources and support for all members of the University of Manitoba community. Visit <http://umanitoba.ca/copyright> for more information.

Section (d) sample: re: A statement directing the student to University and Unit policies, procedures, and supplemental information available on-line:**Your rights and responsibilities**

As a student of the University of Manitoba you have rights and responsibilities. It is important for you to know what you can expect from the University as a student and to understand what the University expects from you. Become familiar with the policies and procedures of the University and the regulations that are specific to your faculty, college or school.

The [Academic Calendar](http://umanitoba.ca/student/records/academiccalendar.html) <http://umanitoba.ca/student/records/academiccalendar.html> is one important source of information. View the sections *University Policies and Procedures* and *General Academic Regulations*.

While all of the information contained in these two sections is important, the following information is highlighted.

- If you have questions about your grades, talk to your instructor. There is a process for term work and final **grade appeals**. Note that you have the right to access your final examination scripts. See the Registrar's Office website for more information including appeal deadline dates and the appeal form <http://umanitoba.ca/registrar/>
- You are expected to view the General Academic Regulation section within the Academic Calendar and specifically read the **Academic Integrity** regulation. Consult the course syllabus or ask your instructor for additional information about demonstrating academic integrity in your academic work. Visit the Academic Integrity Site for tools and support <http://umanitoba.ca/academicintegrity/> View the **Student Academic Misconduct** procedure for more information.
- The University is committed to a respectful work and learning environment. You have the right to be treated with respect and you are expected to conduct yourself in an appropriate respectful manner. Policies governing behavior include the:

Respectful Work and Learning Environment

http://umanitoba.ca/admin/governance/governing_documents/community/230.html

Student Discipline

http://umanitoba.ca/admin/governance/governing_documents/students/student_discipli

[ne.html](#) and,

Violent or Threatening Behaviour

http://umanitoba.ca/admin/governance/governing_documents/community/669.html

- If you experience **Sexual Assault** or know a member of the University community who has, it is important to know there is a policy that provides information about the supports available to those who disclose and outlines a process for reporting. The **Sexual Assault** policy may be found at:
http://umanitoba.ca/admin/governance/governing_documents/community/230.html
More information and resources can be found by reviewing the Sexual Assault site
<http://umanitoba.ca/student/sexual-assault/>
- For information about rights and responsibilities regarding **Intellectual Property** view the policy [https://umanitoba.ca/governance/sites/governance/files/2021-06/Intellectual Property Policy - 2013_10_01 RF.pdf](https://umanitoba.ca/governance/sites/governance/files/2021-06/Intellectual_Property_Policy_-_2013_10_01_RF.pdf)

For information on regulations that are specific to your academic program, read the section in the Academic Calendar and on the respective faculty/college/school web site

<http://umanitoba.ca/faculties/>

Contact an **Academic Advisor** within our faculty/college or school for questions about your academic program and regulations <http://umanitoba.ca/academic-advisors/>

Student Advocacy

Contact Student Advocacy if you want to know more about your rights and responsibilities as a student, have questions about policies and procedures, and/or want support in dealing with academic or discipline concerns.

<http://umanitoba.ca/student/advocacy/>

520 University Centre

204 474 7423

student_advocacy@umanitoba.ca
